Mr. President, the AFL-CIO [American Federation of Labor and Congress of Industrial Organizations] has sent out a letter to every Senator. This letter is dated May 9. It is signed by Robert McGlotten, the director of the department of legislation for the American Federation of Labor, Congress of Industrial Organizations. It says:

DEAR SENATOR: The Senate will take up S.J. Res. 113, a joint resolution to disapprove the development of the FSX with Japan this week.

The AFL-CIO supports the disapproval of the FSX sale for the following reasons:

Despite Presidential assurances about the protection of sensitive U.S. aerospace technology, we believe that the Japanese will gain direct access to technology that we developed at a cost of $7 billion. Given our experience with color TV's, VHS's, and semiconductors, we believe that the Japanese want access to key software and other aircraft components. This is the only economic explanation for paying more for the FSX as opposed to buying F-16's off the shelf.

The direct purchase of F-16's instead of the coproduction of the FSX would have had an important impact on the Japanese trade surplus with the United States. That surplus last year was over $52 billion.

Just think of it, Mr. President; a $52 billion deficit with the Japanese last year.

This is another example of the failure of the Japanese to open their markets to U.S. products. When given the opportunity to purchase the F-16 directly, the Japanese declined. It is for this reason that the Congress and the administration should place increased reliance on aggressive enforcement of super 301 to open Japan to U.S. products.

May I say, I certainly support that, Mr. President, and will speak later on my views about that.

The assurances of both the Japanese and the Bush administrtion of a 40 percent U.S. share of the potential $6.2 billion FSX is suspect. A careful review of the documents makes clear that any significant U.S. share is dependent on a future decision to produce the FSX.

Absolutely correct, Mr. President. The agreement, the MOU only addresses the first six airplanes that will be built and does not address the follow-on 130 to 170 airplanes. There will be a separate and following memorandum of understanding about that.

Therefore, the economic benefits to the United States are still uncertain. As we have learned from the semiconductor agreement, economic benefit from negotiations with the Japanese are not a certainty.

The semiconductor agreement that my friends in the AFL-CIO referred to

is the agreement in which the United States share of the Japanese market would be permitted to reach 20 percent and we did not get it. My understanding of this, and I stand to be corrected if anybody can show otherwise, is in the end the Japanese denied they had that agreement with us, notwithstanding the fact their own newspapers printed articles to the effect that that negotiated agreement had taken place.

Mr. McGlotten, of the AFL-CIO says:

In conclusion the FSX represents an uncoordinated and ill-advised U.S. policy decision and the Congress should not agree to it. As a nation, we can no longer afford to give away our technology to placate our leading creditor. We must move to reduce trade imbalances without mortgaging our future through the sale of important aviation technology.

"The AFL-CIO urges the Senate to adopt S.J. Res. 113," my joint resolution of disapproval, Mr. President, "and disapprove the FSX agreement."

An interesting thing, Mr. President, in connection with that is from the business side of the ledger, I just want to call the attention of my colleagues to a statement I made the other day that already Mitsubishi is denying business to American business houses that have been involved in the process all the time up until now.

This is an article, Mr. President, that comes from a paper the President would be familiar with, the New York Times. The New York Times of May 10 talks about a company that is named in this article, and that company has been brought to my attention, the BASF Corp. of Parsippany, NJ. That name, may I say, Mr. President, has a lovely ring to it—Parsippany, NJ. I like it. The Chair would be aware of Parsippany, NJ.

This company, less than 2 weeks after President Bush approved the Japanese-American FSX fighter project, a sector of the American aircraft industry, is already crying foul saying it will be shut out of the bidding on a critical component. This American-based maker of a fiber reinforced plastic used in aircraft parts says it was told by the Japanese prime contractor, Mitsubishi Heavy Industries, that its sister unit, the Mitsubishi Rayon Co., would provide the material known as preimpregnated fiber reinforcement, or prepreg.

I do not really know what prepreg is, I must confess. As I said earlier, I do not pretend to have any technical expertise about these things, but I understand prepreg is something they use in making golf club shafts and fishing rods and other things, and also it has a useful participatory part in the making of aircraft to some extent.

So I just want to say to my friend, the President, as he is leaving the room, that a Parsippany, NJ, company is aggrieved. I know staff will correct me if I misrepresent this fact. As I understand it, this company has been making this type of prepreg for General Dynamics in the past in the manufacture of F-16 airplanes. That is what I want the record to show.

Here is an American company that has been making this prepreg for General Dynamics for the F-16's. And what is happening now? The first thing, the first thing, Mr. President, when it looks like we are going to have a deal, this company is out the window because Mitsubishi wants a Japanese company, in this case part of their conglomerate, to make it.

One hand washes another, I guess. The point is, do not be fooled into thinking they are going to give us any breaks. Do not be thinking there is going to be any free lunch. There will not be. The Japanese will get the business, the Japanese will keep the business, and the folks that were building this material in Parsippany, NJ—I love the name Parsippany—how large is Parsippany, NJ, may I ask my friend from New Jersey.

Mr. LAUTENBERG. I would guess about 40,000 to 50,000 people. Growing rapidly. They are not persnickety in Parsippany.

Mr. DIXON. I thank the Senator. The distinguished Senator from New Jersey addressing Parsippany, NJ, a town the same size as my hometown, Belleville, IL. May I say to the Chair, Belleville stands for beautiful city in French, although most of the people there are Dutch. But the point I make is we have not made the deal and already the Japanese are stealing the business.

As this Senator said earlier and will say many times, this will not be the end of it because we are going to see the day, if I have the good fortune to be here in a few years—and if I am here I know I will be here with the distinguished minority leader, who obviously will be here for an eternity because of the high regard of the people of Kansas—I am going to make my "I told you so" speech. Mr. President, I warn you now, because you will be here a long time with the great regard you are going to achieve in this Senate, and if I am here with you I am going to make my "I told you so" speech. I want to warn the Senator from Kansas now, he has to work for the administration, and he does a wonderful, marvelous job and I love him, I am going to make my "I told you so" speech.

Mr. President, you will be here, I know the Senator from Kansas will be here, and the Senator from New Jersey, but about 1996 or so, if I am fortunate enough to join you, I will make my "I told you so" speech. That will be when the Japanese are making all of the parts that used to be made in Parsippany, NJ, and are making all the engines and all the platforms and all the airplanes and are dominant in the commercial aviation industry and in aerospace. If I am here in 1996, I am going to come back here and say "I told you so, I told you so."

Now, I am greatly impressed, Mr. President, to see that both the majority leader and the minority leader are ready to do something and I am prepared to yield to my leader—

Mr. DOLE. Why not just reject this on a voice vote.

Mr. DIXON. If he is prepared to take his spot. I yield the floor, Mr. President.

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER (Mr. ROBB). The Chair recognizes the majority leader, Senator MITCHELL.

Mr. MITCHELL. May I suggest to the Senator from Illinois that if he has any summary or closing remarks, he might deliver them while I confer with the distinguished Republican leader. I did not want to interrupt him. He seemed to be just getting warmed up.

Mr. DIXON. I am delighted to take the floor once again.

The PRESIDING OFFICER. The Chair recognizes the Senator from Illinois for his closing remarks.

Mr. DIXON. Mr. President, while the majority leader and minority leader are conferring, I simply want to say on behalf of the 40,000 people of Belleville, IL, we are on this floor expressing as warmly as we can our regard and our concern for the 40,000 people of Parsippany, NJ, and for others similarly situated in America who will see these jobs go away.

I want to talk about that a minute, Mr. President. The biggest job opportunity in my town was not building prepreg like they do at BASF Corp. in Parsippany, NJ. The biggest deal in my town was a brewery and they made Stag beer there. It was a very good beer, Mr. President. We will all miss it. Finally, Heidelman Brewery, which is a very big brewery in the country, as you know, makes Old Style, Export, and other beers, a great many different beers, bought Stag Brewery which had been in existence in my home town all of my lifetime and long before that—maybe as much as a century. I do not know. I would have to go look at the record. Just this year they closed that brewery. Many of us did everything in the world we could do to try to save it by interesting others in buying the brewery, but it got to be old. Very fine people worked there in very good jobs. Several hundred people lost work.

Now, that is no laughing matter because that was the biggest employer in town other than the two hospitals. You are looking at a Senator who understands that and went through that experience this year. I am compelled

to say that a lot of what we are concerned about here flows from those kinds of experiences that occur over and over again for a variety of reasons all over America.

The point I make is that this fine town in New Jersey will not be the only town in America that will have this experience, losing some business and the jobs going elsewhere because of this FSX deal. That is why the AFL-CIO wrote this letter to the members and that is why many other labor groups and business interests in the country are concerned. That is why when we go home to the townhall meetings, they are outraged and that is why when I participate in radio talk shows people call in and express their outrage; they are talking about jobs, Mr. President, jobs, good jobs, American jobs to build American products in American factories. That is part of the issue as well.

Mr. President, I see the majority leader and the minority leader have conferred, and I am delighted to have had the opportunity to make these closing remarks.

I thank the President and the majority leader and all in attendance for their kindness and their cooperation. I am delighted to yield the floor to listen to the majority leader and his words of wisdom about what the future holds for the Senate after this moment.

The PRESIDING OFFICER. The Chair recognizes the majority leader, Senator MITCHELL.

Mr. MITCHELL. Mr. President, for the information of Senators, there will be no rollcall votes today. I have asked the distinguished Republican leader to meet with me and with the Senator from Illinois and with a Senator who will be representing the point of view in opposition to that of the Senator from Illinois to discuss the schedule for the further handling of this matter following the debate this evening.

We are now awaiting the arrival of those persons necessary for such a discussion.

If the Senator wishes to continue, I am momentarily going to yield the floor because it will take a few moments to assemble the persons necessary for that discussion. If not, I will suggest the absence of a quorum.

Mr. President, I will suggest the absence of a quorum. Before I do that, Mr. President, it is my hope to be able to indicate to Senators in a very short time the schedule for tomorrow, Monday, and Tuesday, so Senators will be able to make their plans accordingly. It awaits only the discussion with the distinguished Republican leader, the Senator from Illinois, and others involved in this issue.

I now suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT OF THE CORPORATION FOR PUBLIC BROADCASTING—MESSAGE FROM THE PRESIDENT—PM 43

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

In accordance with the Communications Act of 1934, as amended (47 U.S.C. 396(i)), I transmit herewith the Annual Report of the Corporation for Public Broadcasting for Fiscal Year 1988.

GEORGE BUSH.

THE WHITE HOUSE, *May 11, 1989.*

MESSAGES FROM THE HOUSE

At 10:49 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has agreed to the following resolutions:

H. Res. 87. Resolution impeaching Walter L. Nixon, Jr., Judge of the United States District Court for the Southern District of Mississippi, of High Crimes and Misdemeanors; and

H. Res. 150. Resolution appointing managers on the part of the House to conduct the impeachment trial against Walter L. Nixon, Jr., a judge of the United States District Court for the Southern District of Mississippi.

The message also announced that Mr. BROOKS, Mr. EDWARDS of California, Mr. CARDIN, Mr. SENSENBRENNER, and Mr. DANNEMEYER have been appointed managers for the trial of the impeachment of Walter L. Nixon, Jr., a judge of the United States District Court for the Southern District of Mississippi.

At 12:31 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that pursuant to the provisions of section 4(a) of title 5, Public Law 99-180, the Speaker appoints as members of the Commission on the Ukraine Famine the following Members on the part of the House: Mr. HERTEL, Chairman, Mr. DORGAN of North Dakota, Mr. BROOMFIELD, and Mr. GILMAN.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, May 11, 1989, he had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 68. Joint resolution to designate the month of May 1989 as "Trauma Awareness Month".

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PELL, from the Committee on Foreign Relations, unfavorably without amendment:

S.J. Res. 113. Joint resolution prohibiting the export of technology, defense articles, and defense services to codevelop or coproduce the FSX aircraft with Japan.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. WARNER, from the Committee on Armed Services:

H. Lawrence Garrett, III, of Virginia, to be Secretary of the Navy (Exec. Rept. No. 101-5).

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. NUNN, from the Committee on Armed Services:

Mr. NUNN. Mr. President, from the Committee on Armed Services, I report favorably the attached listing of nominations.

Those identified with a single asterisk (*) are to be placed on the Executive Calendar. Those identified with a double asterisk (**) are to lie on the Secretary's desk for the information of any Senator since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD on April 4, April 12, April 17, and April 18, 1989 at the end of the Senate proceedings.)

*In the Navy there are 34 promotions to the grade of rear admiral (lower half) (list begins with Don Wilson Baird) (Reference No. 95)

**In the Marine Corps there are 130 promotions to the grade of colonel (list begins with Joseph T. Anderson) (Reference No. 252)

**In the Army there are 11 promotions to the grade of colonel (list begins with John S. Cooke) (Reference No. 271)

**In the Army there are 1,099 appointments to the grade of captain and below (list begins with Timothy F. Abbott) (Reference No. 272)

*Lieutenant General Henry Doctor, Jr., USA, to be placed on the retired list in the grade of lieutenant general (Reference No. 283)

*In the Army Reserve there are 27 appointments to the grade of major general and below (list begins with David H. Lueck) (Reference No. 285)

**In the Air Force there are 19 appointments to the grade of colonel and below (list begins with John E. Hill) (Reference No. 286)

**In the Marine Corps there are 400 appointments to the grade of lieutenant colonel (list begins with Clifford M. Acree) (Reference No. 287)

*In the Army there are 3 appointments to the grade of major general and below (list begins with Richard D. Cameron) (Reference No. 296)

*Admiral James B. Busey, USN, to be placed on the retired list in the grade of admiral (Reference No. 298)

**In the Air Force Reserve there are 25 promotions to the grade of lieutenant colonel (list begins with Patrick J. Belanger) (Reference No. 299)

**In the Army there are 2 promotions to the grade of lieutenant colonel and below (list begins with Juan M. Rico) (Reference No. 300)

**In the Naval Reserve there are 7 appointments to the grade of commander (list begins with Douglas Gibson) (Reference No. 301)

Total: 1,759.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GLENN (for himself, Mr. LEVIN, Mr. NUNN, Mr. ROTH, Mr. COHEN, and Mr. BINGAMAN):

S. 968. A bill to delay the effective date of section 27 of the Office of Federal Procurement Policy Act; ordered held at the desk.

By Mr. MOYNIHAN:

S. 969. A bill to establish the President's Award for Addiction Research; to the Committee on Labor and Human Resources.

By Mr. FOWLER (for himself, Mr. LEAHY, Mr. GORE, and Mr. CRANSTON):

S. 970. A bill to promote low-input agricultural production systems, to maintain farm profitability to encourage land, resource, and wildlife stewardship in connection with Federal farm programs and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. GRASSLEY (for himself and Mr. DECONCINI):

S. 971. A bill to authorize and encourage Federal agencies to use mediation, conciliation, arbitration, and other techniques for the prompt and informal resolution of disputes and for other purposes; to the Committee on Governmental Affairs.

By Mr. WIRTH:

S. 972. A bill to transfer to the Secretary of Health and Human Services the authority of the Secretary of Energy to conduct epidemiological studies of the effects of radiation and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. LUGAR (for himself, Mr. BOSCHWITZ, and Mr. DOLE):

S. 973. A bill to create a Rural Capital Access Program within the Department of Agriculture to encourage lending institutions to provide loans to certain businesses, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. REID (for himself and Mr. BRYAN):

S. 974. A bill to designate certain lands in the State of Nevada as wilderness, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. METZENBAUM (for himself, Mr. HATCH, Mr. PELL, Mrs. KASSEBAUM, and Mr. KENNEDY):

S. 975. A bill to amend the Job Training Partnership Act to encourage a broader range of training and job placement for women, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. WARNER:

S. 976. A bill to postpone the effective date of section 511(e)(3)(B) of the Controlled Substances Act, relating to the disposition of forfeited property and State law; to the Committee on the Judiciary.

By Mr. DOMENICI (for himself, Mr. BOSCHWITZ, Mr. LEVIN, and Mr. DIXON):

S. 977. A bill entitled the "White House Conference on Small Business Authorization Act"; to the Committee on Small Business.

By Mr. INOUYE (for himself, Mr. FORD, Mrs. KASSEBAUM, Mr. DOMENICI, Mr. PACKWOOD, Mr. BAUCUS, Mr. BURDICK, Mr. DASCHLE, Mr. COCHRAN, Mr. MCCAIN, Mr. GORTON, Mr. RUDMAN, Mr. KENNEDY, Mr. ADAMS, Mr. CONRAD, Mr. D'AMATO, Mr. HATFIELD, Mr. BURNS, Mr. BRADLEY, Mr. RIEGLE, Mr. SIMON, Mr. PRESSLER, Mr. DECONCINI, Mr. MURKOWSKI, Mr. SANFORD, Mr. DODD, Mr. WIRTH, Mr. MATSUNAGA, Mr. REID, Mr. BINGAMAN, Mr. KERREY, Mr. STEVENS, Mr. KOHL, Mr. METZENBAUM, and Mr. MOYNIHAN):

S. 978. A bill to authorize the establishment within the Smithsonian Institution of the National Museum of the American Indian, to establish a memorial to the American Indian, and for other purposes; to the Committee on Rules and Administration.

By Mr. DASCHLE (for himself and Mr. CONRAD):

S. 979. A bill to provide grants for designating rural hospitals as medical assistance facilities; to the Committee on Finance.

By Mr. MITCHELL (for himself, Mr. DANFORTH, Mr. HEINZ, Mr. SANFORD, Mr. DODD, Mr. RIEGLE, Mr. KENNEDY, Mr. COHEN, Mr. LAUTENBERG, Mr. PELL, Mr. LEVIN, Ms. MIKULSKI, Mr. MOYNIHAN, Mr. SARBANES, Mr. D'AMATO, Mr. GORTON, Mr. DURENBERGER, Mr. KERRY, Mr. CHAFEE, Mr. LIEBERMAN, Mr. BOREN, Mr. BAUCUS, Mr. PRYOR, Mr. FORD, Mr. SPECTER, Mr. SHELBY, Mr. SASSER, Mr. ROCKEFELLER, Mr. BURDICK, Mr. SIMON, Mr. MCCAIN, Mr. BOND, Mr. INOUYE, Mr. HARKIN, Mr. MCCONNELL, Mr. CRANSTON, Mr. ADAMS, Mr. BREAUX, Mr. JOHNSTON, Mr. COATS, Mr. CONRAD, Mr. BINGAMAN, Mr. LUGAR, Mr. SYMMS, Mr. DIXON, Mr. GORE, Mr. GRASSLEY, Mr. BUMPERS, Mr. RUDMAN, Mr. GRAHAM, Mr. LEAHY, Mr. DOLE, Mr. LOTT, and Mr. DASCHLE):

S. 980. A bill to amend the Internal Revenue Code of 1986 to improve the effectiveness of the low-income housing credit; to the Committee on Finance.

By Mr. BOSCHWITZ:

S. 981. A bill to amend the Internal Revenue Code of 1986 to provide a partial exclusion for capital gain from certain sales of real property acquired from the Federal Savings and Loan Insurance Corporation; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MITCHELL (for himself and Mr. DOLE):

S. Res. 127. Resolution to provide for issuance of a summons and for related procedures concerning the articles of impeachment against Walter L. Nixon, Jr.; considered and agreed to.

By Mr. MITCHELL (for himself and Mr. DOLE):

S. Res. 128. Resolution to provide for the appointment of a committee to receive and to report evidence with respect to articles of impeachment against Judge Walter L. Nixon, Jr.; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GLENN (for himself, Mr. LEVIN, Mr. NUNN, Mr. ROTH, Mr. COHEN, and Mr. BINGAMAN):

S. 968. A bill to delay the effective date of section 27 of the Office of Federal Procurement Policy Act; by unanimous consent, ordered held at the desk until the close of business on May 12, 1989.

DELAY IN IMPLEMENTATION OF SECTION 27 OF THE OFFICE OF FEDERAL PROCUREMENT POLICY ACT

Mr. GLENN. Mr. President, last October the Congress unanimously passed a very important statute concerning the integrity of the Government procurement process as an amendment to the Office of Federal Procurement Policy Act [OFPPA]. Section 6 of Public Law 100-679 created a new section 27 of the OFPPA, entitled "Procurement Integrity"—hereafter section 6. The Reagan-Bush administration indicated its support for section 6 and other provisions of

the legislation in a letter from Acting OMB Director Joseph Wright to me.

The bill was signed by the President in November 1988 and enacted into law. By the terms of Public Law 100-679, section 6 was scheduled to become effective 6 months after the date of enactment, which date is May 16, 1989. It was recognized by the House and Senate Members who played an active role in shaping section 6 that implementing regulations would be necessary to provide specific guidance for the statutory terms of the bill. In fact, the delay in implementation was designed to allow the promulgation of such regulations pursuant to subsection (m) of section 6.

The Defense Acquisition Regulatory Counsel [DARC] at DOD took charge of drafting the required regulations. Other government entities, particularly OFPP under Acting Director Allen Burman, and representatives of industry worked with the DARC and DOD in an effort to craft those regulations. Unfortunately, that process took too long, and it was only Tuesday, May 9, 1989, that the latest draft of the interim regulation has been made available to interested parties, including government procurement authorities and company personnel who are required to comply with the law. This result has frankly been very disappointing to me, but it is a fact. It may tell us something about how unwieldy our system has become that implementation has taken longer than we anticipated. It also tells us that the good people in both industry and government may need a little more time to study the interim regulations in order to adequately implement the law without confusion or inordinate and unreasoned concern.

The administration, particularly DOD, and representatives of industry, which include but are not limited to the Aerospace Industries Association [AIA], the Electronic Industry Association [EIA] and the Professional Services Counsel [PSC] have all requested a 60-day delay in implementation. I have attached to my statement a series of letters from these government and private entities, and I ask unanimous consent that they appear in the RECORD at the end of my statement.

For this reason, as chairman of the Governmental Affairs Committee [GAC], I have agreed to sponsor a short, but I believe, helpful additional time period of 60 days before the provisions of section 6 go into effect. I am pleased that other Senators from the Governmental Affairs Committee who participated in obtaining passage of the OFPP amendments last year, including Senators LEVIN, NUNN, BINGAMAN, ROTH, and COHEN have joined me in sponsoring this legislation.

By taking this action to delay implementation from May 16, 1989 to July 16, 1989, no one should perceive a slackening of congressional intent and interest in seeing section 6 promptly and completely implemented. We intend to see that this law is fully implemented, and we have only reluctantly taken this step of delaying implementation. We will not be reopening the law to any reexamination other than this step at this time.

At a time when the Congress is considering a whole host of issues concerning ethics and integrity legislation, I recognize and share the concern that too many well intentioned laws may choke good people in a sea of regulations and requirements. I do not believe this particular law is the problem.

I look forward to a decidedly speedy passage of this bill to permit the executive branch and industry a short respite before implementation.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE DEPUTY SECRETARY OF DEFENSE,
Washington, DC, May 10, 1989.

Hon. JOHN GLENN,
Chairman, Committee on Governmental Affairs, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: This week the Department of Defense and other Federal agencies will publish in the Federal Register a regulation to implement Section 27 of the Office of Federal Procurement Policy Act, estabishing additional restrictions on the conduct of Federal employees involved in procurement activities and those in industry with whom they deal. Section 27 takes effect on May 16, 1989 under the provisions of the Office of Federal Procurement Policy Act Amendments of 1988 (P.L. 100-679).

A sixty day period for training DOD procurement personnel and industry personnel is necessary to ensure fair and effective implementation of the statute and regulation. We urge Congress to pass legislation to extend to July 16, 1989 the effective date of Section 27, to provide for the training period.

We look forward to working with you to strengthen the defense acquisition process.

The Office of Management and Budget advises that there is no objection to the submission of this letter from the standpoint of the Administration's program.

Sincerely,

DONALD J. ATWOOD,
Deputy Secretary of Defense.

OFFICE OF MANAGEMENT
AND BUDGET,
Washington, DC, May 10, 1989.

Hon. JOHN GLENN,
Chairman Committee on Governmental Affairs, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Section 6 of the Office of Federal Procurement Policy Act Amendments of 1988 (P.L. 100-679) contains provisions to ensure integrity in the Federal procurement system. That section prohibits certain actions by Government officials, employees, consultants and advisers, and those of contractors competing for a Federal agency procurement. The Act prescribes contractual, civil, and criminal penalties. Section 6 of the Act is effective on May 16, 1989.

Regulations to implement Section 6 are scheduled to be published in the Federal Register by the end of this week. This schedule will allow only two to three working days between the effective date of Section 6 and the availability of the implementing regulations. Since strict criminal and civil penalties apply to certain violations of Section 6, additional time should be allowed to provide for dissemination of information and training of those persons who will be affected by the new provisions. Accordingly, I urge Congress to pass legislation to extend the implementation date of Section 6 to July 16, 1989. This will allow a more orderly and effective implementation process.

Sincerely,

FRANK HODSOLL,
Executive Associate Director.

AEROSPACE INDUSTRIES
ASSOCIATION OF AMERICA, INC.,
Washington, DC, May 10, 1989.

Hon. JOHN GLENN,
Chairman, Committee on Governmental Affairs, U.S. Senate, Washington, DC.

DEAR JOHN: I am writing to reiterate our request for your support for an extension of the effective date of the procurement integrity provisions (Section 6) of the OFPP Reauthorization Act. The regulations implementing this section of the statute have been released to the Federal Register, and will become effective on May 16, as now required by the Statute. However, neither industry nor the Exective Branch agencies have had any opportunity to interpret and explain the regulations or conduct training for those who will be affected by them. We believe it is essential to allow at least 60 days to accomplish this and thus ensure a reasonable smooth transition. Without this, extension it seems certain we will experience delayed procurements, less than evenhanded application of the regulations, and counterproductive posturing.

Accordingly, I urge your support to delay the effective date of Section 6 by 60 days to facilitate the necessary familiarization and training. We greatly appreciate your continued consideration of this important matter.

Sincerely,

DON FUQUA,
President.

ELECTRONIC INDUSTRIES ASSOCIATION
Washington, DC, May 9, 1989.

Hon. JOHN GLENN,
Chairman, Committee on Governmental Affairs, U.S. Senate, Washington, DC.

DEAR SENATOR GLENN: The Electronic Industries Association, on behalf of our many member companies who provide products and services to the federal government, is concerned with the pending issuance of regulations implementing the "Procurement Integrity" provisions of the Office of Federal Procurement Policy (OFPP) Reauthorization Act of 1988. We fully support the goal of this legislation that the federal procurement process must operate at all times in a context of fairness and integrity, and that any corruption and wrongdoing should be rooted out and punished to the full extent of the law.

Although we remain concerned with the anticipated treatment of some issues in the interim regulation, we believe at this stage that the fundamental concern must be to provide those in government and industry with the opportunity to be thoroughly trained in the requirements of the rule prior to being asked to apply its provisions in their day to day business dealings. Given the tremendous complexity of the regulatory coverage and the severity of the penalties for violation, we believe that a reasona-

ble period to assimilate its provisions is essential if the goals of the statute are to be met without major disruption to the procurement process.

For this reason, we request your consideration of a 60-90 day delay in implementation of the statute for the express purpose of giving government and industry time to train their respective personnel in the provisions of the interim rule.

We appreciate your consideration of this request, and look forward to working with you and your staff to provide for workable implementation consistent with the intent of Congress. A similar letter has been sent to Senator Roth, and to Congressmen Brooks, Conyers and Horton.

Sincerely,

PETER F. MCCLOSKEY,
President.

PROFESSIONAL SERVICES COUNCIL,
Washington, DC, May 10, 1989.

Hon. JOHN GLENN,
Chairman, Committee on Governmental Affairs, U.S. Senate, Washington, DC.

DEAR SENATOR GLENN: The Professional Services Council (PSC) respectfully requests that Section 6 of the Office of Federal Procurement Policy Reauthorization Act (OFPP Act) be amended to extend the requirement for the issuance of implementing regulations beyond the statutory deadline of May 16, 1989, by sixty days.

PSC is a trade association representing more than one hundred (100) companies and firms providing professional and technical services. While many PSC members are involved actively in serving agencies of the federal government on a wide variety of matters, member companies also have clients in the private sector and act sometimes as subcontractors to major government prime contractors. In all of these roles, PSC members have a substantial interest in the implementing regulations for Section 7 of the OFPP Act.

PSC is in full accord with the spirit and intent of the legislation, but is concerned that the FAR Council cannot do justice to the large number of comments which were filed on the proposed FAR rule. This rule is one of the most important that has occurred in some time, and PSC believes that this rulemaking effort cannot be conducted in a thorough and methodical manner by May 16, 1989. Many PSC members will not be in a position to comply with the law and implementing regulations by that date. Furthermore, we believe that it is virtually impossible for the government to properly orient and train its operating organizations to implement the rule given the limited time available.

Accordingly, PSC would urge that Congress quickly enact legislation delaying the effective date to such time as will provide the FAR Council with the time it requires to issue a rule that has fully and fairly considered all comments that were submitted.

We very much appreciate your consideration of our request.

Very truly,

MARK SCHULTZ,
President.

By Mr. MOYNIHAN:

S. 969. A bill to establish the President's Award for Addiction Research; to the Committee on Labor and Human Resources.

PRESIDENT'S AWARD FOR ADDICTION RESEARCH

● Mr. MOYNIHAN. Mr. President, it is with great expectation that I introduce today a bill to establish a Presidential award for significant contributions in the field of drug addiction research. For the first time, we are able to examine as a problem of public health what has often been considered solely an issue of criminality. In our efforts to understand the drug epidemic, although such epidemics are cyclical occurrences, we find ourselves having learned something. Namely, that addiction and its effects are no longer cause for spurn but rather are now understood as a combination of biochemical, genetic, and psychological factors treated as a disease.

My colleagues have not infrequently heard me on this floor cite the accomplishments of our drug legislation which we passed in the last hours of the 100th Congress. We established, for the first time, a balance between supply reduction and demand reduction and in so doing are now ready to invest in treatment, in the knowledge that without treatment we will not have begun to solve the problem.

When we called for treatment on demand in that legislation, we knew that for most who need it treatment is not available and when it is there can be waiting lists of 8 months or more.

The talking therapies offer hope to many, but they are so labor intensive that they cannot possibly be offered to all those who need them before it is too late to help. A pharmacological treatment exists for opium based drugs, that is to say methadone, and several new treatments, including desipramine and carbamazepine have shown promise for the coca based drugs. But without more research—well supported and well rewarded research—the vast majority of crack cocaine addicts who desire help will be left to fend for themselves.

That such research is not well supported and well rewarded now is evident. The person who cracks the AIDS puzzle will receive a nobel prize. The person who cracks the cocaine puzzle will receive * * * what? Dr. Vincent Dole, who developed methadone as a treatment for heroin users during the 1960's, was only recently recognized by his profession, with a Lasker Prize this past November 17.

There is something in this legislation which is new. To wit, that we address ourselves to a problem in a wholly new and appropriate way. There is also, however, something of the old here, at least for me, which I have been with for now over 25 years.

President Kennedy had wanted a system of civil honors and in the course of such things it fell to me to do it. Secretary Goldberg at Labor had asked me if I had wanted to take it on.

I was at the time involved in the cotton textile negotiations and so was flying back and forth to Europe regularly, and learned what I could about the French Legion of Honor and, when in London, talked about their honor system and subsequently found out some fascinating things. I found out that, like most of the ancient institutions of the British Government, the honor system was a late Victorian invention—the Knights of St. Michael and St. George and such like. In any event, I drafted a memorandum from Goldberg to the President. It said, "You asked how you could set up a system of civil honors—how can you get a system of civil honors in this country—we've looked into it, and we've come to the conclusion that you can't; men at least as good as you have tried and they never get anywhere; it doesn't work. If you want a system of civil honors, the thing to do is to say you've got one, and start doing it." In turn, we found this Medal of Freedom which had been given to spies—those who weren't really military and for whom there weren't any real civil honors—in World War II. We decided that we would call it the Presidential Medal of Freedom.

There was some concern in the Government that these things would be given out so often that they would degenerate. I think I knew enough about government to know, as a matter of fact, that the opposite is the tendency. They wither out; they don't get given out.

We worked out a scheme which we announced on Washington's Birthday 1963, while the President was in Florida, that the Presidential Medal of Freedom, which is the highest civil honor conferred by the President for services in peace-time, will henceforth only be given out once a year, and it will be given out for services to the arts and other civil services, and it will be announced on the Fourth of July. President Kennedy liked that fine.

We established a commission to propose the award to the President. George Ball was made its chairman. Mary McGrory was on it as was Henry Cabot Lodge. Everybody was really very excited and pleased by it. Names were selected and announced by President Kennedy to be conferred at such time when the President's schedule would permit. The date selected as the fates would have it was about 10 days after the assassination.

The presentations were made, now by a new President with different thoughts about the Presidency. But he made them, nonetheless, and on the last day the decision was made to award them posthumously to Pope John and to President Kennedy. I wrote Johnson's statement at that time which were the last words in the last volume of the Kennedy Presidential papers.

This legislation, which provides a Presidential citation, a gold medal and a $50,000 prize does tribute to the spirit of John Kennedy's understanding of public as well as civil contributions to society, and to those whose commitment to research in the field of drug addiction broadens our understanding, methods of treatment and compassion.●

By Mr. FOWLER (for himself, Mr. LEAHY, Mr. GORE, and Mr. CRANSTON):

S. 970. A bill to promote low-input agricultural production systems, to maintain farm profitability, to encourage land, resource, and wildlife stewardship in connection with Federal farm programs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FARM CONSERVATION AND WATER PROTECTION ACT.

Mr. FOWLER. Mr. President, I rise today to introduce legislation to help American farmers protect our environment, conserve our agricultural resources, and guard the health both of themselves and the general public.

The Farm Conservation and Water Protection Act encourages farmers to make the transition toward low input and sustainable systems—and away from an overreliance on pesticides, fertilizers and other potentially harmful agricultural chemicals. We can exercise this responsible stewardship without compromising the long term production or profits of our farmers.

The reliance on heavily intensive farming methods, sold as a panacea to farmers by Government and industry since the end of World War II, has caused a number of problems of national proportions, and has raised important questions of public policy.

Not the least of these is degradation of the basic resources on which our agricultural productivity depends. The heavy-input, fence row to fence row practices of the 1970's did boost production, as the Federal Government had urged. These practices also produced record erosion levels that we, as responsible stewards of the land, could not tolerate—and which our farmlands could not physically sustain.

As our agricultural policies strayed from the traditional ecological common sense of our farmers, other important natural resources were imperiled, as well. The loss of wetlands to agriculture has increased in recent years to nearly half a million acres annually. Of these essential wildlife habitats and water purifiers, less than half or our original American wetlands remain. The runoff of agricultural chemical contaminants into our waterways has been greatly increased by keeping other unstable, highly eroding croplands in production.

Another ill trend of the intensification of American agriculture is the health threat to farmers from direct exposure to chemicals. From the San Joaquin Valley to Sweden, studies of farmers have suggested a link between pesticide use and certain cancers, with the risk increasing dramatically since the advent of heavy chemical imputs in farming after World War II. A National Cancer Institute study in Wisconsin found that the risk to farmers of contracting non-Hodgkins lymphoma doubled in a 9-year period from 1968 to 1976.

As we all know from recent publicity, this health risk is being passed on to American consumers at the grocery store. While there may be disagreement over the degree of health risk posed by specific agricultural chemicals in our food, there is no doubt that residues of the billion pounds of pesticides applied to crops every year in this country remain in our food. The Environmental Protection Agency reported that these chemical residues in our food supply could pose the third greatest cancer risk in the United States today.

Perhaps the most unacceptable threat to an unsuspecting public is the potential contamination of water supplies by agricultural runoff. Just outside of Washington, DC, we can see the damage that has been done to the Chesapeake Bay: The loss of natural beauty, wildlife and the economic opportunities that go with them.

That is the harm of waters fouled by pesticides and fertilizers that we can plainly see. The invisible threat is contamination of ground water and other drinking water supplies. Ground water contamination by agricultural chemicals suspected of causing cancer, birth defects and mutations has been reported in 26 States. Because there is no extensive and reliable system of water testing in the agricultural sector, we have no idea how serious this problem really is.

Instead of ordering regulatory agencies to solve these problems in Washington, DC, my legislation attempts to address them at the source, in our agricultural practices and policies. Our farmers are interested in what they can do to help. They don't want their own families to drink from contaminated wells. They don't want to ship food to market that threatens the health of American consumers. They want to know how they can address these problems without sacrificing their livelihood. The success of the conservation provisions of the 1985 farm bill—Swampbuster, Sodbuster and the CRP—shows what farmers can do themselves to protect our environment, including our farmland, when the Government works with them to develop a comprehensive and intelligent strategy.

That is why we must begin with a concerted effort to disseminate information on promising advances in low input systems, conservation, integrated pest management and best management practices. These less intensive methods, which reduce reliance on dangerous chemicals, can actually increase yields over the long run. The Agricultural Extension Service can carry the news of how to keep production up—through soil building, crop rotation, ground cover, conservation tillage, natural weed control and other methods that keep chemical production costs down—to every county in America. I am calling for the creation of the Farmers Conservation Service to serve this purpose, as a new arm of the huge advisory network already in place.

Second we must remove all institutional barriers and disincentives that prevent our farmers from taking advantage of improved agricultural methods. Again, the Federal Government is a major culprit. Currently, farmers risk loss of eligibility for Federal farm programs if they employ low-input rotations such as legumes. My legislation would prevent farmers from being penalized with the loss of their base for these nontraditional rotations.

I want to emphasize that this legislation is based entirely on voluntary participation by our farmers, and does not impose punitive measures on those who continue to practice the status quo.

Finally, it will be necessary to create incentives for farmers to make the transition from the practices they are familiar with to low-input and sustainable systems. Research and demonstration programs focused in this area will play an important role. We can also facilitate the transition by offering credit, crop insurance and low-input certification to farmers who are willing to invest in new directions.

My bill would also provide broad protection for natural resources endangered by ag practices. This includes an expansion of the Conservation Reserve Program to 60 million acres. The 28 million plus acres of highly eroding cropland that have already gone into the CRP as grass and trees saves the United States nearly 700 million tons of soil a year. We need to expand this successful program to reduce the run-off of agricultural chemicals and provide more protective buffers for our lakes and streams.

This also includes a new grain policy for wetlands, with a target of restoring 1 million acres a year. While we are working to reverse previous damage and re-establish these ecologically important buffers, we must also try to take stock of the contamination of our water systems that has already occurred. That is why I am proposing, as part of this legislation, representative

USDA well testing of farms in federal programs.

For too long industry and ag policies have promoted practices that degrade our national and agricultural resources, and pose threats to the health of our people. We have already waited longer than we should to reverse this trend and restore American agriculture to a safe, sound course for the future.

The beneficial changes I am attempting to promote will not come about unless Government takes the lead in redirecting its energies and investing its resources in low input and sustainable agriculture. The investments I am calling for are inconsequential compared to the costs of reclaiming infertile and eroded soils, of cleaning up our waters once they are irretrievably contaminated, of paying the health care costs of catastrophic illnesses caused by dangerous chemicals. This is a very modest proposal to invest the resources and knowledge we already possess, so that we never will have to wrestle with these unthinkable consequences.

In conclusion, I want to thank the wide array of conservation and environmental groups, as well as farmers and agribusiness, that contributed to this process. This legislation has been a year and a half in the making, but it could not be more timely now. Citizens have shown their concern about food purity and the integrity of our environment. They want to know what can be done, and they want it done without delay. Low input and sustainable agriculture can go a long way to help our farmers get back to what they have done so well in the past: produce safe, wholesome and plentiful food for American families and the world.

Mr. CRANSTON. Mr. President, I am pleased today to join with Mr. FOWLER and others in cosponsoring the Farm Conservation and Water Protection Act, legislation to promote low input sustainable agriculture [LISA]. This legislation is a timely and creative approach to meeting the needs of farmers and consumers by reducing our dependency on pesticides and fertilizers and replacing them with safer, more environmentally sound farming practices such as crop rotation, diversification, integrated pest management, and reduced input strategies.

According to the EPA, the use of chemical pesticides has grown exponentially since World War II. Of the 1.1 billion pounds of pesticide chemicals used in 1984, EPA estimates that 77 percent were used in agricultural applications. We are now feeling the effects of that overreliance on chemicals in contaminated ground water supplies, high levels of soil erosion, higher costs to the farmer and the rising concern over pesticide residues on food.

I am hearing from a growing number of California farmers who would like to turn to integrated pest management practices, but who are frustrated because they can't get Federal crop insurance if they do. Moreover, most farmers simply do not have enough information about low input farming practices to make an educated decision. For example, last year California's Monterey County, which alone generates over $2 billion in fruit and vegetable sales, had only one entomologist to advise farmers on integrated pest management programs. In addition, farmers who want to grow resource-conserving crops are discouraged from doing so because it would reduce the base acreage on which Federal payments are determined.

A 1988 report by the House Committee on Government Operations on low input farming systems found that despite the clear advantages of low input agricultural systems, the barriers to their widespread adoption were overwhelming. These barriers include the lack of information available to farmers on low input practices, the influence of agricultural chemical dealers, the economic pressures on farmers in the face of limited research on low input systems, unreliable support from the USDA, and the very structure of federal commodity and loan programs.

The Farm Conservation and Water Protection Act addresses these disincentives. It protects farmers from crop insurance discrimination and from losing base acreage when they use low input practices, and helps them receive loans for conservation activities. It establishes a low input sustainable agriculture demonstration program to gather, analyze, and disseminate information on successful methods of changing from traditional chemical farming to low input sustainable agriculture. It establishes a program for testing private wells that have not been included in Federal and State monitoring for pesticides in ground water. It improves the conservation reserve program which has removed highly erodible land from production and reduced run off of agricultural chemicals, and establishes a wetlands protection and restoration program. It provides for new safeguards against conversion of prime agricultural lands to non-agricultural uses. In short, it aims at reducing costs to the producer, reducing environmental damage, reducing the fears of consumers, and still maintaining or increasing crop yields.

This legislation goes to the heart of our agricultural practices and policies in an attempt to conserve our agricultural resources without compromising the production and profits of our farmers. This legislation is common sense.

By Mr. GRASSLEY (for himself and Mr. DECONCINI):

S. 971. A bill to authorize and encourage Federal agencies to use mediation, conciliation, arbitration, and other techniques for the prompt and informal resolution of disputes, and for other purposes; to the Committee on Governmental Affairs.

ADMINISTRATIVE DISPUTE RESOLUTION ACT

Mr. GRASSLEY. Mr. President, the 18th century French philosopher, Voltaire, once observed: "Only twice in my life have I felt utterly ruined—once when I lost a lawsuit, and once when I won." It is likely that Voltaire's lament is often repeated 200 years later by individuals and businesses put through the litigation ringer before Federal agencies.

Today, tens of thousands of administrative agency decisions and court cases are today handled through highly adversarial procedures that are all too often complex, costly, and lengthy.

In the private sector, consensual dispute resolution has long been used to great advantage to produce quicker, better, less expensive decisions.

These methods—often referred to as alternative dispute resolution [ADR]—include arbitration, negotiation, mediation, and minitrials, among others.

The Federal Government has much to learn from these experiences.

Over the past 50 years, as we have seen the Federal bureaucracy sprawl in every direction, a variety of agency boards and offices have been established.

Whole new specialties of lawyers have sprung up to carry on litigation over energy, contract, environmental, safety and we can name many others. Unfortunately, existing procedures often serve to increase the contentiousness of parties to the administrative process.

An increase in agency litigation is undoubtedly good for the business of the more than 600,000 U.S. lawyers now in practice. However, with legal expenditures growing at a faster rate than the gross national product, our Nation's overall productivity is almost certainly harmed by this drain on valuable resources.

Other costs of agency litigation cannot be measured so easily, but are just as real. Enthusiasm for ADR stems from the hope that it will reduce this burden on courts, agencies, and the economy, as well as provide more satisfying means of acquiring justice for all parties.

The Federal Government is in an ideal position to be in the forefront of alternative dispute resolution. Instead, most Federal agencies lag far behind private and other public entities that must resolve disputes. ADR must cease being a subject that receives almost

universal endorsement in theory, but substantially less in practice.

Mr. President, today I am introducing, along with Senator DECONCINI, the Administrative Dispute Resolution Act. Its purpose is to encourage and extend the use of ADR by Federal agencies.

The bill will give impetus for meaningful change by sending a clear signal to agencies, reviewing courts, and regulated persons that informed, thoughtful efforts to use ADR will be supported.

The bill amends the Administrative Procedure Act to authorize the parties to agree to use mediation, or other mutually agreeable processes to resolve Federal disputes. By authorizing parties to use the process to fit the case at hand, this bill affords a good deal of flexibility.

Specific statutory provisions that inhibit effective negotiation—for instance, parts of the Federal Tort Claims Act and Contract Disputes Act—are amended. The bill also repeals the GAO's overly restrictive prohibition on arbitration in cases where arbitration can be used consistent with the public interest.

Importantly, this bill recognizes that ADR is not appropriate for all cases involving the Government, just as with private disputes.

However, as a constitutional matter, the voluntary assignment of discrete issues to arbitration need not give rise to legal concerns. These initiatives will be complemented by informed, periodic, congressional oversight, and by creation of incentives for high-level executive branch officials and other agency personnel to use ADR.

There have been a number of positive developments since I introduced this legislation in the last Congress. In the 100th Congress, two productive hearings were held before both the Senate and House Judiciary Committees. The Senator from Michigan, the chairman of the Government Affairs Oversight Subcommittee, has pledged to take up the bill at the first available opportunity.

Mr. President, as we all know, it is a truism to say: "Justice delayed or excessively costly is justice denied." Administrative justice need not be so expensive or time-consuming. Congress and the executive should accept the challenge of fashioning a better agency approach to dispute resolution. The success of ADR in other arenas make likely similar success on the Federal level.

I hope my colleagues will join in this effort. Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 971

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Administrative Dispute Resolution Act".

SEC. 2. FINDINGS.

The Congress finds that:

(1) administrative procedure, as embodied in chapter 5 of title 5, United States Code, and other statutes, is intended to offer prompt, expert, and inexpensive means of resolving disputes as an alternative to litigation in the Federal courts;

(2) administrative proceedings have become marked increasingly by formality, costs and delays and often result in unnecessary expenditures of the time of individuals and the resources of society and decreased likelihood of achieving consensual resolution of disputes;

(3) alternative means of dispute resolution (including settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials, and arbitration) have been used in the private sector for many years and, in appropriate circumstances, have yielded decisions that are faster, less expensive, and less contentious;

(4) such alternative means also lead to more creative, efficient, and sensible outcomes that foster stability because of the acceptability of such means to the parties involved and the public in general;

(5) such alternative means may be used advantageously in widely varied administrative programs;

(6) explicit authorization of use of well-tested dispute resolution techniques will eliminate ambiguity of agency power under applicable law and will encourage use of common sense procedures in appropriate cases;

(7) every agency shall undertake a careful review of programs and the disputes involved to ensure increased application of appropriate alternative means;

(8) Federal agencies may not only receive the benefit of techniques that were developed in the private sector, but may also take the lead in the further development and refinement of such techniques; and

(9) the availability of a wide range of dispute resolution procedures, and an increased understanding of the most effective use of such procedures, will enhance the operation of the Government and better serve the public.

SEC. 3. PROMOTION OF ALTERNATIVE MEANS OF DISPUTE RESOLUTION.

(a) PROMULGATION OF AGENCY POLICY.—Each agency is encouraged to promulgate policies that address the use of the full range of alternative means of dispute resolution and case management in each administrative program of such agency. In developing policy, each agency is encouraged to—

(1) consult with the Administrative Conference of the United States, the Federal Mediation and Conciliation Service, and professional associations; and

(2) examine procedures for resolving every kind of dispute including controversies that arise as part of—

(A) formal or informal adjudication;

(B) rulemaking;

(C) enforcement;

(D) issuing or revoking permits;

(E) settling disputes; and

(F) litigation brought by or against the agency.

(b) DISPUTE RESOLUTION SPECIALISTS.—Each agency shall designate a senior official to be the dispute resolution specialist of the agency. Such official shall implement—

(1) the provisions of this Act with regard to such agency; and

(2) the agency policy promulgated pursuant to subsection (a).

(c) TRAINING.—Each agency shall provide for training to be made available regularly to the dispute resolution specialist of the agency and other employees involved in implementing the policy of the agency under this Act. Such training may encompass theory and practice of negotiation, mediation, arbitration, or related techniques. The dispute resolution specialist shall periodically recommend to the agency head a list of agency employees for similar training.

(d) PROCEDURES FOR GRANTS AND CONTRACTS.—

(1) Each agency shall review each of its standard contract, grant, and other assistance agreements and shall amend them to authorize and encourage use of alternative means of dispute resolution at all stages where disputes under future contracts or agreements may arise. The Office of Federal Procurement Policy of the Office of Management and Budget shall consult with agencies and other persons to develop guidance and standard clauses for contracts. Each agency shall revise its future grant agreements to permit and encourage its grantees to use an alternative means of dispute resolution with respect to any dispute with a subgrantee, contractor, or other adverse party, which the grantee would be permitted to use with respect to a dispute with the Federal government.

(2) Within 1 year after the date of enactment of this Act, the Civilian Agency Acquisition Council and the Defense Acquisition Council, in consultation with the Administrative Conference of the United States, shall adopt any amendments to the Federal Acquisition Regulation, or propose any statutory changes, necessary to adapt acquisition procedures to the requirements of the dispute resolution process.

SEC 4. ADMINISTRATIVE PROCEDURES.

(a) ADMINISTRATIVE HEARINGS.—Section 556(c) of title 5, United States Code, is amended—

(1) in paragraph (6) by inserting before the semicolon at the end thereof: "or by use of alternative means of dispute resolution as provided by subchapter IV of this chapter"; and

(2) by redesignating paragraphs (7) through (9) as paragraphs (9) through (11), respectively and inserting after paragraph (6) the following new paragraphs:

"(7) inform the parties as to the availability of one or more alternative means of dispute resolution, and encourage use of such methods;

"(8) require the attendance at any conference held pursuant to section (6) of at least one representative of each party who has authority to negotiate concerning resolution of issues in controversy;".

(b) ALTERNATIVE MEANS OF DISPUTE RESOLUTION.—Chapter 5 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"Subchapter IV—Alternative Means of Dispute Resolution in the Administrative Process

"§ 581. Definitions

"For the purposes of this subchapter—

"(1) 'agency' has the same meaning as in section 551(1) of this title;

"(2) 'administrative program' means any program administered by an agency and in-

cludes a Federal function which involves protection of the public interest and the determination of rights, privileges, and obligations of private persons through rulemaking, adjudication, licensing, or investigation, as such terms are used in section 551 of this title;

"(3) 'alternative means of dispute resolution' means any procedure that is voluntarily used to resolve issues in controversy, including but not limited to, settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials, and arbitration, or any combination thereof;

"(4) 'dispute resolution communication' means any oral or written communication or conduct made in confidence in connection with a dispute resolution proceeding by any party, neutral, non-party participant, or other source of information relevant to the proceeding;

"(5) 'dispute resolution document' means any written material that is—

"(A) prepared for the purpose of, in the course of, or pursuant to a settlement proceeding, including memoranda, notes, and work product of the neutral and the parties; or

"(B) provided to the neutral or other parties in confidence for purposes of the dispute resolution proceeding.

An agreement or arbitral award reached as a result of a dispute resolution proceeding is not a dispute resolution document unless the parties agree in writing and the law otherwise allows that it shall be regarded as such.

"(6) 'dispute resolution proceeding' means any process in which an alternative means of dispute resolution is used to resolve an issue in controversy in which a neutral is appointed and identified parties participate;

"(7) 'in confidence' means that the information is provided—

"(A) with the expressed desire of the source that it not be disclosed; or

"(B) under circumstances that would create the reasonable expectation on behalf of the source that the information will not be disclosed;

"(8) 'issue in controversy' means a question that is material to a decision concerning an administrative program about which persons who would be substantially affected by the decision or the agency disagree;

"(9) 'neutral' means an individual who, with respect to an issue in controversy, serves as a conciliator, facilitator, mediator, factfinder, or arbitrator, or otherwise functions specifically to aid the parties in resolving the controversy;

"(10) 'party' means—

"(A) for proceedings with designated parties, the same as in section 551(3) of this title; and

"(B) for proceedings without designated parties, a person who will be significantly affected by the decision and who participates in the proceeding;

"(11) 'person' has the same meaning as in section 551(2) of this title; and

"(12) 'roster' means a list of persons qualified to provide services as neutrals.

"§ 582. General authority

"(a) Each agency may use a dispute resolution proceeding for the resolution of any issue in controversy that relates to an administrative program, if the parties agree to such procedures.

"(b) In determining whether the use of a dispute resolution proceeding is appropriate, an agency and the parties shall consider whether—

"(1) a definitive or authoritative resolution of the matter is required for precedential value, and, if so, whether such a proceeding is likely to be accepted generally as an authoritative precedent;

"(2) the matter involves or may bear upon significant questions of Government policy that require additional procedures before a final resolution may be made, and, if so, whether such a proceeding may serve to develop a recommended policy for the agency;

"(3) maintaining established policies is of special importance, so that variations among individual decisions are not increased and, if so, whether such a proceeding would likely reach consistent results among individual decisions;

"(4) the matter significantly affects persons or organizations who are not parties to the proceeding;

"(5) a full public record of the proceeding is important, and, if so, whether a dispute resolution proceeding can provide such a record; and

"(6) the agency must maintain continuing jurisdiction over the matter with authority to alter the disposition in the light of changed circumstances, and, if so, whether a dispute resolution proceeding would interfere with the agency's fulfilling that requirement.

"§ 583. Neutrals

"(a) A neutral may be a permanent or temporary government employee or a private individual that is acceptable to the parties to a dispute resolution proceeding. A neutral shall have no official, financial, or personal conflict of interest with respect to the issues in controversy, unless such interest is fully disclosed in writing and all parties agree that the neutral may serve.

"(b) A neutral who serves as a conciliator, facilitator, or mediator serves at the will of the parties.

§ "584. Confidentiality

"(a) A neutral in a dispute resolution proceeding shall not voluntarily nor through discovery or compulsory process be required to disclose or testify concerning any dispute resolution document or any dispute resolution communication, unless—

"(1) all parties to the dispute resolution proceeding and the neutral consent in writing, and if the dispute resolution communication or dispute resolution document was provided by a non-party participant, that participant also consents in writing;

"(2) the request is for a document that was provided to the neutral in a public meeting or is otherwise already in the public domain;

"(3) the dispute resolution communication or dispute resolution document is required by statute to be made public, but only if no other person is reasonably available to provide the document or disclose the communication; the neutral shall make a good faith effort to inform the parties to a dispute resolution proceeding as early as possible or any such requirements that may be relevant; or

"(4) a court determines that such testimony or disclosure is necessary to—

"(A) prevent a manifest injustice,

"(B) reveal a violation of law, or

"(C) protect the public health or safety

of sufficient magnitude in the particular case to outweigh the integrity of dispute resolution proceedings in general by reducing the confidence of parties in future cases that their communications will remain confidential.

"(b) A party to a dispute resolution proceeding shall not voluntarily nor through discovery or compulsory process be required to disclose or testify concerning any dispute resolution document or any dispute resolution communication, unless—

"(1) all parties to the dispute resolution proceeding consent in writing;

"(2) the request is for a document already in the public domain;

"(3) the dispute resolution communication or dispute resolution document is required by statute to be made public;

"(4) such testimony or disclosure is necessary to—

"(A) prevent a manifest injustice,

"(B) reveal a violation of law, or

"(C) protect the public health and safety

of sufficient magnitude in the particular case to outweigh the integrity of dispute resolution proceedings in general by reducing the confidence of parties in future cases that their communications will remain confidential; or

"(5) the dispute resolution document or dispute resolution communication is relevant to the resolution of dispute concerning existence or meaning of an agreement that resulted from the proceeding or to the enforcement of such an agreement or award.

"(c) The parties may—

"(1) agree that subsections (a) or (b) will not apply to their dispute resolution proceeding; or

"(2) modify the terms of subsection (a) or (b) by an agreement in which case that agreement will prevail to the extent authorized by law.

The parties shall inform the neutral prior to the commencement of the dispute resolution proceeding of any modifications to the provisions of subsections (a) that will govern the confidentiality of the dispute resolution proceeding. If the parties do not so inform the neutral, subsection (a) shall apply.

"(d) If a demand, by way of discovery request or other legal process, is made for disclosure by the neutral of a dispute resolution document or dispute resolution communications, the neutral shall make reasonable efforts to notify the parties and any affected non-party participants. Any party or affected non-party participant that is provided such notice and does not offer to defend the refusal of the neutral to disclose or testify concerning the dispute resolution communications or dispute resolution document shall be regarded as waiving any objection to such disclosure or testimony.

"(e) Nothing in this section shall prevent the discovery or admissibility of any evidence that is otherwise discoverable merely because it was presented in the course of a dispute resolution proceeding.

"(f) Subparagraphs (a) and (b) shall have no effect on the information and data that are required to document an agreement or order nor on the parts of a dispute resolution proceeding that are or are not open to the public either as a matter of law or policy.

"(g) Subsections (a) and (b) do not prevent the gathering of information for statistical or research purposes or educational efforts in cooperation with other agencies, governmental entities, or dispute resolution programs, so long as the parties or the specific issues in controversy are not identifiable.

"(h) Subsections (a) and (e) do not apply to any action concerning a dispute between the neutral in a dispute resolution proceeding and a party or participant, but only to

the extent that the communication document or is used resolving that dispute and not any issue in controversy in the dispute resolution proceeding.

"§ 585. Authorization of arbitration

"(a)(1) Arbitration as provided by this subchapter may be used whenever all parties consent, either before or after a dispute has arisen. An agency may not require any person to consent to arbitration as a condition of entering into a contract or obtaining any benefit. A party may agree to—

"(A) submit only certain issue in controversy to arbitration; or

"(B) arbitration on the condition that the award must be within a range of possible outcomes.

"(2) Any arbitration agreement that sets forth the subject matter submitted to the arbitrator shall be in writing.

"(b) Any agency official may offer to use arbitration for the resolution of issues in controversy, if such official—

"(1) has authority to enter into settlement stipulations concerning a matter; or

"(2) is otherwise specifically authorized by the agency to consent to use of arbitration.

"§ 586. Enforcement of arbitration agreements

"An agreement to arbitrate is enforceable pursuant to section 4 of title 9, United States Code, and no action brought to enforce such an agreement shall be dismissed nor shall relief therein be denied on the grounds that it is against the United States or that the United States is an indispensable party.

"§ 587. Arbitrators

"(a) The parties shall be entitled to participate in the selection of the arbitrator.

"(b) The arbitrator shall be a neutral who meets the criteria of section 583 of this title.

"§ 588. Authority of the arbitrator

"An arbitrator to whom a dispute is referred under this subchapter may—

"(1) regulate the course of and conduct arbitral hearings;

"(2) administer oaths and affirmations;

"(3) issue subpoenas for attendance of witnesses and production of evidence at the hearing, enforceable under the provisions of section 7 of title 9, United States Code, except that no subpoena shall be issued except for material that is clearly relevant to the resolution of the issues and is necessary to achieve justice in the matter; and

"(4) make awards.

"§ 589. Arbitration proceedings

"(a) The arbitrator shall set a time and place for the hearing and notify the parties not less than 5 days prior to the hearing.

"(b) Any party wishing a stenographic record of the hearing shall—

"(1) be responsible for the preparation of such record;

"(2) notify the other parties and the arbitrator of the preparation of such record;

"(3) furnish copies to all parties and the arbitrator; and

"(4) pay all costs for such record, unless the parties agree otherwise or the arbitrator determines that costs should be apportioned.

"(c)(1) The parties are entitled to be heard, to present evidence material to the controversy, and to cross-examine witnesses appearing at the hearing.

"(2) The arbitrator may, with the consent of the parties, conduct all or part of the hearing by telephone, television, computer, or other electronic means, if each party has an opportunity to participate.

"(3) The hearing shall be conducted expeditiously and in an informal manner.

"(4) The arbitrator may receive any oral or documentary evidence, except that irrelevant, immaterial, unduly repetitious, or privileged evidence may be excluded by the arbitrator.

"(5) The arbitrator shall interpret and apply relevant statutory and regulatory requirements, legal precedents, and policy directives.

"(d) No interested person shall make or knowingly cause to be made to the arbitrator an unauthorized ex parte communication relevant to the merits of the proceeding, unless the parties agree otherwise. If a communication is made in violation of this subsection, the arbitrator shall assure that a memorandum of the communication is prepared and made a part of the record, and that an opportunity for rebuttal is allowed. Upon receipt of a communication made in violation of this subsection, the arbitrator may, to the extent consistent with the interests of justice and the policy underlying this subchapter, require the offending party to show cause why his claim of such party should not be resolved against the offending party as a result of the improper conduct.

"(e) The arbitrator shall make the award within 30 days of the close of the hearing, including the filing of any briefs authorized by the neutral, unless—

"(1) the parties agree to some other time limit, or

"(2) the agency provides by rule for some other time limit.

§ 590. Arbitration awards

"(a) Unless the agency provides otherwise by rule, the award in an arbitration proceeding shall include a brief, informal discussion of the factual and legal basis, but formal findings of fact or conclusions of law shall not be required. The award shall be filed with all relevant agencies, along with proof of service on all parties by the prevailing party.

"(b) The award shall be final and binding on the parties to the matter, and may be enforced pursuant to section 9 of title 9, United States Code. No action brought to enforce such an agreement shall be dismissed nor shall relief therein be denied on the grounds that it is against the United States or that the United States is an indispensable party.

"(c) An award entered under this subchapter may not serve as an estoppel in any other proceeding for any issue that was resolved in the proceeding, nor may the award be used as precedent or otherwise be considered in any proceeding, whether conducted under this subchapter, by an agency, in a court, or in any other arbitral proceeding.

§ 591. Judicial review

"(a) Any person adversely affected or aggrieved by an award made in a proceeding conducted under this subchapter may bring an action only pursuant to the provisions of sections 9 through 13 of title 9, United States Code.

"(b) Section 10 of title 9, United States Code, is amended by adding a new subsection (f) that reads as follows:

"(f) Where the award was issued pursuant to section 595 of title 5, United States Code, if in consideration of the factors listed in section 589(b) of title 5, the consent of the agency to use arbitration to resolve the issues in controversy was a gross abuse of discretion.".

"(c) Any agency action relating to decisions to use or not to use a dispute resolution proceeding shall not be subject to judicial review. Any agency action relating to a decision to terminate an arbitration proceeding conducted pursuant to this subchapter shall be subject to judicial review only as provided in section 589(b) of title 5, United States Code, and section 10(f) of title 9, United States Code.

"§ 592. Authorization to use services of employees of other agencies

"An agency may use the services of one or more employees of other agencies to serve as neutrals in dispute resolution proceedings. The agencies may enter into an interagency agreement that provides for the reimbursement by the user agency or the parties of the full or partial cost of the services of an employee.

"§ 593. Qualifications and roster of neutrals; procurement

"(a) In consultation with the Federal Mediation and Conciliation Service, the Community Relations Service of the Department of Justice, and professional organizations in the area of dispute resolution, the Administrative Conference of the United States may—

"(1) establish standards for neutrals (including experience, training, affiliations, diligence, actual or potential bias or conflicts of interest, and other qualifications) to which agencies may refer;

"(2) maintain a roster of individuals who meet such standards and are otherwise qualified to act as neutrals, which shall be made available upon request;

"(3) enter into contracts for the services of neutrals that may be used by agencies on an elective basis in dispute resolution proceedings; and

"(4) develop procedures that permit agencies to obtain the services of neutrals on an expedited basis.

"(b) Any agency may contract with any person on a roster established under subsection (a) or a roster maintained by other public or private organizations or individuals for services as a neutral, or for training in connection with alternative means of dispute resolution. An agency may enter into an inter-agency agreement with the Administrative Conference of the United States to contract for the services of any person on a roster established under subsection (a) to serve as a neutral. The agency shall pay for the services of the neutral. An agency may negotiate a contract for the services of a neutral with any qualified person at compensation that the agency detemines is fair and reasonable to the Government.

"§ 594. Support services

"(a) The Administrative Conference of the United States shall compile and maintain data on the use of alternative means of dispute resolution in conducting agency proceedings. Agencies shall supply such additional information required to enable the Chairman of the Administrative Conference of the United States to comply with this subsection. The Administrative Conference of the United States shall transmit periodic reports to the Congress containing data and recommendations concerning the use of alternative means of dispute resolution.

"(b) The Chairman of the Administrative Conference of the United States may pay all or part of the expenses of using an alternative means of dispute resolution. Such expenses may include, but are not limited to, the costs of neutrals, the costs for certain parties determined to be eligible for assistance in accordance with section 595, admin-

istrative costs, and training costs. The determinations with respect to payments under this section shall be at the discretion of the Chairman in furthering the use of alternative means of dispute resolution by Federal agencies.

"(c) For the purposes of this subchapter, an agency may use the services and facilities of other Federal agencies and public and private agencies, and individuals (with or without reimbursement) with the consent of such agencies and individuals. An agency may accept such voluntary and uncompensated services without regard to the provisions of section 1342 of Title 31, United States Code.

"§ 595. Funding of participation

"(a)(1) Any agency may pay a reasonable amount to enable participation, if the agency determines that—

"(A) it is in the public interest to obtain the participation of one or more persons in a dispute resolution proceeding; and

"(B) such persons are unable to participate without receiving financial assistance to reimburse expenses.

"(2) In making a determination under paragraph (1) the agency shall consider:

"(A) the need for representation in the proceeding of a fair balance of interests;

"(B) the complexity and importance of the issues involved; and

"(C) the potential savings to the Government of using the particular type of proceeding instead of another procedure to resolve the issue in controversy.

"(b) A person seeking financial assistance, to reimburse expenses of participation in an alternative means of dispute resolution, may submit an application to the Chairman of the Administrative Conference of the United States requesting such assistance. No such application shall be considered by the Chairman, unless the agency notifies the Chairman in writing of a determination under subsection (a) that participation by such person in the alternative proceeding is necessary and in the public interest.

"(c)(1) Agency funds used to defray the travel expenses of any advisory committee as authorized by section 7 of the Federal Advisory Committee Act (5 U.S.C. App. 2) shall be from the general funds of the agency, and not from any amount restricted to travel from appropriations to the agency.

"(2) For the purpose of paragraph (1), the term "advisory committee" shall have the same meaning as such term is defined under section 3(2) of the Federal Advisory Committee Act (5 U.S.C. App. 2).".

"(c) TECHNICAL AMENDMENT.—The table of sections for chapter 5 of title 5, United States Code, is amended by adding at the end thereof the following:

"Subchapter IV—Alternative Means of Dispute Resolution in the Administrative Process

"581. Definitions.
"582. General authority.
"583. Neutrals.
"584. Confidentiality.
"585. Authorization of arbitration.
"586. Enforcement of arbitration.
"587. Arbitrators.
"588. Authority of the arbitrator.
"589. Arbitration proceedings.
"590. Arbitration awards.
"591. Judicial review.
"592. Authorization to use services of employees of other agencies.
"593. Qualifications and roster of neutrals; procurement.
"594. Support services.
"595. Funding or participation.".

SEC. 5. GOVERNMENT CONTRACT CLAIMS.

(a) CONTRACTING OFFICERS.—Section 6(a) of the Contract Disputes Act of 1978 (41 U.S.C. 605(a)) is amended by adding at the end thereof: "The contracting officer shall make all reasonable efforts to resolve a claim or dispute consensually, before or after making a decision under this section.".

(b) ALTERNATIVE MEANS OF DISPUTE RESOLUTION.—Section 7 of the Contract Disputes Act of 1978 (41 U.S.C. 606) is amended—

(1) by redesignating such section as subsection (a) of section 7; and

(2) adding at the end thereof the following new subsections:

"(b) No provision of this Act may be construed to prevent the contractor and a contracting officer from using any alternative means of dispute resolution under subchapter IV of title 5, United States Code, or other mutually agreeable procedures for resolving claims including binding arbitration of claims not in excess of $250,000. Any agency action relating to decisions to use or not to use a dispute resolution proceeding shall not be subject to judicial review. Any agency action relating to a decision to terminate an arbitration proceeding conducted pursuant to this subchapter shall be subject to judicial review only as provided in section 589(b) of title 5, United States Code, and section 10(f) of title 9, United States Code.

"(c) Agencies' authorization to engage in arbitration pursuant to section (b) shall cease to be effective on October 1, 1995, except that it shall continue in effect with respect to then pending arbitration proceedings which, in the judgment of the agencies that are parties to such proceedings, require continuation until such arbitrations terminate.".

(c) EXPEDITED PROCESS.—Section 8(f) of the Contract Disputes Act of 1978 (41 U.S.C. § 607(f)) is amended by striking out "$50,000" and inserting in lieu thereof "$250,000".

(d) JUDICIAL REVIEW OF ARBITRAL AWARDS.—Section 8(g) of the Contract Disputes Act of 1978 (41 U.S.C. § 607(g)) is amended by adding at the end thereof the following subsection:

"(3) All aspects of an award by an arbitrator shall be reviewed pursuant to sections 9 through 13 of title 9, United States Code, except that the court may set aside any award that is found to violate limitations imposed by Federal statute.".

SEC. 6. FEDERAL MEDIATION AND CONCILIATION SERVICE.

Section 203 of the Labor Management Relations Act, 1947, (29 U.S.C. 173) is amended by adding at the end thereof the following new subsection:

(f) The Service may make its services available to Federal agencies to aid in resolution of disputes under the provisions of subchapter IV of title 5, United States Code. Functions performed by the Service may include, but are not limited to, assisting parties to disputes relating to administrative programs, training persons in skills and procedures employed in alternative dispute resolution, and furnishing personnel to act as neutrals, as defined in section 581 of title 5, United States Code. Personnel assigned to act as neutrals should be qualified in accordance with section 593 of Title 5, United States Code. The Service may consult and cooperate with the Administrative Conference of the United States and other agencies in maintaining rosters of neutrals and arbitrators, and to adopt such procedures and rules as necessary to carry out the services authorized in this subsection.".

SEC. 7. GOVERNMENT TORT AND OTHER CLAIMS.

(a) Section 2672 of title 28, United States Code, is amended by inserting at the end of the first sentence the following—

"Except that any such award, compromise, or settlement may be effected without prior written approval to the extent the authority to do so is delegated to the head of the agency by the Attorney General of the United States. Such delegations may not exceed the authority delegated by the Attorney General to the United States Attorneys to settle claims for money damages against the United States. Each Federal agency may use arbitration, or other means of dispute resolution under the provisions of subchapter IV of title 5, United States Code, to settle any tort claim against the United States, not in excess of the agency's authority to award, compromise, or settle without prior written approval of the Attorney General or his designee. Any agency action relating to decisions to use or not to use a dispute resolution proceeding under this section shall not be subject to judicial review, except as provided by section 589(b) of title 5, United States Code.".

(b) Section 3711(a)(2) of title 31, United States Code, is amended by striking out "$20,000" and inserting in lieu thereof "$250,000".

SEC. 8. USE OF NON-ATTORNEYS.

(a) REPRESENTATION OF PARTIES.—Each agency, in developing a policy on the use of alternative means of dispute resolution under this Act, shall identify any of its administrative programs with numerous claims or disputes before the agency and determine—

(1) to extent individuals are represented or assisted by attorneys or by persons who are not attorneys; and

(2) whether the subject areas of the applicable proceedings or the procedures are so complex or specialized that only attorneys may adequately provide representation or assistance.

(b) REPRESENTATION AND ASSISTANCE BY NON-ATTORNEYS.—A person who is not an attorney may provide representation or assistance to any individual in a claim or dispute with an agency, if—

(1) such claim or dispute concerns an administrative program identified under subsection (a);

(2) such agency determines that the proceeding or procedure does not necessitate representation or assistance by an attorney under subsection (a)(2); and

(3) such person meets any requirement of the agency to provide representation or assistance.

(c) DISQUALIFICATION OF REPRESENTATION OR ASSISTANCE.—Any agency that adopts regulations under this section to permit representation or assistance by persons who are not attorneys shall review the rules of practice before such agency to—

(1) ensure that any rules pertaining to disqualification of attorneys from practicing before the agency shall also be made applicable as appropriate to other persons who provide representation or assistance; and

(2) establish effective agency procedures for enforcing such rules of practice and for receiving complaints from affected persons.

SEC. 9. AUTHORIZATIONS OF APPROPRIATIONS.

To carry out this Act, and notwithstanding section 576 of title 5, United States Code, there are authorized to be appropriated to the Administrative Conference of

the United States amounts not in excess of $1,000,000 for each of the fiscal years 1990, 1991, and 1992.

By Mr. WIRTH:

S. 972. A bill to transfer to the Secretary of Health and Human Services the authority of the Secretary of Energy to conduct epidemiological studies of the effects of radiation, and for other purposes; to the Committee on Energy and Natural Resources.

RADIATION RESEARCH REORGANIZATION ACT

Mr. WIRTH. Mr. President, every day tens of thousands of Americans report to work at the Rocky Flats Plant in Colorado, Fernald Plant in Ohio, Savannah River Plant in South Carolina, and the eight other major nuclear weapons production facilities located across the country. These dedicated individuals, employed by the Department of Energy [DOE] or one of several private contractors hired by DOE to operate its facilities, are a vital link in our national security chain.

In fulfilling their crucial mission, these employees are required to work with some of the most dangerous substances known to man: plutonium, uranium, beryllium, tritium and others. While extensive precautions are taken to ensure their safety, many questions remain unanswered about how exposure to these substances affects their health, and how we can better protect them from adverse health effects.

Some of these DOE facilities are located near major population centers. For example, the Rocky Flats plant is located just 16 miles from downtown Denver, while the Fernald Plan is only 20 miles northwest of Cincinnati. A number of radiation leaks or releases from these plants have occurred over the years, potentially exposing nearby residents to various amounts of radiation. Radioactive waste stored at a number of these plants has contaminated soil and ground water. We know that radiation can be dangerous to human health. But we do not know to what extent such radiation leaks and contamination may actually be affecting the health of these residents.

This uncertainty is unacceptable. We have a responsibility to vigorously seek answers to the question of whether these plants pose a health risk, and to do so in a manner which gains the confidence and trust of both the employees at DOE facilities and the populations residing near these facilities.

Yet the department with primary responsibility for assessing the health risks associated with our nuclear weapons complex, the Department of Energy, is the very department that is responsible for meeting a demanding production schedule for these nuclear materials and weapons.

The conflict of interest inherent in this arrangement is clear. Health and safety interests can—and often do—compete with production and budgetary goals. This appearance of "the fox guarding the chicken coop" has inevitably led to a dramatic failure to win employee and public confidence in the health research conducted by DOE.

DOE employees' concerns were clearly stated in a February 21, 1989, statement on protecting safety, health, and the environment at DOE nuclear facilities, when the executive council of the AFL–CIO asserted that "production (at DOE facilities) has been placed above safety and health concerns."

The lack of public confidence and trust was driven home in an October 1988 Time magazine cover story on health risks associated with the nuclear weapons production complex. The story was titled, "They lied to us." The "they" in question is the Federal Government and, more specifically, the Department of Energy. The title quote concisely summarizes the strong feelings of a number of families from communities near nuclear weapons plants who blame releases of radioactive emissions for the cancers that have killed or made seriously ill their spouses or children.

This mistrust of the Department of Energy has been compounded by the release of new information on releases of radiation from DOE facilities. For example, on May 4, 1989, the Washington Post reported that "as much as 3.1 million pounds of uranium dust and other radioactive materials were released from the feed materials production plant near Fernald (Ohio) between 1951 and 1985". The Department of Energy had previously estimated the amount at between 395,000 and 555,000 pounds.

The way in which epidemiological work has been carried out by the Department of Energy and the Department's reaction to negative findings have further exacerbated the situation. For example, in 1977, Dr.'s Thomas Mancuso, Alice Stewart and George Kneale published the results of a study which found an association between cancer and exposure to low-level radiation. Their research had been conducted under a DOE contract. However, upon publication of the results, DOE moved to sever the contract. Shortly thereafter, several powers critical of the Mancuso study were published by other DOE-sponsored researchers. Employees of DOE nuclear operations have since been unsure of the extent to which they can trust the results of DOE-sponsored health-effects studies—if, indeed, they can trust them at all.

Confidence in DOE research has been further undermined by the Department's practice of contracting with a limited number of DOE-supported laboratories or consortiums for the bulk of its health effects research. These contractors, which include the Oak Ridge Associated Universities [ORAU], Battelle Northwest Laboratories [BNL], and Los Alamos National Laboratory, have studied at least a dozen different radiation-exposed populations. A number of these studies have found significant excess cancer deaths. And yet, the DOE and contract researchers have insisted on characterizing these results as "preliminary and inconclusive." Dr. C.C. Lushbaugh, supervisor of the ORAU work, has stated, "We don't think anybody should have alarm about them. * * * We just don't consider them substantive conclusions."

DOE has also fueled the controversy by the way in which it restricts access to the data from these studies. Data supporting the conclusions of DOE-sponsored studies is unavailable to independent researchers. Consequently, independent researchers are unable to fully evaluate the results and verify the conclusions of these DOE-sponsored studies, and the public and workforce is left without any outside assessment of the quality and legitimacy of DOE's research.

DOE's data-access policy is at the center of an ongoing lawsuit between the Three Mile Island Fund, created in the aftermath of the 1979 incident at the Three Mile Island nuclear plant, and the Department of Energy. The fund has requested access to the records of 300,000 DOE workers to help in determining the health implications of exposure to low-level radiation. The Department of Energy, instead of doing everything possible to facilitate such a study, has consistently blocked access to a significant portion of these records.

Finally, DOE has refused to allow labor representation on its advisory and peer review committees. This has served to underscore the doubts of those who are the most vulnerable and the most directly affected—the workers.

Mr. President, we clearly have a major problem with the health research program of the Department of Energy. The Department's conflicting responsibilities for weapons production and for health research, combined with past and present practices, have resulted in an untenable situation: neither the DOE's own workforce nor the American public is convinced that their health and well-being is the Department of Energy's No. 1 priority.

Mr. President, my intent here is not to challenge the validity of DOE's health research or to assert unequivocably that DOE's nuclear weapons plants are a health risk to the work force or to neighboring populations. We have yet to achieve a national concensus about radiation exposure and its potential adverse effects on health. Some in the scientific community have supported the work of DOE and some

have roundly criticized it. The problem is that we are unable to objectively determine whether DOE's epidemiological work is accurate and adequate. We simply do not know with any precision the full extent of the health hazard posed by these plants. This factual void results in a largely emotional debate.

Neither is it my intent to question the intentions or dedication of the DOE employees and contractors charged with health research. But as long as a conflict of interest is perceived by the work force and the public, this research will not have the credibility we so urgently need it to have. The result is unfair to the public, unfair to the DOE's work force, and unfair to the researchers who are doing their best to perform objective work.

The wisdom of giving DOE this dual role of nuclear weapons manufacturer and health researcher was questioned as long ago as 1979, when an Interagency Task Force on the Health Effects of Ionizing Radiation, established by then-HEW Secretary Joseph Califano, called for an objective agency to be responsible for conducting this critical research. That recommendation was later echoed in 1983 in the final report of the Rocky Flats Blue Ribbon Citizens' Committee, convened by myself and then-Governor Richard Lamm, and again in 1984 by the Governor's Rocky Flats Employees Health Assessment Group.

The report of the Governor's Health Assessment Group read as follows:

> The committee believes that care should be taken in the next series of Rocky Flats cancer studies—studies which could have results with political and economic consequences to various parties and entities—to ensure that individuals and organizations with political and economic stakes in the outcome are not in a position where their judgment might be swayed, or perceived to be swayed, by such considerations.

Mr. President, the solution is clear: the surest way to gain public and worker confidence is by placing the authority for conducting health effects research with an agency primarily responsible for health issues—and by transferring that authority away from an agency primarily responsible for operating energy and defense programs. The Department of Health and Human Services (HHS), with the Agency for Toxic Substances and Disease Registry, the Centers for Disease Control, the National Institutes of Health, and the Food and Drug Administration under its umbrella, is the logical home for health research of all kinds. These various entities have all studied, from their particular perspectives, the health effects of radiation. HHS is well suited to accept and pursue this mission with the credibility so necessary if we are to find the answers we need.

Mr. President, today I am introducing the Radiation Research Reorganization Act of 1989, an expanded version of legislation I introduced in the 99th Congress. This bill will restore worker and public confidence in our program of research into the health effects of exposure to radiation.

Under the provisions of this bill, responsibility for epidemiological research into the health effects of expsoure to radiation will be transferred from the Department of Energy [DOE] to the Department of Health and Human Services [HHS].

The bill will also trasnfer to HHS the staff positions and other resources of DOE that are presently being used to health effects research.

The Secretary of HHS is directed to undertake a comprehensive research program to identify the nature and magnitude of the risk to the public and to DOE's work force from radiation generated by DOE nuclear facilities.

Additional provisions will:

Ensure that HHS has adequate access to all relevant DOE records and data;

Ensure that HHS has adequate funding to carry out this research;

Ensure that HHS has access to or is able to develop reliable data on radiation releases and exposure levels;

Direct HHS to coordinate research with appropriate State agencies responsible for public health, such as the Colorado Department of Public Health; and

Require that HHS conduct a comprehensive review of existing information and studies related to the effects of exposure to radiation on health, including studies conducted by DOE, Federal and State agencies, and independent researchers.

My bill will also create an advisory panel to assist the Secretary of Health and Human Services in carrying out the transferred functions. This panel will consist of nine members, appointed by the President with the advice and consent of the Senate. The panel will be composed of epidemiologists and others knowledgeable about the health effects of radiation, including at least one representative of each of the following: Public interest groups, State public health agencies from States with a DOE nuclear facility in their territory, organized labor unions active at DOE facilities, and the Department of Energy.

This legislation will specifically address the need to ensure confidentiality and safeguard classified material.

Mr. President, in November of 1988 the American Public Health Association adopted a resolution that recommended that—

> Responsibility for research into the * * * health of workers and nearby populations [of the Department of Energy's nuclear weapons facilities] be reassigned to the U.S. Department of Health and Human Services.* * *.

The shift of health research responsibility from DOE to HHS is also supported by a wide variety of public interest, scientific, labor, and environmental groups, including Physicians for Social Responsibility, the Union of Concerned Scientists, the Nuclear Control Institute, the Sierra Club, the Natural Resources Defense Council, and the United Steelworkers of America local 8031 at Rocky Flats.

Mr. President, the men and women who make up the Department of Energy's work force are worried. The mothers and fathers and children who live around the DOE's nuclear weapons facilities are worried. They know that these facilities are vital to our national defense, but they also know that, because of past, and, possibly, future practices, these facilities are potential killers. We owe it to these people to take this vital health research responsibility out of the Department of Energy, where it has never belonged, and to place it instead in a department where health and human welfare are the primary goal, the Department of Health and Human Services. My legislation will accomplish this. I urge my colleagues to support this bill, and I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 972

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Radiation Research Reorganization Act of 1989".

SEC. 2. FINDINGS.

The Congress makes the following findings:

(1) After many years of study there remain unresolved questions about the magnitude and nature of the risk to human health posed by exposure to radiation from sources such as nuclear bomb tests, the manufacture of nuclear weapons, residing near nuclear production facilities, nuclear power plants, and radioactive wastes, and the medical uses of nuclear materials.

(2) The risk to human health posed by present and future Department of Energy facilities is and must continue to be a crucial factor in decisions affecting these facilities. Informed decisions cannot be made without reliable and credible information on the risks to human health that may result.

(3) Public health authorities must be able to direct research and data collection efforts so that the true nature and magnitude of the past and present risk posed by human exposure to radiation can be determined, and so that effective means of protecting the public against dangerous exposure can be developed and implemented.

(4) The Secretary of Energy's responsibility for production of nuclear materials and weapons conflicts with the Secretary of Energy's responsibility under the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et

seq.), to study the health impacts of activities of the Department of Energy.

(5) There is considerable public doubt as to the integrity of health impact studies conducted by or on behalf of the Department of Energy. Past practices of the Department of Energy have amplified this doubt; ultimately, however, it stems from and is the inescapable consequence of the dual and conflicting responsibilities assigned to the Secretary of Energy. This doubt can be relieved only by reassigning the responsibility for epidemiological research into the health effects of exposure to radiation to an independent department of the government with no responsibility for the production or maintenance of nuclear weapons.

SEC. 3. DEFINITIONS.

For purposes of this Act:

(1) The term "epidemiological studies" means scientific studies of the incidence, distribution, and control of a disease or diseases in a population.

(2) The term "radiation release" means the routine or accidental release of a radionuclide into the workplace or the environment.

(3) The term "dose reconstruction" means the identification of the types and quantities of radionuclides to which an individual or a population is or has been exposed.

(4) The term "health risk assessment" means the determination of the magnitude and probability of actual or potential harm to the public health or environment.

(5) The term "related studies" means scientific studies, including health risk assessments and radiation release and dose reconstruction studies, which are undertaken as part of or in support of epidemiological studies into the health effects of exposure to radiation.

(6) The term "Department of Energy facilities" means facilities of the Department of Energy that are involved in the design, production, processing or reprocessing, assembly, fabrication, testing, storage, disassembly, or destruction of nuclear materials or weapons.

SEC. 4. TRANSFER.

(a) IN GENERAL.—(1) There is transferred to the Secretary of Health and Human Services the authority of the Secretary of Energy to conduct, under section 103 of the Energy Reorganization Act of 1974 (42 U.S.C. 5813) and any other law, epidemiological studies of the effects of exposure to radiation.

(2) In carrying out the function transferred by this subsection, the Secretary of Health and Human Services shall consult with—

(A) the Administrator of the Agency for Toxic Substances and Disease Registry;

(B) the Director of the Centers for Disease Control and the Director of the National Institute for Occupational Safety and Health;

(C) the Director of the National Institutes of Health and the Directors of the National Cancer Institute and of the National Institute of Environmental Health Sciences;

(D) the Commissioner of the Food and Drug Administration and the Director of the Center for Devices and Radiological Health; and

(E) the Directors of State Public Health Agencies of States in which a Department of Energy nuclear facility is located.

(b) ANCILLARY TRANSFERS.—There are transferred to the Secretary of Health and Human Services—

(1) the professional and administrative positions overseen;

(2) the property and records now being used or held;

(3) the obligations and commitments made; and

(4) the unexpended balances of appropriations, allocations, and other funds available (or to be made available) for use,

by the Secretary of Energy in connection with the function transferred by subsection (a).

(c) OMB REVIEW.—The Director of the Office of Management and Budget, at such time or times as the Director shall determine, shall make—

(1) such determinations as may be necessary with regard to the functions transferred by subsection (a); and

(2) such incidental dispositions of personnel, assets, liabilities, grants, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, arising from, available to, or to be made available in connection with such function,

as may be necessary to carry out the transfer of functions.

SEC. 5. STUDIES BY THE SECRETARY OF HEALTH AND HUMAN SERVICES.

(a) RESPONSIBILITIES OF THE DEPARTMENT OF HEALTH AND HUMAN SERVICES.—(1) The Secretary of Health and Human Services shall undertake a comprehensive program of epidemiological research, including related studies, into the health effects of exposure to radiation.

(2) The aim of the research program described in paragraph (1) shall be the identification of the nature and magnitude of the risk to the public and to the workforce of the Department of Energy resulting from Department of Energy activities.

(b) COORDINATION WITH STATE PUBLIC HEALTH AGENCIES.—The Secretary of Health and Human Services shall ensure that research activities are coordinated with appropriate State agencies responsible for public health.

SEC. 6. REPORTS BY THE SECRETARY OF ENERGY.

(a) REPORT OF AVAILABLE DATA AND RECORDS.—Not later than 60 days after the date of enactment of this Act, the Secretary of Energy shall prepare and submit to the Secretary of Health and Human Services and the Congress a complete listing of data and records held or maintained by the Department of Energy and of potential use in the conduct and evaluation of epidemiological and related studies.

(b) REPORT OF PAST LEVEL OF FUNDING.—Not later than 60 days after the date of enactment of this Act, the Secretary of Energy shall prepare and submit to the Secretary of Health and Human Services and the Congress a complete record of funds expended by the Department of Energy on research related to the health effects of exposure to radiation during each of the 5 years preceding the date of enactment of this Act.

SEC. 7. ACCESS TO DATA AND RECORDS.

(a) DEPARTMENT OF ENERGY DATA AND RECORDS.—(1) The Secretary of Energy shall provide to the Secretary of Health and Human Services or the Secretary's designees access to all data and records maintained or held by the Secretary of Energy and not transferred to the Department of Health and Human Services under section 4(b) if—

(A) such records are deemed by the Secretary of Health and Human Services to be useful to epidemiological research health risk assessments, radiation release studies, or dose reconstruction studies; and

(B) the Secretary of Health and Human Services has taken such steps as shall be necessary to ensure the confidentiality of information pertaining to individuals who are the subjects of the records.

(2) Specifically included in the data and records to be made available by the Secretary of Energy to the Secretary of Health and Human Services or the Secretary's designees are data and records relating to worker health, worker exposure to radiation, and routine and accidental releases of radionuclides.

(3) Access to data and records described in paragraphs (1) and (2) shall be provided to the Secretary of Health and Human Services or the Secretary's designees within 30 days following receipt by the Secretary of Energy of a written request for access to data or records.

(4) The Secretary of Health and Human Services shall not grant access to any employee of the Department of Heath and Human Services to classified material under paragraph (1) unless such employee possesses an appropriate security clearance and has a legitimate need to see the classified material in question.

(b) DEPARTMENT OF HEALTH AND HUMAN SERVICES DATA AND RECORDS.—The Secretary of Health and Human Services shall grant access to data and records held or developed by the Department of Health and Human Services, including data and records obtained from the Department of Energy, to the public in accordance with the established practices of the Department of Health and Human Services.

SEC. 8. FUNDING FOR THE DEPARTMENT OF HEALTH AND HUMAN SERVICES.

(a) LEVEL OF FUNDING.—The annual level of funding provided to the Department of Health and Human Services for the purpose of carrying out the responsibilities transferred in section 4(a) shall in no event be less than the greatest of the annual amounts reported by the Department of Energy pursuant to section 6(b).

(b) USE OF FUNDS.—Funds provided to the Department of Health and Human Services for the purposes of this Act may be used to support the direct and indirect costs of a program of epidemiological research, including related studies, into the health effects of exposure to radiation, and for such other uses as the Secretary may deem appropriate. Funds provided for the purposes of this Act may be used to support activities of State public health agencies that are compatible with the purposes of this Act.

SEC. 9. RADIATION RELEASE AND DOSE RECONSTRUCTION STUDIES AND HEALTH RISK ASSESSMENTS.

(a) STUDIES BY THE SECRETARY OF HEALTH AND HUMAN SERVICES.—The Secretary of Health and Human Services is authorized to undertake—

(1) such research and studies into radiation releases and dose reconstruction; and

(2) such health risk assessments,

as the Secretary may deem necessary in order to properly and fully carry out the duties transferred in section 4(a).

(b) REVIEW OF DEPARTMENT OF ENERGY STUDIES BY SECRETARY OF HEALTH AND HUMAN SERVICES.—The Secretary of Health and Human Services is authorized to review research and studies conducted by the Department of Energy after enactment of this Act relating to radiation releases, dose reconstruction, or health assessments.

SEC. 10. REVIEW OF EXISTING RESEARCH AND RECOMMENDATIONS.

(a) REVIEW OF RESEARCH INTO AND DATA RELATING TO HEALTH EFFECTS OF RADIATION.—(1) The Secretary of Health and Human Services shall conduct a comprehensive review of existing epidemiological studies and data relating to health effects of exposure to radiation.

(2) The review may include—

(A) studies conducted by the Department of Energy and its contractors;

(B) studies conducted by Federal, State, County, and local agencies;

(C) studies conducted by or on behalf of international organizations and foreign governments; and

(D) studies conducted by independent researchers, groups, companies, and private and public universities.

(3) The review shall—

(A) identify areas where additional research needs to be undertaken;

(B) establish priorities to be used in the allocation of resources to research activities; and

(C) make recommendations for specific research activities to be undertaken by the Department of Health and Human Services.

(4) The review shall be completed and submitted to the President and the Congress not later than 180 days after enactment of this Act.

(b) REVIEW OF HEALTH RISK ASSESSMENTS AND RADIATION RELEASES AND DOSE RECONSTRUCTION.—(1) The Secretary of Health and Human Services shall conduct a comprehensive review of existing and ongoing health risk assessments and of existing and ongoing studies relating to radiation releases and dose reconstruction efforts.

(2) The review may include—

(A) studies conducted by the Department of Energy and its contractors;

(B) studies conducted by Federal, State, County, and local agencies;

(C) studies conducted by or on behalf of international organizations and foreign governments; and

(D) studies conducted by independent researchers, groups, companies, and private or public universities.

(3) The review shall—

(A) identify areas where additional research needs to be undertaken;

(B) establish priorities to be used in the allocation of resources to research activities; and

(C) make recommendations for specific research activities to be undertaken by the Department of Energy or the Department of Health and Human Services.

(4) The review shall be completed and submitted to the President and to Congress not later than 180 days after enactment of this Act.

SEC. 11. ADVISORY PANEL ON RADIATION RESEARCH.

(a) ESTABLISHMENT OF ADVISORY PANEL.—(1) To advise the Secretary of Health and Human Services in carrying out the function transferred by section 4(a) there is established an advisory panel, to be known as the "Advisory Panel on Radiation Research".

(2) The advisory panel shall consist of 9 members appointed by the President by and with the advice and consent of the Senate. Members of the panel shall be appointed within 90 days of enactment of this Act. At least 5 of the 9 members shall be from outside the Federal service. Among the 9 members of the panel, there shall be at least one representative of—

(A) organized labor unions active at the Department of Energy's nuclear facilities;

(B) the Secretary of Energy;

(C) public interest groups concerned about the health effects of radiation; and

(D) State public health departments and agencies of States having a Department of Energy nuclear facility in their territory.

(b) DUTIES OF THE PANEL.—(1) The Advisory Panel on Radiation Research shall ensure the development and dissemination of reliable and credible information on the true nature and magnitude of the past and present risk posed by human exposure to radiation.

(2) In carrying out paragraph (1), the advisory panel shall review and evaluate the content and implementation of the program of research by the Department of Health and Human Services into the health effects of exposure to radiation. The advisory panel shall make specific recommendations to ensure that the health of workers and of the general population is being adequately protected.

(c) EXPENSES OF MEMBERS.—(1) Except as provided in paragraph (2), members of the Advisory Panel on Radiation Research shall—

(A) be entitled to receive the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day, including traveltime, during which they are engaged in the actual performance of duties vested in the panel; and

(B) while away from their homes or regular places of business and while serving in the business of the panel, be entitled to receive transportation expenses as prescribed by section 5703 of title 5, United States Code.

(2) Members of the panel who are full-time officers or employees of the United States shall receive no additional pay, allowances, or benefits by reason of their service on the panel.

(d) ADMINISTRATIVE SUPPORT.—The Secretary of Health and Human Services shall provide such administrative support services as the advisory panel may reasonably request.

By Mr. LUGAR (for himself, Mr. BOSCHWITZ, and Mr. DOLE):

S. 973. A bill to create a Rural Capital Access Program with the Department of Agriculture to encourage lending institutions to provide loans to certain businesses, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

RURAL CAPITAL ACCESS ACT

● Mr. LUGAR. Mr. President, I rise today to introduce legislation to promote economic development in our Nation's rural areas.

During the unprecedented growth of the last 7 years, rural America has lagged behind urban America in economic growth.

The Department of Agriculture's Economic Research Service recently reported that, despite nearly full employment at the national level, the unemployment rate in rural America remains substantially above the metropolitan rate. For the Nation as a whole, the preliminary data indicates that the national unemployment rate was 5.5 percent in 1988. Urban unemployment was 5.1 percent while unemployment in rural areas was 6.9 percent.

The growth that has occurred in rural areas has represented mostly a rehiring of the unemployed rather than an expansion of the labor force. The nonmetro labor force grew only 0.9 percent in 1988 versus metro growth of 1.7 percent. These statistics demonstrate a need for increased and varied business and job development in our rural areas.

Studies indicate that a major impediment to rural economic development is the lack of available credit for business creation, expansion and retention. My bill seeks to address this need. It is based upon a successful program in Michigan which makes credit more readily available to businesses by creating a reserve fund for losses that banks can tap when loans made under the program default.

My proposal, called the Rural Capital Access Program, or RCAP, provides a nonbureaucratic tool for banks to make loans that are somewhat riskier than conventional loans. RCAP creates a reserve fund that banks can access when an economic development loan defaults.

Under the program, the borrower makes a premium payment of between 1.5 and 3.5 percent of the loan amount. The bank matches that payment and RCAP matches the combined lender/borrower payment which will range between 3 and 7 percent of the amount of the loan. Thus, the total reserve for any loan is between 6 and 14 percent of the loan amount. In effect, RCAP serves as a catalyst for private lending in which the bank exercises its own credit judgment, but benefits from some increased protection for risk taking.

Let me also point out that State involvement in this program, in the form of rebates to lenders and borrowers of some or all of their RCAP payments, is certainly possible if a State desires to provide such assistance. In fact, in view of some concerns I have heard about the premium levels in my bill, I encourage State participation along these lines and welcome any suggestions to facilitate it.

The reserve fund is earmarked for each bank so that every institution has its own reserve fund to draw upon if a loan defaults. If no default occurs, the funds stay in the reserve.

The earmarked reserve allows a bank to be more aggressive in its loan making. However, if a bank's losses were to exceed the amount in the reserve, the bank would be at risk for the excess loss. Thus, the bank is compelled to remain prudent in its credit decisions.

Borrowers benefit from the program because the reserve fund allows access to credit that they otherwise could not obtain.

The Government benefits from the additional economic activity in our rural areas. The Government's cost exposure is also limited to its matching contribution which contrasts to a loan guarantee where it may be liable for up to 100 percent of the outstanding loan principal.

The program provides an excellent ratio of public to private dollars. Thus far, Michigan receives $18.10 of private capital for each $1 it contributes. There is also very little overhead in terms of staff and infrastructure. By using institutions that already exist in rural areas, namely commercial banks, we ensure that the money is spent on economic development, not staff and buildings. Moreover, the program would operate throughout rural America, not just in limited areas. Thus, the Government would not be forced into picking winners and losers which would be the case for programs that operated on a smaller geographic scale.

The premium obviously adds an additional cost to borrowing that financially strong borrowers will want to avoid. Many economic development incentives are criticized as providing benefits to businesses that do not need the assistance. RCAP allows the marketplace to allocate the resources to those in need because creditworthy borrowers would be discouraged from using the program.

Given our current Federal deficit situation, an important consideration for any new legislation in its cost. According to our preliminary discussions with Congressional Budget Office and Office of Management and Budget, RCAP is a cost-effective program. The Federal Government's exposure is limited to its contributions to the reserve fund and outlays would only occur in those case where a loan defaulted.

One of the important elements of my bill is its low administrative cost. Given the limited Federal funds available, our money should be spent on programs, not on bureaucracy, staff and offices. When designing any rural development program, we should look to see if currently existing programs or agencies have the same, or a similar function, and then use or modify those that already exist. In that way, we will have the most efficient utilization of scarce Federal resources.

Mr. President, this bill does not address all of the problems facing rural America. Many other problems could also be described in such areas as communications, education and infrastructure. My bill is an effort to address just one of these areas—business creation, expansion and retention.

Attempting to solve the difficult problems of rural America is complex, and many of these issues are beyond the jurisdiction of the Agriculture Committee. That is why I am pleased that majority leader MITCHELL and Republican leader DOLE created a bipartisan Rural Development Task Force earlier this year to develop multijurisdictional legislation to address all of these problems. On the Agriculture Committee, my friend Chairman LEAHY and I, along with Senators MCCONNELL and HEFLIN and others, have been studying possible solutions for several months.

During the drafting of this bill, I sought input from a variety of groups and individuals, including rural bankers. I look forward to the continued counsel of these groups and individuals and also the comments and suggestions of my colleagues as we proceed with our rural development debate.

Finally Mr. President, I urge my colleagues to work together to produce responsible multijurisdictional rural development legisaltion this year and I urge my colleagues to seriously consider this concept as a major component of the business financing section of our final rural development bill.

Mr. President, I ask unanimous consent that a copy of the summary, the section-by-section explanation, and the text of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 973

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Rural Capital Access Act of 1989".

SEC. 2 DEFINITIONS.

As used in this Act:

(1) ELIGIBLE COUNTY—The term "eligible county" means a country that does not contain an area designated as a standard metropolitan statistical area by the Office of Management and Budget.

(2) FUND.—The term "Fund" means the Rural Capital Access Fund established under section 3(b).

(3) PROGRAM.—The term "Program" means the Rural Capital Access Program established under section 3(a).

(4) SECRETARY.—The term "Secretary" means the Secretary of Agriculture.

(5) STATE.—The term "State" means each of the 50 States of the United States.

SEC. 3. RURAL CAPITAL ACCESS.

(a) ESTABLISHMENT OF PROGRAM.—The Secretary shall establish a program to be known as the "Rural Capital Access Program" through which the Secretary shall provide incentives to lending institutions to encourage such institutions to provide new loans to certain businesses.

(b) ESTABLISHMENT OF FUND.—

(1) IN GENERAL.—The Secretary shall establish and maintain a fund to be known as the "Rural Capital Access Fund" that shall serve as a reserve account to protect lending institutions that participate in the Program from losses associated with certain loans.

(2) AMOUNTS IN FUND.—The fund established under paragraph (1) shall contain amounts received under this Act from the Federal government, participating lending institutions, and eligible borrowers. The amounts obligated to the Fund shall remain in the Fund until expended.

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—To carry out this Act there are authorized to be appropriated $100,000,000 for each of the fiscal years 1990 through 1994.

(b) AMOUNTS NOT TO REMAIN AVAILABLE.—The amounts appropriated during each fiscal year pursuant to paragraph (1), that are not obligated to the Fund during such fiscal year, shall not remain available for use under the Program after the fiscal year for which such sums are appropriated.

(c) ADMINISTRATIVE EXPENSES.—No funds appropriated under this Act shall be used for the administrative expenses of State agencies or institutions participating in the Program.

SEC. 5. ALLOCATION.

(a) IN GENERAL.—Of the amount appropriated under section 4, the Secretary shall allocate to each State at the beginning of each fiscal year an amount for use under the Program equal to an amount that bears the same ratio to the total amount of such appropriation as the number of individuals residing in eligible counties in such State bears to the number of individuals residing in eligible counties in all States.

(b) REALLOCATION.—Any portion of the allocation under subsection (a) for use within a State during a fiscal year that the Secretary determines is not obligated to the Fund by June 1 of such fiscal year shall be released by the Secretary for obligation under the Program in connection with loans made in any other State.

SEC. 6. ADMINISTRATION OF THE PROGRAM.

(a) NOTIFICATION AND APPLICATION.—

(1) IN GENERAL.—A State that desires to participate in the Program shall notify the Secretary in writing of its intent to participate, and shall provide such information as the Secretary shall require, including a designation of the State agency or private institution that shall administer the Program within the State.

(2) PRIVATE INSTITUTION.—If a State fails to—

(A) submit a notification to the Secretary within 6 months after the date of enactment of this Act; or

(B) designate a State agency or private institution to administer the Program;

a private institution within such State may apply to the Secretary to participate in the Program on behalf of such State. Within a reasonable period of time following the receipt of such application, the Secretary shall approve such institution for participation in the Program unless good cause exists to reject such application. If more than one such application is received from institutions within the State, the Secretary shall select from among the applicants one institution to participate in the Program.

(3) DUTIES.—The participating State agency or private institution shall—

(A) promote the Program within the State;

(B) recruit lending institutions within the State to participate in the Program;

(C) enter into agreements with participating lending institutions that outline the rights and obligations of such institutions;

(D) encourage participating lending institutions to use the Program to expand the funding activity of such institutions in eligible counties and avoid displacing commercial loans that could otherwise be made without the incentives provided under the Program; and

(E) maintain such books and records of its activities under the Program, as specified by the Secretary and grant the Secretary reasonable access to such books and records.

(b) ELIGIBLE LENDING INSTITUTIONS, BORROWERS, AND LOANS.—

(1) ELIGIBLE LENDING INSTITUTIONS.—To be eligible to participate in the Program, a lending institution must be legally able to make loans within eligible counties in the State.

(2) ELIGIBLE BORROWERS.—An eligible borrower must be a corporation, partnership, joint venture, sole proprietorship, retail business, cooperative, individual, or any other entity, whether profit or nonprofit, that conducts or is planning to conduct business in an eligible county in a State.

(3) ELIGIBLE LOANS.—To be eligible for protection under this Act a loan made by an eligible lending institution shall—

(A) be made to an eligible borrower;

(B) be used by the borrower for economic activity that is located in an eligible county;

(C) not be used for the construction or purchase of residential property;

(D) not be used to finance any real estate purchase primarily for investment purposes, without developing or improving such real estate, or without intending to use such real estate in connection with the business of the borrower;

(E) not be an existing loan of the lending institution (or an affiliate of such institution) that is not in the Program unless the institution increases the outstanding balance of such loan and places the refinanced loan into the Program only to the extent that the principal of such loan is increased;

(F) not be made to a director, officer, or principal shareholder of the lender or a member of the immediate family of a director, officer, or principal shareholder of the lender; and

(G) not exceed $3,000,000.

SEC. 7. OPERATION OF THE PROGRAM.

(a) LOAN PROCESS.—A lending institution that enters into an agreement with the administering agency or institution may make loans to eligible borrowers and such loans shall be protected by the subaccounts contained in the Fund.

(b) CREATION OF SUBACCOUNTS.—

(1) IN GENERAL.—A subaccount shall be created in the Fund for a lending institution that enters into an agreement with the administering agency or institution that shall contain amounts derived from contributions made by the lending institution, the borrower, and the Federal government.

(2) CONTRIBUTIONS.—

(A) MINIMUM.—The minimum contributions in connection with any eligible loan on the subaccount of a lending institution under this subsection shall be—

(i) an amount equal to not less than 1.5 percent of the amount of the loan to be paid by the borrower;

(ii) an amount equal to the amount contributed under clause (i) to be paid by the lending institution; and

(iii) an amount equal to the amounts paid under clauses (i) and (ii) to be paid by the Secretary.

(B) MAXIMUM.—The maximum contributions in connection with any eligible loan to the subaccount of a lending institution under this subsection shall be—

(i) an amount equal to not greater than 3.5 percent of the amount of the loan to be paid by the borrower;

(ii) an amount equal to the amount contributed under clause (i) to be paid by the lending institution; and

(iii) an amount equal to the amounts paid under clauses (i) and ii) to be paid by the Secretary.

(C) DETERMINATION.—The amount of the contribution to be made by a borrower in connection with any eligible loan made under the Program shall be established through an agreement between the lender and the borrower.

(3) INTEREST.—The subaccount of each lending institution shall earn interest at a rate equal to the current average market yield on outstanding marketable obligations of the United States.

(4) WITHDRAWAL.—A lending institution shall only be permitted to withdraw funds from the subaccount of such institution to reimburse such institution for losses suffered on eligible loans made under the Program.

(c) PROCEDURE.—

(1) NOTIFICATION.—After entering into an agreement with the administering agency or institution to participate in the Program, a lending institution shall notify such agency or institution before concluding a loan agreement to provide an eligible loan to any eligible borrower to ensure that the Secretary has sufficient funds available for use in such State to pay the contribution required of the Secretary under subsection (b)(2).

(2) TIME FOR CONTRIBUTIONS.—

(A) LENDING INSTITUTION AND BORROWER.—The lending institution shall pay the required contribution, and collect and pay the required contribution of the borrower, to the administering agency or institution not later than 10 working days after the applicable loan agreement is entered into.

(B) TRANSFER TO SECRETARY.—Not later than 5 working days after the receipt of funds under subparagraph (A), the administering agency or institution shall transfer such funds to the Secretary.

(C) SECRETARY.—As soon as practicable after the administering agency or institution transmits the contributions required under subsection (b)(2) to the Secretary, such contributions and the matching funds required to be provided by the Secretary, shall be deposited by the Secretary into the subaccount of the institution created within the Fund in accordance with subsection (b)(1).

(d) CLAIMS AGAINST THE FUND.—

(1) DETERMINATION OF CHARGE OFFS.—A lending institution shall determine when and how much to charge off on a loan eligible for protection under this Act in a manner that is consistent with the normal methods used by such institution for making such determinations concerning its commercial business loans not covered under the Program.

(2) FILING OF CLAIM.—A lending institution shall file a claim for assistance under this Act with the administering agency or institution at the time that such lending institution charges off all or part of an eligible loan.

(3) AMOUNT OF CLAIM.—

(A) IN GENERAL.—A claim filed by a lending institution under this subsection may include the full amount of the principal of the loan that is charged off, any interest accrued on the loan, and any out-of-pocket expenses incurred by such institution in connection with the loan.

(B) LIMITATION.—If the amount of a loan that is protected under this Program is less than the total amount of the loan principal charged off by the lender, the amount of principal and accrued interest that may be included in a claim shall not exceed the principal amount of such loan that is protected under the Program in addition to any accrued interest attributable to such principal.

(4) REVIEW OF CLAIMS.—

(A) IN GENERAL.—A claim submitted under this section shall be promptly delivered by the administering agency or institution to the Secretary who shall, not later than 20 days after the receipt of such claim, review the claim and make a payment to the lending institution from the subaccount of such institution in the amount of the claim.

(B) LIMITATION.—Except as provided in section 9(c), the amount of payment made to a lender on any claim under this Program shall not exceed the total amount that such lending institution has in its subaccount in the Fund.

(C) GROUNDS FOR DENIAL OF CLAIM.—The Secretary shall only deny a claim submitted under this subsection, or a portion thereof, if the Secretary determines that the lending institution that submitted the claim has knowingly—

(i) violated a provision of this Act;

(ii) violated a provision of the agreement of the institution with the administration agency or institution;

(iii) allowed interest to accrue on the loan for an unreasonable period of time after the loan became delinquent without taking prudent action to collect the principal; or

(iv) submitted a false claim.

(e) REVIEW BY SECRETARY.—The Secretary may review the operations of any lending institution that participates in the Program under this Act.

SEC. 8. INACTIVE LENDING INSTITUTIONS.

If, for a period of at least 24 consecutive months, the amount in the subaccount of a lending institution exceeds the outstanding balance of all loans of such institution protected under this Program, the Secretary may withdraw any such excess amounts so that the amount of funds remaining in the subaccount are equal to 100 percent of the outstanding balance of such loans. Such excess shall be transferred to a general account within the Fund to be utilized by the Secretary for other contributions under section 7(b)(2).

SEC. 9. INITIAL PROGRAM INCENTIVES.

(a) PURPOSE.—To encourage lending institutions to participate in the Program and to make eligible loans during the early stages of the implementation of the Program, the Secretary shall provide two special incentives as provided in subsections (b) and (c).

(b) ADDITIONAL CONTRIBUTION.—The Secretary shall contribute an amount, under section 7(b)(2), equal to 150 percent of the amount of the contributions made by the lending institution and the borrower, in connection with any loan protected under the Program, with respect to the first $2,000,000 of principal on loans made by such institution that are protected under the Program.

(c) PAYMENT OF CLAIMS WITH FUTURE CONTRIBUTIONS.—

(1) AVAILABILITY.—The provisions of this subsection shall only apply to the first $5,000,000 of principal on loans made by a lending institution that are protected under the Program.

(2) INCENTIVE.—If a claim is filed under section 7(d) on a loan that meets the requirement of paragraph (1), and at the time that such claim is made there is not a sufficient amount of funds in the claiming lending institution's subaccount to pay the full amount of such claim, the lending institution may withdraw all of the funds in such

subaccount and, to the extent such institution continues to make eligible loans under this Act that result in additional contributions to such subaccount, such institution may withdraw such additional funds from the subaccount at the time such funds are deposited as may be necessary to exhaust the full amount of any such claim.

(3) LIMITATION.—The Secretary shall limit withdrawals from the subaccount of any lender under this subsection so that the amount withdrawn by the lending institution to reimburse such institution for a prior claim, shall not exceed 75 percent of the amount in such subaccount immediately prior to such subsequent withdrawal.

SUMMARY OF SENATOR LUGAR'S RURAL CAPITAL ACCESS PROGRAM

A major impediment to rural economic development is the lack of available commercial credit for business development and retention. This bill is based upon a successful program in Michigan which makes credit more readily available to businesses by creating a reserve fund for losses that banks can tap when loans made under the program default.

The Lugar proposal, called the Rural Capital Access Program (RCAP), provides a non-bureaucratic tool for banks to make loans that are somewhat riskier than conventional loans. In effect, RCAP serves as a catalyst for private lending in which the bank exercises its own credit judgment, but with greater flexibility for risk-taking.

RCAP creates a reserve fund that banks can tap when an economic development loan defaults. Under the program, the borrower makes a premium payment (1.5 to 3.5 percent of loan amount). The bank matches that payment and RCAP matches the combined total of the two payments (between 3 and 7 percent). Thus, the reserve for any loan is between 6 and 14 percent of the loan amount.

The reserve fund is earmarked for each bank so that every institution has its own reserve fund to draw upon if a loan defaults. If no default occurs, the funds stay in the reserve. The earmarked reserve allows a bank to be more aggressive in its loan-making. However, if a bank's losses were to exceed the amount in the reserve, the bank would be at risk for the excess loss. Thus, the bank is compelled to remain prudent in its credit decisions.

Borrowers benefit from the program because the reserve fund allows access to credit that they otherwise could not obtain. Creditworthy borrowers would not use the program because of the premiums.

The government benefits from the additional economic activity in our rural areas. The government's cost exposure is also limited to its matching contribution which contrasts to a loan guarantee where it may be liable for up to 100 percent of the outstanding loan principal.

Thus far, Michigan receives $18.10 of private capital for each $1.00 it contributes. There is also very little overhead in terms of staff and infrastructure. By using institutions that already exist in rural areas, namely commercial banks, we ensure that the money is spent on economic development, not staff and buildings.

SECTION-BY-SECTION EXPLANATION OF S. 973, RURAL CAPITAL ACCESS ACT OF 1989

SECTION 1.—SHORT TITLE

The short title of this act is the "Rural Capital Access Act of 1989".

SECTION 2.—DEFINITIONS

This section defines 5 terms used in the act: eligible county; Fund; Program; Secretary; and State.

The term "eligible county" means any county that does not contain an urban area referred to by OMB as a standard metropolitan statistical area; in other words, rural counties. The program established by the act is available only for the purpose of financing economic activity in eligible counties.

The terms "Fund" and "Program" refer to the Rural Capital Access Fund and the Rural Capital Access Program which are both established by this act.

The terms "Secretary" and "State" mean the Secretary of Agriculture and the 50 states of the U.S., respectively.

SECTION 3.—RURAL CAPITAL ACCESS

Subsection (a) provides for the establishment of the Program, under which the Secretary will provide incentives to lending institutions to provide loans to businesses to finance activities in eligible counties.

Subsection (b) provides for the establishment and maintenance of the Fund by the Secretary. The Fund will consist of reserve accounts set up for each participating lending institution to protect such institution against covered losses on loans participating in the program. Reserve accounts in the fund are lender specific and will consist of the money contributed under the program by the lender, its participating borrowers, and the Federal Government.

SECTION 4. AUTHORIZATION OF APPROPRIATIONS

Subsection (a) authorizes appropriations of $100 million annually for 1990 through 1994.

Subsection (b) provides that annual amounts appropriated but not obligated to the fund will be not be available for use in subsequent years.

Subsection (c) provides that no funds appropriated under the act can be used to pay administrative expenses of the Program or any institution participating in the Program.

SECTION 5. ALLOCATION

Subsection (a) provides that the funds appropriated annually to implement the Program shall be allocated for use among the 50 states on the basis of rural population. Specifically, the allocation of funds available to be committed under the Program to participating institutions in a state would be that share of the total appropriation for the year proportionately equal to the share of that state's rural population of all 50 states.

Subsection (b) provides that any funds allocated for use in a particular state that have not been committed by June 1 of the year (as determined by the Secretary), will be released for use under the Program by participating lenders anywhere in the 50 states.

SECTION 6. ADMINISTRATION OF THE PROGRAM

Subsection (a) provides that any state that desires to participate in the Program shall notify the Secretary of that interest and provide information as required by the Secretary. As part of the notification, the state must designate a state agency or a private institution to administer the Program in the state.

If, within 6 months after enactment of this act, a state has not notified the Secretary of its intent to participate in the Program, or failed to designate an agency or institution to administer the Program, a private institution can apply to participate for the state. The Secretary is required to approve any such application within a reasonable time period unless there is good cause to reject it. If more than one application is received, the Secretary is authorized to select one of the applicants and reject the others.

This subsection also provides that the duties of the administering agency or institution within a state will be—to promote the Program and recruit lending institutions to participate in it; to enter into agreements with lending institutions which outline the rights and obligation of the institutions under the Program; to encourage participating lenders to expand their lending in eligible counties and not to use the Program to displace loans that would otherwise be made without the Program incentives; and to maintain books and records of Program activities as required by the Secretary and to give the Secretary reasonable access to them.

Subsection (b) provides that a lender is eligible to participate in the Program if it is legally able to make loans in eligible counties within the state. An eligible borrower is defined as an individual or business entity (including corporations, partnerships, cooperatives and other types of business organizations whether operated for profit or not) that is planning to conduct business in an eligible county.

A loan eligible for protection under the Program must be made by an eligible lender to an eligible borrower for use in financing economic activity in an eligible county. The maximum loan amount eligible for participation in the program is $3 million. An eligible loan cannot be used for the purchase or construction of residential property, or to finance the purchase of real estate primarily for investment purposes unless the borrower intends to develop or improve the property or to use it in connection with the borrower's business. In addition, a lender cannot enter previously made loans into the Program except to the extent that such a loan is refinanced and the principal amount increased. In such a case the loan could be put into the program but only to the extent of the increase in the amount of principal outstanding. Finally, any loan made by a lender to a director, officer, or principal shareholder of the lender or an immediate family member of any of such persons is not eligible for protection under the Program.

SECTION 7. OPERATION OF THE PROGRAM

Subsection (a) provides that an eligible lender that has entered into an agreement with the administering agency or institution for a state can make loans to eligible borrowers which will be protected by the money in that institution's reserve account in the Fund.

Subsection (b) defines the levels of contribution applicable to loans participating in the Program. Equal contributions to the lender's reserve account in the Fund, of not less than 1.5 percent nor more than 3.5 percent of the loan amount, are required of both the lender and the borrower for each loan placed in the Program. The exact amount of the contribution will be determined by agreement between the lender and the borrower. The Secretary is required to make a matching contribution to the lender's reserve account in an amount equal to the combined lender/borrower contribution. Amounts deposited in the lender reserve accounts will earn interest at a rate comparable to that paid on outstanding obligations of the U.S. Funds deposited in a lender's re-

serve account are only available to be withdrawn by that lender and only for purposes of reimbursing that lender for losses suffered on a loan participating in the program.

Subsection (c) requires that participating lenders notify the applicable administering agency or institution for a state before concluding a loan agreement with a borrower to confirm that funds allocated for use in the state under the Program are available for commitment by the Secretary with respect to the loan.

A participating lender is required to collect the borrower's contribution on a participating loan and to forward that money along with its own contribution on the loan to the administering agency or institution within 10 working days after a loan agreement is concluded. The administering agency or institution then has 5 working days to transfer these funds to the Secretary. As soon as practicable after the Secretary receives a transfer of funds from such agency or institution, the Secretary is required to deposit the funds along with the Federal matching contribution into the reserve account of the lender.

Subsection (d) provides that the lender has sole authority to determine when and how much to charge off as a loss on a loan participating in the Program. However, the lender must act in a manner that is consistent with the normal method used by the lender for making such determinations in connection with its commercial business loans that are not participating in the Program. This subsection contemplates that a lender will make reasonable and prudent efforts to collect on any loan collateral or other security of the borrower before the lender determines the amount of a loss on the loan for purposes of this Program.

A claim for assistance under the Program (that is, a claim for reimbursement of a loss on a loan) must be filed by the lender with the administering agency or institution for the state at the time the lender makes the determination of the amount of the loss. A claim may include the full amount of any loan principal that is charged off plus accrued interest on the loan and any out-of-pocket expenses incurred by the lender in connection with the loan. In any case where the full amount of the principal of a loan is not protected under the Program and the amount of the loan charged off exceeds the amount of principal protected, the size of the claim will be limited to the amount of principal covered plus the accrued interest attributable to such principal.

This subsection further requires the administering agency or institution to promptly deliver any claim it receives to the Secretary and provides that the Secretary shall review and make payment on the claim to the lender within 20 days after receiving it. Payment of any claim shall be made from the funds in the lender's reserve account and the amount of such payment cannot exceed the total funds in such account.

The Secretary may deny a claim, or a portion thereof, made under the program only if the Secretary determines that the lender knowingly—submitted a false claim; violated a provision of the act or of its agreement with the administering agency or institution; or allowed interest to accrue on the loan for an unreasonable period of time after the loan became delinquent without making a prudent effort to collect on the loan.

Subsection (e) authorizes the Secretary to review the operations of any participating lender under the Program.

SECTION 8. INACTIVE LENDING INSTITUTIONS

This section authorizes the Secretary to adjust the total dollar balance in the reserve account of a lender if, for a period of at least 24 consecutive months, the balance in such account exceeds the outstanding balance of all loans the lender has participating in the Program. In the event of such an adjustment, the Secretary would transfer from such lender's account any funds, in excess of 100 percent of the outstanding balance of such outstanding loans, to a general account maintained by the Secretary within the Fund for use by the Secretary under the Program.

SECTION 9. INITIAL PROGRAM INCENTIVES

Subsection (a) states that the purpose of this section is to encourage lender participation and loan making in the Program during the early stages of its implementation by authorizing two lender incentives.

Subsection (b) requires the Secretary, in connection with the first $2 million of loan principal entered into the Program by each lender, to make a contribution to the lender's reserve account of 150 percent of the combined contribution made by the lender and the borrower. For loans made subsequently by the lender the Secretary's contribution would be made at 100 percent of such combined amount.

Subsection (c) applies only to the first $5 million of loan principal entered into the Program by each lender. Under this subsection, if a claim, made on a loan within the category, exceeds the total funds in the lender's reserve account at the time the claim is made, such lender may withdraw all of the funds in the account and, in addition, may apply future contributions to the account toward the payment of the claim. Any withdrawal of future contributions under this provision shall take place at the time the contributions are made, but may not exceed 75 percent of the amount in such account immediately prior to the withdrawal.●

By Mr. REID (for himself and Mr. BRYAN):

S. 974. A bill to designate certain lands in the State of Nevada as wilderness, and for other purposes; to the Committee on Energy and Natural Resources.

NEVADA WILDERNESS PROTECTION ACT

Mr. REID. Mr. President, this year we celebrate the 25th anniversary of the Wilderness Act of 1964. The passage of this legislation brought with it, of course, obligations.

Once we craft and improve legislation, our job is not over. We are accountable, in many cases, to implementing the laws that we create.

Such is the case with the 1964 Wilderness Act. The act established a national wilderness preservation system to be composed of areas that we in Congress designate legislatively as wilderness.

Congressional action was to be predicated on recommendations made by the National Forest Service.

In effect, Mr. President, Congress and the President decided 25 years ago that there were certain forest areas that should be set aside in their natural state; the reason being, of course, that civilization was taking over these beautiful pristine areas and destroying them. So after Congress passed that act, the job of the Forest Service was to identify areas that were subject to wilderness designation and then it was up to Congress to do the designation.

Until such legislation was enacted, all undeveloped or primitive Forest Service lands were to be protected as wilderness.

The Forest Service made its recommendations, and, in the next 25 years, Congress fulfilled its obligations under the 1964 Act, passing wilderness legislation on a State-by-State basis. There is now just one State left that has not fulfilled that obligation, and that is the State of Nevada. It is only fitting that, on the silver anniversary of the Wilderness Act, we fulfill our obligation to Nevada, the Silver State.

Today, I am joined by my colleague from Nevada, Senator RICHARD BRYAN, in introducing the Nevada Wilderness Protection Act of 1989.

Our bill is a response to a mandate given to Congress a quarter of a century ago.

It is time to conclude this lingering obligation.

When I served in the House of Representatives, Mr. President, a wilderness bill for Nevada passed. It died in the Senate. After I left the House of Representatives, the House of Representatives once again passed a wilderness bill for the State of Nevada which again died in the Senate.

Because Nevada has not passed any wilderness bill, over 3.2 million acres of land remain protected as de facto wilderness, in accordance with, court decisions and the 1964 act.

Until we pass this bill, the land tied up in 1964 will remain off limits.

If the legislation introduced today becomes law, 733,000 acres of land will be designated as wilderness in the State of Nevada.

Nearly 2.4 million acres will be released for multiple uses, including development, mining, and, of course, ranching and recreation. From the viewpoint of environmentalists, industrialists, and farmers, Congress has an imperative to act.

In recent months, the concern for preserving our environment has assumed prominence in the collective consciousness of our Nation and this Congress.

The disastrous Alaska oil spill is destroying what some call America's last wilderness frontier.

While this place of beauty is being enveloped by a black cloak of oil, we travel to the Amazon rainforests and beseech Brazil to preserve its valuable tropical treasures.

Our concern for the rainforests is well-justified. As a matter of fact, yesterday I introduced a joint resolution outlining U.S. policy for rainforest conservation.

But I find it troubling and hypocritical that we can offer our support to foreign nations for the preservation of their disappearing rainforests, when we, in the United States, cannot fully extend the same help to our own country to preserve its disappearing wilderness.

Let us apply the same standards at home that we are trying to apply abroad.

Brazilian President Jose Sarney acknowledges that his country must act to conserve the rainforests. He says: "We are accused of something we cannot accept—of destroying our own territory."

To invoke President Sarney's words, we cannot accept the destruction of our territory either.

The legislation introduced today will ensure that wilderness lands are designated and preserved as an enduring resource, not only for the State of Nevada, but this Nation as a whole.

It is interesting to note that one wilderness opponent, who recently spoke out in Nevada, is a top exploration official for Exxon. Exxon, in fact, cosponsored a seminar to say we do not want wilderness in Nevada.

Well, I say to Exxon, Mr. President, that we in Nevada can decide which of our beautiful forestlands should be set aside. We do not need the people who are trying to ruin Alaska to come to Nevada to tell us what we need to do with our forests.

This person from Exxon spoke of wilderness as a form of economic obstructionism. In reality, the proposed Nevada Wilderness Protection Act will provide economic opportunism. What the Exxon official and other wilderness detractors do not realize or acknowledge is that this legislation will free up 2.4 million acres that is currently protected as de facto wilderness.

That is a huge expanse of land, which makes me wonder whether opponents really understand that they will also greatly benefit from this legislation.

Ranchers, miners, producers of oil, timber and gas, they will all benefit.

We must remind ourselves of the meaning of wilderness, as defined by Congress in 1964.

Wilderness, according to the act, is a "contrast with those areas where man and his own works dominate * * * an area where the Earth, and its community of life, untrammeled by man—where man himself is a visitor."

That is what the 1964 Act, some 25 years ago, indicated. So I encourage my colleagues to support swift passage of this bill introduced today because our action will demonstrate our oft-spoken commitment to preserve our environment. Our action will also release lands for multiple uses desired by those pursuing recreation and making a living and put an end to 25 years of not knowing what really would be wilderness and what would not be wilderness.

Finally, our action will fulfill a long-standing obligation to ensure that Congress obeys its law.

Mr. President, I submit that the State of Nevada is more than a place to test weapons. The State of Nevada is more than a place to do high-level aircraft training for our Air Force, our Navy. It is a place that is more than the bright lights of Las Vegas and Reno. It is a place that is the most beautiful State in the United States, a series of intersecting mountain ranges, with beautiful meadows and high mountaintops; an area where we can go to America's newest national park and see a glacier; the oldest living things in the world, the bristlecone pine. If we go to the wilderness areas that will be in this legislation that will be introduced in a few minutes, we will see elk, we will see mountain goats, mountain sheep, we will see beaver, all kinds of animals in this beautiful wilderness.

So I submit to this body, Mr. President, that this legislation is 25 years past due, and I look forward to its speedy passage in this body this year.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 974

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Nevada Wilderness Protection Act of 1989".

SEC. 2. DESIGNATION OF WILDERNESS AREAS.

In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131-1136), the following lands in the State of Nevada are designated as wilderness, and, therefore, as components of the National Wilderness Preservation System:

(1) certain lands in the Toiyabe National Forest, which comprise approximately 38,000 acres, as generally depicted on a map entitle "Alta Toquima Wilderness—Proposed", dated May, 1989, and which shall be known as the "Alta Toquima Wilderness";

(2) certain lands in the Toiyabe National Forest, which comprise approximately 115,000 acres, as generally depicted on a map entitled "Arc Dome Wilderness—Proposed", dated May, 1989, and which shall be known as the "Arc Dome Wilderness";

(3) certain lands in the Inyo National Forest, which comprise approximately 10,000 acres, as generally depicted on a map entitled "Boundary Peak Wilderness—Proposed", dated May, 1989, and which shall be known as the "Boundary Peak Wilderness"

(4) certain lands in the Humboldt National Forest, which comprise approximately 36,000 acres, as generally depicted on a map entitled "Currant Mountain Wilderness—Proposed", dated May, 1989, and which shall be know as the "Currant Mountain Wilderness";

(5) certain lands in the Humboldt National Forest, which comprise approximately 36,900 acres, as generally depicted on a map entitled "East Humboldts Wilderness—Proposed", dated May, 1989, and which shall be known as the "East Humboldts Wilderness";

(6) certain lands in the Humboldt National Forest, which comprise approximately 48,500 acres, as generally depicted on a map entitled "Jarbidge Wilderness Addition—Proposed", dated May, 1989, and which are incorporated in the Jarbidge Wilderness designated as wilderness by section 3(a) of the Wilderness Act (16 U.S.C. 1132(a));

(7) certain lands in the Toiyabe National Forest, which comprise approximately 28,000 acres, as generally depicted on a map entitled "Mt. Rose Wilderness—Proposed", dated May, 1989, and which shall be known as the "Mt. Rose Wilderness";

(8) certain lands in the Humboldt National Forest, which comprise approximately 27,000 acres, as generally depicted on a map entitled "Quinn Canyon Wilderness—Proposed", dated May, 1989, and which shall be known as the "Quinn Canyon Wilderness";

(9) certain lands in the Humboldt National Forest, which comprise approximately 90,000 acres, as generally depicted on a map entitled "Ruby Mountains Wilderness—Proposed", dated May, 1989, and which shall be known as the "Ruby Mountains Wilderness";

(10) certain lands in the Toiyabe National Forest, which comprise approximately 43,000 acres, as generally depicted on a map entitled "Mt. Charleston Wilderness—Proposed", dated May, 1989, and which shall be known as the "Mt. Charleston Wilderness";

(11) certain lands in the Toiyabe National Forest, which comprise approximately 98,000 acres, as generally depicted on a map entitled "Table Mountain Wilderness—Proposed", dated May, 1989, and which shall be known as the "Table Mountain Wilderness";

(12) certain lands in the Humboldt National Forest, which comprise approximately 50,000 acres, as generally depicted on a map entitled "Grant Range Wilderness—Proposed", dated May, 1989, and which shall be known as the "Grant Range Wilderness";

(13) certain lands in the Humboldt National Forest, which comprise approximately 82,000 acres, as generally depicted on a map entitled "Mt. Moriah Wilderness—Proposed", dated May, 1989, and which shall be known as the "Mt. Moriah Wilderness"; and

(14) certain lands in the Humboldt National Forest, which comprise approximately 31,000 acres, as generally depicted on a map entitled "Santa Rosa Wilderness—Proposed", dated May, 1989, and which shall be known as the "Santa Rosa Wilderness".

SEC. 3. MAPS AND DESCRIPTIONS.

As soon as practicable after enactment of this Act, the Secretary of Agriculture shall file a map and a legal description of each wilderness area designated by this Act with the Committee on Interior and Insular Affairs of the House of Representatives and with the Committee on Energy and Natural Resources of the Senate. Each such map and description shall have the same force and effect as if included in this Act, except that correction of clerical errors in each such map and description may be made by the Secretary. Each such map and description shall be on file and available for public inspection in the Office of the Chief of the Forest Service, Department of Agriculture.

SEC. 4. ADMINISTRATION OF WILDERNESS.

Subject to valid existing rights, each wilderness area designated by this Act shall be administered by the Secretary of Agricul-

ture in accordance with the provisions of the Wilderness Act governing areas designated by the Wilderness Act as wilderness, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the date of enactment of this Act.

SEC. 5. WILDERNESS REVIEW CONCERNS.

(a) FINDINGS.—The Congress finds that—

(1) the Department of Agriculture has completed the second roadless area review and evaluation program (RARE II); and

(2) the Congress has made its own review and examination of National Forest System roadless areas in the State of Nevada and of the environmental impacts associated with alternative allocations of such areas.

(b) DETERMINATION.—On the basis of such review, the Congress hereby determines and directs that—

(1) without passing on the question of the legal and factual sufficiency of the RARE II final environmental statement (dated January 1979) with respect to National Forest System lands in the State of Nevada, such statement shall not be subject to judicial review with respect to national Forest System lands in the State of Nevada;

(2) with respect to—

(A) the National Forest System lands in the State of Nevada that were reviewed by the Department of Agriculture in the second roadless area review and evaluations (RARE II); and

(B) the lands described in subsection (d),

that review and evaluation or reference shall be deemed for the purposes of the initial land management plans required for such lands by section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604) to be an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System, and the Department of Agriculture shall not be required to review the wilderness option prior to the revisions of the plans, but shall review the wilderness option when the plans are revised, which revisions will ordinarily occur on a 10-year cycle, or at least every 15 years, unless, prior to such time, the Secretary of Agriculture finds that conditions in a unit have significantly changed;

(3) areas in the State of Nevada reviewed in such final environmental statement or referenced in subsection (d) and not designated as wilderness in section 2 shall be managed for multiple use in accordance with land management plans pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604), *provided*, that such areas need not be managed for the purpose of protecting their suitability for wilderness designation prior to or during revision of the initial land management plans;

(4) in the event that revised land management plans in the State of Nevada are implemented pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604) and other applicable law, areas not recommended for wilderness designation need not be managed for the purpose of protecting their suitability for wilderness designation prior to or during revision of such plans, and areas recommended for wilderness designation shall be managed for the purposes of protecting their suitability for wilderness designation as may be required by the Forest and Rangeland Renewable Resources Planning Act of 1974 (U.S.C. 1600-1614) and other applicable law; and

(5) unless expressly authorized by Congress, the Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of National Forest System lands in the State of Nevada for the purpose of determining their suitability for inclusion in the National Wilderness Preservation System.

(c) REVISIONS.—As used in this section, and as provided in section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16U.S.C. 1604), the term "revision" shall not include an "amendment" to a plan.

(d) APPLICATION OF SECTION.—Lands identified by reference to this subsection are—

(1) National Forest System roadless lands in the State of Nevada of less than 5,000 acres; and

(2) Those National Forest System roadless areas, or portions thereof in the State of Nevada, identified in the unit plans listed below, which are not designated as wilderness in section 2:

	Unit plan
National forest:	
Humboldt	Santa Rosa.
Humboldt	Ruby Mt./E. Humboldt.
Toiyabe	Mt. Charleston.
Toiyabe	Central Nevada.

SEC. 6. GRAZING IN WILDERNESS AREAS.

(a) LIVESTOCK GRAZING.—Grazing of livestock in wilderness areas designated in section 2 that was established prior to the date of enactment of this Act shall be administered in accordance with section 4(d)(4) of the Wilderness Act (16 U.S.C. 1133(d)(4)) and section 108 of the Act entitled "An Act to designate certain National Forest System lands in the States of Colorado, South Dakota, Missouri, South Carolina, and Louisiana for inclusion in the National Wilderness Preservation System, and for other purposes (16 U.S.C. 1133 note).

(b) REVIEW.—The Secretary of Agriculture is directed to review all policies, practices, and regulations of the Department of Agriculture regarding livestock grazing in National Forest Wilderness areas in Nevada in order to insure that such policies, practices, and regulations fully conform with and implement the intent of Congress regarding grazing in such areas, as such intent is expressed in this Act.

(c) REPORTS.—Not later than 1 year after the enactment of this Act, and at least every 5 years thereafter, the Secretary of Agriculture shall submit to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report detailing the progress made by the United States Forest Service in carrying out the provisions of subsections (a) and (b).

SEC. 7. MT. ROSE SNOWMOBILE CORRIDOR EXCEPTION.

(a) EXCEPTION.—Notwithstanding any other provision of this Act or the Wilderness Act (16 U.S.C. 1131-1136), the corridor located in Mt. Rose described in subsection (b) shall be available for snowmobiles beginning January 1 of each year and ending April 30 of such year.

(b) DESCRIPTION OF CORRIDOR.—The corridor referred to in subsection (a) is described as follows:

Northeast corridor boundary line running from the common corners of sections 3, 4, 9, and 10 to a point one quarter mile east of the common corners of sections 10, 11, 14, and 15, on the boundary between sections 11 and 14. The southwest corridor boundary line running from the common corner of sections 1, 10, 11, and 15 to a point one quarter mile south of the common corners of sections 3, 4, 9, and 10 on the boundary between sections 9 and 10. The corridor is approximately one mile long and approximately one quarter mile wide.

SEC. 8. PROHIBITION OF BUFFER ZONES.

Congress does not intend that the designation of wilderness areas in the State of Nevada implies the creation of protective perimeters or buffer zones around each wilderness area. The fact that nonwilderness activities or uses can be seen or heard from within a wilderness area shall not, of itself, preclude such activities or uses up to the boundary of the wilderness area.

SEC. 9. WATER ALLOCATION AUTHORITY.

(a) FINDINGS.—The Congress finds and declares that—

(1) where it exists in wilderness, water is vital to those natural values and recreation uses that wilderness, as defined by this Act and the Wilderness Act (16 U.S.C. 1131-1136), is meant to provide for and preserve;

(2) the Federal water rights reserved by this Act shall be in addition to express or implied water rights previously reserved by the United States for other than wilderness purposes;

(3) except as provided in subsection (b)(1), this Act is not intended to define the existence or scope of any express or implied reserved water right created in or arising from other Federal legislation; and

(4) the express reservation of water for the lands designated by this Act is in lieu of the rights that would otherwise be reserved by implication when areas are included in the National Wilderness Preservation System.

(b) DETERMINATION.—(1) On the basis of such findings, the Congress determines and directs that the United States reserves a quantity of water sufficient to fulfill the purposes of the wilderness areas created by this Act.

(2) The priority date of the water rights reserved in paragraph (1) shall be the date of enactment of this Act.

(3) The Secretary shall file a claim for the quantification of the water rights reserved in paragraph (1) in an appropriate stream adjudication and shall take all steps necessary to protect such rights in such an adjudication.

SEC. 10. STATE FISH AND WILDLIFE AUTHORITY.

As provided in section 4(d)(7) of the Wilderness Act (16 U.S.C. 1133(d)(7)), nothing in this Act shall be construed as affecting the jurisdiction or responsibilities of the State of Nevada with respect to wildlife and fish in the national forests in Nevada.

SEC. 11. ALLOWANCE OF CLIMATOLOGICAL DATA COLLECTION.

Within the appropriate wilderness areas designated in section 2, the Wilderness Act (16 U.S.C. 1131-1136) shall not be construed to prevent the installation and maintenance of hydrologic, meteorologic, or climatological collection devices subject to such conditions as the Secretary of Agriculture deems desirable, where such facilities or access are essential to flood warning, flood control, and water reservoir operation purposes.

By Mr. METZENBAUM (for himself, Mr. HATCH, Mr. PELL, Mrs. KASSEBAUM, and Mr. KENNEDY):

S. 975. A bill to amend the Job Training Partnership Act to encourage a broader range of training and job placement for women, and for other purposes; to the Committee on Labor and Human Resources.

NONTRADITIONAL EMPLOYMENT FOR WOMEN ACT

● Mr. METZENBAUM. Mr. President, equal opportunity in employment is the law of the land. Yet despite the Equal Pay Act and the antidiscrimination laws enacted in the 1960's, women in this country still earn only 70 percent of what men earn. One of the reasons for this persistent wage gap is that men and women work at different jobs. Occupational segregation of the sexes is very much a reality in the American workplace.

Women are 99 percent of dental assistants, and men are 91 percent of dentists. Women are 87 percent of data entry keyers, and men are 87 percent of data processing equipment repairers. Women are 95 percent of all registered nurses, and men are 98 percent of all construction workers. And it is no secret that the occupations dominated by women pay less than the jobs typically held by men. As an example, data entry keyers earn $290 per week, but data processing equipment repairers earn $515 per week.

The reasons behind occupational segregation are varied and complex. We face cultural stereotypes about the roles of men and women, and biased attitudes about the types of work that women can perform. We also must recognize the failure of our education and training systems to overcome these stereotypes and biases. Moreover, women who do choose to pursue nontraditional employment often are the victims of sexual harrassment or more subtle forms of discrimination.

If we are to promote true equal opportunity in the workplace, we must work to break down occupational segregation. Women deserve a shot at the higher paying jobs that currently are dominated by men. We must encourage businesses to think of hiring women for traditionally male jobs. We must encourage women to go after these better paying jobs.

Accordingly, today I am introducing legislation to expand employment opportunities for women. It is a modest but important measure that will help erode the occupational segregation that pervades our work force. I am pleased to be joined in this effort by the ranking Republican on the Labor Committee, Senator HATCH, as well as Senators PELL, KASSEBAUM, and KENNEDY.

The Nontraditional Employment for Women Act—the NEW Act—amends the Job Training Partnership Act to provide women greater access to occupations traditionally held by men. In doing so, the bill will assist women across the country to acquire skills in jobs that provide good wages and benefits and long-term economic security.

There is a clear reward for women who seek employment in fields traditionally dominated by men. It is no secret that carpenters earn more than cashiers, and technicians earn more than typists. Employment in traditionally male fields can offer women greater wages, benefits, and advancement potential than traditionally female fields of work.

During the 100th Congress, I chaired a hearing of the Subcommittee on Labor to explore the employment of women in nontraditional fields. At the hearing we heard from women who had been frustrated in their efforts to become highway construction workers. We heard from one of the first female electricians in the Boston area about what it was like to be the only tradeswoman at the worksite. We heard from women who broke the welfare cycle by becoming computer technicians. These women enjoyed not only higher wages, but also an enhanced self-esteem. At the same time, they spoke of their struggles in overcoming barriers to meaningful training and successful job placement.

Despite language in the Act to the contrary, women who participate in training programs under the Job Training Partnership Act often are steered into secretarial, bookkeeping, and other traditionally female occupations. These are not jobs that lead to long-term financial independence. These are predominantly dead-end, low-wage jobs.

Changes are needed in the Job Training Partnership Act so that women are encouraged to seek training and employment in nontraditional fields of work. The NEW Act will provide for these opportunities by focusing additional attention and resouces on training and placing women in nontraditional jobs. The act accomplishes this objective in two ways.

First, the NEW Act requires service delivery areas and States to include goals in their annual job training plans for training and placing women in nontraditional employment. This requirement will focus attention early in the planning stages on how to provide for nontraditional opportunities for women. The bill also includes provisions to facilitate coordination between Job Training Partnership Act programs and activities offered through the Carl D. Perkins Vocational Education Act and other sources.

Second, the NEW Act creates a 4-year demonstration program to foster the development of programs to train women for nontraditional employment. One of the reasons given for the low number of women in traditionally male training programs is cost. Because of cultural stereotypes, educational differences, child care needs, and a variety of other reasons, it often costs more to train women for nontraditional work than for traditionally female work. This cost factor acts as a disincentive to service delivery areas that might otherwise seek to increase the number of women offered training in nontraditional fields.

Under the NEW Act, the Secretary of Labor will select up to six States per year for demonstration grants. Governors may use the funds to award grants to service providers for the purpose of training women for nontraditional employment. They also may use this money to award grants to service delivery areas that excel in training and placing women in nontraditional fields of work. Through this approach, we will facilitate the development of model programs for training women in nontraditional fields, which then can be replicated by other States and service delivery areas.

Mr. President, the NEW Act offers a simple and straightforward means to provide a wider range of employment opportunities for women who participate in programs under the Job Training Partnership Act. One of the fundamental purposes of JTPA is to increase the earning potential of participants. Women have not received their fair share of the training available for the jobs with the best earning potential. The Nontraditional Employment for Women Act will help to bring about these needed opportunities. I urge my colleagues to join Senator HATCH and me in supporting the NEW Act.

I ask unanimous consent that the text of the Nontraditional Employment for Women Act be printed in the RECORD, along with a summary of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 975

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Nontraditional Employment for Women Act".

SEC. 2. FINDINGS.

The Congress finds that—

(1) over 7,000,000 families in the United States live in poverty, and over half of those families are single parent households headed by women;

(2) women stand to improve their economic security and independence through the training and other services offered under the Job Training Partnership Act;

(3) women participating under the Job Training Partnership Act tend to be enrolled in programs for traditionally female occupations;

(4) many of the Job Training Partnership Act programs that have low female enrollment levels are in fields of work that are nontraditional for women;

(5) employment in traditionally male occupations leads to higher wages, improved job security, and better long-range opportu-

nities than employment in traditionally female-dominated fields;

(6) the long-term economic security of women is served by increasing nontraditional employment opportunities for women; and

(7) older women reentering the workforce may have special needs in obtaining training and placement in occupations providing economic security.

SEC. 3. STATEMENT OF PURPOSE.

The purposes of this Act are—

(1) to encourage efforts by the Federal, State, and local levels of government aimed at providing a wider range of opportunities for women under the Job Training Partnership Act;

(2) to provide incentives to establish programs that will train, place, and retain women in nontraditional fields; and

(3) to facilitate coordination between the Job Training Partnership Act and the Carl D. Perkins Vocational Education Act to maximize the effectiveness of resources available for training and placing women in nontraditional employment.

SEC. 4. DEFINITION.

Section 4 of the Job Training Partnership Act (hereinafter referred to as the "Act") is amended by adding at the end thereof the following new paragraph:

"(30) The term 'nontraditional employment' as applied to women refers to occupations or fields of work where women comprise less than 25 percent of the individuals employed in such occupation or field of work.".

SEC. 5. SERVICE DELIVERY AREA JOB TRAINING PLAN.

Section 104(b) of the Act is amended—

(1) by redesignating paragraphs (5), (6), (7), (8), (9), (10), and (11) as paragraphs (6), (7), (8), (9), (10), (11), and (12), respectively;

(2) by inserting after paragraph (4) the following new paragraph:

"(5) goals for—

"(A) the training of women in nontraditional employment; and

"(B) the training-related placement of women in nontraditional employment and apprenticeships;

and a description of efforts to be undertaken to accomplish such goals, including efforts to increase awareness of such training and placement opportunities;"; and

(3) in paragraph (12), as redesignated in paragraph (1) above, by—

(A) striking "and" at the end of subparagraph (B);

(B) striking the period at the end of subparagraph (C) and inserting in lieu thereof a semicolon; and

(C) adding after subparagraph (C) the following new subparagraphs:

"(D) the extent to which the service delivery area has met its goals for the training and training-related placement of women in nontraditional employment and apprenticeships; and

"(E) a statistical breakdown of women trained and placed in nontraditional occupations, including—

"(i) the type of training received, by occupation;

"(ii) whether the participant was placed in a job or apprenticeship, and, if so, the occupation and the wage at placement;

"(iii) the participant's age;

"(iv) the participant's race; and

"(v) information on retention of the participant in nontraditional employment.".

SEC. 6. GOVERNOR'S COORDINATION AND SPECIAL SERVICES PLAN.

(a) IN GENERAL.—Section 121(b) of the Act is amended by—

(1) redesignating paragraphs (3), (4), and (5) as paragraphs (4), (5), and (6), respectively; and

(2) by inserting after paragraph (2) the following new paragraph:

"(3) The plan shall include goals for—

"(A) the training of women in nontraditional employment through funds available under the Job Training Partnership Act, the Carl D. Perkins Vocational Education Act, and other sources of Federal and State support;

"(B) the training-related placement of women in nontraditional employment and apprenticeships;

"(C) a description of efforts to be undertaken to accomplish such goals, including efforts to increase awareness of such training and placement opportunities; and

"(D) a description of efforts to coordinate activities provided pursuant to the Job Training Partnership Act and the Carl D. Perkins Vocational Education Act to train and place women in nontraditional employment.".

(b) SPECIAL PROGRAMS.—Section 121(c) of the Act is amended by—

(1) redesignating paragraphs (9) and (10) as paragraphs (10) and (11), respectively; and

(2) inserting after paragraph (8) the following new paragraph:

"(9) providing programs and related services to encourage the recruitment of women for training, placement, and retention in nontraditional employment;".

SEC. 7. STATE JOB TRAINING COORDINATING COUNCIL.

Section 122(b) of the Act is amended by—

(1) redesignating paragraphs (5), (6), (7), and (8) as paragraphs (9), (10), (11), and (12), respectively; and

(2) inserting after paragraph (4) the following new paragraphs:

"(5) review the reports made pursuant to subparagraphs (D) and (E) of section 104(b)(12) and make recommendations for technical assistance and corrective action, based on the results of such reports;

"(6) prepare a summary of the reports made pursuant to subparagraphs (D) and (E) of section 104(b)(12) detailing promising service delivery approaches developed in each service delivery area for the training and placement of women in nontraditional occupations, and disseminate annually such summary to service delivery areas, service providers throughout the State, and the Secretary;

"(7) review the activities of the Governor to train, place, and retain women in nontraditional employment, including activities under section 123, prepare a summary of activities and an analysis of results, and disseminate annually such summary to service delivery areas, service providers throughout the State, and the Secretary;

"(8) consult with the sex equity coordinator established under section 111(b) of the Carl D. Perkins Vocational Education Act, obtain from the sex equity coordinator a summary of activities and an analysis of results in training women in nontraditional employment under the Carl D. Perkins Vocational Education Act, and disseminate annually such summary to service delivery areas, service providers throughout the State, and the Secretary;".

SEC. 8. STATE EDUCATION COORDINATION AND GRANTS.

(a) STATE EDUCATION COORDINATION AND GRANTS.—Section 123(a) of the Act is amended by—

(1) striking "and" at the end of paragraph (2);

(2) striking the period at the end of paragraph (3) and inserting in lieu thereof a semicolon and "and"; and

(3) inserting the following new paragraph at the end thereof:

"(4) to provide statewide coordinated approaches, including model programs, to train, place, and retain women in nontraditional employment.".

(b) USE OF FUNDS.—Section 123(c) is amended—

(1) in paragraph (2)(B) by striking "(1) and (3)" and inserting in lieu thereof "(1), (3), and (4)"; and

(2) in paragraph (3) by striking "(1) and (3)" and inserting in lieu thereof "(1), (3), and (4)".

SEC. 9. USE OF FUNDS.

Section 204 of the Act is amended by—

(1) redesignating paragraphs (27) and (28) as paragraphs (28) and (29), respectively; and

(2) inserting after paragraph (26) the following new paragraph:

"(27) outreach, to develop awareness of, and encourage participation in, education, training services, and work experience programs to assist women in obtaining nontraditional employment, and to facilitate the retention of women in nontraditional employment, including services at the site of training or employment,

SEC. 10. DEMONSTRATION PROGRAMS.

Part D of title IV of the Act is amended by adding at the end thereof the following new section:

"DEMONSTRATION PROGRAMS

"SEC. 457. (a)(1) From funds available under this part for each of the fiscal years 1990, 1991, 1992, and 1993, the Secretary shall use $1,500,000 in each such fiscal year to make grants to States to develop demonstration and exemplary programs to train and place women in nontraditional employment.

"(2) The Secretary may award no more than 6 grants in each fiscal year.

"(b) In awarding grants pursuant to subsection (a), the Secretary shall consider—

"(1) the level of coordination between the Job Training Partnership Act and other resources available for training women in nontraditional employment;

"(2) the extent of private sector involvement in the development and implementation of training programs under the Job Training Partnership Act;

"(3) the extent to which the initiatives proposed by a State supplement or build upon existing efforts in a State to train and place women in nontraditional employment;

"(4) whether the proposed grant amount is sufficient to accomplish measurable goals;

"(5) the extent to which a State is prepared to disseminate information on its demonstration training programs; and

"(6) the extent to which a State is prepared to produce materials that allow for replication of such State's demonstration training programs.

"(c)(1) Each State receiving financial assistance pursuant to this section may use such funds to—

"(A) award grants to service providers in the State to train and otherwise prepare women for nontraditional employment; and

"(B) award grants to service delivery areas on the basis of exceptional performance in training, placing, and retaining women in nontraditional employment.

"(2) Each State receiving financial assistance pursuant to subsection (c)(1)(A) may only award grants to—

"(A) community based organizations,

"(B) educational institutions, or

"(C) other service providers that have demonstrated success in occupational skills training.

"(3) Each State receiving financial assistance pursuant to subsection (c)(1)(B) may only award grants to service delivery areas that have demonstrated exceptional performance in training, placing, and retaining women in nontraditional employment that is not attributable or related to the activities of any service provider awarded funds under subsection (c)(1)(A).

"(d) In any fiscal year in which a State receives a grant pursuant to this section such State may retain an amount not to exceed 10 percent of such grant to—

"(1) pay administrative costs,

"(2) facilitate the coordination of statewide approaches to training and placing women in nontraditional employment, or

"(3) provide technical assistance to service providers.".

SEC. 11. REPORT AND RECOMMENDATIONS.

(a) REPORT.—The Secretary of Labor shall report to the Congress within 5 years of the date of enactment of this Act on—

(1) the extent to which States and service delivery areas have succeeded in training, placing, and retaining women in nontraditional employment, together with a description of the efforts made and the results of such efforts; and

(2) the effectiveness of the demonstration programs established by section 457 of the Job Training Partnership Act in developing approaches to train and place women in nontraditional employment, including a summary of activities performed by grant recipients under the demonstration program authorized by section 457 of the Job Training Partnership Act.

(b) RECOMMENDATIONS.—The report described in subsection (a) shall include recommendations on the need to continue, expand, or modify the demonstration programs established by section 457 of the Job Training Partnership Act, as well as recommendations for legislative and administrative changes necessary to increase nontraditional employment opportunities for women under the Job Training Partnership Act.

SEC. 12. EFFECTIVE DATE.

This Act and the amendments made by this Act shall take effect upon the date of enactment of this Act, except that the requirements imposed by sections 5, 6, and 7 of this Act shall apply to the plan or report filed or reviewed for program years beginning on or after July 1, 1990.

SUMMARY OF THE NONTRADITIONAL EMPLOYMENT FOR WOMEN ACT

Purpose: To encourage greater efforts to train and place women in nontraditional employment through the Job Training Partnership Act.

Planning and Reporting Requirements: The NEW Act requires states and service delivery areas to set goals for training and placing women in fields traditionally dominated by men, and to report on results.

Review: The State Job Training Coordinating Council is directed to review the planning and reporting activities of the Governor and the service delivery area, to make recommendations for future activities, and to disseminate information on successful approaches to training and placing women in nontraditional fields of employment.

Coordination: Governors and State Job Training Coordinating Councils are directed to coordinate between the Job Training Partnership Act and the Carl D. Perkins Vocational Education Act with respect to efforts to train and place women in nontraditional employment.

Demonstration Programs: A four-year demonstration program is established to aid in developing programs to train and place women in nontraditional employment. The Secretary of Labor is directed to make grants totaling $1.5 million annually out of existing funds, with funds going to not more than six states per year. Governors may then use the funds to (1) award grants to service providers to train women for nontraditional employment, and/or (2) award grants to service delivery areas on the basis of exceptional performance in training, placing, and retaining women in nontraditional employment.

Evaluation: The Secretary of Labor is directed to report to Congress on the efforts made at the federal, State, and local levels to train, place, and retain women in nontraditional fields of employment, together with recommendations for legislative and administrative changes necessary to increase nontraditional training opportunities for women under JTPA.●

By Mr. WARNER:

S. 976. A bill to postpone the effective date of section 511(e)(3)(B) of the Controlled Substances Act, relating to the disposition of forfeited property and State law; to the Committee on the Judiciary.

DISPOSITION OF FORFEITED PROPERTY

Mr. WARNER. Mr. President, I rise today to introduce legislation dealing with a provision in the Anti-Drug Abuse Act of 1988—Public Law 100-690—that is of great concern to the Commonwealth of Virginia.

Section 6077 of the Anti-Drug Abuse Act of 1988 amended section 511(e) of the Controlled Substances Act (21 U.S.C. 881(e)) to restore equitable sharing principles to the transfer of forfeited assets from Federal to State and local agencies under the Controlled Substances Act. This provision restored language that was inadvertently deleted by the Anti-Drug Abuse Act of 1986.

I am concerned, however, with (a)(3)(B) which added new language to prohibit any transfer "to circumvent any requirement of State law that prohibits forfeiture or limits use or disposition of property forfeited to State or local agencies." This language was not in the Senate version of the legislation, but was added in conference.

In the past, asset sharing from Federal law prosecutions directly benefited the Virginia local and State law enforcement agencies participating in the seizure. Article VII, section 8 of the Constitution of Virginia, however, requires all fines and forfeitures to go to the State literary fund. Therefore, subsection (a)(3)(B) forecloses Federal sharing of forfeited assets with Virginia local law enforcement agencies.

I am in no way advocating that Virginia's or any other State's laws be circumvented by the forefeited asset sharing provisions of Federal law. I am concerned, however, that (a)(3)(B) will prevent local and State law enforcement agencies from sharing in forfeiture assets during the time necessary to amend Virginia's Constitution.

I have been advised that the last session of the Virginia General Assembly passed legislation to amend the constitution to allow State and local law enforcement officials to share in forfeited assets. However, to amend the constitution in Virginia, a proposed amendment must be passed twice by the general assembly with an intervening election and the amendment must then be ratified by the voters. Therefore, the Virginia Constitutional amendment process allows ratification of this recently passed measure in November 1990 at the very earliest.

Subsection (c) of section 6077 was intended to provide some relief for this problem by postponing the effective date of this provision until September 30, 1989. Unfortunately, a typographical error in the legislation applies the postponed effective date to section 551(e)(3)(a) rather than section 511(e)(3)(B).

Virginia stands ready with trained and experienced law enforcement officials and institutions to help in the war against drugs. But these agencies need additional funds to obtain necessary information about the drug world. Sharing of forfeited assets provides local and State law enforcement officials with these additional resources and encourages cooperation in Federal and State law enforcement efforts.

While the process is already underway, Virginia needs additional time to amend its constitution to comply with the change in the law made last Congress. This legislation addresses this problem. I wish to work with my colleagues here and in the House to craft a solution which addresses the purpose of language in the Anti-Drug Abuse Act of 1988 while allowing States like Virginia adequate time to address the change in the law.

I urge my colleagues to join me in providing an extension of the effective date of section 511(e)(3)(B) for a period of time sufficient for Virginia to amend its constitution and any other States in a similar situation to revise their laws.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 976

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6077(c) of the Anti-Drug Abuse Act of 1988 is amended by striking "September 30, 1989" and inserting "September 30, 1991".

By Mr. DOMENICI (for himself, Mr. BOSCHWITZ, Mr. LEVIN, and Mr. DIXON):

S. 977. A bill entitled the "White House Conference on Small Business Authorization Act"; to the Committee on Small Business.

WHITE HOUSE CONFERENCE ON SMALL BUSINESS AUTHORIZATION ACT

● Mr. DOMENICI. Mr. President, I am proud to introduce legislation today to make permanent an authorization for a White House Conference on Small Business.

I am pleased that Senators BOSCHWITZ, LEVIN, and DIXON have joined me as original cosponsors.

This is most appropriate since President Bush has proclaimed this week as Small Business Week, with the theme "Small Business Is America's Future."

I introduced legislation quite similar to this bill during the 100th Congress. That bill was S. 818. I also introduced the bill in the preceding Congress as S. 2588.

My bill passed the Senate last year as an amendment to S. 2619, the SBA reauthorization bill. Unfortunately, it was not accepted by the House conferees.

But I remain absolutely convinced of the need for this legislation.

And I believe that is the strong sentiment of many of my colleagues in the Senate. S. 818 last year was cosponsored by 45 Members of the Senate.

The bill I am offering today would authorize a White House Conference on Small Business not later than 1991, and require that future conferences be held every 4 to 6 years thereafter.

Too often, we think of business only in terms of large corporations. In reality, men and women in most communities are employed by someone other than a large corporation. Very frequently the employer is a small business owner.

No two small businesses, of course, are alike. Different small businessowners have different problems. A White House Conference on Small Business provides a way for these different problems and concerns to be evaluated, setting priorities to assist the Congress and the President.

The first national small business conference was held in 1980. It was a great success.

In 1986, more than 1,800 small businessowners came to our Nation's Capital as delegates to the 1986 White House Conference on Small Business, following conferences in each State, as well as a series of regional conferences.

Those 1,800 men and women came here on their own time and at their own expense. They came to discuss mutual concerns in operating a small business, and to offer solutions to these problems.

That 1986 conference, including the State and regional conferences, cost about $15 million. The Federal Government provided $4.6 million toward this cost. The remainder was contributed by the private sector.

And the delegates paid their own expenses to Washington.

In a set of 60 final recommendations, these delegates included one drafted by the New Mexico Conference delegates, a proposal to provide permanent authorization for a White House Conference on Small Business. I commend New Mexico's chairman, Bill Trembly, for his efforts to have this included among the final recommendations.

The Senate Small Business Committee held a hearing on S. 818 in 1987. Several witnesses expressed concern over what they considered to be shortcomings of previous conferences, and they suggested ways to improve future conferences.

I was pleased to listen to their suggestions. Before offering my amendment last year, I worked with the distinguished chairman of the Senate Small Business Committee, Mr. BUMPERS, to develop the best legislation possible.

The bill I send to the desk today is identical to the amendment I offered to last year's SBA reauthorization bill. This legislation would provide for conferences very similar to the previous two, with the national conference proceeded by conferences at the State and regional level.

However, at the suggestion of Chairman BUMPERS, my bill now seeks to expand the role to be carried out by the Government's experts in this area, the Small Business Administration. The President will continue to appoint a White House Conference staff, but the conference staff will be encouraged to utilize the resources of the SBA to a greater extent.

When I introduced my bill, I noted the very real concern over the ability of American business to compete in the world market. Since last year, our position has grown far stronger.

Nevertheless, we can improve upon by exploring ways that smaller businesses can grow stronger, addressing their needs and concerns to enable them to be more effective competitors in the world market.

Small business is indeed America's future. America's 15 million small businesses provide jobs for nearly one-half of our Nation's private-sector work force. They provide on-the-job training for our youth and account for about 40 percent of our gross national product.

This bill would assure America's small businessowners that their Government will listen to their needs and concerns. Support for my bill would prove to the "little guy" that his elected officials are concerned about his livelihood.

I urge my colleagues to support this legislation, and I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 977

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This title may be cited as the "White House Conference on Small Business Authorization Act".

SEC. 2. AUTHORIZATION OF CONFERENCE.

(a) IN GENERAL.—The President shall call and conduct a National White House Conference on Small Business (hereinafter referred to as the "Conference") to carry out the purposes described in section 3. Each National Conference shall be preceded by State and regional conferences as determined by the executive director.

(b) STATE AND REGIONAL CONFERENCES.—Participants in the Conference and other interested individuals and organizations are authorized to conduct conferences and other activities at the State and regional levels prior to the date of the Conference, subject to the approval of the Administrator of the Small Business Administration, and shall direct such conferences and activities toward the consideration of the purposes of the Conference described in section 3 in order to prepare for the National Conference.

(c) SCHEDULE OF CONFERENCES.—National Conferences under this title shall be held at least once during each 6-year period, but not more often than once in each 4-year period. No conference shall be held during a presidential election year. The first National Conference under this title shall be concluded not later than July 1, 1991, and each subsequent National Conference shall be concluded by July 1 of the year in which it is called.

SEC. 3. PURPOSE OF CONFERENCE.

The purpose of the Conference shall be—

(1) to increase public awareness of the essential contribution of small business;

(2) to identify the problems of small business;

(3) to examine the status of minorities and women as small business owners;

(4) to assist small business in carrying out its role as the nation's job creator;

(5) to assemble small businesses to develop such specific and comprehensive recommendations for executive and legislative action as may be appropriate for maintaining and encouraging the economic viability of small business and, thereby, the Nation; and

(6) to review the status of recommendations adopted at the preceding White House Conference on Small Business.

SEC. 4. CONFERENCE PARTICIPANTS.

(a) SMALL BUSINESS PARTICIPANTS.—In order to carry out the purposes specified in section 3, the Conference shall bring together individuals concerned with issues relating to small business. No small business concern

representative may be denied admission to any State or regional conference, nor may any fee or charge be imposed on any small business concern representative except an amount to cover the cost of any meal provided to such representative plus a registration fee of not to exceed $10.

(b) SELECTION OF DELEGATES.—Delegates, including alternates, to the National Conference shall be elected by participants at the State conferences. In addition—

(1) each Governor and each chief executive official of the political subdivisions enumerated in section 4(a) of the Small Business Act may appoint one delegate and one alternate;

(2) each Member of the United States House of Representatives, including each Delegate, and each Member of the United States Senate may appoint one delegate and one alternate; and

(3) the President may appoint 50 delegates and alternates.

Only individuals from small businesses shall be eligible for appointment pursuant to this subsection.

SEC. 5. PLANNING AND ADMINISTRATION OF CONFERENCE.

(a) FEDERAL AGENCY SUPPORT.—All Federal departments, agencies, and instrumentalities are authorized and directed to provide such support and assistance as may be necessary to facilitate the planning and administration of the Conference.

(b) SMALL BUSINESS SUPPORT.—In carrying out the provisions of this title, the Administrator of the Small Business Administration through the Administration's district and regional offices—

(1) shall provide such assistance as may be necessary for the organization and conduct of conferences at the State and regional levels as authorized under section 2(b); and

(2) is authorized to enter into contracts or agreements with public agencies, private organizations, and academic institutions to carry out the provisions of this title, except that the Administration shall take such actions as it deems appropriate—

(A) to ensure that activities under any such contract or agreement do not constitute or imply an endorsement by the Administration of the products or services of the agency, organization, or institution involved,

(B) to avoid unnecessary promotion of the products or services of the agency, organization, or institution involved, and

(C) to minimize utilization of any one agency, organization, or institution in any area.

(c) CHIEF COUNSEL FOR ADVOCACY SUPPORT.—The Chief Counsel for Advocacy shall assist in carrying out the provisions of this title by preparing and providing background materials for use by participants in the Conference, as well as by participants in State and regional conferences.

(d) PARTICIPANT EXPENSES.—Each participant in the Conference shall be responsible for his or her expenses related to attending the Conference and shall not be reimbursed either from funds appropriated pursuant to this title or the Small Business Act.

(e) STAFF.—(1) The President is authorized to appoint and compensate an executive director and such other directors and personnel for the Conference as he may deem advisable, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates. Not to exceed 30 personnel may be employed under this paragraph.

(2) Upon request by the executive director, the heads of the executive and military departments are authorized to detail employees to work with the executive director in planning and administering the Conference without regard to the provisions of section 3341 of title 5, United States Code.

SEC. 6. REPORTS REQUIRED.

Not more than 6 months after the date on which a National Conference is convened, a final report of the Conference shall be submitted to the President and the Congress. The report shall include the findings and recommendations of the Conference as well as proposals for any legislative action necessary to implement the recommendations of the Conference. The final report of the Conference shall be available to the public.

SEC. 7. FOLLOWUP ACTIONS.

The Small Business Administration shall report to the Congress annually during the 3-year period following the submission of the final report of a National Conference on the status and implementation of the findings and recommendations of the Conference.

SEC. 8. AVAILABILITY OF FUNDS.

(a) IN GENERAL.—There are hereby authorized to be appropriated not to exceed $4,000,000 for each National Conference and associated State and regional conferences under this title. Such sums shall remain available until expended. New spending authority or authority to enter contracts as provided in this title shall be effective only to such extent and in such amounts as are provided in advance in appropriation Acts.

(b) USE OF OTHER FUNDS PROHIBITED.—No funds appropriated to the Small Business Administration shall be made available to carry out the provisions of this title other than funds appropriated specifically for the purpose of conducting the Conference. Any funds remaining unexpended at the termination of the Conference, including submission of the report pursuant to section 6, shall be returned to the Treasury of the United States and credited as miscellaneous receipts.●

● Mr. DIXON. Mr. President, I rise today in support of the bill introduced by Senator Domenici which provides permanent authorization for a White House Conference on Small Business.

Small business is the primary employment generator for the economy of the United States. Between 1980 and 1986, small businesses created 63.5 percent of all new jobs. Small businesses also provide on-the-job training for our youth. Small businesses continue to be a strong contributor to our economic growth.

The need for a forum in which the issues crucial to the viability of this economic sector can be reviewed is obvious. The White House Conference on Small Business serves as a platform to assist small business in developing an agenda for action, to enlighten the public and Government agencies as to the contributions and needs of small business, and to bring representatives of this sector together to formulate recommendations for the executive and legislative branches of Government to assure the continuance of their economic growth.

Our Nation was founded by small businesses. They gave birth to our economy. Today's entrepreneur seeks to maintain this true economic independence. Free enterprise is more than an economic theory for them; it is a practical necessity. This is a segment of our economy that must be acknowledged for its contributions to this Nation, as well as for its maintenance of our image as the land of opportunity.

The range of issues affecting small business is broad. The goals of small businesses are sometimes at odds with those of bigger businesses. Small business needs our attention and support. Permanent authorization of the White House Conference on Small Business would demonstrate our commitment to insure a healthy, competitive small business environment, and provide a forum for identification and understanding of actions necessary to continue the development and growth of our workforce and economy.●

By Mr. INOUYE (for himself, Mr. FORD, Mrs. KASSEBAUM, Mr. DOMENICI, Mr. PACKWOOD, Mr. BAUCUS, Mr. BURDICK, Mr. DASCHLE, Mr. COCHRAN, Mr. MCCAIN, Mr. GORTON, Mr. RUDMAN, Mr. KENNEDY, Mr. ADAMS, Mr. CONRAD, Mr. D'AMATO, Mr. HATFIELD, Mr. BURNS, Mr. BRADLEY, Mr. RIEGLE, Mr. SIMON, Mr. PRESSLER, Mr. DECONCINI, Mr. MURKOWSKI, Mr. SANFORD, Mr. DODD, Mr. WIRTH, Mr. MATSUNAGA, Mr. REID, Mr. BINGAMAN, Mr. KERREY, Mr. STEVENS, Mr. KOHL, Mr. METZENBAUM, and Mr. MOYNIHAN):

S. 978. A bill to authorize the establishment within the Smithsonian Institution of the National Museum of the American Indian, to establish a memorial to the American Indian, and for other purposes; to the Committee on Rules and Administration.

NATIONAL AMERICAN INDIAN MUSEUM ACT

● Mr. INOUYE. Mr. President, it is with great pleasure that I rise today to introduce a bill to establish the National Museum of the American Indian within the Smithsonian Institution and to authorize the transfer of the collection of the Museum of the American Indian, Heye Foundation to the Smithsonian Institution.

Mr. President, earlier this week, the Board of the Regents of the Smithsonian Institution announced their approval of an agreement between the Museum of the American Indian, Heye Foundation and the Smithsonian Institution which will bring the priceless Heye collection of over 1,000,000 objects and artifacts representing the art and culture of the indigenous people

of North, Central and South America to our Nation's Capital, and specifically to the Smithsonian Institution. This agreement enjoys the support of the elected representatives of New York, including the attorney general of the State of New York and the mayor of the city of New York. The legislation which I rise to introduce today will implement that agreement.

Mr. President, in the 27 months of my tenure as chairman of the Select Committee on Indian Affairs, I have traveled to many parts of Indian country, including the Pacific Northwest and Alaska, and I have visited reservations and met with tribal leaders in New Mexico, Arizona, California, Montana, South Dakota, North Dakota, Florida, Oklahoma, Minnesota and Washington State. I have had the opportunity to witness first hand the conditions that American Indians must face in their everyday lives—poverty and unemployment that is as high as 95 percent on some reservations, mortality rates from alcoholism, diabetes, hypertension, and cancer that far exceed the national average, and in Alaska, a suicide rate among Native males aged 20 to 24 that is 20 times the national average. I have come to learn of life in a Navajo hogan, or in Indian housing in other parts of the country where there is no electricity or running water, and no sanitation facilities. I have spoken with tribal youth who are desperately seeking solutions to an epidemic of teenage suicide on the reservations, and I have seen the hope in their eyes that the future may hold something better for them than it has for their parents and grandparents.

Many of us know very little about Indian people and life in Indian country, and sadly, few people know that before there were such miserable statistics describing Indian life, there were hundreds of years of great achievements in the history of Indian people—a reverence for the Earth and nature that brought all of the natural resources to us intact and undepleted, arts and cultures and traditions, languages and dance that are unequalled in their creativity and beauty. The Indians had a great civilization before the advent of the white man, with sophisticated governments upon which our own system of government was modeled. The Indian people exercised dominion over 500 million acres of land at one time in this Nation's history—and they cared for that land and nurtured the fish and wildlife that they found there, so that today we still have wilderness that retains the pristine condition in which the Indians delivered it to the settlers. At one time, it is estimated that there were over 50 million Indians in the United States.

Today, there are fewer than 2 million Indian people, residing on the 50 million acres of land that are still in tribal ownership. These are people who survived a decimation of their population during the Indian wars, and who have survived countless trails of tears that were designed to remove them from their ancestral land so that those lands could be settled by non-Indians. They have survived subjugation and slavery by Spanish conquerers, and fluctuations in Federal policy that sought to acheive the assimilation of their culture and traditions, and which resulted in the punishment of Indian children when they sought to speak in their native tongue or dance in their traditional ways. These people, this Nation's very first citizens, are a testament to the perserverance and tenacity of Indian nations, Indian religions, and Indian cultures. They have survived not because we helped them to survive, but almost in spite of us.

And so I believe that it is particularly fitting and appropriate that today we can do a very small thing in commemorating the historic grandeur of Indian people and the rich cultural legacy that they have placed before American society, by establishing what I hope will be a great museum in their honor, and in the honor of their magnificent ancestors. This museum will be a living memorial to the American Indian people—and it will provide an opportunity for all Americans, Indian and non-Indian, to learn that this culture is something more than an account in history books—that it is a living and thriving culture that represents the fastest growing population in the United States today.

This Nation's first Americans have much to teach us, and there is no doubt that we have much to learn. Indian children should be able to grow up with the feeling of pride in themselves and in the contributions that their ancestors have made to our society. Non-Indian children should be able to learn about native people from a positive perspective, rather than the anachronistic manner in which they are treated in history textbooks. I believe that this museum will enable all young people to have access to information and ideas, works of art and precious artifacts, outstanding crafts and creative innnovations, belief systems and values that the Indian people of this Nation hold and practice in their daily lives.

I believe that Indian people have survived the centuries to teach us much that we need to learn, and it is my hope that the National Museum of the American Indian will provide a place where we may all learn to honor the native peoples of this country.●

By Mr. DASCHLE (for himself and Mr. CONRAD):

S. 979. A bill to provide grants for designating rural hospitals as medical assistance facilities; to the Committee on Finance.

RURAL MEDICAL ASSISTANCE FACILITIES ACT OF 1989

● Mr. DASCHLE. Mr. President, I rise today to introduce the Rural Medical Assistance Facilities Act, a bill that will evaluate the long-term feasibility of medical assistance facilities as an innovative alternative to our traditional rural health care delivery system. The ultimate goal of this measure is to ensure that rural citizens everywhere have access to the quality health services they deserve.

There are several steps we need to take to alleviate the health care crisis in rural America. I view this bill as one step toward addressing the multitude of rural health care problems. Yesterday, I introduced legislation that addresses the severe physician shortage facing many of our rural communities across the country. In addition, I have also introduced a bill that helps sole community hospitals deal with their immediate financial risks.

Across the country, our small rural hospitals are struggling to survive in the face of a rapidly changing rural health care environment. This bill attempts to help these hospitals adapt and adjust to these changes. Our investment in health care research demonstrations will not only assist our rural communities but will also enhance the quality of rural health care policy for the 1990's. Where we invest our health care dollars today, will largely determine the future shape of our health care system.

Our rural health care system is in serious trouble. Inequitable Medicare payments, declining inpatient capacity, and cost-containment pressures threaten the financial viability of our already troubled rural hospitals—the mainstay of the existing rural health care system. The statistics are sobering: since 1980, 163 rural community hospitals across the country have been forced to close their doors, and many more than that—an estimated 600—currently are on the brink of closure.

In my home State of South Dakota, 54 of our hospitals are rural, and most of them lost money on Medicare in 1988, with average profit margins for small rural hospitals of minus 5 percent. With 16 counties in my State already without a hospital, South Dakota, as well as many other rural States, can ill afford to lose more providers.

Unfortunately, those rural hospitals on the brink of closure are most likely to be the ones that serve the most vulnerable populations, such as the poor and the elderly living in rural areas. While the elderly comprise 12 percent of the total population in the United States, they account for over 20 percent of the population in South Dakota. When the local rural hospital

closes, these elderly are often left without access to any inpatient health services. I believe it is essential to preserve access to quality health care for these rural elderly.

The elderly, in South Dakota as in all rural areas, pay the same Medicare premium as their urban counterparts. It is only fair and equitable that they be given the same access to health care. Why should people be discriminated against through their health care system simply because of where they choose to live?

During my frequent visits to the State, I have witnessed the severe health care crisis in many of our rural communities. I am convinced that our rural hospitals cannot survive if they continue to receive Medicare payments that are 12 to 40 percent less than urban hospitals receive for performing the same medical procedure. I, along with 36 of my colleagues have cosponsored Senator BENTSEN's and Senator DOLE's Equity for Rural Hospitals Act, which would eliminate this payment differential. While this bill will give our rural hospitals long-overdue equity in their Medicare payments, we need to be looking ahead to what we can do to help rural hospitals respond to their changing rural health care environment.

Across the country, rural areas struggle with the challenges of delivering quality health care. Hospital administrators tell me they are forced to choose between either shutting down their half-full hospitals, which would jeopardize access to health care, or struggling to keep their doors open, in spite of significant financial losses. The hospital administrators in my State should not have to face such a dilemma. South Dakota's rural communities, like other rural communities across the country, will be faced with many difficult questions concerning the most appropriate and affordable health care delivery system to best meet their needs. Clearly, the Federal Government has a role in disseminating information on the different approaches to health care delivery in rural areas. Rural communities need to know what does and what doesn't work before they commit their valuable time and resources to implementing alternative health care delivery models.

The legislation I am introducing today addresses our obligation to help the citizens in our rural communities adjust to their changing health care environment. My bill calls for a 4-year Health Care Financing Administration demonstration, using 10 to 15 sites across the country, for the purpose of evaluating the long-term feasibility of Medical Assistance Facilities (MAF's) as an alternative health care delivery system in rural areas. MAF's provide an attractive alternative because they allow hospitals the opportunity to "down-size" their operations.

Unlike other hospitals, MAF's provide only limited inpatient care by virtue of their 4-day inpatient limitation. In addition, MAF's are staffed primarily by physician assistants and nurse practitioners, responding to the physician availability problem in rural areas.

Currently, Montana is the only State for which HCFA is granting a waiver to experiment with MAF's. During a recent Senate Finance Committee hearing on rural hospitals, witnesses testified to the need to develop alternative approaches to our traditional rural health care delivery system. Many of the witnesses urged Congress to allow for greater experimentation with the MAF concept by allowing a number of States to participate in a national demonstration.

In order to make sound policy decisions concerning the future of health care in rural America, it is critical that we invest in national health care delivery demonstrations. While I commend HCFA's involvement in the Montana demonstration, we still need to determine the long-term feasibility of MAF's in different, more traditional rural areas. Now is the time for the Health Care Financing Administration to examine alternative health care delivery models. Our rural citizens cannot afford to have such critical research put on hold. The health care of my fellow South Dakotans who live in rural communities will benefit from this research initiative.

I ask unanimous consent that the text of the bill as well as a summary appear following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 979

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION. 1. SHORT TITLE.

This Act may be cited as the "Rural Medical Assistance Facilities Act of 1989".

SEC. 2. ESTABLISHMENT OF DEMONSTRATION PROGRAM FOR DEVELOPMENT OF MEDICAL ASSISTANCE FACILITIES.

(a) IN GENERAL; LIMITATIONS.—(1) Not later than 6 months after the date of the enactment of this Act, the Secretary of Health and Human Services, acting through the Administrator of the Health Care Financing Administration (hereafter in this section referred to as the "Administrator") shall make 4-year grants to not more than 6 eligible States for providing 90 percent of the costs of transforming a rural hospital into a medical assistance facility (as defined in section 1861mm(2) of the Social Security Act) (as added by section 3(b) of this Act).

(2) The amount of funds provided in a single year under each grant awarded under paragraph (1) may not exceed $100,000.

(3) The Administrator may not award fewer than 10 or more than 15 grants under paragraph (1).

(b) ELIGIBILITY; ADMINISTRATION.—(1) The Administrator shall provide technical assistance to States receiving grants under subsection (a) during the course of the grant program.

(2) A State is eligible to receive a grant under subsection (a) if it submits to the Administrator, at such time and in such form as the Administrator may prescribe by rule, an application containing such information as the Administrator may require.

(3) No funds may be provided through grants under subsection (a) after January 1, 1995.

(4) The chief public health officer of each State, in consultation with the State Office of Rural Health (where appropriate), shall be responsible for submitting applications for grants under paragraph (2) and for administering the grant program in the State.

(c) AUTHORIZATION OF FUNDS FOR GRANT PROGRAM.—There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.

SEC. 3. MEDICARE COVERAGE OF SERVICES OF A MEDICAL CARE ASSISTANCE FACILITY.

(a) COVERAGE.—

(1) PART A.—Section 1812(a)(1) of the Social Security Act (42 U.S.C. 1395d(a)) is amended by inserting "and inpatient care in a medical assistance facility".

(2) PART B.—Section 1832(a)(2) of such Act (42 U.S.C. 1395k(a)(2)) is amended—

(A) by striking "and" at the end of subparagraph (F);

(B) by striking the period at the end of subparagraph (G) and inserting "; and"; and

(C) by inserting after subparagraph (G) the following new subparagraph:

"(H) health care services (other than inpatient care) of a medical assistance facility.".

(b) DESCRIPTION OF MEDICAL ASSISTANCE FACILITY AND RELATED DEFINITIONS.—Section 1861 of such Act (42 U.S.C. 1395x) is amended by adding at the end the following new subsection:

"Medical Assistance Facility and Related Definitions

"(mm)(1) The term 'medical services of a medical assistance facility' means the following services provided by or under arrangements with a medical assistance facility—

"(A) inpatient care, except that obstetric services shall not be considered inpatient care under this subparagraph unless such services are performed in accordance with protocols developed by the Secretary;

"(B) emergency visits;

"(C) ambulatory care provided in accordance with standards to be established by the Secretary, in consultation with appropriate provider and consumer organizations and State public health officers;

"(D) outpatient surgical care provided in accordance with protocols to be established by the Secretary;

"(E) stabilization care for transfer to another facility; and

"(F) such services and supplies furnished as an incident to services provided by a medical assistance facility which the facility is legally authorized to provide and which would otherwise be covered if furnished by a physician or as an incident to physicians' services.

"(2) The term 'medical assistance facility' means a facility which—

"(A)(i) is located in a rural area (as defined in section 1886(d)(2)(D)),

"(ii) is located not less than 30 miles from a hospital, and

"(iii) has less than 50 beds;

"(B) provides emergency care, stabilization care, and basic inpatient care for stays not exceeding 96 hours (unless otherwise approved by a peer review organization);

"(C) if it provides obstetric services, provides such services in accordance with the protocols described in paragraph (1)(A);

"(D) provides ambulatory care in accordance with the standards described in paragraph (1)(C);

"(E) if it provides outpatient surgical care, provides such services in accordance with the protocols described in paragraph (1)(D);

"(F)(i) has a written quality assurance plan approved by the Secretary under which the Secretary shall conduct regular evaluations of the facility in accordance with a quality assurance protocol to be developed by the Secretary, and (ii) has entered into a contract with a hospital or with a utilization and quality control peer review organization with a contract in effect under part B of title XI for the performance of utilization review with respect to services provided by the facility;

"(G) has entered into an agreement to participate under the State program approved under title XIX in the State in which the facility is located;

"(H) has a board of directors and a medical director (who shall be a doctor of medicine or osteopathy) responsible for its operation, the members of which shall include representatives of physicians, nurses, and other health care providers;

"(I) has in effect a transfer agreement (meeting such terms as the Secretary may specify) and an agreement regarding discharge planning between the facility and appropriate referral hospital or hospitals;

"(J) has in effect an affiliation agreement with a hospital or teaching hospital for providing continuing education services to the facility's physicians, nurse practitioners, and physician assistants; and

"(K) meets the additional requirements specified in paragraph (3) (relating to inpatient care).

A medical facility may meet the requirements of this paragraph with respect to provision of medical care (including pharmacy services) through a contract that assures, in a manner satisfactory to the Secretary, the availability of such care.

"(3) The additional requirements of this paragraph (relating to inpatient care) are as follows:

"(A) To the extent inpatient services are actually being provided, the facility must meet such staffing requirements as would apply under subsection (e) to a hospital located in a rural area, except that care may be provided by nurse practitioners and physician assistants in accordance with protocols developed by the Secretary for the purpose of providing flexibility for such facilities in meeting physician 'on-call' requirements.

"(B) The facility must have an on-site director (who may be a nurse practitioner) present at all times during which the facility is open.

"(C)(i) Except as provided in this subparagraph, the facility must meet the same standards as apply with respect to the provision of inpatient hospital services under this title with respect to a hospital located in a rural area.

"(ii) The facility need not meet hospital standards relating to the number of hours during a day, or days during a week, in which the facility must be open.

"(iii) The facility, instead of having a full-time, on-site dietician, pharmacist, laboratory technician, medical technologist, and radiological technologist, may provide for quality control of services provided by such individuals through such individuals on a part-time, off-site basis.".

(c) PAYMENT.—

(1) INPATIENT SERVICES.—Section 1814 of such Act (42 U.S.C. 1395f) is amended—

(A) in subsection (b) in the matter preceding paragraph (1), by inserting "subsection (l) and" after "subject to the provisions of"; and

(B) by adding at the end the following new subsection:

"Payments for Inpatient Care of Medical Assistance Facilities

"(l)(1)(i) Except as provided in clauses (ii) and (iii), the amount paid to a medical assistance facility with respect to inpatient care for which payment may be made under this part shall be an amount equal to the payment amount that would be established under section 1886(d) if such care were deemed to be inpatient hospital services provided by a subsection (d) hospital.

"(ii) The amount paid to a medical assistance facility with respect to inpatient care for which payment may be made under this part may, in the case of discharges occurring on or after the expiration of the 540-day period that begins on the date of the enactment of this subsection, be determined under any new methodology which the Secretary, in consultation with the Office of Rural Health Policy, may develop for determining the amount of such payments.

"(iii) The provisions of section 1886(g)(1) shall not apply to payments with respect to the capital-related costs of inpatient hospital services of a medical assistance facility.

"(2) In the case of an individual who receives inpatient hospital services after receiving inpatient care in a medical assistance facility, the payment otherwise provided under section 1886 shall be reduced by such amount as is necessary to reflect the payments made for the inpatient care under this subsection. The Secretary shall periodically review the allocation of payments for inpatient services between medical assistance facilities and hospitals under this paragraph.".

(2) OUTPATIENT SERVICES.—

(A) Section 1833(a) of such Act (42 U.S.C. 1395l(a)) is amended—

(i) in paragraph (2), in the matter before subparagraph (A), by striking "and (G)" and inserting "(G), and (H)";

(ii) in paragraph (4), by striking "and" at the end;

(iii) in paragraph (5), by striking the period at the end and inserting "; and"; and

(iv) by inserting immediately after paragraph (5) the following new paragraph:

"(6) in the case of services described in section 1832(a)(2)(H), the amounts described in section 1834(f).".

(B) Section 1834 of such Act (42 U.S.C. 1395m) is amended by adding at the end the following new subsection:

"(f) PAYMENTS FOR HEALTH SERVICES (OTHER THAN INPATIENT CARE) IN A MEDICAL ASSISTANCE FACILITY.—The amount of payments for health services (other than inpatient care) provided in a medical assistance facility under this part shall be the amounts determined by the Secretary under a payment system established by the Secretary which takes into account the relative value of the services furnished compared to other professional services.".

(d) TREATMENT AS PROVIDER OF SERVICES.—

(1) Section 1861(s)(2)(K)(i) of such Act (42 U.S.C. 1395x(s)(2)(K)(i)) is amended by inserting "medical assistance facility," after "hospital,".

(2) Section 1861(u) of such Act (42 U.S.C. 1395x(u)) is amended by inserting "medical assistance facility," after "hospital,".

(3) Section 1861(w)(1) of such Act (42 U.S.C. 1395x(w)(1)) is amended by inserting "medical assistance facility," after "hospital,".

(4) Section 1863 of such Act (42 U.S.C. 1395z) is amended by striking "and (dd)(2)" and inserting "(dd)(2), and (mm)".

(5) Section 1864(a) of such Act (42 U.S.C. 1395aa(a)) is amended, in the first and second sentences, by inserting ", medical assistance facility," after "hospital".

(6) Section 1865(a) of such Act (42 U.S.C. 1395bb(a)) is amended by striking "or 1861(dd)(2)" and inserting "1861(dd)(2), or 1861(mm)".

(e) MEDICAID COVERAGE OF SERVICES OF MEDICAL ASSISTANCE FACILITIES.—Section 1905(a) of the Social Security Act (42 U.S.C. 1396d(a)) is amended—

(1) by striking "and" at the end of paragraph (20);

(2) by redesignating paragraph (21) as paragraph (22); and

(3) by inserting after paragraph (20) the following new paragraph:

"(21) medical services of a medical assistance facility (as defined in section 1866mm(2)); and".

(f) EFFECTIVE DATE.—The amendments made by subsections (a), (c), (d), and (e) shall take effect upon the expiration of the 6-month period that begins on the date of the enactment of this Act, without regard to whether or not regulations have been promulgated to implement such amendments before the expiration of such 6-month period.

SEC. 4. REPORTS.

(a) INTERIM.—Not later than March 1, 1993, the Secretary of Health and Human Services (hereafter in this section referred to as the "Secretary") shall submit to Congress a report analyzing the grant program described in section 2 and the effect of the establishment of medical assistance facilities on the availability and quality of cost-effective health care for individuals in rural areas, including a summary of quality assurance reviews conducted pursuant to section 1861mm(2)(C) of the Social Security Act (as added by section 3(b) of this Act).

(b) FINAL.—Not later than March 1, 1995, the Secretary shall submit a final report to Congress updating the report submitted under subsection (a) and including recommendations regarding the feasibility of establishing a long-term program of assistance for medical assistance facilities.

SUMMARY OF THE RURAL MEDICAL ASSISTANCE FACILITIES ACT

CURRENT LAW

All hospitals that receive Medicare reimbursement must comply with Medicare's "conditions of participation" or quality standards in order to receive Medicare reimbursement for the services they provide. Rural hospitals, because of their small size, declining patient populations, and physician shortages are finding it increasingly difficult to comply with Medicare's strict staffing and medical service delivery requirements. These hospitals are forced to either close their half-full hospitals, severely jeopardizing access to health care, or keep their hospital open, no matter how expensive.

Recognizing the difficulty small, rural hospitals face surviving under rules devel-

oped primarily for larger ubran hospitals, HCFA is currently funding a demonstration in Montana to evaluate the feasibility of a new type of rural health care facility called Medical Assistance Facilities (MAFs). The medical services provided by these facilities are more limited than a full-fledged hospital, and staffing is provided primarily by physician assistants and nurse practitioners under a protocol and in collaboration with a physican. MAFs provide a viable "downsizing" option for some rural communities that need to sustain access to a set of basic services.

DASCHLE PROPOSAL

Development.—

National four-year demonstration;

The Secretary will provide funding for up to 10 to 15 MAFs located in 6 states; and

The facilities must be existing rural hospitals with less than 50 beds, and located at least 30 miles from the nearest hospital.

Cost.—Federal funds would be available on a cost-share basis of 90% federal and 10% state.

Reimbursement.—MAFs would receive Medicare payments based on DRGs during their first year of operation. The Secretary shall waive as necessary the requirements of Title XVII to provide payments as necessary to experiment with and evaluate the effectiveness of different payment methodologies. HCFA shall work with the HHS Office of Rural Health Policy to arrive at a fair and equitable payment methodology.

Medical Services.—

MAFs must offer the following basic services: emergency medical services, stabilization and primary care;

The Secretary shall evaluate the effects of models that offer obstetrical and outpatient surgery under a protocol;

Depending on the medical services offered, MAFs would not be required to be open 7 days a week/24 hours a day; and

MAFs would have a 96-hour inpatient limitation.

Staffing.—Services could be provided by a wide range of certified practitioners including physicians and mid-level professionals. Services provided by nurse practitioners and physician assistants would be in accordance with state law. Services provided by nurse practitioners and physician assistants would be provided under a written protocol with supervision frequency specified by the Secretary.

Referral Arrangements.—MAFs would be required to have a transfer agreement with a nearby hospital for purposes of transferring patients who need further inpatient care or providing other services needed for maintaining quality of health care delivered.

Quality Assurance Review.—MAFs would be required to have a written quality assurance program. The Secretary would be required to set quality standards, establish a quality protocol and conduct quality reviews.

Effective Dates.—The Secretary would have 6 months, beginning October 1, 1990 to select the participating states. The selected states would then have 6 months to select the MAF sites to be located in their state.

Reports to Congress.—The Secretary shall submit an interim and final report to Congress evaluating the effect of MAFs on access, quality of care, and cost-effectiveness.

RATIONALE

HCFA, as well as other health care experts, agree that the Montana Demonstration alone is not sufficient for evaluating the long-term feasibility of MAFs as an alternative health care delivery system. These health care experts agree that HCFA should allow for greater experimentation with the MAF concept by including more states in the demonstration and encouraging development of these facilities in more traditional rural areas rather than restricting them to solely frontier regions of the nation. A national demonstration with a number of sites across the country allows HCFA to conduct a full-scale evaluation of the feasibility of MAFs in various rural areas.●

By Mr. MITCHELL (for himself, Mr. DANFORTH, Mr. HEINZ, Mr. SANFORD, Mr. DODD, Mr. RIEGLE, Mr. KENNEDY, Mr. COHEN, Mr. LAUTENBERG, Mr. PELL, Mr. LEVIN, Ms. MIKULSKI, Mr. MOYNIHAN, Mr. SARBANES, Mr. D'AMATO, Mr. GORTON, Mr. DURENBERGER, Mr. KERRY, Mr. CHAFEE, Mr. LIEBERMAN, Mr. BOREN, Mr. BAUCUS, Mr. PRYOR, Mr. FORD, Mr. SPECTER, Mr. SHELBY, Mr. SASSER, Mr. ROCKEFELLER, Mr. BURDICK, Mr. SIMON, Mr. MCCAIN, Mr. BOND, Mr. INOUYE, Mr. HARKIN, Mr. MCCONNELL, Mr. CRANSTON, Mr. ADAMS, Mr. BREAUX, Mr. JOHNSTON, Mr. COATS, Mr. CONRAD, Mr. BINGAMAN, Mr. LUGAR, Mr. SYMMS, Mr. DIXON, Mr. GORE, Mr. GRASSLEY, Mr. BUMPERS, Mr. RUDMAN, Mr. GRAHAM, Mr. LEAHY, Mr. DOLE, Mr. LOTT, and Mr. DASCHLE):

S. 980. A bill to amend the Internal Revenue Code of 1986 to improve the effectiveness of the low-income housing credit; to the Committee on Finance.

LOW-INCOME HOUSING CREDIT ACT OF 1989

Mr. MITCHELL. Mr. President, Senator DANFORTH and I, joined by 52 of our colleagues, are today introducing the Low-Income Housing Credit Act of 1989. This legislation will make a number of changes to improve the effectiveness of the low-income housing tax credit and to repeal the December 31, 1989, expiration date of this program.

This legislation is largely based on recommendations made by a low-income housing industry task force organized by Senator DANFORTH and myself last year. The Mitchell-Danforth Task Force on the Low-Income Housing Tax Credit was made up of 13 individuals representing all segments of the low-income housing community, including the State agencies which allocate the credit, urban and rural developers, nonprofit organizations, credit syndicators, academic experts, and tenant representatives.

The task force met several times during 1988 and produced a series of recommendations in a report that was made public in January of this year. These recommendations, many of which are included in this legislation, are designed to improve the efficiency and effectiveness of the credit program. Many of the provisions in this bill would impose new restrictions on the use of the credit to maximize program objectives with the least expenditure of tax benefits. Other provisions would remove unnecessary impediments in current law to using the credit.

The basic outline of the current program is preserved. It will continue to be a tightly targeted, 10-year tax incentive for the construction, rehabilitation, and acquisition of housing provided to families with less than 60 percent of median income who pay rent not in excess of 30 percent of their income. Within that basic framework, a number of changes are proposed to improve the program.

To understand why we are proposing these changes, it is helpful to understand the circumstances under which the low-income housing credit was enacted as part of the Tax Reform Act of 1986. The provision originated in the Senate Finance Committee and was designed as a more efficient alternative to a variety of then-existing tax incentives for low-income housing.

The bill reported from the Senate Finance Committee proposed a credit only for new construction that could not be used in conjunction with any other Federal housing program. That was a limited proposal of doubtful utility that was substantially altered on the Senate floor and in the conference committee between the House and Senate.

What is noteworthy about this is that the credit program was written without the benefit of any prior hearings late in the tax reform process. It should therefore be expected that this complicated new program is in need of certain modifications that would further the housing policy objectives of the law consistent with sound tax policy.

Following enactment, there was a good deal of skepticism that the program would work. Those doubts were only reinforced in the first year of the credit when the development community, busy learning about this complicated new program, was able to use less than 20 percent of the total amount of tax credits allocable by States in 1987.

Since that time, the program has turned to be a far more effective means of stimulating low-income housing development than was first anticipated. That is in part due to the innovative work of the development community and the strong efforts of the State allocating agencies to promote this program.

It is also due to the more than two dozen statutory modifications to the program that were included in the Technical Corrections and Miscellane-

ous Revenue Act of 1988. As a result of the changes in that legislation—primarily the new project carryover rules—credit allocations in 1988 increased considerably above 1987 to approximately 70 percent of the credit cap nationwide.

Because the program expires at the end of the 1989, low-income housing developers are applying now for credit allocations on property which is intended to be completed this year and over the next 2 years. This will likely cause many States to allocate their entire credit authority in 1989.

While we are pleased with the level of credit activity today, we believe there are a number of changes that are needed to improve the operation of the program to maximize the housing policy objectives of the credit.

Our objective is to improve the efficiency and effectiveness of the credit program. In some respects, that will mean new restrictions on the credit program while in other cases liberalizations of current law are in order.

Ideally, we would like to see a low-income housing credit program where demand for tax credits, both by investors and developers, far exceeds supply so that only the best projects receive credit allocations and those projects command maximum equity capital per credit dollar.

The tax credit is proving to be a valuable incentive for developers to build and rehabilitate low-income housing. But in most cases—approximately 77 percent of all units built with the credit last year—other subsidies were necessary to make these projects work. Because rents are strictly controlled under the tax credit program, cash flow is insufficient to support high levels of debt. Since the equity that is attracted through the tax credit usually cannot make up the difference, most of these projects have a gap which must be filled in other ways.

One of the exciting aspects of the low-income housing credits is the way it is currently serving as a catalyst to bring other sources of funds to low-income housing development to bridge the gap between the amount that is necessary for project development and the amount that can be provided through tax credit equity and the primary debt on the property.

Nonprofit and for profit are putting together innovative deals which require multiple sources of funds attracted from State and local governments, the Federal Government, charitable foundations, community funds, and corporations.

The low-income housing tax credit is working today during a period of scarce housing resources. State and local governments, working with the private sector and nonprofit developers, are using the credit to bring together disparate sources of funds that enable low-income housing to be built. Regardless of the changes we propose in this legislation to improve the program, the credit must be permitted to continue.

The low-income housing tax credit is 1 of about 13 tax programs which either expired at the end of last year or will expire at the end of this year. Most of the programs have large constituencies which present compelling reasons why they should be extended in the Tax Code. During this period of budgetary restraint, in a year when the tax writing committees have to come up with more than $5 billion to reduce the deficit next year, it will be particularly difficult to extend any of the expiring tax provisions.

I believe the low-income housing credit deserves special consideration. It is unfortunate, and inappropriate, that this program finds itself on the list of tax incentives that expire. Unlike most other expiring tax provisions, incentives for low-income housing have traditionally been a part of the tax system. What is new is the treatment of low-income housing under tax reform when all existing incentives were replaced with a limited credit program that is subject to strict per capita volume caps.

If the low-income housing tax credit is permitted to expire, low-income housing—rented to tenants who cannot afford to pay rents that can support the property—will receive the same tax treatment as other residential housing and only marginally better tax treatment than commercial real estate. Low-income housing would receive far worse treatment than historic rehabilitation real estate which today receives generous subsidies unencumbered by an expiration date.

Today, during a decade when the gap between low-income housing needs and Federal housing assistance is so great, we cannot permit this program to expire. According to recent figures compiled by the Census Bureau and the Department of Housing and Urban Development, America is in the midst of an affordable housing crisis. Under HUD standards, housing is considered affordable for a low-income household if it consumes no more than 30 percent of the household's income. Yet, recent data indicate that as many as five of every six poor renter households pay more than 30 percent of their income. Almost half paid at least 70 percent of their income for housing costs according to data from 1985.

There are undoubtedly many factors contributing to this housing affordability crisis, including a decline in the average income of lower income families. Another major factor contributing to the shortage of low-income housing is the declining Federal support for assisted housing. Appropriations for HUD's subsidized housing program have declined more than 80 percent in this decade. Farmers Home direct loan housing programs have been cut nearly 70 percent. The number of families below the poverty level not receiving any housing assistance has increased by more than one-third in the last decade.

The low-income housing credit is a small program that will not even begin to solve this Nation's housing problems. But it does have an important role to play in the overall mix of Federal housing programs. I urge my colleagues to cosponsor and actively support this legislation.

I ask unanimous consent that a copy of the legislation and a summary of its provisions be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 980

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

(a) SHORT TITLE.—This Act may be cited as the "Low-Income Housing Credit Act of 1989".

(b) AMENDMENT OF 1986 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

SEC. 2. CHANGES IN LOW-INCOME HOUSING CREDIT.

(a) CREDIT MADE PERMANENT.—Section 42 (relating to low-income housing credit) is amended by striking subsection (n).

(b) 1-YEAR CARRYOVER OF UNUSED CREDIT AUTHORITY.—

(1) IN GENERAL.—Paragraph (3) of section 42(h) (relating to State housing credit ceiling) is amended by redesignating subparagraphs (D), (E), and (F) as subparagraphs (E), (F), and (G), respectively, and by striking subparagraph (C) and inserting the following new subparagraphs:

"(C) STATE HOUSING CREDIT CEILING.—The State housing credit ceiling applicable to any State for any calendar year shall be an amount equal to the sum of—

"(i) $1.25 multiplied by the State population,

"(ii) the unused State housing credit ceiling (if any) of such State for the preceding calendar year, plus

"(iii) the amount (if any) allocated under subparagraph (D) to such State by the Secretary.

For purposes of clause (ii), the unused State housing credit ceiling for any calendar year is the excess (if any) of the amount described in clause (i) over the aggregate housing credit dollar amount allocated for such year.

"(D) UNUSED HOUSING CREDIT CARRYOVERS ALLOCATED AMONG CERTAIN STATES.—

"(i) IN GENERAL.—The unused housing credit carryover of a State for any calendar year shall be assigned to the Secretary for allocation among qualified States for the succeeding calendar year.

"(ii) UNUSED HOUSING CREDIT CARRYOVER.—For purposes of this subparagraph, the unused housing credit carryover of a State for any calendar year is the excess (if any) of the unused State housing credit ceiling

for such year (as defined in subparagraph (C)(ii)) over the excess (if any) of—

"(I) the aggregate housing credit dollar amount allocated for such year, over

"(II) the amount described in clause (i) of subparagraph (C).

"(iii) FORMULA FOR ALLOCATION OF UNUSED HOUSING CREDIT CARRYOVERS AMONG QUALIFIED STATES.—The amount allocated under this subparagraph to a qualified State for any calendar year shall be the amount determined by the Secretary to bear the same ratio to the aggregate unused housing credit carryovers of all States for the preceding calendar year as such State's population for the calendar year bears to the population of all qualified States for the calendar year. For purposes of the preceding sentence, population shall be determined in accordance with section 146(j).

"(iv) QUALIFIED STATE.—For purposes of this subparagraph, the term 'qualified State' means, with respect to a calendar year, any State—

"(I) which allocated its entire State housing credit ceiling for the preceding calendar year, and

"(II) for which a request is made (not later than May 1 of the calendar year) to receive an allocation under clause (iii)."

(2) CONFORMING AMENDMENTS.—

(A) Subparagraph (E) of section 42(h)(5) is amended by striking "subparagraph (E)" and inserting "subparagraph (F)".

(B) Paragraph (6) of section 42(h) is amended by striking subparagraph (B) and by redesignating subparagraphs (C), (D), and (E) as subparagraphs (B), (C), and (D), respectively.

(c) BUILDINGS ELIGIBLE FOR CREDIT ONLY IF MINIMUM 30-YEAR COMMITMENT TO LOW-INCOME HOUSING.—

(1) IN GENERAL.—Subsection (h) of section 42 is amended by redesignating paragraphs (6) and (7) as paragraphs (7) and (10), respectively, and by inserting after paragraph (5) the following new paragraph:

"(6) BUILDINGS ELIGIBLE FOR CREDIT ONLY IF MINIMUM 30-YEAR COMMITMENT TO LOW-INCOME HOUSING.—

"(A) IN GENERAL.—No credit shall be allowed by reason of this section with respect to any building for the taxable year unless an extended low-income housing commitment is in effect as of the beginning of such taxable year.

"(B) EXTENDED LOW-INCOME HOUSING COMMITMENT.—For purposes of this paragraph, the term 'extended low-income housing commitment' means any recorded agreement between the taxpayer and the housing credit agency—

"(i) which requires that the applicable fraction (as defined in subsection (c)(1)) for the building for each taxable year in the extended use period will not be less than the applicable fraction specified in such agreement,

"(ii) which allows individuals who meet the income limitation applicable to the building under subsection (g) (whether prospective, present, or former occupants of the building) the same rights as such agency to enforce in any State court the requirement of clause (i), and

"(iii) which is binding on all successors of the taxpayer.

"(C) ALLOCATION OF CREDIT MAY NOT EXCEED AMOUNT NECESSARY TO SUPPORT COMMITMENT.—The housing credit dollar amount allocated to any building may not exceed the amount necessary to support the applicable fraction specified in the extended low-income housing commitment for such building.

"(D) EXTENDED USE PERIOD.—For purposes of this paragraph, the term 'extended use period' means the period—

"(i) beginning on the 1st day in the compliance period on which such building is part of a qualified low-income housing project, and

"(ii) ending on the later of—

"(I) the date specified by such agency in such agreement, or

"(II) the date which is 15 years after the close of the compliance period.

"(E) EXCEPTIONS IF FORECLOSURE OR IF NO BUYER WILLING TO MAINTAIN LOW-INCOME STATUS.—

"(i) IN GENERAL.—The extended use period for any building shall terminate—

"(I) on the date the building is acquired by foreclosure (or instrument in lieu of foreclosure), or

"(II) on the last day of the period specified in subparagraph (I) if the housing credit agency is unable to present during such period a qualified contract for the acquisition of the low-income portion of the building by any person who will continue to operate such portion as a qualified low-income building.

Subclause (II) shall not apply to the extent more stringent requirements are provided in the agreement or in State law.

"(ii) EVICTION, ETC. OF EXISTING LOW-INCOME TENANTS NOT PERMITTED.—The termination of an extended use period under clause (i) shall not be construed to permit—

"(I) the eviction or the termination of tenancy (other than for good cause) of the tenant of any low-income unit on the termination date, or

"(II) any increase in the gross rent with respect to such unit in excess of that permitted under subsection (g), so long as such tenant continues to meet the income limitation applicable under subsection (g) to such unit.

"(F) QUALIFIED CONTRACT.—For purposes of subparagraph (E), the term 'qualified contract' means a bona fide contract to acquire (within a reasonable period after the contract is entered into) the low-income portion of the building for an amount not less than the applicable fraction (specified in the extended low-income housing commitment) of—

"(i) the sum of—

"(I) the outstanding indebtedness secured by, or with respect to, the building,

"(II) the adjusted investor equity in the building, plus

"(III) other capital contributions not reflected in the amounts described in subclause (I) or (II), reduced by

"(ii) cash distributions from (or available for distribution from) the project.

The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out this paragraph, including regulations to prevent the manipulation of the amount determined under the preceding sentence.

"(G) ADJUSTED INVESTOR EQUITY.—

"(i) IN GENERAL.—For purposes of subparagraph (E), the term 'adjusted investor equity' means, with respect to any calendar year, the aggregate amount of cash taxpayers invested with respect to the project increased by the amount equal to—

"(I) such amount, multiplied by

"(II) the cost-of-living adjustment for such calendar year, determined under section 1(f)(3) by substituting the base calendar year for 'calendar year 1987'.

An amount shall be taken into account as an investment in the project only to the extent there was an obligation to invest such amount as of the beginning of the credit period and to the extent such amount is reflected in the adjusted basis of the project.

"(ii) COST-OF-LIVING INCREASES IN EXCESS OF 5 PERCENT NOT TAKEN INTO ACCOUNT.—Under regulations prescribed by the Secretary, if the CPI for any calendar year (as defined in section 1(f)(4)) exceeds the CPI for the preceding calendar year by more than 5 percent, the CPI for the base calendar year shall be increased such that such excess shall never be taken into account under clause (i).

"(iii) BASE CALENDAR YEAR.—For purposes of this subparagraph, the term 'base calendar year' means the calendar year with or within which the 1st taxable year of the credit period ends.

"(H) LOW-INCOME PORTION.—For purposes of this paragraph, the low-income portion of a building is the portion of such building equal to the applicable fraction specified in the extended low-income housing commitment for the building.

"(I) PERIOD FOR FINDING BUYER.—The period referred to in this subparagraph is the 1-year period beginning on the date (after the 14th year of the compliance period) the taxpayer submits a written request to the housing credit agency to find a person to acquire the taxpayer's interest in the low-income portion of the building.

"(J) SALES OF LESS THAN LOW-INCOME PORTION OF BUILDING.—In the case of a sale or exchange of only a portion of the low-income portion of the building, only the same portion (as the portion sold or exchanged) of the amount determined under subparagraph (F) shall be taken into account thereunder.

"(K) EFFECT OF NONCOMPLIANCE.—If, during a taxable year, there is a determination that an extended low-income housing agreement was not in effect as of the beginning of such year, such determination shall not apply to any period before such year and subparagraph (A) shall be applied without regard to such determination if the failure is corrected within 1 year from the date of the determination.

"(L) PROJECTS WHICH CONSIST OF MORE THAN 1 BUILDING.—The application of this paragraph to projects which consist of more than 1 building shall be made under regulations prescribed by the Secretary."

(2) CONFORMING AMENDMENT.—Subparagraph (C) of section 42(b)(3) is amended by striking "subsection (h)(6))" and inserting "subsection "(h)(7)".

(d) CREDIT FOR ACQUISITION OF EXISTING BUILDING TO APPLY ONLY IF BUILDING TO BE REHABILITATED; INCREASE IN REQUIRED REHABILITATION EXPENDITURES.—

(1) IN GENERAL.—Subparagraph (B) of section 42(d)(2) is amended by striking "and" at the end of clause (ii), by striking the period at the end of clause (iii) and inserting ", and", and by adding at the end thereof the following new clause:

"(iv) a credit is allowable under subsection (a) by reason of subsection (e) with respect to the building."

(2) CREDIT PERIOD FOR EXISTING BUILDINGS NOT TO BEGIN BEFORE REHABILITATION CREDIT ALLOWED.—Subsection (f) of section 42 (relating to definition and special rules relating to credit period) is amended by adding at the end thereof the following new paragraph:

"(4) CREDIT PERIOD FOR EXISTING BUILDINGS NOT TO BEGIN BEFORE REHABILITATION CREDIT ALLOWED.—The credit period for an existing

building shall not begin before the 1st taxable year of the credit period for rehabilitation expenditures with respect to the building."

(3) INCREASE IN REQUIRED REHABILITATION EXPENDITURES.—Paragraph (3) of section 42(e) is amended—

(A) by striking "$2,000" in the text of subparagraph (A) and inserting "$3,000", and

(B) by striking "$2,000" in the heading and inserting "$3,000".

(e) CHANGES IN RULES RELATING TO RENT RESTRICTIONS.—

(1) REDUCTION IN AREA MEDIAN GROSS INCOME NOT TO REQUIRE REDUCTION OF RENT.—Subparagraph (A) of section 42(g)(2) (relating to rent-restricted units) is amended by adding at the end thereof the following new sentence: "For purposes of the preceding sentence, the amount of the income limitation under paragraph (1) applicable for any period shall not be less than such limitation applicable for the earliest period the building (which contains the unit) was included in the determination of whether the project is a qualified low-income housing project."

(2) HIGHER RENT PERMITTED FOR UNITS OCCUPIED BY HIGHER INCOME INDIVIDUALS IF PROJECT HAS OPERATING DEFICIT.—Paragraph (2) of section 42(g) is amended by adding at the end thereof the following new subparagraph:

"(D) HIGHER RENT PERMITTED FOR UNITS OCCUPIED BY HIGHER INCOME INDIVIDUALS IF PROJECT HAS OPERATING DEFICIT.—

"(i) IN GENERAL.—A unit in a project described in clause (ii) shall be treated as a rent-restricted unit under paragraph (1) if—

"(I) the income of the occupants of the unit is more than 100 percent (but not more than 140 percent) of the income limitation applicable under paragraph (1) to such occupants, and

"(II) the gross rent with respect to such unit does not exceed 30 percent of the income of such occupants.

"(ii) PROJECT DESCRIBED.—A project is described in this clause for any calendar year if—

"(I) the project would (without regard to the treatment under clause (i)) have an operating deficit for such calendar year,

"(II) the project's expenses for taxes, utilities (including garbage collection), operating maintenance services, and insurance are increasing in the aggregate at a rate (when compared to the preceding calendar year) in excess of the rate of increase of area median gross income, and

"(III) the housing credit agency for such project approves the treatment under clause (i).

"(iii) OPERATING DEFICIT.—The term 'operating deficit' means, with respect to any calendar year, an excess of—

"(I) the expenses necessary for the operation of the project (including debt service) during such calendar year, over

"(II) the aggregate of the gross rent receipts (including amounts described in clauses (i) and (ii) of subparagraph (B)) attributable to such calendar year and other available funds (including operating reserves)."

(3) DETERMINATION OF APPLICABLE AREA MEDIAN GROSS INCOME.—

(A) Subsection (g) of section 42 is amended by redesignating paragraphs (4), (5), and (6), as paragraphs (5), (6), and (7), respectively, and by inserting after paragraph (3) the following new paragraph:

"(4) INCOME OF INDIVIDUALS; AREA MEDIAN GROSS INCOME.—

"(A) IN GENERAL.—For purposes of this section, the income of individuals and area median gross income shall be determined by the Secretary in a manner consistent with determinations of lower income families and area median gross income under section 8 of the United States Housing Act of 1937 (or, if such program is terminated, under such program as in effect immediately before such termination).

"(B) AREA MEDIAN GROSS INCOME APPLICABLE TO UNIT BASED ON NUMBER OF BEDROOMS IN UNIT.—Determinations under subparagraph (A) shall include adjustments for family size. For purposes of determining the income limitation applicable under subsection (g)(1) to individuals occupying a residential unit, there shall be deemed to be—

"(i) 1 individual occupying the unit if the unit does not have a separate bedroom, and

"(ii) 1.5 individuals occupying the unit for each separate bedroom in such unit.

In the case of a project with respect to which a credit is allowable by reason of this section and for which financing is provided by a bond described in section 142(a)(7), the preceding sentence shall also apply for purposes of the last sentence of section 142(d)(2)(B)."

(B) Paragraph (5) of section 42(g), as redesignated by subparagraph (A), is amended by striking "(2) (other than subparagraph (A) thereof),".

(4) USE OF STATE MEDIAN GROSS INCOME FOR DETERMINING QUALIFIED LOW-INCOME HOUSING PROJECT STATUS, ETC.—Subsection (g) of section 42 (relating to qualified low-income housing projects) is further amended by adding at the end thereof the following new paragraph:

"(8) USE OF STATE MEDIAN GROSS INCOME IN CERTAIN CASES.—

"(A) IN GENERAL.—For purposes of this section, area median gross income shall be treated as not being less than State median gross income in the case of a building—

"(i) which was, immediately before its acquisition by the taxpayer, owned or financed by a Federal, State, or local governmental agency,

"(ii) which is a federally-assisted building described in clause (i), (ii), or (iii) of subsection (d)(6)(B)), and

"(iii) which is described in clause (i) or (ii) of subparagraph (B).

"(B) ADDITIONAL DESCRIPTION.—

"(i) A building is described in this clause if the building is at least 6 months in arrears in payments on the mortgage loan thereon and the agency described in subparagraph (A)(i) with respect to such building makes a determination that—

"(I) the building requires substantial rehabilitation, and

"(II) pursuant to an analysis of certified financial statements relating to the building, the building is not then generating cash flow sufficient to pay costs of maintenance, operations, and payments of principal and interest on a current basis.

"(ii) A building is described in this clause if the building was acquired by a Federal, State, or local governmental agency by reason of foreclosure or instrument in lieu of foreclosure."

(f) ADDITIONAL BUILDINGS ELIGIBLE FOR WAIVER OF 10-YEAR PERIOD APPLICABLE TO ACQUISITIONS OF EXISTING BUILDINGS.—

(1) IN GENERAL.—Subparagraph (A) of section 42(d)(6) is amended by striking "or" at the end of clause (i), by striking the period at the end of clause (ii) and inserting a comma, and by adding at the end thereof the following new clauses:

"(iii) to avert default on a loan made or held by any State or agency thereof, or

"(iv) to facilitate the sale of the building if—

"(I) the mortgage loan on the building is held by the Department of Housing and Urban Development,

"(II) the building is owned by such Department following its acquisition (by such Department or the mortgage loan lender) by foreclosure (or by instrument in lieu of foreclosure), or

"(III) the building is owned by the Farmers Home Administration."

(2) LOW-INCOME BUILDINGS WHERE MORTGAGE MAY BE PREPAID.—Paragraph (6) of section 42(d) is amended by adding at the end thereof the following new subparagraph:

"(C) LOW-INCOME BUILDINGS WHERE MORTGAGE MAY BE PREPAID.—A waiver may be granted under subparagraph (A) (without regard to any clause thereof) with respect to a federally-assisted building described in clause (ii) or (iii) of subparagraph (B) if—

"(i) at any time within 1 year after the date of the application by the taxpayer for such a waiver, the mortgage on such building is eligible for prepayment under subtitle B of the Emergency Low Income Housing Preservation Act of 1987 or under section 502(c) of the Housing Act of 1949, and

"(ii) the appropriate Secretary or Administrator certifies to the Secretary that it is reasonable to expect that such building will cease being a low-income building if the waiver is not granted, and

If a waiver is granted under subparagraph (A) with respect to such building, no person shall be eligible to prepay such mortgage without the approval of the appropriate Secretary."

(3) CERTAIN MULTI-FAMILY HOUSING.—Subparagraph (B) of section 42(d)(6) is amended by adding at the end thereof the following new sentence: "Such term includes any building which has more than 4 residential rental units and the mortgage on which was originated by, or is insured or guaranteed by, the Federal Government."

(g) ADDITIONAL TYPES OF HOUSING ELIGIBLE FOR CREDIT.—

(1) SINGLE-ROOM OCCUPANCY UNITS RENTED ON A MONTHLY BASIS.—Subparagraph (B) of section 42(i)(3) (relating to low income unit) is amended by adding at the end thereof the following new sentence: "For purposes of the preceding sentence, a single-room occupancy unit shall not be treated as used on a transient basis merely because it is rented on a month-by-month basis."

(2) SPECIAL NEEDS HOUSING.—

(A) CONSIDERATION OF REQUIRED FEES FOR SUPPORTIVE SERVICES IN CALCULATION OF GROSS RENT.—Subparagraph (B) of section 42(g)(2) (relating to gross rent) is amended—

(i) in clause (i), by striking "and" at the end,

(ii) in clause (ii), by striking the period at the end and inserting ", and", and

(iii) by adding at the end the following new clause:

"(iii) includes any fee assessed for a supportive service (as defined in paragraph (9)) if payment of the fee is required as a condition of occupancy, unless—

"(I) the fee is paid by any governmental program of assistance in which the amount of assistance provided for rent is not separable from the amount of assistance provided for supportive services, or

"(II) the project would not be economically feasible without the required fee and a governmental agency regulates the fee to ensure that it is reasonable."

(B) ELIGIBILITY OF SPECIAL NEEDS HOUSING.—Subsection (g) of section 42 (relating to qualified low-income housing project) is further amended by adding at the end the following new paragraph:

"(9) ELIGIBILITY OF SPECIAL NEEDS HOUSING.—

"(A) IN GENERAL.—A residential rental property shall not be treated as failing to be a qualified low-income housing project for purposes of this section solely because individuals occupying residential units in the property are provided supportive services. The preceding sentence shall not apply if section 7872 does not apply to any individual occupying a residential unit in the property (or such individual spouse) by reason of subsection (g) thereof.

"(B) SUPPORTIVE SERVICE.—For purposes of this paragraph, the term 'supportive service' means any service provided under a planned program of services designed to enable residents of a residential rental property to remain independent and avoid placement in a hospital, nursing home, or intermediate care facility."

(3) SCATTERED SITE PROJECTS.—Subsection (g) of section 42 (defining qualified low-income housing project) is further amended by adding at the end thereof the following new paragraph:

"(10) SCATTERED SITE PROJECTS.—Buildings which would (but for their lack of proximity) be treated as a project for purposes of this section shall be so treated if all of the dwelling units in each of the buildings are rent-restricted (within the meaning of paragraph (2)) residential rental units."

(h) ELIGIBLE BASIS FOR NEW BUILDINGS TO INCLUDE EXPENDITURES BEFORE CLOSE OF 1ST YEAR OF CREDIT PERIOD.—

(1) NEW BUILDINGS.—Paragraph (1) of section 42(d) (relating to eligible basis for new buildings) is amended by inserting before the period "as of the close of the 1st taxable year of the credit period".

(2) EXISTING BUILDINGS.—Subparagraph (A) of section 42(d)(2) (relating to eligible basis for existing buildings) is amended by striking "subparagraph (B)" and all that follows through the end of clause (i) and inserting "subparagraph (B), its adjusted basis as of the close of the 1st taxable year of the credit period, and".

(3) CONFORMING AMENDMENTS.—

(A) Subparagraph (C) of section 42(d)(2) is amended by striking "ACQUISITION COST" in the heading and inserting "ADJUSTED BASIS" and by striking "cost" in the text and inserting "adjusted basis".

(B) Paragraph (5) of section 42(d) is amended by striking subparagraph (A), by redesignating subparagraphs (B) and (C) as subparagraphs (A) and (B), respectively, and by striking the paragraph heading and inserting the following:

"(5) SPECIAL RULES FOR DETERMINING ELIGIBLE BASIS.—".

(C) Paragraph (5) of section 42(e) is amended by striking "subsection (d)(2)(A)(i)(II)" and inserting "subsection (d)(2)(A)(i)".

(i) CHANGES IN RULES LIMITING BENEFITS WHERE BUILDING FINANCED WITH TAX-EXEMPT BONDS OR BELOW MARKET LOANS.—

(1) FEWER BUILDINGS TREATED AS FEDERALLY SUBSIDIZED.—

(A) Subparagraph (A) of section 42(i)(2) is amended by adding at the end thereof the following: "The preceding sentence shall not apply if—

"(i) the aggregate of the obligations and loans referred to therein does not exceed 75 percent of the aggregate basis of the building and the land on which it is located (other than so much of such basis as is attributable to any developer fee), and

"(ii) any additional credit which is allowable under subsection (a) by reason of clause (i) is supported by an allocation of housing credit under subsection (h)."

(B) Subparagraph (D) of section 42(i)(2) (defining below market Federal loan) is amended by inserting "50 percent of" after "less than".

(2) CREDIT VOLUME CAP NOT APPLICABLE TO BUILDING IF 50 PERCENT OR MORE OF BUILDING IS FINANCED WITH TAX-EXEMPT BONDS SUBJECT TO BOND VOLUME CAP.—Subparagraph (B) of section 42(h)(4) is amended—

(A) by striking "70 percent" in the text and inserting "50 percent", and

(B) by striking "70 PERCENT" in the heading and inserting "50 PERCENT".

(j) HOUSING CREDIT MAY BE ALLOCATED ON PROJECT BASIS.—

(1) IN GENERAL.—Paragraph (1) of section 42(h) is amended by adding at the end thereof the following new subparagraph:

"(F) ALLOCATION OF CREDIT ON A PROJECT BASIS.—

"(i) IN GENERAL.—In the case of a project which includes (or will include) more than 1 building, an allocation meets the requirements of this subparagraph if—

"(I) the allocation is made to the project for a calendar year during the project period,

"(II) the allocation only applies to buildings placed in service during or after the calendar year for which the allocation is made, and

"(III) the portion of such allocation which is allocated to any building in such project is specified not later than the close of the calendar year in which the building is placed in service.

"(ii) PROJECT PERIOD.—For purposes of clause (i), the term 'project period' means the period—

"(I) beginning with the 1st calendar year for which an allocation may be made for the 1st building placed in service as part of such project, and

"(II) ending with the calendar year the last building is placed in service as part of such project."

(2) CONFORMING AMENDMENT.—Subparagraph (B) of section 42(h)(1) is amended by striking "or (E)" and inserting "(E), or (F)".

(3) PROJECTS WITH MORE THAN 1 BUILDING MUST BE IDENTIFIED.—Paragraph (3) of section 42(g) is amended by adding at the end thereof the following new subparagraph:

"(D) PROJECTS WITH MORE THAN 1 BUILDING MUST BE IDENTIFIED.—For purposes of this section, a project shall be treated as consisting of only 1 building unless, before the close of the 1st calendar year in the project period (as defined in subsection (h)(1)(F)(ii)), each building which is (or will be) part of such project is identified in such form and manner as the Secretary may provide."

(k) OWNER-OCCUPIED BUILDINGS HAVING 4 OR FEWER UNITS ELIGIBLE FOR CREDIT WHERE DEVELOPMENT PLAN.—Paragraph (3) of section 42(i) is amended by adding at the end thereof the following new subparagraph:

"(D) OWNER-OCCUPIED BUILDINGS HAVING 4 OR FEWER UNITS ELIGIBLE FOR CREDIT WHERE DEVELOPMENT PLAN.—

"(i) IN GENERAL.—Subparagraph (C) shall not apply to the acquisition or rehabilitation of a building pursuant to a development plan of action sponsored by a State or local government or a qualified nonprofit organization (as defined in subsection (h)(5)(C)).

"(ii) LIMITATION ON CREDIT.—In the case of a building to which clause (i) applies, the applicable fraction shall not exceed 80 percent of the unit fraction.

"(iii) CERTAIN UNRENTED UNITS TREATED AS OWNER-OCCUPIED.—In the case of a building to which clause (i) applies, any unit which is not rented for 90 days or more shall be treated as occupied by the owner of the building as of the 1st day it is not rented."

(l) ALLOCATION OF CREDIT AMONG PARTNERS.—Paragraph (5) of section 42(j) (relating to certain partnerships treated as the taxpayer) is amended by redesignating subparagraph (C) as subparagraph (D) and by inserting after subparagraph (B) the following new subparagraph:

"(C) ALLOCATION OF CREDIT AMONG PARTNERS.—The allocation of the credit determined under this section to a partner shall be treated as having substantial economic effect for purposes of section 704(b) if—

"(i) such allocation is made on the basis of such partner's share of some other substantial partnership item and such allocation has substantial economic effect for such purposes, and

"(ii) appropriate adjustments are made under regulations prescribed by the Secretary in the gain chargeback rules to take into account the amount of such credit which is allowed to a partner during the period such partner's capital account is negative."

(m) CHANGES IN RULES RELATED TO DEEP RENT SKEWED PROJECTS.—

(1) Clause (iii) of section 142(d)(4)(B) is amended by striking "⅓" and inserting "½".

(2) Paragraph (5) of section 42(g) (relating to certain rules made applicable), as redesignated by subsection (e)(3), is further amended by striking "(other than section 142(d)(4)(B)(iii))".

(n) ADJUSTED GROSS INCOME PHASEOUT FOR $25,000 EXCEPTION FROM PASSIVE LOSS RULES TO APPLY BASED ON SUCH INCOME BEFORE INITIAL INVESTMENT.—Paragraph (3) of section 469(i) is amended by adding at the end thereof the following new subparagraph:

"(C) YEAR-BY-YEAR TEST OF ADJUSTED GROSS INCOME NOT TO APPLY TO LOW-INCOME HOUSING CREDIT.—If any portion of the passive activity credit for the taxable year is attributable to the credit determined under section 42 with respect to any project, the taxpayer's adjusted gross income for such year shall be treated for purposes of this subsection as being equal to the taxpayer's adjusted gross income for the last taxable year ending before the date of the taxpayer's earliest substantial investment in the project. The preceding sentence shall apply only with respect to investments the taxpayer was obligated (on a recourse basis) to make as of the close of such last taxable year."

(o) HOUSING CREDIT AGENCIES MUST ADOPT PLANS FOR ALLOCATION OF CREDIT AMONG PROJECTS.—Subsection (h) of section 42 (relating to limitation on aggregate credit allowable with respect to projects located in a State), as amended by subsection (c), is further amended by inserting after paragraph (7) the following new paragraph:

"(8) HOUSING CREDIT AGENCIES MUST ADOPT PLANS FOR ALLOCATION OF CREDIT AMONG PROJECTS.—

"(A) IN GENERAL.—Notwithstanding any other provision of this section, the housing credit dollar amount with respect to any building shall be zero unless such amount was allocated pursuant to a qualified allocation plan of the housing credit agency

which is approved by the governmental unit (in accordance with rules similar to the rules of section 147(f)(2)) of which such agency is a part.

"(B) QUALIFIED ALLOCATION PLAN.—For purposes of this paragraph, the term 'qualified allocation plan' means any plan—

"(i) which sets forth selection criteria to be used to determine housing priorities of the housing credit agency which are appropriate to local conditions, and

"(ii) which gives preference in allocating housing credit dollar amounts among selected projects to—

"(I) projects serving the lowest income tenants,

"(II) projects obligated to serve qualified tenants for the longest periods, and

"(III) projects which provide the largest number of units per dollar of credit.

"(C) CERTAIN SELECTION CRITERIA MUST BE USED.—The selection criteria set forth in a qualified allocation plan must include—

"(i) project location,

"(ii) housing needs characteristics,

"(iii) project characteristics,

"(iv) sponsor characteristics, and

"(v) tenant populations with special housing needs.

"(D) APPLICATION TO BOND FINANCED PROJECTS.—Paragraph (4) shall not apply to any project unless the project satisfies the requirements for allocation of a housing credit dollar amount under the qualified allocation plan applicable to the area in which the project is located."

(p) CREDIT ALLOCATED NOT TO EXCEED AMOUNT NECESSARY TO ASSURE PROJECT FEASIBILITY.—Subsection (h) of section 42 is further amended by inserting after paragraph (8) the following new paragraph:

"(9) CREDIT ALLOCATED TO BUILDING NOT TO EXCEED AMOUNT NECESSARY TO ASSURE PROJECT FEASIBILITY.—

"(A) IN GENERAL.—The housing credit dollar amount allocated to a project shall not exceed the amount the housing credit agency determines is necessary for the financial feasibility of the project and its viability as a qualified low-income housing project throughout the compliance period or such longer period as such agency determines to be appropriate.

"(B) AGENCY EVALUATION.—In making the determination under subparagraph (A), the housing credit agency shall consider—

"(i) the sources and uses of funds and the total financing planned for the project, and

"(ii) any proceeds or receipts expected to be generated by reason of tax benefits.

Such a determination shall not be construed to be a representation or warranty as to the feasibility or viability of the project.

"(C) APPLICATION TO BOND FINANCED PROJECTS.—Paragraph (4) shall not apply to any project unless the governmental unit which issued the bonds (or on behalf of which the bonds were issued) makes a determination under rules similar to the rules of subparagraphs (A) and (B)."

(q) STUDENTS IN GOVERNMENT-SUPPORTED JOB TRAINING PROGRAMS NOT TO DISQUALIFY UNIT.—Paragraph (3) of section 42(i), as amended by subsection (k), is further amended by adding at the end thereof the following new subparagraph:

"(E) STUDENTS IN GOVERNMENT-SUPPORTED JOB TRAINING PROGRAMS NOT TO DISQUALIFY UNIT.—A unit shall not fail to be treated as a low-income unit merely because it is occupied by an individual who is enrolled in a job training program receiving assistance under Federal or State law or who is otherwise receiving job training assistance under Federal or State law."

(r) CHANGES RELATING TO AT-RISK RULES.—

(1) APPLICATION OF AT-RISK RULES WHERE HISTORIC REHABILITATION CREDIT ALLOWED.—Paragraph (8) of section 46(c) (relating to certain nonrecourse financing excluded from credit base) is amended by adding at the end thereof the following new subparagraph:

"(G) SPECIAL RULES WHERE BOTH HISTORIC REHABILITATION CREDIT AND LOW-INCOME HOUSING CREDIT ALLOWED.—In the case of a building with respect to which—

"(i) credit is allowable by section 38 which is attributable to the rehabilitation percentage in subsection (b)(4)(A)(ii), and

"(ii) credit is allowable by section 38 which is determined under section 42 (relating to low-income housing credit),

the provisions of this paragraph, paragraph (9), and section 47(d)(1) shall be applied as modified by section 42(k)."

(2) APPLICATION OF AT-RISK RULES WITH RESPECT TO CERTAIN FINANCING PROVIDED BY QUALIFIED NONPROFIT ORGANIZATIONS.—Subparagraph (D) of section 42(k)(2) (relating to application of at-risk rules) is amended by adding at the end thereof the following new sentence:

"In the case of a qualified nonprofit organization which is not described in section 46(c)(8)(D)(iv)(II) with respect to a building, clause (ii) of this subparagraph shall be applied as if the date described therein were the 90th day after the earlier of the date the building ceases to be a qualified low-income building or the date which is 15 years after the close of a compliance period with respect thereto."

(s) CREDIT PERCENTAGES DETERMINED ON SEMIANNUAL BASIS.—Subparagraph (C) of section 42(b)(2) is amended—

(1) by inserting "for any month" after "subparagraph (B)" in the material preceding clause (i),

(2) by striking clause (ii) and inserting the following:

"(ii) by using a discount rate equal to 72 percent of the average of the annual Federal mid-term rates and the annual Federal long-term rates applicable under section 1274(d)(1) to months during the most recent semiannual period ending before such month and compounded annually, and", and

(3) by adding at the end thereof the following new sentence:

"For purposes of clause (ii), the term 'semiannual period' means the 6-month period ending June 30 and the 6-month period ending December 31."

(t) ACQUISITION OF PARTNERSHIP TREATED AS ACQUISITION OF BUILDING HELD BY PARTNERSHIP.—Subparagraph (D) of section 42(d)(2) is amended by adding at the end thereof the following new clause:

"(iv) ACQUISITION OF PARTNERSHIP TREATED AS ACQUISITION OF BUILDING HELD BY PARTNERSHIP.—

"(I) IN GENERAL.—If 90 percent or more of the capital and profits interests in a partnership are acquired by purchase (within the meaning of subparagraph (B)(i)) in a single transaction within a 12-month period, the assets of such partnership shall be treated for purposes of subparagraph (B)(i) as so acquired.

"(II) CONTINUING PARTNERS NOT ALLOWED CREDIT.—In a case to which subclause (I) applies, no credit shall be allowed by reason of this section to any person unless such person acquired his interest in the partnership by purchase (within the meaning of subparagraph (B)(i)) as part of or after the transaction referred to in subclause (I)."

(u) APPLICATION OF CREDIT TO ESTATES AND TRUSTS.—Subsection (i) of section 42 (relating to special rules) is amended by adding at the end thereof the following new paragraph:

"(6) APPLICATION TO ESTATES AND TRUSTS.—In the case of an estate or trust, the amount of the credit determined under subsection (a) and any credit recapture amount under subsection (j) shall be apportioned between the estate or trust and the beneficiaries on the basis of the income of the estate or trust allocable to each."

(v) ADMINISTRATIVE PROVISIONS.—

(1) CERTIFICATIONS WITH RESPECT TO 1ST YEAR OF CREDIT PERIOD MADE WITH INCOME TAX RETURNS.—Paragraph (1) of section 42(l) (relating to certification with respect to 1st year of credit period) is amended by striking so much of the text as precedes "the taxpayer shall" and inserting "Not later than the last day prescribed by law for filing the return of tax for the 1st taxable year in a credit period (including extensions) with respect to any qualified low-income building,".

(2) AUTHORITY TO PRESCRIBE PROCEDURES FOR HOUSING CREDIT AGENCIES TO CORRECT ERRORS.—Subsection (m) of section 42 (relating to regulations) is amended by striking "and" at the end of paragraph (2), by striking the period at the end of paragraph (3) and inserting ", and", and by adding at the end thereof the following new paragraph:

"(4) providing the opportunity for housing credit agencies to correct administrative errors and omissions with respect to allocations and record keeping within a reasonable period after their discovery, taking into account the availability of regulations and other administrative guidance from the Secretary."

(w) INCREASE IN CREDIT FOR BUILDINGS IN HIGH COST AREAS.—Paragraph (5) of section 42(d) is further amended by adding at the end thereof the following new subparagraph:

"(C) INCREASE IN CREDIT FOR BUILDINGS IN HIGH COST AREAS.—

"(i) IN GENERAL.—In the case of any building located in the portion of a qualified census tract or difficult development area which is designated for purposes of this subparagraph—

"(I) in the case of a new building, the eligible basis of such building shall be 130 percent of such basis determined without regard to this subparagraph, and

"(II) in the case of an existing building, the rehabilitation expenditures taken into account under subsection (e) shall be 130 percent of such expenditures determined without regard to this subparagraph.

"(ii) QUALIFIED CENSUS TRACT.—

"(I) IN GENERAL.—The term 'qualified census tract' means any area in which 50 percent or more of the families have an income which is less than 60 percent of the area median gross income.

"(II) LIMIT ON AREAS DESIGNATED.—The portion of a qualified census tract which may be designated for purposes of this subparagraph shall not exceed an area having 20 percent of the population of such tract.

"(III) DETERMINATION OF AREAS.—For purposes of this clause, each metropolitan statistical area shall be treated as a separate area and all nonmetropolitan areas in a State shall be treated as one area.

"(iii) DIFFICULT DEVELOPMENT AREAS.—

"(I) IN GENERAL.—The term 'difficult development areas' means any area designated by the Secretary of Housing and Urban Development as an area which has high construc-

tion, land, and utility costs relative to area median gross income.

"(II) LIMIT ON AREAS DESIGNATED.—Only 20 percent of the metropolitan statistical areas in the United States may be designated for purposes of this subparagraph and only 20 percent of nonmetropolitan areas in the United States may be so designated.

"(iv) SPECIAL RULES AND DEFINITIONS.—For purposes of this subparagraph—

"(I) population shall be determined on the basis of the most recent decennial census for which data are available,

"(II) area median gross income shall be determined in accordance with subsection (g)(4),

"(III) the term 'metropolitan statistical area' has the same meaning as when used in section 143(k)(2)(B), and

"(IV) the term 'nonmetropolitan area' means any county (or portion thereof) which is not within a metropolitan statistical area."

(x) ELIGIBLE BASIS OF BUILDING ACQUIRED IN CERTAIN FORECLOSURES.—

(1) IN GENERAL.—Subsection (d) of section 42 (relating to eligible basis) is amended by adding at the end thereof the following new paragraph:

"(8) ELIGIBLE BASIS OF BUILDING ACQUIRED IN CERTAIN FORECLOSURES.—The eligible basis of a building acquired as described in subsection (k)(3) shall be an amount equal to the lesser of—

"(A) the eligible basis calculated under this subsection without regard to this paragraph, or

"(B) the amount chargeable to capital account (before the close of the 1st taxable year of the credit period for such building) which is—

"(i) in connection with the actual construction and development of the building,

"(ii) of a character subject to the allowance for depreciation, and

"(iii) without regard to any—

"(I) basis adjustment resulting from a transaction in which a gain or loss is realized in connection with the building, or

"(II) section 754 basis adjustment in connection with such an acquisition or occurring thereafter."

(2) APPLICATION OF AT-RISK RULES TO BUILDING ACQUIRED IN CERTAIN FORECLOSURES.—Subsection (k) of section 42 (relating to application of at-risk rules) is amended by redesignating paragraphs (3) and (4) as paragraphs (4) and (5), respectively, and by inserting after paragraph (2) the following new paragraph:

"(3) SPECIAL RULES FOR DETERMINING QUALIFIED PERSON IN THE EVENT OF FORECLOSURE.—For purposes of paragraph (1)—

"(A) IN GENERAL.—If—

"(i) the requirements of subparagraph (B) are met with respect to financing provided by any person who acquired a building by foreclosure (or by instrument in lieu of foreclosure) of any purchase money-security interest held by such person,

"(ii) such building is resold by the person within 12 months after the date of foreclosure (or instrument in lieu of foreclosure), and

"(iii) the requirements of paragraph (2)(D) regarding repayment of principal and interest are met with respect to such financing, except that the phrase 'the date which is 10 years after the date of such financing' shall be substituted for clause (ii) of paragraph (2)(D),

then the determination of whether such financing is qualified commercial financing with respect to any qualified low-income building shall be made without regard to whether such person is a person described in section 46(c)(8)(D)(iv)(II).

"(B) PORTION OF BUILDING ATTRIBUTABLE TO FINANCING.—The requirements of this subparagraph are met with respect to any financing of a building for any taxable year in the compliance period if, as of the close of such taxable year, not more than the lesser of—

"(i) 60 percent of the eligible basis of the qualified low-income building, or

"(ii) the amount of the purchase money-security interest upon which the person described in subparagraph (A) foreclosed (or accepted an instrument in lieu of foreclosure),

is attributable to such financing (reduced by the principal and interest of any governmental financing which is part of a wrap-around mortgage involving such financing).

"(C) DETERMINATION OF ELIGIBLE BASIS.—The eligible basis of a building acquired as described in this paragraph shall be determined under subsection (d)(8)."

(3) PRESENT VALUE OF FINANCING.—Section 42(k)(4) (relating to present value of financing), as redesignated by paragraph (2), is amended—

(A) by inserting after the first sentence: "If the rate of interest on any financing described in paragraph (3) is less than the rate which is 1 percentage point above the applicable Federal rate as of the time such financing is incurred, then the qualified basis (to which such financing relates) of the qualified low-income building shall be the present value of the amount of such financing, using as the discount rate 1 percentage point above such applicable Federal rate."; and

(B) by striking "the preceding sentence" in the last sentence and inserting "this paragraph".

(y) CERTAIN PURCHASE OPTIONS DISREGARDED.—Subsection (i) of section 42 (relating to definitions and special rules) is further amended by adding at the end thereof the following new paragraph:

"(7) CERTAIN PURCHASE OPTIONS DISREGARDED.—For purposes of this title, the determination of whether any qualified low-income building is owned by the taxpayer shall be made without regard to any option by a qualified nonprofit organization (as defined in subsection (h)(5)(C)) to acquire such building at less than fair market value after the close of the compliance period if no financing with respect to such building is provided during such period by such organization (or a related person (as defined in subsection (d)(2)(D)(iii)) to such organization).".

(z) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall apply to determinations under section 42 of the Internal Revenue Code of 1986 with respect to housing credit dollar amounts allocated from State housing credit ceilings for calendar years after 1989.

(2) BUILDINGS NOT SUBJECT TO ALLOCATION LIMITS.—Except as otherwise provided in this subsection, to the extent paragraph (1) of section 42(h) of such Code does not apply to any building by reason of paragraph (4) thereof, the amendments made by this section shall apply to buildings placed in service after December 31, 1989.

(3) 1-YEAR CARRYOVER OF UNUSED CREDIT AUTHORITY.—The amendments made by subsection (b) shall apply to calendar years after 1989, but clauses (ii) and (iii) of section 42(h)(3)(C) of such Code (as added by this section) shall not apply to unused allocations for 1989 or any preceding year.

(4) ADDITIONAL BUILDINGS ELIGIBLE FOR WAIVER OF 10-YEAR RULE.—The amendments made by subsection (f) shall take effect on the date of the enactment of this Act.

(5) AMENDMENT TO PASSIVE LOSS RULES.—The amendment made by subsection (n) shall apply to any investment in a project after December 31, 1989, but only if the taxpayer's earliest substantial investment in such project is after such date.

(6) DETERMINATION OF CREDIT PERCENTAGE.—The amendment made by subsection (s) shall apply to months after December 1989.

(7) ACQUISITION OF PARTNERSHIP TREATED AS ACQUISITION OF BUILDING HELD BY PARTNERSHIP.—The amendment made by subsection (t) shall apply to acquisitions after December 31, 1989.

(8) CERTIFICATIONS WITH RESPECT TO 1ST YEAR OF CREDIT PERIOD.—The amendment made by subsection (v)(1) shall apply to taxable years ending on or after December 31, 1989.

(9) RULES RELATING TO PROPERTY ACQUIRED IN CERTAIN FORECLOSURES.—The amendments made by subsection (x) shall apply to property placed in service after the date of the enactment of this Act.

(10) CERTAIN RULES WHICH APPLY TO BONDS.—Paragraphs (8)(D) and (9)(C) of section 42(h) of such Code, as added by this section, shall apply to obligations issued December 31, 1989.

(11) CLARIFICATIONS.—The following amendments shall apply as if included in the amendments made by section 252 of the Tax Reform Act of 1986:

(A) Paragraph (1) and (2) of subsection (g) (relating to units rented on a monthly basis and special needs housing).

(B) Subsection (h) (relating to eligible basis for new buildings to include expenditures before close of 1st year of credit period).

(C) Subsection (l) (relating to allocation of credit among partners).

(D) Subsection (q) (relating to students in government-supported job training programs not to disqualify unit).

(E) Subsection (u) (relating to application of credit to estates and trusts).

(F) Subsection (v)(2) (relating to authority to prescribe procedures for housing credit agencies to correct errors).

(12) REGULATIONS ON DIFFICULT DEVELOPMENT AREAS.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Housing and Urban Development shall prescribe initial regulations on the designation of difficult development areas under section 42(d)(5)(C) of the Internal Revenue Code of 1986, as added by this section.

SUMMARY OF THE LOW-INCOME HOUSING TAX CREDIT ACT

EXTENSION OF CURRENT LAW

The low-income housing tax credit would be made permanent.

EXTENDED LOW-INCOME USE OF PROPERTY

Limitations on the ability of owners to transfer or convert property benefiting from the credit would be imposed to encourage the property to remain low income for a period longer than the 15 years required in current law. Tax credit property would be required to be in compliance with the targeting rules for a period of 15 years. Owners desiring to convert or transfer the property

for non low-income use after the 15 years compliance period would be required to give the state allocating agency 12 months to find a purchaser for the low income units at a price related to the original cost of the property with some adjustments.

The purchase price governing the property in a sale arranged by the allocating agency would be no less than an amount equal to outstanding debt plus "adjusted investor equity", plus additional capital contributions not supported by debt on the property made after the initial equity investment. This amount would be reduced by cash distributions available from the project. Adjusted investor equity would be the original equity invested in the project increased annually by the CPI, not to exceed 5 percent annually.

If the allocating agency is not able to locate a buyer within the 12 month period, the owner of the property may transfer or convert the property without use or purchase price restriction except that existing tenants cannot be evicted without cause under local housing laws. The extended use period would terminate in the event the property is taken in foreclosure or deed in lieu of foreclosure.

ALLOCATION PLANS AND SELECTION CRITERIA

Credit allocating agencies would be required to establish, publish and hold hearings on allocation plans setting forth the standards on which credit allocations will be made. Such allocation plans should include certain selection criteria the agency must take into account in awarding credit allocations. The intent of this change in law is to require states to establish a ranking system where credits are awarded, not on a first come first serve basis, but based on the housing needs and priorities of the state.

In the allocation plans, credit allocating agencies would be required to establish selection criteria for allocating credits among projects according to the housing priorities of the housing agency as are appropriate to local conditions. The selection criteria would be established within certain basic categories, including: project location, housing needs characteristics, project characteristics, sponsor characteristics, and tenant population with special needs housing. In addition, priority would be required to be given to projects which produce the most units per credit dollar, serve the lowest income tenants, and obligate to serving qualified tenants for the longest period.

PROJECT EVALUATION

Under current law, allocating agencies have the authority to provide a lesser credit amount than the maximum permitted. This authority is rarely being exercised currently although it is anticipated that agencies will modify their practices as demand for credits exceed supply.

The bill would encourage agencies to exercise their existing authority to provide a lower credit amount. The objective is to have allocating agencies utilize their limited credit resources in the most efficient manner by limiting the amount of credit for each project only to that amount which is necessary to make the project financially feasible and viable as a qualified low-income housing project throughout the compliance period. In determining feasibility and long-term viability the allocating agency will consider the sources and use of funds and the total financing contemplated for the project as well as the proceeds expected to be generated from the tax benefits. Each agency would be given considerable discretion in constructing its evaluation process.

RENT RESTRICTIONS

Median Income.—Under current law, as median income in an area falls, rents charged to tenants in targeted low income housing tax credit units would also fall. The bill provides that median income for purposes of determining rent levels and tenant qualification would not be reduced below the initial median income level when the property was placed in service.

Gross Rent.—Owners would be permitted to raise rents to 30 percent of actual income rather than 30 percent of qualifying income in certain circumstances. The amendment would apply to tenants in rent restricted units whose income rises above qualifying income in projects with an operating deficit where certain operating expenses are increasing at a faster rate than median incomes. The owner would have to obtain approval of the credit allocating agency before raising rents above 30 percent of qualifying income.

For this purpose, operating expenses would include taxes, utilities (including garbage collection), and insurance. An operating deficit would occur when the amount necessary for the operation of the project exceeds the rent receipts and other funds available to the project, including reserves.

Rent Determination.—For purposes of determining family size to establish rent limitations, in units with at least one bedroom, family size would be determined with reference to the number of bedrooms in the rent restricted unit rather than the actual size of the family. Those units with at least one bedroom would be considered to have the mean between one and two person per bedroom (1.5 family members per bedroom) for purposes of determining median family income.

State Median Income.—Qualifying tenant income would be the higher of state or area median income in the case of qualifying property. Such property would include federally-assisted housing requiring substantial rehabilitation, acquired through foreclosure by a Federal, state or local agency following at least 6 months of arrears on the mortgage.

TEN YEAR HOLDING PERIOD

Additional circumstances would be established that would permit the Treasury Department to waive provisions in current law denying the credit to property which has been placed in service within the prior ten year period.

First, a waiver would be possible for property in financial distress: (1) to facilitate the sale of a project whose mortgage is held by HUD; and (2) to facilitate the sale of a project which is owned by FmHA or is owned by HUD following its acquisition by HUD or the lender by foreclosure or deed-in-lieu of foreclosure.

Second, a waiver would be possible for federally-assisted low-income property (221(d)(3) and 236 mortgages) which HUD has determined, on the basis of market and marketability analyses: (1) is eligible to prepay its mortgage, and (2) could charge market rents and thus could repay. The waiver would be granted only to those owners who elect not to prepay their federal mortgage.

Third, a waiver would be possible for federally-assisted housing facing the threat of default to a State housing agency. Finally, a waiver would be possible for multifamily property in financial distress on which a mortgage originates from the federal government or is federally insured or guaranteed by which receives no federal assistance.

INVESTOR INCOME LIMITATIONS

If in individual's adjusted gross income is less than $200,000 in the year preceding the investment in low-income housing, the full credit will be available for the balance of the investment period.

HIGHER COST AREAS

Allocating agencies will be given discretion to provide a credit which is 130 percent of the credit amount otherwise permitted in two cases. First, in qualified census tracts" where fifty percent of the population has an income which is less than sixty percent of the metropolitan statistical area median income (or statewide nonmetro income). The designated census tracts within each area would not comprise more than 20 percent of the population in the area. Second, in "difficult development areas", comprising no more than 20 percent of the statistical areas nationwide, designated by HUD as an area which has high construction, land and utility costs relative to area median income.

CREDIT PENALTIES

The definition of "federally subsidized" buildings would be modified to only include buildings which, as a percent of aggregate basis and land, not including developer fees, are financed more than 75 percent with tax exempt or below market federal loans which are less than one half the AFR.

The tax exempt bond financing threshold for purposes of determining whether credit/bond property must receive a state allocation would be reduced from 70 percent to 50 percent.

CREDIT ALLOCATIONS

Projects qualifying for tax exempt bond financing must receive allocations from the state allocating agency. Credits allocated to bond projects using the 30 percent present value credit would not come out of the state credit cap. Bond projects using more than a 30 percent present value credit would be allocated from the state credit cap to the extent of the value of the credits in excess of 30 percent of the present value.

ACQUISITION CREDIT

Acquisition would not be creditable unless they involve substantial rehabilitation. The definition of substantial rehabilitation would be raised from $2,000 to $3,000.

USES OF CREDIT

The bill would facilitate use of low-income housing tax credits and multifamily bonds to build single room occupancy (SRO) facilities and special needs housing. Facilities would not be disqualified solely because tenants in the property are provided supportive services. Gross rent would not include fees assessed for mandatory supportive services when the fee is paid by a government program or otherwise regulated by a government agency for reasonableness. An eligible SRO may have as short as month to month occupancy.

The prohibition against credits for units in buildings of less than four units where one unit is occupied by the owner of the other units would be modified to permit use of the low-income housing credit where such property is purchased or rehabilitated under a development plan of action sponsored by a state or local government or nonprofit organization.

PLACED IN SERVICE RULES

All expenses properly charged to the capital account of the project incurred within the first year of the credit period should be included in the creditable basis.

STATE CARRYOVER OF UNUSED CREDITS

A state would be allowed to carryover the credits it does not allocate in one year to the next year. Carryover credits are used after current year credits. The nonprofit percentage allocation would also carryover. If after the carryover, the credit is still not used by the state, the credits would go into a national pool allocated to states with excess credit demand in relation to population.

PARTNERSHIP ALLOCATIONS

For purposes of the regulations under Section 704(b), the allocation of the credit will be considered to have substantial economic effect if allocated on the basis of the partner's share of a substantial partnership item.

CONTINUOUS COMPLIANCE FOR INCOME LIMITS

The existing rent skewing rules for both the tax credit and bond programs would be applied where market rate rents are 200% instead of 300% of the low income rents. The rules would also reflect that state and local, as well as Federal Section 8, assistance would not be taken into account for determining the low income rent.

PROJECT AND BUILDING ISSUES

Scattered Site.—Section 42 would be amended to provide that scattered site housing with a common scheme of financing and ownership may be treated as a project for purposes of allocating the credit and complying with the targeting rules as long as the project is 100 percent low income.

Compliance with Targeting Rules.—Multi-building developments which qualify as a project (common scheme of financing and ownership) are eligible to receive an allocation on a project basis. The amount of the credit per building would not be fixed until buildings are placed in service. Compliance with the set aside rules would be satisfied on a project basis. Therefore, as long as the next available unit in the project is rented to a low income tenant so that the project overall meets the targeting requirements, there would be no credit recapture on buildings falling below the original targeting, nor additional credit on buildings exceeding the original targeting. If an owner elects to be treated as a project, the unit comparability rules would be determined on a project basis.

STUDENTS

Current law would be clarified to provide that tenants enrolled in qualifying, federal or state supported job training programs would not be considered students.

AT-RISK RULES

The at-risk rules for purposes of the historic rehabilitation credit will be the same as the at-risk rules for purposes of the low-income credit when such project utilizes both credits.

Financing provided by a qualified nonprofit organization in the case of buildings not acquired from the nonprofit organization would be repayable at the end of the extended use period.

CREDIT PERCENTAGE

The tax credit rate should be established semi-annually rather than monthly.

NONPROFIT RULES

The bill would permit qualified nonprofit organizations to enter into an option agreement to acquire credit property at less than fair market value at the end of the compliance period.

Current law would be clarified to permit apportionment of the credit between an estate or trust and the beneficiaries.

PURCHASE OF PARTNERSHIP INTERESTS

Transfer of at least 90 percent of the capital and profits interests in a partnership in a single transaction within a twelve month period would qualify as a transfer of the building.

Mr. SASSER. Mr. President, I rise to express my strong support and cosponsorship of the bill introduced today by the distinguished majority leader and the distinguished Senator from Missouri to make the low-income housing tax credit permanent. I know that this legislation is the product of a painstaking and exhaustive study on the part of these two Senators and I thank them for their devotion to the cause of low-income housing. This issue is one in need of champions and I'm pleased that it is now in the spotlight.

I don't need to remind my colleagues that our Nation is facing a housing crisis. The numbers of homeless, especially homeless children, have reached record proportions and our supply of decent public housing is dwindling. Moreover, rising costs and interest rates have pushed homeownership out of the reach of many of our young people.

In housing today, the participation of the private sector is more important than ever before. The low-income housing tax credit is an excellent incentive for private developers to build projects that provide affordable housing to low-income individuals.

The Low-Income Housing Tax Credit Act that we have before us now represents a significant departure from the approach that we have taken to this tax credit in the past. It is a long-term approach. By adding new low-income use restrictions, projects benefiting from the tax credit will remain available to low-income individuals for up to 30 years. Importantly, low-income tenants that are presently living in units that are converted to a non-low-income use would be allowed to remain and could not be evicted without cause.

This bill retains the tight targeting requirements that ensure that truly needy individuals are the beneficiaries. Only families with less than 60 percent of median income will be allowed to participate. Further, families cannot be charged rents in excess of 30 percent of their income. This compares to the current trend where almost two-thirds of low-income individuals are paying more than half of their income for rent.

I have long supported the low-income housing tax credit. It helps guarantee that a steady supply of new housing will remain available to our poor. While this tax credit cannot be expected to eliminate all of our housing shortages, it is a key element in encouraging the private sector to build multi-family housing for lower income families. Moreover, I assume that the fiscal impact of the credit will not be significant; indeed, I assume it to be revenue neutral.

I urge the support of all of my colleagues for this important legislation.

I yield the floor.

Mr. DANFORTH. Mr. President, today Senator MITCHELL and I are introducing a bill to extend permanently and modify the low-income housing tax credit. The low-income housing tax credit, the only remaining tax incentive for the production of low-income housing, expires at the end of this year.

The low-income housing tax credit was established in the 1986 Tax Reform Act to encourage investment in areas and projects that Congress considered desirable, but unlikely to attract capital on their own because of their high risk, high cost, and low projected rate of return. Mr. President, this type of investment is crucial to our Nation's poor who need affordable places to live.

Our country is in the midst of a vast and growing housing affordability and availability crisis. Clearly, most Americans are better housed today than at any time in our history. However, a significant number of people are struggling against a growing gap between available income and the cost of decent housing. Homelessness is the most tragic and visible indicator of the low-income housing crisis. As many as 700,000 people were homeless on a given night in 1988. Considerably more could experience homelessness in the course of a year. National estimates range from 350,000, from a report by the Department of Housing and Urban Development, to more than 3 million, according to the National Coalition for the Homeless. In Missouri, an estimated 40,000 people seek emergency shelter, live in cars, or live on the street during a 1-year period.

These housing problems point out the need for an optimum Low-Income Housing Tax Credit Program. The credit is the primary tax incentive for stimulating low-income housing production and rehabilitation. Unfortunately, because of the complexity and inaccessibility of the credit, it has been unable to produce a meaningful amount of affordable housing. Due in part to the Tax Reform Act, multi-family housing has dropped considerably since 1985. In fact, 1987 was the first year since the recession of 1982 that multi-family housing starts dropped below 500,000 units.

Despite the complexity of the credit, its use has grown over the last year from 19 percent of the allocation available in 1987 to approximately 70 percent of that available in 1988. In Missouri, 129 projects are being developed in eight of the State's nine congressional districts. Senator MITCHELL and I would like to see complete utilization of the credit allocation, as well as a

higher level of efficiency in its use to produce affordable housing.

For these reasons, Senator MITCHELL and I are introducing legislation to improve the low-income housing credit. This legislation will extend the duration of low-income use of these projects, define the types of projects eligible for the credit, affect the application of the credit to a project, and improve the overall efficiency of the program either in its administration or in the development and management of the credit financed project.

These modifications to the low-income housing tax credit are primarily based on the recommendations made by the Mitchell-Danforth Task Force on the Low-Income Housing Tax Credit. Senator MITCHELL and I organized this task force last year. Members of the task force were 13 individuals representing all segments of the low-income housing industry, including state agency credit allocators, urban and rural developers, nonprofit organizations, credit syndicators, academic experts, and tenant representatives. This task force produced a series of recommendations to improve the efficiency and effectiveness of the tax credit program, many of which we have included in this legislation.

Mr. CHAFEE. Mr. President, today I am pleased to join in introducing legislation that will help fill the housing needs of low-income Americans. Our proposal would improve the structure of the low-income housing tax credit and make it permanent.

We created the low-income housing tax credit as part of the Tax Reform Act of 1986 to encourage construction and rehabilitation of housing for low-income Americans. The credit provides a valuable tax incentive to nonprofit and for-profit developers to fund the production of low-income rental housing. But, unless we act to extend the program, the tax credit will expire on December 31, 1989.

Extension of the tax credit is one of the chief provisions of the National Affordable Housing Act of 1989, of which I am a cosponsor. The Affordable Housing Act is comprehensive legislation that addresses the overall problem of the dearth of affordable housing. It is an innovative approach to this country's housing crisis and has many excellent provisions, but none is more direct than providing permanent authority for the low-income housing tax credit.

In my State, Rhode Island housing is using the tax credits to address the critical need for low-income housing, and the loss of these credits would be a very tough blow to their efforts. Rhode Island combines equity raised through the sale of tax credits with bond financing and zero interest second mortgages to produce low-income housing in one of this country's most expensive housing markets. Our State was also one of only nine States to use 100 percent of its 1988 credit allocation. In addition, current demand for the 1989 credit allocation far exceeds available supply.

In 1988, four Rhode Island nonprofit developers received tax credit financing for the production of a total of 261 units of low-income rental housing. According to the National Council of State Housing Agencies, Rhode Island allocated a higher percentage of 1988 low-income housing tax credits to nonprofit housing developers than any State in the country. In 1988, 89.5 percent of Rhode Island's $1,232,500 tax credit supply went to nonprofit developers.

Rhode Island housing is projecting that tax credits will help produce over 200 additional low-income housing units within the State during 1989. Without this valuable resource, none of these units would be under construction today.

Providing the necessary housing supply for the poor is a long-term job, for both State housing agencies and developers. The State housing agencies that assist with these programs must invest a considerable amount of time and resources in the development of the necessary administrative capacity to operate the program. In addition, private housing developers must have considerable lead time for the projects. If they are to make the required investments in time and resources, these necessary participants in the program need to know that it will be extended past 1989.

Our proposal preserves the basic structure of the credit by tightly targeting the program to provide housing for families whose income is less than 60 percent of median income for the State. In addition, a family's monthly rental cost for a unit in a low-income housing project must not exceed 30 percent of their monthly income.

This bill includes one of the main proposals advanced in last year's Rouse-Maxwell report and in the recommendations of the recent Mitchell-Danforth Task Force on the low-income housing tax credit: The indefinite extension of the Low-Income Housing Tax Credit Program. In addition, the Mitchell-Danforth Task Force produced a series of recommendations to improve the efficiency and effectiveness of the tax credit program. All of these recommendations for improving the operation of the credit have been included in this legislation.

One of the most important provisions in the bill for the issue of continued availability of low-income housing would encourage longer term low-income use of a project. This is accomplished by establishment of a three step process for conversion of the property to other than low-income use.

Experience has shown that investment in low-income housing is highly dependent on the tax benefits provided by this credit. The low-income housing tax credit is one of the most direct and efficient ways to subsidize the production of low-cost, affordable housing for low-income Americans. I would urge my colleagues to give this bill their full support.

ADDITIONAL COSPONSORS

S. 6

At the request of Mr. MCCAIN, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 6, a bill to grant the power to the President to reduce appropriated funds within 10 days after the date of enactment of a bill appropriating such funds.

S. 82

At the request of Mr. THURMOND, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 82, a bill to recognize the organization known as the 82d Airborne Division Association, Inc.

S. 122

At the request of Mr. INOUYE, the name of the Senator from South Dakota [Mr. DASCHLE] was added as a cosponsor of S. 122, a bill to amend title XVIII of the Social Security Act to provide coverage for social worker services furnished at rural health clinics.

S. 273

At the request of Mr. HEINZ, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 273, a bill to amend title 39, United States Code, to designate as nonmailable matter solicitations of donations which could reasonably be misconstrued as a bill, invoice, or statement of account due, solicitations for the purchase of products or services which are provided either free of charge or at a lower price by the Federal Government connection or endorsement, unless such matter contains an appropriate, conspicuous disclaimer, and for other purposes.

S. 306

At the request of Mr. BENTSEN, the names of the Senator from Kentucky [Mr. FORD], the Senator from Florida [Mr. GRAHAM], the Senator from Nebraska [Mr. KERREY], the Senator from New Hampshire [Mr. HUMPHREY], and the Senator from Indiana [Mr. LUGAR] were added as cosponsors of S. 306, a bill to amend the Social Security Act to make certain modifications in the Medicare Program with respect to payments made under such program to hospitals located in rural areas, to improve the delivery of health services to individuals residing in such areas, and for other purposes.

S. 355

At the request of Mr. RIEGLE, the names of the Senator from South Carolina [Mr. THURMOND], the Senator from New Hampshire [Mr. RUDMAN], and the Senator from Montana [Mr. BAUCUS] were added as cosponsors of S. 355, a bill to amend the Internal Revenue Code of 1986 to extend through 1992 the period during which qualified mortgage bonds and mortgage credit certificates may be issued.

S. 370

At the request of Mr. CHAFEE, the name of the Senator from Oregon [Mr. PACKWOOD] was added as a cosponsor of S. 370, a bill to amend the Land and Water Conservation Fund Act and the National Historic Preservation Act, to establish the American Heritage Trust, for purposes of enhancing the protection of the Nation's natural, historical, cultural, and outdoor recreational heritage, and for other purposes.

S. 375

At the request of Mr. HOLLINGS, the name of the Senator from Colorado [Mr. ARMSTRONG] was added as a cosponsor of S. 375, a bill to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes.

S. 416

At the request of Mr. DOMENICI, the name of the Senator from Nevada [Mr. REID] was added as a cosponsor of S. 416, a bill to provide that all Federal civilian and military retirees shall receive the full cost of living adjustment in annuities payable under Federal retirement systems for fiscal years 1990 and 1991, and for other purposes.

S. 430

At the request of Mr. DASCHLE, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of S. 430, a bill to amend title XIX of the Social Security Act to provide coverage for certain outreach activities undertaken at the option of a State for the purpose of identifying pregnant women and children who are eligible for medical assistance and assisting them in applying for and receiving such assistance, and for other purposes.

S. 461

At the request of Mr. GRASSLEY, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 461, a bill to amend title XVIII of the Social Security Act to permit payment for services of physician assistants outside institutional settings.

S. 519

At the request of Mr. LAUTENBERG, the names of the Senator from Minnesota [Mr. BOSCHWITZ] and the Senator from Colorado [Mr. WIRTH] were added as cosponsors of S. 519, a bill to prohibit smoking on any scheduled airline flight in intrastate, interstate, or overseas air transportation.

S. 543

At the request of Mr. SIMON, the name of the Senator from New Jersey [Mr. LAUTENBERG] was added as a cosponsor of S. 543, a bill to amend the Job Training Partnership Act to strengthen the program of employment and training assistance under that act, and for other purposes.

S. 585

At the request of Mr. LAUTENBERG, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 585, a bill to implement the national objective of pollution prevention by establishing a source reduction program at the Environmental Protection Agency, by assisting States in providing information and technical assistance regarding source reduction, and for other purposes.

S. 643

At the request of Mr. CONRAD, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of S. 643, a bill to amend the Internal Revenue Code of 1986 to allow an individual a credit against income tax for certain expenditures for the purpose of reducing radon levels in the principal residence of the individual, and for other purposes.

S. 662

At the request of Mr. SYMMS, the name of the Senator from Idaho [Mr. MCCLURE] was added as a cosponsor of S. 662, a bill to amend the Internal Revenue Code of 1986 to increase and index the calendar quarter wage threshold for determining agricultural labor employers for purposes of imposing the Federal unemployment tax.

S. 663

At the request of Mr. HEFLIN, the name of the Senator from Mississippi [Mr. LOTT], the Senator from Mississippi [Mr. COCHRAN], and the Senator from Tennessee [Mr. GORE] were added as cosponsors of S. 663, a bill to provide for additional contingent termination liability for the Advanced Solid Rocket Motor Program.

S. 685

At the request of Mr. METZENBAUM, the names of the Senator from California [Mr. CRANSTON], the Senator from Hawaii [Mr. INOUYE], and the Senator from Maryland [Mr. SARBANES] were added as cosponsors of S. 685, a bill to amend title I of the Employee Retirement Income Security Act of 1974 to clarify the applicability of rules relating to fiduciary duties in relation to plan assets of terminated pensions plans and to provide for an explicit exception to such rules for employer reversions meeting certain requirements.

S. 714

At the request of Mr. MCCLURE, the names of the Senator from Alaska [Mr. STEVENS] and the Senator from Virginia [Mr. WARNER] were added as cosponsors of S. 714, a bill to extend the authorization of the Water Resources Research Act of 1984 through the end of fiscal year 1993.

S. 734

At the request of Mr. REID, the name of the Senator from North Carolina [Mr. HELMS] was added as a cosponsor of S. 734, a bill to authorize and direct the General Accounting Office to audit the Federal Reserve Board, the Federal Advisory Council, the Federal Open Market Committee, and Federal banks and their branches.

S. 783

At the request of Mr. JOHNSTON, the name of the Senator from Mississippi [Mr. COCHRAN] was added as a cosponsor of S. 783, a bill to amend the Natural Gas Policy Act of 1978 to eliminate wellhead price and nonprice controls on the first sale of natural gas, and to make technical and conforming amendments to such act.

S. 857

At the request of Mr. GLENN, the name of the Senator from Nebraska [Mr. EXON] was added as a cosponsor of S. 857, a bill to amend title 10, United States Code, to reduce the premium paid by retired members of the uniformed services for coverage for their survivors under the Survivor Benefit Plan and to provide a new Supplemental Survivor Benefit Plan to offset the effect of the two-tier annuity computation under the Survivor Benefit Plan for spouse and former spouse beneficiaries.

S. 877

At the request of Mr. DECONCINI, the names of the Senator from North Dakota [Mr. CONRAD] and the Senator from Illinois [Mr. SIMON] were added as cosponsors of S. 877, a bill to require the posting on certain aircraft of information relating to the date of manufacture of the aircraft, and for other purposes.

S. 893

At the request of Mr. LAUTENBERG, the name of the Senator from Indiana [Mr. LUGAR] was added as a cosponsor of S. 893, a bill to establish certain categories of Soviet and Vietnamese nationals presumed to be subject to persecution and to provide for adjustment to refugee status of certain Soviet and Vietnamese parolees.

S. 948

At the request of Mr. HATFIELD, the name of the Senator from Montana [Mr. BAUCUS] was added as a cosponsor of S. 948, a bill to amend title 28, United States Code, to divide the ninth judicial circuit of the United States into two circuits, and for other purposes.

SENATE JOINT RESOLUTION 10

At the request of Mr. THURMOND, the name of the Senator from Nebraska [Mr. KERREY] was added as a cospon-

sor of Senate Joint Resolution 10, a joint resolution to designate the month of May 1989 as "National Foster Care Month."

SENATE JOINT RESOLUTION 55

At the request of Mr. SIMON, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of Senate Joint Resolution 55, a joint resolution to designate the week of October 1, 1989, through October 7, 1989, as "Mental Illness Awareness Week."

SENATE JOINT RESOLUTION 71

At the request of Mr. HELMS, the names of the Senator from Georgia [Mr. FOWLER] and the Senator from Illinois [Mr. SIMON] were added as cosponsors of Senate Joint Resolution 71, a joint resolution designating April 16 through 22, 1989, as "National Ceramic Tile Industry Recognition Week."

SENATE JOINT RESOLUTION 72

At the request of Mr. RIEGLE, the names of the Senator from Illinois [Mr. SIMON] and the Senator from Kansas [Mrs. KASSEBAUM] were added as cosponsors of Senate Joint Resolution 72, a joint resolution to designate the period commencing May 7, 1989, and ending May 13, 1989, as "National Correctional Officers Week."

SENATE JOINT RESOLUTION 76

At the request of Mr. HELMS, the names of the Senator from Georgia [Mr. NUNN] and the Senator from Utah [Mr. GARN] were added as cosponsors of Senate Joint Resolution 76, a joint resolution to designate the period commencing on June 21, 1989, and ending on June 28, 1989, as "Food Science and Technology Week."

SENATE JOINT RESOLUTION 78

At the request of Mr. BENTSEN, the names of the Senator from New Jersey [Mr. BRADLEY], the Senator from Ohio [Mr. METZENBAUM], the Senator from Georgia [Mr. NUNN], the Senator from Virginia [Mr. ROBB], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Iowa [Mr. GRASSLEY], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Wyoming [Mr. SIMPSON], the Senator from Kentucky [Mr. FORD], and the Senator from Virginia [Mr. WARNER] were added as cosponsors of Senate Joint Resolution 78, a joint resolution to designate the month of November 1989 and 1990 as "National Hospice Month."

SENATE JOINT RESOLUTION 85

At the request of Mr. ARMSTRONG, the names of the Senator from Hawaii [Mr. INOUYE], the Senator from Illinois [Mr. DIXON], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Oklahoma [Mr. BOREN], the Senator from Virginia [Mr. WARNER], the Senator from Utah [Mr. HATCH], the Senator from Ohio [Mr. METZENBAUM], the Senator from Tennessee [Mr. GORE], the Senator from Montana [Mr. BURNS], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Kansas [Mr. DOLE], the Senator from New Mexico [Mr. DOMENICI], the Senator from North Dakota [Mr. CONRAD], the Senator from Indiana [Mr. LUGAR], the Senator from Indiana [Mr. COATS], the Senator from Arizona [Mr. DECONCINI], the Senator from Delaware [Mr. ROTH], the Senator from South Dakota [Mr. DASCHLE], the Senator from Alabama [Mr. SHELBY], the Senator from Nebraska [Mr. EXON], the Senator from Nevada [Mr. REID], the Senator from Maryland [Mr. SARBANES], the Senator from Minnesota [Mr. BOSCHWITZ], and the Senator from Mississippi [Mr. COCHRAN], were added as cosponsors of Senate Joint Resolution 85, a joint resolution to designate the week of July 24-30, 1989, as the "National Week of Recognition and Remembrance for Those Who Served in the Korean War."

SENATE JOINT RESOLUTION 86

At the request of Mr. RIEGLE, the names of the Senator from Nebraska [Mr. EXON], the Senator from Missouri [Mr. BOND], and the Senator from Illinois [Mr. SIMON] were added as cosponsors of Senate Joint Resolution 86, a joint resolution designating November 17, 1989, as "National Philanthropy Day."

SENATE JOINT RESOLUTION 110

At the request of Mr. SIMON, the name of the Senator from Rhode Island [Mr. CHAFEE] was added as a cosponsor of Senate Joint Resolution 110, a joint resolution designating October 5, 1989, as "Raoul Wallenberg Day."

SENATE JOINT RESOLUTION 112

At the request of Mr. GRASSLEY, the names of the Senator from Arizona [Mr. DECONCINI], the Senator from Maine [Mr. COHEN], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Kentucky [Mr. FORD], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Ohio [Mr. GLENN], the Senator from Indiana [Mr. COATS], the Senator from North Carolina [Mr. SANFORD], the Senator from Connecticut [Mr. LIEBERMAN], the Senator from Texas [Mr. GRAMM], the Senator from Oklahoma [Mr. NICKLES], the Senator from Oklahoma [Mr. BOREN], the Senator from Mississippi [Mr. COCHRAN], the Senator from North Dakota [Mr. CONRAD], the Senator from New York [Mr. D'AMATO], the Senator from New York [Mr. MOYNIHAN], and the Senator from Florida [Mr. MACK] were added as cosponsors of Senate Joint Resolution 112, a joint resolution designating May 29, 1989, as the "National Day of Remembrance for the victims of the U.S.S. *Iowa*."

SENATE JOINT RESOLUTION 113

At the request of Mr. DIXON, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of Senate Joint Resolution 113, a joint resolution prohibiting the export of technology, defense articles, and defense services to codevelop or coproduce the FSX aircraft with Japan.

SENATE CONCURRENT RESOLUTION 9

At the request of Mr. HUMPHREY, the names of the Senator from Oklahoma [Mr. BOREN], the Senator from Mississippi [Mr. LOTT], and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of Senate Concurrent Resolution 9, a concurrent resolution establishing procedures for expedited consideration by the Congress of certain bills and joint resolutions submitted by the President.

SENATE CONCURRENT RESOLUTION 21

At the request of Mr. RIEGLE, the name of the Senator from North Dakota [Mr. CONRAD] was added as a cosponsor of Senate Concurrent Resolution 21, a concurrent resolution expressing the sense of the Congress that the current Federal income tax deduction for interest paid on debt secured by a first or second home should not be further restricted.

SENATE RESOLUTION 99

At the request of Mr. BOSCHWITZ, the names of the Senator from New Jersey [Mr. BRADLEY], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Connecticut [Mr. DODD], and the Senator from Florida [Mr. GRAHAM] were added as cosponsors of Senate Resolution 99, a resolution requiring the Architect of the Capitol to establish and implement a voluntary program for recycling paper disposed of in the operation of the Senate.

AMENDMENT NO. 100

At the request of Mr. JOHNSTON, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of amendment No. 100 intended to be proposed to S. 406, a bill to authorize competitive oil and gas leasing and development on the Coastal Plain of the Arctic National Wildlife Refuge in a manner consistent with protection of the environment, and for other purposes.

SENATE RESOLUTION 127—PROVIDING FOR THE ISSUANCE OF A SUMMONS AND FOR RELATED PROCEDURES CONCERNING IMPEACHMENT AGAINST WALTER L. NIXON, JR.

Mr. MITCHELL (for himself and Mr. DOLE) submitted the following resolution; which was considered and agreed to:

S. RES. 127

Resolved, That a summons shall be issued which commands Walter L. Nixon, Jr., to file with the Secretary of the Senate an answer to the articles of impeachment no

later than May 31, 1989, and thereafter to abide by, obey, and perform such orders, directions, and judgments as the Senate shall make in the premises, according to the Constitution and laws of the United States.

SEC. 2. The Sergeant at Arms is authorized to utilize the services of the Deputy Sergeant at Arms or another employee of the Senate in serving the summons.

SEC. 3. The Secretary shall notify the House of Representatives of the filing of the answer and shall provide a copy of the answer to the House.

SEC. 4. The Managers on the part of the House may file with the Secretary of the Senate a replication no later than June 12, 1989.

SEC. 5. The Secretary shall notify counsel for Walter L. Nixon, Jr., of the filing of a replication, and shall provide counsel with a copy.

SEC. 6. The Secretary shall provide the answer and the replication, if any, to the Presiding Officer of the Senate on the first day the Senate is in session after the Secretary receives them, and the Presiding Officer shall cause the answer and replication, if any, to be printed in the Senate Journal and in the Congressional Record. If a timely answer has not been filed the Presiding Officer shall cause a plea of not guilty to be entered.

SEC. 7. The articles of impeachment, the answer, and the replication, if any, together with the provisions of the Constitution on impeachment, and the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials, shall be printed under the direction of the Secretary as a Senate document.

SEC. 8. The provisions of this resolution shall govern notwithstanding any provisions to the contrary in the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials.

SEC. 9. The Secretary shall notify the House of Representatives of this resolution.

SENATE RESOLUTION 128—PROVIDING FOR THE APPOINTMENT OF A COMMITTEE TO RECEIVE AND REPORT EVIDENCE WITH RESPECT TO THE ARTICLES OF IMPEACHMENT AGAINST JUDGE WALTER L. NIXON, JR.

Mr. MITCHELL (for himself and Mr. DOLE) submitted the following resolution; which was considered and agreed to:

S. RES. 128

Resolved, That pursuant to Rule XI of the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials, the Presiding Officer shall appoint a committee of twelve senators to perform the duties and to exercise the powers provided for in the rule.

SEC. 2. The Majority and Minority Leader shall each recommend six members to the Presiding Officer for appointment to the committee. The committee shall designate one of its members to be chairman and one of its members to be vice chairman.

SEC. 3. The committee shall be deemed to be a standing committee of the Senate for the purpose of reporting to the Senate resolutions for the criminal or civil enforcement of the committee's subpoenas or orders, and for the purpose of printing reports, hearings, and other documents for submission to the Senate under Rule XI.

SEC. 4. During proceedings conducted under Rule XI the chairman of the committee is authorized to waive the requirement under the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials that questions by a Senator to a witness, a manager, or counsel shall be reduced to writing and put by the presiding officer.

SEC. 5. In addition to a certified copy of the transcript of the proceedings and testimony had and given before it, the committee is authorized to report to the Senate a statement of facts that are uncontested and a summary, with appropriate references to the record, of evidence that the parties have introduced on contested issues of fact.

SEC. 6. The actual and necessary expenses of the committee, including the employment of staff at an annual rate of pay, and the employment of consultants with prior approval of the committee on Rules and Administration at a rate not to exceed the maximum daily rate for a standing committee of the Senate, shall be paid from the contingent fund of the Senate from the appropriation account "Miscellaneous Items" upon vouchers approved by the chairman of the committee, except that no voucher shall be required to pay the salary of any employee who is compensated at an annual rate of pay.

SEC. 7. The Secretary shall notify the House of Representatives and counsel for Judge Walter L. Nixon, Jr., of this resolution.

NOTICES OF HEARINGS

SUBCOMMITTEE ON WATER AND POWER

Mr. BRADLEY. Mr. President, I would like to announce for the public that a hearing has been scheduled before the Subcommittee on Water and Power of the Senate Committee on Energy and Natural Resources.

The hearing will take place on May 18, 1989, beginning at 2 p.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

The purpose of the hearing is to receive testimony on S. 635, a bill to prevent the unintended licensing of federally nonjurisdictional pre-1935 unlicensed hydroelectric projects.

Those wishing to submit written testimony should address it to the Committee on Energy and Natural Resources, room 364, Dirksen Senate Office Building, Washington, DC 20510.

For further information, please contact William B. Conway, Jr., senior counsel for the subcommittee at (202) 224-7149.

COMMITTEE ON VETERANS' AFFAIRS

Mr. CRANSTON. Mr. President, I announce, for the information of Senators, that the Committee on Veterans' Affairs, which I am privileged to chair, is scheduled to hold a hearing Monday, May 15, 1989, in SR-418 at 1:30 p.m. on the nomination of Frank Q. Nebeker to be Chief Judge of the United States Court of Veterans Appeals.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BUMPERS. Mr. President, I would like to announce for the public that a hearing has been scheduled before the Subcommittee on Public Lands, National Parks and Forests of the Committee on Energy and Natural Resources.

The hearing will take place on June 8, 1989, beginning at 9:30 a.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

The purpose of the hearing is to receive testimony on three bills currently pending before the subcommittee. The measures are:

S. 555, a bill to establish in the Department of the Interior the De Soto Expedition Trail Commission, and for other purposes;

S. 624, a bill to provide for the sale of certain Federal lands to Clark County, NV, for national defense and other purposes; and

S. 830, a bill to amend Public Law 99-647, establishing the Blackstone River Valley National Heritage Corridor Commission, to authorize the Commission to take immediate action in furtherance of its purposes and to increase the authorization of appropriations for the Commission.

Because of the limited time available for the hearing, witnesses may testify by invitation only. However, anyone wishing to submit written testimony to be included in the hearing record is welcome to do so. Those wishing to submit written testimony should send two copies to the Subcommittee on Public Lands, National Parks and Forests, SD-364, Washington, DC 20510.

For further information regarding the hearing, please contact Tom Williams of the committee staff at (202) 224-7145.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BINGAMAN. Mr. President, I would like to announce for the public that a field hearing has been scheduled before the Subcommittee on Mineral Resources Development and Production.

The hearing will take place Thursday, May 25, 1989, at the University of New Mexico Continuing Education Conference Center, 1634 University Boulevard NE., Albuquerque, NM. The hearing will begin at 8:30 a.m.

The purpose of the hearing is to receive testimony on the availability, production, and distribution of clean-burning fuels.

Those wishing to submit written testimony should address it to the Subcommittee on Mineral Resources Development and Production, room 364 Dirksen Senate Office Building, Washington, DC 20510.

For further information, please contact Patricia Beneke of the committee staff at (202) 224-2383.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON EMPLOYMENT AND PRODUCTIVITY

Mr. PELL. Mr. President, I ask unanimous consent that the Subcommittee on Employment and Productivity, of the Committee on Labor and Human Resources, be authorized to meet during the session of the Senate on Thursday, May 11, 1989, at 10 a.m. to conduct a hearing on JTPA Youth Employment Amendments of 1989, S. 543.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. PELL. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday May 11, 1989, at 2 p.m. to hold a closed hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. PELL. Mr. President, I ask that the Select Committee on Indian Affairs be authorized to meet on May 11, 1989, beginning at 2:30 p.m., in 485 Russell Senate Office Building, on S. 321, amendments to the Buy Indian Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON MANPOWER AND PERSONNEL

Mr. PELL. Mr. President, I ask unanimous consent that the Subcommittee on Manpower and Personnel of the Committee on Armed Services be authorized to meet on Thursday, May 11, 1989, at 2 p.m. in open session to receive testimony on manpower programs in the amended Defense authorization request for fiscal years 1990 and 1991.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL COMMITTEE ON INVESTIGATIONS

Mr. PELL. Mr. President, I ask unanimous consent that the Special Committee on Investigations of the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on May 11, 1989, at 10 a.m. to hold hearings pursuant to Senate Resolution 66, section 21, agreed to February 28, 1989.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. PELL. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on May 11, 1989, 9 a.m., to hold a hearing on the nominations of Carol Crawford to be Assistant Attorney General, Shirley Peterson to be Assistant Attorney General, and Ferdinand Fernandez to be U.S. circuit judge for the Ninth Circuit.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY REGULATION AND DEVELOPMENT

Mr. PELL. Mr. President, I ask unanimous consent that the Subcommittee on Energy Regulation and Development of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate 2 p.m., May 11, 1989, for a hearing to continue hearings on S. 83, uranium enrichment legislation, and proposed Senate amendment No. 10, to provide for uranium revitalization and tailings reclamation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. PELL. Mr. President, I ask unanimous consent that the full Committee on Environment and Public Works be authorized to meet during the session of the Senate on Thursday, May 11, beginning at 10 a.m., to consider the nomination of F. Henry Habicht, nominated by the President to be Deputy Administrator, U.S. Environmental Protection Acency.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON DEFENSE INDUSTRY AND TECHNOLOGY

Mr. PELL. Mr. President, I ask unanimous consent that the Subcommittee on Defense Industry and Technology of the Committee on Armed Services be authorized to meet on Thursday, May 11, 1989, at 1:30 p.m. in open session to receive testimony on recommendations for an acquisition policy agenda.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SCIENCE, TECHNOLOGY, AND SPACE

Mr. PELL. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology, and Space, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on May 11, 1989, at 9:30 a.m. to hold a hearing on the President's fiscal year 1990 space transportation budget request and related policy issues.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

NATIONAL CORRECTIONAL OFFICERS WEEK

● Mr. ROCKEFELLER. Mr. President, on Tuesday, the Senate approved House Joint Resolution 135, Representative TRAXLER's legislation declaring this week as "National Correctional Officers Week." I think this is a fitting tribute to America's dedicated corrections officials.

I rise today to pay homage to a specific group of correctional officers—those who work at the correctional facilities in my home State of West Virginia.

Hidden away behind a great stone wall at Moundsville; situated in remote rural areas in Randolph, Tucker, Greenbrier, and Taylor Counties; encircled by a high chain-link fence at Salem; on busy downtown streets in Charleston, Huntington, and Beckley. These are the work sites for a very special group of West Virginia State employees—our correctional officers.

Headed by the very capable Corrections Commissioner Ron Gregory, the West Virginia Department of Corrections employs well over 500 correctional officers at a number of facilities throughout the State: At the West Virginia State Penitentiary at Moundsville; the Huttonsville Correctional Center at Pruntytown; the Anthony Center in Neola; the Industrial Home for Youth in Industrial; the Davis Center in Davis; the West Virginia Corrections Academy in West Liberty; and the work study centers in Beckley, Charleston, and Huntington.

What is a correctional officer, Mr. President?

A correctional officer is a civil servant employed with the State Department of Corrections. In West Virginia, he or she earns an entry-level salary of $967 per month and can advance to the rank of correctional officer III, earning $2,358 per month.

A correctional officer's job description lists innumerable duties. Since each correctional facility is established to assist the department of corrections in carrying out its mandate to provide for the custody, care, and treatment of sentenced offenders from the West Virginia Circuit Courts, the correctional officer is on the department's front line in carrying out this mandate. Through the correctional officer, sentenced offenders encounter the rules, regulations, and procedures of the corrections department, which are designed to provide for the offenders' custody and care. Correctional officers are on the cutting edge of corrections, and the department's success or failure depends on them.

Correctional officers perform a wide variety of tasks, from the seemingly mundane, such as issuing clothing, supervising dining areas, and writing reports, to counseling inmates on personal problems or institutional adjustment, counting inmates to assure all are present and accounted for, and searching for escapees. The correctional officer is charged with instructing and supervising inmate chores and work details, evaluating work performed and behavior exhibited, and preventing escapes from custody. They escort offenders to court, funerals, and hospitals. They inspect living quarters

for cleanliness and security, conduct searches of persons and living quarters for weapons or contraband, and settle disputes and break up fights among inmates.

The job is stressful and can be life-threatening on occasion. Correctional officers carry no weapons in prison. It is a job hidden away from public view and lacking in glamor. Yet, to the care and custody of these officers is placed those men and women of all ages who have been unable or unwilling to conduct law-abiding lives. Correctional facilities operate 24 hours a day, each and every day of the year.

Mr. President, it is this dedicated group of men and women whom I, along with West Virginia Corrections Commissioner Ron Gregory and the State Department of Corrections, recognize and salute this week.●

RALPH ANDERSON, SMALL BUSINESS SUBCONTRACTOR OF THE YEAR

● Mr. DOMENICI. Mr. President, "Small Business is America's Future" is the theme of this year's Small Business Week.

As part of this celebration, prime contractors and subcontractors from each of the Small Business Administration's 10 regions are honored.

I know my colleagues join me in honoring the selection of Ralph Anderson as this year's "Subcontractor of the Year" from SBA region VI.

Ralph is the president of General Technology Corp. [GTC] in Albuquerque. GTC was formed in 1981 to develop and produce electromechanical devices and printed circuit boards.

Today, GTC has grown to 115 employes, including technicians and engineers, who provide services to defense, medical, and aerospace industries.

Ralph's contributions do not stop at GTC. He is very active in community affairs, as a member of the Greater Albuquerque Chamber of Commerce, the Rotary Club, and the Professional Aerospace Contractors Association. Mr. Anderson is also the president-elect of the New Mexico Entrepreneurs Club and is treasurer for the Association of Commerce and Industry.

Innovators like Ralph Anderson will become even more important to our economy in the near future. Researchers worldwide predict an acceleration in the rate of technological breakthroughs in the days and years ahead, breakthroughs that will change the ways we conduct business in the manufacturing world.

Small businesses are best prepared for this challenge. They are able to adjust to market conditions faster than large businesses, and are often at the forefront of developing new products for the marketplace. They can also provide the training ground for our young workers.

I know that the entire Senate joins me in congratulating Ralph Anderson on his selection as region VI "Small Business Subcontractor of the Year".●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 35, PARAGRAPH 4, PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION

● Mr. HEFLIN. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD notice of Senate employees who participate in programs, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35, for Laurie Schultz a member of the staff of Senator JEFFORDS, to participate in a program in Cuba sponsored by the Presbytery of New York and the Ecumenical Council of Churches of Cuba from March 26 to April 2, 1989.

The committee has determined that participation by Ms. Schultz in the program in Cuba, at the expense of the Presbytery of New York and the Ecumenical Council of Churches of Cuba is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Thomas W. Cohen, a member of the staff of Senator HOLLINGS, to participate in a program in London, England, sponsored by the International Institute of Communications, from February 2 to 5, 1989.

The committee has determined that participation by Mr. Cohen in the program in England, at the expense of the International Instutute of Communications, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Carolyn Brickey, a member of the staff of Senator LEAHY, to participate in a program sponsored by the Congress-Bundestag Staff Exchange, from April 14 to 30, 1989.

The committee has determined that participation by Ms. Brickey in the program in Germany, at the expense of the Congress-Bundestag Staff Exchange, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Ms. Elizabeth Gardner, a member of the staff of Senator HEFLIN, to participate in a progam in China, sponsored by the United States-Asia Institute from March 18, through April 2, 1989.

The committee has determined that participation by Ms. Gardner in the program in China, at the expense of the United States-Asia Institute, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Ruth Kurtz, a member of the staff of the Joint Economic Committee, to participate in a program in France, Portugal, and the United Kingdom, sponsored by the European Community's Visitors Program, from June 12 to 30, 1989.

The committee has determined that participation by Ms. Kurtz in the program in Western Europe, at the expense of the European Community's Visitors Program, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Robert G. Bell, a member of the staff of the Armed Services Committee, to participate in a program in London, England, sponsored by the International Institute for Strategic Studies, from May 3 to 5, 1989.

The committee has determined that participation by Mr. Bell in the program in London, England, at the expense of the International Institute for Strategic Studies, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for John Hanford, a member of the staff of Senator LUGAR, to participate in a program in Cuba, sponsored by the Presbytery of New York of the Presbyterian Church, from March 26 to April 1, 1989.

The committee has determined that participation by Mr. Hanford in the program in Cuba, at the expense of the Presbyterian Church (USA) and the Ecumenical Council of Churches of Cuba, is in the interest of the Senate and the United States.●

RON SOLIMON: NEW MEXICO'S SMALL BUSINESS PERSON OF THE YEAR

● Mr. DOMENICI. Mr. President, President Bush has proclaimed this week as "Small Business Week," with the theme "Small Business is America's Future."

What an appropriate theme that is for the man selected as New Mexico's Small Business Person of the Year, Ronald Solimon.

Ron is the president and general manager of Laguna Industries, Inc. He is dedicated to bringing jobs to locations in New Mexico where jobs are most certainly needed—the American Indian reservations.

Ron is only the second native American to be selected as a statewide "Small Business Person of the Year"

since the awards were established 25 years ago.

His success story began 5 years ago when the Laguna Pueblo started Laguna Industries, Inc. Led by Ron, this effort has blossomed into a highly successful business.

I remember working closely with Laguna Pueblo and Ron in those early days. I successfully offered amendments to the Department of Defense appropriations bill for 2 years, to give the Secretary of Defense discretionary authority to contract directly with Indian tribes.

This authority served as an inspiration to Laguna Industries and DOD to identify business opportunities through DOD's minority business programs. Under Ron's leadership, contracts were identified and negotiated.

When Laguna Industries was awarded its first defense contract in 1985 under the Small Business Administration's section 8(a) program, the company had only 10 employees. One year later, employment had expanded to 94 workers. Today, Laguna provides jobs for more than 220 persons.

During this period, this initial defense contract of $10.5 million for the construction of communication shelters has grown to $55.5 million. It was an honor for me to be present to help Laguna Industries celebrate the completion of their first communication shelter.

With the assistance and dedicated efforts of Raytheon, Inc., Laguna has matured into a multifaceted business. Not only does it manufacture the communication shelters, Laguna also tests these units in the field and it provides training for U.S. Army personnel.

That is a real success story. I know that my colleagues share my feeling that small businessmen and businesswomen across America, men and women like Ron Solimon, represent what is great about America and our future.

Communities of every size are learning that small business is often the most appropriate source of economic growth. Small businesses are better-equipped to adapt to changing market conditions, discover new markets, and develop new products. They are the source of most of the job growth in our economy.

I congratulate Ron Solimon and each of our Nation's small business winners.●

MOTHER'S DAY SERMON

Mr. COCHRAN. Mr. President, last year a friend of mine, R. Douglas Hudgins, brought to my attention a Mother's Day sermon delivered by Dr. Franklin Pollard at the First Baptist Church in Jackson, MS.

As Mother's Day approaches again, it is appropriate that we turn our attention to those we honor on that day. I invite all Senators to read this excellent tribute to motherhood.

A WORTHY CAREER—II TIMOTHY 1:3; EXODUS 20:12

(By Rev. Dr. Franklin D. Pollard)

Paul is writing his young son in the ministery, Timothy. In verse 3, he says to him: "I thank God whom I serve as my forefathers did with a clear conscience as night and day I constantly remember you in my prayers. Recalling your tears, I long to see you so that I may be filled with joy. I have been reminded of your sincere faith which first lived in your grandmother Lois, and your mother Eunice, and I am persuaded now lives in you, also."

In Exodus 20 are the Ten Commandments. Ted Koppell reminded the Duke graduating class last spring that they are the Ten Commandments, not the ten suggestions. But the Ten Commandments contain this statement made in chapter 20, verse 12: "Honor your father and your mother that you may live long in the land which the Lord your God is giving you."

My favorite columnist is Erma Bombeck. She has all the wit and wisdom of Lewis Grizzard with a lot more conscience and character. She wrote: "When God was creating mothers, He was into the sixth day of overtime. When the angel appeared and said, 'You're fiddling around a lot with this one.' 'Have you seen the specifics on this model?' asked the Lord. 'Why, she has to be washable, yet not plastic. Have 180 moveable parts, all of them replaceable. Run on black coffee and leftovers. Have a laugh that disappears when she stands up. Have a kiss that cures everything from broken legs to disappointed love affairs, and six pairs of hands.'

"Six pairs of hands?" shook the angel. "Impossible!" "Well, it's not the pairs of hands that bother me so much," said the Lord, "as it is the three pairs of eyes that mothers have to have." "That's on the standard model?" asked the angel. "Yes," said the Lord. "Two for seeing through closed doors when she asks 'What's going on in there?' when she already knows what's going on in there. Two for seeing things that she shouldn't see but has to know about, and two here in the front for looking at a child when he or she messes up and says 'I understand and I love you' without uttering a word."

The angel tugged the Lord slightly on the sleeve and said: "Why don't you go to bed?" "I can't," said the Lord, "not when I'm so close to creating something so very close to myself. Why, I already have a woman who can heal herself when she's sick, can feed a family of six on a half-pound of hamburger, and get a nine-year-old to stand under a shower."

The angel walked slowly around the model of the mother and said, "It's too soft." "But tough," said the Lord, "you'd be amazed at what this model can do and endure." "Can it think?" asked the angel. "Yes," said the Lord, "and can reason and compromise too."

The angel bent over and wiped something from the face of the mother and said, "I knew you were putting too much into this one. It leaks!"

"It's not a leak," said the Lord, "it's a tear." "A tear? What's it for?" "Well, it's for joy, sadness, and disappointment and pain, and loneliness and pride."

"You're a genius," said the angel. The Lord looked somber. "I didn't put the tear there."

You and I put tears on the cheeks of our mothers. For joy or sadness, for pain or pride. And it's right that we stop and thank God for this wonderful gift to us.

Today I want to say just one thing. I really want to say one thing. I heard about a fellow who said: "I have been going to church twenty years expecting my pastor to say something. And just as sure as I miss a Sunday, that'll be the Sunday he says something." Well, I want to say something to you. I want to say that being a mother is a worthy career. Now I'm not saying that mothers should all stop their jobs and stop other careers and concentrate just on child rearing. That would be a wonderful thing but not all can do that. Have you heard this?

The bride leaning on her cane,
Her footsteps needing guiding,
While down the aisle with a wan, toothless smile,
The groom in a wheelchair came riding.
Who is this elderly couple just wed?
You'll find if you closely explore it
That is that rare and conservative pair
Who waited 'til they could afford it.

Now I'm not saying that all mothers should give up their other work. Some cannot. I'm not saying that every woman should have children and be a mother. I'm just saying that those who choose the profession of motherhood are choosing a worthy career.

Now this is a reaction. It's a reaction to two articles I read a couple of years ago. One was found in the *Reader's Digest*, and that shocked me. It's the kind of statement you would expect to read in those expensive, slick, "you've come a long way, baby" type magazines you see nowadays on the newsstands. You know, those that appeal to those whose pseudosophistication has outlived their sense. But this is in the *Reader's Digest*. It was entitled "Ten Most Challenging Careers for Women." And being a mother wasn't even mentioned. And, my soul, I believe *the* most challenging career of all for women is to be a mother.

The other article was in the paper quoting a New York City lady who said: "The best and the brightest of today's women do not choose to be mothers." Well, I have a reaction to that. I think that is in keeping with intelligence of the original statement: "NUTS!" Some of the brightest and very best of all the people I know choose to be mothers. And I want to say today that being a mother is a worthy career. Now it's much more than that. It is the most challenging and worthy career of all, but quite honestly, it seems as though getting this society to accept the fact that being a mother is a worthy career is going to be more than just a day's work. But it is. It's a worthy and exciting thing, for it's much more important to build a person than to build a portfolio; much more important than developing a clientele is developing a child. For when you're dealing with people, you're dealing with the most important thing in all our society. When you're dealing with the development of a human being you can't be involved in any more important and challenging business than that. Being a mother is a worthy career!

In II Kings 18, there is a Biblical episode when King Hezekiah and his people at Jerusalem are almost demoralized. They're almost out of water. They're almost out of food. The Assyrian army has surrounded the city simply waiting for it to surrender. There's a conference between two of King

Hezekiah's representatives and the Assyrian general outside the gates of Jerusalem. They're so close to the wall that the people standing on the wall can hear it. And in II Kings 18, this conversation is recorded in which the Assyrian general tells King Hezekiah's representatives: "Go tell your king he's a fool. He's trusting in something for strength that isn't strength at all. He's made an arms pact with the king of Egypt. Even now he's probably in his tower looking toward the east, looking for that telltale cloud of dust which means the king of Egypt has come through and the horses and chariots are on their way. You tell your king, and this is in verse 23: "You tell your king that my king will drive two thousand horses through his gates if he can prove he has anyone to ride them." Now you see, that's the trouble with horses, planes, businesses, and anything. You have to have people to direct them. And if you don't have the right kind of people, there's not much sense of having anything else. And where are the right people developed? How does a nation lead people in the way they ought to go?

Well, it's very certain that in our secularistic society they are not going to get this from media. It's very unlikely that movies or television or magazines or newspapers are going to do much to increase the value system of our nation. For you see, our media are not all that interested in telling us what is right and wrong. They simply want to find out from us what we think is right and wrong, what is acceptable and what is unacceptable. So then they can sell us what we want. And they'll not spend much time at all telling you what is good or what is bad or what is right or what is wrong or what is unacceptable and acceptable, but they will simply say: "What do you think?" And they'll take polls, they'll take surveys because they are in the business of giving you what you want and not necessarily what you need. And they will tell you what you want to hear. They will present dramas and programs that tell the stories that they think you want to hear and reflect the kind of lifestyle they think you want to watch. In doing that they can attract sponsors who can use this as an opportunity to sell products to you and me, not necessarily the products we need, but the products they think we want. And those products may be injurious to our health. They may be responsible for killing many of us, but you see that's not the factor. The factor is profit. Now I'm not saying that's all bad or all wrong. I'm saying that's just the way it is, that we are not going to be directed by media to find our moral values in this land.

Christian television should be different. But with the notable exception of the ACTS Network, it seems that Christian TV seems to have a greater motivation of fleecing the sheep than feeding or nurturing them.

So where are you going to get it? Well, you have to get it in homes. You have to find the character in the homes. If we're going to be the kind of people we need to be, that has to happen at home. I've heard people talk about the crime rate and all kinds of studies about how to solve the crime problem. Many have said poverty is what causes crime. Folks, that just isn't so. Crime is an equal opportunity attractor. There are rich and poor criminals. In fact, some of the very slickest of them are rich. That's how they got rich. Having things does not stop anyone being a criminal. You know, during the great depression this nation had twenty-five percent unemployment. It also had its lowest crime rate in all of history, because we had homes back in those days that taught values.

My mother, as a young mother, lost her first husband in the depression. He had nothing: no insurance, no property. He left her with three boys under eight years of age. She got a job for fifty cents a day at a steam laundry in the little town of Olney, Texas. That laundry was located in a tin building, and she worked ten hours a day for that fifty cents. She got one room, kind of a shed, a lean-to, behind one of the stores downtown. That's where she lived with her three boys. While she was working, my three brothers just had to sort of walk the streets and try to sell papers, or sweep the sidewalks, or do whatever they could do to get what they could get.

One day my brother Miles walked into a variety store to try to sell the man there a paper, and he saw a toy truck. He'd never had a toy truck. It was the most beautiful looking thing to him he'd ever seen. He picked that toy truck up and put it in his pocket. Now the first night he was able to hide that from my mother but you can't hide much in one room for very long. And it wasn't long until she found the toy.

After she had worked ten hours in the steam laundry that day, she came home and she said: "Son, you and I are going to make this right." The man who owned that store lived two miles out in the country. My brother Miles said that he was seven years old and that my mother walked twenty yards behind him. She said: "I don't want to be seen walking with a thief." She walked twenty yards behind him all the two miles out to that man's house. When my brother, seven years old, knocked on the door, my mother stood around the corner so she couldn't be seen. My brother gave the toy back that he had stolen and apologized for that. He said: "I've never stolen anything since then."

My brother is one of the most respected people in his community. He is the county tax assessor and collector in Wichita Falls. He also is a pastor and preaches to many of the people he collects taxes from. I've envied him that position on many occasions. Year after year, he runs unopposed as one of the most respected people among the folks where he lives and where he grew up. My brother is a great man because he had a great mother. And she taught him that honesty is an unconditional thing.

Now I believe in social ministries. I dream one day of our having a fulltime social minister to look after needs in our church. Our Lord Christ tells us that when we can help people we should. And part of our judgment is going to be faced because of that. I certainly believe in that, but I also know that if there'd been some social ministers in the days of Abraham Lincoln, they may have just taken him out of the thing that was very best for him. For you see, Lincoln lived in a log cabin that didn't even have a south wall, but what he had was so much greater than what he didn't have, because Abraham Lincoln had a great mother. And after she died he had an even greater stepmother. They taught him that honor and honesty are unconditional, and he lived that all of his life. He was known to be Honest Abe because of that.

But that's where it happens. We say: "What about the church?" Well, God created the home first and then the church. And the church is to help the home in what it's doing. But unless the people in the home live the life that's preached in the church, unless there's the undergirding of that kind of ministry, then the church cannot have a great deal of impact upon society. We have some, but not the impact on a life that a home can have.

I read a thing the other day that was sad. The first four lines went like this:

Mary had a little boy,
His soul seemed white as snow.
But he didn't go to Sunday School,
Because Mary didn't go.

And it went on and on from there. It told about how the boy's life was destroyed.

Being a mother is a worthy career. Now we know there are sometimes when parents can do everything they can do and the child just doesn't turn out well because we all have this decision possibility within us. Individuals can decide to go with what they've been taught or not.

In the Bible we read in Judges 13-16 of Samson, a promising young man, so very promising. In Chapter 13:8, we read that his father Manoah prayed for him, dedicated him to the Lord when he was born, that his father and mother reared that child in the fear and admonition of the Lord; but Samson never paid any attention to what his parents were saying. He bullied everybody that came in his way. He practiced unlimited sex. He was a young man who simply destroyed himself and many other people. Here was a case of good parents not having good success with a child.

There is in the case of Jonathan, a young man who seemed to be the generation gap in reverse. He had many qualities that his father Saul just didn't have. But I think the normal and what usually happens is what's portrayed when Paul wrote to Timothy. He said: "I thank God whom I serve, as my forefathers did . . . as night and day I constantly remember you in my prayers. Recalling your tears, I long to see you, so that I may be filled with joy. I have been reminded of your sincere faith, which first lived in your grandmother Lois and in your mother Eunice, and, I am persuaded, now lives in you also . . ." (II Timothy 1:3-5).

Being a mother is a worthy career. It's a worthy career because it just may be the only hope of survival for this land and for this world. That's what Moses was saying in Exodus 20. You see, Moses was not a preacher. He was not some religious lecturer giving ten suggestions for those who thought they might like to be religious. That's not what the Ten Commandments are about. Moses was the leader of a brand new nation. And this was a nation of people who for the first time were freed. For more than four hundred years they had been slaves. They had worked where the government told them to work, lived where the government told them to live, worked as long and at what job the government told them to work. For the last generation, every boy baby born among them had been slaughtered by the government. And now they were free: free to make some choices for the first time in their lives. And of course we know that that's all freedom is: it is the ability to make some choices. If you use your freedom to make the wrong choices, you lose it. So our Lord was saying to them in the Ten Commandments. He was telling a nation how to keep free.

Now every time there's something that's negative in God's Word there will always be a positive preamble. And the positive preamble to the Ten Commandments is this: "I am the Lord your God. I brought you out of Egypt."

So the conversation between God and these people could go something like this. "You're free. Right?" And they said: "Yes, we're free!" He said: "God made you free. Is that right?" And they would have to say: "Yes! God made us free! He brought us out of Egypt. He opened the water. He gave us our freedom. God made us free!" "Then your God wants you to be free. Is that right?" And they said: "Surely it must be right. He did this because God wants us to be free." And our Lord said: "Alright. Now let me tell you how to keep it." And that's what the Ten Commandments are. And when He says: "Honor your father and your mother that you may live long in the land that the Lord your God gives you," He is not saying: "Be nice to your mother and daddy and you'll live to be eighty." What He is saying is that if you're to live long in the land that the Lord your God has given you, then you may be able to keep the land. You may be the kind of people with the character it takes to keep freedom. You may have the inner strength and stability that is needed to maintain the land that the Lord your God gives you. But that's what He was saying.

You know there is one thing and almost every government in the world today agrees about when you can get a statement from them about it. In the Communist world, forty percent of the world, in the free world, and in what's called the third world, there is one thing that all governments seem to agree upon. And that is that families are the key to survival. It hasn't always been that way.

Plato dreamed of his Syracuse, of its kind of communal living where everything would be wonderful, the people did exactly what they wanted to do and worked at their strengths. By when Syracuse was put into action, though it looked good on paper, it didn't work.

You remember the Bolshevik Revolution, the Russian Revolution. Communal living was to be the way of life. They were going to do away with the concept of family. When people had children, children would be put in places where they were to be raised by experts and raised to become their highest potential and the parents would be free to do the things they did best. They tried that, but it didn't work. It was a dismal failure. And now Russians, I'm sorry to say even more than we, are saying that the key to our nation's survival is the family.

In 1917 in upstate New York a group of people were brought together into a community called Oneida, people who had money, education, and culture—attributes and possessions which would have classified them on the world's scales as "the brightest and the best". They were going to show and demonstrate how true communal and communistic-type living would work. The experiment was a dismal failure. And now all over this world, all the governments, all the people are saying one thing and that is that the family is the hope for the future, because they know that if they don't produce people with character, then they won't last long.

That's the trouble with horses., You've got to have someone to ride them.

Many years ago there was a revival in this land, the kind of revival that some of us are praying for to happen gain. One instrument in that revival was a preacher named Jonathan Edwards. Jonathan Edwards was a small little guy who read every word of his sermon from a manuscript and hardly ever looked up. He had a sermon called "Sinners in the Hands of an Angry God", and when he would read that sermon to congregations, people would come under the conviction of the spirit of God and hundreds of them would be saved. He led revivals all over the land, especially the eastern part of our land and was an instrument in a great revival. Jonathan Edwards was married to a lady named Sarah Pierpoint. Jonathan and Sarah Edwards had eleven children.

Jonathan Edwards must have been a wonderful father and Sarah was certainly a wonderful mother. She gave one hour a week to those children individually. And she gave a lot of her time to them. She gave her life to helping those children know God through Jesus Christ and develop what they could be for His glory.

Somebody followed the generations of Jonathan and Sarah Edwards. These are the things that are not nearly so important as you'd like to know the real important things, but these are the things you can learn only from the kinds of way we keep history. By 1900, the descendents of Jonathan and Sarah Edwards had produced thirteen college presidents, sixty-five college professors, fifty-six medical doctors, one dentist, fifty-six people who were lawyers, one became the dean of a prestigious law school, thirty were judges. There were eighty serving in elected positions in government. Among those were three United States senators, three governors of states, three mayors of large cities, one comptroller of the U.S. Treasury, and one vice-president of the United States.

There were more than one hundred overseas missionaries to come from that family, and scores and platoons of leaders of churches and clergymen. Now don't tell me that Sarah Edwards did not pursue a worthy career. Don't tell me that's not important. Don't tell me that she didn't do something that makes a lot of difference because she probably made more difference than any other woman or any other person of her day.

And I'm here to simply say one thing: That being a mother is a worthy career, and we salute those who give themselves to it.

"We're all blind until we see that in the human plan nothing is worth the making if it does not make the man. Why build these cities glorious if man unbuilded goes, In vain we build the world unless the builder also grows."●

LEE IACOCCA

● Mr. SIMON. Mr. President, one of the most stimulating and thoughtful and common sense leaders on the American scene today is Lee Iacocca, chairman of the board of Chrysler Corp.

Recently, he gave a talk to the National Association of Manufacturers that hits the nail so squarely on so many issues that I ask to insert it in the RECORD.

He calls on us to face up to our problems in trade, in education, and on the deficit.

Right now we are stumbling around on trade, and completely ducking on education and the deficit.

I urge my colleagues in the House and Senate to read the Iacocca speech.

The speech follows:

REMARKS BY L.A. IACOCCA AT THE NATIONAL ASSOCIATION OF MANUFACTURERS, MARCH 22, 1989

Thank you, Dick (Heckert), and good afternoon to all of you.

I appreciate the introduction and the reception. I've learned that you never know what to expect when you come to Washington. In fact, I gotta tell you, I feel a little like John Tower being invited back to lunch in the Senate dining room.

You see, when I was in town 10 years ago looking for some loan guarantees to save Chrysler, NAM was telling everybody on the hill "don't give him a dime." I know it wasn't personal—there was a principle involved.

I can tell you now, that hurt. But, of course, everybody knows that I'm not the kind of guy that holds a grudge! (At least not for over 10 years at a time—so here I am.)

And then, of course, I remember running into Sandy Trowbridge at the Lake Placid Olympics not long afterward. He'd just taken over as head of NAM, and he said, "Lee, the whole fleet of Plymouth Horizons (60 of them) we just bought for our field force are all running great!"

That really impressed me, and I had a lot of encounters like that. You see, we found that a lot of people who opposed Government help for Chrysler in principle, were still rooting for us, and actually helped us later on. They didn't really want to see a great old company go bankrupt and 600,000 people lose their jobs. But there was this principle involved!

Well, this year is the 10th anniversary of the whole Chrysler loan-guarantee debate. I don't want to open any old wounds, but I think we should all remember what almost happened. Chrysler was going down for the third time, and for the sake of principle some purists were saying "Let her sink. It will be a good example of free enterprise at work."

At about the same time, if you'll recall, we were sending dollars to Latin America by the boatload. (Those were smart loans, of course, while Chrysler's was a bailout.) And in the spirit of good old-fashioned American entrepreneurship, we deregulated the S&L's and said, "Hey, you guys go do your own thing. And don't worry, we'll back you up all the way."

I guess there were some principles involved there, too.

Well, let me abbreviate history for just a minute. In fact, Chrysler never did take a dime of Federal money. We just asked the Government to co-sign a few notes. In return, when we paid those notes off 7 years early, the Federal treasury made almost $350 million profit.

What happened to all those safe loans to Latin America? They're still on the books—about $70 billion worth—with a lot of embarrassing asterisks next to them.

And how about those great bastions of free enterprise, the S&L's? A one hundred billion dollar blunder that will come right out of taxpayers' pockets. (That's you and me.)

Now, I didn't come here today just to say "I told you so," or to talk about some of our double standards in this country. I think (at least I hope) we're all a little smarter in 1989 than we were in 1979. In fact, helping Chrysler was a dangerous precedent back then—unless you happened to look at the consequences of letting us die. Moving away from our tried and true principles in this

country is still dangerous—unless sticking to them blindly winds up taking us over a cliff.

I keep telling people what we need here in Washington are a few more Chrysler "bailouts." I don't mean underwriting every failing business that comes along, but I do mean breaking some old rules and traditions if that's what it takes in order to compete.

You see, I'm a businessman, not a politician. All I've ever done in my life is manage a business, and every day I ask myself "what do I have to do to compete?" And every time I come to this town, I try to get people here to ask the same question "What does America have to do to compete?"

And you're all business people, too. What would you like to see happen? What would help you compete? How about interest rates at 8 percent instead of 12? Would that help? I'm building a new research center and a new plant right now—at a billion dollars each—let me do them at 8 instead of 12 and watch how competitive I get. But it won't happen as long as the government is spending a half billion bucks a day more than it takes in . . . as long as we've got $2.6 trillion dollars of debt on our backs (with interest alone running over $200 billion or 15 percent of or total budget) . . . and as long as my competitors in Japan are paying less than one-third what I am for capital.

And, how would you like to compete with the same rules for everybody? Example: Toyota and Nissan want to come here and compete with me, so they sign up a Chrysler dealer and put their logo right next to mine. But I'm trying to sell in Japan, right now, and I'm prohibited from using their dealers so I have to start a whole new distribution network of my own. And yet every day, it seems, I read about another Japanese tycoon saying that we Americans aren't trying hard enough, or just don't understand the Japanese market.

Or how about taxes? Would a few changes in the tax code help you compete? The individual rates have come down, sure, but only because business people like you and me picked up $120 billion more of the load. (And only American business, by the way—Toyota got a better deal than I did.) We're out of sync with everybody else because we tax mostly savings and investment while they tax consumption. After 74 years, we finally changed the tax code, and maybe made it a little fairer (not simpler, mind you). But it did not cut the deficit or make us more competitive in trade—our two biggest problems. So why did we make the trip?

Oh, and a full third of those taxes go for defense—about $1,200 for every man, woman and child in America compared to $150 in Japan. Imagine how competitive we'd suddenly get if they were defending us! (Or at least helping out.)

And here's one that hits all of you—how would you like to compete without this albatross around your necks called runaway health care costs? For me, it's $700 a car, and still going up at twice the rate of inflation. Other countries put those costs in their taxes, but we put them into the price of our products. That's not very healthy for competing with the other guys.

Or, how about if we'd just stop suing each other at the drop of a hat. Would that make us more competitive? Japan graduates 10 engineers for every lawyer, and we graduate 10 lawyers for every engineer. Does that tell you something? They train people to build a better mousetrap, and we train people to sue the guy with the mousetrap. So who's the smart guy?

I could go on, but we are getting less and less competitive in this country, and some of the biggest reasons don't have anything to do with what we do on the factory floor; they have to do with policies here in Washington. I should say lack of policies, because I honestly don't know what our game plan is on some of these issues—if we have one at all.

We are groping—and I mean really groping—for solutions, starting with what to do with our debt load. I was on the National Economic Commission that unceremoniously folded its tent three weeks ago. We worked hard for almost a year and agreed on only one major thing—that deficits are bad for the country!

Pretty profound—huh? (That makes us geniuses, right? I expect to get my Nobel Prize in the mail any day now.)

We listened to every reputable economist, including Paul Volcker and Alan Greenspan, who told us that a credible whack at the budget (say $30-40 billion a year for 4 years) would drop interest rates a couple of points almost overnight.

We split up because we couldn't agree on a little sacrifice to take that whack. We were worried about what the voters might say to a little nickel or dime tax on a gallon of gas. That might cost you $100 a year. (Just whispering the word "taxes" in this town today is like quoting the Satanic Verses to the Ayatollah. You could get a contract put out on you.)

Actually, we were asking the wrong question. We should have been asking, "How would you like to see you mortgage payments go down a couple thousand dollars a year? And, how would you like to lower your car payments, and your credit card payments?" And imagine the magic it would weave on South American debt repayments, and on the S&L insolvencies and bailouts—you name it. Hell, most of all, that $200 million interest bill on our national debt would drop like a rock. We should have told the American people about some of those things. And we certainly should have told them that high interest rates are the most insidious taxes of all (make no mistake about it).

I was on the NEC as a businessman, concerned about competing. That was what was so frustrating. Those deficits have made us, by far, the biggest debtor in the world. And if you look back in history you'll find that in this world it's always the guy holding the IOU's who calls the shots. He's the guy in the best shape to compete. Debtors cannot be leaders—economically, militarily or any other way.

We're groping on the budget deficit, and groping on the other big deficit, too—the trade deficit. Japan is eating our lunch, and yet here in Washington it seems everybody is heading off in different directions. No coordinated policy at all.

At Commerce and the Special Trade Representative's office, they'd like to level the playing field a little, but the State Department doesn't want to ruffle any feathers . . . the Pentagon wants to keep Japan on our side in case the Russians act up . . . and Treasury is scared to death the Japanese won't show up at the bond auctions next Tuesday. Everybody in town has his own agenda with Japan, but the United States of America has none! We got an 1,100 page trade bill last year, but nobody seems to know how to use it.

I grew up believing protectionism—the old classic kind where you shut yourself off from the rest of the world—was pretty dumb, and I still do. But somewhere along the line we stopped being idealists and started being patsies. I don't want to close off the American market, and I don't want to toss out the idea of free trade. But I want to use the American market to make damn sure that trade is free for Americans for a change.

If that means using market access as a weapon to open up foreign markets to us and defend free trade, what's wrong with that?

I'd like to see trade policy and national competitiveness elevated to the same rank and importance as national security!

Now, I said that we can't get our act together when it comes to Japan, but let me tell you, they have a plan, and the clout to make it work. The Political Action Committee that represents Japanese auto dealers in this country gave $2.6 million to congressional campaigns last fall. That's more than General Motors, Ford, Chrysler and the United Auto Workers gave, put together.

Last year alone, the Japanese paid more than $100 million to their lobbyists and other agents in this country. And do you know where a big chunk of that dough goes? To hire away our own trade negotiators. About one third of the senior people in the U.S. Trade Representative's office in recent years have left to work for foreign governments and companies.

Think about it, if a CIA agent quit one day and hired on with the Russians the next, we'd throw him in the slammer. But when our trade negotiators defect to the Japanese, nobody bats an eye! This really is a very strange town.

Well, the budget . . . trade . . . the tax code . . . all the rest of them—these are competitiveness problems we could solve, and solve fast, if we just had the political will to do it, and, of course, some coherent policies and good dedicated people to carry them out.

But let me tell you about our biggest problem of all. And this one can't be solved overnight. It's going to take a long time, but I guarantee you, without solving it, forget ever being able to compete. (Nothing else will matter.) What I'm referring to is the absolutely crummy job that we're doing in this country in education. We're just not giving our kids the tools they'll need to compete, and we'll pay a stiff competitive price for that for a lot of years to come.

We're turning out high school graduates who will have a hard time even understanding the problems, let alone tackling them. Somebody did a study (oh, hell, we're always doing studies). Seventy-five percent of our high school students don't know what inflation is . . . 66 percent don't know what profits are . . . and 55 percent don't have a clue as to what a government budget deficit is. (So the size has no meaning to them.)

Hell, 600,000 of our graduates last year could barely read their diplomas. (I couldn't read mine either, but it was in Latin. Theirs were in English.)

Sure, we have some great schools . . . and plenty of dedicated teachers. Many of our high school graduates are as well prepared as you'll find anywhere. But when you talk about competing as a Nation, you compete on the basis of your averages. How does the average U.S. student stack up? That's what determines how competitive we'll be.

Well, ours are now dead last among industrialized countries in math and science. Is there any doubt that we'll fall flat on our faces trying to compete in a high tech world when we're turning out students who are

dead last in math and science? And they're near the bottom in reading, too.

I'll bet you didn't know this—you and I and all the rest of American industry are spending more money teaching remedial math to our employees than all the grade schools, high schools and colleges in this country spend on math education—combined!

Hell, I'm in the business of building cars not teaching remedial math!

We spend $117 million a year at Chrysler on training, and almost 10 percent of it goes to teaching people the three R's they didn't learn in school.

At Motorola, they found that it costs $200 to train an American worker in statistical process control. Teaching the same technique to a Japanese worker costs 47 cents. Basically, all they have to do over there is hand the guy the book. We can't do that here because there's a good chance our guy can't read it.

Functional illiteracy in Japan runs at about 5 percent. Here it's between 20 and 30 percent, depending on whose figures you use.

We used to write our training material at Chrysler at the 9th to 12th grade reading levels. But we found we were out of sync because a lot of the people in the plants were only reading at the sixth grade levels. So we had to translate everything into sixth grade reading because that's all some of them could handle.

Sometimes even sixth grade is too tough. On one of our assembly lines, we had a button on a computer, labeled with three simple words: "bad hood fit." We had to replace it with graphics—a picture of a hood.

Now remember, in Detroit we draw our workforce from a city where the high school drop-out rate is 50 percent . . . the daily school attendance rate is about 75 percent . . . and where less than 30 percent of the school budget actually goes to basic education. (The other 70 percent is for administration and "support" services.) I've got over 91 percent of my people designing, building and selling cars. Imagine if I only had 30 percent doing that and 70 percent was pure overhead. How long would I last? Could you stay in business that way?

It goes without saying that we as manufacturers have a huge stake in education. Would you believe maybe survival? I know what factory workers in Japan and Korea can do. I've seen them. I also see what we're getting from our schools, and I'm scared. Everybody can get the same technology today, but if you don't have people who are smarter than the robots they work with, the game is over. You are simply not going to compete.

We employers have to get more involved in education. And I don't mean spending more time teaching our own people how to read or do long division, either. We've gotta go to the core of the problem and help our schools turn out the kind of people we need to run our plants.

And just throwing money at the problem isn't enough. We'll spend $328 billion on education this year, more than for any other public service, including national defense. And we spend a lot more of our GNP on education than any of our overseas competitors—including Japan and Germany.

So we deserve more productivity and efficiency for the billions in tax dollars that we're already putting into education.

We also have to demand higher standards. The first thing some youngsters flunk these days is life itself. That's because they've been passed from one grade to another, and eventually graduated, even though they've been failing at every step. The only problem is, nobody's told them. In attempting to shield these kinds from failure, we've guaranteed it. You know what that is (we hear a lot about it these days), it's called malpractice. Malpractice in the schools.

Now, for some youngsters today it's already too late. They're so far behind they may never catch up. We can do a patch job on some, but we really need to make sure that we don't blow another crop. That means starting now with the K through 6 kids. Just like in our plants—"Do it right the first time!" We can't keep trying to make repairs at the end of the assembly line.

More than anything else, we have to find ways to help teachers themselves do their jobs. We're asking a helluva lot of them right now. We're asking them to be cops, and social workers, and surrogate parents, and drug counselors, and psychologists. And we're making them do all that alone.

I talked to the National Education Association a couple of weeks ago in San Diego. I found out that only 25 percent of parents ever visit their children's schools. Let me ask you—could you turn out a quality product if you never even got to talk to the suppliers that send you your raw materials? I couldn't!

I have to get my suppliers involved in my business or I can't fit together those 12,000 parts that make a car. If you can't get the parents involved, I don't know how you fit all the parts together into that complex mosaic called a human being.

But that's what we're asking those teachers to do. It's not fair, is it?

The schools themselves, of course, are our major suppliers. We can't just get mad at the quality of what they're sending us. We have to work with them to fix that quality.

Like a lot of other companies, we're trying to do that at Chrysler. And we're doing it as hard-headed business people who understand it's a responsibility we have to take on in order to help ourselves compete.

One thing we're trying to do is create a better awareness in this country of just how big our education problems are.

Starting next Monday night, we're sponsoring a five-part PBS series entitled "Learning in America" with Roger Mudd (an ex-teacher, by the way) as the host. It's an in-depth look at what we're doing wrong in this country, some of the things we're doing right, and most important, whether or not our schools are preparing our kids to compete.

Secondly, we've just made a half-million dollar grant to the National Board for Professional Teaching Standards. This is a new organization, just over a year old. Dick Heckert is on the board. The aim is to create for the first time a set of national standards and an accreditation process for teachers that will help give the teaching profession the stature it deserves.

In Japan, teachers are up on a pedestal, like they were here when I was a kid. They're among the highest paid of all Japanese professionals, and in prestige they're right up there next to "king" (or Emperor)—not only respected, but revered. Boy, they've really got their priorities straight.

Then—and this may be the most lasting contribution we can make—we just provided the largest grant in history, $2.1 million, to Reading Is Fundamental. That's a program I've been involved in since it began.

I've learned that the average primary school student in this country only spends 7 or 8 minutes a day actually reading. Maybe that's our whole problem, or at least the root of it. Reading really is fundamental to everything else.

And we have to start young. The problems are in the early years. Our universities and graduate schools are still magnets for the best and the brightest from all over the world (would you believe 60 percent of engineering Ph.D.'s in this country go to foreign students?) So we must be doing something right at that level. But nobody is lining up to come and enroll in our kindergartens. That's where we're falling down—we're failing our own kids, right from the start.

Now, we know that everything we're doing at Chrysler to support education is really just a drop in the bucket, because it's such a huge problem. We've searched for a few ways to help, and I hope every company in this room looks for ways to get involved, too.

President Bush, who'll be here tomorrow, says he wants to be the "Education President." I think every one of us ought to do everything we can to help him get his wish. I talked to Mrs. Bush last night, and I have a strong feeling that with that lady by his side on this issue, he stands a good chance of making education the brightest of his thousand points of light.

I sure hope so. The kids entering first grade next fall will be the first high school class to graduate in the 21st century. We should focus on that class. We've already let some of the older kids down, but this class will tell how well America will be able to compete in the 21st century.

You know, the year 2000 is already getting a magic ring to it. Everything seems to be pointing to it—the dawn of the Third Millenium. But I hope we don't look pass the decade of the nineties. Because what we do between now and the end of this century will determine what kind of country we're going to be in the next one.

Some people like to say that we've lost the competitive edge we once had because Americans have gone soft. I don't believe that for a minute. But I do think we're living in the past. We're still living in the so-called "American Century." And we think its going to go on and on.

Well, I hate to tell you, but it's over. The Asians and the Europeans have an equal say now. And that's not all bad. In fact, that's what American policy has tried to do over the last 45 years—help build a world where people are competing in the marketplace instead of on the battlefield.

But that means we're going to have to learn to compete in a world that we no longer dominate. I don't think we've fully realized yet what that means.

It means that competing has to become the main policy goal in this city, and across the country.

I was glad to read last week that President Bush has appointed Vice President QUAYLE, who'll be up here in just a few minutes, to head a new White House task force on competitiveness. I can't think of a more challenging, or more important, role for the No. 2 man in our Government than to lead the effort to get us more competitive.

And I, for one, am glad to see that America's economic competitiveness is getting that kind of top priority treatment by the new administration.

Just about everything we do in this country, right or wrong, has an impact on our ability to compete. We need a broad-based solution to our competitiveness problem. And it has to be led from the highest levels.

Because competitiveness is a national problem. We're not just competing with foreign engineers and workers, we're competing against their schools, and their trade policies, and their health care systems, and all the other factors that go into this issue.

That will take leadership . . . it will take involvement . . . and it will also take a willingness to challenge a few old ideas, and maybe even to bend a sacred principle or two when they get in the way of our ability to compete.

Ten years ago, some men and women of both parties up on Capitol Hill had the courage and the vision to bend a few principles and vote to give Chrysler a chance to compete. DAN QUAYLE, by the way, was one of them.

Now that he's our new competitiveness czar, I hope he'll be able to convince some others in this town that we aren't betraying anything this country has ever stood for by doing whatever it takes to give our kids the change to compete in this new world.

But we sure betray them . . . those kids . . . if we don't.

Thank you very much. It's been good to be back. And Sandy, I hope you're still buying our cars! Good day.●

THE ARMED CITIZEN

● Mr. MCCLURE. Mr. President, I recently shared with my colleagues an article from the Washington Post which recounts a harrowing instance of an honest citizen defending himself and his elderly father from brutal attack by an intruder. I was pleased to see the coverage of this story, for it belies the mistaken impression that firearms cannot be safely used for self-defense.

I would not want to give the impression that such successful occurrences are uncommon. Every day, ordinary people exercise this right. We depend on the police to enforce the law, but the police cannot be everywhere. The May 1989 column, "The Armed Citizen," from the American Rifleman discusses other instances in which crime is thwarted by a self-reliant, armed citizen.

Again, I remind my colleagues: Every year, some 650,000 citizens defend themselves against violent crime using firearms.

Mr. President, I ask that the following article be inserted in the RECORD.

The article follows:

[From the American Rifleman, May 1989]

THE ARMED CITIZEN

(Mere presence of a firearm, without a shot being fired, prevents crime in many instances, as shown by news reports sent to The Armed Citizen. Shooting usually can be justified only where crime constitutes an immediate, imminent threat to life or limb or, in some circumstances, property. The accounts below are from clippings sent in by NRA Members. Anyone is free to quote or reproduce them.)

A Baltimore County, Md., woman was robbed in front of her house, and after the armed robber had taken the items on her person he forced Gwendolyn Harrison into her home to look for more valuables. Once inside, however, the armed man was wounded by Harrison's husband, who pulled a handgun from under a pillow and shot his wife's assailant. The wounded robber fled, but he and an accomplice were later arrested at a hospital. (The Sun, Baltimore, Md. 3/11)

Sheila Wagner was in her Omaha, Nebr., home when a man broke in through a bedroom window. The intruder lunged at her and yelled, "She's in here," to another man climbing through the window. The 41-year-old social worker picked up her registered handgun when the first man grabbed her by the neck and began firing. Wounded, the attacker was helped back out of the house by his accomplice; both were later arrested by police. (The World-Herald, Omaha, Nebr. 2/13)

A 59-year-old handicapped man was sleeping in a chair in his Akron, Ohio, home when he was awakened by someone breaking in. Unable to move, the homeowner saw a man's shadow and the intruder told him not to move or he'd kill him. The resident reached for a handgun, which he'd bought for protection after previous robbieries, and shot the robber. The wounded intruder and two accomplices were later arrested and charged with aggravated burglaary. The homeowner was not charged. (The Beacon Journal, Akron, Ohio 1/31)

A man sought by authorities on at least two warrants broke into the home of Michael and Irene Wilson of Pendleton, Oreg. When the man threatened the couple with a knife and scissors, Wilson fatally shot the man with a rifle. The slain man had been wanted on theft and drug possession charges. (The Oregonian, Portland, Oreg. 2/16)

A knife-weilding man who'd just robbed a Lancaster, Pa., store started for his car, but the clerk's cries alerted Fred Ringbloom. The citizen began chasing the robber; a delivery van driver who heard the commotion blocked in the man's car, forcing the thief to try to escape on foot. Ringbloom, meanwhile, had been joined by another man, and they chased the robber down the street. Apparently winded, the man stopped and brandished a knife at his pursuers. Ringbloom, though, drew his registered semi-automatic handgun and held the man for police. (The Intelligencer Journal, Lancaster, Pa. 1/28)

On her 52nd birthday Kathryn Cleckler of Selma, Ala., was awakened in the early morning hours by the sounds of an intruder trying to break in the front door of her mobile home. She managed to dial 911 just as the man entered, and when the man rushed toward her, she drew a pistol and shot him. Cleckler ran from the house; her attacker followed but collapsed not far from the trailer. (The Advertiser And Alabama Journal, Montgomery, Ala. 12/10)

Abducted at gunpoint from her Wheeling, W.Va., workplace by a teenager, a 43-year-old convenience store clerk was forced to drive her pickup truck to a desolate area. She was sexually assaulted by her captor, but the woman was able to grab her gun out of the truck. In an exchange of gunfire, the clerk shot and killed her attacker. (The News-Register, Wheeling, W.Va. 1/16)

Two men, one of whom was armed and wearing a ski mask, entered Gregory Ferris' San Antonio, Tex., gunshop and ordered Ferris and two customers to lie on the floor. After stuffing gym bags with handguns and stealing the people's wallets, one robber asked if the owner had handcuffs. Ferris directed the man to another part of the store, and when he saw that the man covering him with a gun was distracted, he bolted behind a counter where he was able to get his loaded shotgun. Ferris fired, critically wounding one man and forcing the other to surrender. (The Express-News, San Antonio, Tex. 2/16)

Springfield, Mo., TV anchorwoman Leanne Gregg asked a male friend to accompany her home because she was nervous about a previous break-in. Gregg and friend began checking the apartment room by room, and when she entered the dark bedroom she was attacked. The friend rushed into the room, and during an ensuing struggle drew a registered handgun and shot and killed the assailant. Police said the incident appeared to be justifiable homicide. (The Post-Dispatch, St. Louis, Mo. 3/2)

Sixty-year-old Mary Arendale of Holly Ridge, Miss., was home along while her husband was out hunting. Hearing noises in the family's country store, Arendale armed herself and investigated. Her one-year-old poodle, Rambo, led her to a man standing on a sink in the store. When the intruder lunged at her, Arendale opened fire—killing the man. Authorities found a stolen car near the scene. (The Clarion-Ledger/Daily News, Jackson, Miss. 1/14)

After several break-ins at the tool shed behind his Windsor, Calif., home, Victor Gavin rigged an electronic burglar alarm to the shed. When the alarm's buzzer sounded in the middle of the night, Gavin took his shotgun and investigated. He found a man in the shed shining a flashlight over the contents and captured the burglar for sheriff's deputies. "I told him what a shotgun could do to someone at that range . . . he was very cooperative," the homeowner said. (The Press Democrat, Santa Rosa, 2/19)●

DR. WALTER R. NICKEL

● Mr. WILSON. Mr. President, I rise today to pay my respects to the late Dr. Walter R. Nickel, a personal friend and one of California's truly outstanding citizens. Dr. Nickel passed away recently at the age of 81, after practicing medicine in San Diego for over 40 years.

Dr. Nickel served the people of San Diego as both a physician and as a noted community leader. Walter Nickel founded the division of dermatology at the University of California, San Diego Medical School. He also was a founder of four professional societies in the field of dermatology: the American Society of Dermatopathology, the Pacific Dermatologic Association, the Sonoran Dermatology Society, and the San Diego Dermatologic Society.

In 1983, Walter Nickel was named Citizen of the Year by the San Diego City Club, as well as Physician of the Year by the San Diego County Medical Society. He was a Mason for more than 50 years affiliated with San Diego Lodge 35, and a member of the San Diego Downtown Rotary Club. He was an enthusiastic supporter of the San Diego Zoo, the Boy Scouts, the San Diego Opera, and the San Diego Symphony.

Indeed, Dr. Nickel will be remembered as a pioneer of his field; he was the author of numerous books and articles and, no doubt, will serve as an inspiration to those who hope to

achieve his high standards of excellence. His expertise and unyielding enthusiasm will be sadly missed by the students, colleagues, and friends whose lives he touched. Mr. President, I would like to submit the following article from the San Diego Union in memory of Dr. Walter Nickel.

The article follows:

DR. WALTER NICKEL, NOTED DERMATOLOGIST

Dr. Walter R. Nickel, a leading San Diego dermatologist and a past president of the San Diego County Medical Society, died Sunday at his Point Loma home at the age of 81.

Dr. Nickel practiced for more than 40 years and treated more than 100,000 patients in the Medico-Dental Building downtown. His practice is now being carried on by his partner, Dr. John Lindholm.

In addition to his private practice, Dr. Nickel was the founding chairman of the Division of Dermatology at the UCSD Medical School, taught residents at the Naval Hospital for 40 years and taught at USC on a weekly basis for 20 years.

In 1983, he was named Citizen of the Year by the San Diego City Club as well as Physician of the Year by the San Diego County Medical Society.

He was native of Ohio and graduated from Hillside College in Michigan. He received his medical training at the University of Minnesota and the Mayo Clinic. During World War II he served in the U.S. Army Medical Corps as a major. His duties included service in the Philippines. He settled in San Diego in 1946.

His five sons participated in scouting through Troop 500 in Point Loma. they were the first family in the United States to have five brothers all attain the rank of eagle scout.

Dr. Nickel was a Mason for more than 50 years affiliated with San Diego Lodge 35, and a member of the downtown Rotary Club. He supported a broad spectrum of local civic, artistic and charitable activities with particular emphasis on the Boy Scouts, the San Diego Zoo, the San Diego Opera and the San Diego Symphony. He served on the board of directors of the Symphony Association.

In 1981, Dr. Nickel was named Practitioner of the Year, a national award given by the Dermatology Foundation. He was instrumental in establishing the field of dermatopathology as a recognized medical subspecialty. He was a founder and past president of our professional societies: the American Society of Dermatopathology, the Pacific Dermatologic Association, the Sonoran Dermatology Society and the San Diego Dermatologic Society.

In addition, he was an active member of numerous other professional societies including the prestigious American Dermatologic Association and the American Academy of Dermatology. He was the author of numerous books and articles.

He is survived by his wife of 50 years, Mona E.; five sons, James, Charles, Thomas and John, all of San Diego, and Russel of San Francisco, a brother in Ohio, and six grandchildren.

A memorial service is scheduled for 11 a.m. Saturday at the Point Loma Community Presbyterian Church, where he was a member for more than 40 years. Cremation is planned.

The family has suggested memorial contributions to the San Diego Dermatologic Society, the Boy Scouts or Hillsdale College. Contributions to any of these may be sent in care of P.O. Box 81829, San Diego 92138.●

AMERICANS WITH DISABILITIES ACT

● Mr. GRAHAM. Mr. President, it gives me much pleasure to be an original cosponsor of legislation which will prohibit discrimination against citizens with disabilities, the Americans with Disabilities Act of 1989.

Disabled individuals are one of the only segments of our population not afforded full protection from discrimination. They suffer from lack of access to education, employment, housing, and transportation.

The Rehabilitation Act of 1973 provided protection against discrimination in federally funded programs or entities. The Fair Housing Act of 1988 addressed housing discrimination against the handicapped. However, no comprehensive legislation fully provides equal opportunities for the handicapped. Clearly, it is time to integrate disabled individuals into every aspect of life.

The Federal Government spends almost $60 billion each year in benefits and programs for the handicapped. Much of this expense could be defrayed if the doors to the work place were opened for the disabled. Approximately 75 percent of unemployed disabled citizens between 16 and 64 years are unemployed, but surveys show that as many as two-thirds of these citizens would like to work. Subtle misconceptions and stereotypes continue to hinder successful and continuous employment for the disabled who desperately want their independence. This legislation will help to open those doors.

As Governor of Florida, I supported many legislative efforts to extend opportunities to the handicapped, and this bill is consistent with my efforts.

By encouraging independent living and self-sufficiency, we are accomplishing a meaningful social objective. As one representative from the National Federation of the Blind said, "You don't realize what it is like to have to rely on someone else for everything. Freedom and mobility are the greatest gifts you can give to the disabled."

Mr. President, the Americans with Disabilities Act will help us create an unrestricted and accessible environment for our Nation's disabled without imposing unreasonable restrictions or demands on the private sector. Our country's disabled deserve the chance to live self-sufficient and dignified lives. I commend Senator HARKIN for his leadership on this issue, and I urge my colleagues to support swift passage of this crucial initiative.●

MAYOR JAMES A. ALFORD

● Mr. LEVIN. Mr. President, on Saturday, May 13, 1989, a Sault Ste. Marie institution will formally retire—Mayor James A. Alford.

A member of the city commission continuously since 1967, Jim Alford has served as mayor of Sault Ste. Marie for the past 6 years. He has been a public servant in the truest sense of the word.

"Mayor Jim" has been honored as the Sault Sportsman of the Year and the Veterans of Foreign Wars "Citizen of the Year"; he is a member of the Upper Peninsula Sports Hall of Fame. In addition to his duties as mayor, he has served on the Puller Ice Arena Board of Directors, the Community Service Board, the City Economic Development Corporation Board, and the Safety Council.

Although his tenure as mayor has reached an end, Jim Alford will continue to be a vital force in Sault Ste. Marie affairs, as he has been for more than 40 years, and I will continue to call him "friend" because he has been that to me as well as to the Sault.●

STEEL VOLUNTARY RESTRAINT AGREEMENT PROGRAM

● Mr. HOLLINGS. Mr. President, this month, the administration is considering ways to implement President Bush's commitment to extend the Steel Voluntary Restraint Agreement Program. In the next few months, the Senate will be discussing legislation to extend the VRA Program. This issue is one of great national importance because steel is an essential part of our industrial base and our national security.

I would like to call to the attention of my colleagues an insightful, informative article recently published in the Washington Post. The article was written by the junior Senator from West Virginia, Senator ROCKEFELLER. Senator ROCKEFELLER has assumed the chairmanship of the Senate Steel Caucus this Congress. As a member of that caucus, I appreciate his leadership on this important issue. The article entitled "Steel and the Banner of Free Trade," documents the pervasive unfair trade practices of other nations in steel.

I commend this article to the attention of my colleagues and ask that it be printed in full in the RECORD.

The article follows:

[From the Washington Post, Apr. 19, 1989]

STEEL AND THE BANNER OF FREE TRADE

(By Jay Rockefeller)

President Bush announced in early November that he is planning to extend the steel voluntary restraint agreement (VRA) program which is due to expire in late September. It made sense for him to come to that decision, and it made sense to announce it early.

The issue is not free trade v. protectionism. Without question, the United States is the world's most open market among those of any significant size. In fact, this is a crucial part of the problem—no other major market will accept steel imports without severe restrictions. That makes the U.S. market the focal point of every country's steel exports.

Nor is the issue one of consumer costs. Unlike many other products, the real price of steel sold by U.S. producers is 20 percent below what it was at the beginning of this decade.

The issue is not one of price competition. Because of the sacrifices made by the industry and its workers, domestic steel is now produced at a price competitive with imported steel.

Has the need for VRAs passed? Although the industry had returned to profitability in 1987 and 1988, this performance must be put into perspective. From 1982 through 1986, the U.S. industry lost almost $12 billion, and for the 1980s as a whole its cumulative net income has been a negative $6.4 billion. Fifteen percent of domestic capacity is in Chapter 11, and most of the industry's securities remain rated below investment grade.

The steel issue is not primarily one between American consumers and American steel makers. It is a struggle between American producers and their foreign, often state-financed rivals. The primary problem facing American producers, who are among the world's leaders in productivity, is that steel around the world is massively subsidized.

For example, European producers alone received more than $40 billion from their governments in the 1980s. This is more than America has put into its space program during those same years. Without this aid, most of the integrated producers in Europe could not have exported steel to our market, but would have gone out of business altogether.

Italy plans to pour another $5.8 billion into its state-owned steel group, an entity that has not broken even for more than 15 years. Brazil wrote off more than $12 billion in debt for its state steel group.

New Zealand put nearly $650 million into its steel producer. Canada spent nearly $750 million, Spain more than $6 billion. France has provided about $8 billion to its two state steel groups, and Indonesia spent more than $500 million.

Korea, through exchange-rate manipulation, subsidies and protection of its domestic market, has become a major supplier to the U.S. market.

What operating subsidies has the U.S. government provided to its steel industry? Not one cent.

Massive subsidies not only have enabled foreign producers to sell below cost in the United States for sustained periods, but also to invest heavily in modern equipment despite losses that would have driven private enterprises into insolvency. Other countries, such as Japan, that are not even close to being cost-competitive in this market, must sell at substantial dumping margins in order to compete in the United States at all.

Every time there is an economic downturn, subsidized and protected foreign mills, which are usually state-owned, have continued to produce steel at a high rate, despite enormous losses, and have driven private firms both here and abroad into bankruptcy.

Following successive waves of dumping, the United States has ended up as the only major industrial country that is a net steel importer. This is a worrisome sign that the United States is the only country that has not realized the importance of domestic steel production. Steel is essential to our national security and serves as a cornerstone of our industrial base.

It is no wonder that the president has pledged to continue the steel program and that his trade representative, Carla Hills, has said that foreign steel subsidies and protection must be brought under effective international discipline.

And it is no wonder that 55 senators and representatives have cosponsored legislation I introduced with Rep. Jack Murtha to extend the current VRA program another five years after its scheduled expiration on Sept. 30.

For the first time an administration has announced at the outset what its steel trade policy will be. It has reduced the uncertainties for American producers and given them the basis for continued investment in efficiency, modernization, restructuring and upgrading technology.

There will continue to be critics of the program, those who naturally wish access to the cheapest steel whether dumped or subsidized or both, as well as those who ignore the harsh realities of the international competition in steel.

But the better informed the debate is, the more likely the consensus will be reached that the United States can no longer afford to wrap itself in the banner of free trade while ignoring the injurious industrial policies of foreign governments.●

ISRAELI INDEPENDENCE DAY

● Mr. RIEGLE. Mr. President, I rise today in commemoration of one of the most important events of the post-World War II era—the creation of the State of Israel. For 41 years, Israel has represented hope and freedom for the Jewish people throughout the world. Furthermore, it has been a symbol of modern democracy in a region of frequently unstable regimes. The tremendous success of this young state since 1948 is a tribute to the patience, courage, and fortitude of the Jewish people.

In ancient times, Jews first built their nation on the eastern shore of the Mediterranean Sea in a region once known as Palestine. After Israel succumbed to a series of conquests nearly 2,000 years ago, the Jewish people were forced into diaspora throughout Europe and the Middle East. Although faced with the genocidal campaigns of various anti-Semites, including the Cossacks and most recently the Nazis, Jewish culture and tradition remained alive. The critical turning point in Jewish history, however, occurred only 90 years ago, when Theodor Herzl, a Hungarian Jew, acted upon his aspiration to return Jews to their historical land east of the Mediterranean.

Herzl was a dreamer and a prophet. He knew that the Jews would have to leave Europe before they were driven out by anti-Semitism and pogroms. Still, before the Second World War, he could have not have foreseen the mass extermination of 6 million Jews carried out by the Nazis in Germany. After this nightmare in Jewish history, and 50 years after Herzl announced his dream, the U.N. General Assembly voted to establish the State of Israel.

Following its creation, this small country faced the onslaught of several hostile neighbors. Fighting for its very existence, Israel has managed to survive four wars and years of vicious terrorism. Yet, the courage and determination forged during centuries of exile enabled Jews to face these problems with vigor and unwavering tenacity.

Israel has not only been successful in defending its territorial sovereignty, but it has developed in a world leader in scientific and technologicial advancement. From medical research to advanced agricultural techniques, Israel has effectively carved out its place as a leader among nations.

With the exception of NATO, there has not been a more enduring relationship in the postwar era than the one between the United States and Israel. For 41 years, the maintenance of the security, territorial integrity, and the independence of Israel has been a pillar of United States foreign policy. This must not change. To turn our backs on this country would be to reject the values of liberty and respect for human dignity which has been the moving spirit for both of our nations.

The long, arduous, but successful fight for sovereignty, as well as the political and economic development of the last 41 years, give the people of Israel and the world much to be proud of. I am, therefore, pleased to join my colleagues in paying tribute to the citizens of Israel on its day of independence.●

MOTHER'S DAY

Mr. KOHL. Mr. President, Mother's Day is an appropriate time to acknowledge the women and families of this great Nation, Mr. President. The economic pressures that have come to bear on American families are not only altering our workplaces and our homes, but are mandating that we adjust our policies—public and private—to accommodate those changes.

The fastest growing segment of the work force is married mothers with children under 2 years. Today, 3.1 million work, a 129-percent increase since 1970. In addition, half of mothers of infants under the age of 1 are employed outside of the home. Yet less than 1 percent of private workplaces provide child care.

Seventy-three percent of women in prime childbearing years are in the work force today, compared to 35 percent in 1950. Yet 60 percent of female employees work for companies with no disability policies.

The demographics of our aging society are staggering. With longer life expectancies, more middle-aged workers—generally women—must care for their parents, as well as their children. It was recently brought to my attention that the average woman will spend 17 years caring for a child and 18 years caring for parents. Where are our commitments to caregiver and care recipient? We must help the family in its long-term care needs.

We have hobbled through a decade of latchkey children, of faltering scores in academic performance, of inadequate nutrition and access to health care, of increased rates of infant mortality and low birthweight. We have watched women struggle for equal opportunity, pay, pension and retirement equity. We have seen the consequences of our failure to provide adequate resources and support to American families. And it is our failure, Mr. President. We must expand the choices available to the family.

The future of this Nation—our ability to compete in the international area, our investment in health research, our export of peace and understanding instead of war and guns—depends on our children. Strengthening the family, providing universal access to health care and giving our children a real head start, Mr. President, those must be priorities for us even in the most lean of fiscal years.

Today, I want to declare my support for the Act for Better Child Care, the Family and Medical Leave Act, and for a public/private partnership on family support programs. Our colleague from Maryland was quoted a few months ago as saying, "This is our year for a real family policy." I hope she is right.

To the millions of working women both in and out of the home, my respect. To their children—and to the refreshing dreams and hopes they offer all of us—my pledge to do all that I can to make this a better, healthier, safer world.●

TRIBUTE TO BROWARD COUNTY SENIOR VOLUNTEERS

● Mr. GRAHAM. Mr. President, I would like to take this opportunity to pay tribute to Florida's 1989 electees to the Dr. Nan S. Hutchison Senior Hall of Fame. During the month of May, which is "Older Americans Month," I think it is particularly fitting to pay tribute to senior citizen volunteers who embody the spirit of voluntarism by generously giving their time and talent to many deserving enterprises.

I salute: Lottie Albert, of Lauderdale Lakes, for her extensive work in Broward County and her successful efforts to secure grants for the Medivan; Bessie Ashley, of Fort Lauderdale, for her work in education and her outstanding contributions to the community; Jean Booher, of Fort Lauderdale, for her continuous assistance and care for children who have been abused, abandoned, or neglected and her assistance with legal matters to those in need; Lillian Cousin, of Fort Lauderdale, for her creative support of and care for her neighborhood and community; Ray Fox, of Deerfield Beach, for his leadership in various fundraising projects and his efforts for the improvement of his community; Arnold and Margot Gottlieb, of Hollywood, for their contributions to Memorial Hospital and their community service.

I commend: Dr. William Perlman, of Tamarac, for his dedicated work with Alzheimers disease groups; Sally Sandler, of Fort Lauderdale, for her far-reaching support of and contributions to her community; Kenneth Schifferson, of Tamarac, for his considerable assistance with Amvets Post 2 of Tamarac and with Cancer Hotline, Inc.; Constance J. Senatore, of Cooper City, for her involvement with the American Cancer Society's Reach for Recovery Program and American Red Cross, and her gift of entertainment.

I am especially proud of the spirit of voluntarism that these special senior volunteers display. Volunteer service represents an investment of human resources by the participants and in the recipients, and it is an important element of life in the United States. I applaud these outstanding Americans, and wish them success in their future endeavors.●

TRIBUTE TO RICHARD GREEN

● Mr. DURENBERGER. Mr. President, there is an old Chinese proverb that goes like this:

If you plan for a year, plant a seed. If you plan for ten years, plant a tree, if you plan for a hundred years, teach the people.

The people of Minnesota and America lost a man who had committed his life to the 100-year plan of education, Richard Green.

I first met Richard in the early seventies, when I held my first public office, president of the Burroughs Elementary PTA. Richard, newly appointed as superintendent of the Minneapolis public schools, attended our first meeting. He served in that post with incredible energy, devotion, and success for 8 years. Recently, he assumed one of the greatest challenges in public service in the Nation: restoration of the New York City Public Schools. His work was cut short by his sudden and tragic death yesterday.

Mr. President, we cannot begin to calculate the value to our society of people like Richard Green. America's children do not vote, or control economic power or have a clear voice in the decisions which shape our country. And yet they literally are our future. We should all be thankful for champions like Richard Green, who fight for children and in the process, fight for us all. His passing is a call to all of us in public life to take up his challenge and move on.

I ask that a number of articles and tributes to Dr. Green appear at this point in the RECORD.

The material follows:

[From the Minneapolis Star-Tribune, May 11, 1989]

RICHARD GREEN: EDUCATION'S FIERCE WARRIOR

New York City lost a chancellor of schools, public education lost a fierce advocate and Minneapolis lost one of itrs special sons Wednesday with the passing of Richard Green. He died of asthma-related heart failure in New York. Green suffered from the illness most of his life, but the condition worsened when he moved to New York a year ago to take on what many considered the toughest job in education—rejuvenation of the city's failing public schools.

As a teacher, principal and then superintendent of the Minneapolis school district, Green was a warrior for those he considered the forgotten children in American education, the poor and otherwise disadvantaged He pushed through programs he believed would lift them onto the ladder of opportunity. The innovations he implemented made Minneapolis a leader among urban school districts. He put a strong and steady hand on the tiller at a time when the district was drifting.

When he left to take the chancellor's position friends feared he had taken on a hopeless task, but in a little more than a year he had made a start—if barely that—at turning the city's schools around. His charge to New York teachers typified the single-mindedness that made many educators love him. "Keep your eye on the prize, the children are the prize," he exhorted teachers, as he promised to be their No. 1 cheerleader.

A Minneapolis native who grew up poor, Green didn't share most Minnesotans' aversion to confrontation. He could be brusque with parents as well as staff, and openly hostile to critics. He gathered power with great jealousy. He fought program changes he felt would help some children at the expense of poor kids, angering many middle-class parents in the process. He was too quick at times to raise racism as an issue when opponents spoke up. But in an era when many public officials lack passion, Richard Green held high the sword for children who couldn't fight for themselves. The nation could use more like him.

[From the Minneapolis Star-Tribune, May 11, 1989]

GREEN'S LEGACY IS FOR ALL CHILDREN

How did a street fighter from north Minneapolis become one of the great educators in America, Harry?

Tell us, what is the distance from a settlement house in Minneapolis to the chancellor's office of the world's biggest school district in New York City? Tell us, so that we can measure that distance in sweat and hunger and the electric surges of a restless, exploring mind.

Explain what there was inside, Richard Green that we should mourn most, Harry, because most of us didn't walk the street that Richard Green walked.

"The street he walked to school every day as a boy took him past pimps and prostitutes and drifters," Harry Davis said. "He

didn't have many illusions about the world by the time he was in grade school." Nor did he have many visions of the future when he was a kid, no silent furies driving him toward some personal chalice.

"What he had," Harry said, "was belief and confidence. He knew he was different, and one way or another Richard Green would matter, whether it was in a playground fight, the classroom or someplace else. He mattered more than he could possibly have guessed when he was a kid. And now he's gone."

Harry said it often enough Wednesday to accept the reality of it. Richard dead—the nursery school kid he met nearly 50 years ago at the Phyllis Wheatley House; the cheeky boy to whom he gave a pair of boxing gloves a few years later, telling him there was a better way than duking it out in the street; the man who sat beside him at school board meetings in Minneapolis, presiding as superintendent; the man he heard addressing the Urban League in Minneapolis just two weeks ago, seemingly healthy and vigorous, speaking from the maturity of a mind now grappling with the futures of nearly a million children.

"I'll never forget the conversation we had when the list for the New York City job had been pared down and he was one of the finalists. He asked me what I thought about it. I said, 'You're not going to take that job? You have to be crazy.' He had that habit of tilting his head a little when he talked, always moving, light on his feet. And he said, 'Hey, you always taught me to go for it. And here's a chance for that snot-nosed kid you knew years ago to become chancellor of the biggest school system in the country.' He laughed, and there was no turning back. There shouldn't have been. He was right, and he was the best man for the job."

Expect no public tears from Harry Davis in the death of Dr. Richard Green, to whom he gave what most fathers give their sons: a hug, a direction, forgiveness and trust. If that is love, it is what Harry gave to Richard. Harry is not Jesse Jackson and he is not Martin Luther King. There are leaders who can define the tragedy, the yearnings and the greatness of their people in language so powerful and lyrical that it can ignite all people.

Harry is not one of those. He is a calm and understated man whose canvas is smaller. He has been a teacher and friend and a public man, a school board member. Somewhere in that process he has, incidentally, saved thousands of lives. But he will tell you that Richard Green was saved and ultimately turned into a figure of national leadership by two people—his mother, Gertrude, and by Richard Green.

"She did day work, cleaned houses, to feed her kids, She took them to church. She gave them her energies," Harry said. "Nobody else gave Richard what was inside of him. He was aggressive and smart and full of energy. Any group he was in, he was the leader. Sometimes he was a peacemaker and sometimes he was the enforcer. He was a persuasive kid. He was an athlete and he could think on his feet. I would put him in with kids of more experience because he was more mature. In the kind of world he grew up in, you had to be able to run or fight. Richard could do both. Racism was everyday then. It was part of your life. It was thick then. You had to find a way to deal with it. It's why I got into Golden Gloves. The kids could take out their aggressions that way.

The Phyllis Wheatley settlement house in north Minneapolis was a refuge and learning center. Long before desegregation decisions and Martin Luther King, before the slogans of black pride, it was a house of black brotherhood and a door to survival for the kids. Their role models were Cecil Newman and Gertude Brown and other blacks in the community who had stood up to racism and in whatever way seemed serviceable, stung the conscience of the institution. Wheatley nurtured young men whose names later occupied the forefront of the black movement of the middle century; Roy Wilkins, Whitney Young, Carl Stokes, Carl Rowan and others.

Athletes good enough to play for the University of Minnesota football team lived at Wheatley. They were good enough to play, but not good enough, or white enough, to live in the university dorms. In the Wheatley of those years, teenagers like Harry Davis adopted kids like Richard Green as their students and projects.

"He was a terrific student, but he was also disruptive. He was assigned to Vocational High School, which in those years was a kind of work opportunity school. Gradually he grew out of the tough guy mentality. It was more satisfying to use his mind. He wasn't satisfied with the street vocabulary. He worked on his own from grade school."

Sometimes he would tell one of the dudes, at 9 or 10 years of age. "How come you're so belligerent?"

I'm what?

"It means push. You can look it up."

From Vocational, there was a scholarship to Augsburg, teaching in Minneapolis, assistant principal, principal at North, a doctorate from Harvard, upward for Richard Green.

The commencements were starting to get sloppy at North when he came in, Green stopped that. Graduating from high school meant that you had done something, that you counted. Feel it. Wear it. He told the girls to come in formals and the boys in tuxes the next time. They still do.

The man who gave Richard his boxing gloves at Wheatley was the one who urged him to apply for the Minneapolis school superintendency. "When the interviews started." David said, "I feel good about that. We had a lot of good candidates but Richard stood above them. He had the information. You asked him, and he looked you straight in the eye and he gave you answers. When he was in the job, he didn't back away from hard decisions. He closed 18 schools in one year because it had to be done. He irritated some people because of his straight-ahead style. They called it arrogance. Another name for it is leadership. He'd write to me from New York, telling me of bits of progress here and there. He really was excited about doing something for those kids. He was restless about it. Education was everything for him. He said nobody can give excuses for learning."

He felt it deeply not only because he was a professional educator, but because he was black. He knew better than most drawing from his years in north Minneapolis, the truth about quality education: It is as vital as blood and air for people in want. In a rough way, his life mirrored the struggle of his people. As a boy he felt the abuse, he responded with protest and defiance, and finally he saw that the most durable way for Richard Green—without discounting the other ways—was the way of the school. He carried that message to city kids of all colors for the rest of his life, and from this city to New York, it will ring loud and clear.

[From the Minneapolis Star-Tribune, May 11, 1989]

FORMER MINNEAPOLIS SCHOOL CHIEF GREEN DIES—NEW YORK DOCTORS SAY ASTHMA CAUSED 52-YEAR-OLD'S DEATH

(By Mike Meyers)

After 14 months in one of the most prestigious and punishing jobs in U.S. education, New York City Schools Chancellor Richard Green died after an asthma attack Wednesday morning. He was 52.

The former Minneapolis schools superintendent, who had suffered spells of asthma since early childhood, was rushed to Roosevelt Hospital at 2:40 a.m. yesterday after he stopped breathing in the bedroom of his Manhattan apartment.

Gwen Green had awakened to the sight of her husband walking with difficulty and showing signs of labored breathing. She said he told her, "I'm not going to make it."

Soon he lost consciousness. His wife performed cardiopulmonary resuscitation, with the help of instructions from an operator at the 911 telephone switchboard, but her efforts failed to revive him. Emergency teams arrived within five minutes of her call and found a doorman holding open an elevator to take them to Green's 34th-floor apartment, near Lincoln Center on Manhattan's West Side. He was declared dead at 3:09 a.m. New York time.

Green, who left Minneapolis for New York in March 1988, died of acute and chronic asthma, according to an autopsy performed by the New York City Medical Examiner's Office.

The chancellor's body will lie in state from 4 p.m. to 8 p.m. today at the Cathedral of St. John the Divine in New York City. His family is expected to attend a memorial service at 11 a.m. Friday at the cathedral. The funeral is expected to be held Saturday morning in Minneapolis, but the site and time had not been finalized last night. Donations in Green's memory are being accepted by the Frank S. Hale House for Infants, 154 W. 122nd St., New York, N.Y. 10027.

In Minneapolis, a memorial service will be held for students at 10:15 a.m. today at North High School, where Green was principal and a teacher before he became superintendent.

Green had been admitted to a hospital briefly after an asthma attack about three years ago, said his mother, Gertrude Green, 74, of Minneapolis. But family members said he appeared in good health recently.

While many people in Minneapolis were aware of his continuing health problem with asthma, few in New York outside a close circle of friends and colleagues knew about it. A doctor consulted by the New York Board of Education had declared Green fit for the rigorous job of chancellor.

One of Green's daughters, Kelley, 25, who works for a record company in New York, accompanied her father and mother to the hospital early yesterday. Green was the father of three other children, Craig, 31; Kimberlee, 24, and Sherri; 23, all of Minneapolis.

"I was just talking to my dad yesterday," Kelley Green said. "We were just joking and talking. The asthma wasn't bothering him at all." But after Green and his wife returned from dinner with friends, Kelley said, he was having trouble breathing.

Stress is linked with asthma attacks, and Green's $150,000-a-year job was an endless string of 12-hour days and six-day weeks that involved shuttling among five city boroughs, Albany and Washington, D.C., in

search of moral, political and financial support to fulfill his dreams for New York children.

The mental and emotional strains of the post also were burdensome. By virtue of his title and his personality, Green frequently played the role of sparring partner for elected officials, educators, parents and editorial writers who took swipes at the strife in New York City schools. Last fall, a local magazine ran a profile of Green under the headline: "Green, Without Envy—Chancellor in the Snake Pit."

In recent weeks, Green had been at the center of big battles over big money. He lobbied hard to keep the financially strapped state and city governments from cutting aid to New York schools, which don't have the authority to levy taxes. Green had proposed an 11 percent spending increase, putting him in charge of a $6.2 billion budget—roughly enough money to keep the city of Minneapolis operating at current levels for 28 years.

New York school officials said Green displayed an athlete's stamina, rarely complaining of his asthma and never missing a day of work because of his physical condition.

As the city's first black chancellor, Green at first was greeted warmly by many New Yorkers as a fresh hope for solving many of the rancorous divisions in a school system that many whites and upper-income residents fled long ago. The child of a poor family, Green came out of a Minneapolis housing project, earned a doctorate in education from Harvard and won a national reputation for improving the quality of education in Minneapolis schools. Green seemed a role model that educators, parents and students could embrace.

Yet the legacy he leaves for New York schools remains unclear.

Within hours of Green's death, he was praised by politicians, educators and union officials, some of whom had needled, castigated and undercut him almost from the day he was installed to lead a school system made up of 1 million students, 62,000 teachers and a panoply of problems, including weapons, drugs, racism, corruption and crumbling classrooms.

Cuomo suggested naming a New York City school building after Green.

Mayor Edward Koch, who displayed something of a love-hate relationship with Green in many clashes over policy issues, lamented the loss of the chancellor within minutes of his death. Koch arrived at the hospital less than an hour after Gwen Green had dialed 911 for help.

"We'll miss him," Koch told reporters at the hospital. "I was a great admirer of him. I thought that he had the ability to have a major positive impact on the school system. In the short time he was here, he demonstrated that."

Several weeks ago, Republican mayoral candidate Ronald Lauder publicly urged the New York Board of Education to fire Green, saying that New York schools had gotten worse during his tenure. Soon thereafter, New York City Council President Andrew Stein and U.S. Sen. Alfonse D'Amato, R-N.Y., held a press conference to claim that Green had failed to do enough to stop the spread of drugs among teachers and students.

On both occasions, Board of Education President Robert Wagner Jr. defended Green's performance and said the chancellor's critics were overlooking his accomplishments in starting pilot drug education programs, cutting school bureaucracy, fighting for more public spending on education and establishing an independent agency to rebuild or replace scores of decaying schools.

Wagner echoed that theme yesterday at a news conference in the Board of Education meeting room in Brooklyn. Only a few feet behind Wagner was Green's empty chair, with his name written in gold leaf.

"He became a true New Yorker and has given us a tough act to follow," Wagner said. "Rather than take steps back, we must now travel up the path Richard Green put us on."

Lauder, Stein and D'Amato yesterday issued statements praising Green for his contribution to New York education.

"After all, people can disagree about policies and personnel, but I think everyone recognizes that Richard Green was a sincere and caring man," Lauder said. "Public life is poorer whenever we lose a man with those qualities."

From his first day in New York, Green lived a grueling schedule that was filled with challenges. Wagner and other school officials praised Green for his disdain for grabbing headlines and using education issues as political levers to wrest money from City Hall and the State Capitol. But in the eyes of critics, Green's cautious attitude about publicity was no virtue.

Again and again, Green was taken to task by editorial writers and critics quoted in newspaper articles for taking too long to study the problems of New York schools and being too slow to take action. One observer said the chancellor's job description called for "a cross between Mother Teresa and Rambo." But Green was always cautious about shooting from the lip, especially when it came to trading fire with Koch—a mayor who often used the school system as a target for barbs.

"Many people have wondered: If a person initiates ideas in education, is that person running the system?" Green said in an interview that touched on his relationship with Koch and other New York politicians.

"Absolutely not," Green said. "My view is that we all have something to bring to the table. . . . My style has been to listen very carefully and then decide if the suggestions have merit."

But school officials said yesterday that Green could take credit for a long list of accomplishments achieved during his short tenure.

Some were symbolic, such as eliminating time clocks teachers once had to punch when arriving and leaving school. Some were administrative, including his paring of more than 600 jobs from the central office of the school district—a blow to bureaucracy that freed $34 million for classroom instruction.

Green also was quick to take charge of four community school boards where elected officials had been indicted on charges of patronage or accepting kickbacks from school vendors. But battling corruption seemed to be a full-time job in itself. At least 21 of the city's 32 community school boards are being investigated for possible law violations.

Perhaps Green's greatest accomplishment was persuading New York legislators to create an independent agency to raise capital for and oversee construction of new schools and remodeling projects. In the next five years, Green had hoped to replace as many as 100 decaying schools with billions of dollars' worth of new classrooms.

FORMER MINNEAPOLIS SCHOOL CHIEF GREEN DIES—WHEN IT CAME TO CHILDREN, NONSENSE GREEN WAS TEMPERED BY COMPASSION

(By Mary Jane Smetanka)

Richard Green's legacy is not in brick and mortar or school rules or benchmark tests. It's in dreams like the one Peter Hutchinson was mulling over Wednesday, sitting in his Minneapolis office high over the city Green cared so much about.

"He was cantankerous sometimes, and he argued sometimes, but you knew he listened and you knew he loved the kids," said Hutchinson, a vice president for Dayton Hudson Corp. "That's pretty damn big stuff. There are few people in this world who are convinced of the innate worth of all people. . .

"It's the belief, the dream that counts . . . that we can make the school system and the community work for every person here, no matter who they are. That's what Richard Green stood for."

Green, a scrappy kid from north Minneapolis, carried his compulsion for achievement from the sandlot football fields of his youth to New York City as chancellor of the nation's largest school system. In almost eight years as Minneapolis superintendent he made more structural changes in the schools than any leader in recent memory. But his bigger achievement was helping to change the way those with money and power thought about children who had neither.

"He truly believed that you judge a society on what it does for its least fortunate members," said school board Chairwoman Pat Scott. "He helped us all to commit ourselves to make our system work for everybody."

As a school administrator and a man, Green often was an enigma. Rude and intimidating one minute, he could be warm and funny the next. Subordinates say he was demanding but never inconsiderate. Corporate leaders found a soul mate in the no-nonsense workaholic who turned on the charm when he needed to. Friends describe a steadfast friend who expressed affection with a bear hug. While he was hailed as a hero when he left Minneapolis, some parents had tired of what they called his arrogance and were glad he left.

In his year in New York, Green lived in society. But friends say Green's actions, there and here, always reflected his childhood in a north Minneapolis housing project. His abruptness was tempered by compassion, especially where children were concerned.

When a little girl was hit and killed by a Minneapolis school bus several years ago, Superintendent Green and a colleague went to the funeral home only to discover the small casket standing stark and alone. Green angrily said it was wrong for a child to have no flowers and told the funeral parlor to buy some and charge them to him. When School Board Member Phil Olson was dying of cancer, too ill to drive himself to radiation therapy, Green found time to do it himself.

"I think he really felt he had been given so much and had to give back for all the opportunities that he had had in his life," said Joy Davis, who was school board chairwoman during Green's tenure as superintendent.

"He was very straightforward, no nonsense. . . . But he could also be the most extraordinarily caring, touching person. If

people could only see him in a closed room with a student during an expulsion hearing. Richard Green was an incredible person: very firm but gentle, loving, making an impact on some kids who could be very hostile."

Green grew up poor on the North Side, raised by his mother who moved to Minneapolis from Arkansas with three small children when Green was 2 years old. He recalled later that persistent asthma sometimes forced him to sleep sitting up in bed, but he fought the disability and excelled in sports. As a teenager, Green had a brush with juvenile authorities and did a short stint in reform school. After that he directed his energy toward academics and sports at the old Vocational High School.

He won a scholarship to Augsburg College, majoring in business before switching to education. Years later, he said his Minneapolis teachers had made an impact on him, remembering them as a group of strict women, all white, whose sole disciplinary tool was a stern stare.

For several years Green taught at a residence for delinquent boys, then moved to Minneapolis schools as a special-education teacher. His ability and ambition were noticeable from the start and he rose through the ranks to assistant principal, then principal and area superintendent. Support from city businesses helped send Green to Harvard University, where he earned his Ph.D.

In 1980, with city schools floundering under a weak administration, Green became superintendent. He was the city's first black school chief, a precedent he would set again in New York.

Minneapolis schools were transformed during the Green years. Eighteen schools were closed and some of the district's most popular high school and elementary school programs were created. The district was desegregated and freed from federal court supervision that had lasted more than a decade. Uniform curriculum requirements were imposed on schools, giving all students access to classes such as foreign language. Citywide discipline codes were established. Cooperation with business and outside agencies increased.

One of Green's most ambitious efforts was to end social promotion, the practice of automatically moving children from grade to grade. With benchmark tests, Minneapolis became the first district in the nation to flunk kindergartners.

The reforms reflected Green's most basic belief. All children deserve the best from schools, and every one can learn. That message earned Green lasting impact in the district, said Louise Sundin, president of Minneapolis Federation of Teachers Local 59. "He instilled in us the heartfelt belief that every child is worthwhile and can succeed if we believe they can," she said,

During the latter years of Green's superintendency, there was speculation that he would leave. Many of his goals had been accomplished. At the same time, a pocket of vocal parent discontent developed. They complained that the district wasn't receptive to their concerns, wasn't flexible enough, was too centralized, wasn't putting enough effort into helping average and good students. The discontent culminated in a bitter 1987 school board election, When Green himself bacame an issue and two board members were unseated.

In an office conversation a few days after the election, a subdued Green said it was time for him to leave the superintendency. He said he would never seek another urban school superintendency; that most such jobs were doomed to fail because of the enormity of the problems and complex politics. He also mentioned the stress. "I don't need it," he said, speculating that perhaps there was a future in nonprofit administration.

Not long afterward, Green's name surfaced as a finalist for the New York City job. When the announcement of his appointment was finally made early in 1988, news media there presented Green as the savior of New York City schools.

The honeymoon lasted about as long as Green's sentimental two-month farewell to Minneapolis. Friends here maintained contact with the new chancellor by letter, phone calls and encounters at conventions and during his frequent visits home. They said Green chafed at the political limits of his new job, struggled to master the system's incredible bureaucracy and was continually irritated by the aggressive New York press.

"The frustration came in its normal manner with him; he was impatient and wanted to see things done," said Earl Bowman, a friend since childhood and president of Minneapolis Community College.

Last winter, Green appeared weary and ill, according to several friends. But he seemed a new man when he visited Minneapolis three weeks ago for an Urban League dinner. While he still battled the asthma that for years had made him audibly wheeze during school board meetings (the driver who picked him up at the airport stopped at a drugstore so Green could pick up medication), Bowman and others say Green was upbeat and seemed healthier than he had in a long time.

Bowman talked with Green at length that weekend and played golf twice, Green an avid golfer, beat Bowman twice and the two joked about trading their dollar bet back and forth all summer. In conversation, Green would gesture at close friends nearby and say, "This is what I miss."

The news of Green's death spread quickly yesterday in rounds of early morning phone calls. Many, including Joy Davis, said they were upset but not really surprised. Green was always compulsive about work, she said, driving himself hard no matter how tired or ill.

Hutchinson, vice president for external affairs for Dayton Hudson, wanted to talk about Green. The only person who influenced him more, he said, was his father.

"I think what Richard helped me do is believe, as I know he did, that we really can make a community for all our people," he said. "If he was cantankerous, and he clearly was, it was because he believed in the dream and other people didn't. Yeah, he drove people crazy, that's what dreamers do. But I felt lucky that Richard Green came into my life and helped me appreciate the power of dreaming and the power to change things. Because without a dream of how it could be, it won't be."

[From the Minneapolis Star-Tribune, May 11, 1989]

A CHAMPION FOR POOR AND POWERLESS PEOPLE HAS FALLEN

Many Minnesotans expressed sorrow Wednesday on the death of Richard Green and spoke of his accomplishments. Excerpts follow:

Gov. Rudy Perpich: Dr. Green proved himself to be one of our nation's foremost educators and certainly ranks as one of the finest public servants in the history of Minnesota. He was a brilliant, decent and honorable man who will be missed by those who knew and loved him, and by succeeding generations of students deprived of his vision and leadership.

Ruth Randall, state commissioner of education: It's a terrible tragedy. He was really in the prime of his life in contributing to education and all of society. When he was here last month for the Urban League annual meeting it was my privilege to introduce him. It was a delight to see so many people shake his hand and greet him or give him a hug. And I said to him, "You are nurtured when you come back to Minnesota," and he agreed.

Minneapolis Mayor Don Fraser: I think he was one of Minneapolis' most distinguished citizens. He made a great contribution to our schools and he was a very energetic, vital person who I think really impressed everyone he dealt with. He's the one that got me involved in worrying about young people.

Alice Rainville, Minneapolis City Council president: It's a real tragedy for the minority community. This morning I asked that the flag at City Hall fly at half staff in tribute to Dr. Green. The minority community needs male role models. The loss of Dr. Green really robs them of an outstanding model.

Robert Carothers, chancellor of the State University System: What I always valued most about Dick was his combination of creativity and persistence. He would never lose sight of what he was trying to accomplish, but he was always aware of new ways to get there. It's like you send in the artillery and then you work out a way to find peace.

The Rev. Curtis A. Herron, senior pastor, Zion Baptist Church, Minneapolis: (Green was a member of the church since childhood.) We feel a great loss because he was someone with whom we could identify who had overcome great obstacles to achieve great success. And we feel a loss because a champion for poor and powerless people has fallen.

Gleason Glover, president, Minneapolis Urban League: The death of Dr. Green was a shock to all of us in the black community. But we have also lost a highly respected educator who had a vision for improving the educational system for this country. He was a model to many black and disadvantaged youth who felt that if Dr. Green could make it with his background, so could they. The Urban League has lost a very dear supporter and I have lost a personal friend.

Ron Edwards, president of KMOJ radio: I think Richard left a tremendous legacy, not only to the community but to the entire state of Minnesota and the institution of education. In my own personal estimation, as an individual who saw Richard as a hero as I grew up in this city, he represented all that was success and was truly an inspiration to hundreds of us.

David Tilsen, Minneapolis school board member: He touched a lot of lives. Richard dedicated his life to convincing society that without children, none of us have a future. To people who said that New York City was not solvable, he always answered that "we don't have a choice. If public education can work in New York City, it can work anywhere."

Judy Farmer, Minneapolis school board member: The real tragedy was that someone who was going to be 53 years old on the 27th of May is not going to have a chance to have more time to do the kinds of things for children that he wanted to do.

David Bennett, St. Paul superintendent of schools: Richard and I were more than colleagues across the river, we were close personal friends and we continued to see each other frequently after his move to New York City. In our most recent conversation, he expressed strong conviction that his efforts at redirecting the New York City school system were gaining a foothold. That makes his passing at this time all the more tragic.

Richard Mammen, executive director, Minneapolis Youth Coordinating Board: Richard was a friend. This community has never had a stronger advocate for children than Dr. Green. He did more to draw attention to the needs of kids, particularly troubled kids, than anyone has ever been able to do. Kids respected him because he respected them.

John Davis, former Minneapolis superintendent of schools: He was a crusader and the world needs more of them. His life was a personal triumph and many are the beneficiaries.●

ARMENIAN GENOCIDE

● Mr. RIEGLE. Mr. President, I rise to ask my colleagues to recall the atrocious act of genocide committed against the Armenian people in 1915. It is vital that we never forget this dark chapter in history and remember the approximately 1.8 million Armenians massacred in order to reaffirm our commitment to the prevention of genocide.

Genocide, as defined by the United Nations sponsored Convention on the Prevention and Punishment of the Crime of Genocide, which the United States has ratified, is the "intentional destruction of any national, ethnic, racial, or religious group." Turkish military campaigns against the Armenian people, first initiated in 1894, are examples of such abhorrent crimes against humanity. These slaughters reached a peak during World War I. By 1918, an estimated 1.8 million Armenians had been murdered while thousands more were driven out of their homes and forced to flee to other countries.

On April 24, 1989, hundreds of thousands of Armenians gathered in the streets of the republic's capital, Yerevan, in the first commemoration of the victims of genocide officially approved by the Soviet Union. Though the Armenian people have celebrated this anniversary in the past, Soviet officials have continually denied Armenians legal remembrance of their victimized ancestors. This year's commemoration is the first to be declared an official holiday by the Soviet Government.

Armenians have finally obtained this long-deserved recognition through persistent efforts to demonstrate their feeling of national identity. Mass nationalist protests over the last year have gained worldwide attention despite obstacles such as the military-supervised curfew imposed by Soviet authorities and the devastating earthquake which took the lives of approximately 25,000 Armenians.

The history of the Armenian people is burdened with periods of death and subjugation. These memories evoke strong sentiments among peoples of all nations to actively strive for the protection of human rights. I ask that when my colleagues recall the tragic incident of genocide committed in 1915, they also keep in mind the fortitude of the Armenian people and their endless struggle for national and human rights.●

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, for the benefit of Senators, as I indicated earlier, there will be no rollcall votes today, and after disposition of a relatively few matters by unanimous consent, the Senate will shortly recess until tomorrow. On tomorrow, there will be no rollcall votes. There will be debate continuing on the resolution of disapproval of the FSX transaction.

We will also on tomorrow morning seek to obtain unanimous consent for the disposition of that resolution and it is my hope that disposition will include following debate tomorrow resumption of the debate on that resolution on Tuesday with a final vote on the matter sometime during Tuesday, most likely in the afternoon.

That will be important to accomplish because there will be several important matters before the Senate next week in addition to disposition of the FSX transaction.

We expect to have the conference report on the budget resolution. We expect to have the conference report on the minimum wage. And we will have the supplemental appropriations bill.

It is imperative—I repeat, imperative—that we complete action on the supplemental appropriations bill before the Senate recesses at the end of next week. With all of these matters before us, Senators should be aware that sessions during the evening on next Tuesday and Wednesday, and if necessary on Friday, are possible if not likely. So that Senators may be forewarned in adjusting their schedules, we may not be able to adhere to the 7 p.m. limit on rollcall votes on Tuesday and Wednesday as we have tried to do throughout this session so far.

I emphasize that we expect to get, or we hope to get a supplemental appropriations bill from the House on Wednesday. There will then be required action by the Senate Appropriations Committee which we hope will be prompt and we will then get it sometime on Thursday, if that is possible, and I know that the distinguished chairman of the Appropriations Committee will as always be fully cooperative in that regard. But that committee is going to want to act on it and then we have to complete that before we leave next week. This is imperative.

There are some very important matters in the supplemental appropriations bill.

I have discussed this with many of my colleagues including the distinguished Republican leader, and Senators should be aware that we will stay here next week until we finish the supplemental appropriations bill, whatever that takes.

So Senators may now be aware of the schedule in summary it is as follows: There will be no rollcall votes today. The Senate will be in session tomorrow debating the FSX matter. There shall be no rollcall votes tomorrow. The Senate will not be in session on Monday. The Senate will be in session on Tuesday and we hope then to complete action on the FSX matter pursuant to the unanimous-consent agreement which we will seek to obtain on tomorrow. Thereafter, we will take up the conference report on the budget, the conference report on minimum wage, and the supplemental appropriations bill.

Before I move to the other unanimous-consent matters for this evening, I yield to the distinguished Republican leader if he has any comments or questions.

Mr. DOLE. Mr. President, I only indicate that I agree totally with the distinguished majority leader on the FSX matter on this side of the aisle. The proponents of the FSX agreement time on this side has been managed by the distinguished Senator from Indiana [Mr. LUGAR] and, as the majority leader knows, we had an informal discussion with Senators LUGAR, DANFORTH, and DIXON and the two leaders. It is our hope we can complete action on the resolution before us on Tuesday next, and I know Senator LUGAR will cooperate in every way that he can.

I also believe that it is good to give notice now, as the majority leader has, on the other matters next week which are very important, particularly the supplemental. The others are important and they can be acted on rather quickly, but the supplemental can take some time.

In addition to passing that bill, I assume we have to in some way go to conference depending on what happens in the House and still have maybe a conference report next week, so in addition to the bill itself there has to be some time for a conference and perhaps the conference report can be dealt with on a voice vote.

In any event, I appreciate knowing in advance the majority leader's intentions as far as working beyond the 7 p.m. hour next—that would be Tuesday, Wednesday, Thursday, and

Friday and we will so notify Members on this side.

Mr. MITCHELL. I thank the distinguished Republican leader.

As he has indicated we discussed this matter informally with the Senator from Indiana who has been designated as in charge of allocation of time in behalf of the opponents of the resolution of disapproval as well as with the Senator from Illinois [Mr. DIXON], who is the sponsor of the resolution of disapproval. We have received from them an indication that they have no objection to and agree to the schedule as we have outlined it here subject to being able to obtain a unanimous-consent agreement that will formalize that. We hope to do that in the morning and complete action on Tuesday.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. MITCHELL. Mr. President, I now ask unanimous consent that the Senate proceed to executive session to consider the following nominations:

Calendar 113. Herman J. Cohen to be an Assistant Secretary of State,

Calendar 114. Charles E. Redman to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Sweden;

Calendar 115. Morris B. Abram to be the Representative of the United States of America to the European Office of the United Nations;

Calendar 116. Walter J.P. Curley to be Ambassador Extraordinary of the United States of America to France;

Calendar 117. Ronald F. Lehman II, to be Director of the United States Arms Control and Disarmament Agency; and

All nominations placed on the Secretary's desk in the Foreign Service.

I further ask unanimous consent that the nominees be confirmed, en bloc, that any statements appear in the RECORD as if read, that the motions to reconsider be laid upon the table, en bloc, that the President be immediately notified of the Senate's action, and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF STATE

Herman Jay Cohen, of New York, a career member of the Senior Foreign Service, class of Career Minister, to be an Assistant Secretary of State.

Charles Edgar Redman, of Florida, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Sweden.

UNITED NATIONS

Morris Berthold Abram, of New York, to be the Representative of the United States of America to the European Office of the United Nations, with the rank of Ambassador.

DEPARTMENT OF STATE

Walter J. P. Curley, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to France.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Ronald Frank Lehman II, of Virginia, to be Director of the U.S. Arms Control and Disarmament Agency.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE FOREIGN SERVICE

Foreign Service nominations beginning Jo Ann Clifton, and ending John T. Sheely, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 18, 1989.

STATEMENT ON THE NOMINATION OF HERMAN JAY COHEN

Mr. HELMS. Mr. President, I am pleased to support the President's nomination of Ambassador Herman Jay "Hank" Cohen to be Assistant Secretary for African Affairs. Ambassador Cohen has already demonstrated his willingness to be open and accessible to members of the committee—characteristics which are a breath of fresh air in this position. I am hopeful that Mr. Cohen will bring a fresh approach in substance as well as style.

Africa has been, and will no doubt continue to be, a major area of focus for United States policy; I am optimistic about Mr. Cohen's policy inclinations, but also pleased with the forthright manner in which he responded to questions. We did not always agree on issues discussed during his hearing on May 3, but I was impressed with his knowledge of the issues and his willingness to speak openly and honestly on areas of concerns to members of the committee.

Mr. President, the United States and South Africa continue to suffer the adverse effect of the congressional override of the President's veto of the South African sanctions legislation in 1986. The dire political and economic consequences that were cautioned against have indeed come to pass. Black South Africans, the alleged beneficiaries of American sanctions, have suffered the most from United States sanctions. Among the white population, the proponents of reform have suffered electoral setbacks while forces opposed to all reform have made enormous gains.

Certainly the United States is concerned with the present situation in South Africa, but we must also be concerned with what may follow it. As outlined in the 1988 Republican platform, the challenge before the new administration is how best to promote equal rights and a peaceful transition to a truly representative constitutional form of government for all South Africans. Our policy should be to assist any and all South Africans to achieve such objectives through an open and peaceful process; we should deplore the violence employed against innocent blacks and whites from whatever source.

One element in the evolution of black political progress must be black economic progress; actions designed to pressure the Government of South Africa must not have the effect of adversely affecting the rising aspirations and achievements of black South African entrepreneurs and workers and their families. These individuals make up a vital component in South Africa's future leadership, and should be encouraged and developed, not stifled by counterproductive measures.

Mr. Cohen's and the administration's, challenge extends throughout southern Africa in particular. The so-called peace accords signed in December 1988 were supposed to bring peace to the region and ultimate independence to Namibia. Instead, we have seen a deliberate and widespread violation of the accords by SWAPO terrorists who poured across the border from Angola at the beginning of what was to have been the implementation of U.N. Resolution 435.

Mr. President, during his confirmation hearing, Mr. Cohen acknowledged that SWAPO's action in crossing the border into Namibia was a clear violation of the agreement. Indeed, he indicated that SWAPO forces had never moved north of the 16th parallel, as they were supposed to have done under the agreement. In contrast, he indicated that South Africa had been scrupulously complying with the agreement.

In a written response to another question filed with the nominee, Mr. Cohen indicated that the United States sanctions against Namibia, applied as a part of the Comprehensive Anti-Apartheid Act of 1986, are having an adverse impact on United States support for the implementation of U.N. resolution 435, and that the State Department would support the rescission or modification of sanctions on Namibia now, at a time when its successful transition to independence requires a strong infusion of economic resources.

While the Angola-Namibia agreement was mediated by the United States, specifically former Assistant Secretary Chester Crocker, it does not protect United States interests in the region, especially Dr. Jonas Savimbi and his UNITA forces. Specifically, the agreement is frontloaded in that the Angolans and Cubans get what they want right up front; by the end of 1989 Namibia is to have elections leading to independence. However, the Cubans do not have to leave Angola until July 1, 1991, a year and a half later.

SWAPO's violation of the agreement already implicates Cuba and Angola as having conspired together with SWAPO in violation of the agree-

ments. It is my understanding, for instance, that the Cubans or Angolans, or both, assisted Sam Nujomo in transportation to the southern border of Angola just prior to the invasion of Namibia. Clearly, they were aware of SWAPO's preinvasion activities. Why should we think the Cubans or Angolans will meet other obligations of the agreements?

And what of Dr. Savimbi? One of the United States objectives is supposed to be the achievement of genuine national reconciliation in Angola. But this objective is not achieved by the agreement; indeed, it was not attempted. Dr. Savimbi was not included in the negotiations, and yet he must now defend himself without assistance from South Africa and with no guarantee at all that the Cubans will not try to finish him off before they leave.

Some of my colleagues have expressed skepticism about information I mentioned, earlier this year, about the possible use of chemical weapons in Angola. More information is coming out of Angola which substantiates my concern. Another medical team has reached similar conclusions about gas use in Angola. Recent discoveries of gas masks in Afghanistan suggest that the Soviets are providing chemical weapons to their surrogates.

Professor Heyndrickx, head of Ghent University (Belgium) Toxicology Department is a recognized expert on chemical warfare who led a U.N. team which confirmed poison gas use in Iraq. He has made several trips to Angola and has consistently warned about chemical weapons use in Angola. In a recent letter, Professor Heyndrickx stated:

> From the analyses that we are doing at the moment in my laboratory of a Russian bomb used in a recent attack we are having a 100-percent proof of the use of chemical warfare agents. We face again the big problem of decontamination and treatment of the patients.

Ambassador Cohen agreed to meet with Professor Heyndrickx to discuss his findings, a meeting I hope to be able to facilitate. Mr. Cohen concurred that it would a dramatic escalation of the war in Angola if, indeed, the Angolans or the Cubans have begun using poison gas, and he indicated that he would seek United States intelligence confirmation of Professor Heyndrickx's findings.

Mr. Cohen also expressed a willingness to talk with a West German journalist, Mr. Andreas Horst, who has just returned from Angola. It is reported to me that Mr. Horst also substantiates very recent poison gas use—specifically a form of hydrogen cyanide—near Cuito Cuanavale, the site of previously reported poison gas use.

Regarding another war-torn country, Mozambique, Mr. Cohen demonstrated a willingness to pursue a new approach by meeting with representatives from the Mozambique National Resistance [RENAMO], thus breaking with the intransigence of his predecessor. Reports indicate that RENAMO's position has gotten stronger. Some have suggested that the United States might have a role to play in hosting talks between the Communist government of FRELIMO and the anti-Communist RENAMO. Mr. Cohen also demonstrated support for diplomatic initiatives which have already begun between third countries and other intermediaries to being peace and reconciliation in Mozambique.

Mr. President, I ask unanimous consent that certain questions posed to Mr. Cohen, and his answers thereto, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NAMIBIAN SANCTIONS

Question. Do sanctions against Namibia impede U.S. assistance to UNTAG forces in that country? Would it be reasonable to lift sanctions so long as South Africa continues to comply with the provisions of the peace accords of December 1988?

Answer. Yes, sanctions against Namibia have prevented some U.S. firms from contracting for UNTAG business. For example, they have made it impossible for U.S. air carriers to participate in the U.N. High Commissioner for Refugees' airlift of Namibian refugees to Namibia. The State Department would support the rescission or modification of sanctions on Namibia now, at a time when its successful transition to independence requires a strong infusion of economic resources.

U.N. INSTITUTE FOR NAMIBIA

Question. The U.N. Institute for Namibia is, as you know, controlled by a "senate" which is controlled by SWAPO.

What mechanisms are in place to insure that the Institute for Namibia is not used by SWAPO during the forthcoming election campaign?

It is being reported that the Institute for Namibia will send its students to Namibia to work as "campaign managers." It looks as if these students will remain under U.N. scholarships, which are funded in part by the U.S., during this time. Are these facts accurate? Is the U.S. prepared to protest these steps if they occur?

Answer. The U.N. Institute for Namibia is one of the bodies affected by the U.N.'s adherence to the impartiality package. As such, it cannot support any single party during the Namibian independence transition.

We are not aware of any plan for U.N. Institute students to work in Namibia as "campaign managers" during the election campaign.

If they were to work for any political party in Namibia while receiving U.N.-funded scholarships, that would clearly be in violation of the impartiality principles.

We would certainly be prepared to protest to the U.N. should that occur and would attempt to halt this or any other UN support for any Namibian political party.

MURDER OF EVO FERNANDES

Question. The Mozambican Embassy in Washington recently issued an interesting press release in which they indicated that they were refusing a request by the Portuguese government to waive diplomatic immunity for one of their Lisbon employees who was under suspicion in the murder of Evo Fernandes, RENAMO's representative in Portugal.

What are Portugal's allegations in the Fernandes murder?

What is the U.S. assessment of the validity of these allegations?

Answer. The government of Portugal alleges that Rafael Custodio Marquest, a Mozambican diplomat attached to the Embassy of Mozambique in Lisbon, has come under suspicion in the murder of Evo Fernandes. Marquest was reportedly identified by the two confessed murderers of Fernandes as the man who arranged the assassination. However, the investigation is continuing and it is still far from clear for whom the self-confessed murders were working and what the real political motive of the Fernandes murder was. The Government of Mozambique denies any involvement in Fernandes' assassination.

We are not able to assess the validity of these allegations. The Portugese Foreign Ministry has refused comment while the matter is under judicial investigation. We will have to await the outcome of the trial.

THIRD COUNTRY MEDIATION IN MOZAMBIQUE

Question. What is your assessment of initiatives which are allegedly taking place in third countries to urge reconciliation between RENAMO and FRELIMO?

Answer. We are not able to evaluate the initiatives allegedly involving third countries and other individual intermediaries since we have not been involved in those contracts. The fact that these initiatives have been carried out with the knowledge of the Government of Mozambique suggests Maputo is showing increased flexibility in seeking an end to its ruinous civil strife. We strongly support these efforts.

AFRICAN NATIONAL CONGRESS

Question. The 1986 Comprehensive Anti-Apartheid Act provided that the U.S. would encourage the ANC—and the Pan Africanist Congress—to (1) suspend terrorist activities, (2) make a commitment to a free and democratic post-apartheid South Africa, (3) agree to negotiations with the South African Government and other groups representing black South Africans, and (4) reexamine their ties to the South African Communist Party. The law indicated that the U.S. would "adjust" its actions toward South Africa to reflect progress or lack of progress made by the ANC in meeting these objectives.

To what extent has the ANC met the objectives set forth in the 1986 legislation? By what specific criteria has progress been measured? Please supply relevant supporting documentation.

Answer. The ANC has taken several measures consistent with the objectives outlined in the Comprehensive Anti-Apartheid Act. It is clear, for example, that the ANC is evaluating and/or debating its position on a number of issues, including violence, its vision of a post-apartheid South Africa, negotiations, and its ties to the SACP, as evidenced by the public comments of ANC officials and official ANC statements. These comments and statements have appeared widely and frequently in the Western press.

Question. Specifically,

(a) Has the ANC suspended terrorist activities?

Answer. Numerous acts of violence have been committed in South Africa since the passage of the Comprehensive Anti-Apart-

held Act in 1986. By and large, the perpetrators of that violence have been anonymous. Various observers have blamed the ANC, the South African Government, vigilantes, or other groups or organizations for certain violent acts. The ANC has claimed credit for several bombings in South Africa. We have condemned all violence in South Africa and have urged all parties, including the ANC, to renounce it. The ANC has yet to heed our call.

Question. (b) Has the ANC made any commitment to a truly free and democratic post-apartheid South Africa?

Answer. The ANC has stated numerous times that it wants to see a democratic, nonracial South Africa. The organization is now in the process of clarifying its vision of a post-apartheid South Africa. The draft constitutional guidelines issued by the NAC last year contain several provisions that suggest that the ANC is taking into account the desires of the vast majority of South Africans, who want to enjoy equal rights in a fully democratic society.

Question. (c) Has the ANC agreed to negotiations with the South African Government?

Answer. Although both sides embrace the objective of a negotiated solution to South Africa's dilemma, neither side has yet to agree on conditions for convening such negotiations. The ANC, however, has held discussions in recent months with a number of groups of prominent and respected white South Africans in an effort to narrow that gap.

Question. (d) Has the ANC reexamined its ties to the South African Communist Party?

Answer. The ANC's ties to the SACP have long been a topic of debate within the ANC itself. The debate has varied in intensity, but has been constant.

Question. (e) Has the ANC severed its ties to the South African Communist Party?

Answer. No.

Question. To what extent should U.S. policy toward the ANC be adjusted, as provided in the 1986 legislation?

Answer. Our policy has been to encourage the ANC to renounce violence, to clarify its vision of a democratic South Africa in constitutional terms, and to pursue a negotiated political settlement in South Africa. We should take advantage of any and every opportunity that would help us to achieve those objectives.

Question. One provision of the December peace accord for Angola and Namibia is that ANC training camps in Angola are to be dismantled and ANC forces removed from Angola.

(a) Where will these forces be relocated?

Answer. The December peace accords do not formally provide for the removal of ANC training camps from Angola, although the ANC has undertaken, in its contacts with the parties, to do so. The ANC has not yet announced where it plans to relocate its armed elements, although locations in East Africa, possibly Tanzania, are a likely destination.

Question. (b) Have any of them been relocated yet?

Answer. We believe that some ANC elements have departed Angola.

Question. Last year, Phil Christenson of the Committee's staff conducted a staff investigation of human rights abuses of black South African exiles, including those held prisoner against their will by the ANC.

What actions will be undertaken to ensure that no ANC prisoners are forcibly relocated with the ANC if their desire is freedom from that organization?

Answer. The ability of the U.S. to intervene with the ANC on behalf of any of its members is extremely limited, as is our ability to investigate allegations of human rights abuses by the organization.

SUPPLEMENTAL APPROPRIATION

Question. Under Chapter IX, Department of Transportation, of the House Appropriations Committee's supplemental appropriation bill, H.R. 2072, a provision states that, "Notwithstanding any other provision of this or any other law, none of the funds provided by this or any previous Act of the Department of Transportation shall be withheld from State or local grantees for any reason related to the adoption by any such grantee of a policy prohibiting the procurement of products manufactured or fabricated in the Republic of South Africa.

Isn't this provision a contradiction of Sec. 606 of the Comprehensive Anti-Apartheid Act of 1986, P.L. 99-440?

What is the Administration's position on the inclusion of the House Committee language in the supplemental bill?

Answer. (a) Yes. Section 606 of the Comprehensive Anti-Apartheid Act of 1986 limited the grace period for such State and local sanction to 90 days after the date of enactment of the Act, a period which expired over two years ago. The cited provision of H.R. 2072 would effectively reinstate this grace period.

(b) The Administration opposes the inclusion of this language in the supplemental bill.

MEASURE HELD AT THE DESK—S. 968

Mr. MITCHELL. Mr. President, I ask unanimous consent that S. 968, a bill to delay the effective date of section 27 of the Office of Federal Procurement Policy Act, introduced earlier today by Senator GLENN and others, be held at the desk until the close of business Friday, May 12.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL DAY OF REMEMBRANCE FOR THE VICTIMS OF THE U.S.S. "IOWA"

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of House Joint Resolution 247, a joint resolution designating May 29, 1989, as the "National Day of Remembrance of the Victims of U.S.S. *Iowa*."

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 247) designating May 29, 1989, as the "National Day of Remembrance for the Victims of the U.S.S. *Iowa*."

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. GRASSLEY. Mr. President, I am honored to offer some remarks upon the passage of a joint resolution to designate May 29, 1989 as "National Day of Remembrance for the Victims of the U.S.S. *Iowa*."

I appreciate the swift consideration the Senate has given this joint resolution since it was introduced 10 days ago. I want to thank especially Senator BIDEN and Senator THURMOND for their willingness to waive the usual procedures of the Judiciary Committee. I also want to thank the Senators who cosponsored this joint resolution, and there were 40 when I counted last. I am pleased that so many Senators share my view that establishing a special remembrance for the 47 sailors is an appropriate means of demonstrating our respect for the crew members and all who know them.

However, I regret that there was a need for this joint resolution in the first place. The loss of these 47 men is tragic, and the lives of their families and friends have been changed forever. To designate just 1 day to remember their fate is a small offering, inconsequential to the supreme sacrifice these people have made.

I can only imagine the anguish President Bush must have felt when he addressed the families, friends, and colleagues of the 47 men at a memorial service on April 24, 1989. Like many of the President's duties, delivering this address was not an enviable task. With obvious sorrow, the President offered some comforting words when he said:

> To all who mourn a son, a brother, a husband, a father, a friend, I can only offer you the gratitude of a nation; for your loved one served this country with distinction and honor. I hope that the sympathy and appreciation of all the American people provide some comfort.

It is for this reason that I felt compelled to offer Senate Joint Resolution 112. I know that I am not alone in my desire to offer a tribute to the brave men who met death suddenly and unexpectedly. We will not soon forget their contributions to the United States of America.

The PRESIDING OFFICER. Without objection the joint resolution (H.J. Res. 247) will be read the third time and passed, and the preamble is agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE CALENDAR

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of calendar Nos. 51, 52, and 53 en bloc; that these resolutions be agreed to en bloc; that motions to reconsider the

vote by which the resolutions were agreed to be tabled en bloc, that the preambles, where indicated, be agreed to; and that these actions appear separately in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROVISION OF ASYLUM TO VIETNAMESE REFUGEES

The concurrent resolution (S. Con. Res. 26) urging first asylum countries of the Association of Southeast Asia Nations [ASEAN] to reinstate the practice of providing refuge to all asylum seekers from Vietnam, and for other purposes, was considered and agreed to.

The preamble was agreed to.

The concurrent resolution, and the preamble, are as follows:

S. CON. RES. 26

Whereas the refugee crisis in Southeast Asia remains unresolved and large numbers of refugees continue to flee from Vietnam, Laos, and Cambodia;

Whereas, although Hong Kong and ASEAN first asylum countries are to be commended for their past actions on behalf of refugees in the region, concerns remain over the failure to provide refuge to all asylum-seekers arriving in Hong Kong and in ASEAN member countries;

Whereas, in June 1989, the United Nations will convene the International Conference on Indochinese Refugees in Geneva, Switzerland;

Whereas representatives of the ASEAN member countries, the United States, Canada, Australia, Hong Kong, the European Community, Vietnam, Laos, and other interested and affected countries gathered on March 7-9, 1989, in Kuala Lumpur, Malaysia, for the Preparatory Meeting for the International Conference on Indochinese Refugees;

Whereas the countries represented at the Preparatory Meeting unanimously adopted a draft declaration and comprehensive plan of action to be presented for ratification at the June United Nations Conference in Geneva;

Whereas the draft declaration agreed to by all countries present at the meeting in Kuala Lumpur includes provisions for region-wide screening of asylum-seekers and for the encouragement of voluntary repatriation under the auspices and monitoring of the United Nations High Commissioner for Refugees (UNHCR) or persons determined not to be refugees;

Whereas the ongoing program in Thailand for the screening of Lao asylum-seekers has had major and continuing problems;

Whereas the ASEAN member countries have announced that all asylum-seekers from Vietnam arriving in ASEAN countries on or after March 14, 1989, will be screened to determine their refugee status; and

Whereas the Socialist Republic of Vietnam has demonstrated its hostility to those leaving Vietnam illegally and, in particular, to those refusing to return to Vietnam voluntarily: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That (a) it is the sense of the Congress that—

(1) ASEAN first asylum countries should reinstate the practice of providing adequate refuge for all Vietnamese asylum-seekers, while carrying out the screening of such individuals;

(2) early access should be given to the United Nations High Commissioner for Refugees (UNHCR) to provide humane care and protection to such asylum-seekers;

(3) no repatriation of Vietnamese asylum-seekers should occur until a strong and effective internationally approved mechanism is in place to guarantee that such asylum-seekers will be returned in conditions of safety and dignity and will not be subjected to persecution in any form;

(4) given Vietnamese attitudes toward illegal departure, forced repatriation of refugees to Vietnam should not be considered a viable option;

(5) continuing effort should be made to improve the screening program of Laos asylum-seekers in Thailand;

(6) the United States should remain committed to a generous and humane Southeast Asian refugee resettlement policy; and

(7) the United States should urge its Western allies to implement or continue generous and humane Southeast Asia refugee resettlement policies.

(b) For purposes of this resolution—

(1) the term "ASEAN" means the Association of Southeast Asian Nations; and

(2) the term "ASEAN first asylum countries" includes any country which is a member of the ASEAN group of countries and which is the first to receive an individual seeking asylum.

SUPPORT FOR THE NORTH ATLANTIC TREATY ORGANIZATION

The resolution (S. Res. 124) expressing strong support for the North Atlantic Treaty Organization on the occasion of its 40th anniversary; confirming continued dedication to NATO's founding principal, which is the commitment by democratic nations to their common defense; and urging energetic and cooperative paricipation by NATO member states in the development and implementation of joint policies aimed at strengthening the East-West military balance while upholding and promoting democratic values, was considered, and agreed to.

The preamble was agreed to.

The resolution, and the preamble, are as follows:

S. RES. 124

Whereas the North Atlantic Treaty was signed in Washington on April 4, 1949; was ratified by the United States pursuant to Senate consent; and entered into force on August 24, 1949;

Whereas the Atlantic Alliance now comprises 16 member-nations and will celebrate NATO's 40th anniversary at a summit meeting beginning May 29, 1989;

Whereas the North Atlantic Treaty Organization has facilitated effective cooperative participation by member-nations in their common defense since the inception of the Alliance;

Whereas the North Atlantic Assembly has, since 1955, fostered active participation by elected representatives throughout NATO in discussions leading to recommendations and cooperative policies on essential Alliance issues;

Whereas open discussion, meaning the full airing of views, among member-states of the Alliance is fundamental to the nature of a voluntary alliance of democratic nations;

Whereas experience has demonstrated that a firm and coherent NATO position is crucial to effective East-West arms control; and

Whereas the common interests of Alliance members continue to outweigh any disagreements on particular issues of defense posture and arms control negotiating strategy: Be it therefore

Resolved, That this resolution may be referred to as the "Renewed Commitment to NATO Resolution," passed on the occasion of NATO's 40th anniversary.

That the United States Senate remains dedicated to the North Atlantic Alliance as a critical instrumentality for maintaining an effective Western defense of the principles and institutions of democratic freedom;

That it remains in the overwhelming interest of the United States and other members of NATO that recurring disputes concerning defense posture and arms control negotiating strategy be resolved in a spirit of comity and compromise, and with a continuing emphasis on the larger purposes NATO has so effectively served for forty years.

CONGRATULATING THE KINGDOM OF NORWAY ON 175 YEARS OF CONSTITUTIONAL GOVERNMENT

The resolution (S. Res. 125) congratulating the Kingdom of Norway on its 175 years of constitutional government, was considered, and agreed to.

The preamble was agreed to.

The resolution, and the preamble, are as follows:

S. RES. 125

Whereas, May 17 is the 175th anniversary of the adoption of the Norwegian Constitution in 1814;

Whereas, the Norwegian Constitution was inspired in important aspects by the Constitution of the United States;

Whereas, The Norwegian Constitution was one of the first written constitution adopted by a monarchy recognizing the sovereignty of the people, emphasizing the importance of human rights, and delineating the roles of the monarchy, the legislature, and the judiciary;

Whereas, the Norwegian Constitution has been an essential element in Norway's long tradition of democratic government, political and social tolerance, and devotion to freedom and self-determination;

Whereas, the people of Norway heroically resisted a brutal occupation during World War II,

Whereas, Norway has been one of America's staunchest allies in NATO; and

Whereas, immigrants from Norway have enriched American life and culture: Therefore, be it

Resolved, That the Senate of the United States congratulates the Kingdom of Norway on its 175 years of constitutional government.

ORDERS FOR FRIDAY, MAY 12, 1989

RECESS UNTIL 9:30 A.M. TOMORROW

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 9:30 a.m. tomorrow, Firday, May 12, and that following time for the two leaders there be a period for morning business not to extend beyond 10 a.m., with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

RESUME CONSIDERATION OF SENATE JOINT RESOLUTION 113 AT 10 A.M.

Mr. MITCHELL. Mr. President, I further ask unanimous consent that at 10 a.m. tomorrow the Seante resume consideration of Senate Joint Resolution 113, the FSX disapproval resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL TOMORROW AT 9:30 A.M.

Mr. MITCHELL. Mr. President, if the Republican leader has no further business, and if no Senator is seeking recognition, I now ask unanimous consent that the Senate stand in recess under the previous order until 9:30 a.m., Friday, May 12, 1989.

There being no objection, the Senate, at 6:40 p.m., recessed until Friday, May 12, 1989, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate May 11, 1989:

DEPARTMENT OF STATE

JOHN HUBERT KELLY, OF GEORGIA, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF MINISTER-COUNSELOR, TO BE AN ASSISTANT SECRETARY OF STATE, VICE RICHARD W. MURPHY, RESIGNED.

DEPARTMENT OF TRANSPORTATION

JAMES BUCHANAN BUSEY IV, OF ILLINOIS, TO BE ADMINISTRATOR OF THE FEDERAL AVIATION ADMINISTRATION, VICE T. ALLAN MCARTOR, RESIGNED.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 11, 1989:

DEPARTMENT OF STATE

HERMAN JAY COHEN, OF NEW YORK, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF CAREER MINISTER, TO BE AN ASSISTANT SECRETARY OF STATE.

CHARLES EDGAR REDMAN, OF FLORIDA, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF MINISTER-COUNSELOR, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO SWEDEN.

UNITED NATIONS

MORRIS BERTHOLD ABRAM, OF NEW YORK, TO BE THE REPRESENTATIVE OF THE UNITED STATES OF AMERICA TO THE EUROPEAN OFFICE OF THE UNITED NATIONS, WITH THE RANK OF AMBASSADOR.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

RONALD FRANK LEHMAN II, OF VIRGINIA, TO BE DIRECTOR OF THE U.S. ARMS CONTROL AND DISARMAMENT AGENCY.

DEPARTMENT OF STATE

WALTER J. P. CURLEY, OF NEW YORK, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO FRANCE.

THE ABOVE NOMINATIONS WERE APPROVED SUBJECT TO THE NOMINEES' COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

FOREIGN SERVICE

FOREIGN SERVICE NOMINATIONS BEGINNING JO ANN CLIFTON, AND ENDING JOHN T. SHEELY, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD ON APRIL 18, 1989.

EXTENSIONS OF REMARKS

JEWISH HERITAGE WEEK

HON. BENJAMIN A. GILMAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. GILMAN. Mr. Speaker, recently this body voted to approve legislation, House Resolution 136, which I introduced designating the week of May 7–14, 1989, as "Jewish Heritage Week." Yesterday, I was pleased to join friends and colleagues in the Jewish community at a White House ceremony commemorating this event. Yesterday, as many will recall, was also the 41st anniversary of Israel's independence, one of the prominent dates noted in the legislation.

Among the speakers at yesterday's ceremony were Lynne Cheney, Chairman of the National Endowment for the Humanities; Dr. James Billington, Librarian of Congress; and Michael Miller, executive director of the Jewish Community Relations Council of New York City. Having spearheaded Jewish Heritage Week legislation each year, the Jewish Community Relations Council of New York City was also well represented by Martin Begun, president of the JCRC, to whom I was pleased to present President Bush's proclamation. Also present was Bernard Charles, a member of New York Gov. Mario Cuomo's Advisory Committee on Minority Affairs.

Mr. Speaker, in light of the many events taking place this week to highlight the contributions made by the American Jewish community to this Nation, I would like to insert the remarks delivered by Mrs. Cheney and Mr. Billington for my colleagues' review. I also request that President Bush's Jewish Heritage Week proclamation, which was also relayed to those in attendance, be reprinted at this point in the CONGRESSIONAL RECORD:

JEWISH HERITAGE WEEK, 1989

(By the President of the United States of America)

A PROCLAMATION

The rich heritage of the Jewish people has been an inspiration to Americans since the founding of our Nation. The Judaic traditions of defending freedom, promoting justice, and assisting those in need are embraced by our Nation's own laws and customs.

Like so many others, Jews came to the United States in search of freedom and a chance to build a better life. They found this land rich in educational and economic opportunities and have taken advantage of them. In return, they have made important contributions to every sphere of American life, from medicine and academia to the arts, business, and community service.

At this time of year, it is appropriate to reflect on the suffering in recent Jewish history, as well as the grounds for hope. In early May, we commemorate the courage and faith of the six million European Jews who perished at the hands of Nazis between 1939 and 1945. On May 10, we celebrate 41 years of Israeli independence. The establishment and survival of the State of Israel following the Holocaust is a powerful reminder that hope can conquer tragedy and that freedom can survive even the most ruthless attempts to defeat it. Its anniversary is a fitting occasion for Americans to rededicate ourselves to the cause of liberty and justice for all.

The Congress, by Senate Joint Resolution 25, has designated the period of May 7 through May 14, 1989, as "Jewish Heritage Week" and has requested the President to issue a proclamation in observance of this event.

Now, therefore, I, George Bush, President of the United States of America, do hereby proclaim the week of May 7 through May 14, 1989, as "Jewish Heritage Week." I call upon the American people, State and local government agencies, and interested organizations to observe this week with appropriate ceremonies, activities, and programs.

In witness whereof, I have hereunto set my hand this first day of May, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and thirteenth.

GEORGE BUSH.

REMARKS BY JAMES H. BILLINGTON, THE LIBRARIAN OF CONGRESS

As a lover of books with special responsibilities for the world's largest collection of them, I feel a special regard for the People of the Book and am especially honored to be participating in Jewish Heritage Week. The collections of the Library of Congress, including some 88 million objects—books, films, maps, prints, photographs, sheet music, etc.—demonstrate the exceptional hospitality of our country to the civilizations and cultures of all those who came here in search of religious or political freedom. This treasure house of America's intellectual and cultural heritage is rich in testimony to the extraordinary contribution of the Jewish community. Just 75 years ago, Jacob H. Schiff, a noted New York financier and philanthropist, purchased two extraordinary collections of Hebrew books for the national library. These collections form the nucleus of what is today one of the world's great collections of Judaica and Hebraica, containing letters from Presidents Washington, Madison, Jefferson, and Lincoln, among others, to prominent American Jewish leaders of their times; music composed by Leonard Bernstein, the Gershwins, Irving Berlin, and Arnold Schoenberg; the papers of Felix Frankfurter and Sigmund Freud; important manuscripts of Albert Einstein; and great Hebraic literary as well as religious treasures spanning centuries. In the Hebraic Section alone, we count some 125,000 books, periodicals, and rarities. There is scarcely a corner of the great collections that together make up the nation's library that do not attest the "important contributions made by Jewish Americans to the cultural development of our country."

We will bring these Judaic treasures before the nation through a 75th anniversary exhibition commemorating the founding of our Hebraic Section at the Library in the summer of 1990. It will be called "From the Ends of the Earth: Judaic Treasures at the Library of Congress," and a version of this exhibit will travel to selected cities across the United States. University of Rochester Professor Abraham J. Karp, guest curator of the exhibition, has been working patiently to prepare it and has excited all of us with his continuous discovery that there are important Judaic treasures in almost ever section of this Library with all its different formats and languages—attesting to the remarkable way in which Jewish Americans have contributed to the cultural history of this country.

The Library will also be producing later this year an exquisite facsimile of a 15th century illuminated Hebrew manuscript, the Washington Haggadah, together with a commentary volume so that this great Judaic treasure can be shared with the broader public in connection with this 75th anniversary.

As a cultural historian and the first Librarian of Congress to be a specialist in foreign cultures, I am also appreciative of the extraordinary world-wide range of the Jewish cultural heritage and the richness of its contributions to so many different cultures of the world—in particular, those of eastern Europe, which I study and which would be altogether unintelligible in their modern formation without a full appreciation of the Jewish contribution. I have had the privilege of being a guest professor twice in Israel in the 1980's, and my memory goes back with particular warmth to my participation, along with my Oxford mentor, Sir Isaiah Berlin, in the memorial colloquium for the late Jacob Talmon of the Hebrew University in 1982. I remember attending a dinner in the Jewish quarter of the Old City of Jerusalem with some distinguished Israeli scholars and asking them the question I always ask of a foreign-language culture when I am beginning to become acquainted with it: What is your greatest lyric poetry, and does it make your hair stand on end? I was speaking to scholars who worked on the extraordinary discoveries from the Cairo Genizah that filled in some of the missing centuries of the Hebrew literary legacy, and one of the scholars began reciting some of that remarkable and long-lost poetry. Even without understanding Hebrew, my hair *did* stand on end.

I also think of my researches on the Soviet Union. The effect of the Habima (Hebrew) Theater in Moscow in the 1920's in the Soviet period was to present a voice of extraordinary power and authenticity in the midst of a gathering culture of masked, and in some cases, even approved repression. The gradual disappearance of that independent Hebrew theater and, later, of the rich Yiddish tradition within the Soviet Union is one of the real tragedies of the Stalin era. It represents one of the lost creative opportunities of eastern Europe and, of course, a very great human tragedy.

My thoughts also go back to the year I spend in Moscow with my family in 1966–1967 and the way in which the authorities,

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

at the end of that period when the Middle Eastern war had broken out, rebuked me as an American both for our support of Israel and indeed for the battlefield successes of the Israeli forces. The more the figures in the foreign section of the Academy of Sciences—who were, of course, not themselves scholars—rebuked me as the nearest available target, the more I felt the rightness of my own country's friendship with Israel. I felt, indeed, a sense of identification with the anxieties of the Jewish community in Russia over the gathering storm of repression in the Brezhnev period.

Now that that period is recognized even in the Soviet Union as one of "stagnation" and renewed repressive measures, it is well to record how the Jewish community provided, as they so often have, an early warning to the broader human community about a prospective drift into repressive tendencies. So, we are all indebted to this community not just for its cultural contributions but for its special sensitivity to repression wherever it occurs. I am pleased and honored to be able to pay tribute here both to the diversity of the Jewish contribution to our common American life and to the broader Jewish contributions to world culture which have been a subject of interest and an inspiration to me as a cultural historian.

JEWISH HERITAGE WEEK

(Remarks by Lynne V. Cheney, chairman, National Endowment for the Humanities)

The contributions of Jewish people have enriched this country immeasurably. Indeed, they have enriched the whole of world civilization. I am happy to be able to speak today about a few of the many awards we have made at the National Endowment for the Humanities to preserve the memory of those contributions as well as to make them better known to all Americans: grants to the Jewish Theological Seminary in New York, for example, and to the Jewish National and University Library in Jerusalem, and to the American Jewish Archives in Cincinnati, grants which will help preserve and provide access to documents ranging from 9th century manuscripts to the 20th century records of the World Jewish Congress. The NEH has provided funding for 6 volumes in the famed Yale Judaica Series, volumes that translate classical works of Jewish heritage into English. We have supported the work of the National Museum of American Jewish History in Philadelphia to catalog its collection so that researchers can more easily use it.

Since I am from the Western United States myself, one NEH award that I find particularly compelling was made to the Judah L. Magnes Museum in California. NEH funds have helped that institution produce a catalog detailing its rich archival and oral history collections detailing the role of Jewish people in the settling of the American West.

Preserving the record of Jewish contributions is essential to preserving memory of them, but our efforts go beyond that—to museum and television programs and other projects that bring knowledge of those contributions to wide public audiences.

A grant to the National Foundation of Jewish Culture is making possible a series of conferences in New York, Chicago, and San Francisco on Jewish culture in Israel and America. NEH support is helping scholars in Michigan and Ohio plan public programs planned for 1992, the 500th Anniversary of Columbus' voyage. These programs will focus on such subjects as the important role that Jewish scientists and cartographers played in that amazing and world-altering time known as the Age of Discovery.

One of our public projects has become particularly well-known, and that is the fine film on the partisans of Vilna—a documentary that explores in a moving and thoughtful way Jewish resistance in Poland during World War II. Seen by millions in theaters and on television, the *Partisans of Vilna* has been honored by many awards. Another film we have helped make possible—a documentary about the *Forward*, the celebrated Yiddish language newspaper in New York—will, I hope, soon be seen by millions on PBS.

We at NEH are grateful that we have been able to contribute through these and dozens of other projects to preserving and honoring Jewish heritage. An important part of that heritage, of course, is the stress that it places on our obligation to battle oppression not only against ourselves, but against others. In emphasizing that theme during this year's commemoration of Jewish heritage, you remind us again of the immortal words of the Talmud:

If I am not for myself, who will be for me?
And if I am not for others, what am I?
And if not now—when?

I am honored to be with you today.

TRIBUTE TO PASTOR GUNTHER STIPPICH

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. YATRON. Mr. Speaker, I rise today to pay tribute to Pastor Gunther Stippich of Zion St. Johns Lutheran Church of Stouchsburg, PA. Reverend Stippich will be celebrating his 50th anniversary of ordination in June and I wish to congratulate him on this occasion. I would also like to extend my thanks for all he has done to enhance the lives of so many citizens.

In celebrating this golden anniversary, I am sure that Reverend Stippich has much to reflect back upon—many accomplishments for which he can be justifiably proud. As a spiritual leader, the pastor has dedicated his life to the most admirable and honorable of callings. For 50 years he has played an integral part in the spiritual affirmation of our community and for this, we are all most grateful. He has been a great source of strength for countless individuals, continuously providing the guidance, support and inspiration sought so frequently. Certainly the congregation of the Zion St. Johns Lutheran Church has been a fortunate beneficiary of Reverend Stippich's good deeds and efforts.

I believe we can all look to Reverend Stippich as an example of how we can make this world a better place to live, grow and worship. I am certain my colleagues will join me in offering congratulations on his golden anniversary, and will extend warmest wishes also for his continued happiness and success in his special work.

LEGISLATION TO CURTAIL DECEPTIVE MAILING PRACTICES

HON. FRANK McCLOSKEY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. McCLOSKEY. Mr. Speaker, there has been widespread congressional concern about companies which use official insignia or other terms or symbols connected with the Federal Government in order to misrepresent themselves as having Federal connections or sanctions. Today, I am reintroducing legislation which passed overwhelmingly in the House of Representatives last year which will amend title 39 of the United States Code to curtail such deceptive mailing practices.

Clearly legislation is needed to address these practices, especially since many of these deceptive mailings appear to be targeting the elderly. In 1987, the Commissioner of Social Security testified before the Select Committee on Aging that there were at least 14 organizations which used deceptive mailing practices to appeal for contributions for services which relate to Social Security benefits. Many of these organizations imply that Social Security or Medicare benefits, two vitally important issues to senior citizens, are in danger of being cut, unless a donation is made to this group masquerading as having Federal approval. This practice must stop.

The Deceptive Mailings Prevention Act requires disclaimers to be placed on mailings which are falsely presented as bills or invoices. The bill also provides for disclaimers on mailings and envelopes from firms offering for a fee products or services which the Federal Government provides for free or at a lower cost.

In addition, any mailing with insignia or any term or symbol implying any Federal connection, endorsement, or approval must have similar repudiating notices on the envelope and inside piece.

I am concerned about a few organizations, individuals, or businesses whose solicitations and promotional practices are extremely misleading if not deceptive. This legislation will deter direct mailings which are fraudulent, deceptive or misleading and I urge all of my colleagues to support it.

H.R. 2319, THE LOW INCOME HOUSING TAX CREDIT ACT OF 1989

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. RANGEL. Mr. Speaker, today I am introducing along with 23 of my colleagues the Low Income Housing Tax Credit Act of 1989. The most important feature of this legislation is that it makes the credit, which came into existence in the Tax Reform Act of 1986 permanent.

The bill also makes several changes in the credit program designed to improve its effec-

tiveness. These changes are being proposed as a result of a task force of housing experts convened by Senator GEORGE MITCHELL of Maine and Senator JOHN DANFORTH of Missouri. This task force addressed several of the issues that have been facing developers and investors. I was very impressed with their work and joined the Senators in drafting this legislation in response to their recommendations. Similar legislation to the bill I am introducing with my colleagues is today being introduced in the other body by these two distinguished Senators and several of their colleagues.

The legislation continues the basic structure of the credit. It will continue to be a tax incentive targeted to provide housing for those with incomes below 60 percent of the median income at rents not exceeding 30 percent of their incomes. The changes are designed to make the credit more efficient, to provide greater certainty for developers, to encourage longer term availability of subsidized units, to help meet the problem of defaulting HUD financed and insured units, to encourage the use of tax exempt bonds with tax credits for low-income housing, to encourage owners not to convert to market rate existing low-income units and to result in more equity being invested in the projects by those applying the credits against their tax liabilities.

I have for years said that I would rather see direct Federal spending to subsidize mortgages and rents for low-income housing since they are more efficient than tax incentives, but since the last administration chose to cut those direct subsidies by 80 percent over the last 8 years I have been compelled to seek support for housing for low-income tenants in the Tax Code. Our goal in this legislation is to make the credit as efficient and fair as possible.

The credit had a slow start after enactment in 1986. However, as the rules became clear and developers and investors began to understand how to use credits production picked up. By 1988 more than two-thirds of the credit allocated to the States was used and in 1989 the amount used is expected to be higher. The credits issued so far will assist the development of over 150,000 housing units. With its extension it is likely that the credit will even produce more housing at a greater pace over the next several years.

I include the following summary of the bill:

LOW-INCOME HOUSING TAX CREDIT ACT OF 1989

SUMMARY OF MAJOR PROVISIONS

Program termination

The credit would be made permanent.

Extended low-income use of property

Under current law, projects benefiting from the credit are subject to a low income use restriction for a period of 15 years. The bill includes provisions to encourage longer term low income use of the property by establishing a three step process for conversion of the property to non low-income use.

Step one: After the 15 year compliance period the owners can sell the property at any price subject to an additional 15 years low income targeting. Step two: If the owners do not utilize this process, they must permit the state credit allocating agency to find a buyer who would pay a limited price related to the original cost of the property and agree to keep the property low income for another 15 years. The purchase price limitation would be based on the original cost of the property increased by an inflation factor for the equity portion. Step three: If no purchaser is found, then the owners may convert the property to non low-income use subject to a requirement that existing tenants not be evicted without cause.

Allocation plans and selection criteria/ project evaluation

Under current law, no administrative or allocation plans are required of credit allocating agencies. Under the bill, credit allocating agencies would be required to establish, publish and hold hearings on allocation plans setting forth the standards on which credit allocations will be made. The bill also includes provisions encouraging agencies to exercise their existing authority to provide a lower credit amount by requiring that each project be evaluated by the state agency to determine the specific amount of credit needed.

Rent restrictions

Median Income: To be consistent with the Section 8 housing program, the bill provides that rent levels would not have to be reduced below the initial rent in the project when area median income falls.

Rent Determination: For purposes of determining the 30% of the income limitation, family size would be established according to the number of bedrooms in a unit.

Investor income limitations

Under current law, the low-income housing credit can only be claimed in any given year by taxpayers with adjusted gross income of less than $250,000. Under the bill, if an individual's adjusted gross income averages less than $200,000 for the three years preceding the investment in low-income housing, the full credit will be available for the balance of the investment period.

Higher credit amounts

Allocating agencies will be given discretion to provide a credit which is 130 percent of the credit amount otherwise allowable in certain low median income, high construction cost areas.

Credit penalties

Under current law, federally subsidized buildings must use the lower, 30 percent present value credit. Under the bill, the definition of federally subsidized building would be modified.

Acquisition credit

Under current law, the acquisition cost of an existing building qualifies for the lower credit amount regardless of whether rehabilitation expenditures are incurred. Under the bill, acquisitions are not creditable unless they involve substantial rehabilitation, which would be redefined as expenditures of at least $3,000 per unit.

Uses of credit

Current law would be clarified and modified to facilitate use of the low-income housing tax credit and multifamily housing bonds to build single room occupancy (SRO) facilities.

State carryover of unused credits

A state would be allowed to carryover the credits it does not issue in one year to the next. Unused, carryover credits would go into a national pool administered by HUD and allocated to those states in relation to their excess demand for credits.

At-risk rules

The at-risk rules for purposes of the historic rehabilitation credit would be the same as the at-risk rules for purposes of the low-income credit when such project utilizes both credits.

Credit percentage

The tax credit rate would be established semi-annually rather than monthly.

APPLIED TECHNOLOGY AMENDMENTS OF 1989

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. SYNAR. Mr. Speaker, on May 9, I voted for H.R. 7, the Applied Technology Education Amendments of 1989.

I believe that H.R. 7 offers vo-tech students in Oklahoma and other States access to a better technical education by modernizing high school vocational education. The bill will improve vo-tech programs by ensuring funding for schools in some of our poorest areas and increasing the emphasis on high technology.

Today's students must be able to compete in a world where technical and academic competence are equally important. To ensure that our students are given the educational tools they need, this bill requires that Federal funds go only to vo-tech programs that combine academic and technical education.

I also want to reiterate my support of the tech-prep program which was included in the markup of H.R. 7. As introduced in H.R. 22 by Representative WILLIAM FORD, the program will provide grants to encourage the creation of 4 year vocational education programs—2 years in high school and 2 years in a community college or other postsecondary institution.

I commend my colleague from the Oklahoma delegation, Representative WES WATKINS, for incorporating amendments to H.R. 7 which address some of the concerns we heard from the Oklahoma State Department of Vocational and Technical Education. The amendments will help to ensure that area vo-tech schools receive a fair share of the funds authorized in H.R. 7. I hope and expect that we can resolve any remaining concerns about the bill's effect on Oklahoma's vo-tech program as the measure continues on to conference with the Senate.

I voted against the amendment offered by Representative WILLIAM DANNEMEYER barring the use of Federal funds by school districts and community colleges which prohibit voluntary school prayer. Mr. DANNEMEYER did not afford the Members of this body with a copy of his language, preventing us from being able to analyze the amendment. Given the history of Supreme Court decisions on this issue, I believe that the amendment was unconstitutional. This type of demagoguery does not contribute to the making of public policy, and, in this case, tainted an otherwise sound bill. While I could not support the Dannemeyer amendment, I do want to reiterate my support of a moment of silence in schools and remind my colleagues that nothing in current law prohibits voluntary prayer in the classroom.

TRIBUTE TO KEN BOXLEY

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. LEVINE of California. Mr. Speaker, the best in American life is reflected by the many people among us who regularly do good for the sheer joy of doing so—without seeking credit, without trying to gain advantage, and often anonymously: the only true form of charity, as the Bible reminds us.

He would probably be embarrassed by my doing this, but I would like to bring to the attention of the Congress today one such American. His name is Ken Boxley.

Ken Boxley's good deeds are too numerous to mention here, and a great many are anonymous by design.

But there is one that I can discuss here, because it was referred to in the Washington Post a few days ago. Mr. Boxley is establishing two full Paul Robeson college scholarships to Rutgers University for deserving students as part of Carl Rowan's "Project Excellence" program.

This work by Messrs. Boxley and Rowan reminds us, as Courtland Milloy points out in the following column, that for every well publicized youngster involved in crime or drugs in this city, there are hundreds who study hard and will grow up to make positive contributions to society.

When they do so, they will have no better role model than Ken Boxley. He never had it easy, but he succeeded through hard work, ingenuity, and plain guts.

Mr. Boxley exemplifies America at its best. And I wanted to bring his example to the attention of my colleagues. At this point, Mr. Speaker, I would like to have Courtland Milloy's Washington Post article reprinted for the benefit of my colleagues.

The article follows:

[From the Washington Post, May 2, 1989]

GROWTH OF A CONCEPT OF EXCELLENCE

(By Courtland Milloy)

In the wake of the death of Herbert H. Denton Jr., who was a reporter and editor for this newspaper, I am comforted by the work of another colleague, Carl T. Rowan, who is doing an outstanding job with a program Rowan founded in 1987 called "Project Excellence."

Herb devoted much of his life to improving the communication skills of the reporters he worked with. Rowan has picked up the ball in a most magnificent way, by offering scholarships to outstanding black high school achievers in writing and speaking as well as those students who have made the greatest progress in developing those skills.

When the annual Project Excellence awards dinner is held at the Washington Hilton on May 12, this city will bear witness to a concept that has grown far beyond Rowan's wildest dreams.

Ken Boxley, a Los Angeles businessman, is offering a $40,000 Paul Robeson scholarship for a talented—and lucky—student to attend Rutgers University, Robeson's alma mater. He plans to do the same year. The Gannett Foundation will present 10 $4,000 scholarships. The Washington Post and the Chicago Sun-Times also will be on hand to reward Washington area students for their pursuit of academic excellence.

The dinner costs $100 per plate, of which $74 goes to the scholarship fund. All scholarship winners eat free. You just can't beat that.

Rowan really didn't want me to brag about him. After all, he could do that himself as a nationally syndicated columnist and broadcaster. But what he has done—indeed, is doing—is worth a thousand pats on the back.

"This city has gone through a lot of bad news about drugs and crime, and it has blinded a lot of people to the reality that there are many, many thousands of marvelous black youngsters in this town, especially in this school system, who have picked up the challenge of not yielding to peer pressure," Rowan told me.

"They don't take drugs, they are not dumb and they do not refuse to use good English out of fear that they will be accused of talking like 'whitey.' "

For the past weeks, Rowan and a distinguished crew of journalists and educators have listened to the speeches and read the works of hundreds of nominees. The judges included Maureen Bunyan of WUSA-TV, Juan Williams of The Post, Barbara Reynolds of USA Today, Bernard Shaw of Cable News Network, Andrew E. Jenkins, superintendent of D.C. public schools, and Ralph Neal, principal of Eastern High.

There were 52 winners, representing a cross-section of neighborhoods and family life styles. Each had at least a 3.5 cumulative grade point average (2.0 if nominated in the "greatest progress" category). All are prospective graduating seniors in Washington area high schools who have applied to an accredited college or university.

Altogether, the students will receive more than a quarter of a million dollars in scholarship money. Ann Landers has sent checks, as have Steve Allen, Friends of Henry and Jessica Catto, Rich Adams of WUSA-TV, Paul Berry of WJLA-TV and Jim Vance of WRC-TV and many more. The Cafritz Foundation gave $80,000 for 20 scholarships.

It is truly wonderful that so many people believe in our children.

As Rowan said, "When you sit all day listening to marvelous teen-agers give magnificent five-minute speeches, you understand that there are kids who have tremendous heart, brain power and guts.

"The people who come to this dinner will not only hand out money for scholarships next year, but they will get a chance to see that neither Washington, D.C.—nor America—is totally going to hell in a handbasket."

Even though the dinner may be sold out, as it was early on last year, donations to the scholarship fund are always welcomed. For further information on the dinner and the donations, call Project Excellence program administrator, Judith Plunkett, at 966-8668.

"My prayer," says Rowan, "is that Project Excellence—Washington is only a beginning—is only a marvelous example of what can be done for bright black children in New York, Chicago, Los Angeles, Philadelphia, if only those cities are stirred to action by the Bryant Gumbels and Bill Cosbys, the Eddie Murphys and Whitney Houstons, the Oprah Winfreys and John H. Johnsons, the Ray Charleses and Sugar Ray Leonards. . . ."

Meanwhile, we can give thanks that Carl Rowan has stirred Washington to action, making last year's Project Excellence affair the greatest scholarship dinner ever held in black America.

Let's keep it that way.

THE PROBLEM OF HOUSING AND FRAIL ELDERLY

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. WYDEN. Mr. Speaker, last week the Aging Committee held a hearing on housing and the frail elderly. The administrator of the Oregon Senior Services Division, Mr. Dick Ladd, was one of the key witnesses to testify.

It is clear that our country is aging. In 1989 the elderly represent 12 percent of the population. By 2030, when the "baby boom" reaches 65, they will represent 21 percent of the population.

The number of elderly living alone in Federal subsidized housing—public housing and section 202 housing—is over 600,000. This population will continue to grow and will continue to age.

Data indicates that a large number of the elderly in Government subsidized housing are "aging in place." This term simply refers to the fact that the elderly who entered housing 10 to 15 years ago at age 65 are still living in the same housing. These elderly are generally more apt to be frail elderly, as the likelihood of being frail and in need of some services to remain independent increases with age.

I have inserted Mr. Ladd's comments into the RECORD because he has accurately summarized for us the key issues facing this country and explains how the State of Oregon has chosen to address those issues.

TESTIMONY OF RICHARD C. LADD

I would like to thank the committee and Chairman Roybal for the opportunity to testify before you today. I hope my testimony answers all of the questions you asked me to report on in your invitation. The subject you are investigating, "the congregate service needs of the frail elderly in government funded housing," is of extreme national importance. The human suffering caused by the archaic and less than enlighted policies of the federal government on long-term care are well documented. We lag far behind most all other developed countries in the provision of humane and effective long-term care services. You have an opportunity to begin changing these policies, and I sincerely hope you do so.

BACKGROUND

The November 1988 GAO report to this committee entitled "Long-Term Care For The Elderly; Issues of Need, Access, and Cost" estimates that 6.2 to 6.5 million elderly Americans need long-term care services. It also stated that most of these elderly (perhaps as high as 75 percent) are receiving this care from family or friends, or not at all. Most formal long-term care funded by federal and state dollars, the report noted, is provided in nursing homes.

In 1960, the United States institutionalized 2.3 percent of the elderly population in nursing homes, today we institutionalize about 5.2 percent. Our national policy has been to provide primarily nursing home care, with very little support for homecare or care provided in other congregate settings. Federal agencies have defended this policy by stating that an increase in homecare would cause a vast increase in the number of people utilizing these services (because this is what the elderly overwhelmingly prefer). It is therefore less expensive, they have stated, to provide mainly nursing home care. This phenomenon has been labeled the "woodwork effect," because the elderly would come out of the woodwork to take advantage of alternative services. I and most all of my colleagues around the country consider this philosophy to be not only wrong but immoral.

The November, 1988 GAO report estimates that by 2020, 14.3 million elderly will be in need of long-term care services, more than double the present number. The present system of long-term care will breakdown long before 2020. The cost of providing mainly nursing home care and the continued human suffering indicative of our present system, will force policy changes.

The states are already recognizing that something must be done. According to the National Council of State Legislatures long-term care is the top priority of 17 state legislatures this year. Nearly every state is attempting to control nursing home utilization and increase alternative care. Whether or not the federal government considers these policy changes to be cost-effective, the states know that they are, and are proceeding accordingly.

The basic problem with our current method of providing long-term care is our propensity to consider aging a disease and to treat it in medical model facilities: i.e. nursing homes. According to the Recent health Care Financing Administration snapshot of nursing homes in the United States, Oregon has the most imparied nursing home population in the country. Yet, even in Oregon only 7 percent of the nursing home population have complex medical needs. Indeed, over half of our nursing home population have no more medical needs than the elderly living in the general population. Long-term care is not a medical problem, it is a social/functional problem. A quote from a nationally recognized expert in long-term care, Dr. Rosalie Kane of the University of Minnesota helps put this in better perspective:

"Long-term care consists of those personal care and supportive services needed to compensate for functional limitations. . . .the long-term care services themselves are often unspecialized and untechnical. The functional impairments of older people can be divided into those affecting the ability to do basic personal care (such as walking, bathing, dressing, using the toilet, getting in and out of bed, and eating), and those affecting the ability to manage a household (such as cooking, cleaning, shopping, and managing money)."

Because federal and state governments spend so much on the Medicaid nursing home program, there is very little left for other alternative long-term care services. Social Service Block Grant funds are spent primarily on children programs, with little going towards the care of elderly. Older American Act funds are spent primarily on congregate meals and transportation, with Title III/D reserved for homecare, but this is limited to 5 million dollars nationally. Medicaid Home and Community Based Waivers, authorized by Congress in 1981, spent less on alternative services nationally in 1985 than the New York City Personal Care program alone. Personal Care and Home Health Care are Medicaid's largest noninstitutional long-term care programs in terms of dollars spent, but these programs are so medically oriented that they fail to meet the needs of many elderly. I am aware of no long-term care services at all being provided through Housing and Urban Development programs.

State and local governments are attempting to fill the gap, and provide alternative services, but their ability to do so is severely limited. The need is too great for their resources, and without additional help from the federal government, we can expect long-term care to continue to deteriorate. Some states, like Oregon, have attempted to reorganize long-term care services, and provide more rational, more social-functional, less expensive alternative services. These attempts have been accomplished despite federal foot-dragging, and at times outright opposition. It is almost impossible, for example, for any state to expand its Home and Community Based Care Waiver program to meet the needs of the elderly: Federal regulations, pertaining to 1915(c) Waivers, require an empty nursing home bed for each person served in alternative settings.

OREGON'S LONG-TERM CARE SYSTEM

Oregon reorganized its state government in 1981 to place all elderly and disabled long-term care services in one state agency: The Senior Service Division. Oregon also allowed, at local option, for all long-term care services to be managed locally by Area Agencies on Aging. Programs under the supervision of the Senior Service Division include: Older American Act programs, Social Service Block Grant programs, Medicaid (nursing homes, personal care, home health, and home and community based waivers), and a state only funded homecare program: Oregon Project Independence. In addition, most local areas of the state contribute local funds toward alternative services.

Oregon also passed in 1981 legislation titled "The State Policy on Aging". This legislation called for placement of individuals needing long-term care in the least restrictive settings that met their social, function, medical and economic needs. The Senior Service Division has designed its service delivery system to meet the goals of the State Policy on Aging.

Oregon was the first state to receive a 1915(c) Home and Community Based Waiver; Oregon is the only state to have an active 1915(d) Home and Community Waiver; and Oregon is among the very few states which serve more people in their own homes than in nursing homes. Table 1 on the next page shows the results to date of Oregon's reorganization of long-term care. The table shows actual caseloads and expenditures in 1979 compared to actual and expected (without intervention) caseloads and expenditures in 1989. The bottom line shows that in 1989 we will serve almost 1,000 more people and spend more than 30 million dollars less, than if we had not intervened and reorganized our long-term care system in 1981.

TABLE 1.—COMPARISON OF ACTUAL AND EXPECTED [1] GROWTH IN THE OREGON LONG-TERM CARE SYSTEM FOR THE ELDERLY AND PHYSICALLY DISABLED 1979 TO 1989

Program	Monthy average cases	Monthly average cost per each case	Total expenditures
Actual expenditures in 1979:			
Nursing homes	8,079	550.33	53,353,393
Federal-State supported community based care	3,412	123.02	5,036,931
State-only community based care	2,750	51.32	1,693,565
Total	14,241	351.59	60,083,889
Expected expenditures in 1989 without intervention:			
Nursing homes	10,992	1,035.37	136,568,397
Federal-State supported community based care	4,642	277.47	15,457,050
State only community based care	3,741	90.33	4,055,669
Total	19,376	671.30	156,081,117
Actual expenditures in 1989:			
Nursing homes	7,321	1,089.87	95,746,995
Federal-State supported community based care	7,205	292.08	25,252,834
State only community based care	3,896	95.09	4,445,529
Risk intervention care	1,800	0.00	0
Total	20,222	516.95	125,445,358

[1] Expected equals the growth rate of the population age 75 plus and assumes the cost per case would have been 5 percent less than the 1989 activity and represents an estimate of conditions that would probably exist in 1989 had not interventions been made in the Oregon Long-Term Care system.

Oregon has accomplished this enviable record by implementing several different policies.

Starting in 1981, Oregon made nursing home placement our placement of "last resort."

In 1980, Oregon implemented Pre-admission Screening for all Medicaid nursing home applicants, and to date have diverted from nursing home placement to alternative placement about 8,000 persons.

In 1982, Oregon implemented the relocation program, where each nursing home resident is periodically reviewed for the potential of being able to benefit from an alternative placement. Since 1982, Oregon has relocated from nursing homes to alternative settings about 7,000 persons.

In 1982, 25 staff statewide were assigned to develop alternative resources. As a direct result of this action Oregon has doubled the homecare program, and increased the Adult Foster Home program (a home like setting for 5 or fewer persons) from about 1500 in 1981 to about 7,000 today. An interesting result of the Adult Foster Home program is that 70 percent of these placement are used by private paying clients.

In 1983, Oregon implemented the Risk Intervention program, which uses state funded casemangers to locate private funding and volunteers to provide long-term care services for those who do not qualify for federal and state funded programs.

Oregon has shown that it is *not* more expensive to provide alternative services; that providing alternative services will *not* increase caseloads unrealistically through the "woodwork effect;" and that while long-term care costs will continue to increase, they need *not* cost as much as current national estimates would indicate.

Oregon does not consider its long-term care system reorganization to be complete. At least two additional steps need to be taken, before we can face the future growth of the elderly population, confident of success without bankruptcy. We presently have a grant from the Robert Wood Johnson foundation to develop actuarial tables for long-term care insurance, and to develop a

public-private affordable long-term care insurance policy for state and local employees. We estimate current long-term care policies to be too focused on nursing home care and to cost between 3 and 4 times as much as necessary. This is primarily so because of the lack of actuarial data on alternative services, and because the risk pool is too narrow (only the elderly it seems are buying long-term care insurance).

Secondly, we are working very hard to fill a gap in our current system: The placement of many persons, who do not have medical problems, in nursing homes because no other placement can accommodate their needs. Generally, we always try to provide long-term care services to persons in their own homes whenever possible. When this is not possible (usually because of the need for more than a few hours of supervision each day) we try to make a placement in Adult Foster Homes. An Adult Foster Home placement becomes very difficult when people need night-time care (usually help in using the toilet). It is extremely difficult for one person to take care of four or five residents during the day and also be up several times during the night providing care. Most of these persons then are placed in nursing homes, even though their medical needs may be minimal. Our Assisted Living program is being designed to fill this gap.

ASSISTED LIVING

Assisted Living, in Oregon, is an environment where individuals can live in their own apartments independently and receive many of the intermediate nursing care services that they would otherwise have to receive in a nursing home. Assisted Living services are provided to residents in a "social model" that begins with the premise of looking for their capabilities and strengths in day to day activities. In this social model there is an assumption that all individuals should have a right to live independently with respect for their privacy and dignity, free from restraints. The environment of the apartment complex is one where staff are available on a 24 hour basis, providing services based on the needs of the resident. The resident, family members and other significant people sit down together to assess what is needed to support the resident in their capacity for living independently.

Assisted Living structurally and programmatically promotes the residents involvement in all decisions that effect their lives, with an emphasis on choice, dignity, privacy, individuality, independence, and homelike surroundings.

The Oregon Assisted Living model was developed by Dr. Keren Brown Wilson of Portland State University, and has been operating for the past five years at Park Place Living Center in Tigard, Oregon. A second center (Regency Park) was developed two years ago by the same company, Milestone Management, in the same area. The Senior Service Division placed 22 medicaid residents, all of whom were eligible for nursing home care, in this facility two years ago to test its ability to provide the care needed to fill our current gap of services. Almost all of these people would have had to been placed in nursing homes were not this facility available.

The results of this test show not only a higher level of satisfaction among these residents, but also a greater improvement of functioning, especially mobility, than we have seen among similarly impaired residents of Intermediate care nursing facilities. We are convinced that Assisted Living can provide the services and meet the needs of at least half of those currently placed in nursing homes, and we are working very hard to expand the program. Senior advocates, frail elderly and their families, many current nursing home operators, and several developers are very interested in Assisted Living.

Currently, in Oregon 10 nursing homes are at various stages of remodeling to Assisted Living 17 other types of facilities are also remodeling to Assisted Living, and about 48 new facilities are being developed. Because of federal regulations, very few if any of these facilities are using federal housing assistance. We are in the process of changing state regulations to take advantage of this new model, and would greatly appreciate similar changes in federal housing assistance laws and regulations.

It is interesting to note, that while each resident of an Assisted Living facility has their own apartment, the cost of Assisted Living is currently 80 percent of the cost of Intermediate care nursing facilities for both public and private residents. This is true primarily because each resident is expected to do as much for themselves as possible, thereby requiring fewer staff; and because limitations on what staff can perform and when, as required by regulations in nursing homes, does not apply to Assisted Living.

OREGON'S LONG-TERM CARE SYSTEM AS A MODEL FOR THE COUNTRY

Each state has developed its own system of long-term care, dependent on political considerations and resources available. We would *not* recommend that any state model its long-term care programs in its entirety after Oregon. The Oregon model fits Oregon, but most probably not any other state. Parts of the Oregon model, however, can be adopted by other states, and indeed several have done so. For example, almost every state in the country is expanding (as best they can with limited federal resources) alternative services. In addition, we see Assisted Living being developed in other states at the present time though it usually does not provide as many services to residents.

We feel, however, that the federal government should take steps to learn what has not only been accomplished in Oregon, but also in several other states, such as Wisconsin, Maine, Arkansas, Washington, New York, and Texas. Several innovative methods of providing long-term care services are being implemented by the states. With the exception of a six state study recently completed by Diane Justice of the National Governors Association (on loan from the National Association of State Units on Aging), the federal government seems to have little interest in state progress. It has been our experience, that most federal agencies, especially the Health Care Financing Administration, hold state innovative efforts in long-term care in low regard, and usually see such innovations as just another way of receiving more federal dollars.

LINKING CONGREGATE SERVICES TO GOVERNMENT SUBSIDIZED HOUSING PROGRAMS

Most government subsidized housing projects provide no long-term care services to their residents. Such projects consider residents to be living in their own apartments as they would in their own house, and any long-term care services they require should be provided by other federal, state and local resources. Indeed, many residents are required to move each year from government subsidized housing projects because they have physically or mentally deteriorated to such a degree that they are no longer considered suitable. We know of several "horror" stories in Oregon alone, where residents of subsidized housing have hid in their apartments, because they were afraid of being sent to a nursing home.

Progressive operators of subsidized housing projects, such as Michael DeShane of Kirkland Union Manor in Portland, Oregon, are trying to alleviate these problems by working with local and state programs to provide services. It is a sad fact that they must presently do so mostly surreptitiously. Current federal laws and regulations are a prime example of sticking ones head in the sand, and ignoring a very real phenomena of the elderly: they continue to age and in so doing will eventually need long-term care services. Providing services to allow the elderly to "age in place," not only makes good moral sense, it also makes good fiscal sense.

Anything Congress could do to provide funds for services (or even allow existing project funds to be used for services) in subsidized housing, and to provide funds to coordinate services with other government programs, would be a major step in the right direction. Such action would recognize the needs and wishes of those who reside in these projects to remain in familiar settings as long as possible. Such action may well start a new federal philosophy concerning long-term care, a philosophy that would put humanitarian concerns above, or at least equal to, fiscal concerns.

Thank you, Mr. Chairman and members of this committee for allowing me to present testimony today.

DR. RICHARD R. GREEN

HON. TIMOTHY J. PENNY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. PENNY. Mr. Speaker, our Nation has lost a great individual and a great educator. Dr. Richard R. Green, long-time Minneapolis teacher and administrator, who for the past 14 months had served as chancellor of the New York City schools, died yesterday in New York City. We extend our sympathy to his wife Gwendolyn, his daughters, Kelley, Kimberlee, and Sherri, his son, Craig, and to his family and many friends.

Dr. Green's accomplishments were many, but are perhaps best summed up by this morning's New York Times editorial which stated Dr. Green's educational philosophy in his own words: "My mission is to serve children." On behalf of those children whom he served, we are grateful.

WHAT CHANCELLOR GREEN STARTED

Just over a year ago, Richard Green swept confidently into New York City on a powerful wave of expectation that he could turn a badly demoralized school system around. Politicians and educators had reached a rare consensus on the need for reform; everyone looked expectantly to the man from Minneapolis, the city's first black Chancellor. But Dr. Green, who died yesterday at the age of 52, always put his task in simpler terms. "My mission is to serve children," he said.

He began with great self-confidence. During his first appearance at City Hall he instructed Mayor Edward Koch, hovering at his side, to sit down. Mr. Koch, not easily upstaged, quickly obeyed. Yet nothing in

Chancellor Green's career as a teacher, principal and school administrator could have prepared him for New York's huge scale and gritty politics.

His tenure as Chancellor got off to a slow start, but his first budget outlined a sensible, coherent program. In the months before his death he finally appeared more comfortably in charge. At his installation 14 months ago, Dr. Green marched to the stage accompanied by six kindergarten students, members of the high school class of the year 2000. "One thing we cannot disagree on," he said. "We owe to the children of New York a better day."

Over and over, he made clear that nothing was more important to him than creating an atmosphere in which all children could learn—which is why he fought the outmoded rules that can keep incompetent principals in place for life, the outlandish contract that allowed janitors to ignore basic maintenance, the self-protective instincts of a bloated Board of Education bureaucracy.

Chancellor Green believed that every child could succeed and he sought to remove anything, whether time clocks or weapons, that impeded teachers and school professionals. In establishing that standard, his short tenure leaves a lasting impression.

RURAL ELECTRIC COOPERATIVES

HON. ROBIN TALLON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. TALLON. Mr. Speaker, I want to commend to my colleagues, Bob Bergland's insightful comments on the continued viability of rural electric cooperatives. The strength, the involvement, and the interest of the rural electric cooperatives in South Carolina is indisputable. We are fortunate to have their leadership.

MEETING THEIR MATCH: POWER COMPANY STUNG BY SOUTH CAROLINA CO-OPS

(By Bob Bergland)

In South Carolina an old enemy has been on the prowl for months now, looking for rural electric cooperatives to take over.

South Carolina Electric & Gas Company has spent hundreds of thousands of dollars since late last summer in an advertising campaign aimed at discrediting rural electric systems and creating dissension among co-op members.

But the company has run into a stone wall of opposition on two fronts: first at the grass roots level where rural electric leaders are rallying members behind a stalwart "no sale" stance, and secondly in the state legislature, where the co-ops are trying to protect themselves against "shark attacks" by strengthening state law.

Last month, the South Carolina House of Representatives voted 108 to 6 in favor of a rural electric-sponsored amendment requiring a vote by two-thirds of the membership to dissolve a co-op. After the vote, the company threw in the towel, saying it would not contest the legislation when it came before the Senate.

The co-ops have won a crucial battle, but it is thought SCE&G will continue to pursue co-op takeover efforts. The record reveals that this is a stubborn outfit that doesn't seem to mind getting bloodied in battle with rural electrics.

Although SCE&G has a long history of anti-rural electric activities, South Carolina co-ops and the company had been at relative peace in recent years. That changed in 1988, when the rural electrics decided to seek the revision in state law.

While publicly disclaiming any great interest in the bill, SCE&G lobbyists maneuvered behind the scenes to defeat it. Meanwhile, they launched their campaign aimed at a takeover of several co-ops, saying that if South Carolinians could shop for electric rates, they'd shop at SCE&G, not the co-ops.

SCE&G acted in the face of some daunting information it had obtained about the loyalty of co-op members. In the interrogatory process involving one of the lawsuits between the co-ops and SCE&G, the company had to disclose the contents of a survey it had commissioned last July of 803 members of four cooperatives.

In the executive summary, Market Research, a Columbia, S.C., firm, concluded: "These electric cooperatives are in a strong position. Their members perceive them as delivering high quality electric service at a better price than private or state-owned utilities. Moreover, most feel cooperatives are better for electricity consumers than other kinds of utilities.

"Loyalty to the cooperatives is also demonstrated by the relatively high level of participation in annual meetings. . . ."

The surveyors concluded that the one avenue of company appeal that might be open to rural electric consumers was lower rates:

"A massive communications program, mounted unopposed to change this perception, might be sufficient to weaken loyalty to cooperatives. It is our expectation, however, that such a campaign is not likely to be unopposed, and cooperatives are likely to react strongly. While a price advantage might be enough to provide a workable tool in changing opinion, a private utility would have to overcome significant inertia and would face a strong challenge in trying to purchase an electric cooperative."

Indeed, the co-op launched a counterattack. Co-op leaders analyzed company tactics and developed countermeasures. The statewide launched its own advertising campaign. When SCE&G raised the federal subsidy issue, rural electrics ran ads citing facts and figures from Security and Exchange Commission reports showing the investor-owned company had enjoyed subsidies from the federal government several times those received by the co-ops.

The company sought the support of local chambers of commerce and other business organizations in the legislative fight. But that tactic failed as well.

At this moment a lot of hard work by dedicated rural electric leaders in South Carolina appears to have paid off.

But just as we've learned elsewhere, even a string of co-op victories doesn't necessarily mean the end of the takeover threat. Experience demonstrates we can never let down our guard.

The ability of a cooperative to resist attack is directly dependent upon the involvement, the interest and the strength of its membership.

ELIMINATION OF THE LIMITATION ON SOCIAL SECURITY BENEFITS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. GILMAN. Mr. Speaker, I would like to take this opportunity to draw the attention of my colleagues to a bill I am introducing, H.R. 2328, which eliminates the earnings test for Social Security beneficiaries over the age of 65 who choose to work. Furthermore, this legislation will also raise the cap on outside earnings for those Social Security beneficiaries between the ages of 62 and 65 who return to work.

Under current law, Social Security beneficiaries under the age of 70 who are employed or self-employed receive their full benefits unless their earnings exceed the annual earnings limitation. My bill would eliminate this earnings test for senior citizens over the age of 65, and would raise the present limitation on exempt income from $6,480 to $8,535 for senior citizens who are between the ages 62 to 65.

I strongly believe that ambitious, hardworking seniors should not be denied the benefits to which they are entitled simply because they choose to work in their retirement years. I am hopeful that my legislation will, in part, rectify this inequitable situation.

The principal premise of Social Security has been that the benefits are intended to replace income lost due to retirement. Consistent with that belief, the Social Security system has imposed an earnings test limitation or retirement test since enactment of the original 1935 statute.

Initially the law restricted benefits for any month in which a worker received any wages covered by employment. In 1939, Congress amended the law to permit beneficiaries to earn up to $15 a month in outside income. In 1950, the $15 exempt income level was increased to $50 and benefits were provided to those age 75 or older who continued to work in recognition of the need to guarantee some return on contributions made to the Social Security system. Since 1950, the annual exempt amount has increased significantly and the 75 age ceiling has been lowered.

I trust that the irrationality of requiring workers to pay into Social Security all of their working lives only to be denied their full benefits at retirement age merely because they choose to continue working is not lost on my fellow colleagues.

Furthermore, today's service industry is in need of workers and many employers are hiring older Americans. Currently, the earnings test discourages senior citizens from continuing in the work force after retirement. Yet our Nation's senior citizens are rapidly becoming a greater and greater percentage of the population. This trend is leaving an increasingly smaller percentage of the work force available for our growing service industry. Our senior citizens are ready and eager to work and, with the removal of the earnings test, senior citi-

zens will be able to return to the labor force without facing the loss of any benefits.

Additionally, the removal of the earnings test, and subsequent return of the retired to the work force, will help to combat a serious drawback of retirement; boredom and loneliness.

As of 1985, roughly 1.6 million persons between the ages of 65 to 69, 10.5 percent of that age group, were members of the labor force. Obviously, this is a significant segment of our society, a segment, I might also add, that often does not report their income because they cannot afford to lose any portion of their Social Secutiry benefits.

I am optimistic that the increased tax revenues from those working senior citizens who will be encouraged to report their income as a result of the adoption of this legislation will help to offset any additional outlays brought about by the liberalization of the earnings test.

We are all too familiar with the heavy financial burden already borne by seniors citizens. This, coupled with the depression and solitude that often accompanies the later years in an individual's life, speaks for the need to encourage older Americans to continue being productive, enterprising members of our community.

Additionally, I hope that the Committee on Ways and Means will move swiftly to consider H.R. 2328 and that the many Members on both sides of the aisle who have advocated liberalizing or repealing the earnings test in the past will support this legislation.

Mr. Speaker, I insert the full text of H.R. 2328 at this point in the CONGRESSIONAL RECORD and I invite my colleagues to cosponsor this important measure:

H.R. 2328

Be it enacted by the Senate and House of Reprsentatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Social Security Earnings Test Amendments of 1989".

SEC. 2. ELIMINATION OF EARNINGS TEST FOR INDIVIDUALS WHO HAVE ATTAINED RETIREMENT AGE.

(a) IN GENERAL.—Section 203 of the Social Security Act (42 U.S.C. 403) is amended—

(1) in paragraph (1) of subsection (c) and paragraphs (1)(A) and (2) of subsection (d), by striking "the age of seventy" and inserting "retirement age (as defined in section 216(1))";

(2) in subsection (f)(1)(B), by striking "was age seventy or over" and inserting "was at or above retirement age (as defined in section 216(1))";

(3) in subsection (f)(3), by striking "331/3 percent" and all that follows through "any other individual," and inserting "50 percent of such individual's earnings for such year in excess of the product of the exempt amount as determined under paragraph (8)," and by striking "age 70" and inserting "retirement age (as defined in section 216(1))";

(4) in subsection (h)(1)(A), by striking "age 70" each place it appears and inserting "retirement age (as defined in section 216(1))"; and

(5) in subsection (j), by striking "Age Seventy" in the heading and inserting "Retirement age", and by striking "seventy years of age" and inserting "having attained retirement age (as defined in section 216(1))".

(b) CONFORMING AMENDMENTS.—

(1) ELIMINATION OF REDUNDANT REFERENCES TO RETIREMENT AGE.—Section 203 of the Social Security Act (42 U.S.C. 403) is amended—

(A) in the last sentence of subsection (c), by striking "Nor shall any deduction" and all that follows and inserting "Nor shall any deduction be made under this subsection from any widow's or widower's insurance benefit if the widow, surviving divorced wife, widower, or surviving divorced husband involved became entitled to such benefit prior to attaining age 60."; and

(B) in subsection (f)(1), by striking clause (D) and inserting the following: "(D) for which such individual is entitled to widow's or widower's insurance benefits if such individual became so entitied prior to attaining age 60,".

(2) CONFORMING AMENDMENT TO PROVISIONS FOR DETERMINING AMOUNT OF INCREASE ON ACCOUNT OF DELAYED RETIREMENT.—Section 202(w)(2)(B)(ii) of such Act (42 U.S.C. 402(w)(2)(B)(ii)) is amended—

(A) by striking "either"; and

(B) by striking "or suffered deductions under section 203(b) or 203(c) in ammounts equal to the amount of such benefit".

SEC. 3. INCREASE IN EXEMPT AMOUNT UNDER EARNINGS TEST FOR BENEFICIARIES UNDER RETIREMENT AGE.

(a) IN GENERAL.—Section 203(f)(8)(D) of the Social Security Act (42 U.S.C. 403(f)(8)(D)) is amended to read as follows:

"(D) Notwithstanding any other provision of this subsection, the exempt amount which is applicable to an individual shall be $711.25 for each month of the individual's taxable year ending after 1989 and before 1991.".

(b) CONFORMING AMENDMENTS.—

(1) Section 203(f) of such Act (42 U.S.C. 403(f)) is further amended—

(A) in paragraphs (1), (3), and (4)(B), by striking "the applicable exempt amount" and inserting "the exempt amount";

(B) in paragraph (8)(A), by striking "the new exempt amounts (separately stated for individuals described in subparagraph (D) and for other individuals) which are to be applicable" and inserting "a new exempt amount which shall be effective"; and

(C) in paragraph (8)(B)—

(i) by striking "the exempt amount" and all that follows through "whichever" in the matter preceding clause (i) and inserting "the exempt amount for each month of a particular taxable year shall be whichever";

(ii) by striking "corresponding" in clause (i); and

(iii) by striking "an exempt amount" in the last sentence and inserting "the exempt amount".

(2) Section 203(h)(1)(A) of such Act (42 U.S.C. 403(h)(1)(A)) is amended by striking "the applicable exempt amount" and inserting "the exempt amount".

(3) Section 223(d)(4) of such Act (42 U.S.C. 423(d)(4)) is amended by striking "which is applicable to individuals described in subparagraph (D) thereof" and inserting "which would be applicable to individuals described in subparagraph (D) thereof as in effect on December 31, 1989, but for the amendments made by the Social Security Earnings Test Amendments of 1989".

SEC. 4. EFFECTIVE DATE.

The amendments made by this Act shall apply with respect to taxable years beginning after December 31, 1989.

NATIONAL TRANSPORTATION WEEK

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. YATRON. Mr. Speaker, the President recently proclaimed the week of May 14, 1989, as National Transportation Week. This week has been set aside to officially recognize the special and significant role that our country's transportation systems play in the U.S. economy as well as in our national defense structure.

National Transportation Week provides an excellent opportunity for us to reflect on the importance of America's transportation systems in the success of the United States. We are blessed with the most efficient and effective transportation network in the world. Americans can travel freely with ease and convenience and can also rely on the free and efficient flow of goods in commerce. Our transportation network forms an integral part of both U.S. commercial and military interests.

On May 17, 1989, the Reading Traffic Club of Reading, will hold a special luncheon in recognition of National Transportation Week. The Reading Traffic Club is made up of men and women in the transportation industry who are responsible for the development of the first-rate transportation networks that all Americans now enjoy. National Transportation Week affords us an opportunity to recognize groups like the Reading Traffic Club for their many accomplishments.

Mr. Speaker, I commend all of the members of the Reading Traffic Club for their past contributions and continuing commitment to our Nation's transportation network. Their efforts along with the efforts of similar groups throughout the United States are responsible for the success of our Nation's transportation systems and I know that my colleagues will join me in recognizing the entire transportation industry during National Transportation Week.

CONGRATULATIONS TO THE U.S. GOVERNMENT CLASS OF CASTLE HIGH SCHOOL, NEWBURGH, IN

HON. FRANK McCLOSKEY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. McCLOSKEY. Mr. Speaker, last week, a group of U.S. Government students from Castle High School in Newburgh, IN came to Washington, DC for the National Bicentennial Competition on the Constitution and Bill of Rights. This group of students and their teachers worked very hard for the State of Indiana and I would like to commend them on a job well done.

The State of Indiana was well represented at the national competition by the members of the Castle High School team: Gerardo Arnaez, Tamilyn Ballard, Sean Bliss, Dena Bozarth, Rebecca Briggs, Melissa Campbell, Charles

Chappell, Angela Dembowski, Leann Devaisher, Brian Durham, Matt Edwards, Rachel Erdley, Julie Gerhardt, Donna Hodges, Ruth Kercher, Bill Kish, Greg Lamar, Laura Lancas, Brenda Langhorst, Allison Long, Kim Midkiff, A.J. Neese, Kent Newton, Kim Plamer, John Parke, Michael Rush, Tracey Steele, Brett Virgin, Lee Walts, Julie Wheeless, Jason White, Kerri Willis, and Lisa Wilsbacher, all seniors at Castle High School, who performed admirably at the district, state and national levels. This competition proved to be an enriching experience for all of them.

I would also like to thank Stan Harris on his outstanding job of coordinating the eighth district competition in addition to his duties as the coach of the Castle High School team. Stan is a wonderful teacher and without his help the competition would not have been possible. I would also like to thank William Baker, Rick Borries, Duane Chattin, Bobbie Hudson, Robert Leming, and Tonda Mason for all their hard work and dedication to the program.

The sponsors for the State of Indiana include Kappa Kappa Kappa, Aluminum Company of America and General Foods Corporation, all of the Evansville, IN area. Others giving financial assistance are the State Bar Association, and its young lawyers section and the affiliated Indiana lawyers auxiliary and Indiana Lawyer Commission. The Indiana Department of Education and the Governor's task force on citizenship education also cooperated in the program.

Again, I would like to thank everyone for their team work and dedication to the bicentennial competition.

H.R. 2318, THE LOW INCOME HOUSING PRESERVATION TAX ACT OF 1989

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. RANGEL. Mr. Speaker, I am today introducing legislation to provide tax incentives to encourage the preservation of existing federally and State aided multifamily housing for low- and moderate-income families. The legislation is similar to H.R. 3663 that I sponored in the 100th Congress.

I remain concerned that the owners of housing for low- and moderate-income tenants will exercise provisions allowing them to prepay their debt and relieve themselves of restrictions requiring them to continue to rent to low- and moderate-income tenants.

I acknowledge that the housing acts of 1987 and 1988 and the laws of several States, including my own, New York, which include conditions that must be met before an owner may convert his low- and moderate-income project to market rate. I intend that this legislation is coordinated with these provisions allowing owners generous tax incentives if they will follow the process set forth in these statutes designed to insure that there remains adequate housing for low- and moderate-income tenants.

I wish to point to the record of the March 3, 1988, hearings of the Subcommittee on Select Revenue Measures of the Committee on Ways and Means as evidence of the potential loss of 240,000 to 800,000 units of low- and moderate-income housing by 1995 if owners are free to prepay their mortgages and convert their buildings to market rate projects.

I am particularly concerned about the Mitchell-Lama housing in New York City. The owners of these projects for tenants of moderate income can also prepay their mortgages and convert their buildings to market rate units or co-ops or condominiums. This stock of housing is crucial to New York City which has a dwindling supply of affordable housing for its large middle class.

The proposal also includes provisions to encourage low- and moderate-income housing cooperatives to continue in that status. The bill would settle a dispute that such co-ops are having with the IRS over the taxation of income from reserves maintained under requirements of their HUD insured mortages.

A summary of the bill follows:

PROPOSAL FOR LOW-INCOME HOUSING PRESERVATION TAX ACT OF 1989

This legislation following H.R. 3663 of the 100th Congress provides tax incentives to encourage the preservation of housing for low and moderate income tenants and cooperators. It is different this year in that the redepreciation incentives are only available to owners of buildings for which HUD has already judged needing assistance under the Housing Acts of 1987 and 1988 or similar state programs. It also modifies the passive loss rules for qualifying buildings. The legislation includes the following provisions:

SECTION 1

Short Title.

SECTION 2

The bill restores the basis in a qualified building that the owner agrees to maintain as a low or moderate income building for a 20 year period. The owner would be required to insure the building was in good physical condition before he could secure tax relief. This will allow the owner to tax depreciation deductions for the building although it has already been depreciated. The depreciation would be deductible against any income if the qualified building also met the occupancy standards of the Low Income Housing Credit. Recapture provisions would be similar to those for the low income housing credit. In any event no taxpayer could reduce his income tax liability by such deductions by more than 50% of the liability remaining after the application of all other deductions and credits.

SECTION 3

The bill allows the seller of a subject building to exclude from gain the noncash gain (the gain equal to his remaining mortgage obligation) if it is sold to an owner who agrees to maintain the building for low or moderate income tenants for 20 years beyond the original obligation of the seller.

SECTION 4

A building is qualified if the Secretary of HUD has approved a plan for the preservation of the building under the Housing Acts of 1987 and 1988. A building not subject to these two Housing Acts would be qualified if the state agency that administers the state program to which the building is subject has a similar program requiring a plan for the provision of similar incentives in return for a long term agreement (20 years or more) to retain the building for low or moderate income families.

SECTION 5

The bill waives for moderate income co-ops the 80/20 rule that limits the income of a co-op from nonmembers to no more than 20% of the co-op's total income. This will allow moderate income co-ops to earn as much as they can from the commercial space in their buildings. (Same as H.R. 3663, 100th Cong.)

SECTION 6

The bill declares that interest earned on mandated reserves by moderate income co-ops is not taxable income for the co-op as long as the co-op remains a moderate income co-op. It also retroactively relieves moderate income co-ops of any tax liability for such interest where the co-op agrees to continue as a moderate income co-op for at least ten years. (Same as H.R. 3663, 100th Cong.)

PROTEST INDIA'S BLOCKADE OF NEPAL

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. SYNAR. Mr. Speaker, yesterday I cosponsored House Concurrent Resolution 115 with Congressman DICK DURBIN to protest India's blockade of Nepal.

Ties between India and Nepal have traditionally been very strong. However, the two countries have recently been unable even to come to the negotiating table to resolve their differences regarding their Trade and Transit Treaties which were allowed to lapse in March. India's closing of 13 of the 15 border crossings between the two countries at that time has exacerbated the trade dispute by making it even more difficult for goods to enter Nepal.

Congressman DURBIN and I had the opportunity to visit Nepal earlier this year. Our trip focused on the programs run by the United States Agency of International Development and private voluntary organizations such as Save the Children and CARE, as well as the work done by the 128 Peace Corps volunteers in Nepal.

With a per capita income of $160, Nepal along with Bangladesh is the fourth poorest country in the world. Our U.S. AID programs, which total $12 million in 1989, are therefore extremely important to the nation's development.

Since the Trade and Transit Treaties between India and Nepal were allowed to lapse in late March, the resulting lack of petroleum products has greatly reduced the effectiveness of our aid program in Nepal. After driving for hours on the hilly terrain in and around Nepal's capital, Khathmandu we can appreciate the necessity of stable petroleum supplies for the execution of development programs in much of Nepal.

The current shortage of petroleum and other products is, of course, affecting more than just United States operations in Nepal. Short-run damage to the economy, especially the area around Khathmandu, is already evi-

dent. The Nepalese Government recently predicted that economic growth will drop from 5 percent to zero percent this year, and that inflation will rise from 8 percent to 20 percent.

The long-run effects of the trade and transit disputes are also alarming. With kerosene unavailable, most Nepalis are now substituting wood fuel for their cooking and heating needs. This will only accelerate the trend toward deforestation in Nepal, a trend which United States reforestation projects are attempting to reverse. Congressman DURBIN and I discussed the linkage of deforestation in Nepal to the flooding in Bangladesh with development officials in both countries during our trip to the region.

We introduced this resolution in response to the three main effects of the trade and transit dispute on Nepal: the effect on aid and development programs in the country, the effect on the economy and the daily life of the average Nepali, and the effect on the regional environment.

The resolution urges India, as a responsible regional superpower, to take the initiative in proposing a date, time, and place certain for negotiations on the trade and transit dispute. It also calls for the reopening of the 13 border crossings in order to better facilitate the passage of goods into Nepal. Finally, it requests the State Department to monitor the situation and to brief Congress on this important issue. It is my hope that passage of this resolution will help bring India and Nepal back to the table where they may work out a mutually beneficial agreement and restore confidence in what has been a traditionally friendly relationship.

TRIBUTE TO RON OLSEN

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. LEVINE of California. Mr. Speaker, I rise today to recognize my friend and a highly respected community leader, Ron Olson who will be honored with the American Jewish Committee's Learned Hand Award this evening. This award is given each year to an outstanding member of the legal profession who, through dedication to the principles of our Constitution, has been a voice of understanding and good will.

Ron Olson has shown himself to be more than worthy of this great honor, and an outstanding choice for the Learned Hand Award. He is a natural-born leader who has used his talents to further good of his community to a degree that few have. Throughout his life, he has maintained a commitment to charitable concerns, and to improving the welfare of those around him. His work should serve as an example to us all.

Ron's leadership in both the Los Angeles community and the legal profession has been truly extraordinary. In addition to his responsibility to his own law practice, Ron has found time to become actively involved in a wide variety of humanitarian projects and organization. The common thread in these activities is his commitment to justice for those who are less able to pay for proper representation in our legal system. His pursuit of justice for the less fortunate members of our community has intensified over the years and he has taken on a great number of leadership positions through which he could influence his colleagues to join in that pursuit. As a young lawyer, and president of the Los Angeles County Barristers, part of the county bar association, he pushed for an association rule change calling for a mandatory pro bono work commitment from all young lawyers. Later, as resident and president and then director of the Legal Aid Foundation of Los Angeles, and as a member of the board of governors to the State Bar of California, he continued to encourage his colleagues to contribute their time and their expertise to represent needy individuals, all the while leading the way by his own example.

Ron has also been a leader in the growing movement toward alternative dispute resolution. He has written dozens of articles for professional journals, participated in numerous seminars, and held many leadership positions designed to investigate alternatives to litigation within the court system. And yet, he has continued to take a hands-on approach to leadership. Recently he has become the informal negotiator for the homeless residents of Los Angeles in their certificates with city authorities.

The entire Olson family has joined Ron in the pursuit of excellence in their respective lives and in the furtherance of humanitarian concerns. His wonderful wife Janie was a founding member of the Interfaith Center to Reverse the Arms Race, and has been active in a number of other community organizations. Their three great kids have also stood out among their peers. Kristen, a Harvard graduate is, I understand, currently teaching in France, and is preparing to enter the Johns Hopkins School of Advanced International Studies here in Washington. Steve, is a junior at Stanford, and is spending the year studying in Italy. Amy, the youngest, is a senior in high school, and will be entering Carleton College in the fall.

Mr. Speaker, I would like to ask my colleagues to join me in congratulating Ron Olson for being selected for this great honor, and in recognizing his exemplary humanitarian works.

NATIONAL RECYCLING POLICY

HON. CHUCK DOUGLAS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. DOUGLAS. Mr. Speaker, today New Hampshire joins in the fight against mounting solid waste by calling for a national recycling policy. This policy would initiate a drive to preserve and protect our environment; maintain the beauty of our Nation which is so evident in the State of New Hampshire; preserve our national resources; and set an example of leadership for the rest of the world in the area of recycling.

As a cosponsor of successful legislation to designate May as "National Recycling Month," I ask that both Congress and the President consider the plea of the New Hampshire Legislature in its call for a national recycling policy. To contribute to this effort, I will shortly be introducing legislation to implement a national policy in the area of plastics recycling.

STATE OF NEW HAMPSHIRE,
HOUSE OF REPRESENTATIVES,
Concord, NH, April 20, 1989.

Hon. CHARLES DOUGLAS,
Longworth House Office Building, Washington, DC.

DEAR CONGRESSMAN DOUGLAS: On March 16, 1989, the New Hampshire House of Representatives adopted and sent to the New Hampshire Senate House Concurrent Resolution No. 3, petitioning the United States Congress for a national recycling policy.

On April 13, the New Hampshire Senate adopted same.

A copy of this resolution is enclosed. It has been signed by the Speaker of the House and the President of the Senate.

Respectfully,

JAMES A. CHANDLER,
House Clerk.

Enclosure.

HOUSE CONCURRENT RESOLUTION No. 3

Whereas, we live in a world of finite resources where society cannot be sustained without careful conservation of natural resources; and

Whereas, inadequate attention to resource recycling is contributing to resource depletion, air and water pollution, and economic inefficiency; and

Whereas, the materials discarded daily in the United States could help assure availability of basic materials for our manufacturing industry; and

Whereas, American recycling industries, a major source of raw materials, are forced to compete with heavily subsidized virgin materials extraction and processing industries; and

Whereas, the states and cities could reduce their expensive burden of solid waste by one-third to one-half in markets for recyclable materials; and

Whereas, a national recycling policy could encourage the growth of markets for recyclable materials; Now, therefore, be it

Resolved by the House of Representatives, the Senate concurring: That the State of New Hampshire join with the New England Resource Recovery Conference, the New York State Legislative Commission on Solid Waste Management, and the board of directors and the membership of the National Recycling Coalition to petition the President and Congress of the United States to instruct the administrative agencies and departments, including the Environmental Protection Agency and the Departments of Interior, Commerce, Agriculture, and Treasury, to prepare recommendations and guidelines establishing a national recycling policy utilizing data already developed by the Council on Environmental Quality, the National Commission on Supplies and Shortages, and the National Commission on Materials Policy; and

That this policy shall encourage and provide incentives for the development and use of goods produced from recycled materials and reduce unfair competition from, and subsidies for, non-renewable resource industries; and

That copies of this resolution, signed by the speaker of the house and the president of the senate, be by them forwarded to the

President of the United States and to the members of the New Hampshire congressional delegation.

DEPARTMENT OF VETERANS' AFFAIRS HONORS OUTSTANDING NURSING PERSONNEL

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. MONTGOMERY. Mr. Speaker, the Department of Veterans' Affairs [DVA] has selected three nursing personnel within its hospital system to receive the Secretary's Award for Excellence in Nursing. The award, established in 1985, pays recognition to exceptional standards in DVA nursing care.

The 1989 recipients, chosen from more than 60,000 nursing personnel, are: Mertis Scott, a registered nurse at the Jackson, MS, DVA Medical Center; Mary Bethea, a licensed practical nurse at the Salem, VA, DVA Medical Center; and Robert Lancaster, a nursing assistant at the Tuscaloosa, AL, DVA Medical Center.

EXCELLENCE IN NURSING AWARD WINNERS OF 1989

Mertis Scott, R.N., is nurse of the Hemodialysis/Renal Unit at the DVA Medical Center in Jackson, Miss., where she began her nursing career. Even as a young staff nurse, she displayed the professionalism, enthusiasm and leadership skills for which she is recognized today. Early in her career, she rose to become head nurse of a busy medical/surgical unit and took a special interest in caring for the most complicated cases. Transferring to the Hemodialysis Unit, she became known for her expertise in renal medication regimens and renal diets, and other hospital staff frequently sought her advice. Able to handle the most difficult patients with skill and compassion, she has earned the respect of physicians, nurses, technicians and patients. Having assumed the role of renal clinic nurse one day each week, Scott became a "trouble shooter" for home dialysis patients, sometimes talking patients and family through life-threatening situations. In order to help patients maintain their dignity and remain independent for as long as possible, she began a pilot project for the now highly successful Home Training Nurse Program. She conducts training sessions for patients, and created and distributed to hospital staff materials on the special problems of renal patients. Recognizing the stress on the families of home dialysis patients, Scott initiated and coordinated a Dialysis Respite Care Program. She has served as an EEO counselor, and is a member of the hospital's EEO committee, the Nurse Professional Standards Board and virtually all nursing service committees.

Mary Bethea is a licensed practical nurse at the DVA Medical Center in Salem Va. Working a 12-hour shift on an acute medical ward, Bethea regularly cares for critically ill patients, many with complex conditions such as cancer and AIDS. She is closely attuned to patients' reactions, and spends extra time with them to allay their fears. She provides emotional support, encourages rehabilitation and works with patients to help them maintain their independence. Her patients look to her not only as a caregiver but also as a friend. She is ever alert to their needs and monitors their behavior, recently saving the lives of two patients by performing the Heimlich maneuver. Because of her professionalism and enthusiasm, new licensed practical nurses are assigned to work with her. Last year, Bethea received special recognition for her perfect 14-year attendance record.

Robert Lancaster is a nursing assistant at the DVA Medical Center in Tuscaloosa, Ala., where he has worked for approximately 34 years. He has demonstrated a unique ability to establish a rapport with the most difficult patients, winning their trust through his patience and understanding. He can detect the needs of patients who are unable to express them, and on occasion has helped to defuse potentially dangerous situations. Making special efforts to know each patient's behavior patterns, he recently saved the life of a patient by performing the Heimlich maneuver. Lancaster motivates other personnel, especially those who are new to the psychiatric unit. He also motivates patients through an awards program he established to improve their behavior and to involve them in their treatment plans. Lancaster spends much of his free time visiting hospitals and nursing homes.

Mr. Speaker, each of the Department's 172 medical centers submitted nominations for the awards, which will be presented May 12 at the Department's Central Office here in Washington. I know my colleagues will want to join with me in congratulating these health care employees for the high caliber of their work and for the exceptional manner in which they are taking care of our veterans.

THE CELEBRATION OF ISRAEL'S INDEPENDENCE DAY

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mrs. COLLINS. Mr. Speaker, on May 10 Jews everywhere celebration the 41st anniversary of the creation of the State of Israel. I would like to join in the celebration.

As Americans we realize how important our own Independence Day is. Each July we stop to remember the successes of the early American patriots, their perseverance for the causes of freedom and liberty. More than 200 years ago our fledgling democracy began with some determined leaders and a somewhat willing citizenship. Over time and as our Nation grew, the ideas that they espoused became the rules by which we lived. Today we do not claim that our process or our people are perfect. But we do work every day to strengthen our democracy and serve as an example for people and patriots around the world.

Israel is one of our democratic partners in the Middle East. We all know of the hardship Israel has endured during the early years. But I also am sure that through everything, the Israeli people will continue to uphold the democratic principles in which Theodore Hertzel, who promoted the idea of a Jewish homeland, and Chaim Weizmann and Golda Meir, who were early leaders of the Jewish State, believed so strongly.

Our Nation extends from coast to coast, but Israel, a nation the size of New Jersey, is nestled in an area of the world where democracy is the exception rather than the rule. Israel's strategic position in the Middle East is vital for the future of democracy. We must believe that Israel and its neighbors will be able to make peace, and we must do what is appropriate to facilitate this process.

The festival of Passover has just ended. I remember a Passover I spent in Jerusalem when I first came to Congress. I am happy now to celebrate the creation of a homeland for the Jewish people. Congratulations Israel on your 41st birthday! May your democracy remain ever strong.

VETERANS WIN RULING ON AGENT ORANGE

HON. H. MARTIN LANCASTER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. LANCASTER. Mr. Speaker, I would like to call your attention to a matter of great importance to thousands of Vietnam veterans throughout the United States.

As some of my colleagues may know, Vietnam veterans have finally won a victory that was long overdue. Recently, a Federal judge in California agreed with a group of Vietnam veterans who brought a lawsuit to make the Government agree that agent orange caused them severe health problems. The Department of Veterans' Affairs has long argued that there was no scientific evidence of any connection between use of the chemical defoliant and the health problems of veterans and their children. The court held that only a "significant statistical association between exposure and illness" is required to establish a claim. Previously, the Department of Veterans' Affairs has required a veteran to show "proof of a causal relationship." Veterans found this standard nearly impossible. Only 5 of the 33,272 veterans who have claimed the herbicide harmed them have ever been granted direct benefits for agent-orange exposure from the Government.

The ruling of Judge Henderson requires that the VA put an end to the 10-year denial and now accept compensation claims from veterans. Every denial of an agent-orange claim since 1985 must now be reviewed.

Mr. Speaker, this ruling will have major implications for our Vietnam veterans. As cochairman of the House Vietnam Veterans in Congress, I urge my fellow colleagues in the House and Senate to support legislation that will fairly compensate the victims of agent orange.

I commend the following article from the Washington Post, written jointly by Mary R. Stout, president of the Vietnam Veterans of America, and H.F. Gierke, national commander of the American Legion, to the attention of every Member of this body.

[From the Washington Post, May 11, 1989]

NO MORE DELAYS ON AGENT ORANGE—SET COMPENSATION RULES FOR VIETNAM VETS—NOW

(By Mary R. Stout and H.F. Gierke)

The recent ruling by U.S. District Judge Thelton Henderson striking down the government's Agent Orange compensation regulations should remind the nation that the Agent Orange issue is far from dead.

Members of the Vietnam Veterans of America and the American Legion have been fighting an uphill battle for the past decade to obtain justice for the veterans exposed to this defoliant during the Vietnam War. Judge Henderson's decision, a result of a class-action suit brought by VVA, along with the legion's recently completed study of Vietnam veterans, confirms that the government has not done its part to put an end to the suffering from the Vietnam War.

A decade ago the media were ablaze with reports that the dioxin contaminant in Agent Orange may have produced adverse health effects such as cancer and birth defects. News reports regularly featured the plight of Vietnam veterans with rare diseases and their pleas to the federal government for assistance. But with time, press interest in the story dwindled.

The vacuum in the media was a credit to the game plan devised by the executive branch. The first part of the strategy was to delay resolution of the issue as long as possible in the hope that the public pressure to compensate Agent Orange victims would subside with time. "We need scientific evidence," said the Veterans Administration (responsible by law to provide compensation for service-related injuries), "and sufficient scientific studies have not yet been conducted."

When Congress called this bluff in 1979 by requiring the VA to conduct an epidemiology study of the veterans who were exposed, the executive agencies were up to the task of delay. First, the VA dallied for years with the chore of writing a protocol for the study. Then, in 1983, it threw up its hands and tossed the study to the Centers for Disease Control.

The CDC was even more creative. After spending four years and tens of millions of taxpayer dollars, it concluded in 1987 that the congressionally mandated study simply could not be done because not enough veterans could be found who had been exposed to Agent Orange. By then, the issue had so subsided in the media that few noticed that this conclusion defies common sense. The military admits it sprayed more than 10 million gallons of the herbicide over the battlefield—so much that even the VA's rules say it must assume that all those sent to Vietnam were in fact exposed.

The second part of the government's strategy was to adopt the principle that compensation can be provided only if scientists agree there is a cause-and-effect relationship between Agent Orange and the veteran's illness. This ensured that no one would be compensated during his or her lifetime because, as the decades it took for scientists to nail down the cause link between smoking and cancer make clear, it's exceedingly difficult for scientists to reach agreement over the cause-and-effect status of any toxic agent.

But in the end the government's strategy has unraveled. Private veterans' organizations spent years and thousands of their own dollars to prevent the book on Agent Orange from being prematurely closed. In a study commissioned by the American Legion five years ago and published last December, the legion proved that, contrary to CDC's conclusion, a valid epidemiology study of exposed Vietnam veterans can in fact be conducted. The legion's researchers also documented that many of these veterans suffer from serious and often rare disorders.

Then Judge Henderson, agreed with the Vietnam Veterans of America's analysis that the VA's requirement of a cause-and-effect relationship unlawfully stacks the deck against Vietnam veterans. The judge concluded that the VA has never in its history premised receipt of disability benefit on such a strict standard of proof. Moreover, the VA ignored the mandate by Congress to adjudicate Agent Orange claims under the less onerous ground rules applied to all other veterans, including the precept that doubt on any issue must be resolved in the veteran's favor.

As a result of the Vietnam Veterans of America's lawsuit, the VA will now have to reformulate its compensation rules for Agent Orange and readjudicate every one of the thousands of claims for benefits it previously rejected. As a result of the Legion's study, Congress may hold hearings on why the epidemiology study it long ago agreed to has never been done. And the Agent Orange issue is back in the media.

It is unfortunate, to say the least, that prolonged public pressure is necessary to force the executive branch to live up to its moral and legal obligations to those who risked their lives in service to this country. Congress must share part of the blame for the shabby treatment Vietnam Veterans have received. True, Congress stepped in to force the VA to provide medical care to Agent Orange victims. But the legislature has continued to defer to the executive branch on the issue of compensation long after it became apparent that it was shirking its responsibilities.

The appropriate response now is to call a halt to the tactic of delay and media control. We do not need to wait for more studies on Agent Orange. We do not need to wait for the VA to rethink how much evidence is enough to support compensation. We need Congress to bite the bullet and set the compensation rules based on the ample scientific studies that already exist on industrial workers, farmers, veterans and laboratory animals documenting that it is reasonable to conclude that many diseases are associated with Agent Orange.

WELCOME TO OUR NEWLY NATURALIZED CITIZENS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. GILMAN. Mr. Speaker, it is with sincere pleasure that I congratulate the residents of New York's 22d Congressional District who have chosen to become citizens of the United States with all the privileges, freedoms, and responsibilities that American citizenship entails.

Our beautiful Hudson Valley region in New York State is proud of its newest citizens, and I invite my colleagues to join me in welcoming the following newly naturalized Americans and extending to them our best wishes for a happy and prosperous life in their new homeland:

Alfred Baumann, Attila Presser, Aldene Ferdinand, Thomas Park, Francisca Flores, Alempideh Aslani, Fernando Bueno, Yvonne White, Louis Fevier, Eduardo Hernandez, Kevork Lazyan, Arzina Jaffer, Sedat Tuncer, Sophy Kong.

Ofer Nurkin, Franca Zoppi, Rene Pierre-Lou, Denise Samuels, Osric Laws, Cecilia Garcia, Steven Talkjan, Nichola Baynes, Mary Siu-Wai La, Sun Park Kim, George P. Levy, Toby Gluck, David Millette, Marija Ciceran.

Adelia Rosell, Maria Decabrera, Kookie Cheng, Partha Bhattachar, Gabino Lau, Nina Tushinsky, Helen Delaurenti, Yong Nan Warren, Aveline Palisoc, Kevin McGovern.

Marie Levy, Oya Tugal, John Lu, Rachel Breuer, George Kemp, Antonio Larcia, John W. Smith, Judith Sanchez, Reynaldo Padilla.

Joan O. Nelson, Shahid Qazi, Eon Byer, Marlen Messian-Pe, Anna Lee, Maria Gregor, Angela Lau.

Jean Fidel, Prema Prasad, Daisy Rosario, Julio Cano, Maria Mesh, Norberto Nepomuceno, John Berio, Hieronim Rudzinski, Abraham Thomas, Eileen Nepomuceno.

Jonathas Fils-Aime, Ruben Rubinos, Mirella Betances, Mohammed Karamat, Si Iun Yong, Sandra M. Chuck, Julio Fernandez, Virginia Ventillo, Francisco Reyna-Gonz, Maria Ledesma.

Marian M. White, Ramon Pichardo, Kiyoung K. Kim, Glen Ford Fernandez, Paul Li Horng, Sencion Soriano, Wade Ran Lin, Fernando Betances, Cristina Vasquez, Li-Hui Yang.

Zafer Kalkan, Heiderose Conroy, Shaukat Malik, Jayantibha Patel, Patrick Joseph, Ariela Schwarzber, Lucia Villa, Anthony C. Sargeant, Natividad Toribio, Miriam Gensler.

Emelita Faunlagui, Dinesh Maharaj, Ester Tapales, Rochel Neiman, Adan Rodriguez, Mariette Francis, Yolanda Blanco, Ivy May Davis, Moses Portillo, Yuri Tushinsky.

Theresa Davis, Trevor Chase, Alrica Paisley, Felicula Cebrian.

Atilio Ciceran, Eleanor Gaus, Daniel Mou Long L, Jorge Avila, Gregory Aslani, Halina Rubinstein, Stuart Watt, Yolanda Rodriguez, Wascar Martinez, Wilfreid Guillaume.

Elizabeth Nepomuceno, Neil James McQuade, Jose Giraldo, Manuel Gutierrez, Marie Schindler, Olga Taller, Sameer Desai, Chetanaben Amin, Derek Ian Simpson, Pam Cane.

Sergo Dieu, Marie Morency, Pushpalath Sawker, Cheng Chang, Margaret McGovern, Susan Bohm, Braulio Calaustro, Kourosh Bagheri, Nereyda Lopez, Dimitri Dewes.

Maria Schultz, Sara Turner, Antonio Henriquez, Ayala Malach, Ernesto Faunlagui, Guadalupe Viray, Merceditas Rivas, Maria Resinger, Sara Gluck, Napoleon Ledesma.

Sandra Jones, David Ngo, Maria D'Agostino, Maria J. Ruiz, Ashvin A. Shah, Gil Samson, Mordechaj Krausz, Rama Katragadda, Issac Nurkin, Hari Menon.

Michael Mesh, Joaquina Abou-Hamda, Vernoica Herskovic, Geula Efrati.

Joanne Park, Sofia Quintero-P, Raymond Ahmadi, Panagiota Hatzis, Piero Olcese, Joseph Procopio, Kenneth Levine, Doroteo Ocampo, Annamma Kaduvettoo, Mary Leahy.

Paulina Quilicot, Paulin Noelizaire, Angelia Newell, Lily You Horng, Lisa Chen, France Toussaint, Ayala Englanoff, Pierre Bernard, Macario Larcia, Edwin Burrow.

Josephine Novak, Peter Elie, Sydney Newell, Aida Guirguis, Michele Branca, Maru Maria D Escudero, Asha Badlani, Ve-

ronica Alimurung, Josefa Cabrera, Daisy Santana.

Juan R. Manuel, Varughese Abraham, Chao-Tsui Lin, Shao Hua Huang, Marek Nosal, Oristil Orisca, Felipa Perez, Margarita Giles, Fernando Betances, Madhuben Patel.

Julia Moronta, Frida Held, Manuel Araujo, Gopi Nayar, Jose Blanco, William Marte, Lanny Kong, Che-Ming Huang, Dimitri Dellis, Herminigil Luistro.

Bhanumati Vasa, Cornelis Jong, Reina Llanos, Joseph Giuliano.

Jacob Herskovic, Esmeralda Rozon, Yuhg Li, Sheng-Yu Cheng, Mary Li, Dometila Manuel, Margarette Voyard, Abraham Klein, Helen Yu Hsia, Varughese Abraham Jr.

Victor Costa, Humberto Begaz, Gladys Avila, Frank Nelson, Nelson Ocampo, Salvatore Sparta, Myriam Castillo, Beatriz Salvilla, Andre Bouville, Hanni Petersen.

Yva Lapointe, Mariana Bjorkander, Rueyjen Lee, David Landau, Urmela Maharaj, Astleyman Tyrell, Rosa Nunez de D, Vikramchan Maharaj, Ma Corazon Calaustro, Abel Ruben Villanueva.

Il Young Lee, Rosalucia Zimmermann, Dezi Knapic, Julia Ann Bianchi, Jill Eliza Muller, Renato De Samonte, Lunise B. McBean, Betty C.O. Ting, Balbina Aguilu, Ellen Engelberg.

Neelu Bhatia, Averil Baynes, Josephine Whriter, Joyce I. Dickson, Michael Chen, Donesia McGregor, Arax Tamazian, Erica Tyrell, Jorge Acosta, Hitesh Thaker.

Meir Efrati, Mirtha Morgan, Wilfrid Fenelon, Catherine Bae.

Maria Campa, Cathleen Logan, Yolanda White, Gitanjali Maharaj, Moshe Horowitz, Elizabeth Salamon, Moshe Schwarzber, Patrick A. Barnes, Bassam Naber, Jorge LaSprillo.

Shyla Cantor, Jose Gomez, Ping-Po Chang, Lualhati Samonte, Axel Portillo, Stephen Kim, Marie Meniel, Lewis John Portelli, Guy Gerard, Ciriaco Villarosa.

A TRIBUTE IN MEMORY OF DR. RICHARD R. GREEN

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. RANGEL. Mr. Speaker, I rise today to honor and pay tribute to a man who will be sorely missed by all who had the pleasure and the good fortune of knowing him; a man who was very much admired by his peers and colleagues during his entire teaching and administrative career; and a man who worked diligently and unselfishly so that others could benefit from his wisdom. The man of whom I speak is Dr. Richard R. Green who held the post of New York City Schools Chancellor.

We are all saddened by the sudden passing of Dr. Green who was taken from us on May 10, 1989 at the age of 52. He was a revered leader, one who was capable of bringing people together for a common cause, that being the education of children. He was a man who truly cared, not only about the children, but about the entire New York City educational system. He was determined to give hope and a new spirit to this system for the benefit for all. He was determined to make a difference.

Mr. Speaker, allow me to share with you and my colleagues at this time, some of the highlights of Dr. Green's career.

He began teaching in Minneapolis in 1959. In 1972, he became the citywide administrative assistant for desegregation and integration. He went on to become principal of North Community High School and administrative head of the region. He was appointed superintendent in 1980, the first black in that post. Dr. Green reorganized the administration and introduced benchmark tests to show whether students had minimum competence in mathematics, science, and writing. Though his tenure as a chancellor was brief, he made an impact that will long be felt by all.

Dr. Richard Green was an energetic man who gave his all to whatever he was involved in. He was not afraid to fight for what he believed in and was well known for his ability to overcome problems. He brought a great deal to the New York City school system. We shall never forget his many contributions, his strength of character, and his willingness to do whatever it took to improve opportunities for all children and to provide them with a chance for a decent education. As he stated in his inaugural address during his installment ceremony last year, "We owe to the children of New York a better day. We are a service-delivery system from this day on."

We will miss this great man who touched the lives of so many people. His beacon of light will shine for years to come. To his wife, Gwendolyn, and his family, we share with you in your time of grief and have you in our thoughts.

DR. PHILIP CASH RETIRES FROM EMMANUEL COLLEGE

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. MOAKLEY. Mr. Speaker, I want to alert my colleagues to the fact that one of our Nation's distinguished educators, Dr. Philip Cash, will be leaving his post at Emmanuel College in Boston this year. For 30 years Dr. Cash has been a mainstay of Emmanuel's history department, and also has served as its chairman.

It is easy in remarks such as these to state these simple facts of the case. But as any historian can tell us, facts alone do not tell the story. We also must explain their impact. And in Philip Cash's case, his impact has been extraordinary. In fact, his students describe him as nothing short of an experience.

It is fitting that Dr. Cash's field is American history, and more particularly the Revolutionary period, because questioning the validity of established authority and accepted truth is his forte. His approach to teaching is to assail every comfortable assumption, to demythologize every idol, to unmask every complacency, and to restructure the minds of his hearers into finely honed analytical tools. Philip Cash understands that the development of critical thinking ability is the central mission of the educator and the final goal of the liberal arts education process. And he understands also that the study of history is one of the best means to fulfill that mission and achieve that goal.

We hear a lot these days about alarming deficiencies in critical thinking and analytical ability among American students. No such problems exist for the generations of Emmanuel history majors who have had the benefit of Philip Cash's tutelage. He accepts no pat answers—he has more respect for an honest "I don't know" than for an unquestioned verity. He must despair of the platitudes we hear so frequently from those who will populate tomorrow's history books, just as he revels in revealing for his students the naked pomposities of yesterday.

As a member of the Steering Committee of the Northeast-Midwest Congressional Coalition, I am particularly impressed with the scholarly attention which Dr. Cash has devoted to the impact of regionalism as a shaping force in American history. It is convenient today to think of regional differences as a thing of the past. We in Congress know that they are still thriving, not so much as eccentricities to be savored as de Tocqueville did, but as critical policy issues affecting the economic future of us all.

In the Northeast and Midwest, we pride ourselves particularly on the human resources that historically have been our strong point and continue today as the source of our resurgence. For that reason, I am pleased that, although Dr. Cash will be leaving the teaching profession, our region will not be losing his talents since he intends to pursue further his research and writing interests and to lend his special touch to the conquering of yet more new worlds.

SALT, START, AND INF—THE ARMS-CONTROL PROBLEMS

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. ACKERMAN. Mr. Speaker, I want to call the attention of my colleagues to Strobe Talbott's commentary "Why Kohl Is Right," in this weeks issue of Time Magazine.

Talbott, Washington bureau chief of Time and an outstanding expert on arms-control problems, makes the right point when he stresses that the United States must work together with its European allies to develop a coherent strategy to deal with the Soviets in the coming years. In light of the revolutionary changes in the Soviet Union and Eastern Europe, and in light of Gorbachev's arms-control proposals, we must find a more constructive strategy to deal with the Soviet Union. We need negotiations on all kinds of weapons, including short range nuclear missiles, in order to stop the arms race, and in order to stabilize the military balance. But we also need these talks in order to avoid a split between NATO members.

Mr. Speaker, Strobe Talbott received journalistic awards for his outstanding books "Endgame" and "Deadly Gambits" dealing with the SALT, START and INF talks. He also

deserves our appreciation for his outstanding commentary.

[From Time, May 15, 1989]

WHY KOHL IS RIGHT

(By Strobe Talbott)

Helmut Kohl has infuriated the Bush Administration by trying to save his political skin with a call on the superpowers to negotiate over short-range nuclear weapons. But however pusillanimous his notives may be. Kohl happens to be right in what he recommends. Tactical nuclear weapons have never made sense, especially concentrated in West Germany, the putative battlefield were World War III would begin. If American tactical missiles were ever fired in anger, they would raise mushroom clouds over German territory and probably kill more local civilians than the foreign invaders. If, on the other hand, the missiles were not fired, they would become irresistible targets for devastating pre-emptive strikes by the enemy. Hence the bitter saying in Bonn, "The shorter the range, the deader the German."

Nuclear weapons deter their own use. Arguably that is all they are good for. But tactical nukes, because they frighten allies whom they are supposed to protect, are good for even less. In fact, these weapons are good for nothing except as bargaining leverage to remove similar Soviet missiles in Eastern Europe. Thus the current furor is surprisingly only in that it took so long, and so much pressure from the left, for a West German Chancellor to adopt Kohl's present position.

The U.S. has been holding the line against short-range-weapons talks out of fear that negotiations will lead to a supposedly terrible state of affairs in Europe known as "denuclearization"—the removal of all nuclear weapons from the Continent. Accordingly to the NATO catechism, denuclearization would make Europe "safe" for a conventional war that the Warsaw Pact, with its much vaunted superiority in soldiers and tanks, might be tempted to start and could likely win. According to another article of the dark faith, a denuclearized Western Europe would be "Finlandized": France, Italy and Belgium, but, above all, the Federal Republic of Germany, would be sucked away from their traditional protector on the far side of the Atlantic into the Soviet orbit. These countries would end up, like Finland, being allowed to manage their internal affairs as they saw fit but obliged to calibrate their foreign policies to the wishes of Moscow.

Because of where they live, most. Europeans see more clearly than most Americans how implausible and irrelevant that danger is becoming. All they have to do is look at their neighbors on the other side of the Iron Curtain to realize that there is indeed such a thing as Finlandization, but it is happening in the East, not the West. Moreover, it is happening with the approval of Moscow, which is encouraging its comrades to turn toward Paris, Bonn, London and Rome not just for economic help but also for political institutions and values.

As for the threat of conventional war, Mikhail Gorbachev is already committed to unilateral reductions in troops, armor and artillery. He might go further in the talks with the West not taking place in Vienna, and further still if shortrange nuclear weapons are on the table.

Once the Bush Administration stops cursing Kohl under its breath, it will probably do what he is asking. Some formula will be found to permit the talks that Kohl wants and Washington hates. Too bad the U.S. will have been dragged kicking and screaming into a decision that it should have reached on its own. The leader of the alliance will be in the anomalous and undignified position of following its allies to the negotiating table, and the American hand will be weaker as a result, both with the West Europeans and with the Soviets.

TRIBUTE TO LAW ENFORCEMENT OFFICIALS IN TEXAS

HON. SOLOMON P. ORTIZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. ORTIZ. Mr. Speaker, I rise today to commend a distinguished group of law enforcement officials for their dedication and hard work in an investigation of vital importance to my congressional district and our Nation's war on drugs. The individuals I speak of are Sheriff Alex Perez of Cameron County, TX, sheriff's Lt. George Gavito, U.S. Customs Agent Oran Neck, Drug Enforcement Administration Agent Armando Ramirez and Head Commandant Juan Benitez Ayala of the Mexican Federal Judicial Police.

I wish to commend these men here today because of their efforts in the investigation of a series of murders, discovered in April of this year, which took place near Matamoros, Mexico near the United States-Mexico border. The drug-smuggling gang which perpetrated these heinous crimes was involved in Satanic rituals and many of its victims were the subjects of human sacrifice.

The herculean efforts of the officials I have mentioned, and others like them, led to the discovery of the gang's activities and the apprehension of its members, including most recently the leader of the cult. By cooperating closely with one another, these individuals representing different entities of different governments were able to conduct a comprehensive, efficient, and highly effective investigation. Their hard work and commitment to serving the citizens of their communities is deserving of recognition and praise by us here today.

Among the victims of these crimes was Mark Kilroy, a student of the University of Texas who was kidnaped by the cult while on spring break. None of us can truly know the grief experienced by the parents of Mark Kilroy. But throughout this horrible ordeal, they have kept their dignity and have relied on their faith in God to comfort them. The only solace we can offer them is that the death of their son lead to the discovery and elimination of this brutal and barbaric drug-smuggling gang.

Again, I wish to praise the law enforcement work of Alex Perez, George Gavito, Oran Neck, Armando Ramirez, and Juan Benitez Ayala. They truly embody the dedication and commitment which define the term "public servant."

TRIBUTE TO PRINCIPAL ADA J. BARNES

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. LEHMAN of Florida. Mr. Speaker, Opa-locka elementary schools and the entire Dade County Public School System is losing a valuable asset: Ada J. Barnes is retiring from teaching, after nearly four decades of service.

As a former teacher, and as a former member and chairman of the Dade County School Board, I know from firsthand experience that dedicated, talented principals like Ada Barnes are an essential ingredient to good education. In that regard, Opa-locka Elementary School has been very lucky, because the faculty and students there have benefited from Ada Barnes' leadership and caring for the past 15 years.

The faculty and staff at Opa-locka Elementary and the entire community of Opa-locka are honoring Mrs. Barnes on May 19, "Ada Barnes Day," and I want to join with them in honoring a truly outstanding educator. We thank Mrs. Barnes for the positive difference she has made in the lives of so many thousands of our children, and we hope that she will enjoy a happy and healthy retirement. I know that the example of achievement Mrs. Barnes set and her good advice—aim for the sky—will continue as a guide to her students and to those in our community whom she served so well.

Mr. Speaker, I would like to share with my colleagues the following Miami Herald article about Ada Barnes.

SCHOOL'S OUT FOR LONGTIME EDUCATOR

(By Luchina Fisher)

Ada J. Barnes is moving out of her second home. She's giving up her patio, her private office and her 1,100 children.

After 15 years as principal of Opa-locka Elementary, 25 years with Dade County schools and 38 years in education, Barnes, 59, is retiring.

She's not going to fish or play golf. She might travel some. But mostly she's going to do what she likes best—work with kids.

"I'm just so attached to the boys and girls in this community," said Barnes, who plans to spend time with her three grandchildren, volunteer at a junior high and work on projects for her church and sorority.

She said the school at 600 Ahmad St. has been her second home, a family place where all the kids walk from within two miles of the school and parents feel free to visit.

Rarely do principals stay at one school as long as Barnes has, she said. But each time she was encouraged to move, Barnes would ask if she could take with her the patio with its green grass, cement benches and shade trees in the center of the school. Knowing that was unlikely, Barnes would ask to stay at Opa-locka Elementary.

"I feel such a need to work with the boys and girls here," Barnes said.

The teachers stay, too. "There is very little turnover, I think, because of her ability to guide us and direct us," said Linda Brent, the music teacher for nine years and this year's Teacher of the Year at the school. "We follow her guidance almost to the letter."

Barnes, whose replacement has not been picked, has tired to guide students and teachers to realize their potential. Each morning over the loudspeaker, she shares with them a motivating message such as Jesse Jackson's: "If you can believe it, you can achieve it." "Believe in yourself" or "Aim for the sky."

Said Barnes: "My fight has been to have high expectations and that's not easy where you have the majority of kids being minority."

Nadene Young, one of the first teachers Barnes hired, said Barnes knows every student either by name or incident. The kids are unafraid of Barnes, though she can quiet a room just by walking into it.

"When the children speak, she listens with her ears, but she hears with her heart," Young said.

Sixth-grader Iteshia Rogers said Barnes is always there when you need her. "Like if you don't know how to do something and school is closed, you can go to Miss Barnes."

Education was valued so much in Barnes' family that "I just grew up knowing I wanted to be a teacher," said Barnes a native of Savannah, Ga.

She once toyed with the idea of being a nurse—until a high school basketball game where a fellow player's nose was bloodied and Barnes "was on the ground before the blood was."

In 1949 at 18. Barnes graduated from Savannah State College in Georgia, where she majored in social studies and elementary education. She took a job as a high school social studies teacher in Evans County, Ga. She took a year off in 1959 to get a masters in education at South Carolina State College in Orangeburg. In 1964, she moved to Dade County and began teaching at Bunche Park Elementary.

Barnes never left Northwest Dade. After Bunche Park, she taught at Miami Gardens and M.A. Miami elementary schools. In 1973, after much encouragement, she took a job as assistant principal at North County Elementary, and in 1974 came to Opa-locka as principal.

On May 19, "Ada Barnes Day," the entire school and members of the community and Barnes' friends will salute Barnes. Two days later, she will be honored at a banquet at the Sheraton Americas in Hialeah.

"Ada has prepared us to work under just about anybody," said teacher Laura Johnson. "We don't feel fearful. We just feel we'll miss Ada."

NATIONAL CORRECTIONAL OFFICERS WEEK

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. MAZZOLI. Mr. Speaker, I would like to take this opportunity during this week which President Bush has proclaimed National Correctional Officers Week to honor and recognize the men and women who work in the correctional institutions of the Commonwealth of Kentucky.

As we in Congress—and lawmakers in the State and local governing bodies—enact tougher laws to crack down on drug-related crime, our prisons and jails are being filled to capacity and in many areas are overflowing. This puts increasing demands and pressure on the men and women who staff these institutions. They have the difficult task of providing public protection while encouraging rehabilitation of those behind bars.

This is no easy task, Mr. Speaker, and it is getting more dangerous and difficult daily.

As a sponsor of the House resolution calling on the President to set aside this week in honor of the correctional officers of Kentucky and of our Nation, I am pleased to join in this tribute. These men and women do not receive much public recognition for the work they do on behalf of society, but our communities in Kentucky are better, safer places to live and raise our children because of their noble efforts. They deserve our admiration and our thanks.

INTRODUCTION OF THE WORLD FOOD DAY RESOLUTION

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. GILMAN. Mr. Speaker, today I am introducing House Joint Resolution 267, legislation to designate October 16, 1989 and October 16, 1990 as "World Food Day."

Legislation commemorating World Food Day has been supported by the Congress for the past 8 years. National coordinator Pat Young and volunteers across the nation ensure that substantive discussions, meetings and conferences take place and their findings are dispersed to key policymakers around the world.

Our House Select Committee on Hunger through extensive hearings and studies confirms that the only way to eradicate hunger is to mobilize the political will necessary to tackle the issue.

Yet, despite the impressive outpouring of support, the problem of world hunger persists. According to recent reports 3 million people are at risk of starving in Angola. UNICEF informs us that every 24 hours, 42,000 children under the age of 5 die as a result of hunger and related diseases.

These grim statistics underscore the critical need for a continued commitment of private and government funds to ending hunger. But emergency relief aid is not enough. A concerted effort must be made to improve the deteriorating conditions that result in tragedy after tragedy—the same conditions that allow famine and starvation to persist and remain a reality in a world with more than enough resources to feed its population. It is time for us, for our Nation and the world of nations to work to prevent disasters from occurring—to solve the problems.

World Food Day continues to play the key role in doing just that and I applaud Pat Young and World Food Day volunteers. Accordingly, I urge my colleagues to cosponsor House Joint Resolution 267.

The bill follows:

H.J. RES. 267

Whereas hunger and malnutrition remain daily facts of life for hundreds of millions of people throughout the world;

Whereas the children of the world suffer the most serious effects of hunger and malnutrition, with millions of children dying each year from hunger-related illness and disease, and many others suffering permanent physical or mental impairment because of vitamin or protein deficiencies;

Whereas the United States and the people of the United States have a long tradition of demonstrating humanitarian concern for the hungry and malnourished people of the world;

Whereas there is growing concern in the United States and around the world for environmental protection and the dangers posed to future food security from misuse and overuse of precious natural resources of land, air, and water and the subsequent degradation of the biosphere;

Whereas efforts to resolve the world hunger problem are critical to the maintenance of world peace and, therefore, to the security of the United States;

Whereas the Congress is particularly concerned with the continuing food problems of Africa and is supportive of the efforts being made there to reform and rationalize agricultural policies to better meet the food needs of Africans;

Whereas the United States, as the largest producer and trader of food in the world, has a key role to play in assisting countries and people to improve their ability to feed themselves;

Whereas although progress has been made in reducing the incidence of hunger and malnutrition in the United States, certain groups, notably Native Americans, migrant workers, the elderly, and children, remain vulnerable to malnutrition and related diseases;

Whereas the Congress is actually aware of the paradox of enormous surplus production capacity in the United States despite the desperate need for food by people throughout the world;

Whereas the United States and other countries should develop and continually evaluate national policies concerning food, farmland, and nutrition to achieve the well-being and protection of all people and particularly those most vulnerable to malnutrition and related diseases;

Whereas improved agricultural policies, including farmer incentives, are necessary in many developing countries to increase food production and economic growth;

Whereas private enterprise and the primacy of the independent family farmer have been basic to the development of an agricultural economy in the United States and have made the United States capable of meeting the food needs of most of the people of the United States;

Whereas increasing farm foreclosures threaten to destroy the independent family farmer and weaken the agricultural economy in the United States;

Whereas conservation of natural resources is necessary for the United States to remain the largest producer of food in the world and to continue to aid hungry and malnourished people of the world;

Whereas participation by private voluntary organizations and businesses, working with national governments and the international community, is essential in the search for ways to increase food production in developing countries and improve food distribution to hungry and malnourished people;

Whereas the member nations of the Food and Agriculture Organization of the United Nations unanimously designated October 16 of each year as World Food Day because of the need to increase public awareness of world hunger problems;

Whereas past observances of World Food Day have been supported by proclamations by the Congress, the President, the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States, and by programs of the Department of Agriculture, other Federal departments and agencies, and the governments and peoples of more than 140 other nations;

Whereas more than 400 private voluntary organizations and thousands of community leaders are participating in the planning of World Food Day observances in 1989, and a growing number of these organizations and leaders are using such day as a focal point for year-round programs; and

Whereas the people of the United States can express their concern for the plight of hungry malnourished people throughout the world by fasting and donating food and money for such people: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 16, 1989, and October 16, 1990, are designated as "World Food Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe World Food Day with appropriate ceremonies and activities, including worship services, fasting, education endeavors, and the establishment of year-round food and health programs and policies.

TRIBUTE TO THE LATE HIGH CHIEF SUAAVAMULI PO'U PINE SOLIAI

HON. ENI F.H. FALEOMAVAEGA

OF AMERICAN SOMOA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. FALEOMAVAEGA. Mr. Speaker, American Samoa has experienced a great loss with the death of High Chief Suaavamuli Po'u Pine Soliai who passed away at the age of 51, on Saturday, April 15, 1989.

High Chief Suaavamuli served with distinction in the American Samoa Legislature for 8 years. As a member of the House of Representatives, he served as the chairman of the Economic Development Committee, vice chairman of Government Operations, and a member of various other committees. Chief Suaavamuli will be remembered by the legislature and people of American Samoa for his many years of public service.

High Chief Suaavamuli will also be missed by the members of the Church of Jesus Christ of Latter-Day Saints. In addition to the many duties he willingly carried out for his church, he served in the very important roles of bishop's councillor and on the stake high council.

High Chief Suaavamuli will be sorely missed by his family. He was the devoted and beloved husband of Leutu Teleso Soliai and father of three daughters, Si'itia Faimafili, Tupito Leutu and Naumau Mele; and two sons, Fotuolepalaau Carl and Misipopo Elekana.

Mr. Speaker, I add my personal condolence to the family of High Chief Suaavamuli and ask that the territorial House concurrent resolution expressing the sympathies of the legislature of American Samoa to the family of Suaavamuli Fotu Pine Soliai, be submitted along with my statement as part of the RECORD.

Text of resolution follows:

HOUSE CONCURRENT RESOLUTION

A House concurrent resolution expressing the sympathies of the legislature of American Samoa to the Family of Suaavamul Po'u Pine Soliai who passed away.

Whereas, Suaavamuli Po'u Pine Soliai, at the age of 51, passed away on Saturday afternoon April 15, 1989, at the Lyndon Baines Johnson Tropical Medical Center; and

Whereas, Suaavamuli Soliai served in the House of Representatives, having been first elected to the Twelfth Legislature for the years 1971-1972; and, having been next elected to the Fourteenth through Seventeenth Legislatures for the years 1975-1982; and

Whereas, among his last assignments as a Legislator, Suaavamuli Soliai served as Chairman of the Economic Committee; as Vice-Chairman of the Government Operations Committee; and, as a member of the Budget and Appropriations, Public Works, and Parks and Recreation Committees; and

Whereas, Suaavamuli Soliai will be remembered by the Legislature and the People of American Samoa for his many years of public service as a Legislator; and

Whereas, Suaavamuli Soliai was also active in the performance of his religious duties, having been a missionary for the Church of Jesus Christ of Latter-Day Saints; a Bishop's Councilor; President of the YMMIA of the Nu'uuli Ward; and, a member of the Pago Pago East Stake presidency; and

Whereas, Suaavamuli Soliai will be remembered by the members of his church for his many years of church service; and

Whereas, Suaavamuli Soliai was the devoted and beloved husband of Leutu Teleso Soliai and the father of five children; and

Whereas, the passing away of Suaavamuli Soliai is a great tragedy and loss to the members of his family, his church as well as the community: Now, therefore, be it

Resolved by the House of Representatives of the Territory of American Samoa, the Senate concurring.

STRATEGIC PETROLEUM RESERVE ACQUISITION PROGRAM

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. LELAND. Mr. Speaker, on April 18, I introduced legislation which would save taxpayers millions of dollars and enhance our energy security. H.R. 2047 would permit using private sources for increases and improvements to the Strategic Petroleum Reserve [SPRO].

As we attempt to balance the Federal budget, funding for certain programs is bound to be reduced or eliminated. To prevent the termination of vital programs, Congress must look for alternative methods to reduce spending.

H.R. 2047 implements a new SPRO acquisition program which will take Government out of the business of funding the reserve, and thereby furnish taxpayers with more than $1 billion per year in savings. Under provisions of this bill:

First. The SPRO fill rate will increase to 100,000 barrels per day or more than 36 million per year;

Second. Importers of crude and refined products will store about 2 percent of their imports at the SPRO. This provision simply makes mandatory the current discretionary authority of the Secretary of Energy under the Energy Policy and Conservation Act.

Third. As imports fluctuate, the Department of Energy [DOE] will adjust each importer's storage percentage in order to avoid overfill and underfill.

Fourth. Importers of refined products will contribute a crude oil equivalent because the SPRO only contains crude oil.

Fifth. Contributions of actual crude are not required. Rather, exchanges, "paper" swaps, credits and payments would be used by the DOE to minimize unnecessary shipping costs and ensure storage of the proper grade and mix of oil.

Sixth. Importers will coontinue to own the oil in the SPRO and will receive the sales revenue when the SPRO oil is used.

Seventh. The DOE would first consider using the privately owned oil during a crisis in order to maximize the present value of the privately owned oil and spur private trading of these "SPRO futures."

Eighth. Future costs for construction, maintenance, and administration of SPRO facilities will be borne by importers.

An added advantage of this bill is an improved energy security. The key to SPRO's effectiveness is its size and ability to rapidly provide large volumes of oil to consumers. This fill rate will provide an additional 150 million barrels by 1994.

Mr. Speaker, this bill will greatly improve our energy security, and do so by decreasing Government spending. I urge my colleagues to support this energy security insurance policy and cosponsor this bill.

HOWARD B. OWENS SCIENCE CENTER: A DECADE OF EXCELLENCE

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. HOYER. Mr. Speaker, this year a unique educational facility in Prince George's County is celebrating its 10th anniversary.

The Howard B. Owens Science Center was the dream of its namesake, a science educator in Prince George's County for 15 years. Dr. Owens' vision was of a central teaching facility to improve teacher competency in science education and to expose young people to the joys of the study of science.

If our Nation is to remain competitive in the world, then we must continue to maintain our special strength, the knowledge, and innovation of our citizens. Science education is essential in this effort, in order to awaken the curiosity and interest of our young people. The Howard B. Owens Science Center, with its

fascinating exhibits and instructional programs makes science accessible to children.

Since first opening its doors on October 30, 1978, 750,000 students have participated in the programs of the Owens Science Center. Originally designed to accommodate 50,000 students annually, teachers across the school system sought to avail their classes of this opportunity for expanded science education.

The Owens Center now is visited by 80,000 students annually. In addition, thousands more have benefited from the Owens Center Summer Science Enrichment Program.

When you consider that Prince George's County has just over 100,000 students in its schools system, you can see that the impact of the Science Center on our young people has been immeasurable.

From the time the Owens Center first opened under the direction of Dr. Hays B. Lantz, Jr., it has been dedicated to the belief that science education is basic education for all students and that science is best learned and taught as it is practiced in the real world—in a hands-on setting. To this end the expertise of hundreds of scientists, engineers, mathematicians, educators, and countless others have contributed to the rapid evolution of the programs, exhibits, and services of the Owens Center. Goddard Space Flight Center and the U.S. Deparetment of Agriculture at Beltsville have been major supporters.

The design of the Owens Center's activities has been most visionary and on the cutting edge of science education due to a competent and committed staff of educators and support persons. The science labs, planetarium, exhibits, and programs developed during the first decade have been emulated by many school districts and science centers across the country. Friday night planetarium programs keep the public up-to-date on advanced astronomy and space exploration, and teach people how to track stars, constellations, and planets from their own backyards.

The Owens Science Center, under the direction of Mrs. Winnie S. Wooley, launches its second decade with the addition of its new Challenger Center, a simulated environment for space missions. The pioneering spirit that guided the Owens Center through its initial decade of excellence will provide the necessary momentum as the Challenger Center, the first of its kind in a public school district and the second one in the world, elevates its passengers to new dimensions in space science education.

I hope that the Members of the House learning about the Owens Science Center will spread the word to their own congressional district about the innovative approach to science education. Surely school systems across the United States could benefit from our experience in Prince Georges County.

INTRODUCING TEXAS-ISRAEL EXCHANGE RESOLUTION

HON. ALBERT G. BUSTAMANTE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. BUSTAMANTE. Mr. Speaker, I am introducing today a joint resolution honoring the Texas-Israel Exchange Program for its contributions to the agricultural interests of the United States and Israel. Twenty-seven of my colleagues have joined me as original cosponsors to this resolution.

The Texas-Israel Exchange Program was the first joint economic development agreement between Israel and an individual State. This successful program has become the model that other States have followed to promote economic development projects with Israel. Many States have already explored such opportunities including Virginia, California, Massachusetts, Washington, Oklahoma, Ohio, New Jersey, Kentucky, Illinois, Florida, Indiana, Missouri, Minnesota, Wisconsin, Michigan, Connecticut, and Iowa.

In Texas' case the agreement with Israel was designed to expand agricultural cooperation between the two States. The program has brought Israeli expertise in arid-land farming to a part of the world where water shortage and optimal water usage are new concerns due to the greenhouse effect. Through a demonstration farm in Laredo, TX, the program is showing farmers how they can use technology to increase yields and grow new crops while using much less water. These water saving techniques could have wide application in the arid Southwestern and Midwestern areas of the United States. In addition, the water saving techniques could prove crucial for farmers in northern urban States where water supplies must be shared with households and industry.

The demonstration farm located in my district is demonstrating the successful application of innovative agricultural technologies and diversified crops not commonly found in Texas. The project encourages the long-term viability of small acreage farms by demonstrating an effective system for producing high-yield, high-value products.

A second major component of the project is developing a vocational agriculture curriculum for students at the Laredo Junior College. The curriculum includes hands on experience at the demonstration farm. The curriculum goes hand in hand with stimulating community-based economic development and fostering an agricultural work force well trained in the new practices demonstrated on the farm. Continuing education and training courses for area farmers and ranchers are also planned, with the possibility of cooperative courses with universities in Mexico.

A third component of the farm is designing and constructing the necessary farm buildings, packing sheds and cold storage using low-cost, resources-efficient building technologies. This building program uses indigenous materials and adapts building methods to local economic and geologic conditions. The project focuses on the use of solar energy for greenhouses, refigeration, water purification, and crop drying.

Overall, the farm project is to promote innovation in Texas agricultural production and present new opportunities for economic revitalization in the agricultural sector of the State. It also provides a new model for joint practical cooperation between countries, agencies, and the public and private sectors. Last, but not least, an added benefit of the program is the strengthening of ties between America and Israel on a real people-to-people basis.

Mr. Speaker, I look forward to the further success of this cooperative program with Israel and to the expansion of similar programs to all the States of the Union.

THE 125TH ANNIVERSARY OF ARGO B'NAI B'RITH CHAPTER 5399

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mrs. MORELLA. Mr. Speaker, I would like to take this opportunity to both share my heartiest congratulations with Argo B'nai B'rith Chapter 5399 on its 125th anniversary, and to bring special attention to their anniversary exhibit of local Jewish artifacts.

Argo Unit 5399 traces its origin to 1864. It is the area's oldest and largest B'nai B'rith group. Argo lodge members have included Supreme Court Justices Brandeis, Frankfurter, and Goldberg, and many Members of Congress.

Some of the remarkable programming highlighted in the exhibit includes Presidents Taft's and Wilson's speeches to the Argo membership, and the granting of "Statesmen of the Year" awards to Senators Jacob Javits and Henry Jackson, House Speaker John McCormack, and to Canadian Ambassador Ken Taylor for the role which he played in rescuing Americans from Iran in 1979.

The Argo B'nai B'rith group's ability to be both respectful of history and responsive to current issues is reflected in the exhibit. In 1981, Argo was host to then-Egyptian Ambassador Ashraf Ghorbal in a program dedicated to the Arab-Israeli agenda after the assassination of President Anwar Sadat. It was the first time that an Arab Ambassador had addressed a local B'nai B'rith group. I am especially pleased to salute the Argo B'nai B'rith unit, because, in 1987, it changed its status from a lodge to a unit to allow for membership of women.

Items on display at the exhibit include handwritten minutes of meetings dating back to 1899, a ceremonial menorah presented to Argo in 1906, documentation of the lodge's activities since 1864, photos of its prominent members as well as a collection of its bulletin, the Argo News, probably the oldest continuously published group publication of B'nai B'rith.

The exhibit is housed in the Lillian and Albert Small Jewish Museum of Washington, the original Adas Israel Synagogue, at Third and G Streets NW. and is curated by the Jewish museum's director Hadassah Thursz. The commitment and dedication of current Argo unit officers Henry Compart, Basil Herzstein, Saul Lubar, Samuel Skolnick, and Frederick Wohl are also very evident in the collection. The exhibit will be open to the public until the end of July.

I would like to extend an invitation to all my House and Senate colleagues to celebrate Argo B'nai B'rith's 125 years of service by visiting this unique exhibit of memorabilia depict-

ing the involvement in the Greater Washington Community of the oldest and largest B'nai B'rith group in the area.

APPLAUSE FOR ZAIRE

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. FIELDS. Mr. Speaker, I would like to join the applause coming from my colleagues and numerous observers of Zaire, congratulating this great country for the substantial progress accomplished recently by its government, under the leadership of President Mobutu Sese Seko.

Mr. Speaker, Zaire has been constantly striving to implement numerous structural reforms in order to secure a higher level of economic performance for the country, as well as higher standards of living for the people. An increasingly competent and dedicated staff of public servants has effectively implemented reforms, taking into account the recommendations of international organizations. As a recent joint report from the World Bank and the United Nations indicates, these efforts are starting to pay off. Zaire ranks among the group of African nations cited by the report which exhibit encouraging signs of economic recovery.

Mr. Speaker, Zaire has also made significant progress in the area of human rights. I am confident that the conclusions of the United Nations Commission on Human Rights have been reported to you and my fellow members, but let me comment on this new development by reminding this audience of the remarkable innovations Zaire has brought to the African continent. For instance, the creation of the Department of Citizens' Rights and Liberties in 1986 was an initiative that set an example among African nations. Although Zaire is still struggling to completely eradicate all forms of human rights abuses, it deserves our encouragement for its achievements to date.

Mr. Speaker, I cannot emphasize enough the importance of Zaire's friendship and support in the central African region. Zaire is indeed a cornerstone for Western values in Africa and thus deserves all our support and encouragement.

JEWISH HERITAGE WEEK

HON. BOB CLEMENT

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. CLEMENT. Mr. Speaker, I'd like to address my colleagues about Jewish Heritage Week, May 7 to 14. This week marks a number of events of major significance to the American Jewish community. Those events include the 40th anniversary of Israel's independence, Holocaust Memorial Day, Jerusalem Day, Passover, and the anniversary of Warsaw ghetto uprising.

During this week American Jews and others are learning about Jewish history, heritage, religion, and culture. I was recently in Germany and I had an opportunity to learn first hand about the darkest hours in Jewish history.

Over 6 million Jews were systematically killed in extermination and concentration camps during World War II. I toured the Dachau Concentration Camp in Munich, Germany. Hundreds of thousands of prisoners were confined at Dachau which was the first concentration camp ever built. It opened in 1933 and remained opened longer than any other camp. Even though Dachau was not specifically designated as an "extermination" camp, thousands of men, children, and even entire families died there from a variety of causes in the systematic effort to eliminate groups of people whose political, religious, or social philosophies differed from Adolf Hitler and his Nazi regime.

Standing on the same spot where such untold human suffering occurred made me acutely aware of the horror and pain so many people endured. Persons of Jewish heritage, Gypsys, Jehovah's Witnesses, Catholics, Ukranians, Communists, and many others suffered and died because the beliefs of an evil mind were allowed to endure.

When I observed the pictures of emaciated bodies stacked one on top of another, I shuddered. My God, I thought, how could this have happened?

But more importantly, could this ever happen again?

History does tend to repeat itself. We must ensure that in this instance it never does. We must do that by remembering the lessons of the past.

That is why Jewish Heritage Week is so important.

May 2, I had the privilege to attend the national civic commemoration "Days of Remembrance" sponsored by the U.S. Holocaust Memorial Council at the Capitol rotunda here in Washington.

Again the memories of the unholy acts committed against entire races and groups of people were stirred. I ask my colleagues to pause for a moment and reflect on what happened, and how it happened.

Then I ask my colleagues to join me in a personal pledge to promise to prevent horrors of the past from happening again.

We owe this promise to the brave Jewish men, women, and others who were persecuted and to generations to come—so we may ensure that their forefathers did not die or suffer in vain.

CHARLES AND PETER DeROSE NAMED CITIZENS OF THE YEAR

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. CONTE. Mr. Speaker, I rise today to pay a very special tribute to two brothers who have achieved the American dream by devoting their lives to keeping the people of Northampton, MA, informed.

Charles and Peter DeRose are newspaper men. They are the publishers of one of the best papers in Massachusetts, the Daily Hampshire Gazette. Charlie and Pete were recently named "Citizens of the Year" by the Greater Northampton Chamber of Commerce. They will officially receive this award May 17. Mr. Speaker, I cannot think of two men more deserving of this honor. They have contributed enormously to the people of western Massachusetts by consistent, honest, unbiased news coverage.

Although their integrity and professionalism are well known, these virtues are not the only reason Charlie and Pete received this award. They were chosen because of the extensive time and considerable financial support they have given the community. I'd like to just name a few of the local causes that have received their enduring support: the March of Dimes "Walkathon", the Teen Center, the Hampshire recreational YMCA, the Cooley Dickenson Hospital, and many other civic and municipal boards.

Charlie and Pete, both in their late forties, were born and raised in Northampton. Both are graduates of the University of Vermont. Peter attended Northampton High School and Charles the Williston Academy. However, following college graduation, their careers in newspapers followed different paths. Pete studied in graduate school at Vermont, then worked as an engineer for Systems Engineering Corp. of New Orleans. This proved to be important training when he returned to Northampton in 1966 to oversee the newspaper's conversion to offset printing.

After graduating from college, Charlie took a job at the Burlington Free Press in Burlington, VT. He worked there 2 years before becoming the Gazette's advertising manager.

Mr. Speaker, the DeRose brothers have carried on a family tradition that began in 1929 when their late grandmother, Harriet DeRose, bought the Gazette. Harriet DeRose was a remarkable businesswoman. In fact, she was one of the first women in the country to publish a daily newspaper. Even today that is an outstanding accomplishment.

Charlie and Pete's father also was a formidable newspaper man. Charles N. DeRose, publisher of the Gazette and president of WHMP radio, received the same "Citizen of the Year" award, posthumously, after his death in 1970. The two sons accepted the award in their father's absence. I'm sure the memory of that day in 1970 will be heavy on their minds on May 17 when they become the 25th and 26th recipients of this prestigious honor.

I knew Charles DeRose. A great news man, he really cared about the Gazette, meticulously supervising every word of print that went on the page. Yes, he cared about the paper with all his heart. And his sons have followed in his footsteps to continue a mighty tradition.

Mr. Speaker, it is important to note that these days, most of the newspapers in the country are owned by big chains and multinational conglomerates. One by one the smaller, personal, family owned papers have been sold to these corporations. They are sold to businesses that know little about the people in the communities and are incapable of the personal feelings the family owners once put into every single issue. The residents of western Massachusetts are lucky to have Charlie and

Pete at the Gazette because they put so much of themselves into the paper. They have been an integral part of the Northampton community, and they care very deeply about the people there.

In my 31 years as a Member of Congress, I have had many opportunities to work with Charlie and Pete; many times—both on the campaign trail and during daily congressional business—our paths have crossed. It has been a great personal pleasure to work with these admirable men. We've worked together, we've hunted together, we've spent countless hours helping the community of Northampton prosper. Anyone who knows how much Primo meant to me will know how highly I think of Charlie to have given him one of Primo's pups. Their selection as Citizens of the Year is no surprise. They certainly deserve this honor. Charlie and Pete exemplify the undying optimism and dedication that made this country great. I would like to thank them for their devotion to accurate, honest news coverage and congratulate them on this award. May their children and grandchildren love the Northampton community as much as Charile and Pete do, and may the generations to come continue this splendid family tradition.

INTRODUCTION OF THE CLEAN AIR RESTORATION ACT

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. WAXMAN. Mr. Speaker, it is a pleasure today to join more than 100 of my colleagues in introducing the Clean Air Restoration Act of 1989.

This bill is a tribute to bipartisanship. Republicans and Democrats from across our Nation have come together this morning to chart a new course for cleaning our polluted skies.

I want to make special note of the extraordinary leadership that Congressman JERRY LEWIS has provided in developing this bill. Without his perseverance and ideas, this vitally important consensus would not have been possible. Many other Members—including JIM FLORIO, DAVID DREIER, BRUCE VENTO, BILL GREEN, BILL RICHARDSON, JIM SCHEUER, SILVIO CONTE, and GERRY SIKORSKI—have been instrumental in crafting this legislative breakthrough.

The product of this compromise effort, the Clean Air Restoration Act of 1989, offers a sensible and effective response to the very serious air pollution problems plaguing our cities.

Some 150 million Americans—well over half of our Nation's population—now live in cities with pollution levels that EPA and other experts consider unsafe. Almost every American city violates the health standard for either ozone air pollution, carbon monoxide air pollution, or both. In addition, many areas violate EPA's recently established health standard for small particulate matter.

And the pollution is increasing. According to EPA, last summer's ozone levels were the worst of the decade. Many areas reported record high ozone levels and 28 new cities, with 15 million more Americans, violated the act's standards.

We need sensible new pollution control requirements to reverse this trend—and we need them now. Unless tough measures are adopted, the combination of more cars and global warming will lead to ever higher ozone levels. The National Association of State Air Pollution Officials has termed the outlook for future pollution levels "frightening."

The health impacts of such high pollution levels are very real, and very serious. Ozone pollution causes a range of maladies that includes coughing, wheezing, shortness of breath, and scarring of the lung tissue. It is particularly a danger to those with respiratory ailments, like asthma or emphysema. Young children, who have small, developing airways, are especially vulnerable.

Carbon monoxide pollution creates equally serious problems. It interferes with the ability of blood to bring oxygen to the body's tissues. More than 9 million Americans with heart disease or angina are particularly vulnerable. And we have had disturbing testimony that exposure of expectant mothers to levels of carbon monoxide common in many cities can cause permanent brain damages in fetuses. This is all the more troubling because some 38 percent of all expectant mothers in the United States live in areas with levels of carbon monoxide greater than the EPA considers safe.

Concern over these public health impacts and the billions of dollars of pollution damage each year to forests and agricultural crops is the driving force behind the overwhelming public support for cleaning up our Nation's air.

The Clean Air Restoration Act will clear the air pollution that is choking our cities. This is a sensible bill. It extends the Clean Air Act deadlines for America's cities, while requiring additional air pollution control efforts to bring healthful air quality to our Nation's cities. It removes the possibility of construction bans or other sanctions for areas that have not achieved the standards.

To achieve the needed reduction in pollution the Clean Air Restoration Act relies upon a fair division of control requirements for the two most important general categories of pollution sources: Motor vehicles and local pollution sources.

Cars, trucks, and buses are the largest single source of urban air pollution. They are also the most cost-effective sources to regulate. Unless we control their emissions, we won't attain the standards. We would, however, be forced to impose unfair and unnecessarily burdensome additional pollution reductions on local pollution sources as we try to make up the difference.

The Clean Air Restoration Act establishes a host of measures to reduce emissions from motor vehicles. Tighter tailpipe emission standards are established for hydrocarbons and nitrogen oxides—the two key components of ozone pollution. In addition, a tighter standard is put in place for carbon monoxide under cold-weather conditions. The Clean Air Restoration Act also calls for new requirements to reduce hydrocarbon pollution coming from the evaporation of gasoline while cars are running, parked, or refueled.

Local sources must do their share as well. But control requirements for these sources are tailored to the severity of each area's pollution problem. Areas violating the standard are placed into one of four categories: Moderate, serious, severe, and extreme; and granted deadline extensions which vary from 4 to 16 years.

Each area is required to put in place special measures established for its category. The longer the period of extension, the more controls each area has to implement.

The Clean Air Restoration Act also includes an aggressive alternative fuels program for the Nation's most polluted cities. Low-polluting fuels, such as methanol, ethanol, and compressed natural gas, hold tremendous potential in reducing automotive pollution.

Moreover, the Clean Air Restoration Act seeks to tap free market forces to get more efficient pollution control. It authorizes areas to use economic measures, such as emission fees or marketable permits, to lower pollution levels. Funds raised by fees may be used to help develop lower polluting processes or to reward companies that reduce pollution by paying for innovative and effective technologies.

Finally, the Clean Air Restoration Act puts in place a fair and equitable sanctions policy. Areas that act in good faith and implement promised control measures, but still fail to meet the act's standards, would not be penalized for their efforts. Traditional economic sanctions, such as a cut-off of Federal highway funds, would apply only to areas that act in bad faith and fail to implement their air pollution programs. Sanctions under the Clean Air Act would no longer include a construction ban.

We have developed a state-of-the-art clean air bill that rejects pie-in-the-sky solutions. We take into account not only the new trends in air pollution, but some of the best suggestions that have been proposed during the last year. Our bill will require the best data available, utilize the administration's free market and clean fuels ideas, and emphasize the most cost-effective reductions.

In short, this bill puts us on a fair and straight path to clean air without imposing economic hardship. Thanks to the efforts of my colleagues, we have joined good environmental policy with sound economics.

I look forward to moving this vitally important bill through the Congress as rapidly as possible. We will hold hearings on this issue on May 23 and 24 and move to a mark-up in June. We cannot afford to delay. The health of 150 million Americans is at stake.

SUMMARY OF CLEAN AIR RESTORATION ACT OF 1989

The Clean Air Restoration Act establishes a program of incentives and requirements to reduce smog in the nation's cities, and bring our country's urban areas into compliance with the health based air quality standards established under the Clean Air Act. Almost every American city is today in violation of the Clean Air Act's December 31, 1988, deadline for attaining these standards. At present, 150 million Americans live in cities with air quality in violation of the health standard for either ozone or carbon monoxide air pollution, or both. In addition, many areas violate EPA's recently established air

quality standard for small particulate matter.

The basic approach in the Clean Air Restoration Act is to grant deadline extensions for areas not meeting the standards, conditioned upon the adoption of control measures to assure that cities make continued progress toward achieving the standards. Areas with more severe pollution problems are given more time to meet the standards, but required to take more aggressive pollution control steps.

To achieve the needed reduction in pollution the Clean Air Restoration Act relies mainly upon control programs for the two most important general categories of pollution sources: motor vehicles and local pollution sources. In addition, Federal leadership is provided to help states grapple with interstate pollution problems, to help states in identifying available control technologies, and to help in the development of lower polluting consumer products.

CONTROL OF LOCAL SOURCES OF OZONE POLLUTION

Classification of Areas.—In order to tailor local source control requirements to the general severity of each area's ozone pollution problem, areas violating the standard are placed into one of four categories: moderate, serious, severe, and extreme. The period of the deadline extension varies among the categories. Moderate areas get 4 additional years to attain the standard, serious areas get 8 years, severe areas get 12 years, and extreme areas get 16 years.

Special Measures.—Each area is required to put in place Special Measures for the Achievement of Reduction Targets (Special measures) established for its category. The longer the period of extension, the more controls each area has to implement. While the Special measures, for moderate areas include little more than required under current law, serious and severe area Special measures include a growing menu of controls, and Special measures for extreme areas include a long list of control steps. These measures range from tighter control of new pollution sources to requirements for greater use of lower polluting alternative fuels.

Targets and Milestones.—The Clean Air Restoration Act calls for EPA to establish a series of emission reduction milestones to keep areas on track toward achievement of the standards. At four-year intervals each area not attaining the standards is required to demonstrate compliance with an emission reduction milestone specially tailored for that area. The milestones are keyed toward the achievement of EPA established emission reduction targets which give each area a concrete target as to how much they must do to attain the air quality standard.

Time for State Planning and Data Development.—The Clean Air Restoration Act recognizes the complexity of developing effective state strategies for controlling ozone pollution. It gives states four years to gather data, assemble emission inventories, and develop implementation plans. In the interim, while the long-term plans are being developed, the states are required to continue to reduce pollution under short-term compliance strategies.

Free Market Economic Incentives.—The Clean Air Restoration Act seeks to tap free market forces to get more efficient pollution control. It authorizes areas to use economic measures, such as emission fees or marketable permits, to lower pollution levels. And the bill provides that funds raised by fees may be used to help develop lower polluting processes, or to reward companies that reduce pollution by paying for innovative and effective technologies.

CONTROL OF LOCAL SOURCES OF CARBON MONOXIDE AND PM10 POLLUTION

The Clean Air Restoration Act adopts a similar approach to controlling carbon monoxide and small particulate (PM10) pollution, while recognizing that these pollutants each pose their own unique problems. Areas in violation of carbon monoxide standards are placed into three categories—moderate, serious, and severe—and specific Special measures are established each area. Areas in violation of PM10 standards are placed in two categories—serious and severe—with specific Special measures likewise established for each.

MOBILE SOURCE CONTROLS

Cars, trucks, and buses are the largest single source of urban air pollution. The Clean Air Restoration Act establishes a host of measures to significantly reduce emissions from motor vehicles.

Tailpipe Standards.—Tighter tailpipe emission standards are established for hydrocarbons and nitrogen oxides—the two key components of ozone pollution. In addition, tighter standards are put in place for carbon monoxide, including a special standard for cold-weather conditions.

Evaporative Emissions.—The Clean Air Restoration Act also calls for new requirements to reduce hydrocarbon pollution coming from the evaporation of gasoline while cars are running, parked, or refueling. Such evaporative emissions are the greatest single source of automotive air pollution.

A Longer Useful Life for Auto Emission Controls.—New requirements are established to mandate that emission controls last the full useful life of the automobile. At present pollution controls are only required to remain effective for the first 50,000 miles of vehicle use. This amounts to about half of the full life of most autos.

Alternative Fuels in Areas with Especially Serious Air Quality Problems.—The Clean Air Restoration Act includes an aggressive alternative fuels program for the nation's most polluted cities. Low-polluting fuels, such as methanol, ethanol, and compressed natural gas hold tremendous potential in reducing automobile pollution. In fact, some estimates suggest that certain alternative fuels can reduce ozone formation from motor vehicles by as much as 90%.

SANCTIONS

Under the Clean Air Restoration Act, areas that act in good faith and implement promised control measures, but still fail to meet the Act's standards, would not be penalized for their efforts. Such areas would be moved up to the next nonattainment category (e.g., serious to severe) and required to put in place the associated control requirements. Traditional economic sanctions (e.g., a cut-off of Federal highway funds) would apply only to areas that act in bad faith and fail to implement effective programs.

THE CLEAN AIR RESTORATION ACT OF 1989—SECTION BY SECTION SUMMARY

TITLE I. GENERAL PROVISIONS

Section 101. Improved Data Collection.—requires EPA to develop guidelines for use by states to improve monitoring and inventories of air pollution levels.

Section 102. Maintenance of Standards.—Requires state planning to assure that areas continue to maintain air quality, once pollution standards are attained.

Section 103. Nonattainment Area Boundaries.—Authorizes EPA to designate areas as attainment or nonattainment, and established boundaries for nonattainment areas.

Section 104. Permits.—Establishes general provisions governing permit requirements in nonattainment areas.

TITLE II. OZONE NONATTAINMENT PROVISIONS

Section 201. Local Source Requirements for Nonattainment Areas.—This section includes deadline extensions and new pollution control requirements for ozone nonattaiment areas.

Classification.—Nonattainment areas are divided into four categories based on ozone pollution levels: moderate, serious, severe, and extreme. EPA is authorized to adjust the classification of borderline areas.

Deadline extensions.—Areas with more severe problems are granted more time to attain the standard, but are required to put more aggressive pollution control measures in place. Deadline extensions are for periods of 4 years (moderate areas), 8 years (serious areas), 12 years (severe areas), or 16 years (extreme areas). Areas that fail to attain the standard by the deadline are bumped up to next category, except for extreme areas which can qualify for an extension of up to four years if they have met specified requirements and emission reduction timetables. Extreme areas not meeting deadlines are required to put in place a 3 to 1 offset requirement and a program of economic incentives to reduce emissions.

SMART Measures.—Special Measures for Achievement of Reduction Targets (SMART measures) are established for each classification. The SMART measures for each classification include the steps described below:

Moderate areas: new pollution sources are required to obtain pollution offsets at a 1.2 to 1.0 ratio (a 1.0 to 1.0 ratio is required in current law).

Serious areas: required to use a 1.3 to 1.0 offset ratio; new source review for pollution sources releasing more than 25 tons per year of ozone-forming pollution; enhanced auto pollution Inspection and Maintenance programs; stage II vapor recovery for large gas stations; a permit program for existing sources releasing 50 tons or more per year of ozone forming pollution; new municipal transit buses purchased after January 1, 1992, must be powered by a low polluting fuel (e.g. methanol, ethanol or natural gas).

Severe areas: Same requirements as serious areas except as follows: new source review for sources down to 10 tons; permits for existing sources down to 25 tons per year; after 1992, new additions to centrally fueled fleets of 15 or more vehicles must use low polluting fuel; offsets at a 1.5 to 1.0 ratio; areas to implement EPA program to have 30 percent of new vehicles clean-fuel powered by 1998; area transportation program to include reasonably available techniques for reducing vehicle travel.

Extreme areas: Same requirements as serious areas except as follows: utility, industrial and commercial boilers to use clean fuels or advanced control technology for nitrogen oxides; permits for existing sources down to 25 tons per year; areas to implement EPA program designed to shift to clean-fuel vehicles on following schedule: 10 percent of new vehicles by 1994; 30 percent by 1996; 70 percent by 1998; and 100 percent by 2000.

Rural Transport Areas.—EPA is authorized to adjust the classification of rural areas that have pollution problems caused by transport of ozone pollution from other

areas, or to alter the control requirements that apply to such areas.

Emission Reduction Targets and Milestones.—EPA is to establish emission reduction targets especially tailored for each area. At four year intervals each area is to achieve pollution reduction milestones set by EPA to assure that areas stay on track. Areas that fail to meet emission reduction milestones either bump up to the next category, or may elect to put in place further emission reduction measures or a program of economic incentives for pollution control, depending on the area's classification.

State Air Quality Planning.—States are given two years to assemble comprehensive pollution inventories and four years to develop and submit state air quality implementation plans (SIPs). These plans must include the applicable SMART measures, and must provide for emission reductions adequate to meet the emission reduction target, and any interim milestones. Short-term compliance plans are to be put in place, pending submission of SIPs.

Sanctions.—Economic sanctions, including a cut-off of Federal highway funds, apply for failure to adopt or implement an adequate plan. No sanctions apply for areas that adopt and implement an approved plan, but fail to attain the standard.

Section 202.—Control of Interstate Ozone Air Pollution. A program is established for control of interstate ozone. An ozone transport region is established in the Northeast U.S., and the EPA is authorized to establish additional transport regions. Ozone Transport Commissions are established to review interstate pollution issues.

Section 203.—Additional Federal Measures to Reduce Ozone Pollution. This section includes measures to reduce pollution from sources amenable to Federal control, and other programs to help the states in their control efforts.

Commercial and Consumer Solvents and Coatings: EPA is to develop a program establishing rules limiting emissions of volatile organic compounds from commercial and consumer products.

Control Technique Guidelines Defining Reasonably Available Control Technology: EPA is to establish guidelines to help states define what technologies are reasonably available for 12 pollution source categories and vessel loading.

TITLE III. CARBON MONOXIDE NONATTAINMENT PROVISIONS

Section 301.—Local Source Requirements Applicable to Carbon Monoxide Nonattainment Areas.—The program for carbon monoxide nonattainment areas is similar to the program for ozone nonattainment areas with some important exceptions.

Classification.—Nonattainment areas are divided into three categories based on Carbon Monoxide pollution levels: moderate, serious, and severe. EPA is authorized to adjust the classification of borderline areas.

Deadline extensions.—Deadline extensions are for periods of 4 years (moderate areas), 8 years (serious areas), or 12 years (severe areas). Areas that fail to attain the standard by the deadline are bumped up to next category, except for severe areas which are required to put in place a program of incentives and requirements to reduce vehicle miles travelled.

SMART Measures.—Special Measures for Achievement of Reduction Targets (SMART measures) are established for serious and severe areas. Since carbon monoxide is largely a motor vehicle problem, these measures are less extensive than those applying in ozone nonattainment areas. The SMART measures for serious areas include an enhanced auto pollution Inspection and Maintenance program and an oxygenated fuels program. Severe area SMART measures also include: a 1.5 to 1.0 offset requirement for new pollution sources; a permit program for new sources releasing more than 50 tons per year; new additions to centrally fueled fleets of 15 or more vehicles must use low-polluting fuel; area transportation program to include reasonably available techniques for reducing vehicle emissions.

Milestones.—EPA is to establish carbon monoxide concentration milestones at four year intervals to assure that areas stay on track. Areas that fail to meet emission milestones either bump up to next category, or may elect to put in place further emission reduction measures, including a program of economic incentives and requirements to lower vehicle miles travelled.

State Air Quality Planning.—States are given one year to develop and submit state air quality implementation plans. These plans must include the applicable SMART measures, and must provide for emission reductions adequate to meet the applicable milestones and meet the standard by the applicable deadline.

Sanctions.—Economic sanctions, including a cut-off of Federal highway funds, apply for failure to adopt or implement an adequate plan.

TITLE IV. SMALL PARTICULATE MATTER (PM 10) NONATTAINMENT PROVISIONS

Section 401. New Requirements for PM 10 nonattainment areas.—

Classification.—EPA is to provide PM 10 nonattainment areas into two categories based on PM pollution levels, and the time likely to be required to attain the standard.

Deadline extensions.—Deadline extensions are for periods of 4 years (serious areas), or 8 years (severe areas). Serious areas that fail to attain the standard by the deadline are bumped up to severe category. Severe areas that do not meet the standard are required to put in place a series of best available control measures and techniques for PM 10 established by EPA.

SMART Measures.—Special Measures for Achievement of Reduction Targets (SMART measures) are established for serious and severe areas. The SMART measures for serious areas include a 1.3 to 1 offset requirement. Severe area SMART measures include: a 1.5 to 1.0 offset requirement for new pollution sources; and a permit program for new sources releasing more than 25 tons per year and existing sources releasing more than 50 tons.

Milestones.—EPA is to establish a PM 10 concentration milestones at the four-year mark for severe areas. Areas that fail to meet milestones must put in place sufficient best available control measures and techniques, as described in EPA guidelines, to achieve the standard by the deadline.

State Air Quality Planning.—States are given two years to develop and submit state air quality implementation plans. These plans must include the applicable SMART measures, and must provide for emission reductions adequate to meet the applicable milestones and meet the standard by the deadline.

Sanctions.—Economic sanctions, including a cut-off of Federal highway funds, apply for failure to adopt or implement an adequate plan. No sanctions apply for areas that adopt and implement an approved plan, but fail to attain the standard.

TITLE V. PROVISIONS FOR CONTROL OF MOTOR VEHICLE EMISSIONS

Section 501. Emission Standards for Motor Vehicles.—This section establishes tailpipe emission standards for new cars, trucks and buses for pollutants contributing to ozone air pollution, carbon monoxide air pollution, and PM10 air pollution. For passenger cars two phases of tailpipe standards are provided. Effective model year 1992 or 1993 autos must achieve the following tailpipe emission standards.

	Grams per mile
Hydrocarbons	0.25
Nitrogen Oxides	0.4
Carbon monoxide	3.4
Particulate Matter	0.08

Effective model year 2000, passenger cars must achieve the following tailpipe emission standards:

	Grams per mile
Hydrocarbons	0.125
Nitrogen Oxides	0.2
Carbon monoxide	1.7

These standards apply for the full useful life of the vehicle, as provided in current law.

Section 502. Low Polluting Vehicles.—EPA is directed to establish tailpipe standards for autos fueled by low-polluting alternative fuels such as ethanol, methanol, propane and natural gas. The Agency may require production of vehicles powered by the lower-polluting fuels if necessary to fulfill mandates in Title I.

Section 503. Non Road Use Engines.—EPA is directed to establish standards for emissions of carbon monoxide, hydrocarbons, and nitrogen oxides from internal combustion engines not designed for road use. Where possible, such standards are to be comparable to those applying to similar automotive engines.

Section 504. Motor Vehicle Testing and Certification.—The Federal test procedure by which autos are certified as meeting EPA emission standards is required to be representative of real world driving conditions. The useful life of an auto for purposes of emission control certification and recall is defined to be 100,000 miles.

Section 505. Compliance by Vehicles In Use.—Tampering with emission control devices is made a violation of Federal Law.

Section 506. Control of Running Loses.—EPA is to establish regulations to control evaporative emissions from operating vehicles.

Section 507. Motorcycle Emissions.—Emission standards are established for motorcycles.

Section 508. Onboard Diagnostics.—EPA is to establish requirements providing that new vehicles include onboard diagnostic equipment to evaluate the effectiveness of emission control systems.

Section 509. Motor Vehicle Fuels.—This section provides for the establishment of limits on the volatility of gasoline (9.0 pounds per square inch Reid vapor pressure).

Section 510. Control of Vehicle Refueling Emissions.—EPA is to establish regulations requiring new passenger cars to be equipped with onboard vapor recovery equipment to capture emissions released while refueling.

Section 511. Cold Temperature Certification for Carbon Monoxide.—A new requirement is established limiting carbon monoxide emissions from autos at low tempera-

tures. Effective 1993, light-duty vehicles must reduce CO emissions at 20 degrees by half of the 1981 to 1985 average. Effective 2000, the vehicles must reduce CO emissions to 3.4 gpm at 20 degrees.

TITLE VI. MISCELLANEOUS PROVISIONS

Section 601. Outer Continental Shelf Sources.—Air pollution sources located on the outer continental shelf are to be regulated as if they were located on the adjacent land area.

Section 602. PM 10 Increments in PSD Areas.—EPA is authorized to conform the current increment system for particulate matter in Clean Air areas with the Agency's new standard for PM 10.

Section 603. Definitions.—This section includes definitions of terms used in this Act.

Section 604. Indian Tribes.—This section provides circumstances under which Indian Tribes may be treated as states under the Clean Air Act.

Section 605. New Standards.—This section provides EPA with authority to put in place a program for attainment of any new ambient air quality standards which the Agency might establish.

Section 606. Data Collection on Pollution Control Technology.—EPA is to establish a database to collect and make available to states and the public information on air pollution control technology required or in place on pollution sources.

Section 607. Conforming Amendments.—Other provisions of the Clean Air Act are amended to conform to the provisions of the bill.

Section 608. Enforcement.—This section amends the enforcement provisions of the Clean Air Act to increase sanctions and streamline enforcement procedures.

TRIBUTE TO HON. EDDIE BOLAND

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. GREEN. Mr. Speaker, on this day when we welcome former Members of Congress, I want to join with my colleagues in paying tribute to one Member whose contributions during his years here make him sorely missed.

Eddie Boland, who retired less than 6 months ago is one of the men and women who make me proud to serve in this body. Eddie dedicated virtually his entire professional life to this body, which he loved dearly. His accomplishments, in housing, space, and intelligence policy, to name just a few, will endure long after smaller contributions of many of us here today have faded.

However, those of us who knew Eddie best recognize that the most ringing tributes we can give are to Eddie Boland, the man. Although a Member in an exceptionally powerful position, he always had time to listen to any Member, regardless of seniority or party affiliation. Many is the time when we would sit in markup and Eddie could mention that a specific project should receive our consideration because a Member had let him know how important it was to his district.

Eddie believed that those of us in the Congress had a responsibility to the less fortunate in our society. He believed and often stated that dollars spent on public housing where among the best we could spend. That money for this program remains today after numerous attempts to eliminate it in the last decade is a tribute to him.

Mr. Speaker, those of us who had the good fortune to serve with Eddie feel his absence most keenly. As we recognize him here today, I know the other Members will want to join me in wishing him and his family good luck and good health in the years ahead.

IT'S TIME TO STAND UP TO DICTATORS

HON. JAMES M. INHOFE

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. INHOFE. Mr. Speaker, yesterday's vicious attack on Panamanian opposition leaders is deeply shocking—but not really surprising. General Noriega has proved himself to be a thug who uses other thugs to do his dirty business. While I have no doubt that there are many fine people in the Panamanian Defense Forces, it's high time they stood up in defense of their people.

Just as it's high time the countries of this hemisphere show a little backbone. It's time we face the fact that the people of Panama are being held hostage by a man who is unmoved by diplomatic pressure or disapproval. Noriega is unmoved because words of outrage don't put a dent in his power.

On Sunday, the Panamanian people made a choice in their Presidential election that would threaten Noriega's power. Noriega's reaction was to send his thugs to beat up the opposition and its supporters, and then to annul the election. Without some help from elements of the Panamanian Defense Forces or from the democratic nations of the Western Hemisphere, the Panamanian people are defenseless against Noriega's thugs.

That's not right, Mr. Speaker, and it's high time the big-talking democrats—and I mean small "d" democrats—of this hemisphere do something about it. Is President Arias going to stand up for the rights of Panamanians? How about President Salinas? How about President Bush?

In times past, the people of this world have said that never again would we stand idly by while a nation was subjugated by a ruthless dictator. But we have. And millions died in Cambodia, in Ethiopia, in Uganda, in Afghanistan, in Argentina.

Mr. Speaker, the time has come for the free nations of the Western Hemisphere to do more than just talk about human rights. It's time to stand up to dictators.

MEDICAL ASSISTANCE FACILITIES: THE FUTURE OF RURAL HEALTH CARE DELIVERY

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. DORGAN of North Dakota. Mr. Speaker, one of the most pressing issues that Congress must address this year is what to do to save rural health care. That fact is evidenced by simply looking at the proliferation of bills that have been introduced that are designed to address a variety of challenges that threaten the survival of health care in rural areas. Dozens of bills have been introduced that seek to rectify the inadequacies and inequities in Medicare reimbursement; continue and expand current programs that have successfully provided assistance to rural hospitals; and rebuild the supply of health care professionals in rural areas. All these bills seek to address the critical condition of our rural health care delivery system.

It appears that there is indeed a heightened awareness of the special needs of rural health care. The alarming rate of rural hospital closures in recent years signals that access to health care in rural areas is in jeopardy. Something must be done to provide immediate assistance to rural hospitals and establish long-term solutions that will guarantee access to health care in rural areas into the next century. I am encouraged by the tremendous support we have seen this year for rural health concerns. It is my hope that based on the initiatives we have seen so far that we will pass significant legislation to help rebuild our rural health care delivery system.

Today, Mr. Speaker, I am introducing a bill that reaches to the future of rural health care. Those of us who are concerned about rural health care know that it simply is not feasible to expect that all rural hospitals must continue to exist in their present form. What we do know is that access to health care must continue. The legislation I am introducing today is designed to set the stage for establishing the rural health care facilities that will ensure that essential health care is available in rural areas in the next decade and beyond.

This legislation will establish a demonstration project whereby 10 to 15 rural hospitals throughout the country will be transformed into a new type of health care facility called a medical assistance facility. Medical assistance facilities are short-stay, low-intensity facilities that provide ambulatory, emergency, and limited inpatient care. Unlike hospitals, as we traditionally know them, medical assistance facilities provide inpatient for a maximum of 96 hours and stabilization care for transfer to another facility. Medical assistance facilities may not necessarily have a physician present at all times. These facilities will rely heavily upon nurse practitioners, physician assistant, and other allied health professionals for staffing needs. Medical assistance facilities provide a viable down-sizing option for rural hospitals that are faced with high fixed costs, low occupancy rates, and physician availability problems.

Medical assistance facilities would receive funding through a portion of the Rural Health Care Transition Grant Program whereby funds would be available on a cost-share basis. Each medical assistance facility would be authorized to receive $100,000 per year for a 4-year demonstration period. Ninety percent of this annual authorized amount would be provided through the Rural Health Care Transition Grant Program. The remaining 10 percent

would be provided by the State or local community.

In order to participate in the demonstration program, a medical assistance facility must meet the following minimum criteria: First, have an approved written quality assurance plan; second, be a conversion of an existing hospital in a rural area and located at least 30 miles from the nearest hospital; third, establish a transfer agreement with a nearby hospital for the purpose of transferring patients who need further inpatient care or other services; fourth, have a formal affiliation agreement with a nearby hospital for the purpose of continuing education programs for physicians, physician assistants, and nurse practitioners and for quality assurance support; and fifth, provide ambulatory care, emergency medical care, stabilization care, outpatient services, and limited inpatient care.

Medical care provided in medical assistance facilities would be covered by Medicare and Medicaid in agreement with the State in which the Medical Assistance Facility is located. Inpatient, outpatient, ambulatory, and emergency care would all be covered. Coverage for care provided by nurse practitioners and physician assistants would be covered in accordance with current law.

My intent in drafting this legislation is to provide for the maximum amount of flexibility so that the Health Care Financing Administration, together with State and local communities, will take the initiative to establish these new types of health care facilities. At the present time it is very difficult to determine precisely how Medicare should reimburse these types of facilities. For this reason, I am proposing that medical assistance facilities receive reimbursement based on DRG's for at least the first year of the program. After the first year, the Health Care Financing Administration would have the flexibility to experiment with various methodologies for the purposes of reimbursing these new types of facilities.

Essential to this demonstration project will be the close participation and study of the Department of Health and Human Services. My legislation requires that the Health Care Financing Administration conduct evaluations of these facilities and provide a quality assurance review. The Health Care Financing Administration would be required to provide and interim report to Congress as well as a final report which will include a cost-effective analysis and recommendations.

The purpose of this demonstration project is to establish a new way of delivering quality health care; examine experimental payment methodologies; and study alternative health care facilities that are viable, efficient, and provide quality health care in rural areas. I believe that we need to begin working for the future by establishing and studying these new types of facilities, and by developing an effective and prudent policy for guaranteeing access to health care in rural areas.

Mr. Speaker, changes in demographic patterns, medical practice, and health care consumer choices have altered the character of the health care delivery system in rural areas. These trends have left many rural hospitals ill-equipped to adapt to their changing environments. Declining admissions has restricted revenue resources for rural hospitals and has left many beds empty. Rural hospitals have been confronted with rapidly increasing demands for outpatient services. As a result, rural hospitals are struggling, in part because of inadequacies and inequities in Medicare reimbursement and in part because of the inability to adapt to the changing environment of rural health care delivery.

My legislation will encourage a handful of rural health care facilities to experiment and transform into viable and efficient health care facilities. I look forward to working with my colleagues who are concerned about health care delivery in examining my proposal and establishing a new program whereby we can ensure access to essential health care in rural areas through viable and efficient facilities.

The text of my bill is as follows:

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION. 1. SHORT TITLE.

This Act may be cited as the "Rural Medical Assistance Facilities Act of 1989."

SEC. 2. ESTABLISHMENT OF DEMONSTRATION PROGRAM FOR DEVELOPMENT OF MEDICAL ASSISTANCE FACILITIES.

(a) IN GENERAL; LIMITATIONS.—(1) Not later than 6 months after the date of the enactment of this Act, the Administrator of the Health Care Financing Administration (hereafter in this section referred to as the "Administrator") shall make 4-year grants to not more than 6 eligible States for providing 90 percent of the costs of transforming a rural hospital into a medical assistance facility (as defined in section 1861mm(2) of the Social Security Act) (as added by section 3(b) of this Act).

(2) The amount of funds provided in a single year under each grant awarded under paragraph (1) may not exceed $100,000.

(3) The Administrator may not award fewer than 10 or more than 15 grants under paragraph (1).

(b) ELIGIBILITY; ADMINISTRATION.—(1) The Administrator shall provide technical assistance to States receiving grants under subsection (a) during the course of the grant program.

(2) A State is eligible to receive a grant under subsection (a) if it submits to the Administrator, at such time and in such form as the Administrator may prescribe by rule, an application containing such information as the Administrator may require.

(3) No funds may be provided through grants under subsection (a) after January 1, 1995.

(4) The chief public health officer of each State, in consultation with the State Office of Rural Health (where appropriate), shall be responsible for submitting applications for grants under paragraph (2) and for administering the grant program in the State.

(c) USE OF RURAL HEALTH CARE TRANSITION FUNDS FOR GRANT PROGRAM.—Section 4005(e)(9) of the Omnibus Budget Reconciliation Act of 1987 (42 U.S.C. 1395ww note) is amended by striking "under this subsection" and inserting "under this subsection and section 2 of the Rural Medical Assistance Facilities Act of 1989".

SEC. 3. MEDICARE COVERAGE OF SERVICES OF A MEDICAL CARE ASSISTANCE FACILITY.

(a) COVERAGE.—

(1) PART A.—Section 1812(a)(1) of the Social Security Act (42 U.S.C. 1395d(a)) is amended by inserting "and inpatient care in a medical assistance facility".

(2) PART B.—Section 1832(a)(2) of such Act (42 U.S.C. 1395k(a)(2) is amended—

(A) by striking "and" at the end of subparagraph (F);

(B) by striking the period at the end of subparagraph (G) and inserting "; and"; and

(C) by inserting after subparagraph (G) the following new subparagraph:

(H) health care services (other than inpatient care) of a medical assistance facility".

(b) DESCRIPTION OF MEDICAL ASSISTANCE FACILITY AND RELATED DEFINITIONS.—Section 1861 of such Act (42 U.S.C. 1395x) is amended by adding at the end the following new subsection:

"Medical Assistance Facility and Related Definitions

(mm)(1) The term 'medical services of a medical assistance facility' means the following services provided by or under arrangements with a medical assistance facility—

(A) inpatient care, except that obstetric services shall not be considered inpatient care under this subparagraph unless such services are performed in accordance with protocols developed by the Secretary;

(B) emergency visits;

(C) ambulatory care provided in accordance with standards to be established by the Secretary, in consultation with appropriate provider and consumer organizations and State public health officers;

(D) outpatient surgical care provided in accordance with protocols to be established by the Secretary;

"(E) stabilization care for transfer to another facility; and

"(F) such services and supplies furnished as an incident to services provided by a medical assistance facility which the facility is legally authorized to provide and which would otherwise be covered if furnished by a physician or as an incident to physicians' services.

"(2) The term 'medical assistance facility' means a facility which—

"(A)(i) is located in a rural area (as defined in section 1886(d)(2)(D), and (ii) is located not less than 30 miles from a hospital;

"(B) provides emergency care, stabilization care, and basic inpatient care for stays not exceeding 96 hours (unless otherwise approved by a peer review organization);

"(C) if it provides obstetric services, provides such services in accordance with the protocols described in paragraph (1)(A);

"(D) provides ambulatory care in accordance with the standards described in paragraph (1)(C);

"(E) if it provides outpatient surgical care, provides such services in accordance with the protocols described in paragraph (1)(D);

"(F)(i) has a written quality assurance plan approved by the Secretary under which the Secretary shall conduct regular evaluations of the facility in accordance with a quality assurance protocol to be developed by the Secretary, and (ii) has entered into a contract with a hospital or with a utilization and quality control peer review organization with a contract in effect under part B of title XI for the performance of utilization review with respect to services provided by the facility;

"(G) has entered into an agreement to participate under the State program approved under title XIX in the State in which the facility is located;

"(H) has a board of directors and a medical director (who shall be a doctor of medi-

cine or osteopathy) responsible for its operation, the members of which shall include representatives of physicians, nurses, and other health care providers;

"(I) has in effect a transfer agreement (meeting such terms as the Secretary may specify) and an agreement regarding discharge planning between the facility and appropriate referral hospital or hospitals;

"(J) has in effect an affiliation agreement with a hospital or teaching hospital for providing continuing education services to the facility's physicians, nurse practitioners, and physician assistants; and

"(K) meets the additional requirements specified in paragraph (3) (relating to inpatient care).

A medical facility may meet the requirements of this paragraph with respect to provision of medical care (including pharmacy services) through a contract that assures, in a manner satisfactory to the Secretary, the availability of such care.

"(3) The additional requirements of this paragraph (relating to inpatient care) are as follows:

"(A) To the extent inpatient services are actually being provided, the facility must meet such staffing requirements as would apply under subsection (e) to a hospital located in a rural area, except that care may be provided by nurse practitioners and physician assistants in accordance with protocols developed by the Secretary for the purpose of providing flexibility for such facilities in meeting physician 'on-call' requirements.

"(B) The facility must be capable of staffing inpatient beds within 2 hours of the time of need, and must have an on-site director (who may be a nurse practitioner) present at all times during which the facility is open.

"(C)(i) Except as provided in this subparagraph, the facility must meet the same standards as apply with respect to the provision of inpatient hospital services under this title with respect to a hospital located in a rural area.

"(ii) The facility need not meet hospital standards relating to the number of hours during a day, or days during a week, in which the facility must be open.

"(iii) The facility, instead of having a full-time, on-site dietician, pharmacist, laboratory technician, medical technologist, and radiological technologist, may provide for quality control of services provided by such individuals through such individuals on a part-time, off-site basis.".

(c) PAYMENT.—

(1) INPATIENT SERVICES.—Section 1814 of such Act (42 U.S.C. 1395f) is amended—

(A) in subsection (b) in the matter preceding paragraph (1), by inserting "subsection (1) and" after "subject to the provisions of"; and

(B) by adding at the end the following new subsection:

"Payments for Inpatient Care of Medical Assistance Facilities

"(l)(1)(i) Except as provided in clauses (ii) and (iii), the amount paid to a medical assistance facility with respect to inpatient care for which payment may be made under this part shall be an amount equal to the payment amount that would be established under section 1886(d) if such care were deemed to be inpatient hospital services provided by a subsection (d) hospital.

"(ii) The amount paid to a medical assistance facility with respect to inpatient care for which payment may be made under this part may, in the case of discharges occurring on or after the expiration of the 540-day period that begins on the date of the enactment of this subsection, be determined under any new methodology which the Secretary, in consultation with the Office of Rural Health Policy, may develop for determining the amount of such payments.

"(iii) The provisions of section 1886(g)(1) shall not apply to payments with respect to the capital-related costs of inpatient hospital services of a medical assistance facility.

"(2) In the case of an individual who receives inpatient hospital services after receiving inpatient care in a medical assistance facility, the payment otherwise provided under section 1886 shall be reduced by such amount as is necessary to reflect the payment made for the inpatient care under this subsection. The Secretary shall periodically review the allocation of payments for inpatient services between medical assistance facilities and hospitals under this paragraph.".

(2) OUTPATIENT SERVICES.—

(A) Section 1833(a) of such Act (42 U.S.C. 13951(a)) is amended—

(i) in paragraph (2), in the matter before subparagraph (A), by striking "and (G)" and inserting "(G), and (H)";

(ii) in paragraph (4), by striking "and" at the end;

(iii) in paragraph (5), by striking the period at the end and inserting "; and"; and

(iv) by inserting immediately after paragraph (5) the following new paragraph:

"(6) in the case of services described in section 1832(a)(2)(H), the amounts described in section 1834(f).".

(B) Section 1834 of such Act (42 U.S.C. 1395m) is amended by adding at the end the following new subsection:

"(f) PAYMENTS FOR HEALTH SERVICES (OTHER THAN INPATIENT CARE) IN A MEDICAL ASSISTANCE FACILITY.—The amount of payments for health services (other than inpatient care) provided in a medical assistance facility under this part shall be the amounts determined by the Secretary under a payment system established by the Secretary which takes into account the relative value of the services furnished compared to other professional services.".

(d) TREATMENT AS PROVIDER OF SERVICES.—

(1) Section 1861(s)(2)(K)(i) of such Act (42 U.S.C. 1395x(s)(2)(K)(i)) is amended by inserting "medical assistance facility," after "hospital,".

(2) Section 1861(u) of such Act (42 U.S.C. 1395x(u)) is amended by inserting "medical assistance facility," after "hospital,".

(3) Section 1861(w)(1) of such Act (42 U.S.C. 1395x(w)1)) is amended by inserting "medical assistance facility," after "hospital,".

(4) Section 1863 of such act (42 U.S.C. 1395z) is amended by striking "and (dd)(2)" and inserting "(dd)(2), and (mm)".

(5) Section 1864(a) of such Act (42 U.S.C. 1395aa(a)) is amended, in the first and second sentences, by inserting ", medical assistance facility," after "hospital".

(6) Section 1975(a) of such Act (42 U.S.C. 1395bb(a)) is amended by striking "or 1861(dd)(2)" and inserting "1861(dd)(2), or 1861(mm)".

(e) MEDICAID COVERAGE OF SERVICES OF MEDICAL ASSISTANCE FACILITIES.—Section 1905(a) of the Social Security Act (42 U.S.C. 1396d(a)) is amended—

(1) by striking "and" at the end of paragraph (20);

(2) by redesignating paragraph (21) as paragraph (22); and

(3) by inserting after paragraph (20) the following new paragraph:

"(21) medical services of a medical assistance facility (as defined in section 1866mm(2)); and".

(f) EFFECTIVE DATE.—The amendments made by subsections (a), (c), (d), and (e) shall take effect upon the expiration of the 6-month period that begins on the date of the enactment of this Act, without regard to whether or not regulations have been promulgated to implement such amendments before the expiration of such 6-month period.

SEC. 4. REPORTS.

(a) INTERIM.—Not later than March 1, 1993, the Secretary of Health and Human Services (hereafter in this section referred to as the "Secretary") shall submit to Congress a report analyzing the grant program described in section 2 and the effect of the establishment of medical assistance facilities on the availability and quality of cost-effective health care for individuals in rural areas, including a summary of quality assurance reviews conducted pursuant to section 1861mm(2)(C) of the Social Security Act (as added by section 3(b) of this Act).

(b) FINAL.—Not later than March 1, 1995, the Secretary shall submit a final report to Congress updating the report submitted under subsection (a) and including recommendations regarding the feasibility of establishing a long-term program of assistance for medical assistance facilities.

THE REAUTHORIZATION OF THE CARL D. PERKINS VOCATIONAL EDUCATION ACT

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. GOODLING. Mr. Speaker, I am pleased to introduce the President's bill for the reauthorization of the Carl D. Perkins Vocational Education Act. We are faced in this country with everincreasing concerns over trained labor and changes in the demographics of persons entering the job market. We must address these concerns through vocational programs that access equity groups into vocational education and training programs while meeting the needs of industry.

The current program has been burdened by crushing paperwork and onerous fiscal constraints. The President's bill attempts to correct the current programs failures while meeting the needs of special populations. The bill retains the current percentages for program improvement and for the access for equity groups into vocational education, but the State would decide on the relative percentages for each group.

The bill also recognizes the need to coordinate other similar Federal programs by working to coordinate the Carl D. Perkins Vocational Education Act with the Job Training Partnership Act. Given the changing demographics of our country and the need for improved vocational training, I am pleased to work with the administration and introduce this bill for the reauthorization of the Carl D. Perkins Vocational Education act.

TRIBUTE TO JOHN E. "JACK" FITZGERALD

HON. GEORGE E. SANGMEISTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. SANGMEISTER. Mr. Speaker, it is with great pride that I rise to salute a constituent, and a friend, who has dedicated most of his life to the service of his community. After 22 years of service as the mayor of Manhattan, Will County, IL, John E. "Jack" Fitzgerald is retiring and I ask my colleagues in the House to join with me in paying tribute to this exceptional public servant.

Jack Fitzgerald's dedicated public service to the village of Manhattan is exemplary. Jack was a village trustee of Manhattan from 1965 to 1967 and served as mayor of that village from 1967 to 1989. In addition, he has been a member of the volunteer fire department for 32 years; has been assistant fire chief since 1967 and in 1987 was named paramedic of the year for the Will-Grundy system which covers 2,000 square miles that includes area fire departments and private systems.

His public service career is marked by continuous achievement concerning the overall welfare, growth, and safety of the village of Manhattan and its residents. The village of Manhattan has gone through many changes, and Jack Fitzgerald served as the catalyst for many of them: forming the local civil defense organization [ESDA], developing a comprehensive plan for the growth of the village, obtaining revenue sharing funds, expanding the police force, and improving the street program as well as building a new sewer treatment plant and water tower. Over the years of his tenure, Manhattan has seen a population growth now exceeding 2,000 residents.

Jack Fitzgerald was born, raised, and educated in Manhattan and never left. He and his wife raised their five children there and they in turn are raising their families there. In addition to his public service, Jack is active in many civic, community, and church affairs. I offer to my colleagues a quote from a newspaper article which I feel eloquently expresses why Jack Fitzgerald is held in such high esteem by the residents of Manhattan: "He sacrifices his time for those who need him, not for financial reward, but for his love of Manhattan. He knows no other way."

Mr. Speaker, the residents of Manhattan have been most fortunate to have someone of Jack Fitzgerald's ability and quality to lead them. He has done a lot of good for them, and in their behalf and as a friend of mine, I thank him and wish him well in the future.

SMALL DAY CARE CENTER ASSISTANCE ACT

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Ms. KAPTUR. Mr. Speaker, I invite my colleagues to join me in removing an impediment to provision of day care by cosponsoring the "Small Day Care Center Assistance Act." This bill which I am introducing today, and which is being introduced in the other body by Senator DAVID DURENBERGER, would amend the Federal charters of the Federal National Mortgage Association and Federal Home Loan Mortgage Corporation to permit these agencies to purchase mortgages on homes containing family day care centers.

Today, there are many small, family-operated day care services which are run out of peoples' homes. For many working parents, these neighborhood centers offer a reliable, familiar, community setting in which to leave their children when they go off to their jobs.

Unfortunately, Fannie Mae, Freddie Mac, and Ginnie Mae, the secondary mortgage institutions which purchase most home mortgages, are limited by their charters to involvement with residential mortgages. What this means for the owner of a house whose spouse operates a day care center on its premises is that he or she cannot refinance the mortgage because the local lender couldn't sell that mortgage to the secondary mortgage market. Or, it means that a couple, who depend on the income from the wife's small day care operation to qualify for a mortgage, cannot get the mortgage without giving up the day care service.

We are all familiar with the many statistics which indicate a growing need for day care services. Day care centers operated in residential homes are, by their very nature, not huge, impersonal businesses. They are, in fact, the type of day care preferred by many working parents. Furthermore, because most States have regulations or licensing requirements setting standards for numbers of children being served and the quality of care provided, they are safe, clean environments for provision of this care. We can enhance access to day care by passing this bill and I hope you and the other Members of this body will support it.

CLEAN AIR RESTORATION ACT OF 1989

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. SMITH of New Jersey. Mr. Speaker, I am pleased to join with my colleagues today to introduce the Clean Air Restoration Act of 1989, offered by Mr. WAXMAN of California. This bill constitutes the second phase of our efforts to reauthorize the Clean Air Act in the 101st Congress. Earlier this year, I joined with over 140 of my colleagues to introduce the Acid Deposition Control Act to combat acid rain. Soon we will be introducing legislation to control toxic emissions of particulates. These three pieces of legislation will form the basis for reauthorizing the Clean Air Act.

Mr. Speaker, on April 27 of this year, I signed a letter to President Bush with over 150 of my colleagues, calling upon him to send to Congress comprehensive clean air legislation. The President has indicated his support for just an approach and I look forward to working with the Administration this year to enact a Clean Air Act reauthorization bill.

However, we cannot afford to wait one day longer to take action to protect the air we breathe. Mr. Speaker, it has now been almost two decades since the passage of the Clean Air Act, and over a decade since the Clean Air Act Amendments of 1977 were passed. As you know, the cornerstone of the law was the establishment of the national ambient air quality standards [NAAQS]. States and metropolitan areas were given deadlines to meet these standards or face a series of sanctions. Unfortunately, these standards still have not been met.

Mr. Speaker, the Environmental Protection Agency reports that over 150 million Americans live in nonattainment areas, due to unhealthy levels of either ozone or carbon monoxide. As President Bush has said, the time for action is now.

The Clean Air Restoration Act of 1989, which I am proud to cosponsor, would grant deadline extensions to those areas which have not been able to achieve the attainment standards, however, these extensions would be conditioned upon the adoption of additional pollution control measures. Areas with the most severe pollution problems would receive longer extensions, but would also be required to implement the most aggressive pollution control steps.

Mr. Speaker, the basic approach of this legislation is to provide each State with the flexibility to meet the standards by granting extensions of 4 years for moderate areas, 8 years for serious areas, 12 years for severe areas and 15 years for extreme areas. Each area granted an extension would then be required to put into place special measures for the achievement of reduction targets [SMART] based upon the classification by the EPA. New targets and milestones would be set up for each area to insure their compliance, and new assessments would be made every 4 years.

This legislation gives States 4 years to gather data, assemble emission inventories, and develop implementation plans for controlling ozone pollution. However, States are required to continue to implement short term measures to continue their existing compliance strategies. Free market economic incentives would be authorized, such as emission fees or marketable permits as an alternative to command and control approaches used so often in the past.

Mr. Speaker, this legislation attacks mobile sources in addition to stationary sources. New and tougher tailpipe standards would be established for automobile emissions to control hydrocarbon and nitrogen oxide emissions. There would be new requirements to mandate that auto emission controls last for the life of the car, not just for 50,000 miles as currently required. In addition, this legislation aggressively promotes the use of ethanol, methanol, and other alternative fuels which contribute fewer pollutants.

Finally Mr. Speaker, let me say that the protection of our air has always been foremost among my legislative priorities while in Congress. I am proud to have received the Clean Air Champion Award from the Sierra Club last

Congress. However, I am not satisfied with the progress of clean air legislation in recent years. This must be the year that we pass clean air legislation so that we can give our children, and their children, a healthy and safe environment, just as God gave it to us.

INDIA AND THE SUPERCONDUCTING SUPER COLLIDER

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. BARTON of Texas. Mr. Speaker, today, I wish to draw this House's attention to yet another dimension which has been added to the ties between India and the United States. Not only do these two nations share democratic values, but they also share a like quest for scientific discovery. India possesses the third largest reservoir of trained scientific and technical manpower in the world. Many of her scientists and engineers have studied in this country, and in turn, have enriched our colleges and universities. They include Nobel Laureates Dr. Har Govind Khorana, known for his pioneering works on the structure of the gene, Dr. S. Chandrashekhar for his work on astrophysics, as well as other renowned scientists in different fields. Now there are excellent prospects of joint collaboration between these two countries on the superconducting super collider [SSC] project.

The superconducting super collider will be a unique facility with a 53-mile race track style ring containing over 10,000 superconducting magnets. It is expected that this facility will help us observe new particles of matter. The SSC will not only revolutionize our knowledge of science, but will also have a tremendous potential for commercial applications.

Discoveries in science and technology have led the course of development during this century. India is proud of her pioneering contributions to the progress of science and remains foremost amongst the developing nations in absorbing new technology and constructively applying it toward economic development.

MEDICARE COVERAGE DECISIONMAKING

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. PORTER. Mr. Speaker, I would like to raise some difficult questions concerning the Health Care Financing Administration [HCFA] process of excluding medical treatments from Medicare coverage. HCFA, which makes reimbursement policy for the Medicare and Medicaid programs, does not pay for treatments that it deems ineffective. Private insurance companies often follow HCFA decisions regarding effectiveness of treatment.

This sensible policy is, unfortunately, coupled with some not very sensible methods of determining what does and doesn't work. To start, when HCFA makes a nationwide coverage decision on a medical treatment, it is exempt from the usual administrative law protections that every other agency must follow.

HCFA isn't required to review all the scientific facts concerning a treatment when it decides to exclude that treatment from Medicare coverage, and sometimes it doesn't.

Because of this exemption, HCFA isn't required to consider what American citizens think about a decision to exclude a treatment from coverage, and sometimes HCFA ignores them.

Because of this exemption, HCFA doesn't need to consult with medical professionals on both sides of an issue to determine all the facts, and sometimes it doesn't.

Mr. Speaker, I see several problems here. First, because private insurers often follow HCFA decisions with regard to coverage, HCFA's decisions have an impact that goes far beyond the Medicare and Medicaid programs. Second, I see a fundamental problem with fairness, when usual notice and hearing procedures that all other Government agencies must follow are waived. I see a problem when the agency can ignore the opinions of those who will be most directly affected by its decisions.

I am concerned that HCFA's truncated decisionmaking process may lend itself to abuse, and I hope that HCFA will consider the recommendations of the United States Administrative Conference in revising its decisionmaking procedures.

THE AL CAPONE OF LATIN AMERICA

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. BROOMFIELD. Mr. Speaker, it is clear that General Noriega has become the Al Capone of Latin America. Long after he is gone—and I hope that is soon—his regime will be remembered for nothing more than thugs and drugs.

It is an illegitimate regime. It rules neither with the consent of the governed nor by force of moral authority. Yet, President Bush is wise to discourage talk about a military option. His restraint, at this point, is simply a matter of political prudence.

That is not to say that military force might not become a legitimate option as the situation changes. The common good of the Panamanian people and the national security interests of the United States would best be served by unseating General Noriega.

If President Bush is forced by the turn of events to take swift, decisive, and bold action, I hope he will have the overwhelming bipartisan support of Congress.

COMMENDATION OF DR. JOSEPH A. WITKOWSKI—PRESIDENT, NATIONAL PRESSURE ULCER ADVISORY PANEL

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. GRAY. Mr. Speaker, I wish to bring to the attention of my colleagues the outstanding work of one of my constitutents, Dr. Joseph A. Witkowski, Clinical Professor of Dermatology at the University of Pennsylvania.

In Washington last month, in his capacity as President of the National Pressure Ulcer Advisory Panel [NPUAP], Dr. Witkowski led a group of over 200 health professionals at the first national consensus conference on pressure ulcers.

Pressure ulcers are wounds which result when pressure against the skin causes fine capillaries or blood vessels to collapse. With average hospital treatment ranging from $2,000 to $30,000 per case, pressure ulcers are a very costly medical condition. Also known as pressure sores, bedsores, or decubitus ulcers, they cause tremendous suffering, and can even prove fatal if left unattended.

According to the consensus report issued following the conference, the incidence of pressure ulcers is on the rise among the elderly, spinal cord injured, and other victims of serious trauma. The report estimates the prevalence of pressure ulcers to be from 3 percent to 14 percent in acute care settings, and from between 15 to 25 percent among the patients admitted to long-term facilities.

At the conclusion of the conference Dr. Witkowski noted, "This is the first time health care professionals representing many disciplines have spoken with a unified voice on the incidence, cost and risk assessment of pressure ulcers." He concluded by saying that, "arriving at a consensus on the impact of pressure ulcers on individuals and the Nation's health care system is a necessary first step toward achieving our goal of a 50 percent decrease in incidence by the year 2000."

I applaud Dr. Witkowski and his colleagues for bringing to our attention the consequences of pressure ulcers and their determination to eradicate this serious health problem.

NEVADA WILDERNESS PROTECTION ACT OF 1989

HON. JAMES H. BILBRAY

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. BILBRAY. Mr. Speaker, today I am introducing the Nevada Wilderness Protection Act of 1989, a bill which designates 14 Forest Service wilderness areas totaling 733,400 acres in the State of Nevada. The bill is nearly identical to H.R. 2142, which I sponsored and which passed the House by voice vote in the 100th Congress.

Mr. Speaker, I am very proud of this piece of legislation. It represents several years of

negotiation, compromise, and diligence on the part of the entire Nevada delegation. I truly feel that the legislation I am introducing today best represents the desires and concerns of all Nevadans. Together with Senator REID and Senator BRYAN, who are sponsoring nearly identical legislation in the Senate, I am hopeful and confident that the Nevada Wilderness Protection Act will move swiftly through both Houses of Congress and be signed into law by President Bush. Swift consideration and passage of this legislation would make a strong statement by Congress as we celebrate the 25th anniversary of the Wilderness Act of 1964.

Mr. Speaker, the Nevada Wilderness Protection Act is truly a compromise piece of legislation. Over the years, proposals for wilderness designation in the State of Nevada have ranged from a minimum of 132,000 acres to a maximum of 1.4 million acres. At 733,400 acres, my bill is almost exactly in the middle of these two extremes, and I hope my colleagues will realize that the piece of legislation I am introducing today represents the most realistic proposal for passage in this body, as well as what is best for the citizens of Nevada.

Over 3.2 million acres of Forest Service roadless areas were studied for wilderness designation. This allows over 2.4 million acres of studied land to be released for other multiple use purposes if this bill becomes law. In actuality, this bill designates only a fraction of the total acreage of the State of Nevada as wilderness; only 1.03 percent of the total 76 million acres of Nevada would be designated wilderness.

Mr. Speaker, the introduction of the Nevada Wilderness Protection Act of 1989 represents an historic moment for the State of Nevada. Finally, the people of Nevada and the Members of the U.S. Congress have before them a proposal that reflects their desires and concerns. The time has come for Congress to take action to protect those scenic and undisturbed lands so crucial to the environmental and ecological fiber of Nevada. I urge my colleagues to join me in supporting the Nevada Wilderness Protection Act of 1989.

TRIBUTE TO JAMES P. COX

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. SKELTON. Mr. Speaker, I rise today to pay tribute to a good friend and constituent, James P. Cox of Jefferson City, MO. On April 30, Jim retired as administrator of Charles E. Still Hospital after 14 years of service and 8 years at that post. Fortunately, Jim will remain as a consultant at Still Hospital.

During his tenure as administrator, the hospital established an employee scholarship fund, helped create a fitness trail at Memorial Park, and started a home health agency and a skilled nursing facility. He also merged Still Hospital's ambulance service with the one run by St. Marys Health Center to form Jefferson City Ambulance Service, which is owned and operated by Still Hospital.

Jim became administrator in 1981 with an operating budget of $17 million and retires with a budget of $37 million. In that period he completed $4.1 million and $1.8 million hospital expansion projects. Two other accomplishments that Jim is personally proud of are the founding of the physical medicine and rehabilitation service, and the employee assistance program for alcohol, drug, and psychiatric treatment in 1975, long before such programs were widely available.

Jim has influenced my interest and work on rural health care issues here in the House. He has provided me with information and encouragement in the area of health care delivery. He was also successful in gaining rural referral status from the Federal Health Care Financing Administration, which oversees the Medicare system, for Still Hospital.

During Jim's administration he has enjoyed the cooperation and respect of Jefferson City's two other hospitals. One competitor, Memorial Community Hospital, paid tribute to Jim by establishing two $500 nursing scholarships in his name.

I am proud to count Jim among my friends and advisers. Also, I am happy that Jim will continue to serve Still Hospital and the Jefferson City community. I wish he and his wife Peg all the best in the future. I am sure that all of you will join me in saluting this fine citizen.

THE FRIVOLOUS APPEALS ELIMINATION ACT OF 1989

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. WILLIAMS. Mr. Speaker, in 1976 the Congress established an orderly system of land planning for the U.S. Forest Service. The laws Congress passed at that time were designed to produce long-term plans for each of our national forests to allow the open, efficient management of our Federal lands and resources. The Congress also established a system of public participation that would allow any citizen in this country to participate in the formulation of those management plans. This concept of citizen participation and right-to-know has been the hallmark of our democracy, and I believe is an important part of good, stewardship of our land. Each of us are owners of this Nation's public lands, and each of us should have a say in the uses of those lands.

There are many folks now, however, who believe the system of citizen participation in the planning process has gone awry and that some individuals are using the process of appeals on our forests to stall appropriate planning, not facilitate it. There is a widespread belief in the wood-products industry that the forest service land-planning appeal system is being abused for the furtherance of a political agenda. For a price of a 25-cent stamp, it is believed, folks with little or no knowledge of the forests or the land planning issues involved can stop management decision for indefinite periods of time. This was not the intent of Congress when they established the planning process, and the Congress cannot allow the stagnation of planning because of inappropriate use of that planning process.

The legislation that I today rise to introduce is a step necessary to bring order to our forest service appeals program. This past February the Forest Service completed, on the urging of myself and other members of Congress, a revision of how the agency handles citizen appeals. These changes established predetermined levels of appeal review and compacted time frames to hear those appeals and make recommendations. My legislation gives the statutory authority to the chief of the Forest Service to establish a standard for folks who wish to participate in appealing decisions made under our forest plans. If any individual does not abide by the timely and appropriate consideration of appeals, this legislation grants the Forest Service the right to stop that individual's right to participate in the appeals process. This should be an important component in assuring that the planning process is not stalemated.

The vast majority of appeals are of course, good and well thought out. Nevertheless a small number of folks actually abuse the right to have their concerns heard by Federal land planners. We have seen appeals filed in my state which were actually referencing planning decisions on forests in California. We have seen appeals that fail even to change internal references to planning abuses to match the forest on which the appeal was filed. These types of appeals ought not be allowed to clog the process, and the Forest Service should have the authority to eliminate those appeals from consideration.

A right of citizens to review their government's decisions is a sacred and paramount right, one which should never be taken away. But all citizens who chose to exercise that right also have the responsibility to act in a fashion which is constructive and appropriate. My legislation would establish the ground rules for that participation and ultimately make citizen participation in land planning a more effective process.

A TRIBUTE TO CHIEF TANTAQUIDGEON

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. GEJDENSON. Mr. Speaker, today I would like to bring to your attention a man who exemplifies the great heritage of native American Indians. The man I speak of is Chief Harold Tantaquidgeon of the Mohegan Tribe. Chief Tantaquidgeon died on April 4, 1989, in Uncasville, CT. The chief was a direct descendant of the great Mohegan Chief Uncas and the Reverend Samson Occum, founder of Dartmouth College.

Chief Tantaquidgeon's philosophy is embodied by his belief that to remain forever young, one must love not only children, but also one must change, for the future in what youth represents. His fondness of change confers upon him "grandfather" status to those who over the last few decades have

participated in the movement to popularize the historical contributions of the American Indian heritage to all aspects of modern life. Most of us viewed Chief as wise beyond his years. The chief has been honored many times by his community. He was the recipient of the Connecticut Friends of Education Award, and designated as a Hometown Hero by Governor O'Niell.

Chief Tantaquidegeon is fondly remembered by his family and friends as a man who loved to amuse chidren with funny hats and expressions and never tired of demonstrating his vast collection of wind-up toys. His love of children led him to devote a great deal of time as a volunteer for the Boy Scouts of America. His achievements include building a living Indian village at Camp Wakenah on Gardner's Lake in Connecticut and then recreating that encampment in Washington, DC at the request of President Roosevelt. he also spent a great deal of time traveling to 4-H camps in eastern Connecticut sharing old Indian tales with the children.

Mr. Speaker, it is an honor to stand before you and my colleagues in the House of Representatives to acknowledge Chief Tantaquidgeon's many achievements. The chief died peacefuly and proudly at his home on April 4 and was buried on April 9 at the sacred Mohegan Burial Ground at Fort Shantok. Connecticut and the entire Nation has lost a great national hero.

DR. SMELTZER SERVES PARK VISTA FOR 36 YEARS

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. TRAFICANT. Mr. Speaker, I would like to pay tribute to Dr. James Smeltzer, a gentleman from my 17th District of Ohio who has contributed a great deal to the growth and quality of care at Park Vista Retirement Community, located in Youngstown, OH. Dr. Smeltzer has given Park Vista 36 years of leadership and expertise, and I commend him for his contributions to elderly care.

Dr. Smeltzer's medical accomplishments are numerous. Upon graduation from Duke University School of Medicine, Dr. Smeltzer served his internship in internal medicine at Stanford University. He earned his license in 1952 and was certified by the Board of Internal Medicine in 1955. Dr. Smeltzer served 2 years in the U.S. Navy in Portsmouth, VA where he was in charge of internal medicine for all military dependents hospitalized in Portsmouth Naval Hospital.

Since 1952, Dr. Smeltzer has held a specialty practice in internal medicine in Youngstown, OH, in addition to his role as medical director at Park Vista since 1953. He has served as president of the Eastern Ohio Heart Association and is a past trustee of the Ohio affiliate of the American Heart Association. Dr. Smeltzer's list of accomplishments also includes serving as a member of the Child and Adult Mental Health Board, and on the teaching staff of Youngstown Hospital Association, now the Western Reserve Health Care System.

I commend Dr. Smeltzer for his 36 devoted years at Park Vista. It is an honor for me to represent this man as his Congressman. I know the employees and residents at Park Vista join me in this salute to Dr. Smeltzer, and I wish him the best of luck and health in his next 36 years.

T. BOONE PICKENS AND THE FOREIGN OWNERSHIP DISCLOSURE ACT

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 1989

Mr. BRYANT. Mr. Speaker, I am sure that my colleagues have read news accounts of the recent experience of my fellow Texan, T. Boone Pickens, in Japan. On March 31, 1989, Mr. Pickens' investment banking and investment advisory firm, Boone Co., acquired a 20.2 percent interest in Koito Manufacturing Co., Ltd., a publicly traded Japanese company that is Japan's largest auto and aircraft parts manufacturer.

Prior to making the acquisition, Boone Co. applied for approval from Japan's Ministry of Finance as required by the Foreign Exchange Control Law.

Despite Boone Co.'s compliance with Japan's preclearance law, Koito initially refused to register the shares. Although Koito finally registered Boone Co.'s, shares, it has now denied Boone Co. a seat on its board of directors. Toyota Motor Corp., which owns less stock than Boone Co., has three representatives on the Koito board.

Although Boone Co. has described this acquisition as a long-term investment rather than a takeover attempt, it has been met with tremendous hostility by the Japanese public.

Boone Co.'s, experience in investing abroad calls attention once again to the issue of foreign investment and how various countries monitor it.

Every other country in the world tracks foreign ownership better than the United States—a shortcoming in our economy which would be remedied by enactment of my Foreign Ownership Disclosure Act, H.R. 5.

Most countries—as Mr. Pickens has learned first-hand in Japan, which is notorious for its restrictive investment policies—require preclearance of investments that are restricted in a variety of complex and discriminatory ways.

Japanese interests—as well as lobbyists for other countries, all of which require more of potential investors than the simple registration provisions of my Foreign Ownership Disclosure Act—have said that H.R. 5, which has twice been approved by sizable bipartisan majorities in the House, is disciminatory because it requires the systematic registration of major foreign ownership with the Commerce Department.

I do not suggest that the United States should establish barriers like Japan's to foreign investment, only that we keep track of the most dramatic phenomenon occurring in our economy. In fact, I think America should act to encourage other countries like Japan, to emulate the free and open investment policies of the U.S.—a policy that would remain unchanged under the Foreign Ownership Disclosure Act.

Mr. Speaker, I would like to submit for the RECORD and the inspection of my colleagues, recent articles describing Mr. Pickens' experience in Japan and illustrative of the lack of reciprocity in the Japanese approach to foreign investment.

[From the Wall Street Journal, Apr. 20, 1989]

PICKEN'S FORAY IN JAPAN MAKES HEADWAY—HIS RESILIENCE IN BATTLE WITH KOITO SURPRISES MANY

(By Marcus W. Brauchli)

TOKYO.—T. Boone Pickens Jr., surprising those who doubted he could make headway in Japan's cozy financial world, may end up opening the nation to wider foreign investment and to unfamiliar ideas as well.

"The odds given Mr. Pickens were pretty low." says Ron Napier, a Salomon Brothers Inc. analyst.

Yet, since his Boone Co. merchant bank emerged as the largest shareholder with a 20.2% stake in a $6 billion automotive parts company, Mr. Pickens has shown remarkable resilience. If Boone Co. holds onto its stake in Koito Manufacturing Co., many observers predict its foray could turn Tokyo's financial world upside down.

One investment banker compares Mr. Pickens's arrival in Tokyo's market to the arrival in 1853 of U.S. Commodore Mathew C. Perry, who demanded that cloistered Japan open to the world. Many Japanese had been in favor of opening up anyway, and Commodore Perry gave them the external excuse they needed.

In a market where few but the biggest investors have a say in the way companies do business, Mr. Pickens is loudly championing shareholder rights. In an interwoven corporate sphere where unwanted investors are bought out or squeezed out, Mr. Pickens is advocating dialogue with the uninvited. In a xenophobic country where outsiders usually have stayed out, Mr. Pickens sees bountiful opportunities for foreign investors.

Not least, of course, for T. Boone Pickens.

HARD TO SAY NO

As foreigners take a bigger role, they increasingly will demand a voice in corporate matters though, and that could bring changes. "It's difficult to oppose more shareholder rights," especially when a company's biggest shareholder is demanding them, says Kasuhisa Okamoto, chief strategist at Nikko Securities Co. "How can you say no?"

Already, there are signs that Mr. Pickens, who says he might increase his holdings in Koito, may be gaining ground in his avowed goal of taking a "positive" role in the company. The automotive-parts company, which agreed to meet with Mr. Pickens today, said it would rescind an earlier attempt to block Mr. Pickens's registration of Koito shares and even promised to consider allowing a Boone Co. representative on its board, although a Koito spokesman was skeptical about the prospect.

Koito's apparent friendliness is a stark change from its initial stance. When it first learned of Mr. Pickens' investment, Koito and analysts here accused him of attempting "greenmail." That occurs when a company arranges to have an unwanted shareholder bought out at a premium. Toyota Motor Corp., Koito's other main shareholder, was the obvious choice to buy Boone Co.'s stake,

but the maker is apparently unwilling to set a precedent. (In April 1987, the company bought out a domestic speculator in Toyota Automatic Loom Works Ltd., an affiliated company, and many analysts believe a repeat buyout would expose Toyota to repeated greenmailing.)

Then Koito asked the government to stop Mr. Pickens, arguing that he hadn't properly declared his ownership in the company. To the amazement of many Japanese, the government has declined to review the purchase.

Suddenly, nobody wants to be caught underestimating the significance of this foreign incursion. Indeed, Mr. Pickens, with his revolutionary ideas on Japan's corporate world, may not long be the anomaly. Already, other foreign corporations are looking at buying into Japan. Citi-corp, the New York-based banking giant, has discussed taking over at least two Japanese mutual banks; Chairman John Reed says the bank intends to acquire a domestic branch network in Japan. On the corporate front, investment bankers say, representatives of the Bass family of Texas were in Tokyo during the past month, looking at possible acquisitions. Even British investor Lord Hanson, who runs Hanson Trust PLC, is known to be watching closely the outcome of Mr. Pickens's investment. (At the moment, foreigners own slightly less than 4% of Japanese listed stocks.)

"What happened in corporate America in the 1960s will make its way into corporate Japan in the 1990s," Mr. Pickens predicts. His view also echoed in a recent interview with Takami Takahashi, chairman and chief executive officer of Minebea Co., a Japanese precision-parts company that was the target of Japan's first, unsuccessful foreign takeover attempt in 1985. "The concept is changing in Japan," he declares. "The style is changing."

PERCEIVED INEQUITIES

To many Americans, that's all to the good. Mr. Pickens, who is contemplating a gubernatorial run in Texas, says he has received overwhelmingly favorable comments from people in Washington and elsewhere in the U.S. about his investment in Koito. He attributes the support to concerns that Japan, which was the largest foreign investor in the U.S. last year with direct investments of $15.09 billion, is unilaterally buying up U.S. companies without any reciprocal rights for Americans.

"They feel there have been inequities back and forth," Mr. Pickens says. "They think the Japanese have been buying up America. I see the whole thing as a global economy. I have no fear of Japanese investment in America. But I think that America doesn't have the same access to Japan."

Japanese officials don't agree. "Foreign investors might have some difficulty managing Japanese companies, but they can buy them," says Keji Kashiwaya, a deputy director-general at the Finance Ministry.

For foreign investors, the real attraction of Japanese companies is their strong cash flow and the prospect of improving it, investment bankers say. Many Japanese manufacturing concerns have large, secure markets and haven't expanded much overseas. There is room for business tie-ups with foreign companies in the same businesses.

EXPANDING OVERSEAS

Koito is a case in point: it is Toyota's main supplier of automotive lighting—almost half of its estimated 111 billion yen ($845 million) in sales this year will be in discounted sales to Toyota—yet it has almost no overseas presence. Mr. Pickens says he would like Koito to consider expanding in Europe or the U.S. Some analysts say they expect Mr. Pickens to ask Koito to start charging Toyota higher prices, too.

The Texan insists, however, that he won't try to force changes on Koito against the company's will. "We're not trying to run over Koito," he says. "We're not trying to run Koito," he says. We just made a big investment. . . . We see no reason why we can't work together."

Until Mr. Pickens came along, though, many Japanese did. Traditionally, Japanese companies' ownerships interlock with those of their banks, suppliers, clients and a handful of institutional investors. Koito is a perfect example. About 60% of its shares are held by so-called stable shareholders, who include clients Toyota, with its 19% stake, and Nissan Motor Co., with a 5.9% holding; supplier Matsushita Electric Industrial Co., with 5.3%; and Japan's biggest institutional investor, Nippon Life Insurance Co., with 4.5%.

Koito says it would like Mr. Pickens to become a stable shareholder, too. But Mr. Pickens doesn't like the idea. "I don't know whether that means you're in the stable or you're a stockholder that's not going to be active," he says. "We certainly will be."

[From The Dallas Morning News, Apr. 24, 1989]

WHY JAPANESE WISH PICKENS HAD STAYED AT HOME

(Staff writer Richard Alm reports on international business and economics for The Dallas Morning News.)

TOKYO.—Until three weeks ago, few Japanese had ever heard of T. Boone Pickens. After his well-publicized visit last week, most Japanese probably wish they still hadn't.

With one stock transaction, Mr. Pickens has shaken Japan. Kasuhisa Okamoto, chief strategist at Nikko Securities Co., goes as far as comparing the corporate raider from Amarillo to an American of a bygone era—Commodore Matthew Perry, whose "Black Ships" forced Japan to open itself to the outside world in 1853.

Mr. Pickens' bold gambit—buying a 20.2 percent stake in a Japanese automobile-parts manufacturer, then demanding a say in management—isn't a problem for just one Japanese company. It's a frontal assault on the cozy way Japan Inc. does business.

In this country, most big investors are corporate cousins, content to sit quietly aside and let management run the company. In a business culture built on consensus and long-term, stable alliances, the intrusion of any outsider—especially a foreigner—can only be seen as threatening.

Shareholders' rights to a fair return on their investment, a main tenet of Mr. Pickens' soapbox campaign in the United States, is totally alien to the way Japan does business. To an extent unknown in America, companies pinch dividends so they hoard cash.

The Japanese business elite doesn't want Mr. Pickens upsetting the status quo, a comfortable and profitable system for them. Yet, there doesn't seem to be an easy way to deal with the brash oilman, who struck it rich more than once with abortive takeovers in the United States.

If Koito Manufacturing Co. or Toyota Motor Corp., its cash-rich patron, buy off Mr. Pickens, it's only likely to open the door to takeover artists, both foreign and domestic. Toyota got burned paying "greenmail" once before—in April 1987, to protect its affiliate Toyota Automatic Loom Works Ltd.—and it doesn't want to do it again.

Taking Mr. Pickens in might be even more traumatic. With the clout of being Koito's largest single shareholder, the Texan would be in a position to shake up not only that company but Toyota as well. He might, for example, press for more aggressive pricing in sales to Toyota, something Japan's captive suppliers rarely do.

"What happened in corporate America in the 1980s will make its way into corporate Japan in the 1990s," Mr. Pickens said. The fear that Mr. Pickens may be right is what makes the Koito affair so menacing to Japan. In the end, it could lead to an erosion of management privilege as it encourages others to press for their shareholders' rights.

In this situation, the pro-business Japanese government can't offer much help. Prime Minister Noboru Takeshita, left with a dismal 3.9 percent public approval rating because of the Recruit Cos. scandal and unpopular new consumption tax, has to worry about Mr. Pickens' becoming a *cause celebre* in Washington.

Any official meddling that appears to be an attempt to frustrate Mr. Pickens will only give added fodder to U.S. lawmakers who complain that Japan isn't open enough to U.S. business. For Japan, Mr. Pickens' challenge comes at a particularly sensitive time: U.S. Trade Representative Carla Hills is working on a list of countries with unfair trade practices for possible retaliation under the "super 301" provision of last year's trade bill.

"The Japanese are being aggressive overseas," said Ron Napier, an analyst in Salomon Brothers Inc.'s Tokyo office. "How can you justify a situation where you don't allow foreigners to buy your companies? They realize the sensitivity of the case in terms of international relations."

Mr. Pickens may be the only person less popular in Japan than Mr. Takeshita. Most Japanese are glad the financier has gone back to Texas, and they probably hope he never comes back.

They must know, however, that Mr. Pickens, or someone else, will. Other potential foreign investors, including Citicorp and Fort Worth's Bass family, are already shopping in Japan.

Now that it's achieved financial power, Japan no longer can justify an insider-only economy. Throughout Japanese history, change has often come only because of a catalyst from abroad. Starting with Mr. Pickens, this may prove true for Japan's closely knit corporate culture.

Mr. Pickens, for one, considers the Koito deal a test case of Japanese openness: "The Japanese are making a big mistake when they don't invite Americans into Japan, as America has invited the Japanese in."

[From the U.S. News & World Report, Apr. 17, 1989]

A TEXAS RAIDER ROCKS CLUB JAPAN

It was inevitable that T. Boone Pickens's first major foray into Japan would stir alarm. *Acquisition* is a dirty word there. One term used in *baishu*, which also means bribery. Another is *nottori*, a synonym for hijacking. So the worst interpretations swept Tokyo last week when Pickens, a pioneer of corporate raiding, revealed that he paid $800 million for a 20 percent stake in

Tokyo's Koito Manufacturing, a maker of automobile and aircraft parts.

What alarmed Japan's industrial samurai was the fear that Pickens may have found a way to penetrate the nearly seamless regulatory and cultural web woven around Japanese companies. The Finance Ministry is probing some 30 securities firms to find out how Pickens crashed the gate.

The main barrier to foreigners is Japan's system of interlocking ownership. Most companies are owned by a dozen or so sympathetic institutions. "These industrial friendships are closed to the outside world," observes Akio Mikuni, a Tokyo credit-rating executive.

Though Pickens said he brought the Koito stake as an investment, the Japanese suspect greenmail—the practice of buying into a firm and threatening a takeover, thus persuading management to buy back the shares at a higher price. There were rumors on Kabutocho, Tokyo's Wall Street, that other big U.S. players, such as the Bass brothers, may also be taking Japanese lessons. "This would be a great place for greenmail," says an American banker in Tokyo. "Japanese companies have tons of cash—and they're xenophobic."

SENATE—*Friday, May 12, 1989*

(Legislative day of Tuesday, January 3, 1989)

The Senate met at 9:30 a.m., on the expiration of the recess and was called to order by the President pro tempore [Mr. BYRD].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Have I not commanded thee? Be strong and of a good courage; be not afraid, neither be thou dismayed: for the Lord thy God is with thee whithersoever thou goest.—Joshua 1:9.

God of Abraham, Isaac, and Israel, may Your gracious promise to Joshua, Moses' successor, be received by all of us in the confidence that we may enjoy Your constant, continual care, personally and corporately. Help us to realize that we are never alone. Whether it is the hour of trial, or discouragement, or frustration, or duty, or decision, Thou art with us, loving us, guiding us. Grant to each of us this awareness and help us to remember that nothing can separate us from Thee except our own refusal to receive Your sovereign, wise providence. Thank Thee, Father in Heaven, for this irrefutable assurance of Your faithful oversight. Help us to love You, Lord, to trust You, to follow You. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDERS OF PROCEDURE

Mr. MITCHELL. Mr. President, following the time for the two leaders, there will be a period for morning business not to extend beyond 10 this morning with Senators permitted to speak therein for up to 5 minutes each.

At 10 a.m. the Senate will resume debate on Senate Joint Resolution 113, the FSX disapproval resolution.

RESERVATION OF LEADERS' TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my leader time.

I also ask that the leader time of the distinguished Republican leader be reserved.

I suggest the absence of a quorum.

The PRESIDENT pro tempore. Without objection, the time of the leaders will be reserved. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

MORNING BUSINESS

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered. The Senator from Washington is recognized for not to exceed 5 minutes in morning business.

GRANTING TO THE PRESIDENT ENHANCED RESCISSION AUTHORITY

Mr. GORTON. Mr. President, last week in passing the Senate version of the 1990 budget resolution, we took a halting and inadequate move forward in our efforts to control the budget deficit. We can take a more decisive—and permanent—step toward fiscal responsibility by acting to control one of the most time honored practices of Congress: Pork barrel spending.

Past Congresses have appropriated $200,000 to build a replica of the Great Wall of China, $33 million to rebuild 10 miles of beach in front of fancy hotels and expensive condominiums and $180,000 to conduct a census and 3-year study on the feeding habits of lizards in the Caribbean. Given the current state of the Federal budget, the Nation can no longer afford to freely pass out money for every project that comes along. We must act to restore our financial and fiscal health.

I am pleased to be one of the cosponsors of S. 6, the Spending Control Enhancement Act, a bill which has steadily gained the support of my distinguished colleagues. S. 6 grants to the President much needed authority to rescind in full or in part appropriations bills which he determines to contain frivolous or inappropriate projects. This bill also reforms the procedures for congressional override of the exercise of that authority.

The natural tendency of Congress is to spend. Only once in the past 25 years has the Federal Government not run a deficit. The growth of the Federal debt is being slowed not because Congress wants to do so, but only because it has been forced to do so by Gramm-Rudman.

Last week, I expressed my concerns about the budget resolution for fiscal year 1990. Although the budget resolution represents a wonderful political compromise, I am convinced that it does not address adequately the difficult fiscal and financial issues confronting the Nation today.

With 100 Senators and 435 Representatives each vying for moneys to fund their special interests, Congress has been either unwilling—or unable—to act adequately to control the budget. There is little accountability on the part of any individual Member of Congress. Leadership is too diffused.

I believe that the President, armed with enhanced rescission authority, can provide the additional leadership necessary in the effort to reduce the deficits which continue to plague this Nation. The President is in the unique position of being able to focus on issues which are primarily national rather than regional.

On March 1 of this year, reports of the National Economic Commission were submitted to the White House and both Houses of Congress. The majority report recommended that steps should be taken to enhance the President's power to rescind appropriations or to veto line items. The majority commissioners concluded that the balance of power on budget issues has swung too far from the executive and toward the legislative branch. I agree.

Under the current budget process, once an appropriations bill has been passed by Congress, there is very little that the President can do to get rid of pork barrel spending. The bill may be vetoed in its entirety, but this option is rarely exercised.

The President can also exercise his limited rescission power to request denial of budget authority on specific projects. However, this power is largely without substance. If Congress does not agree with the President, Members do not have to vote to reject his actions. All Congress needs to do is merely ignore the President's rescission request for 45 days, and it goes

away. Simple as that. Congress is not forced to account for its actions or should I say, inactions?

Thus, under our current budget process, the President is virtually forced to spend everything he is told by Congress to spend. Does this make sense at a time when the Nation is struggling to unbury itself from the Federal debt? I think not.

Since the early days of this Republic until the 1970's, Presidents had the power to impound appropriated funds. For example, Thomas Jefferson made the first impoundment and declined to spend appropriated money for gunboats, and later Presidents used the impoundment power for a variety of reasons. The Presidential power to effect postcongressional changes to the budget was sharply curbed in 1974 in exchange for a new budget process: The current budget process.

I believe that S. 6 will help restore the power of the President to make tough budget decisions which Congress is reluctant to make. Under S. 6, Congress must affirmatively act to override Presidential exercise of rescission authority. No longer will Congress be able to sit idly by waiting for the President's rescission request to lapse quietly. Congressional reconsideration and action will be focused on the vetoed projects, and conducted in full view of public scrutiny.

I would like to underscore that unlike a number of previous line item vetoes or enhanced rescission proposals, S. 6 does not call for a constitutional amendment. By statutorily granting the President enhanced rescission authority, Congress preserves for itself the flexibility to modify or abrogate those powers in order to meet the dictates and fiscal demands of different Presidents and of different economic conditions.

Congress has been unwilling or unable to put the Federal budgetary house in order, and the President does not have the necessary tools to ensure that the taxpayers' money is spent wisely and frugally. By giving the President the means to eliminate frivolous pork barrel spending, we will continue to move forward in our common efforts to achieve the fundamental goal of national financial and fiscal responsibility. As elected Representatives, we must strive to do no less.

I yield the floor.

Mr. REID addressed the Chair.

The PRESIDENT pro tempore. The senior Senator from Nevada [Mr. REID] is recognized for not to exceed 5 minutes.

(The remarks of Mr. REID pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. SANFORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from North Carolina is recognized.

Mr. SANFORD. Mr. President, I ask unanimous consent that we continue for 2 minutes as if in morning business.

The PRESIDENT pro tempore. Without objection, it is so ordered.

FOREIGN LANGUAGES IN NORTH CAROLINA A FIRST IN THE NATION

Mr. SANFORD. Mr. President, it would be difficult to read a foreign language journal today which did not have some reference to foreign language teaching at the elementary school level or some comment about the advantage of learning a foreign language or languages as a young child. It is clear that one area in which many nations surpass the United States is in producing proficient linguists who have begun their foreign language training early. Thus, a real challenge for the United States is to provide more early foreign language instruction for its children.

Among the foreign language programs which address this need, North Carolina has devised the most comprehensive statewide plan of all. By 1993 North Carolina will have in place one of the Nation's most ambitious foreign language programs for elementary school students. Foreign language instruction will be required for public school children in grades kindergarten through five and must be available to students through grade 12.

The North Carolina first in foreign languages is being supported vigorously by a number of efforts designed to provide an optimal climate for students and teachers alike. North Carolina provides foreign language immersion camps for students from grades 4 to 12, and has Governor's Language Institutes for intensive immersion training of teachers. In addition, North Carolina has an extensive network of "Academic Alliances" groups in which teachers from grade schools, junior highs, and secondary schools meet with teachers from colleges and universities to form a local professional organization. And, the Foreign Language Association of North Carolina supports the North Carolina initiative in foreign language through an annual conference, workshops, and a variety of publications.

North Carolina is proud to be "first in freedom," "first in flight," and now "first in foreign language!"

RECOGNITION OF JESSE VUNCANNON ON HIS RETIREMENT FROM NORTH CAROLINA DEPARTMENT OF PUBLIC INSTRUCTION AND THE CLOSE-UP FOUNDATION

Mr. SANFORD. Mr. President, I would like to recognize the accomplishments of a fine program and an individual who has been highly instrumental in its development in my home State. In 1975, through the strong support of the North Carolina Department of Public Instruction, the Close-Up Foundation began working with students and educators in North Carolina. As you know, the Close-Up Foundation conducts a variety of civic education programs geared to involving citizens in the democratic process of Government.

Jesse Vuncannon, the chief consultant for social studies in the Department of Public Instruction, has been the catalyst responsible for the overall coordination of Close Up's programs in the State. What he has administered for 14 years is now one of the most widespread and effective services of civic education activities in this country. Since Close Up's inception in North Carolina, from the mountains "to the coast" and in every congressional district of the State, there are young people who better understand and appreciate their rights and responsibilities as citizens. Since 1975, over 7,000 North Carolina students and teachers alone, have participated in Close Up's Washington seminars and workshops about American Government.

Furthermore, through Jesse's initiative and leadership, thousands more students have traveled to Raleigh for North Carolina Close Up, creating additional education opportunities for our young people and giving them a greater sense of involvement in the affairs of their State. The accomplishment of which I am particularly proud is the formation of programs on the county level—over 20 to date—which annually teach thousands of high school students about the roles they can play in local government.

Most recently, Jesse and the Department of Public Instruction have implemented Close Up's Citizen Bee competition across our State, providing our young people with even more incentives to learn about American history, Government, current events, geography, the free market system and developing an exciting forum in which to demonstrate their knowledge.

Close Up's success in North Carolina is a result of the innovative efforts of countless educators, civic leaders, public officials and members of the private sector. Jesse has always been at the center of these collective efforts and his generous personal encouragement and well-known dedication have

29-059 O-90-19 (Pt. 7)

always generated a high and productive spirit of volunteerism. North Carolina will see the fruits of his labors for many years to come. For his longstanding and measurable contributions to young people and educators, I wish to commend and offer personal good wishes to Jesse Vuncannon as he retires this year from the North Carolina Department of Public Instruction.

Mr. President, I yield the floor.

THE RAILROAD STATION AT KILTIMAGH—AN ENDURING LINK BETWEEN IRELAND AND AMERICA

Mr. KENNEDY. Mr. President, on June 18, 1989, the historic railroad station in Kiltimagh, County Mayo, in the beautiful west of Ireland will be dedicated as a memorial and museum to the tens of thousands of Irish men, women, and children who boarded the trains there for the ports of embarkation and the perilous journey a century and a half ago across the ocean to a new land and a new life in the United States. As the poet wrote, "They are going, going, going, and we cannot bid them stay."

Many did not survive the journey in the vessels called coffin ships across the ocean called the bowl of tears. But those who did, who reached our shores, became part of one of the greatest migrations in history. Fleeing famine in their own land, they found opportunity in the United States, and they made the most of it.

They built our factories and mills and cities, they dug the canals that opened up the interior of our country, they fought in the Civil War to preserve our Union, and they built the railroads that took America to the West. Even today, it is said, under every railroad tie an Irishman is buried.

Irish blood now flows in the veins of one American in every seven. There are more Irish in the United States today than in the Ireland they left behind. And they have left their mark on every aspect of American life. Wherever we look, in business and the professions and the labor movement, in literature and music and the arts, in sports and science and religion, in politics and public service at every level of government, citizens of Irish descent have built our Nation and helped to make it great.

My own great grandparents left Ireland during the famine years. And a century later, when President John Fitzgerald Kennedy returned to Ireland in 1963 as the first American President to visit Ireland during his term of office, he spoke at Eyre Square in the city of Galway, not far from Kiltimagh. As he said that day:

> If the day was clear enough, and if you went down to the bay, and you looked west, and your sight was good enough, you would see Boston, Massachusetts. And if you did, you would see down working on the docks there some Dohertys and Flahertys and Ryans and cousins of yours who have gone to Boston and made good.

All of us in the United States are proud of that shared heritage and history. Today, in Boston and throughout New England, countless families trace their roots to Mayo and Galway and many other parts of Ireland. May the historic railroad station at Kiltimagh stand forever as a symbol of these enduring ties of friendship and freedom.

AN APPEAL ON BEHALF OF YURI SEMENOVSKY

Mr. EXON. Mr. President, I rise today to speak on Yuri and Tanya Semenovsky, Soviet Jews who have been refused visas by the Soviet Government.

We live in a time of rising expectations regarding the Soviet Union's attitudes and policies on issues ranging from arms control, to environmental protection, and to human rights.

However, it is important for all to recognize that before the Soviet Union attempts to seize the highground in terms of international opinion, it must first confront its longstanding attitudes and poor record of accomplishment in fulfilling its responsibilities toward its own citizens' human rights. Nowhere is this dismal record more evident than in the case of Soviet leadership's treatment of Soviet Jews, who often become pawns in pursuit of larger Soviet goals on the international scene.

The Semenovskys' case is typical. They are both victims of a repressive Soviet bureaucracy, the very bureaucracy that Mr. Gorbachev says he is committed to reforming. That bureaucracy has denied Mr. Semenovsky and his wife, Tanya, a visa. A visa they first applied for in October of 1986.

Mr. Semenovsky is 41 years old and is by profession a scientist, having received a master's degree from the Physics and Technical Institute in 1966.

Tanya Semenovsky is 30 years old and is a railroad technician by training.

For many years, Yuri Semenovsky worked on atmospheric hydrodynamics, meteorology and computer mathematics. At the same time, Mr. Semenovsky was active in the cause of justice for Soviet Jews. He is currently involved in gathering stories on Jewish life in the U.S.S.R. These activities have not gone unnoticed by Soviet authorities, and are doubtless a major reason for the inability of the Semenovsky's to obtain a visa.

When the Semenovskys applied for a visa in October of 1986, they were refused on spurious grounds, and both lost their jobs shortly thereafter.

Let us all remember the plight of the Semenovskys, as it is typical of so many Soviet Jews who wish to leave the Soviet Union, and underscores the real state of progress and reform in the Soviet Union in the area of human rights.

It will be hard to accept that real change has occurred in the Soviet Union until we see greater respect for basic human rights. This, like many of Gorbachev's proposed reforms, remains unfulfilled. I hope that Soviet officials will soon honor the Semenovsky's request and adopt a more humanitarian posture toward their own citizens.

NEVADA STATE PRESS ASSOCIATION AWARDS

Mr. REID. Mr. President, freedom of the press is not just a singular right guaranteed by the U.S. Constitution; it is a prerequisite for a free society. Without freedom of the press, not one of us could truly be free.

The first amendment says it perfectly: "Congress shall make no law * * * abridging the freedom of speech, or of the press."

Walter Lippman pointedly explained in 1965 how reporters help Government officials do a better job. Lippman said in a throughtful address at the International Press Institute Assembly in London, "Without criticism and reliable and intelligent reporting, the Government cannot govern."

This criticism and scrutiny may not always be pleasant. But that is the way it was meant to be. The United States is the first and best example of a society where the Government is made up of servants, not rulers. Freedom of the press helps preserve this relationship of a government elected to serve and represent the people.

Today I would like to acknowledge the working members of the Nevada press who were honored during ceremonies conducted by the Nevada State Press Association in Carson City, NV, last Saturday, May 6, 1989.

The professional standard achieved by these journalists and news organizations is a yard stick by which reporters and editors across our country and the entire world can be judged. These individuals and their colleagues personify the reliable and intelligent reporting—and sometimes, yes, criticism—without which people could not be free and government could not govern.

Here, appropriately enough, is the unedited Associated Press story on the Nevada State Press Association Awards:

There being no objection, the article was ordered to be printed in the RECORD, as follows:

> CARSON CITY.—The Reno Gazette-Journal won the general excellence award, the Las

Vegas Sun won the community service award, and Las Vegas Review-Journal reporter Dan Njegomir was named outstanding young journalist during Nevada State Press Association ceremonies Saturday.

Longtime Reno journalist Rollan Melton got the NSPA's silver makeup rule at the association's annual awards banquet. And the Nevada Appeal got the freedom of the press award.

Wyoming Press Association members who judged the Nevada papers said the Gazette-Journal deserved first place for general excellence among daily newspapers because of its "good local coverage, wonderful use of color, and great imagination in the layout."

The Review-Journal took second place and the Nevada Appeal took third place for general excellence among dailies.

For weeklies, the North Lake Tahoe Bonanza took the excellence award for having what judges termed "a beautiful, but meaty, paper." The Gardnerville Record-Courier ran second and the Tahoe World ran third.

Njegomir was picked as outstanding young journalist on daily papers for showing versatility in writing on varied subjects, extraordinary news-gathering ability. "His story on the safety records at the Henderson rocket fuels plant was particularly impressive," judges said.

Paul Szydelko of the Henderson Home News was named outstanding journalist on Nevada weeklies. Judges said he handled many different tasks and showed ability to tackle several different aspects of journalistic writing.

The Las Vegas Sun got the community service award for its special section following last year's disastrous explosion at the Pacific Engineering and Production Co. plant in Henderson.

Among dailies, the Gazette-Journal took second place for its stories on water issues and the Review-Journal took third place for its coverage of the PEPCON explosion.

For weeklies, the North Lake Tahoe Bananza took first for community service for reports on Kings Beach. The Tahoe World took second for drought stories, and the Mason Valley News took third for reports on possible closure of the local hospital.

Here's a summary of other awards:

FREEDOM OF THE PRESS

Dailies: 1st, Nevada Appeal, Don Ham; 2nd, Review-Journal, Rafael Tammariello; 3rd, Gazette-Journal, Bruce Bledsoe.

Weeklies (two categories): 1st, Elko Independent, no 2nd or 3rd.

1st, Record-Courier, Shiela Gardner; 2nd, Sagebrush, Brian Allison; 3rd, Tahoe Daily Tribune, Jeff Ackerman.

BEST TYPOGRAPHY

Dailies: 1st, Reno Gazette-Journal; 2nd, Las Vegas Review-Journal; 3rd, Nevada Appeal.

Weeklies: 1st, North Lake Tahoe Bonanza; 2nd, Sagebrush; 3rd, Las Vegas Business Press and Tahoe World.

BEST SPOT NEWS STORY

Dailies: 1st, High Desert Advocate, Howard Copelan; 2nd, Comstock Chronicle, Gary Elam; 3rd, Comstock Chronicle, Gary Elam.

Weeklies: 1st, Sierra Sun, Barbara Barté; 2nd, Mason Valley News, Marv Snow; 3rd, Henderson Home News, Mark Brennan and Katherine Scott.

BEST FEATURE WRITING OR SERIES

Dailies: 1st, Las Vegas Review-Journal, Pat Morgan and Mike Weatherford; 2nd, Reno Gazette-Journal, Guy Richardson; 3rd, Reno Gazette-Journal, Barbara Anderson.

Weeklies: 1st, Sparks Daily Tribune, Faith Bremner; 2nd, North Lake Tahoe Bonanza, Brett Pauley; 3rd, Sierra Sun, Barbara Barté.

BEST NEWS FEATURE WRITING OR SERIES

Dailies: 1st, Las Vegas Review-Journal, Ed Vogel; 2nd, Review-Journal, Major Garrett and Warren Bates; 3rd, Gazette-Journal, Jim Mitchell.

Weeklies (two categories): 1st, North Lake Tahoe Bonanza, staff; 2nd, Record-Courier, Lisa Wixon; 3rd, Henderson Home News, Paul Szydelko and Mark Brennan.

1st, Elko Independent, Lin Anderson; 2nd, Elko Independent, Lori Gilbert and Lin Anderson; 3rd, High Desert Advocate, Howard Copelan.

BEST BUSINESS STORY

Dailies: 1st, Las Vegas Sun, Stacey Welling; 2nd, Las Vegas Sun, Stacey Welling; 3rd, Reno Gazette-Journal, Jim Gold.

Weeklies: 1st, Record-Courier, Sandi Wright; 2nd, North Lake Tahoe Bonanza, Nina Banister; 3rd place tie, Pahrump Valley Times and Las Vegas Business Press.

BEST INVESTIGATIVE-INTERPRETIVE REPORTING

Dailies: 1st, Reno Gazette-Journal, Pat Harrison and Kate Santich; 2nd, Gazette-Journal, Doug McMillan and Don Vetter; 3rd, Review-Journal, Howard Stutz and Alan Tobin.

Weeklies: 1st, Tahoe Tribune, Jim DiPeso; 2nd, Sierra Sun, Barbara Barté; 3rd, High Desert Advocate, Howard Copelan.

BEST LOCAL COLUMN

Dailies: 1st, Las Vegas Sun, Mike O'Callaghan; 2nd, Gazette-Journal, Guy Richardson; 3rd, Las Vegas Sun, Jeff German.

Weeklies (two categories): 1st, Elko Independent, Lin Anderson. No 2nd, 3rd.

1st, Gateway Gazette, Slim Sirnes; 2nd, Sparks Tribune, Andy Barbano; 3rd, Mason Valley News, Bob Ausmus.

BEST WRITING BY RURAL CORRESPONDENT

1st, Comstock Chronicle, 1st, Martin Lane; 2nd, Record-Courier, Mary Settlemeyer; 3rd, Gateway Gazette, Virginia Ridgeway.

BEST LOCAL SPORTS STORY

Dailies: 1st, Nevada Appeal, Lou Thomas; 2nd, Gazette-Journal, Don Cox; 3rd, Las Vegas Sun, Paul Arnett.

Weeklies: 1st, Record-Courier, Dave Price; 2nd, Tahoe Daily Tribune, Brad Melin; 3rd, Mason Valley News, Jim Sanford and Keith Trout.

BEST LOCAL SPORTS FEATURE STORY

Dailies: 1st, Nevada Appeal, Lou Thomas; 2nd, Las Vegas Sun, Dean Juipe and Steve Beatty; 3rd, Review-Journal, John Henderson.

Weeklies: 1st, Comstock Chronicle, Mary Beth Hepp; 2nd, North Tahoe Bonanza, Guy Clifton; 3rd, Tahoe World, Brian Liebenstein.

BEST LOCAL SPORTS COLUMN

Dailies: 1st, Gazette-Journal, Steve Sneddon; 2nd, Nevada Appeal, Lou Thomas; 3rd, Review-Journal, John Henderson.

Weeklies: 1st, Henderson Home News, Paul Szydelko and Pat McDonnell; 2nd, Tahoe World, Brian Liebenstein; 3rd, Record-Courier, Dave Price.

BEST EDITORIAL

Dailies: 1st, Review-Journal, Rafael Tammariello; 2nd tie, Las Vegas Sun, editorial staff, and Reno Gazette-Journal, John Miller; 3rd, Nevada Appeal, Richard Cornett.

Weeklies: 1st, Daily Sparks Tribune, Randy Frisch; 2nd, North Lake Tahoe Bonanza, Chris Fotheringham; 3rd, Tahoe Tribune, Jeff Ackerman.

BEST EDITORIAL PAGE

Dailies: 1st, Nevada Appeal, Don Ham; 2nd Gazette-Journal; 3rd, Las Vegas Sun.

Weeklies: 1st, Tahoe World; 2nd, Sparks Tribune, Bill Will; 3rd, Record-Courier.

BEST EDITORIAL CARTOON

Dailies: 1st, Las Vegas Sun, Mike Smith; 2nd, Review-Journal, Jim Day; 3rd, Review-Journal, Jim Day.

Weeklies: 1st, Sagebrush, Calder Chism; 2nd, Ely Daily Times, Kent Harper; 3rd, Ely Daily Times, Kent Harper.

BEST BLACK AND WHITE SPOT NEWS PHOTO

Dailies: 1st, Las Vegas Sun, Craig Wallace Chapman; 2nd, Las Vegas Sun, Lee Zaichick; 3rd, Review-Journal, Russell Yip.

Weeklies (two categories): 1st, Tahoe Tribune, Scott Locker; 2nd, North Lake Tahoe Bonanza, Cathleen McCampbell Allison; 3rd, Record-Courier, David Lowe.

1st, Comstock Chronicle, Gary Elam; 2nd, Elko Independent, Lin Anderson, no third.

BEST COLOR SPOT NEWS PHOTO

1st, Las Vegas Review-Journal, Jeff Scheid; 2nd, Reno Gazette-Journal, Marilyn Newton; 3rd, Gazette-Journal, Marilyn Newton.

BEST BLACK AND WHITE FEATURE PHOTO

Dailies: 1st, Las Vegas Sun, Craig Chapman; 2nd, Las Vegas Sun, James Kenney; 3rd, Las Vegas Sun, Lee Zaichek.

Weeklies: 1st, Mason Valley News, Marv Snow; 2nd, Record-Courier, Jay Aldrich; 3rd, Sparks Tribune, Ken Johnston.

BEST COLOR FEATURE PHOTO

Two categories: 1st, Gazette-Journal, Tom Spitz; 2nd, Gazette-Journal, Jean Dixon Aiken; 3rd, Gazette-Journal, Marilyn Newton.

1st, Tahoe Daily Tribune, Scott Locker; 2nd, Tahoe Daily Tribune, Steven Nelson; North Lake Tahoe Bonanza.

BEST BLACK AND WHITE SPORTS PHOTO

Dailies: 1st, Las Vegas Sun, James Kenney; 2nd, Las Vegas Sun, James Kenney; 3rd, Review-Journal, Wayne Kodey.

Weeklies: 1st, North Lake Tahoe Bonanza, Cathleen McCampbell Allison; 2nd, Sparks Tribune, Ken Johnston; 3rd, North Lake Tahoe Bonanza, Judy Jones.

BEST COLOR SPORTS PHOTO

Two categories: 1st, Gazette-Journal, Mark Zaleski; 2nd, Review-Journal, Jeff Scheid; 3rd, Review-Journal, Jeff Scheid.

1st, Tahoe Daily Tribune, Scott Locker; 2nd, Record-Courier, Jay Aldrich; 3rd, Sierra Sun, Ed Cicenas.

BEST PHOTO ESSAY

Dailies: 1st, Las Vegas Sun, Lee Zaichick; 2nd, Gazette-Journal, Tom Spita; no 3rd.

Weeklies: 1st, North Lake Tahoe Bonanza, Kathleen Allison; 2nd, Sierra Sun, Ed Cicenas; 3rd, Sierra Sun, Ed Cicenas.

BEST ILLUSTRATED PHOTO

Two categories: 1st, Gazette-Journal, Mark Zaleski; 2nd, Gazette-Journal, Patrick Forden; 3rd, Review-Journal, Russell Yip.

1st, Tahoe Daily Tribune, Scott Locker; 2nd, Tahoe Daily Tribune, Scott Locker; 3rd, Gateway Gazette, Virginia Ridgeway.

BEST SPECIAL SECTION

Dailies: 1st, Las Vegas Sun; 2nd, Nevada Appeal; 3rd, Gazette-Journal.

Weeklies (two categories): 1st, Tahoe Tribune; 2nd, Record-Courier; 3rd, Humboldt Sun.

1st, Comstock Chronicle; 2nd, Comstock Chronicle; no 3rd.

BEST LOCAL ADVERTISEMENT

Dailies: 1st, Reno Gazette-Journal, Aline Polikalis; 2nd, Gazette-Journal, Dihan Rosenburg; Review-Journal.

Weeklies (two categories): 1st, Sparks Tribune, Debbie Block and Paul Horn; 2nd, Record-Courier, Bev Davis; 3rd, North Tahoe Bonanza, Chris Fotheringham.

1st, High Desert Advocate; 2nd, Comstock Chronicle.

FAREWELL AND BEST WISHES TO JEANNE BOLO DeAMICIS

Mr. WIRTH. Mr. President, although the Congress has yet to enact the parental leave and child care bills into law, a highly valued member of my staff will be leaving today to put both parental leave and child care into practice. I wish to say farewell and wish the very best fortunes to Jeanne Bolo DeAmicis, who will be leaving my Washington Senate staff to care for her soon-to-be-born baby.

Jeanne has served admirably as my legislative assistant for health and human service issues for the past 4 years. I have come to grow greatly dependent on her sound judgment, well-reasoned counsel, and unswerving commitment to progressive public policy. Jeanne moved to Washington from Boulder, CO, when she joined my staff, and she has worked hard on Colorado's behalf. Her staff work has been consistently excellent.

Beyond formal job titles, however, Jeanne has served as the invaluable voice of reason and social conscience on my staff. She has been an advocate, in the truest sense of the word, for her many constituencies: educators and students, the elderly, the poor, those seeking to exercise their civil liberties, and, perhaps most importantly, children. She has tirelessly fought for those who are often forgotten in the system.

But while Jeanne has been an unyielding advocate, she is also a realist who knows we must find ways to pay for vitally needed social programs. Accordingly, she has worked to ensure that social legislation is fiscally responsible. At the same time, I have counted on Jeanne to dig in her heels and stand firm when the budgetary ax looms over an essential program that has already taken too many cuts.

Jeanne has shown to me and members of my staff what is worth fighting for and when not to back down. This commitment, when coupled with Jeanne's superb legislative skills, makes for a combination that is very difficult to replace.

Too often careers on the Hill become all consuming. As demanding as I know my office can be, however, Jeanne has somehow managed to keep her perspective on the important balance between work and home. Her example has helped to remind the staff—many of whom, because of their tremendous commitment, can be found at their desks late into the evening—to take time to enjoy a personal life outside the office.

I know I speak for all of the Wirth operation, when I say that Jeanne's warmth, wit and sage advice will be sorely missed. It is with some comfort that I know that in her new endeavor Jeanne will continue to use her valuable skills and knowledge by passing on her convictions and perspective to the next generation. I want to say thank you to Jeanne for her service to me and to Colorado, and to wish Jeanne, her husband Don and baby DeAmicis the very best.

WAIVER OF TRADE RESTRICTIONS ON SOVIET UNION

Mr. HELMS. According to this morning's news reports, President Bush will announce later today his intention to work with Congress on granting a waiver on the Jackson-Vanik trade restrictions on the Soviet Union should the Soviets enact and faithfully carry out laws opening up Soviet emigration.

Any Soviet promise of open emigration is welcome. However, our Government risks making a grave error if it were to rush to lift trade restrictions before it is certain that opening of Soviet emigration is a permanent reality.

The Jackson-Vanik restrictions of the Trade Act of 1974 represent perhaps the greatest tool our country has to leverage open emigration policies out of the Kremlin. Under these restrictions, Communist countries are prohibited from receiving a range of trade benefits from the United States until the President determines, that among other things, the country no longer denies its citizens the right to emigrate.

The President may, however, temporarily waive these restrictions if he determines that the waiver will promote open emigration, and if he has received assurances that emigration practices will lead substantially to open emigration.

In considering this waiver, it is incumbent on the President and the Congress to recognize some important, yet often overlooked factors:

First, granting a waiver has much the same effect as a total lifting of trade restrictions. Once a waiver is in place, multiyear contracts will be negotiated, and then protected by contract sanctity in the event restrictions are reimposed.

Second, because a waiver is tantamount to a permanent lifting of trade restrictions, the United States must be very certain that any new Soviet emigration policies are real, permanent, and apply to all persons wishing to emigrate.

Third, the Soviets have cheated on just about every treaty they have signed and commitment they have made. In light of this, no waiver should be granted until after open emigration policies have been in effect over a long enough period to prove the Soviets are committed to permanent open emigration.

Mr. President, the Soviet economy is bankrupt. But of course, what else could be expected of a society bereft of basic freedom and liberties? Now the Kremlin wants the West to bail it out of its economic predicament, with subsidized and guaranteed credits and other trade benefits.

To bail out the Soviets before they are committed to a free society would be a mistake which can only come back to haunt America and the cause of freedom.

SMALL BUSINESS WEEK

Mr. HEFLIN. Mr. President, today marks the end of the Small Business Week, as proclaimed by President Reagan, in recognition of the 17 million small businesses in this country.

It has been a busy week for those involved in the Small Business Week process. In my own home State of Alabama, the Small Business Administration and the Chambers of Commerce across the State have celebrated with receptions for honorees and special seminars on the small business world.

Mr. President, small businesses are the backbone of the American economy. The 17 million small business owners provide for half of the Nation's private employment, which is almost 40 percent of national production in the Nation. Small businesses also create about two of every three new jobs in this country. We can attribute 38 percent of our gross national product to small businesses.

In my home State of Alabama, there were 61,917 business establishments in Alabama in 1986. Of these, 54,199, or 87.5 percent, were small businesses with fewer than 500 employees, and they employed 47.6 percent of Alabama's work force.

Mr. President, while it is unfortunate that the rate of new business formation has been declining nationally, I am proud to say that Alabama continues to have stable new business growth. In Alabama, small business generated almost all of the 32,200 new jobs created in Alabama between 1980 and 1984.

Mr. President, I believe that women and ethnic minorities have both benefited greatly in the past few years through small businesses. The Small Business Administration has special

programs geared to assist women and minorities in opening businesses.

From 1977 to 1984, the number of businesses owned by women increased by 11 percent annually in America. I can state with pride that according to data from the Department of Commerce, Alabama had the 30th largest women-owned business population (33,576) and the 24th largest minority-owned business population (8,137) in the Nation in 1982.

Not only that, Mr. President; minority business ownership in this country has also rapidly increased in recent years. Black-owned businesses increased 46.7 percent from 1977 to 1982, and Hispanic and Asian-owned business also increased during that time.

The Small Business Administration has played an important and vital role in the success of small businesses in this country. Without assistance from the SBA, many small businesses would not be in existence today. The SBA's Office of Advocacy is specifically mandated by Congress to be an advocate for America's 18 million small businesses.

I once heard someone say that small business people are the true adventurers in this country. What a wonderfully accurate statement. For who else but the small business person starts with a dream, goes into unknown territory, struggles against all odds, takes on extra risks, all the while knowing that he or she might never see this dream come to fruition? American small business people have what I call true American pioneer spirit.

Mr. President, I want to commend and congratulate all those who have ever had a dream and felt a tug of that pioneer spirit, and then have gone ahead against the odds to achieve their dream. I am happy that President Reagan has dedicated a week to their fine achievements, and I would like to congratulate them all.

I thank you, Mr. President.

TRIBUTE TO DR. VERNON ST. JOHN

Mr. HEFLIN. Mr. President, I rise today to pay tribute to Dr. Vernon St. John who was recently inducted into the Alabama Educational Leadership Hall of Fame. Dr. St. John devoted his entire life to improving the educational system in the State of Alabama and is most deserving of this great honor.

Dr. Vernon St. John served as an Alabama State senator for two terms where he was instrumental in providing financing for the operation of Alabama's public schools. He was the youngest senator ever elected in Alabama and soon carved out a niche. His understanding of the importance of education led to respect from his colleagues and a lifelong commitment to education. Dr. St. John's efforts were crucial to the passage of the Alabama sales tax and the funds that provides for education. One of his first duties in the Alabama senate was to help draft the still-used Alabama Minimum Program for financing schools.

Dr. St. John has held almost every position in the field of education. He has been a coach, a teacher, and a principal. He served with distinction in each of these positions but is most well known for the job he did as superintendent of the Opp City Schools. For a quarter of a century, from 1945 until 1971, Dr. St. John led the Opp School System to a level of excellence reached by few systems. Under his guidance, Opp became only one of three fully accredited school systems in the State. When he retired, Opp was also one of the only system which provided 30 percent of the education funds from local efforts.

Throughout the past 50 years, Dr. St. John has served willingly and devotedly to improve education in Alabama. The State has benefited greatly from his wisdom and experience in each venture he undertakes. Alabama has been fortunate to have someone with his talents and abilities working to improve the State. It is seldom that someone of Dr. Vernon St. John's caliber receives the recognition which he is due. His selection to the Alabama Educational Leadership Hall of Fame and the attention it has brought him represent a small step toward recognizing the tremendous commitment which he has made to the education of Alabama's children.

I ask unanimous consent that the attached newspaper article appear in the RECORD following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Opp News, Mar. 23, 1989]

DR. ST. JOHN NAMED TO HALL OF FAME

Dr. Vernon L. St. John, superintendent of Opp City Schools from 1945-1971, and Dr. James A. Street, former executive director of the Alabama Council for School Administration and Supervision, and present superintendent of schools in Tallassee, will be inducted into the Alabama Educational Leadership Hall of Fame at Troy State University Thursday, April 20th.

The distinguished educators will be honored at a formal induction dinner in TSU's Adams Center Ballroom and will have their portraits placed with other Alabama education leaders inducted previously.

Dr. Street began his educational career as a coach in the Taylor County, Florida school systems in 1956. He has been coach, teacher, counselor and principal at schools in Cordele, Georgia, Sheffield, and Selma. He was executive director for the Alabama Council for School Administration and Supervision from 1975-1986.

Dr. Street became superintendent of the Tallassee City School System in 1986.

Dr. Street's professional activities have been abundant and varied. He has served as a member of the Governor's Committee on Education and Economic Development, the National Commission on Administrator Relationships, the Governor's Leadership and Management Improvement Program, the Governing Board of the Alabama Leadership Hall of Fame, and The Governor's Education Reform Commission. He holds memberships in eight professional organizations.

Since assuming the superintendency of the Tallassee City Schools, Dr. Street has received two national public relations awards, the National School Public Relations Association Award of Honor, and the NSPRA Golden Achievement Award.

In 1934, as the youngest senator ever elected in Alabama, Vernon L. St. John was appointed to the Recess Education Committee while the legislature was not in session. This committee prepared and presented to the legislature the Alabama Minimum Program for financing schools, a law still in effect. He also led the fight for the passage of the Alabama Sales Tax which would provide funds for the operation of schools.

Later, as superintendent of Opp City Schools, Dr. St. John assumed a leadership role in local as well as state education. At the time of Dr. St. John's retirement from the Opp system in 1971, Opp was one of only three school systems in the state that was fully accredited by the State Department of Education. It was also one of the few systems which provided thirty percent of local financial effort in Alabama at that time.

Dr. St. John has been a teacher, coach, and principal, as well as superintendent. He served as State Senator for two terms and has been active in just about every project for the improvement of public education in Alabama for the past 50 years.

The Alabama Educational Leadership Hall of Fame is a joint project sponsored by the Alabama Council For School Administration and Supervision, the Alabama Association of School Boards, and Troy State University. The Hall of Fame is displayed at the Troy State University School of Education in McCartha Hall on the Troy State University main campus.

TRIBUTE TO LAWRENCE COUNTY HIGH SCHOOL BAND

Mr. HEFLIN. Mr. President, I am pleased to rise today to pay tribute to the Lawrence County High School band. Over the years, this band has won numerous awards and gained widespread recognition for their excellence. The band has played a role in shaping the lives of hundreds of Lawrence County students. Each member of the band has worked hard and deserves the recognition the band has gained.

The Lawrence County High School band has compiled an impressive record over the past 5 years. They have marched in numerous football games and parades, presented at least two concerts each year, as well as participated in countless community events. Each of these performances has enriched the lives of both those who performed and those who enjoyed the music. We normally recognize the benefit to the audience but seldom the benefit to the performers. Each of these students lives has been enriched by their exposure to the music they studied. The students have grown culturally to appreciate the self-discipline

and gruelling work behind each performance.

Mr. President, the Lawrence County High School band has compiled an incredible performance record over the past 5 years. Although I cannot begin to list all their awards, I would like to tell you a few of their accomplishments. For 3 years, they won first place, the Challenge Cup, and all superior ratings while finishing third, fifth, and seventh in the Columbia Central Marching Contest. They have been the best band in their class at the University of Alabama Festival of Bands, the Hoover Invitational, the Mid-Alabama Marching Festival, the Northwest Alabama Marching Center, and the Music Bowl. Over the past 15 years the band has received over 200 awards for superior ratings and first place competition places.

This incredible record stands as a testimony to the hard work of both the students and their band director, Freddie Meadows. I congratulate Mr. Meadows for all that he has done to make this program a success while influencing the students lives. His efforts serve to enhance the learning experience and indeed stay with his students throughout their lives. I wish him the best of luck and look forward to the continued success of the Lawrence County High School band.

SITUATION IN PANAMA

Mr. HEFLIN. Mr. President, I rise today to address a problem of growing concern to this Nation. The situation in Panama following the recent national elections has grown steadily worse. Gen. Manuel Noriega has shown blatant contempt for the will of the Panamanian people and for the rights of American citizens there. I applaud President Bush's timely announcement yesterday of his efforts to protect American citizens but question whether these efforts are sufficient to control the situation in Panama.

Authorities have known since at least 1978, that General Noriega had ties to illegal narcotics. In addition to his involvement with drug trade, Noriega has been linked to the gunrunning and money laundering of the evil Colombian drug cartel. Although Noriega has been indicted for his involvement in drug trafficking, repeated efforts to oust him have failed.

I want to recall back to a few months ago when we felt we could impose sanctions on the American dollar going into Panama, and that that country would have to do something pertaining to ousting Noriega because the American dollar was their currency, and it would run out because of the fact that we were not allowing it to go to Panama.

Unfortunately, they found American dollars elsewhere. Still, Noriega found other means to continue. He seems to have support from many, many other countries. There is even some evidence that he has support from Cuba and perhaps the Soviet Union.

He certainly has continued his corrupt regime. A little while back we increased the garrison at the Panama Canal Zone by approximately 1,300 troops. We are now sending an additional 2,000 troops, and America should have over 13,000 troops in Panama within a few days.

We must take prompt action to ensure that this situation does not get out of hand and that Noriega is removed from power. I am therefore calling on President Bush to organize a multinational army, drawn primarily from Latin American countries, which would stand ready for any effort that might require the use of armed forces. This multinational force would serve the dual purpose of supplementing American forces and showing legitimate Latin American support for our condemnation of General Noriega's actions.

On Thursday, May 4, the Senate unanimously passed Senate Resolution 120, expressing support for true democracy in Panama and condemnation of General Noriega's attempts to steal the election for his hand-picked Presidential candidate, Carlos Duque. Unfortunately, reports of the election indicate that the election was indeed rife with fraud.

Both opposition sources and international observers report that opposition Presidential candidate Guillermo Endara won the election by a substantial margin. Noriega denied these reports, attempted to steal the election, and in the face of wide-spread support for the opposition, annulled the Sunday's elections.

Throughout the week, unrest in Panama spread. As more Panamanians realized the extent of Noriega's fraud, the opposition sought to gain support for their cause. The opposition Presidential and Vice-Presidential candidates gathered in a park in Panama City. Plainclothes officers attacked the gathering, beating people with boards and tire irons. Presidential candidate, Guillermo Endara was beaten with an iron bar and is still recovering in a Panamanian hospital. Police forces, which are led by Noriega, stood by while the beatings occurred and did nothing to intervene.

In my judgment, the time to act has come. The United States must make it clear that we will no longer tolerate the actions of Gen. Manuel Noriega. This election fraud represents only the latest episode in Noriega's long record of corruption. The present focus on the massive fraud in the Panamanian elections presents us with an opportunity to act against Noriega while world opinion is polarized against Noriega.

The problem for this country looms larger than General Noriega. With respect to General Noriega the issue really should be: "Are we going to do what it takes to fight the war against drugs?" After all, our aversion to Noriega stems from his corruption which is fueled by his position as the leader of Panama's drug-running strongmen. At this time, American sanctions against Panama have failed to remove the Noriega regime. We must ask ourselves, "Have we done enough to remove General Noriega?" In my judgment, we should encourage Latin American countries to take action against Noriega. While American sanctions might be viewed by Panamanians as outside intervention, sanctions by neighboring countries could help strengthen popular Panamanian opposition to Noriega. These sanctions might also help influence the honest members of the Panamanian Defense Forces to drop their support of General Noriega.

General Noriega was indicted for his involvement in drug smuggling and has continued his control of the Panamanian Defense Forces. He has encouraged the harassment of American civilian and military personnel involved with the operation of the canal. His influence extends not just to the Americans in Panama, but to Americans in this country. Noriega and his type have penetrated the entire country of the United States with their drug network. Rural areas and urban areas alike have been touched by the effects of drugs.

We must stand united against individuals like Noriega who insist on undermining this country by smuggling drugs on such a large scale. Obviously we must work to control the spread and growth of drug use within our borders, but we must also work from outside our borders to eliminate the threat presented by the massive amounts of drugs being smuggled into the country.

Gen. Manuel Noriega has obviously shown his contempt for America. He continues to harass our citizens in Panama and advocates extreme violence to suppress the opposition forces. I abhor the actions of General Noriega. The United States should take the appropriate steps to ensure that Noriega is removed from power. I repeat my call for President Bush to encourage the organization of a multinational army, made up primarily of Latin Americans, to stand ready for any effort which might require troops. By taking these steps, we can show our support for the democratic process which elected Guillermo Endara while also removing from power the corrupt drug smuggling regime of Gen. Manuel Noriega. If we are to remain committed to fighting the war on

drugs, we must move to ensure the removal of General Noriega.

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

DISAPPROVING THE EXPORT OF TECHNOLOGY TO CODEVELOP OR COPRODUCE THE FSX AIRCRAFT WITH JAPAN

The PRESIDENT pro tempore. Under the order, the Senate will resume consideration of Senate Joint Resolution 113.

The clerk will report the joint resolution.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 113) prohibiting the export of technology, defense articles, and defense services to codevelop or coproduce the FSX aircraft with Japan.

The Senate resumed consideration of the joint resolution.

Mr. LUGAR addressed the Chair.

The PRESIDENT pro tempore. The Senator from Indiana [Mr. LUGAR].

Mr. LUGAR. Mr. President, I am advised that in a few minutes the distinguished Senator from Illinois [Mr. DIXON] will be present, and he will be managing the bill on his side. I will be managing on our side.

For the moment, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested.

The clerk will call the roll.

The assistant legislative clerk proceeded the call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. LUGAR addressed the Chair.

The PRESIDENT pro tempore. The distinguished Senator from Indiana [Mr. LUGAR] is recognized.

Mr. LUGAR. Mr. President, I thank the Chair.

This morning, in my initial remarks I will outline my reasons for support of the FSX agreement that has been submitted to the Congress by President Bush, and which was commended by the Senate Foreign Relations Committee by a vote of 9 to 8 yesterday.

In particular, Mr. President, the vote was on a motion of rejection of the FSX situation which Senator DIXON proposed. And the committee, having turned down Senator DIXON's motion by a vote of 9 to 8, proceeded to send the issue to the floor for his debate which we are now having.

I think it is important to note that in the consideration which we enjoyed yesterday in the Senate Foreign Relations Committee there was bipartisan support for the agreement. In particular, five Republicans and four Democrats comprised the nine who voted in favor of the agreement. This bipartisanship is important I suspect to note in the deliberations which we will have today.

The management of the joint resolution today comes from Senator DIXON, and for the moment the distinguished Senator from North Carolina, Senator SANFORD, will manage in his stead.

I have been asked as one on the Foreign Relations Committee to support the deal, or be opposed to the disapproval, and to manage the time on our side which I shall attempt to do.

I am hopeful that during the course of the day, with the assistance of the distinguished majority and minority leaders, we will be able to arrive at a time certain for a vote in the early part of next week, but after very thorough deliberations. We have the hours ahead of us today for all Senators to have thoughts about the FSX situation to make them known.

Mr. President, I come to this proposition with the basic thought that the relationship the United States and Japan have in foreign policy and economies, and in development of political ideas around the world is very important. We have important relationships in NATO. We, of course, are deeply concerned about the progress of countries in our own hemisphere. We have an abiding hope that world trade will increase generally because we believe that our prosperity increases accordingly. But we center in this debate upon our relationship with Japan. It is of critical importance.

I suspect the first thing that must be recognized about the thought of the development of a Japanese fighter aircraft is that many persons in Japan, many leaders in politics, economics, certainly in their aircraft industry in the late 1980's came to the conclusion that Japan ought to develop a fighter aircraft on its own; that the economy, that the technological assets of that country were sufficient to do that. This came as somewhat of a surprise to many of us in the United States of America, who had worked successfully with Japan on various other aircraft that have been helpful to the defense of that country. As a result, it was at our initiative that the United States visited with the Japanese and said, "It is critically important that we continue to develop these aircraft together, the Japanese and Americans together, in this situation."

That was at our insistence, and the beginning of the agreement that we looked at today comes not because the Japanese pressed us to make an agreement; it was because we said we think it is important for the United States of America to be involved in the Japanese aircraft industry, all the way through, and continuing. That, I think, is the critical element of this debate, Mr. President; it is at our initiative that this is being sought.

I suppose the fact that at the end of the Reagan administration and the oncoming of the Bush administration, there was, as in all grave policies of state, a review. And a number of people in the Bush administration, having surveyed this, felt that we ought to tidy up some of the language, firm up some of the agreements, especially in terms of the commercial aspects of this. Specifically, how many jobs for the United States, how much business, what kind of a change in terms of the balance of payments would this amount to? That tidying up, that refinement of the agreement, has occurred and has been agreed to by the Japanese.

Mr. President, I come to the conclusion, having heard this debate, having visited with our leadership, having visited with Japanese leadership, that we simply have a very essential question in front of us to decide. The question is basically this: Do we want the Japanese to proceed alone to build the fighter plane? Do we want the Japanese to develop an industry which will have a figher plane as its objective, as its achievement, and totally independent of us?

If the answer to that is yes, or we really do not care, then clearly the debate is a simple one for Members. Some Members have come to a conclusion that, of course, we really want to monitor this, we want to stay involved, we are deeply interested in Japanese developments. Some Members have a lurking feeling that the Japanese really do not have the capabilities to do this, at least very fast. Some Members would say, well, in due course the Japanese could develop first-class fighter aircfaft that would meet their capabilities, but it would take them a lot of time. They are more advanced in the state of the art in various ways than we are, and even if they went to the Europeans, it would still take them time, some time longer than the area contemplated now by this agreement.

I have no way of making a definitive estimate on that, Mr. President, as to how long it would take the Japanese to build fighter aircraft. Having watched Japanese developments in other areas, I suspect and my own conclusion is, that they would have the capability of doing that at some point.

Furthermore, I am convinced, having talked to many people in Japan, that a very large percentage of Japanese would like to do it that way. They would like to have the United States out of the picture altogether. I think that is a potentially dangerous course for Japan and for the United States, and so do a majority of Japa-

nese leaders, at this point in history. They want the United States to be involved in the protection of Japan and the Far East. They want our involvement at each stage of military thoughts, which they might have.

They have had a very difficult history this century, in which people of a strong military mind carried the day in Japan, gained dominance over domestic politics, and created havoc in Asia for that country; they do not want to revisit that. The sober, thoughtful, prudent leaders of Japan want the United States to be involved. That is what this agreement is about, that we are to be involved and involved in a very large way.

We believe that since we have the resources—looking at it from a Japanese standpoint, since they have the resources to do that, they ought to do it right. They want to spend the money to do this. That has made it incumbent upon negotiators on our side to try to balance the commercial aspects of this, and we have been assured by the Secretary of Defense, Cheney, Secretary of Commerce, Mosbacher, the Deputy Secretary of State, Mr. Eagleburger, that in terms of commerce, buying F-16's off the shelf, for however much a copy they are now worth, and buying developments and buying production in American factories, in both deals amount to about $2.5 billion; that proceeding in the codevelopment in this FSX agreement ultimately the United States of America will receive $2.5 billion of business and the jobs that that means, and the enhancement of our capability in our aircraft industry that that means; that we are not losing business by failure to sell the F-16 off the shelf.

Mr. President, during the course of the debate already, the question has arisen several times, if the Japanese want a fighter aircraft for a mission of patrolling 1,000 miles from Japan, of performing a mission that is important in our alliance with Japan, because we want them to undertake this burden of defending their own country, keeping an eye on the Soviets, or on others that might invade, the question is, why not buy the F-16; is it not state of the art presently to handle that mission?

The Japanese answer to this question is simply that they believe that the F-16 is a remarkable aircraft. It embodies very great technological advances, particularly in the 1970's, when most of the development occurred. The Japanese are saying, for the aircraft that we want for the year 1999, 10 years from now, we want it to embody the state of the art in the 1980's and the 1990's. We want a better aircraft. We think we can get a better aircraft, almost a generation later, than the basic development of the F-16.

Mr. President, Senators will differ on how tightly the agreements are drawn, whether renegotiation of all of this in the mid-1990's might dilute, in any form, that amount of business, and that is certainly subject to debate and to scrutiny by the Senate. It surely has been by the administration, but the assurance of the administration in direct testimony are that the same amount of business is going to be done either way.

So the question then comes, will we have a better aircraft, having codeveloped the state of the art, as we move along now, sharing together research of both countries on this project? I think the logical answer is that we will have a better aircraft. We are learning things all the time about a fighter aircraft that are going to be incorporated in this one, and we are going to have the benefit of what we discover, and the benefit of what the Japanese discover. We are both going to benefit by this exercise of very dedicated and brilliant technicians in both countries cooperating in this venture, for an aircraft that is to be produced about 10 years from now, for a specific defense objective of the Japanese-United States relationship.

I mention all this, Mr. President, because questions arise as to whether the technology that we will give is worth a great deal more than the technology that we will get and only history will define this as precisely as many Members of the Senate attempt to do now.

But I think it is fair to say, having listened to this argument, that much of the technology that we will be giving is technology that we developed many years ago. It is not technology that has the forward implications that are often described in this debate. It is technology that is still ours, probably unknown or basically unknown in many particulars by the Japanese but probably on the advent of being discovered at some point or being developed in some other way by them.

In short, it is not demonstrable that we are giving away very much. It is not demonstrable that we will gain very much.

Members have heard testimony behind closed doors about the technologies. They try to evaluate how much they are worth, whether it is logical that things the Japanese now have can be incorporated into anything else we are doing, and it is clearly debatable, perhaps and perhaps not, certainly to put a dollar figure on or a time figure.

The basic point is Mr. President, that the technologies we are giving are technologies developed some time ago, diminished perhaps by time, than the values at least that we would subscribe to them presently. We retain the technologies that we believe are truly competitive with regard to either the fighter aircraft or derivatives in the commercial aircraft, because the argument is made that in fact the FSX deal, although it is designed for defense and to enhance the Japanese-American alliance in the Pacific, is the forerunner of a Japanese commercial aircraft industry, that that commercial aircraft industry will simply take off from this particular deal. I am not persuaded the case will be made that it will take off from this deal.

I have heard testimony by many Japanese leaders in both the military and civilian components, that they want to build the civilian aircraft industry, that they have the capital, the wherewithal, the technicians to do that in their country at some point.

I think it is predictable they are going to do that. I do not think that FSX will influence that basic decision of their commerce one whit to be truthful. But nevertheless, it is an arguable point as to what extent the technologies we are giving up enhance competition in the domestic side in our aircraft industries.

I submit, Mr. President, that if the aircraft industry in this country was generally worried about that aspect, the aircraft industry in this country would not be backing the FSX agreement with the fervor that we see backing it.

Clearly, most people in the aircraft industry here believe that the Japanese are an excellent customer of our aircraft industry, some might even say the best. The possibilities, given the wealth, the size of their economy, the requirements that they may have for worldwide aircraft offer a great avenue for progress of our domestic civilian aircaft industry.

I think those in the business see that clearly. Clearly in Congress we have to be worried about the secret technology, about the sinews, at least, of our strategic posture, and we are worried about that a good bit and weighing it carefully.

But, Mr. President, I think it is very hard to make the case that we are going to debilitate our aircraft industry by entering into an agreement that provides substantial business for us and gives up technology that is somewhat dated and protects that which is really the state of the art, offers us at least at the margins new ideas we may not have had or triggers at least the imagination and development that is important to us.

It seems to me all of these situations leave a level playing field as one looks at the development of the aircraft industry in which we are going to have to be competitive in this decade, in the next decade, and the one after that in order to get our share of the business, not to be guaranteed to us by having a few more secrets than others have, and we know that out there the Japa-

nese may be much more competitive on that civilian side but that I think is going to occur anyway, that they have already testified they are going to do.

Our question once again comes back to our relationship with Japan.

I come back to that issue in a different way, Mr. President, than I commenced, because I talked about our alliance, about the missions the Japanese could fly, about an aircraft that is better than anything we now have and that we would coproduce. We would know about it as well as they would know about it.

But I sense, Mr. President, in much of the argument on the FSX agreement that there is a sense of mistrust of the Japanese on occasion, antipathy toward the Japanese.

Arguments intrude that are interesting but I think irrelevant to this deal. Let me just simply put them on the table. Arguments intrude that the Japanese have been buying land in America, they have been buying some of our office buildings and our hotels in Hawaii in particular, that they have been purchasing shares of stock in some of our firms taking a very strong equity position.

It has long been noted that the Japanese buy our securities and indeed in a topical instance in the week we are in, the failure of the Japanese to buy as many of the bonds in the Treasury auctions as investors hoped they would buy led to some thoughts that interest rates might go higher. On the demand side the Japanese demand was a little light, maybe only 25 percent of the issue, as opposed to higher percentage that investors had hoped for.

We anticipate every time we have an auction that the Japanese will purchase a large percentage of the bonds; in essence, that they will purchase a good part of our domestic deficit week by week.

And as Members know, Mr. President, we argue about the deficit and whether the deficit should be $100 billion or $150 billion. Every dollar must be paid for by a bond, by a borrowing. We count on Japanese and European friends and others to buy a lot of those bonds in recent years and up to the present.

But those sorts of purchases have been seen as benign as securities that come and go. The money is repaid and other borrowings come. Whereas, investments in the real estate and basic industries in the country have been seen in another way.

We have an ambivalence about this, Mr. President. In my State of Indiana and most States in the midwestern part of the country we witnessed an avid competition for Japanese automobile plants, and indeed near Lafayette, IN, one is being built. It will employ, we are advised, about 1,700 or 1,800 people in the State of Indiana. It will purchase materials from many counties around. It will be a very strong impetus for growth in the economy of Tippecanoe County and surrounding counties of Indiana.

So it will be in Kentucky, has been in Tennessee, Illinois, and Ohio where similar plants occurred. In short, Mr. President, many of us have welcomed this investment and have competed for the investment. It has been very important in our current prosperity.

I make this point, Mr. President, because at the same time as polls are taken of Americans, should any other country or nationals of any other country own factories, stores, land in our States, a large percentage of Americans say "no." That negative is not devoted just to the Japanese. It is devoted to any foreign ownership at the very time that we are running enormous balance-of-payments deficits, that these must be paid in some fashion, often by the purchase of our securities and long-term bonds but on occasion by purchase of other assets in our country.

One could argue as an American that if Japanese investors bought these assets of real estate at a time that the yen was 260 to the dollar and have witnessed the fall to the current 135 yen to the dollar value those Japanese who bought the assets lost about half of their money. There are risks in buying real estate, buildings, and other things in this country. It is hardly a one-way street. If the dollar would have fallen in value some more, so would the losses grow for Japanese or other investors.

And others have pointed out, Mr. President, that if we are taking a look at ownership in our country, citizens of Great Britain, or citizens of that country in combination with Americans and multinationals, are by far the largest foreign investor in our country. Typically, they have been followed by West Germany and Japan, and the Netherlands are in close competition for third place and fairly far down in terms of the historic accumulative amount owned in America. So that is important to note.

But I bring it to this debate because I hear, as I listened to the debate in the Foreign Relations Committee and now on the Senate floor, at least ripples of anxiety about the Japanese, about a feeling that somehow that relationship is not going well at all in terms of commerce; that the Japanese by running this huge balance-of-payments deficit in their favor of about $55 billion in the last year alone, are insensitive to the relationship with us, insensitive to the relationship with the rest of the world.

Mr. President, I think that there is some justification in that allegation of insensitivity. The Japanese economy, run on an export basis with forced savings, with deprivation really of consumer interest in that country, has led to very large deficits in terms of the United States and most other trading partners with Japan. And that does hang over the issue.

So Americans or U.S. Senators ask: Is this deal in any way going to affect that balance of payments? Or if you look at it from a negative standpoint and you come to the judgment that it will be a negative effect, try to describe how, in fact, our aircraft industry, a winner at this point, might become a loser, along with many other American industries that have fallen in that competition. And you worry about the long-term relationship with Japan even if you cannot peg a dollar figure on this deal or indicate that this in any way is likely to help or hinder the situation.

I put all this out on the table, Mr. President, because I think most Senators understand that predicament. They understand the yearning of our constituents for some hope that we are going to come into a better balance with the Japanese in terms of trade, that somehow we will not lose jobs perpetually in various industries that are stricken, whether they be our basic automobile and steel industries or others that are now coming under fire. And whether one understands how the FSX commerce will go, this debate offers a forum for venting these emotions and anxities that are deeply felt by Senators and by the American people.

I suppose the point that I want to make, Mr. President, is that I feel those anxieties the same as any other Senator does. I am inclined to believe at the margin the FSX agreement is helpful. It is $2½ billion worth of business which we shall have if we agree to the deal and, correspondingly, $2½ billion which we shall not have if we do not. We are talking about $2½ billion worth of jobs or no jobs from the situation.

The solid fact is the Japanese will proceed on their own and they will build it all by themselves. They will not spend $2½ billion here. They will not coproduce anything here. So it is a plus factor. One can say a small one, given a $55 billion deficit on an annual basis, but it at least is a contribution in a small way to that situation.

The basic reason for the deal, Mr. President, is not commerce and it is not technologies we might obtain, it finally comes down to our reading of history. And, Mr. President, I want to underline this in any way that I can to bring this to the fore in the debate. It is important that we stay together with Japan, that we maintain that alliance, that cooperation, cooperation even to the point of our intrusion into their aircraft industry, our deliberate intrusion, to make certain that this aircraft that is about to be built, state-of-the-art jet fighter, is ours as well as

theirs; that that cooperation continues right through this century, through the 10 years that it is going to take to get some of these aircraft actually off the production lines out into the mission in behalf of both of our countries they are designed to serve.

During the January recess, Mr. President, I had the privilege of visiting a number of countries in Asia and specifically I visited with the Prime Minister of Singapore, Lee Kuan Yew. Lee Kuan Yew and the distinguished President of South Korea, President Roh, both made the same point in a very eloquent way, as did, to a lesser extent, the Prime Minister of Malaysia and Foreign Minister of Thailand. They simply said the presence of the United States of America in the Far East is of the essence if we are going to continue to have the prosperity to which we have become accustomed and if we are going to have military and political security. The United States is the umbrella, it is the glue factor, it is the essential.

They made the point that they are watching carefully our negotiations that will commence this year on bases in the Philipppines and our presence there, which is very important to all of the countries that I have named, in addition to our friends in the Philippines. They are hopeful that the Philippines and the United States will come to an agreement that will make it possible for us to be a presence in that area for some time. They are hopeful that we will continue to fulfill our obligations in Korea and in Japan with a physical presence.

But the point all of them wanted to make was that if, for various reasons, a breakdown of political understanding or simply fatigue on our part that, we are tired of offering the shield of liberty or being the glue factor in the situation—or lack of money, that we have a budget crises, that we need to move people back from countries in the forward lines back to the United States, maybe cut down the size of our Armed Forces altogether, undertake fewer obligations, whatever reason; and they fear any or all of these might be a scenario for the coming decade—they point out that for the moment, Japanese leadership wants the United States of America to provide this shield; Japanese leadership wants to have a limited cooperative role with the United States of America in the defense of these countries as well as of Japan in the Pacific.

Thoughtful Japanese do not want to proceed into a military route. Thoughtful Japanese—even though they are lectured by some folks in America frequently that they ought to do precisely what we are doing, namely, spend 5 percent of gross national product on defense—thoughtful Japanese and thoughtful Americans realize that 5 percent of the growing Japanese GNP would translate into a military juggernaut of very great significance that would change the balances of world military understanding very considerably.

(Mr. BRYAN assumed the Chair.)

Mr. LUGAR. Mr. President, this is one of these cases where if you get your wish, you may want to wish that you get it back again. Out of pique, out of frustration, out of our own financial difficulties, we demand the Japanese do this or that when, in fact, in a sober light we really do not want that to occur, nor does Japanese leadership want that to occur.

The point that I try to make, Mr. President, is that if we move off from the Japanese at this point in history and if, for various reasons, we begin to decide to leave Asia and to say others really need to take care of this situation—burden sharing means just that, we are dropping the load—leaders in Asia say, Mr. President, the Japanese will have to assume that load. They may do so reluctantly, but they will do so. And they have the wherewithall to do so.

At that point it will not be just the independent development of a fighter aircraft on their own. It will be the development of whatever else seems to be appropriate for that defense as leadership, as it evolves, sees that.

I would just say distinguished leaders of other countries in Asia ask the United States, plead with the United States, do not send us back through that wringer of history, at a time in which all parties really would wish to cooperate, would wish in fact to work together as we have a wonderful option of doing so presently.

Our option finally comes down to this, Mr. President. We can stay with our Japanese friends and the FSX offers a good moment in history to make that determination. We can work together as technicians, as coproducers, as people who find out how the mission is to be performed: Joint production, at least 40 percent right here is the United States of America, all of the fruits of the research whatever they may be, and we will come to the end of this century still working with the Japanese together with an American presence, technically, physically in the picture. I believe that would be safer for Japan. I thiunk it will be safer for the United States of America. I think it will be safer for the world.

We could, at this point in our history, out of our anxiety and frustration with the Japanese, say the FSX deal is not a big thing but it offers a moment for us simply to cry in despair that we are tired of the relationship, we think it is going badly, it is going against us. And, in a signal vote, we just want to speak out, send a shot across the bow, of our frustration and our pique. We could do that, Mr. President, but it would be a bad mistake historically. It would be a very terrible mistake in terms of the history of our country.

I am hopeful as this debate evolves, Members will weigh in the balance these important historical relationships and our role in the Pacific, our role in history, our relationship with the Japanese, and will appreciate no agreement is perfection, no agreement is tied down on all four corners. But this is a good agreement for the United States of America, just on its face. It is a vital one in terms of the relationship and the fact that we must not let the drift occur now.

Once that boat leaves the shore, it may be very difficult to recall and there is no need for the separation, as I see it. Mr. President, in due course I will speak more to the issue but for the moment I yield the floor to my colleague.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. SANFORD. I have enjoyed very much the debate of my distinguished colleague, a man whom I have admired for many, many years and I am pleased to be serving with him in the U.S. Senate.

I do not disagree with anything that he has put into the RECORD as part of the presentation of the view that we ought to go forward. I agree with virtually every part of that argument I think, however, there is a far more profound question, a far more profound argument.

I remember, in the Hamlet Railroad switchyards, a question of whether to put this additional few boxcars on a train or not took up a great deal of argument, until computers made the answer more obvious. But the answer is not whether to put another boxcar on. The answer really is what switch to throw. Because it seems to me that the profound question is not what we ought to do in this particular instance, but what we ought to be doing in our overall relationship with a very valued ally.

The distinguished Senator almost threw me off course about what I wanted to talk about, because he raised a question that causes me great fear. It does not have to do with just Japan, but it has to do with our deficit, our debt and our inability to face the problem. He said it does not make any difference whether we have a $100 billion deficit or a $150 billion deficit, we will have to sell bonds. And he quite properly pointed out that the people who buy those bonds can put us in economic jeopardy at almost any point.

We simply have placed ourselves in the vulnerable position that we have to rely on the good will of investors from all over the world. And if those investors get out of sorts with us, if, for example, we do not go along with

building a fighter plane with them, if they feel they do not want to support our bonds, this kind of debt exposes ourselves to added jeopardy.

What I would like to say to the Senator, before I go forward with the discussion under debate, is that I have a little piece of legislation called S. 101. It would give us an honest budget. It is a start toward the reduction of the debt. I point out that the budget we finished yesterday afternoon does not have a $100 billion deficit that might jump to $150 billion. It has in there, in figures, in hard, cold numbers, a deficit of $264 billion, approved by Congress.

We will not have to sell bonds for the $100 billion or $150 billion deficit. We will have to sell bonds next year for a $264 billion deficit.

So, as we look at this minor problem, minor in comparison with our great problems, we have to bring our deficit under control if we are going to deal with any trading partner, and we do not want to find ourselves at the mercy of forces that we cannot bring under control.

But I want to go now to this particular matter.

Mr. LUGAR. Would the Senator yield just for a short comment?

Mr. SANFORD. Certainly.

Mr. LUGAR. I appreciate the Senator's indulgence. Obviously, the Senator is correct, if we have these mountainous deficits and the potential there for others to buy our assets, whether our bonds or factories or what have you, we are in growing jeopardy.

I agree with that entirely and I praise the Senator, whether his bill goes forward or something comparable, that we will get a handle on that.

But I agree what we are discussing here is very, very small in comparison because others will be calling the tune. But I trust in a bipartisan way the Senator's wisdom and his leadership will be helpful in reducing this liability, so we finally come down to a level lie on the deficit and can argue, then, about defense and strategy.

Mr. SANFORD. I knew the Senator was on the side of that particular need in this Nation, and I look forward to working with him.

Mr. President, as I said in my opening sentence, this question we are talking about is far more profound than whether we want to go forward with a particular kind of weapons system. It is an agreement that we are probably going to have, no matter how this body votes. And it is an agreement that probably is sloppy.

But it would not make any difference to me, whether it was sloppy or not, in terms of whether or not we ought to pursue this course. I think there are some very profound reasons that we should not.

Let me lay the groundwork for my own biases and prejudices and points of view. I happen to have participated over the years as Governor and later counseled other Governors and people in North Carolina, to welcome Japanese industry, not only to welcome Japanese industry but to speak to Japan and say: See how you could improve your business if you were in North Carolina.

So, we have a great many Japanese industries in North Carolina, and these industries contribute a great deal to the economy.

We certainly should, under no circumstances in this country—we settled that 100 years ago—let prejudice enter into our thoughts in our public affairs, or even personal dealings, this is an economic matter.

I look at it from a point of view of world economy, and I think that is the way we need to look at our relationship with Japan. We are looking at it because of a particular decision that needs to be made now. But we need to look at this particular decision in the broader sense of our future with Japan.

There have just recently been published three very excellent books aimed at this particular point, where are we going? One is by Karel van Wolferen, a Dutchman, "The Enigma of Japanese Power." Another is written by Chalmers Johnson, "MITI, the Organization of Trade, the Ministry of Trade, and the Japanese Miracle," And the third is written by James Fallows, entitled "Containing Japan."

Throughout my statement I will be citing these works.

James Fallows is the Washington editor of the Atlantic Monthly. He is a Rhodes scholar, a thoughtful person, and an excellent writer. His book was partially summarized by him in the May edition of the Atlantic Monthly. I am satisfied the Senator has doubtless read it and a great many other people have begun to read it, look at it, about the points raised in these three approaches.

I want to summarize a few of his arguments and then, Mr. President, I want this Atlantic Monthly article printed in the RECORD.

Fallows makes this point, first of all, the Japanese-American relationship is unlike our relationship with Great Britain or with Canada or with Germany or any other European countries. Japanese-American relationships, he says, have a fragile walking-on-eggs quality, which makes people think that it is dangerous to talk frankly in public about this relationship.

He writes that the American fraternity of Japan handlers, which includes most diplomats and a number of businessmen, scholars, and journalists, instinctively stifles outright complaints about Japan; we do not want to offend them. We are so afraid that something will happen to this relationship. This indicates that maybe we are not quite as confident as we ought to be about the solidarity of our relationship with Japan. But we must have that kind of solidarity; we must have that kind of willingness to be candid and frank.

He points out, I think, very accurately, excessive politeness prevents Japan and the United States from facing the conflict that in the long run endangers their relations much more than the comments of any bigoted Japan-bashers could, and I think that is true.

There is not any question, as pointed out here, that in the foreseeable future Japan will be America's single-most valuable partner—it is now—because of what it can do in three areas. First is the military. The United States-Japan military understanding is that Japan will not build a big military establishment; that it will leave the Pacific to the United States. This prevents an arms race throughout Asia in which all other countries would try to defend themselves from the Japanese, as the Senator pointed out. We do not want that. They do not want that. Nobody in that area wants that. It violates the agreement we had at the end of the war. And so this is one of the areas where we are cooperating and need to continue to cooperate.

The second area is finance. Japan has become America's financier, providing investment capital and covering much of the United States Government's debt.

And the third area is business. Japanese-American business relations provide technology, markets, talent, supplies, and other essential elements to the benefit of both nations' economies.

So as Fallows now says, these three realities tempt many people, especially American diplomats, to assume a fourth; that Japanese and American interests do not clash in any fundamental way.

He writes what I think is obvious, that this assumption is wrong. There is a basic conflict between Japanese and American interests, notwithstanding is the fact that each country needs the other, notwithstanding is the fact that we are friends indeed.

So, it would be better to face this difference directly than to pretend it does not exist. The conflict arises, as Fallows and several others point out, because of Japan's inability or unwillingness to restrain the one-sided and constructive expansion of its economic power.

The expansion is one-sided because Japanese business does to other countries, including the United States, what Japan will not permit to be done to itself. It is destructive because it will lead to exactly the kind of isolation and ostracism that Japan feels

and fears, because it will recognize the postwar system of free trade that made Japan and many other nations prosperous, and because it will ultimately make the United States-Japanese partnership impossible to sustain.

The Japanese, of course, do not want these results, and when Prime Minister Nakasone was in power, the Government attempted to look at this imbalance, what might be done about it, and how they might go about obtaining a better balance.

Unfortunately, the major threat to America's ability to pay the cost of leadership is Japan's uncontrolled, unbalanced economic growth. They know that and we know that, and to keep a world trade system going, the strongest powers must be willing to make certain sacrifices. One example is keeping Japanese markets open despite domestic political objectives, and they have not been able to do that. Japan's destructive habits are potentially more harmful to the rest of the world than America's bad habits are, and if Japan cannot restrain the excesses of its own economy, then the United States, to save its partnership with Japan, should impose limits from the outside.

Truly we should do it in a diplomatic way. Surely we should do it in a friendly, considerate, understanding way, but we need to help them save themselves save our relationship.

The same country that has the biggest cash surpluses and largest overseas investment in the world, also has the highest consumer prices, the highest proportion of unpaved roads among developed countries, the lowest per capita endowment of parks, sporting areas, and other public facilities. The Japanese life is, across the board, a lesser materially bountiful life.

"The Enigma of Japanese Power" by Wolferen says, "For what ultimate purpose do the Japanese deprive themselves of comfort and risk the enmity of the world?" His answer is that individual Japanese, rather than depriving themselves, are deprived by the country's major power centers, the big corporations and the Government regulators, which are always struggling to keep from losing ground to one another or to foreign competitors.

Chalmers Johnson, "MITI and The Japanese Miracle," points out that an equally obvious indication of imbalance involves trade statistics. Japan's trade is somewhat more balanced than it used to be, and he discusses at great length the effect of the yen and points out ultimately that they predicted by the time the dollar got down to 190 yen, the trade deficit would have disappeared.

The dollar crashed through the 190 level more than 3 years ago and spent most of the past year in the 120's, yet, Japan still has the largest trade surpluses in the world.

In fact, this concept of the high yen has not worked out at all. Japanese companies cut costs and hold down their retail prices to be competitive in the United States, and at the same time, not the Japanese people but the Japanese establishment, hold their prices up in Japan, despite savings on imported supplies, which in effect means penalizing the Japanese consumer to preserve the market share overseas. This is the pattern they call the "47th Street Photo Paradox," that you could buy Japanese products on 47th Street, sell them in Tokyo, and get rich. That is one factor that has kept the economy where it is.

I am going to put this entire article in the RECORD because I think it is important for staff members and Members of Congress to have it available. It is certainly a book that ought to be read.

But an interesting parallel is spelled out here, and that is, the United States was very much in the same position, as Japan after World War II. We had it all. Everything we wanted to make, we could sell. We could have monopolized everything we wanted to monopolize. But what did the United States do that now Japan is not able or not willing to do? My suggestion is that they are willing but not able. What did the United States do? It readily, hurriedly, and deliberately opened its markets to imports. Through the use of the Marshall plan, it helped rebuild foreign factories so that they could produce something for Americans to buy.

In 1947, the United States trade surplus represented 4.5 percent of the GNP. This figure is comparable to Japan's surplus. By 1950, 3 years later, it had been driven down to ½ percent by our deliberate actions made for the good of ourselves, and the good of the world—the good of the world—but the point ought not be missed now, we are talking about for the good of Japan.

At that time it was regarded as a great accomplishment because it opened American markets. It gave Japan a break. It opened markets to Japan.

You will remember that at about that time, the Nakasone government released the Maekawa report, which concluded that they needed to take a step almost as dramatic as the Marshall plan. The report outlined a radical reorientation of Japan's economic structure. No longer would salaried men be admired for toiling 18 hours a day in order to expand Japan's market share. No longer would Japan's standard of living be so far out of line with its paper wealth, and no longer would Japan view its trade surplus as an indication of its superiority over the West.

Japan would then, the report suggested, take its place as a normal capitalist nation producing, but also consuming, and making some advanced products—this, I might emphasize, in response to the Senator—producing but also consuming, making some advanced products, but leaving others for competitors, no longer scrambling desperately to catch up with the West, which in so many ways it had already surpassed.

Well, this was announced, this new plan, by Haruo Maekawa, the former Bank of Japan governor who supervised the study. Everybody was cynical. The questions were, when will it start? Will it ever happen? That was the response, and that has been about all that has happened to it. Because as is pointed out in this article, the zoku—the politicians who support budget increases for their favorite agencies, the informal alliances of government bureaucracies and the military-industrial complex, are simply too influential. The construction zoku, the most lucrative group, protects the industry against foreign competition and divides up public money appropriated by part of the triangle of participants. The Ministry of Agriculture does its best to protect farmers and fishermen against any kind of imports.

They have begun a program of some foreign aid, as the Senator knows, but the difference is that they do it in zoku fashion. They attempt to tie it, so that the purchase orders come back to the complex in Japan. They attempt to relate it to their trade, to their benefit, and, at the same time, they are not really opening their markets. They have looked to us to provide them a lucrative market, as we all know. We provided it. They have not provided us a comparable market, even a relatively comparable market.

But they have done one other thing. We have had to absorb most of the products of the emerging countries around the world. Japan has not done it. We have done it. They have not opened their markets. They have not helped the developing world. I hope now, as I see some changes, that Japan is beginning to take a new look at how foreign aid can be properly expended, not for selfish gain but for the welfare of the country, which, indeed, is the welfare of Japan.

Now, what does this have to do with the particular direct question before us? I have other points to be made, but those points will be well made by this article in the RECORD.

The argument that I have laid out is to make a case for containing Japan's expansion. How do we make that case? What does this particular project have to do with it? Not a great deal, except it is one more indication that they want it all, that they need it all, that they intend to take and embrace all they can. They are not satisfied to let the United States continue to be the leader in the area of aeronautical engineering and construction. They are

unwilling to see that they have something to gain by helping others in their markets. We have done one thing, and I think we can do one more. It is not that large an event. We did pass a trade bill that does say to Japan that we now have the tools, you are going to have to open your markets to us, and you are also going to have to open your markets to the developing world.

That is what that trade bill says. For whatever shortcomings it might have, it is a strong bill that will help us help Japan. I return to the thrust of this article. Japan needs help. They tried to help. They cannot push past their establishment. They need some external force, so we have sent them a signal. They should have received that signal, and they did last fall. This is another signal. I see no reason for the United States to put Japan in a new industry that they ought not to be in to any appreciable extent.

We do not have the capacity to keep them out of it. But we have the capacity to say let us go back to a broad concept of how Japan can be a part of the industrial world, and how you look to the needs of the total economy instead of to the selfish gain of Japan, for the sake of Japan itself.

This is another signal, not a signal that we are worried about, and not a signal that we are afraid of. We should not be afraid of any country in terms of technology. But we have not gone about this in a way that says to Japan that you indeed have to open up your markets. You have to change. You cannot have it all.

I do not think that given this little event we should move in this direction. Once more it says to Japan do it any way, you want to; it will be all right. I think we should say to them we know there are many, many people in Japan who want the system changed and who want their own standard of living increased.

If we are the allies that I think we are, and if they are our allies as they think they are, then we have the obligation, I believe, to say the time has come for change, not because we are talking about one airplane project. We are talking about the whole style of doing business. We are talking about the profound relationship that affects the rest of the world. I think we should do something about it. I think it is an indication that we intend to do what we can to help Japan help itself, if we start by now saying, "wait a minute."

I think we can talk candidly about the needs, the shortcomings and the weaknesses of our great friendship. I think this is simply a small step that will not throw us off course if we go ahead and have the agreement. But whether we have the agreement or not, we should make it our policy to help Japan do what it should do in managing its own economy.

Thank you, Mr. President.

I yield the floor.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I listened with great interest to the distinguished Senator from North Carolina. Certainly his mention of James Fallows' article and his book as well as the Senator's own experience, and interpretation makes a great deal of sense. I am particularly in agreement about the conclusion in the Fallow's book and article that Japan has simply not been able to control its economic power, and the Senator has indicated the FSX agreement we are debating on now is a small part of that problem, but nevertheless it offers us occasion to focus on this relationship, upon the friendship that we have with Japan, as a good friend, and our recognition of the problem that they have.

I say from my own experience that a number of Japanese leaders testified very eloquently on that very point. I recall a member of the Japanese Diet visiting the Senate and saying with a great deal of precision that the dilemma we have is a country that came after World War II with its assets devastated, a country demoralized, and we pulled ourselves up by the bootstraps. We continue to work, and we have never been able to stop.

Indeed, the Maekawa report that Senator SANFORD mentioned was a profound attempt to do something in Japan akin to the Marshall plan to try to change things substantially. Presently Japanese businesses stop for a few holidays. We are told that a significant percentage of Japanese no longer work all day Saturday, that a number of work practices that have been a part of the Japanese ethos before the case are being mooted, especially by young Japanese, people coming up through the schools, and colleges now coming into industry having a different point of view that addresses the question of the distinguished Senator from North Carolina. Why this preoccupation with export, with the material goods piling up all around but not enjoyed by a significant number of Japanese people? On this thought, I am stimulated by the reasoning of the distinguished Senator from North Carolina clearly. For most Japanese the prosperity that we see on the average is not a part of their lives. As the Senator from North Carolina pointed out, one reason it is not a part of their lives is that the structure of Japanese Government and business is to accumulate capital, and to export that capital much to the expense of consumers in Japan.

It has often been argued that if the Japanese ever developed a consumer movement like our own in which the Japanese people demanded a lower price for food for one thing, certainly a lower price for shelter and housing—the predicament for the normal Japanese family is to live in a very small situation that is very expensive, and to pay much more for food than is at all necessary.

A similar situation can be found in South Korea where there is no consumer movement in which a sense of the central government has decreed that saving must occur and saving occurs. It comes out of the hide of the living standards of the people involved. It comes from the development of exports, and in the building up of state power through those exports.

Mr. President, I have no quarrel with the dilemma in the relationship, and it is one that we should not walk on eggs with. We ought to be very candid. As you know, Mr. President, as we have opportunities to visit with members of the Diet as they visit the United States Senate or as Members of the Senate have occasion to visit in Japan, we need to be candid about these things. We need to discuss what the purpose of our governmental policies is, and how we might assume the responsibilities of world leadership that are ours and the strength of the alliance.

But I would have to say in terms of this limited debate on the FSX question, we get back to the admission that whatever occurs is only going to have a miniscule influence on the relationship on the money, and on the structure. I tried to make the point early on that by sticking with the Japanese aircraft industry, by codeveloping, by hanging in there for the next decade as opposed to splitting off at least in a small way, we begin to exercise a degree of control we should not have otherwise.

Even if one buys totally the argument of the distinguished Senator from North Carolina that essentially the Japanese need to have a good friend that says control yourself, that brings your power into bounds, use it productively for the world. Use it for your own people, for your own consumers. I question, Mr. President, who is going to be this good friend, who will be giving these points of advice, if not ourselves, and if not from the inside of the relationship?

Does the Senator from North Carolina really seriously suggest that we are going to have more control over the destiny of Japan and be listened to more seriously by the Japanese if we reject the FSX deal and, in essence, tell the Japanese to go ahead and build the plane, if you can, on your own terms, at your own speed, with your own technology; and in essence out of a fit of pique, we simply want to just say something to you, and we are saying, "goodby," with regard to the

FSX and the aircraft situation, and are hopeful that somehow they will get a message in that that would lead to any of the constructive intent that is part of the argument of the Senator from North Carolina.

I am inclined to believe, Mr. President, by far, a better course is to stay with Japanese friends, keep talking, keep sharing, to keep imbibing in each other's research with regard to this specific project, keep track of what is occurring in the Pacific with regard to defense and diplomatic objectives.

I would just say, Mr. President, I am certain that Japanese friends of the United States feel that way about it. I say that because over the last weekend, Senator BRADLEY, Senator KASSEBAUM, Senator ROCKEFELLER, and I had the privilege of visiting with five leaders of the Japanese Diet.

We talked about many issues. The FSX obviously was one of them, and we asked our Japanese friends, "In the event that this agreement should fail in the Senate or the House or be rejected by our Government, what would be the consequences, as perceived by Japanese leaders, of our rejection?" Well, the Japanese leaders said to us, and I quote not any one of the five, but the collective comments as I jotted them down from that conversation, that if the FSX does not pass the Congress and is not really ratified or stated—I suppose now in the parliamentary condition we are in, if the motion of rejection is not stopped, then this will terminate really the relationship with regard to the aircraft. There will be no business for the United States, no purchase of $2.5 billion worth of business, no sharing of the technology that is involved. In essence, the hopes of those who have a bent in Japan to go it alone will be realized.

Our Japanese friends said they were among those who argued in the Diet that friendship with the United States of America was the most important objective in this, not the development of a Japanese fighter aircraft, but friendship, solidarity with America.

Our friends from the Diet pointed out, at considerable political risk, that they had obtained an appropriation authority which terminated March 31 over very considerable objection from many in Japanese industry and those interested in the military, who said this is the time to break it off, go alone; but our friends in the Japanese Diet gained this appropriation. We could not affirm the agreement President Reagan made by March 31.

So once again, in a precarious way, friends in the Diet kept this in the budget and proceeded with the appropriation, because it would have died March 31, while we were still temporizing about whether an agreement made by President Reagan was still valid. So they kept it in the budget. That budget, as you have read, Mr. President, is a course of great controversy right now in the Diet, as a change in basic leadership is occurring in the Government of Japan. But even in this transition, our friends in Japan have affirmed the changes we wanted that Secretaries Baker and Mosbacher and Cheney and the President have said are needed to perfect this agreement, and the Prime Minister of Japan has affirmed that that will be fine with Japan, and they will go along with that situation.

Now, our friends from Japan also pointed out that the weapons industry in Japan is in a fledgling state of growth, very important for the friendship now with America, to shape how that is to work out in the destiny of Japan. No one knows. It is a source of debate within Japan, as to how they ought to proceed. And to adopt the language of the Senator from North Carolina from his previous speech, that sense of counsel, of advice, being there at least at a point which Japanese attitudes and policies are shaped, that is an important privilege for the United States. We are not going to be able to determine that.

We might say, Mr. President, that we believe the Japanese do not have control of their situation, but we are not going to be able to exercise that control. We are going to have to continue to argue, to advise, to reason, to try to point out the way we think the world works, to be persuasive.

Mr. President, I have great confidence in the ability of our country to do that. We have been persuasive in the basic objectives that we have fostered in this country for the building of democratic institutions, the movement toward market economics. These institutions have been perfected to a very great extent in Japan. They will be perfected some more, as well as a will to take a look at the broader picture of humanity in general. Mention has been made in this debate of our movement into the Marshall plan, at a time in which the United States, after World War II was dominant, 50 percent of the world GNP at that point, an unprecedented hegemony over resources.

In this body and the administration of that time under the bipartisan guidance of President Truman and Senator Arthur Vanderberg of Michigan, a number of bipartisan things came forward, but the Marshall plan was among them, and it was a very important decision. The Maekawa plan of the Japanese might have been a similar one, but as Senator SANFORD pointed out, its implementation has been weak, it barely moved along. All the Japanese friends believe we have not given credit for the movement that has occurred.

In the Marshall plan we came up against the fundamental question of our foreign policy, should we see the world expand, and will we be stronger if the world trade system does expand? Our answer was, yes, we will be stronger, if the rest of the world is stronger, as opposed to husbanding our half of more of the world's resources and saying to the rest of the world, develop if you can; do the best you can, but we are going to keep our 50 percent here.

Stories have pointed out, Mr. President, that because we made the decision for the Marshall plan, our wealth under a per capita basis, in real terms, for every American has increased by approximately four times since World War II; we have become four times as wealthy as we were than when we had half of everything, when now we have barely a quarter of everything.

Others are major players now. As they became major players, they became customers of ours; they became boosters of our industries, and they became part of our wealth. The world is now making a similar argument to Japan; we are making that argument to Japan. We are asking Japan, in the multinational assistance initiative in the Philippines, to make a very substantial contribution of resources, much larger than any we have pledged to make, or even suggested. We are saying to the Japanese that you can play a role in national and international security through your assistance to other countries, in which we both have an objective of helping.

And the Japanese by that agreement, as opposed to building up their military, they are building up their foreign assistance.

Senator SANFORD. is correct that most figures say that 30 percent of that foreign aid is directly tied, almost in barter arrangements, but very closely tied to industries in Japan for enhancement of business. But an increasing percentage is in the form of grants, in the form of development assistance to other countries so they can be stronger and thus better friends but also better customers, people who are more peaceful with regard to ourselves and Japan. That is an important thing.

And the Philippine example offers a forerunner of a good number of things we shall suggest to the Japanese with our experience with the Philippine MAI, which is that they are receptive.

It is in that context that I would argue once again that we need to stick with it, to stay with the Japanese in partnership as opposed to dismissing them to go alone.

The distinguished Senator from North Carolina said that we might be putting Japan in a new industry and it ought not to be with our help that they get there. Of course, my argument has been Japan is heading toward a new industry with or without

us. Conceivably our help might get them there a year or 2 or 5 before they would have gotten there, but I am not confident that is so in the next decade of time.

The growth of the Japanese in industries where they made a concerted push is often rapid.

Our question is simply: Given the fact they are headed there, do we want to be with them, have some degree of cooperation and control, friendship, expertise, interchange throughout the process so we come to the end of that decade still working together as opposed to a very, very strategic mistake, in my judgment, of seeing the Japanese aircraft industry develop all by itself and with no American insight and now a very competitive juggernaut without cooperation, control, or sharing any of the intelligence that was involved?

Finally, Mr. President, I would say that the trade bill that this body passed last year and the final outcome of the Congress with regard to trade is a very important piece of legislation. Even as we have this debate, the trade representative of our country and the offices of Mrs. Hills will be discussing whether Japan has in fact created situations in which the so-called super 301 clause ought to be invoked.

The super 301 clause as a part of the trade bill, and one of the more dramatic parts, simply tries to address are there specific grievances that need to be addressed by a country that is so large and so imbalances our relationship that we need to point them out. Those are the so-called super 301 list of countries that are egregiously out of balance.

Mr. President, even while we are discussing the FSX in cooperation, Mrs. Hills, our trade representative, has listed a long list of ways in which the United States is investigating where the Japanese stand, and we think they do not stand very tall in relationship in that long list that is now under scrutiny. I have no idea of predicting Mr. President, whether Japan will be on the super 301 list with a long list of practices that need to be remedied. But, if so, the trade bill says that we must work with Japan to eliminate those barriers to our exports or those nontariff barriers that are hidden or various other ways in which free and fair trade is controlled and that, in the event that cooperation does not occur over the period of time that is given, then further sanctions will be imposed.

That is part of the law. That is part of the context in which we are discussing the FSX.

This is no blind eye toward deficiencies in the relationship or toward specific malpractices as we perceive them in Japan.

We are heading down the road, Mr. President, during this month, toward those decisions and toward that public either recognition or criticism that is involved. But even in the face of all of that—and it is very important I come back again to this particular agreement as one that is critically important—I believe in the political military sense of our cooperation with a strong ally, with a country that is going to develop an aircraft industry, whether we like it or not, whether we are with it or not, and an agreement that gives us not only a share of the business, 2½ billion dollars' worth, but strong ties of relationships throughout all of this period of time in which there are going to be many other arguments going on with Japan, many other decisions that will be very, very tough to make with Japan. And this particular agreement offers us an avenue whatever is going on industry by industry to continue to pursue this technical and strategic cooperation that I believe is vital to our country and to our history with a very important country.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. Mr. President, first, let me say that I consider it a distinct honor and a privilege to be involved in this debate with the distinguished senior Senator from Indiana who has over the years been an important Senator here and has made a profound contribution to our national interests by his exceptional service in the early to mid eighties as the chairman of the Foreign Relations Committee. He is a fine Senator and a thoughtful man and his point of view is always worthy of our consideration.

I say with every affection for him and with the highest personal regard for his ability and his service here that on this occasion I take exception to his view and find mine not only more acceptable, in my view, to the country as a whole but, in my view, in the best interest of the Nation. But we have this place to discuss these things. Thank God that we live in a great country where even in these matters where we from time to time express in a very passionate way our differences of opinion, we let the majority rule, and go about our business. And it is a great nation as a consequence of that experience, Mr. President.

Now, I want to make some comments. My dear friend and distinguished colleague, Senator FRITZ HOLLINGS of South Carolina, the other day made a speech about the proposed FSX fighter deal which I had an occasion to look at in the RECORD. He is a great Senator and one for whom I have always had the highest regard. I think he is a credit to our side.

He provided on this occasion some very eloquent remarks in the debate on the FSX deal being proposed by the administration. I think Senator HOLLINGS had some very persuasive arguments. Many of those arguments I would agree with, but I do not agree with my colleague in his conclusion that we should give our aerospace technology to the Japanese.

Many years ago, Mr. President, I heard a story about several Americans who were in the photography business, and they were touring a camera plant in Japan. It was a great factory, a very extensive factory, spotlessly clean. All the employees were hard at work, not at all distracted by the visiting Americans. One American kept asking to see the research department. "Later, later," the host kept saying.

As the tour was winding down, the American businessman repeated his request. He said, "Please let us see your research department."

"Very well," said the Japanese hosts. So they led the Americans down into the bowels of the basement. Far back in a tiny corner, almost in a closet, the Americans were shown the research department for this vast camera building complex. And there, in this little closet, sat a tiny, elderly, bewhiskered man in a spotless white smock, holding a pair of calipers in one hand and a German Leica camera in the other.

Now, this story is probably a little farfetched, Mr. President, but it illustrates the point I have been trying to make for weeks and months on our proposed giveaway of American technology to our friends, the Japanese, to build the FSX fighter plane. Because the Japanese researchers will dig out their calipers and copy our technology, technology which the American taxpayer has paid for at a cost, in the case of the F-16 airplane, of approximately $7 billion.

As the administration contemplates this giveaway, Mr. President, all I can think of is that damage of that Japanese researcher in the camera factory with the calipers in the one hand and the German Leica camera in the other.

In this new modern-day example, it will be high-tech scientific equipment on the one hand and American aerospace technology for free in the other.

No way you can cut it, Mr. President, is this, in my view, a good deal for the United States. It is a rotten deal. I think the Lexington newspaper is still correct: The "S" in FSX stands for "sucker."

Senator HOLLINGS talked about history, Mr. President. My good friend talked about American history and about Japanese history. And we must not forget history.

Let me recall what the history teachers used to teach us about Japan in our courses on world civilization, Mr. President. There was a very simple three-word phrase which described the Japanese philosophy of business and trade that has guided the Japanese approach to economic matters 40 or 50 years or more. Those words from my world civilization teacher are emblazened in my memory today. The words which describe the way the Japanese do business are these: adept, adopt, adapt.

Adept, adopt, adapt.

Those words were operative, descriptive, and vital to Japanese policy a half century ago. And nothing has changed, nothing, in the intervening decades. They are still at it and that is why they are so desperate to get our FSX technology. They are adept—adept—at creating a new industry when they choose to do so. They want to adopt our FSX technology and they will adapt that technology to their own needs.

Worse than that, however, they will adapt that technology in such a way that they will certainly create an entire new aerospace industry in Japan which will be in direct competition with ours here in America. It will be a repeat of the Japanese invasion of the American automobile industry. We are still reeling from that debacle, Mr. President. And this new Japanese enterprise, based on the principles of adept, adopt, adapt, may prove to be even more disastrous.

Why can my colleagues not see this disaster coming? It is so clear to me. My teacher from world civilization would understand what I am talking about. What does it take, I wonder, to get others to understand in this place?

I think the country understands. The mail, the phone calls, the participation on the radio and television call-in shows all over America show a passion beyond the understanding, I think, of the Senate; a forceful opposition to what the administration wants to do in this negotiated FSX deal.

Let us take a close look at several issues surrounding this proposed FSX agreement again. Proponents say that the F-16 has been coproduced in eight other countries since 1979 so why should not our Japanese allies do the same? Mr. President, coproduction is not the same as codevelopment. This is our first attempt at codevelopment of a fighter airplane with any other country in the world and are proposing to do it with the Japanese.

We will be helping our fiercest trading competitor build a top-notch aerospace industry and we will be creating a competitor, which is not the case with any of those other countries.

Just think of it. The other countries we have coproduction with, eight countries we have coproduction with, none of which will become a fierce competitor and now we want to go into codevelopment with the one country that is absolutely certain to be the fiercest competitor on the globe.

Proponents keep saying that the F-16 technology we are providing is old technology. But it is not old if you do not have it to begin with. And I want to say this about that technology once again: This F-16 aircraft is the finest fighting aircraft in the world. Fifty times in the world at large in hostile situations this F-16 aircraft has proven it is the best in the world because it has 50 kills without a loss.

In addition to that, in addition to getting battle-proven technology, this proposed deal will give the Japanese an ability that they do not now have: The knowledge to develop and to integrate a sophisticated military system.

Supporters of this deal say there are no commercial applications for this technology but the Japanese have other ideas. When Mitsubishi Heavy Industries, the prime FSX contractor, completed a production line of F-15's, they immediately began using many of the same technologies from that F-15, originally developed by McDonnell Douglas, in producing their own MU-300 Diamond commerical jet.

So they have done it before. The evidence is there.

According to a 1982 General Accounting Office report, the Japanese Ministry of International Trade and Industry believes there are commercial spinoffs from developing military aircraft.

Some aerospace observers claim that to remain competitive, firms need codevelopment programs to benefit from technological advances, to capture market shares and to cut development costs. Proponents say that we will not have access to new Japanese technology if this deal does not proceed. However, Japan entered into an agreement with the United States in 1983 that called for our access to their technology.

Besides, what known technology do they have to give us, Mr. President? Nothing, according to the General Accounting Office, which has recently reviewed the technologies that the Japanese have been touting. I want to get back to this again, this threadbare argument, Mr. President, this, I say, facetious argument, that we are going to get back something in return.

The administration embraces passionately the idea that we are going to get back two wonderful technologies: Composite wing technology and advanced radar technology. But the General Accounting Office in every hearing we have held has said that their composite wing technology is inferior to ours. We have been doing more with it for years. And the truth is, Mr. President, that many of our aircraft people are ahead in composite wing technology now.

To suggest that America will gain is not so. The best composite wing technology now known, the most advanced now known, and the only technology employed in flying aircraft in wings now, is American technology developed by Americans in American industry with American scientists and American working people.

The radar technology? The General Accounting Office says that their technology is about equivalent to our 1983 radar technology. And the proof of that is that they buy our AEGIS technology at great price.

The interesting point about that, Mr. President, is they buy the AEGIS, but they do not buy the ships.

My distinguished colleagues from Mississippi and Louisiana will be the first to tell you about that. My friend from Louisiana, I think I am right about this—my friend from Louisiana, the distinguished senior Senator from Louisiana, Senator BENNETT JOHNSTON was on this floor only within the last year, saying, essentially, on behalf of the people of Louisiana: You buy our best stuff, and you will not take the rest, you will not take the ship, you just want the AEGIS radar technology.

I supported him. Sadly he did not get many votes. But he was right. And that is just another example.

There are thousands of these examples.

Another argument is that the Japanese will go it alone or they will turn to the Europeans for assistance. Well, they probably would build their own aircraft if they could, but they have a poor track record in military aviation, Mr. President. Osamu Kaihara, and I hope Mr. Kaihara has had his name pronounced correctly by this Senator, a former Japan Defense Agency Defense Policy Bureau Director, has stated that Japan simply cannot develop FSX alone.

If the Japanese turn to the Europeans, which I think is highly unlikely, well, then, let the Europeans provide for Japan's defense. Let them open the Persian Gulf. Let them defend their island.

Mr. President, in the Subcommittee on Readiness, Sustainability and Support of the Senate Armed Services Committee that I have the honor of chairing every year, we authorized funding for all kinds of things in Japan, for quality of life and other things for our people over there, who are defending that nation.

Mr. President, this FSX issue is part of a much larger and complex economic and military relationship that we have with Japan. Until recently our military relationship with Japan has overshadowed our economic interests. But this cannot continue. We have a negative trade imbalance with the Japanese and last year they received

$55 billion more from us than we obtained from them; and this has been the pattern for years and we have lost hundreds of thousands of good paying jobs in the automobile industry and thousands more in high-technology industries such as the semiconductor and television industries. Clearly this cannot be sustained indefinitely.

(Mr. ROBB assumed the chair.)

Mr. DIXON. Why do they not buy it off the shelf? They say it is for their national defense; it will take them 6 or 7 years to get the FSX on line using our technology, and if they want to defend their island, they can get the F-16 off the shelf and defend themselves now. Why do they not do that?

At the same time, they reduce our trade imbalance with their country to the delight of Americans, the appreciation of Americans. They would accomplish a great deal to improve the attitudes that exist in these two nations. Just think of this, Mr. President: The world's largest debtor nation, the United States of America, is providing for the defense of the world's largest creditor, Japan. We have to address this balance. There is no better place to start than right now with the FSX.

I am talking about the commercial aspects of this deal, the economic aspects of this and my friend, Senator LUGAR, knows one of the great spokesmen on their side over the years who made a magnificient contribution in the trade bill that we passed, the distinguished senior Senator from Missouri. He has said to us, and we already knew it, that Commerce was not involved in the negotiating process at all until this administration came into power. What I am referring to here is this massive trade deficit, the fact that they have been eating our lunch for decades, eating our lunch, and yet we do not have Commerce in on the deal. Defense and State, the military-industrial complex. But Commerce was not involved. Commerce finally got a fingerprint on it after this administration came in January. I give them credit, and I give Secretary of Commerce, Secretary Mosbacher, and I give the International Trade Representative, and I give high marks to all the people there who were involved for differing with what had been done. If they had gotten us a deal you and I could live with, that would be great, but they did not. They did their best and muddled around the edges a little bit and did some cosmetic-type surgery, pulled in a wrinkle or two. Same bum deal. The "S" in FSX still stands for sucker.

Clyde Prestowitz wrote an article in the Chicago Tribune on May 5 analyzing the whole issue. It is in the RECORD for my colleagues and friends to look at. It says same deal; essentially the same deal.

Seven billion dollars' worth of technology that every American taxpayer paid for is being given to them for $400 million and nothing in return. Composite wing technology may flow back but we have better technology. Radar may flow back yet they have only 1983 level technology. They are buying our technology stuff. Boy, that is a deal. And then trying to sell the public that this is going to be a good deal because we get 40 percent of the value of the work.

I hope everybody understands, in the first place, the MOU, the memorandum of understanding only talks about a solid 40 percent on the first six planes built. On the rest there has to be a separate memorandum of understanding. They will say we will try to make it approximately 40 percent. Let me tell you something, there is no track record in the world to show they will keep their word on that. There is a Japanese newspaper article that says they are already trying to get out of that. Let me tell you when they got us a little bit pregnant with this deal with the building of the first six airplanes, we will take what we can get and thank them for it, and we will get nothing to speak of for it.

On the engines, the St. Louis Post Dispatch, a great newspaper in my part of the world—I come from Belleville, IL, Mr. President, right across the river, and I read that newspaper—it said in an editorial, well, it will probably be all right if we can get the engines. The first six engines are either going to be Pratt & Whitney or General Electric engines. After that there is nothing in this current understanding that spells out what will happen with the engines during co-production. But you can bet we will share the production of those engines.

I cannot remember the name of my favorite town in New Jersey. "Persippanus"? That is not the name of the town and it is not parsimonius either. I know what parsimonius is. I wish my friend, Senator LAUTENBERG, from New Jersey was here. That nice little town of 30,000 to 40,000 in New Jersey. Parsippany. Parsippany, NJ. A town of 30,000 or 40,000 people. They have a company what makes prepreg. The President might have been in the Chair when we talked about that town yesterday.

I wonder if my dear colleague fishes from time to time because with prepreg you can make fishing rods. I confess to playing a little golf, not as good as the Vice President and not as good as the distinguished chairman of the Armed Services Committee, but I play some golf from time to time, and they make golf shafts. They also make composite material that goes into the F-16 airplane.

I do not understand it fully, Mr. President, and I do not mean to imply that I do. But these good folks in that fine town in New Jersey work for a company that makes a fine American product for the F-16 American fighting airplane, the finest fighting aircraft in the world. But will that company make it now? No.

The New York Times of May 10, 1989, says that Mitsubishi has already told them they will not be involved in the production of parts for the FSX because the Japanese are going to have one of their conglomerates make it. The Japanese have not made it very well up until now, but now they are going to learn how since they will have our F-16. Mr. President, U.S. jobs are being lost on this deal.

Mr. President, we should scrap this deal. We should return to the negotiating table with the same high level resolve that we showed in persuading Israel not to build the Lavi fighter aircraft. If we do not, Mr. President, a tiny, elderly and bewhiskered man with calipers and camera in hand will be waiting in the research department to eat our lunch once more.

Here is the only other codevelopment we ever talked about. Our friends, the Israelis. Who are better friends of ours than the Israelis? I do not care if you disagree with everything they have ever done. That is not the issue. As friends come and as friends go, you show me two other countries in the world, other than Israel and the United Kingdom, that stand with us when it is tough. Man, they are there on the days when you have to put up the chips and bet it all; they are there. They do not say you cannot bring your nuclear ship into our port. They do not say you cannot fly your airplane through our air space. No, sir; they say, "When do you want to get down there and grovel? We are with you." But when they wanted to codevelop a fighter with us, we could not let them.

These are articles I am going to print in the RECORD: "U.S. Steps Up Efforts To Get Israel to Scrap Jet Project." "U.S. Jolted By Israeli Vote Urges Warplanes Cancellation." "Controversial Israeli Jet Inferior to U.S. Aircraft, Weinberger Says." "U.S. Pressing Israelis To Drop Costly Jet Effort." And, finally, we won. Poor little Israel. What were they going to do? We just beat on them and beat on them, and they said, "OK, give up." So, "Israelis Will Scrap Costly Warplane Project."

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 11, 1987]

U.S. IS PRESSING ISRAELIS TO DROP COSTLY JET EFFORT

(By Michael R. Gordon)

WASHINGTON, August 11.—The United States urged Israel today to scrap its costly program to produce a new jet fighter known as the Lavi.

The American statement came as the Israeli Cabinet neared a decision on the fate of the fighter, which has been under devel-

opment primarily with American financial aid.

The jet has proved considerably more costly than Israel had estimated.

"Given the budgetary realities we and Israel face, we believe a decision by Israel to terminate the Lavi would be in the interest of both our countries," the State Department spokesman, Charles E. Redman, said.

HALF A BILLION YEARLY FOR PLANE

The United States has already contributed about $1.5 billion toward the plane, which is being built in Israel with the participation of American companies.

Officials here contend that the program is too expensive and should be abandoned so Israel can spend its funds on other weapons.

[From the Los Angeles Times, Feb. 19, 1987]

CONTROVERSIAL ISRAELI JET INFERIOR TO U.S. AIRCRAFT, WEINBERGER SAYS

WASHINGTON.—A congressional agency reports it will cost Israel $1 billion a year beginning in 1990 to produce the Lavi fighter-bomber, sources said Wednesday, and Defense Secretary Caspar W. Weinberger termed the plane inferior to U.S. aircraft.

The report by the General Accounting Office, the investigative arm of Congress, supported Pentagon assertions that Israeli expenditures on the F-16 look-alike will consume too much of the $1.8 billion in U.S. military aid granted annually, leaving little for other major weapons purchasers, the sources said.

Israel is on the verge of deciding whether to proceed with production of the Lavi jet, which it estimated would cost $550 million a year to build. One source said the GAO report "might have some effect" on its decision.

ENTIRELY THEIR BUSINESS

Testifying before the House Foreign Affairs Committee, Weinberger for the first time publicly criticized the Lavi and Israel's plans to manufacture it, saying U.S. military aid to the Jewish state could be put to better use.

"If the Israelis wish to build an airplane that's inferior to the one they've already bought from us, that's entirely their business," he said. "We don't think they should use United States military assistance funds that are designed to strengthen their military in ways that will not strengthen their military."

Israel has bought U.S.-built F-15 and F-16 fighters.

The unclassified GAO report was requested in June by Rep. Lee H. Hamilton (D-Ind.), chairman of a House Foreign Affairs subcommittee.

Sources said he is holding up its release until Monday because of Israeli Prime Minister Yitzhak Shamir's visit to Washington this week. Shamir is to meet today with Weinberger. A subcommittee staff member declined to say why the report was being withheld.

ISRAEL'S COST ESTIMATE

The government-owned Israel Aircraft Industries seeks to build 300 Lavis for the Israeli air force and estimated that each plane would cost $15.5 million. A Pentagon analysis put the cost at $22.1 million. The GAO said it would be $17.8 million, sources said.

"We think the GAO figures are wrong and ours are right," Weinberger told the House panel. It is "just too expensive an airplane."

Further, the report said that annual costs for the plane would reach $1 billion in 1990 and increase to $1.4 billion by the year 2000, the sources said, confirming figures that first appeared in Defense Week, an industry newsletter.

[From the Washington Post, Aug. 12, 1987]

U.S. JOLTED BY ISRAELI VOTE, URGES WARPLANE'S CANCELLATION

The Reagan administration, jolted by an Israeli parliamentary vote backing the Lavi warplane, yesterday urged the Jerusalem government to cancel the controversial aircraft, which has become so expensive that it cannot be financed without crimping other vital Israeli defense projects.

Although U.S. criticism of Israel's plan to design and produce its own high-performance warplane is not new, recent developments in Washington and Jerusalem seem to be pointing toward a rare confrontation between the United States and its closest Mideast ally.

Almost all the money for the project comes from the United States in the form of military aid. About $1.5 billion has been spent so far and, according to the latest estimates, the production of 300 Lavis would cost the American taxpayer $2.5 billion more than the tab for supplying Israel with the same number of U.S.-produced F16 jets.

On Sunday, the Israeli Knesset endorsed the plan. Although the parliamentary action is not binding, the 20-to-6 vote with three abstentions increased prospects for the project in advance of the Cabinet's decision, which is expected Sunday, on whether to continue or scrap the airplane.

[From the Christian Science Monitor, Jan. 9, 1987]

U.S. STEPS UP EFFORTS TO GET ISRAEL TO SCRAP JET PROJECT

(By Mary Curtius)

TEL AVIV.—The war between Israel and the United States over the future of Israel's multi-billion dollar Lavi jet-fighter project has escalated, only days after the first Lavi prototype's maiden flight.

In the past year, the Reagan administration has stepped up criticism of the Lavi and is now publicly pressuring Israel to abandon the costly project. On a just-ended visit to Israel, a US Defense Department team offered Israel what it said were several less costly alternatives.

American officials here admit that their battle to woo Israel from the Lavi is an uphill one, acknowledging a reluctance of any Israeli government to take the politically explosive decision to end the plane's development.

Killing the project would throw thousands of technicians out of work—in a nation extremely sensitive to unemployment and already suffering from a brain drain. The Lavi's supporters include its producer, Israel Aircraft Industries, Israel's largest single employer.

The project also is defended by Prime Minister Yitzhak Shamir and Foreign Minister Shimon Peres, both of whom have described it as a "national project."

Not only is the project vital to Israel's defense and technological advancement, its backers say, but its completion is inexptricably linked to national pride. Mr. Peres has likened Israel's pursuit of the project to the US's exploration of space.

Israel began developing the Lavi in 1974 and hopes to start producing it in 1992. More than $1.2 billion—most of it in US aid—has so far been spent on the state-of-the-art fighter plane. The annual $550 million development costs come out of US military grants to Israel.

Critics note that the Lavi's Dec. 31 maiden flight was three months behind schedule. But even they say that bringing a prototype of such a sophisticated jet to the test-flight stage is impressive. The plane made a second test flight Thursday.

[From the Washington Times]

ISRAELIS WILL SCRAP COSTLY WARPLANE PROJECT

(By Andrew Meisels)

JERUSALEM.—The Israeli government decided yesterday to give up development and production of the Lavi warplane—the most ambitious and the most expensive project in the nation's history.

In its place, the government accepted a U.S. proposal for co-production of the American F-16. And it vowed to press for an Israeli role in the development and production of an advanced F-16, dubbed "Agile Falcon."

The United States has promised to consider the issue. Israel wants a role in the project to keep its aeronautical technology at a high level.

An Israeli government source said that since Israel had given in to Washington's repeated calls for scrapping the Lavi, it expects a "sympathetic hearing" when the matter of cooperation on Agile Falcon comes up in talks between Israeli and American defense specialists next month.

Dov S. Zakheim, former deputy under-secretary of defense for planning and resources, who led the Pentagon's study team on the Lavi project last year, said: "This is a courageous decision by the Israeli government. It was in Israel's national security interest to do what it did. And there are no losers, only winners."

The government decision to ground the Lavi was reached by the slightest possible margin. Health Minister Shoshanna Arbelli-Almozlino, a supporter of the Lavi, came under intense pressure from her Labor Party to change her vote.

She gave in and abstained, thus bringing the Lavi down by a vote of 12 to 11. Immediately after the vote, Mrs. Arbelli-Almozlino ran from the government meeting and burst into tears.

One source said: "[Prime Minister Yitzhak] Shamir thought he had the votes [to keep the project going], but he miscalculated."

Minister without Portfolio Moshe Arens of the Likud, himself an aeronautical engineer and considered by many the "father" of the Lavi project, announced that he would resign.

"I cannot be a partner to this tragic decision," the U.S.-educated Mr. Arens, a former defense minister and former Israeli ambassador to Washington, told his fellow ministers. "It would be a betrayal of what I believe."

Likud ministers, headed by Prime Minister Shamir, immediately began trying to convince Mr. Arens not to leave the government.

When the government decision to scrap the Lavi became known, workers at the Israel Aircraft Industries (IAI) in Lod streamed out of the plant and blocked the highway in a spontaneous demonstration of their fury.

Leaders of the IAI works committee talked the workers into ending the demonstration, but they said they "could not be responsible" for what the workers might do

in the future. And they said organized protests against the decision would be stepped up.

Thousands of IAI employees will lose their jobs as the result of the decision. The works committee says 5,000 will be fired, the government says about 2,000.

The government said $100 million a year will be invested in IAI, to continue developing avionic systems and for other defense projects.

To date, $1.5 billion has been spent on the Lavi project, which has been plagued by massive cost overruns. The project has eaten up a good part of the $1.8 billion in annual U.S. military aid to this country.

The Reagan administration has been urging Israel to abandon the project, warning that it would not increase its aid in order to fund the Lavi.

On the eve of yesterday's government meeting, U.S. Ambassador Thomas Pickering circulated a letter from the administration among top Israeli ministers, again calling on them to give up the Lavi.

In a 10-point memorandum, Mr. Pickering promised that Washington would help Israel enhance its existing research and development infrastructure. It offered to continue helping Israel finance test flights of the Lavi prototype to develop avionic systems.

The memorandum offered to let Israel convert up to $400 million of U.S. aid into Israeli shekels for use in the local development of weapons systems other than the Lavi, and to cover the costs of cancelling the project.

Mr. DIXON. Mr. President, Japan is the only country in the world that will come away from the negotiation table with us 100 percent of the time with 100 percent of what was on the table. Absolutely without fail. It is a remarkable thing, absolutely remarkable.

Mr. President, this great debate is going on at a time when we are about to look at what has happened under super-301. Here is a partial list, only a partial list—this is not all of it—of Japanese products that may be subjected to higher tariffs and duty increases because, through either subsidization or dumping, they violate trade agreements the Japanese made with the United States. Telecommunications switching apparatus; telephone sets; cellular phones; telephonic equipment—parts, modems, datasets; telephone answering machines; third-party radio transceivers and parts; radio-paging receivers; optical fibers and cables; large-size flat panel display screens; communication satellites; satellite signal apparatus; other telephonic apparatus; and parts relating to all of the above. Semiconductor manufacturing equipment and parts—microlithography, automatic test equipment, assembly equipment; semiconductors. Oh, boy, did we get a deal in semiconductors with them one time. Was that not a honey. That was a deal. They were going to give us 20 percent of the market; only after they had the deal, they even denied they had a deal. We really got hoodwinked on that one. That was a beauty there, semiconductors. That was a honey.

Aluminum nitride powders and fabricated components; high-frequency quartz crystals, cosmetics; certain high-speed photocopiers; minivans. Security alarm systems, burglar; radar detectors for motor vehicles. Tron-based equipment and softwear; and parts for all of the above.

And that's just part of the list. I did not have time to copy a whole lot. The list I just read from is about an inch thick.

I guess we might as well give them the commercial aircraft and aerospace industry too, Mr. President. It is all we have left. It is all we have left.

Allow me to read a letter to me dated today from House Members of both political persuasions.

DEAR SENATOR DIXON: We are writing to you to express our strong support for your resolution of disapproval of the FSX fighter aircraft agreement between the United States and Japan.

Despite the negotiated modifications made to the original agreement, we continue to have serious objections to the FSX agreement in principle, and to the specific agreement itself.

The FSX agreement should never have been signed. It is a bad deal from many standpoints, especially trade and technology transfer. The United States leads the world in the aerospace industry. We made the best planes at the best price. The Japanese have often said that if the U.S. would only make competitive products, we would be able to sell in their market.

Do you remember them saying that? Oh, if the United States would only make a competitive product, we would buy it.

How many thousand times have I heard them say it. "The reason your products can't get in here is you don't make a better product at a cheaper price than us." Yet the F-16 is a better product at a cheaper price—$30 million an airplane cheaper—and they do not want it.

Yet they refuse to purchase our F-16s off the shelf.

It is in both our countries' interests to overturn this agreement. Last year, the United States suffered a trade deficit with Japan of more than $50 billion. If the Japanese are serious about addressing this trade imbalance, there would be no better way to make a dent in this deficit than by purchasing our planes.

The Japanese have targeted the aerospace industry as their next field of international conquest, just as in previous years they targeted automobiles, consumer electronics, and semiconductors. The FSX deal facilitates their entry into the sector, and hastens the day when our dominance and huge trade surplus in aerospace vanishes like it has in these other sectors.

We stand ready to work with you in any way possible to pass the resolution of disapproval of the FSX deal.

Yours very truly.

This letter is signed by 61 Members of the House.

I ask unanimous consent to print it in the RECORD, Mr. President.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

COSIGNERS OF MAY 12, 1989, LETTER TO SENATOR ALAN J. DIXON

Richard A. Gephardt, Mel Levine, Martin Lancaster, Pat Williams, Lane Evans, Dan Glickman, Jim Traficant, William Ford, Terry Bruce, Tim Johnson, William Lipinski, Bob Torricelli, Claude Harris, Dennis Eckart, Bruce Morrison, Sandy Levin, Tony Coelho, Ed Jenkins, Ronnie Flippo, Greg Laughlin, Marvin Leath, David Bonior, Norman Mineta, Brian Donnelly, John Bryant, Jimmy Hayes, Bill Richardson, Mike Synar, Marcy Kaptur, Dave Obey, Duncan Hunter.

Helen Delich Bentley, Bob Carr, Jerry Costello, Jim Bilbray, Tom Lewis, Craig Jones, Richard Neal, Tom Luken, George Sangmeister, Nick Rahall, Jim Jontz, Michael McNulty, Dan Burton, Frank Guarini, Dennis Hertel, Bill Whittaker, Glenn English, Sam Gibbons, Roy Dyson, Dick Durbin, Don Pease, Henry Waxman, Jim Florio, Bob Wise, Carl Perkins, Jim Bates, Mike Espy, Charlie Rose, Bill Hughes, John Dingell.

I am going to conclude for a minute, because one of the people I love around this place is the great, kind judge in Alabama who served with such marvelous distinction on the supreme court in the sovereign State of Alabama, and who I know is going to bless us with his knowledge about some subject matter. I do not know what it is, but whatever it is, when he has completed his statement, each of our minds will be more enlarged by the views he will express.

I yield the floor.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Illinois [Mr. DIXON].

Mr. DIXON. Mr. President, I think others are prepared to come over here to be involved in the debate. We had an indication that Senator D'AMATO would be here about 1 o'clock.

If there are any other Senators who care to come over here, I would urge them to come over in this window of opportunity that exists right now until 1 o'clock, because I think the distinguished senior Senator from Indiana and the Senator from Illinois have been venting their spleen, unless you have something else you would like to say, Senator.

The PRESIDING OFFICER. The Chair recognizes the Senator from Indiana [Mr. LUGAR].

Mr. LUGAR. I would join my colleague in inviting the Senators to come to the floor. This is a good opportunity. As the Chair is aware, attempts are being made by the leadership to see if the agreement can come to vote on Tuesday, so there will be additional opportunities to debate the issue on Tuesday. But those opportunities are certainly abundant today, as the Chair would observe.

I would like to take this moment, while we are awaiting the presence of

other Senators, to respond to the eloquence of my colleague from Illinois.

Senator DIXON essentially said the Japanese refused to buy the F-16 off the shelf, refused to help out our balance-of-payments problem in that way, which, obviously, if they made that purchase, they could evidence the good faith in that way. In other words, they refused to make a dent in this huge $55 billion deficit we have with the Japanese.

Mr. President, I think we just have to repeat the thought that the Japanese do not want the F-16. We wish that they did. We attempted to sell the F-16 to the Japanese. This is not their requirement. They are looking for an aircraft to be utilized in the year 1999 or thereafter, which meets the objective of patroling a thousand miles off the Japanese shore and has other aspects that are useful to the United States in our alliance with Japan, in addition to being useful to Japan's own defense mission. The F-16, in their judgment, does not fulfill those requirements.

Furthermore, the Japanese believe that after coproduction and the discoveries of the coming decade, they will have a better aircraft, 10 years from now, than the F-16 technology, which is a remarkable aircraft, but simply not the one that they want to buy. We can continue to argue here that whether they want the aircraft or not, whether it fits their requirements, whether it really is the best defense for Japan and the United States, they ought to buy it, and that this simply is an act of good faith in giving us the business; but that is not persuasive to the Japanese or really very logical to most Americans.

I simply say, Mr. President, that the Japanese do not want the F-16, which is about 2½ billion dollars worth of business. That is the point I think the Senator from Illinois is making. They do want to buy 2½ billion dollars worth of the FSX.

In terms of the dent in the balance of payments, there is no difference in the two deals. I think that is simply important for all Americans to recognize. We are going to get 2.5 billion dollars worth of business; and it will not be the F-16; it will be the FSX, an aircraft the Japanese want. We may find it useful to help coproduce for our own military benefits and our own intelligence.

I suggest that my distinguished colleague from Illinois, when he states that in absolute terms, he said "Absolutely, without fail when we negotiate with the Japanese, they take away 100 percent every time, everything." The Senator makes the point that the Japanese have been good negotiators. Perhaps we should have been better. But I mention, Mr. President, in this particular deal, I believe our negotiators have done very well. We started from the point at which the Japanese did not want to discuss the issue at all. They wanted to build the plane. We have come to a point at which we have insisted that we discuss it. We have insisted that we coproduce it. We have insisted they give us 2.5 billion dollars worth of business, as opposed to zero. We have insisted that we share in all of the technology that they have now in this regard, the fighter aircraft, and everything that will come. I think we have negotiated well.

The Senator from Illinois has paid tribute to the incumbent Secretary of Commerce, Mr. Mosbacher and indicated that he has come into the debate, had made a useful contribution, and I would affirm that. I would say that Mr. Mosbacher and Mr. Eagleburger and Mr. Cheney as they appeared before the Foreign Relations Committee, all said that none of them had any part of the negotiation of this in the last administration. They really had no advocacy for this at all. They came to the agreement. They have made a difference in the agreement. They believe that the agreement is in the best interest of the United States of America, quite apart from the importance of the United States-Japanese relationship.

They do not approach it from the standpoint that these three Secretaries of Commerce, State, and Defense, gave away the store, 100 percent of everything. They did not lose it. As a matter of fact, they gained it. There are very substantial beneifts, in my judgment, for the United States of America.

I want to address the technical points that the Senator from Illinois has mentioned, and he has cited a distinguished American, Clyde Prestowitz, who has written a great deal about the subject of our trade with Japan, who found considerable deficiencies and is persuasive. I am persuaded in many of the arguments that Clyde Prestowitz has made in his book. When it comes to the FSX, it seems to me that the better part of the argument with Mr. Prestowitz comes in the rejoinder by Frank Carlucci, the former Secretary of Defense, during the latter part of the Reagan administration. Carlucci starts by hitting head on the question raised by the distinguished Senator from Illinois. Carlucci says, "The U.S. Government is not giving away the store to Japan."

On January 29, Clyde Prestowitz, author of the Outlook article, "Giving Japan a Handout," "Why fork over $7 billion in aircraft technology, conjured up images of a multibillion dollar giveaway and a misleading portrayal of the recently concluded United States agreement with Japan to develop the next generation support fighter aircraft. In fact, this bilateral arrangement makes good sense for both American industry and U.S. defense interests." Carlucci says, "Prestowitz makes three principal complaints regarding the FSX project. First, he said that the resources Japan is devoting to FSX could better be spent on immediate procurement of U.S. warplanes, and the project is thus needlessly adding to an inequitably heavy burden in defending a freeloading Japan."

Secondly, he charges that U.S. negotiators in government and industry failed to consider the project's long-term impact on U.S. industrial competitiveness. His third claim is that the government and industry have pledged to transfer expensive technology to Japan for an insignificant return.

To this Carlucci said:

All of these arguments are factually wrong and analytically flawed. They reflect an image of Japanese negotiators as supermen and an equally unhealthy view that assumes America cannot hold its own at the negotiation table.

The fact is that Japan currently spends more dollars on defense than traditional allies such as Britain, France and West Germany. To deal with the formidable Soviet presence in the northwest Pacific, the Japanese will have 60 destroyers in their maritime Self-Defense Force by 1990, including two with the "Aegis" air defense system. By way of comparison, the United States at present has approximately 25 destroyers in the 7th Fleet.

Carlucci goes on:

No one familiar with these and other realities could regard Japan as a militarily insignificant client state to which America can dictate its wishes. Japan remains a strong friend and ally that has done more in recent years to improve its own defense capability than any other U.S. ally, and it continues to chart substantial progress for the future. It is within this framework that the FS-X program must be viewed.

The long-term competitive posture of U.S. industry and the trade balance will both be enhanced by the FS-X project and similar programs.

Carlucci said:

Mr. Prestowitz says that the United States has invested $5 billion to $7 billion in developing and refining the F-16.

I cite that figure, Mr. President, because that is often the figure used by those who say $7 billion is about to be given to the Japanese for a pittance.

Carlucci states:

That number bears no relation to this project, as it includes an array of technologies that will not be transferred to Japan under the FS-X agreement. He also failed to mention that the F-16 has been coproduced, to varying extents, in eight other countries since 1979, and in its present form does not represent leading-edge U.S. technology. There will be absolutely no U.S. advanced tactical fighter (so-called ATF) technology involved in building the FS-X.

Similarly, there are no technological spinoffs from the F-16 that Japan could apply to the wide-bodied commercial aircraft industry, since there are significant differences between specialized fighter planes and commercial jets. Export controls in the FS-X agreement as well as long-standing Japanese government policy prohibiting the export of weapons preclude Japan from

using the F-16, F-16 technology or the FS-X to compete abroad with U.S. aircraft manufacturers.

Finally:

Mr. Prestowitz insists that Japan should purchase off-the-shelf U.S. aircraft immediately to meet its defense needs. Regardless of his views, the government of Japan simply does not agree, and indeed, has not made such an off-the-shelf purchase since 1955. Japan has concluded that a significantly improved FS-X, rather than an off-the-shelf product, will afford it the best means for containing the Soviet threat in the mid-1990s.

I make these points Mr. President, because, first of all, we are not giving away $7 billion worth of technology. We are not giving away leading edge technology in any event. We have already coproduced the plane many times before with eight other countries, and my distinguished colleague from Illinois finds it lamentable that it did not proceed with Israel as all of us do.

I suspect that is of us who favor the Lavi project and voted for this, consistently regret that it did not work out. But one basic difference, Mr. President, is that unlike the FSX situation in which Japan will be paying for the codevelopment, finally giving us $2½ billion worth of business, the Lavi situation was one in which our contribution was substantially more than $1½ billion. By far the largest portion of development came down to a question of whether funds used on the Lavi were better spent in the joint Israel-United States defense projects on something else, and Israel determined "on something else" was the proper answer given the fact that resources were not infinite in terms of assistance to Israel.

So I make that point, Mr. President, because I suspect we get back once again to the fundamental issue of our relationship with Japan.

I agree with my distinguished colleague that the trade balance is unacceptable. I have earlier outlined today the Japanese attitude with regard to the rest of the world mercantilist, aggressive, pulling together of capital, literally a starving of the consumer. A pushing of this on the world is not a good posture.

Senator SANFORD earlier on today raised the question why do the Japanese want to accumulate all this material gain and having done so and having thought about it in the Maekawa report, which might have been comparable to our Marshall plan, still just cannot make it in terms of trying to think in ways in which they could make the world safer for them and us and everybody else as opposed to this relentless push.

I join my colleague in wishing that the Japanese long ago had recognized our sensitivities and those of others and were much more cooperative. But, I come back to the fact that in its modest way this agreement does make a small dent in the balance of payments. No agreement makes no dent and, I think, no sense if you are arguing the balance of payments problem.

This agreement keeps us hands on with the Japanese in their development. No agreement means they proceed alone and we may blithely estimate that they simply cannot make it by themselves or it will take many, many years for them to do so.

I suspect those who argue that in the automobile industry a short while back, have come to regret those estimates or would prefer to hide them. I would guess that the Japanese are fully capable, given the resources they have, given the personnel they have, given other contacts with other nations they have, to be very competitive.

Our question is do we want to grow with them, stay with them, continue to exercise good counselorship and advice to them, and I think the answer is "yes."

That is sensible for us, for them, for the world, for Asia.

So for these reasons, Mr. President, I hope that we will finally come to a conclusion of support for this agreement, but I appreciate that at this point we are once again looking for additional Senators to join the debate. So I would issue that invitation on behalf of my distinguished colleague from Illinois and myself, and I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DIXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. Mr. President, I notice that the Senator from New York is here and going to speak on this issue. He is a fine man, Mr. President. But the other day in the committee he presented his evidence on composite wing technology. Now, he was absolutely correct in what he said about composite wing technology.

But the people from the Chicago Tribune in my State, Mr. President, at that moment took a picture and they put it in the newspaper. It shows ALFONSE D'AMATO of New York State there holding the plastic composite wing technology in front of the face of the Senator from Illinois.

I want to express my concern about the fact that he keeps blocking me out in these pictures, Mr. President. Other than that, he seems to be a decent sort. [Laughter.]

Mr. D'AMATO. Mr. President, first let me apologize for waving the composite material around. I was so excited to actually have it in my possession, it was strictly inadvertent.

I want you to know that I sustained a cut now because the composite material was so razor sharp.

Mr. President, I ask unanimous consent that Mr. Philip Bechtel and Mr. David Reese be granted access to the floor during the pendency of the FSX question now before the Senate. Both of these gentlemen are congressional fellows serving on my personal staff and they have been invaluable to me.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. Mr. President, will the Senator from New York yield for a comment?

Mr. D'AMATO. Yes.

Mr. DIXON. Mr. President, may I advise my friend from New York State that we have been informed by the majority leader that upon the conclusion of his remarks—and it has been agreed to by the distinguished manager on his side, the Senator from Indiana—at the conclusion of the remarks of the Senator from New York we will conclude today's business.

I thank the Senator.

Mr. D'AMATO. I thank my colleague.

THE FSX DEAL AND JAPAN'S DRIVE FOR DOMINANCE IN AEROSPACE

Mr. D'AMATO. Mr. President, I recently heard the following story, one that I hasten to add is fiction:

The President was leaving Air Force One and bumped his head. He was knocked unconscious, and he didn't wake up for 3½ years.

Vice President QUAYLE was with Bush when he came to President Bush asked, "Well, what happened?"

Vice President QUAYLE said, "you banged your head getting off the plane and you've been unconscious for 3½ years."

President Bush, worried, asked "What's the economy like?"

QUAYLE said, "There's smoke from every chimney."

Bush asked, "What's the unemployment rate?"

QUAYLE answered, "2 percent; anybody who wants to work is working."

The President said, "Well, what about the homeless situation?"

Vice President QUAYLE replied, "It's much better, everyone has housing."

Then the President, much reassured, asked his last question: "What does a loaf of bread cost?"

Vice President QUAYLE responded, "12,000 yen."

I have begun my remarks today with a funny story—or at least a story that is funny now—because the rest of what I have to say is not funny at all. In fact, it is deadly serious.

I have spoken on the Senate floor against the pending FSX deal with Japan on several previous occasions. Today, we are debating Senate Joint

Resolution 113, the resolution to disapprove the FSX deal.

I object to the FSX deal because it is a bad deal for America. Once again, we are on the short end of a deal, selling $7 billion of F-16 technology for $480 million and some technology we already possess.

Worse than getting less than 10 cents on the dollar, worse than getting flim-flammed on the technology flowback part of the deal, is the fact that we will be helping the Japanese gain dominance over one of the last high technology areas in which we are the world's leader.

This is not just a trade or industrial policy concern, it is a national security concern. Unlike automobiles, VCR's, and cameras, we cannot retain an independent ability to defend ourselves or to lead the Western alliance without retaining leadership in aerospace technology and industrial production.

If we give away critical aerospace technology to the Japanese, we are giving away our ability, ultimately, to defend our country and secure our future. That is what is at stake here, nothing less.

Let me suggest, Mr. President, it has been that ability of the United States to be the leader in the free world that has brought about such a change. We see democracy thriving and rising above even those most brutal of dictators.

The Japanese want us to feel grateful that they have allowed us to participate in what was ostensibly going to be an all Japanese development program!

Well, I, for one do not feel at all grateful. I feel foolish. I think we are being taken for a ride again by the Japanese, this time behind the thin veil of national security excuses.

Let me tell you what is really going on. In 1988, we ran a trade deficit with Japan of $55.4 billion. People are pleased because this 1988 number is down from the record $59.8 billion deficit we recorded in 1987.

But before we become euphoric about this 1-year improvement, let me make a couple of other points. That deficit is figured on all commodities traded including agricultural commodities, an area in which we have a substantial positive balance of trade with Japan.

When the trade deficit in manufactured goods alone is examined, the picture is not nearly so bright. In 1988, our manufactured goods trade deficit with Japan was $70.5 billion! Last year, we imported $92.5 billion in manufactured goods from Japan, and exported only $22 billion to Japan.

One of our strongest export areas is aerospace equipment. Tariff schedule category 79, "Aircraft and transport equipment, nonspecific," gives a good snapshot of this industrial sector's contribution to our international trade. In 1988, we exported $21.7 billion in this category.

According to the March 1989 Department of Commerce document entitled, "U.S. Manufacturers Trade Performance," that category ranked fourth in dollar value of all U.S. manufacture exports, behind only road vehicles, office and A.D.P. machines, and electric machinery. In sum, our aerospace industry is a bright spot in an otherwise not-so-bright trade picture.

But what does the future hold? Last year, Booz, Allen & Hamilton, the world's largest management and technology consulting firm, published a report entitled, "Japan's Emerging Aerospace Industry: Implications for Global Markets," by vice president John R. Harbison. The report contains some revealing analysis that bears directly on this body's responsibilities in evaluating and acting upon the proposed FSX deal.

The report begins,

Aerospace: A new target industry for Japan. Aerospace/defense is a strategic industry central to Japan's vision of its future world role—a vision it has so far pursued with enormous success in a range of industries. Based on our independent research and experience, we believe that Japanese growth will far surpass that of the rest of the aerospace industry, even beyond the aggressive projections currently being made by the Japanese Government. We expect the Japanese aerospace industry to grow from $7 billion today to $25 to $30 billion on constant dollars by the year 2000. This growth will continue well into the 21st century.

The report continues,

The Japanese are seeking technology leadership rather than cost leadership. Our analysis indicates that they will emerge as leaders in certain segments far faster than is generally expected and will demonstrate rapid movement up the value-added chain as they assume more complex systems integration roles.

Japan's market structure is highly concentrated, with the top three companies comprising in excess of 70 percent of the market. This concentration is the result of a deliberate policy to achieve world-class capability quickly, with each company dominating specific niches. This formula has proven extremely successful in other industries and offers a substantial approach in aerospace as well.

What does this mean to the United States. It means we are in trouble, and we are getting ourselves deeper into trouble.

In February of this year, the Foreign Policy Institute of the School of Advanced International Studies of Johns Hopkins University published a report entitled, "Foreign Ownership of U.S. Defense Companies—Where Do We Draw the Line?" authored by my friend Bernard L. Schwartz, the chairman and chief executive officer of Loral Corp., a New York defense electronics manufacturer. He sounds the alarm at the beginning of his report, writing as follows:

The U.S. defense industrial base is shrinking. Critical technologies, manufacturing capacity and components are being sold to foreigners at ever-increasing rates. We may even be approaching a time when decisions about the defense of the United States of America will be made by foreigners.

Later, Mr. Schwartz writes,

The flow of technology resulting from foreign acquisitions * * * is almost certainly unfavorable to the United States. The absence of restrictions on foreign investment permits foreigners to buy advanced technological know-how, repatriate it, and then exploit the technology to compete directly against U.S. companies. In this sense, quite apart from the potential implications of technology transfers for U.S. national security interests, the United States may be literally selling off its economic advantages.

The worst part of the FSX deal is that it is not the result of private business decisions, but of deliberate U.S. executive branch policy decisions! Yet here we are, "selling off our economic advantages," just as Mr. Schwartz fears.

Discussions further the impacts of foreign ownership. Schwartz continues:

Most important, the foreign owner controls the enterprise in critical ways that may or may not support U.S. defense objectives. Overall, the real risk of foreign ownership stems from America's losing control of today's defense technology and its ability to influence investments in tomorrow's technology which are vital for U.S. defense. The United States cannot maintain its technological lead without R&D supportive of its national defense objectives. Once ownership control passes out of U.S. hands, there is no assurance that the company's priorities will continue to support the priorities of the U.S. defense establishment.

A potentially serious problem for the Defense Department concerns a trend toward increasing dependence on foreign sources for variety of materials, parts, and components used in weapons and other military equipment. This is not a problem of equipment incorporating classified technologies, but involves more common items such as bearings, forgings and castings, and electronic chips. The concern is that such shipments could be cut off in a protracted crisis or war, either directly or through political pressure on the source nation, crippling this country's ability to sustain its defense effort. * * *

The real problem is * * * subtle and long term. It concerns the fundamental vitality of industries that would be central to defense production in any protracted war. Acquisitions can and have been used by foreigners to drive out our competitors. Such behavior has special long-term negative consequences for American defense preparedness. Similarly, foreign acquisitions that result in consolidations of manufacturing facilities could adversely affect the U.S. defense industrial base. Foreign direct investments that result in the transfer of research and development activities abroad and the concentration in the United States of assembly-type operations could also impair defense preparedness.

While Mr. Schwartz was addressing foreign investment in the United States, his remarks apply with double

force to a situation such as the FSX sale, in which we are giving technology to a competitor. If we get a share of FSX production, which is by no means certain, we will have accomplished what Bernard Schwartz warns against—giving the lead in important research and development activity to Japan, while we simply build what they develop.

Mr. President, the time has come to draw the line—to draw the line against the FSX deal. We cannot and must not mortgage our national future by agreeing to help Japan's plan to dominate the world aerospace market.

I urge my colleagues to join with me in voting for Senate Joint Resolution 113, to block the FSX deal. It is my hope that the Senate will reject this agreement and all that it implies about U.S. loss of leadership in aerospace.

Thank you, Mr. President.

Mr. DIXON. Mr. President, one of the charges that the proponents of FSX make is that if we turn down the FSX deal, then irremedial harm will be done to our diplomatic and security relationship. Therefore, according to these people, we must pull all our punches when we speak about Japan or make diplomatic demarches to the Japanese. If we raise our voices ever so slightly, the Japanese will get upset and we cannot have that. It is as though we must conduct a relationship walking on eggshells.

Mr. President, it is high time that we put an end to this special treatment. It is time we spoke directly to and about the Japanese. I think it is wrong to continue to treat the Japanese as though they were a fragile flower, one that can be raised only in a specially constructed hot house.

Because that is what the situation is today, Mr. President. Japan lives in a special security and economic hot house that we helped them construct after World War II in order to help them recover from the devastation of the war.

Mr. President, there is no need for that hot house today. It is time that we dismantled that obsolete structure. Japan must take her place among the mature nations of the world and act accordingly to the duties and responsibilities of an important and mature ally.

It is demeaning to the Japanese to argue, as the FSX proponents do, that Japan must continue to receive special treatment. Why? The Japanese are big boys, Mr. President. They will not wilt in the give and take of the real world.

The FSX proponents act as though if this one deal does not go through, our entire relationship will fall apart. How can that be Mr. President? Does this mean that the Japanese will refuse to let us protect them? Will a nation that depends profoundly on the United States for its conventional and nuclear defense ask us to leave? Not likely, Mr. President. Japan would be virtually defenseless without our military umbrella? It is shear nonsense to think that Japan would ask us to withdraw if FSX does not go through.

What about our economic relationship if FSX falls through? The suggestion is made indirectly that the Japanese will stop buying our treasury bills and stop financing our debt. How do you think we finance our defense budget, Mr. President? How do we pay for all those Japanese consumer goods? Do the proponents of FSX really think that the Japanese economy is totally independent of ours? Do you really think that the Japanese can afford to shut down our economy?

And what kind of allies do the FSX proponents really think the Japanese are, Mr. President. What kind of ally threatens implicitly to destroy your economy? And why do FSX proponents suggest that the Japanese must do more with economic aid and that we should not expect Japan to do more militarily. What does that mean? Are the Japanese not to be trusted? Will they start another war if they do more militarily?

If the FSX proponents do not trust the Japanese militarily, then why on earth are they saying that we must give them our leading edge technology in the F-16. I think there is a great deal of confusion in the thinking of the FSX proponents. Either the Japanese are trustworthy militarily or they are not. Either they are mature enough to handle the responsibilities of a modern military or they are not? I ask the FSX proponents which is it? Are the Japanese trustworthy militarily or not?

And I do not want to hear that Japan's neighbors will be upset if Japan does more militarily. China and Korea and other Asian nations have very old civilizations. They have a lot of experience with the Japanese throughout the centuries. If they feel threatened if the Japanese do more militarily, then they are mature enough nations to work out their problems together.

What does the fact that Japan's neighbors feel threatened mean to the FSX proponents? It means no problem, Mr. President, the good old American taxpayer will bear the burden. The American taxpayer will alleviate the worries of Japan's neighbors. This type of thinking is just plain wrong. We cannot afford to bear these types of burdens any longer, Mr. President.

I think that argument is most demeaning to the Japanese. If they are not trustworthy, then why are we giving them the F-16 technology?

Mr. D'AMATO. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. KERREY). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE UNITED STATES SENATE: THE SENATE SERGEANT AT ARMS

Mr. BYRD. Mr. President, I am continuing today with another in my series of talks on the history of the Senate, and today's subject is the Senate Sergeant at Arms.

Mr. President,* the sergeant at arms is the principal law enforcement and protocol officer of the United States Senate. His various powers and responsibilities are derived and have developed over time from several primary sources: from the statutes; from rules and regulations adopted by the Senate; from policies, regulations, and guidelines approved by the Committee on Rules and Administration; and from customs and precedents that have developed over the Senate's two hundred years of operation.

On April 7, 1789, the day after senators established their first quorum, they elected James Mathers of New York as "Door-Keeper," a post similar to the one he had held for the Continental Congress. The "Door-Keeper's" position was particularly significant because the Senate decided to bar the public and keep its proceedings secret, from 1789 to 1795. It was not until 1798 that the Senate adopted the designation "Sergeant-at-Arms," following the practice of the English Parliament and the U.S. House of Representatives.

The new title reflected the growing responsibilities of the post. On March 3, 1791, when the First Congress was preparing to adjourn, it passed a resolution authorizing Mathers to take care of the Senate chamber and committee rooms in their absence, "and also to make the necessary provision of fire wood for the next Session."

Even more significant for the evolution from "Door-Keeper" to sergeant at arms was the authorization of James Mathers to compel attendance of senators and to arrest others sought by the Senate. The framers of the Constitution in 1787 had been profoundly disturbed by the chronic absences that had crippled the Congress under the Articles of Confederation. Accordingly, in Article I, section 5, they provided that, in each house of the new Congress, a smaller number than a quorum might "be authorized to compel the attendance of absent members, in such manner and under such penalties as each house may pro-

* This chapter is derived from addresses delivered on May 28 and June 4, 1980.

vide." A member of one state ratifying convention observed, "When it is known of how much importance attendance is, no senator would dare to incur the universal resentment of his fellow citizens by grossly absenting himself from his duty."

Senators of the First Congress did not need to be reminded of the consequences of the inability to compel members to attend sessions. Those eight who arrived on March 4, 1789, the appointed day for the beginning of the new government, constituted only two-thirds of the number necessary to form a quorum. Nearly five weeks passed before the twelfth senator arrived and a quorum was achieved on April 6. One of the first orders of Senate business was the preparation of a set of rules of procedure. The drafting committee borrowed heavily from the rules of the Continental Congress, one of which provided that "No member shall leave Congress without permission of Congress or his constituents." In revised form, that provision became Rule 19: "No member shall absent himself from the Service of the Senate without leave of the Senate first obtained." Today, that ancient cornerstone of Senate operations appears in slightly modified form in Rule VI.

Between 1789 and 1801, the Senate achieved an opening-day quorum during only half of its first fourteen annual sessions. In 1794, following a delay of fifteen days in obtaining a quorum, the Senate established a committee to revise its rules to compel attendance of members; but there is no record that the committee ever made a recommendation. So frustrated was the House of Representatives at the Senate's delay on this occasion, that it proceeded to conduct business without waiting for the Senate to organize. Near the end of the first session of the Third Congress, in May 1794, five senators refused to enter the Senate chamber in Philadelphia, during a vote on a peace treaty with Great Britain. Vice President John Adams angrily described this deliberate avoidance of a vote as "the greatest curiosity of all." But under the existing rules, Adams lacked specific authority to compel senators' attendance.

In July 1797, Senator William Blount faced charges of conspiring with the British to incite Indians to seize frontier lands in Spanish Florida and Louisiana. As a result, the Senate conducted an inquiry into his fitness to continue as a senator. When Blount was slow in returning to the Senate to respond to the charges, Vice President Thomas Jefferson, by order of the Senate, wrote a letter to Blount stating, "You are hereby required to attend the Senate in your place without delay." In response to the Senate's order, Senate Doorkeeper Mathers reported that Senator Blount "could not be found." Soon, however, Blount returned of his own accord, and the Senate voted to expel him. On the same day that the Senate was considering Blount's expulsion, the House voted to impeach him.

On February 5, 1798, as the Senate prepared for Blount's impeachment trial, it resolved that "the Doorkeeper of the Senate be, and hereby is, invested with the authority of Sergeant-at-Arms, to hold such office during the pleasure of the Senate, whose duty it shall be to execute the commands of the Senate, from time to time, and all such process as shall be directed to him by the President of the Senate."

Four months after establishing the position of sergeant at arms, the Senate added to its standing rules provisions that empowered him to prohibit unauthorized absences by members: "In case a less number than a quorum of the Senate shall convene, they are hereby authorized to send the Sergeant-at-Arms, or any other person or persons, by them authorized, for any or all absent members." During the next half century, Senate orders to its sergeant at arms were expressed in direct and assertive language. He was to "summon and command the absent members and appear before the Senate immediately," taking "all practicable means to enforce their attendance." As time passed, the tone of these orders softened so that the sergeant at arms was simply to "request the attendance of absent members."

The first sergeant at arms, James Mathers, a man of tact and patience, was well suited to these duties. A native of Ireland, he came to the American colonies shortly before the start of the Revolutionary War. He enlisted to serve under George Washington and participated in combat throughout the war. He was wounded several times, once severely. In recognization of his valor, Mathers earned appointment as sergeant at arms and doorkeeper to the Continental Congress, and later to the United States Senate. By all accounts, the Senate chose well. Mathers served faithfully for nearly twenty-three years until his death in 1811 at the age of sixty-seven.

Although Mathers had authority to "take all practicable means to enforce" the attendance of senators, the Senate's records for those early years do not reveal any occasion when a senator was physically compelled to enter the chamber, or fined for his absence. By the middle of the nineteenth century, reflecting the failure of efforts at compulsion, the Senate modified its rules to the effect that the sergeant at arms be directed to "request" the attendance of absent members. Nevertheless, in the face of chronic absences during the crisis years of the Civil War, Senator John P. Hale of New Hampshire supported restoration of a rule, similar to the practice of the House of Representatives, to "compel" attendance of absentees. Senator Hale disliked the "cautious, guarded, and modest shape" of the language then used to invite members back to do their duty. Senator John Conness of California was among those senators who successfully blocked Hale's motion. Conness observed that "all these rules will prove ineffective unless the minds of Senators and the feeling of duty that they owe to the country keep them in their seats." The California senator believed, perhaps naively, "that it should only be necessary on this subject to direct the attention of Senators to the degree to which the public business is retarded by their absence in order to have their presence in the Senate hereafter."

In frustration, Senator William Pitt Fessenden of Maine, de facto leader of the Senate by virtue of his position as chairman of the Finance Committee, proposed publishing a list of absentees. "The fact of the frequent want of a quorum in this body has become notorious," he declared, ". . . it is shameful and discreditable to the body. . . . The fact that it occurs so frequently, day after day, especially at this [late] period of the session when we have so much important work to do is discreditable." Until that time, the Congressional Globe (forerunner of the CONGRESSIONAL RECORD] included only the yeas and nays for each roll-call vote. The Senate then adopted Fessenden's half-way measure to publish "a separate list of absentees on the call of the yeas and nays," to embarrass members into attendance. (In 1892, the Senate removed some of the sting of this listing by substituting the words "not voting" for "absent.")

This still left the various sergeants at arms of the period in a quandary as to the extent of their powers to secure senators' attendance if their initial "request" failed to have the desired effect. During a Saturday evening session in April 1872—the quality of life not being then what it is now—the presiding officer ruled out of order a motion, in the absence of a quorum, that the sergeant at arms "compel the attendance of absentees." He made this ruling on the grounds that the minority of members present did not have the power to change the existing rules. Judiciary Committee chairman Lyman Trumbull asserted: "We have no way of forcing the attendance of Senators; we can only request them to attend; and that has always been supposed in the history of the Senate to be a sufficient summons for a Senator to attend. It has always been supposed that a Senator acting upon his honor would report himself when his attendance was requested by the Senate."

Finally, in 1877, to remove this obstacle and as part of a general revision of its rules, the Senate adopted a rule

providing that in the absence of a quorum "a majority of Senators present may direct the Sergeant-at-Arms to request, and, when necessary, to compel the attendance of absent Senators, which order shall be determined without debate; and pending its execution and until a quorum shall be present, no debate nor motion, except to adjourn, shall be in order." This rule received the unanimous recommendation of the Rules Committee. Maine's Senator Hannibal Hamlin, whose Senate service extended back to 1848, successfully argued that the authority to compel attendance, although included in the Constitution, must be spelled out in Senate rules. This action would end the frustration of having to adjourn when members failed to answer their colleagues' pleas to attend.

Yet, the problem of compulsion persisted. On a winter evening in February 1883, the sergeant at arms reported to the Senate that "a number of senators are reported to be at a dinner at Senator [Zachariah] Chandler's, where the host refused admission to officers sent to notify them." After repeated futile efforts to convince the dining senators to answer their call to duty, the Senate adjourned at 10:00 p.m. Several years later, in 1891, a coalition of southern Democrats and a minority faction of western Republicans stayed away from the Senate in an ultimately successful effort to block passage of a "Force bill" providing for federal supervision of elections. Shortly after midnight on a cold, rainy Saturday, the Republican leadership secured enough votes to direct the sergeant at arms "to use all necessary means to compel the attendance of absent Senators." At various times during the all-night session the sergeant at arms reported that seven members were too ill to comply with the Senate's request, that one said he was "much too fatigued to attend," and that others simply refused to answer the knock at their doors. The sergeant at arms related how he had found Senators James Berry and Matthew Butler in the Democratic cloakroom, and that Berry had said "he would come when he got ready," while Butler simply ignored the Senate officer.

In the ensuing debate, senators were unable to decide by what means the sergeant at arms was to "compel" absentees, or what might be the penalties for absenteeism. Following inconclusive discussion, the Senate finally secured a quorum at nine-thirty the next morning and proceeded in an unsuccessful attempt to shut off the minority's filibuster.

Matters had changed little by 1915. That year, in the midst of a filibuster on President Woodrow Wilson's Ship Purchase bill, a frustrated Senate debated a proposed rule change that would require senators to remain in the chamber unless excused by the Senate and would hold violators in contempt of the Senate. Although this rule was not adopted, the thirty-three day filibuster, which prevented passage of three major appropriations bills, did lead to enactment of the Senate's first cloture rule.

A dozen years later, at twelve-thirty on the morning of February 23, 1927, during a filibuster that had snarled legislation to harness the water resources of the lower Colorado River, my predecessor from West Virginia, Matthew M. Neely, moved successfully that warrants of arrest be issued for absent senators. This was the first known instance of the Senate issuing such arrest warrants for its own members. The sergeant at arms was ordered to bring the absent senators before the bar of the Senate, and he spent until 6:30 a.m. trying to do so. He received an interesting variety of excuses: one senator was preparing to attend a funeral; another said he would come later, if necessary, but he was already in bed; another reported that he was too tired, and would not come; another said he would think it over. Finally, as the sun rose over Washington, the Senate achieved its hard-fought quorum, and the arrest warrants were rescinded.

A more explosive event occurred on Saturday night, November 14, 1942, during a Senate debate on anti-poll-tax legislation. Shortly after 1:00 p.m., with only twenty-six members present, the Senate agreed to Majority Leader Alben Barkley's motion to direct the arrest of missing senators. In the course of this action, additional senators arrived, reducing the number needed for a quorum to five. Forty-two senators were known to be out of town, so the search narrowed to the remaining eight members believed to be in Washington. The missing eight were all Democrats, including Kenneth McKellar of Tennessee, Burnet Maybank of South Carolina, Berkley Bunker of Nevada, Lister Hill of Alabama, Wall Doxey of Mississippi, W. Lee O'Daniel of Texas, Richard Russell of Georgia, and John Overton of Louisiana. Sergeant at Arms Chesley Jurney sent his men to the Senate office building now named, as a result of the resolution which I introduced and helped to pilot through the Rules Committee of the Senate, I being a member of the Rules Committee at that time and at the present, for Richard Russell. Jurney deputized the custodian to unlock the office doors of the missing senators; but only Senator Bunker was found, and he walked to the Senate chamber. A deputy sergeant at arms drove to the home of Senator Maybank, who without objection accepted the offer of a ride to the Capitol. Two other senators returned to the chamber on their own, apparently unaware of the sergeant at arms' search.

Kenneth McKellar, the Senate's third most senior member, was resting at his apartment at the Mayflower Hotel when another deputy sergeant at arms, Mark Trice, arrived with his warrant. After the seventy-three-year old senator failed to answer the house telephone, Trice enlisted the help of a hotel maid, who persuaded McKellar to open his door. The senator seemed taken aback to see Trice standing in the hall but willingly accepted his offer to ride back to the Senate. Trice never mentioned the warrant, but, as the car climbed Capitol Hill, the Tennessee senator realized that he was being used to help the leadership foil the tactics of his fellow southern senators. As a Senate press gallery official later recalled, "His face grew redder and redder. By the time the car reached the Senate entrance, McKellar shot out and barrelled through the corridors to find the source of his summons . . . He was so angry with [Majority Leader] Barkley that he would not speak to him for months." With the arrival of Senator McKellar, a quorum was present, but the Senate still failed to end the filibuster. It continued to fail when the legislation was brought up again in 1944, 1946, and 1948. Not until 1962 were the anti-poll-tax provisions enacted by Congress to become the Twenty-fourth Amendment to the Constitution. Senator McKellar did not quickly forget his "arrest." At the Democratic caucus at the beginning of the next Congress, McKellar advanced his own candidate for sergeant at arms, and Jurney resigned rather than face a contest. Ironically, the new sergeant at arms was former Senator Wall Doxey, who, himself, had been among the absent senators that night in 1942.

On June 9, 1950, at the request of Majority Leader Scott Lucas, the Senate again issued warrants for the arrest of absent senators, as members answered quorum calls and then returned home. Simply issuing warrants was sufficient to produce the missing senators, and no arrests were necessary. More than a quarter century passed until October 2, 1976, when a majority whip, in the absence of Senator Mike Mansfield, I moved for the issuance of warrants to arrest absent members. It was during the hectic conclusion of the Ninety-fourth Congress before adjournment for the 1976 elections. Several important actions remained, obstructed by the threat of a filibuster. At that time, I said: "We are playing games. There are senators in the reception room and in the cloakroom who have not come to the floor." Apparently my words reached enough ears and the vote on my motion to arrest senators was 46 to 11. Absent senators hurried into the chamber,

and a quorum call was quickly established. The chair then ruled that the sergeant at arms would not have to issue warrants, and we were able to complete our work and adjourn the Ninety-fourth Congress.

Nordy Hoffmann was then serving as sergeant at arms. In a recent oral history, he recalled: "The Senate was about to tell me to go out and arrest the senators and bring them in. But I knew where Senator Cliff Hansen of Wyoming was in his hideaway. I went to get him, and I said, 'Senator, I don't like to have to come and get you. Why don't you come in so we can break this. After all, I'm a new man on the block. It makes the Senate look bad and it makes me look bad.' He said, 'You talked me into it.' He came in and we were able to get the vote and we didn't have to arrest anybody."

Our current sergeant at arms, Henry Guigni, was not quite as fortunate. In February 1988, during a filibuster against a bill to curtail the cost of senatorial campaigns, I made a motion for the Senate to arrest members who were boycotting the quorum calls. "The Senate shouldn't have to arrest senators," I said at that time. "They should come to the floor." Around midnight, Sergeant at Arms Guigni and several Capitol policemen moved through the Senate office buildings and Capitol hideaway offices to round up hiding senators. Some members ran when they saw the sergeant at arms. Some refused to accompany him. Senator Bob Packwood agreed to walk to the chamber with the sergeant at arms, but would not enter it. Two policeman, therefore, carried him into the chamber. Needless to say, this incident drew considerable press attention. Since the Senate so rarely has ordered the arrest of its own members, the media treated the incident as if it were unprecedented. But, as I have pointed out, there were precedents for the issuance of such warrants, and only the physical carrying of a senator into the chamber was really unique on this occasion. Senator Packwood, I should note, had only praise for the conduct of the sergeant at arms, who, he conceded, was simply doing his job, as directed by the Senate.

Senators are not the only people subject to arrest by the sergeant at arms. Whenever the Senate has called a reluctant witness to testify, whether before a committee or before the Senate as a whole, the sergeant at arms has been sent out on the manhunt. This was true in 1800 when the sergeant at arms brought newspaper editor William Duane before the bar of the Senate; it was still true in 1951, when Sergeant at Arms Joe Duke won some national notoriety for rounding up such underworld figures as Jacob "Greasy Thumb" Guzik, one of Al Capone's mobsters, to testify before Estes Kefauver's crime investigating committee. Of course, Joe Duke had some help from the FBI, especially since he had sworn in J. Edgar Hoover as a deputy sergeant at arms of the Senate.

As the chief law enforcement official of the Senate, the sergeant at arms can be empowered to arrest any member of the Senate, including the leadership, the president of the Senate, and, indeed, even the president of the United States. It was the Senate's sergeant at arms who presented President Andrew Johnson with the notification of his impeachment trial in the Senate chamber.

Furthermore, sergeants at arms have served as jailers. Twice in the nineteenth century, the Senate held newspaper correspondents prisoners in committee rooms inside the U.S. Capitol hoping to force them to divulge sources of Senate secrets they had published. John Nugent was held for leaking the still-secret Treaty of Guadalupe-Hidalgo to the New York Herald in 1848. At that time, Senate Sergeant at Arms Robert Beale placed the prisoner in the Committee on Territories room at the Capitol and took him home in the evenings to feed him dinner and make sure he had a good night's sleep. Similarly, in 1871, the sergeant at arms held two reporters for the New York Tribune in the room of the Senate Committee on the Pacific Railroad while the Senate waited for them to tell who gave them the still-secret Treaty of Washington. Again, the sergeant at arms provided a comfortable environment for the prisoners, who had daily visits from their wives and friends, received books and flowers, and dined in the Senate restaurant. In fact, the prisoners were entrusted with the key to their own committee-room cell! In neither case, by the way, did the correspondents divulge the source of their secret information, and the Senate since then has wisely abandoned the practice of arresting newspaper correspondents, at least for that reason.

Today, the sergeant at arms is a member of the Capitol Police Board (along with the sergeant at arms of the House and the architect of the Capitol), which oversees the policing of the U.S. Capitol Building and grounds by the Capitol Police. In addition, since 1867, the Senate sergeant at arms has had the authority to make any regulations necessary to preserve the peace and prevent the defacement of the Capitol and Senate office buildings, and to protect the public property in these buildings. Since 1878, the sergeant at arms has been empowered to prevent any part of the Capitol grounds and terraces from being used as a playground, thereby protecting the turf. And, as part of his policing responsibilities, the sergeant at arms, as a member of the Capitol Police Board, shares control over traffic around the Capitol, including parking and impoundment of vehicles. These are not matters to be taken lightly, for it has often been stated that the two most important issues on Capitol Hill are neither political nor legislative but, rather, office space and parking space.

Mr. President, when one tallies it up, the number of responsibilities that the Senate assigns to its sergeants at arms is somewhat staggering. The sergeant at arms is in charge of the doorkeepers, who maintain order in the galleries and in the surrounding lobbies. He greets and escorts important visitors to the Capitol, including presidents, prime ministers, kings and queens. The sergeant at arms directs the work of such Senate facilities as the service department (once known as the folding room), which prepares printed material for mailing to constituents; the computer center; telephone and telecommunications services; the Senate recording studio; the Senate post offices; official Senate automobiles; and the rental of home state offices for senators. In addition, the sergeant at arms directs the work of the maintenance workers, janitors, housekeeping staff, restroom attendants, elevator operators, cabinetmakers, upholsterers, and locksmiths; he is in charge of selling or disposing of surplus or worn-out office equipment and other furnishings; and he is in charge of the Senate barbershops and beauty salon.

The sergeant at arms, along with the secretary of the Senate, leads the formal processions of the Senate, whether to a joint session, an inauguration, or other ceremonial events. He accompanies us even unto death, at least as far as the cemetery, since, by custom, the sergeant at arms heads the delegation representing the Senate at the funeral of a deceased Member. The largest funeral Nordy Hoffmann oversaw was for Senator Hubert Humphrey, who died in Minnesota but who lay in state in the Capitol Rotunda. Hoffmann arranged with the White House for the use of the presidential jet to bring the coffin and the Senator's family to Washington and then coordinated activities with the military and other Federal agencies involved. What he most remembers from that event, however, was meeting Ambassador to Japan Mike Mansfield at the airport. "Isn't this a long way to come for a funeral?" he asked the former Senator. "No place is too far to come for a friend," replied Senator Mansfield, underscoring the seriousness that this collegial institution places upon such occasions.

With all these responsibilities, which keep growing every day, the Senate has been fortunate to have had outstanding individuals serving as sergeant at arms. After the first sergeant at arms, James Mathers, we had such

men as Mountjoy Bayly, who served 22-years, including that fateful August in 1814 when British troops burned the Capitol Building. George T. Brown was sergeant at arms during the Civil War and Reconstruction, when special security was needed at the Capitol—considering that some of the war was fought in the suburbs of Washington. There was Daniel Ransdell, a Civil War veteran whose arm was shattered at the battle of Roseca, and who served as sergeant at arms from 1900 to 1912. Known as the "Pooh-Bah of the Senate," Ransdell prided himself in being the Senate's chief housekeeper, making sure that Senators were always comfortable. According to the newspapers, no matter what problem arose around the Senate, the answer would always be the same: "Ask Ransdell about it."

One of the most colorful men to hold the post was David S. Barry, author of a fascinating memoir, Forty Years in Washington, which he published in 1924 while serving as sergeant at arms. Barry first came to the Senate in 1875 as a page, recommended by Senator Isaac Christiancy of Michigan. Young Barry made the most of his service as a page, using his time off to study stenography from the official reporters of debate. Later, he was employed as secretary to a number of Senators and Representatives, most notably to Senator Nelson Aldrich of Rhode Island, long the unofficial Republican leader of the Senate and, by the way, the maternal great-grandfather of my distinguished colleague from West Virginia, Jay Rockefeller.

In 1879, Barry also became the Washington correspondent for the Detroit Post and Tribune, beginning a 40-year career as a newspaper reporter. Over the years, he wrote for major papers in Chicago, Detroit, St. Louis, Cleveland, Cincinnati, and New York, and became editor in chief of the Providence Journal, then a major Republican paper. During all those years, he built many friendships in the Senate and the House. In 1919, when the Republicans returned to the majority in the Senate, they elected David Barry as sergeant at arms.

Fourteen years later, when the Republicans were swept out of the majority by the Great Depression, Barry made plans to retire. During the long interregnum that then existed between the November election and the March inauguration (before the Twentieth Amendment to the Constitution advanced the date to January), Barry drafted several articles containing his observations on Congress. He sent these to the New Outlook magazine, under the stipulation that they not be published until he left office. Unfortunately, one article entitled "Over the Hill to Demagoguery" appeared in print a month too soon and contained an especially injudicious sentence, "There are not many Senators or Representatives who sell their votes for money, and it is pretty well known who these few are."

Offended Senators called sergeant at arms Barry to the floor of the Senate to explain himself. The Senate Judiciary Committee held 2 days of hearings on the matter, and while Barry argued that he had really written in defense of the majority of Members of Congress, the committee was not mollified. It voted to recommend his removal as sergeant at arms, which the Senate agreed to by a vote of 53 to 17 on February 7, 1933. The then-chairman of the Judiciary Committee, George Norris of Nebraska, commented that, had the statement been written by a newspaper correspondent, the Senate would have paid it no attention. David Barry, however, was an officer of the Senate, elected by a rollcall vote, and his impropriety cost him his position.

Barry's departure left his young deputy, J. Mark Trice, as acting sergeant at arms for a month. That month included the inauguration of Franklin D. Roosevelt as President of the United States, which was, indeed, a trial by fire for a staunch Republican like Mark Trice. But Trice was equal to the challenge. Later, during the Eighty-third Congress, he served as secretary of the Senate, and for many years he was the secretary to the Republican minority in the Senate.

When I first came to the Senate in 1959, I was greeted warmly by the then-sergeant at arms, Joe Duke. Duke learned of the difficulties associated with arresting unwilling persons early in his life. In 1930, while a student at the University of Arizona, he held a part-time job with the Miami, Arizona, police department. One day while pursuing fugitives, he was ambushed and shot in the stomach. He managed to struggle into his automobile and drove to town for medical aid, arriving just in the nick of time. Several years later, he came to the Senate, first on the staff of Arizona Senator Henry F. Ashurst, and then with Senator Carl Hayden. In 1949 he became Senate sergeant at arms, a post he held until 1965, except for the 2 years of the Republican Eighty-third Congress. Hubert Humphrey once referred to Duke as "the Houdini of Washington, who can produce the almost impossible on short notice."

When I first became Senate Majority Leader, in 1977, I could always count on the able assistance of Nordy Hoffmann. In fact, I had known Nordy for several years previously; he served for 8 years as executive director of the Democratic Senatorial Campaign Committee, and, earlier, he was an official of the United Steelworkers of America. Anyone who has ever seen Nordy Hoffmann can attest that he looked like a sergeant at arms. He had and has still a football player's physique, and indeed he played football at Notre Dame from 1929 to 1931, under the legendary coach, Knute Rockne. He, Nordy Hoffmann, was named guard on the top All-America Selections in 1931 and starred for the East in the East-West Shrine Football Classic in San Francisco. In 1978, I was pleased to add my name to those of all 100 Senators and Presidents Gerald Ford and Jimmy Carter to a recommendation that Nordy be recognized by the National Football Foundation; and indeed he was inducted into their Hall of Fame. As sergeant at arms, he stood six foot three inches and weighed 290 pounds, which was big enough to arrest and bring to the Senate chamber any member.

Having been coached by Knute Rockne gained an additional dimension when a star of the Knute Rockne Story was elected president in 1980. The change in party in the Senate during that election also meant a change in sergeants at arms, and Howard Liebengood replaced Nordy Hoffmann. Hoffmann tells a story about greeting the president-elect when he arrived at the Capitol before the inauguration. As they waited for the limousine, Mr. Liebengood realized that he did not know what title to use in addressing a president-elect. "Do you call him 'President-elect,' 'Governor,' or what?," he asked The Republican Leader. Senator Howard Baker said, "Well, watch Nordy, he knows." When the limousine pulled up and Ronald Reagan emerged, Nordy Hoffmann said, "Hiya, Gipper." "I couldn't do that!" said Liebengood, who decided to address the president-elect more formally. But as Nordy Hoffmann explained, "Well . . . he wasn't President, it wasn't an insult. He liked to be called the Gipper"—especially, one imagines, from someone who actually knew the legendary Coach Rockne.

During the six years that the Republicans held the majority in the Senate, from 1981 to 1987, there were three sergeants at arms: Howard Liebengood, who had first come to the Senate as a staff member of the Watergate committee; Larry Smith, at thirty-four the Senate's youngest sergeant at arms; and Ernest Garcia, the first Hispanic-American to serve in the post. As Senator Mark Hatfield said, in commending Smith's service: "The Senate Sergeant at Arms must be a politician along with the best of us. His constituency, however, is made up of 100 Senators with ample egos to be massaged." Certainly, each of these sergeants at arms performed his constituent services admirably, in the tradition set by predecessors dating back to James Mathers.

Henry Kuualoha Giugni was elected sergeant at arms on January 6, 1987. A native of Hawaii and the first Polynesian-American to become sergeant at arms, Giugni had previously served for twenty-four years, from 1963 to 1987, as administrative assistant to Senator Daniel Inouye. He knows the Senate, its members, its staff, its physical plant, and its multitude of needs.

From modest beginnings, the office of sergeant at arms and doorkeeper of the Senate has developed over two centuries into the largest single entity within the Senate. Today, that office comprises an administrative services organization employing, as of this date, 1,465 persons and involving a dozen major departments and activities. The Senate would have a difficult time functioning without its Capitol police, computer specialists, janitors, postal workers, parking attendants, carpenters, or barbers, all of whom perform their duties under the careful eye of the Senate sergeant at arms.

Mr. President, I ask unanimous consent that a list of all the Senate sergeants at arms, from 1789 to 1989, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SENATE SERGEANTS AT ARMS, 1789–1989

James Mathers, April 7, 1789 to September 2, 1811.

Mountjoy Bayly, November 6, 1811 to December 9, 1833.

John Shackford, December 9, 1833, to his death (date unknown) in 1837.

Stephen Haight, September 4, 1837 to June 7, 1841.

Edward Dyer, June 7, 1841 to December 9, 1845.

Robert Beale, December 9, 1845 to March 17, 1853.

Dunning R. McNair, March 17, 1853, to his death (date unknown) in 1861.

George T. Brown, July 6, 1861 to March 22, 1869.

John R. French, March 22, 1869 to March 24, 1879.

Richard J. Bright, March 24, 1879 to December 18, 1883.

William P. Canady, December 18, 1883 to June 30, 1890.

Edward K. Valentine, June 30, 1890 to August 7, 1893.

Richard J. Bright, August 8, 1893 to February 1, 1900.

Daniel M. Ransdell, February 1, 1900 to August 26, 1912.

F. Nordy Hoffman, December 18, 1975 to January 4, 1981.

Howard S. Liebengood, January 5, 1981 to September 12, 1983.

Larry E. Smith, September 13, 1983 to June 2, 1985.

Ernest E. Garcia, June 3, 1985 to January 5, 1987.

Henry K. Guigni, January 6, 1987 to present.

Mr. BYRD. I yield the floor.

Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. I thank the Chair.

Mr. President, I assume it is in order to speak on the FSX issue which is before the body.

The PRESIDING OFFICER. That is the pending business.

DISAPPROVING THE EXPORT OF TECHNOLOGY TO CODEVELOP OR COPRODUCE THE FSX AIRCRAFT WITH JAPAN

The Senate continued with the consideration of the joint resolution.

Mr. MURKOWSKI. Mr. President, the Senator from Alaska has for some time, as a member of both the Foreign Relations Committee and the Intelligence Committee, had more than a passing interest on the status of the sale of our technology to our allies friend and the Japanese. More specifically, as it relates to the issue of the FSX.

I do not question the importance of our relationship with our friends and allies in Japan. It has been cited time and time again that it is the most important bilateral relationship in the world. Our former Ambassador to Japan, Ambassador Mike Mansfield, has echoed this on numerous occasions. In fact, there is somewhat of a joke that was uttered on occasion by Prime Minister Nakasone, that as a consequence of Mike Mansfield's comments on the importance of this relationship being the most important bilateral relationship, bar none, the Japanese were referring to our Embassy in Japan as the bar-none ranch. I think that little story relates, again, our fondness for the extraordinary relationship which we enjoy with the Japanese.

However, as a number of my colleagues have indicated, as evidenced by the action taken in the Foreign Relations Committee yesterday with regard to the Dixon amendment, there is concern on how the FSX agreement was initially negotiated. I think if one goes back and reviews to the original MOU that was signed back in November of 1988, it did not address adequately the issue of coproduction. Safeguards on technology transfers were also inadequate, especially for flight controls and mission controls. The MOU did not leverage-in a position for the United States, clearly defining and insuring the role we would play.

Now we are satisfied that in April modifications were made that have dramatically improved the MOU. The MOU now covers codevelopment and production, but, Mr. President, it only covers development and production of the first six airplanes. Production share and technological transfer have been clarified in side letters, but in the early 1990's, we will have to negotiate new MOU to cover production of the additional production of approximately 130 planes.

One wonders, and I think it is quite legitimate, to question what leverage we are going to have in the 1990's? It was interesting to note in the Foreign Relations Committee yesterday Secretary Cheney, Deputy Secretary Eagleburger, and Secretary Mosbacher indicated they were, so to speak, the new kids on the block. They had not negotiated the November 1988 MOU.

Mr. President, we have the same exposure associated with what will happen in the early 1990's. Currently, the MOU does not address production of the engine. We want to build them, obviously. Well, so does Japan. One would ask why we do not settle this now. If this were a private business negotiation, every effort would be made to reduce the areas of misunderstanding so we can focus in on our respective roles in the manufacture and production of the engine.

So that disturbs me. We requested clarifications on coproduction and technology safeguards and we do have a better agreement than we had in November, but there are still concerns over the FSX, as I have indicated, and I am glad that many of my colleagues share that concern. I see my friend from Illinois is on the floor, who had led this issue, pointing out some of the inconsistencies associated with it.

I think there is another issue that we simply cannot ignore; and that is, can we separate the FSX from the general trade debate with our friends, the Japanese? Obviously, it is difficult not to address trade considerations when we consider major sales of technology. To some, this agreement symbolizes Japan's willingness to place considerations of commerical nature over those of security. We have already debated the question of why Japan did not buy off the shelf. I think it is a foregone conclusion, as noted by Secretary Cheney, Secretary Mosbacker and Deputy Secretary Eagleburger that, indeed, if the FSX agreement falls through, the Japanese will go ahead and produce their own indigenous fighter, regardless of the cost.

We have already addressed the issue of why Japan did not buy, off the shelf, the F-16's. Some say that if the agreement fails Japan will go elsewhere, to Europe. I do not think they will, because more often than not, the European technology is for twin engines. From time to time, we have to remind our Japanese neighbors that it was the United States flag that was flying over vessels in the Persian Gulf, and is still flying over those vessels, that ensured the free flow of oil for the benefit of the world, but mostly for Japan.

Now, as we reflect on the merits of my resolution, I think it needs an examination, Mr. President, because there is strong evidence that Japanese corporations have assisted Libya in the fabrication of metal components for a chemical war weapons arsenal. This is a matter of public record.

As a member of both the Foreign Relations and the Intelligence Committee, I have an opportunity to assess security documents. But this is a matter of public knowledge, and it has appeared through various media in Japan that, indeed, Mitsui, Toshiba, to name a few, as well as Japan Steel Works, have played a role in fabricating portions of the metallurgical facilities that were built out in the desert of Libya.

Now, Japanese assistance in any form to the Libyan chemical weapons programs undermines the trust and the confidence necessary for the security relationship between the United States and Japan. From the standpoint of policy, it is my hope that my resolution would be in the sense of the Senate that the proposed export of technology, defense articles, or defense services, pursuant to an agreement with Japan to codevelop or coproduce the support fighter, or the FSX weapon system, should not be implemented, Mr. President, until the President of the United States receives assurances from the Government of Japan and transmits those assurances to the chairman and the ranking members of the Committee on Foreign Relations of the Senate two things: One, Japanese personnel involved with any respect of chemical weapons production have been withdrawn from Libya, and no Japanese assistance of any kind will be provided in the future to the Libyan chemical weapons program.

Now, I do not think that is being unreasonable. We are simply reminding our Japanese friends of the moral fallout associated with chemical weapons and germ warfare. We abhor the advancement of this technology, and it is appropriate that we use the leverage we have in the FSX, which is before us, to convey that.

I want to clarify for anyone who doubts the position of the junior Senator from Alaska with regard to the motion which was before the Foreign Relations Committee yesterday. It was a motion of disapproval, and the Senator voted in favor of the administration's position, to go ahead with the FSX argreement.—Not that I believe it is ideal, as I have already outlined, but simply because it is the best arrangement we can make under the circumstances. But this gives us an opportunity to send a message, and that is the basis for the resolution, as I have proposed, or will propose, given the opportunity.

I think it is further appropriate to note that the Parliamentarian can accommodate this resolution by eliminating the identification of the country by the name Libya. If that will satisfy the Parliamentarian, that is what the Senator from Alaska proposes to do. So it is not the intent of this Senator to go on a bashing mission with our friends, the Japanese. I have the utmost respect for them, and I have dealt with them in business for over 23 years, and they respect consistency and strength and continuity; and if you are weak, you might think you are taken advantage of. They simply feel that they are doing business with someone who perhaps does not have the expertise or commitment of others.

So I simply recognize that for what it is, good business dealings. But there are sources of frustration. It is important that we have an opportunity in this body to express and expand on those areas of frustration, because they represent attitudes prevailing in the United States, and this is an appropriate forum. Japan has benefited from open investment policy in the United States. We have expressed concern over increased Japanese Government participation in investment. We have seen the Japanese investing in excess of $2 billion in construction in the United States. There is absolutely nothing wrong with that. We would simply like to have the opportunity to do the same thing in Japan. Our investments in Japan, as far as commercial construction, have consisted primarily of two Mrs. Fields' cookie store fronts in downtown Tokyo. You offset that with $2 billion worth of construction mainly in New York, California and Hawaii, $2 billion, and you have some idea that indeed we are hardly in pace with our Japanese friends.

We have attempted to negotiate at great length the participation of United States firms in the Kansai International Airport project, one of the construction wonders of the world, currently being built in Japan. We have been absolutely stonewalled. We are not interested in going over and bidding on rock laying or highways, but what we have to offer is architectural, engineering, design, construction supplies; we have expertise in people movers at airports, in spite of what you think when you go out to Dulles, and we have expertise in flight kitchens, and air traffic control. We want the opportunity to bid on these portions of the project.

We also have frustration seeing more and more, not foreign investment from Japan, which I encourage, but foreign government participation in that foreign investment. I would advise my colleagues that there is a significant difference, because oftentimes when foreign governments invest they provide financing at less than market rates

It provides a participation by financiers in the sense that they take an equity interest; they can come in and penetrate a market at lower than cost, until the competitors have gone. These are things we have to be sensitive to, and we have to have an open communication. I can say that from the standpoint of representatives of Japan in the United States the Ambassador Matsunaga and the Embassy staff have been both forthcoming and responsible in the junior Senator's efforts to communicate his concerns. I am not being at all critical of that. They have been very, very responsive. I simply think we have to have plain, down to Earth talk.

Now, to give you some idea, prior to closing, Mr. President, we have seen one of our more colorful investors, T. Boone Pickens, decide that he is going to participate in the miracle of Japan. He purchased 21 percent of Koito, which is a large auto parts manufacturing supplier which supplies primarily to Toyota.

Now he currently owns more stock than Toyota owns in Koito. The significance is that currently the Toyota group has four board members on the Koito board. T. Boone Pickens, with 21 percent of the stock, approximately, cannot get a seat on the board of directors.

The discussion has gone something like this.

"Why shouldn't I have the same representation?"

"Well, how did you finance your stock?"

"I understand that in this country it is nobody's business. If you own a stock and paid for it, that is enough."

"Well, how did you finance your stock?"

It even goes further, Mr. President. It moves into the area of the shareholders. Obviously, he is a shareholder, a significant shareholder with 22 percent.

He has asked to take his attorney to the shareholders' meeting as well as an interpreter. He may be denied because it has been asserted that only he can go to represent the interest of the shareholder since he was the shareholder representing T. Boone Pickens' interest.

So he countered by offering to sell a portion of his stock to his attorney as well as his interpreter. He was denied that right because of a timeframe, in order for them to be eligible to come, that had to be concluded prior to the annual shareholders' meeting in June, the stock would have to be transferred 60 days before the meeting.

So here we have an occasion, rather humorous, of a colorful United States investor going to the Japanese market for a significant acquisition, and he may go into the shareholder meeting without an interpreter, and obviously until he can read the minutes and have them transcribed at a later date he may be at a significant disadvantage.

I am just raising this to point out that indeed the Japanese business community has not prepared for the extended interest of United States investors and they really do not know how to handle it as is indicated by the steps to date.

It will be interesting to see what ultimately happens. I would not be surprised if the Japanese simply offer him twice his investment to encourage him to leave with a profitable return. Hopefully, T. Boone Pickens will not care to do that.

Again, as we look at other areas, when we raise burden sharing, we are told to look at the increase in Japan's foreign aid. We are very pleased that Japan increased their aid. But it is important that we look at how the aid is spent because in reality it is tied to the purchase of goods from Japan. Sixty percent of Japan's foreign aid to the LOC's is not grants; it is loans. That compared with 9 percent of U.S. aid in loans.

So what the Japanese have done, business as usual, is simply tied their assistance as loans which will result in purchases of Japanese products. There is nothing wrong with that by any means, but it does reflect a little different point of view from the standpoint of the assistance.

We must share the blame. We are not aggressive enough in pursuing commercial interests, but I have watched U.S. companies go into the market. One of the excuses is you cannot come into the Japanese market because you do not have the experience.

I can embellish at great length with adjectives on that, but the reality is, of course, you are in a catch-22. How are you going to get the experience if you do not get in?

I have been critical of the Department of Defense and the State Department for not seeing the relationship between our economic well-being and the national security. An example that comes to mind is bid rigging on United States bases in Japan.

Mr. President, I ask unanimous consent that a response I received from the Navy covering this be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE NAVY,
OFFICE OF THE ASSISTANT SECRETARY,
Washington, DC, April 10, 1989.

Hon. FRANK H. MURKOWSKI,
U.S. Senate,
Washington, DC.

DEAR SENATOR MURKOWSKI: This is in response to your letter of February 27, 1989, requesting information concerning bid-rigging activities at Yokosuka Naval Base, Japan. A Naval Investigative Service (NIS) investigation uncovered collusive bidding among some 160 contractors, organized as an association, officially known as the "U.S. Military Construction Safety Technical Research Association". The unofficial title was the "Star Friendship Association". The NIS investigation concentrated on the larger or more active contractors involved in the conspiracy.

The Japan Fair Trade Commission has also investigated the activities of the Star Friendship Association in relation to bid-rigging on construction projects ordered by the U.S. Navy. Based on this investigation, enclosure (1) notified the Officer in Charge of Construction, Far East (OICC-FE), that the Japan Fair Trade Commission was issuing warnings and mischarge payments against seventy (70) companies involved in collusive bidding in the Star Friendship Association, in violation of the Japanese Antimonopoly Act. The list of seventy companies, which you requested, is contained in enclosure (1). This list has now been publicly released in Japan.

The Commander-in-Chief U.S. Pacific Fleet has forwarded proposed debarment actions against nine Japanese contractors from Yokosuka to this office as a result of the NIS investigation which developed adequate evidence of collusive bidding practices on U.S. Navy contracts. Those nine firms recommended for debarment are included in the list of seventy companies found guilty of violating Japan's Antimonopoly Act.

The Navy Debarment Committee is reviewing these cases at the present time and will be making a recommendation concerning their disposition in the near future.

I have been informed by the NIS that investigations of collusive bidding have also been conducted in Okinawa.

If we can be of further assistance, please let me know.

Sincerely,

EVERETT PYATT,
Assistant Secretary of the Navy,
Shipbuilding and Logistics.

FAIR TRADE COMMISSION,
Tokyo 100, Japan, December 8, 1988.

Mr. J.B. GREEN, JR.,
Captain, Civil Engineer Corps, U.S. Navy,
Officer in Charge of Construction Far East.

DEAR MR. GREEN: Enclosed please find a copy of our press release, to be made public today, with respect to the warning and surcharge payment orders against the bid rigging on construction projects ordered by the U.S. Navy's OICCFE. In addition to this, I am enclosing a list of the 70 companies which the Fair Trade Commission (FTC) ordered to pay a surcharge under Section 48-2 of the Antimonopoly Act. I would be very grateful if you would keep this list confidential, because the FTC will not disclose the names of the companies involved except for those listed in the Tokyo Stock Exchange.

I would like to thank you very much for your cooperation during the course of our investigation.

Sincerely,

MITSURU SUZUKI,
Director, First Investigation Division.

DECEMBER 8, 1988.

FAIR TRADE COMMISSION

Having investigated the case of suspected violation of the Antimonopoly Act with respect to bidding on construction projects ordered by the United States Navy's Officer in Charge of Construction Far East (hereinafter referred to as OICCFE), the Fair Trade Commission (FTC) has today issued a warning and surcharge payment orders as described below.

1. Parties subject to the warning and to the surcharge payment orders:

Warning—139 members of the former US Military Construction Safety Technology Research Group and Kajima Corporation.

Surcharge payment order—69 members among the members of the former US Military Construction Safety Technology Research Group—the members who received orders for the aforementioned construction projects (excluding those who face a surcharge payment of less than 200,000 yen) and Kajima Corporation.

Note: The former United States Military Construction Safety Technology Research Group had its office in Yokosuka City, Kanagawa Prefecture. Its membership consisted of entrepreneurs who submit bids on construction projects, etc. for which orders had been placed by the OICCFE. Voluntarily established on March 27, 1984, it was ultimately dissolved on October 8, 1987.

2. Outline of the illegal act and application of the law thereto:

The former United States Military Construction Safety Technology Research Group (hereinafter referred to as the Group), substantially restricted competition in the field of transactions involving construction projects ordered by the OICCFE (hereinafter referred to as US Navy-ordered projects) by having its members designate expected order recipients from among its members for construction projects ordered during the period March 27, 1984 to October 8, 1987. This act constitutes a violation of Section 1, Clause 1, Article 8 of the Antimonopoly Act.

Kajima Corporation (hereinafter referred to as Kajima), in collaboration with members of the Group, also designated expected order recipients, thereby substantially restricting competition, against public interests in the field of transactions involving US Navy-ordered projects. This act constitutes an undue trade restriction as stipulated in Clause 6, Article 2 of the Antimonopoly Act and a violation of Article 3 of the Act (see the appendix "Background Information and Application of the Law").

3. Outline of the measures taken:

(1) Warning—As described above, the Group and Kajima had been engaging in illegal acts. The FTC issued a strong warning to Kajima and the former members of the Group as the Group had been dissolved in the interim. The warning obliged the parties involved to refrain from further such activity and instructed that necessary measures be taken to prevent a recurrence of illegal acts.

(2) Surcharge payment order—Since the aforementioned illegal acts under Clause 1,

Article 7-2 of the Antimonopoly Act, the FTC ordered 69 former members of the Group and Kajima to pay a surcharge amounting to 1.5 percent of the sales generated from US Navy-ordered projects that had been undertaken during the period of illegal activity as described below.

(A) The period during which the illegal acts were committed.

(i) Commencement date: The date of first bidding on or after March 27, when the Group was established.

(ii) Termination date: October 8, 1987, on which date the Group was dissolved.

(B) Surcharge: The total amount is set at 289,890,000 yen.

(C) Payment deadline: February 9, 1989.

APPENDIX—BACKGROUND INFORMATION AND APPLICATION OF THE LAW

1. BACKGROUND INFORMATION

(1)(A) The United States Military Construction Safety Technology Research Group (hereinafter referred to as the Group) had its office at 4-banchi, 3-chome, Wakamaisu-cho, Yokosuka City, Kanagawa Prefecture. Its membership consisted of entrepreneurs who submit bids on construction projects, etc. that had been ordered by the Officer in Charge of Construction Far East (hereinafter referred to as OICCFE), under authority of the United States Navy. The Group was voluntarily established on March 27, 1984, set up its bylaws, instituted the post of chairman, secretary general, etc., and had 145 members as of October 8, 1987.

Though its bylaws stipulated that the Group's purpose was to conduct research into safety technology relating to the aforementioned construction projects, the Group was actually attempting to designate order recipients of the construction work projects.

(B) Members of the Group received most of the orders for construction projects that were tendered in Japan by the OICCFE (hereinafter referred to as US Navy-ordered projects).

(C) Kajima Corporation (hereinafter referred to as Kajima) is headquartered at 2-ban 7-go, 1-chome, Motoakasaka, Minato-ku, Tokyo, and engages in the construction business. Although it did not become a member of the Group, Kajima has participated in bidding on US. Navy-ordered projects.

(D) The OICCFE offered the majority of the construction projects via the tendering process.

(2)(A) Prior to the establishment of the Group entrepreneurs participating in the bidding for US Navy-ordered projects formed an organization called Yokakai which attempted, among other things, to prevent the prices of the projects from falling. However, because the number of non-Yokakai bidders increased after 1983, the organization began to experience difficulties in achieving its objectives.

Therefore, the directors and officers of Yokakai decided to set up the Group as a new entity to replace Yokakai. On November 10, 1983, they held a meeting to explain their objectives at Yokosuka Kenko Kaikan, located in Yokosuka City, Kanagawa Prefecture. The approximately 110 entrepreneurs, participating in the bidding for the aforementioned projects who were present at the meeting, were requested to join the Group.

Subsequently, the directors and officers of Yokakai and others held a general assembly to establish the Group at the Yokosuka Kenko Kaikan on March 27, 1984.

(B) At the aforementioned general assembly, the following matters relating to US Navy-ordered projects were decided by the Group:

(i) Henceforth, members of the Group would designate the one who should receive orders (hereinafter referred to as expected order recipients) after holding consultations among participants in the bidding.

(ii) To implement (i),

(a) members of the Group, upon receiving tendering information, would report the project number and project name to the secretariat of the Group;

(b) the secretariat and directors of the Group, by taking part in meetings to get instructions at projects sites, etc., would endeavor to obtain information concerning those who would be expected to participate in the bid; and

(c) the secretariat of the Group would notify expected bid participants of the date, time and venue of the meeting where expected order recipients would be determined (hereinafter referred to as an arrangement meeting).

(C) The Group, by holding arrangement meetings on the basis of the aforementioned criterion, had its members who received tendering documents for US Navy-ordered projects determine expected order recipients. In addition, matters were arranged in such a way that the bid price of the expected order recipients would be the lowest by arranging the bid prices of other participants.

(3) Kajima attended both the meeting to explain objectives and the general assembly to establish the Group. In collaboration with the members of the Group at arrangement meetings, it also determined expected order recipients and arranged matters in such a way that the bid price of the expected order recipients would be the lowest by arranging the bid prices of other participants.

(4)(A) The Group was dissolved as a result of a resolution adopted at its extraordinary general assembly held on October 8, 1987, at Hotel Centraza, located in Yokosuka City, Kanagawa Prefecture.

(B) The former members of the Group and Kajima have not designated expected order recipients on the basis of the aforementioned criteria since the dissolution of the Group.

2. APPLICATION OF THE LAW

(1) As described in the above items (1), (2), and (4), the Group was a trade association subject to Clause 2, Article 2 of the Antimonopoly Act. The Group worked to substantially restrain competition in the field of transactions of US Navy-ordered projects by having its members designated expected order recipients for the projects. Such actions constitute a violation of Section 1, Clause 1, Article 8 of the Antimonopoly Act.

(2) As described in the above items (1), (2), (3), and (4), Kajima violated the public interest by working in collaboration with members of the Group, to substantially restrain competition against public interest in the field of transactions involving US Navy-ordered projects by determining expected order recipients with regard to the projects. Such actions constitute undue restraints of trade as set forth in Clause 6, Article 2 of the Antimonopoly Act, and constitute a violation of the regulations in Article 3 of the Act.

LIST OF 70 COMPANIES

1. Ikeda Kensetsu.
2. Ishimoto Kensetsu.
3. Inoue Kogyo.
4. Usuko Sangyo.
5. Umemura Gumi.
6. Ohiwa Gumi.
7. Okayama Komuten.
8. Ebara Plant Kensetsu.
9. Gakunan Kensetsu.
10. Kajima Road.
11. Kato Tokoten.
12. Kaishin Kogyo.
13. Kitamura Shokai.
14. Kinnou Kensetsu.
15. Kuribayashi Kensetsu.
16. Keihin Densetsu.
17. Kouka Plant.
18. Koudensya.
19. Goyo Kensetsu.
20. Kitashio Industrial.
21. Saito Denki Syokai.
22. Sakakura Toso.
23. Sanei Kohji.
24. Sanwa Daiei Denki Kogyo.
25. Shimizu Kensetsu.
26. Shinyo.
27. Shinwa Biso.
28. Swan Shokai.
29. Seibu Sogo Setsubi.
30. Sogo Kensetsu Kogyo.
31. Taisei Kensetsu.
32. Taiken Kogyo.
33. Taihei Denki.
34. Takenori.
35. Chuo Kensetsu.
36. Chiyoda Chemical Engineering & Construction.
37. Denki Kogyo.
38. Toa Kensetsu Kogyo.
39. Toho Inc.
40. Toho Densetsu Kogyo.
41. Toyo Kensetsu.
42. Toyoko.
43. Nagasaki Jyotaki Kensetsu.
44. Nagisa Kogyo.
45. Nishimatsu Kensetsu.
46. Nippi Kosan.
47. Nihon Kigyo.
48. Nihon Kokan Koji.
49. Nihon Tatemono.
50. Nihon Tsushin Kensetsu.
51. Nihon Denki Shijyo Kaihatsu.
52. Nihon Nekka Kogyo.
53. Nohmi Bosai Kogyo.
54. Hanasaki Sangyo.
55. Fuji Sogyo.
56. Fuso Denki.
57. Howa Sangyo.
58. Hokuto Kensetsu Kogyo.
59. Hosaka Kensetsu.
60. Maeda Road.
61. Mabuchi Kensetsu.
62. Mamoru Kensetsu.
63. Mikawa Toso Kogyo.
64. Mitaka Kogyosyo.
65. Miyuki Gumi.
66. Yokoso.
67. Wakachiku Kensetsu.
68. Hitachi Zosen.
69. Fuji Kensetsu.
70. Kajima Corporation.

Mr. MURKOWSKI. But the facts are that there are over 140 accounts that have been communicated to the United States Navy concerning bid rigging in Japan on approximately 70 of those that were noted, action has been taken by the Japanese Government. Yet our Department of Defense has failed to respond in kind by removing these particular bid rigging corporations from their list of qualified contractors.

We have had some discussions with the Secretary of Defense on this matter. I would hope it gets his attention, because what we are doing here is we are excluding U.S. firms that want to participate in construction projects on U.S. bases in Japan from being allowed to come in and bid competitively.

It is rather interesting to note that those who are drawing up the specifications for the most part are Japanese nationals that are hired to work in the base procurement offices. One wonders why the U.S. Navy and Department of Defense do not give him U.S. personnel, who are over there stationed, or their dependents.

Further, both my colleagues and I have had great concern over the recent negotiations which have been taking place with regard to the drift-net interception matter, and we have seen not only the Japanese, but the Koreans and Taiwanese become involved in the high seas interception of salmon under the guise of a fishery known as a squid factory.

What happens is our salmon, during the juvenile stage are intermingling in the North Pacific and they are growing up out there, and this is way beyond 200 miles.

We have seen situations where as many as 400 vessels from one country, Taiwan alone, are out with nets 30 miles long.

The ability to patrol that area is very, very limited, but when you have the Japanese, the Taiwanese, and the Koreans out ther with nets, those are horribly efficient. They take in not only squid but salmon as well as marine mammals, seals, dolphins, sea birds, and we have a real problem and the ability to get their attention is rather difficult.

We are involved in negotiations currently with the Japanese and while we have found the Japanese responsive in some respects to a number of observers on the boat we are only talking about 22 observers and we are talking about 350 boats and also talking about them increasing their surveillance from 5 boats to 6, hardly adequate. And they are wanting to increase their northern boundaries approximately 2 degrees or 120 miles.

Obviously, this will enable them to intercept more immature salmon and simply expand the problem.

So the senior Senator from Alaska and I feel quite strongly that now is the time to send the strong message that somebody has to speak for the fish or we are not going to have any because we have this unlimited fishery occurring out there. It is unfair to focus just on the Japanese because of the Koreans and the Taiwanese. We do not even have an opportunity to initiate the formal discussion on a restriction for drift-net interception, but indeed we have to concern ourselves with where we leave off in our negotiations with the Japanese, because if we ever get one we will start at that point.

We simply are losing our salmon resources to interception on the high seas, and at a time when we have had the disastrous oilspill in Prince William Sound and seen a tremendous danger on the replenishment of fisheries in that area, we have to do everything we can on the high seas to insure that the runs will be maintained. We are not talking just about Alaska. We are talking about California. We are talking about Oregon, Washington, British Columbia, as well as Asiatic stocks.

So in conclusion, Mr. President, I think that I shared with my colleagues some understanding over the concern that we have and the idea that perhaps the FSX is an appropriate vehicle to communicate those concerns, and I am sure, if the tables were turned our friends in Japan would rightly express their own concern.

Lastly, as a consequence of a briefing that I had down at the Pentagon this morning, I would urge that my colleagues join with me and the senior Senator in expressing a concern over the current situation in Panama as it relates to an area in our national security that is outside the parameters of our authority where our military personnel will be involved; namely, the safeguards of the Panama Canal corridor.

But, adjacent to that, approximately 20 miles and outside our scope of authority is a pipeline that runs 81 miles from the Pacific coast to the Atlantic. It carries some 600,000 to 800,000 barrels of Alaskan North Slope oil each day.

The safety of that pipeline is directly related, obviously, to the necessity that we have that oil in the gulf coast refineries, because that oil after it is transferred down from Alaska on the Pacific side and moves through that pipeline on the 81 miles across the isthmus it is then picked up in smaller U.S.-flag vessels and dispersed throughout the gulf coast.

The pipeline is currently under the control and the defense of Noriega's national guard. I encourage my colleagues to recognize the significance that this oil represents some 5 to 8 percent of the total crude oil produced in the United States each day. And when one considers the calamity associated with concerns over price and pull down of inventories when the pipeline from Prudhoe Bay to Valdez was interrupted after the spill and the reaction, one should note the vulnerability that we have from the standpoint of our national security in not being able to include this pipeline in our overall consideration of our position in Panama.

I thank the Chair. I recognize my colleagues have been waiting for some time.

I see the majority leader on the floor. I will be willing to yield to him.

The PRESIDING OFFICER. The majority leader.

Mr. MITCHELL. I thank the Senator from Alaska for his courtesy. It is my intention now to propound a unanimous-consent request regarding the pending matter. Let me describe it in advance so that Senators will be aware of it before I formally propound it.

It is my intention, after consultation with the managers on both sides of this legislation, the distinguished Senators from Illinois in behalf of the resolution of disapproval and the distinguished Senator from Indiana in opposition to the resolution of disapproval, to shortly recess the Senate, now having completed over 4 hours of debate on this matter today. It is my intention to have the Senate return at 9:30 on Tuesday morning, go back to this matter at 10 o'clock on Tuesday morning, to then have 2½ hours of further, and hopefully final, debate on this resolution, recess for the respective party caucuses between 12:30 and 2:15, and a final vote on this resolution at 2:15 with no amendments to it being in order.

If this resolution of disapproval is defeated, as part of my unanimous-consent request, I will ask that the Senate then proceed to the immediate consideration of Senator BYRD's resolution of approval of the transaction—that is Senate Joint Resolution 123—that there would be, in my agreement, no request for limitation of time or with respect to possible amendments to Senator BYRD's resolution when it comes before the Senate under the circumstances I have just outlined.

I will also ask that I, after consultation with the distinguished minority leader, have the authority to turn to consideration of the supplemental appropriations bill should this matter go on longer than anticipated. As I have said many times and as I believe all of my colleagues agree, the supplemental appropriations bill is of critical importance, and we must act on it next week before going out on recess next Friday.

UNANIMOUS-CONSENT REQUEST

Mr. MITCHELL. Mr. President, I now ask unanimous consent that no amendments or motions be in order to Senate Joint Resolution 113.

I further ask unanimous consent that a vote on final passage of Senate Joint Resolution 113 occur at 2:15 p.m. on Tuesday, May 16.

I further ask unanimous consent that if Senate Joint Resolution 113 is defeated, then the Senate proceed to the immediate consideration of Senate

Joint Resolution 123, Senator BYRD's resolution of approval.

I further ask unanimous consent that the majority leader after consultation with the minority leader may at any time turn to consideration of the supplemental appropriation bill.

Mr. MURKOWSKI. Reserving the right to object, for the benefit of the majority leader and my colleagues, I had hoped that there could be an accommodation made, and it may be possible, I say to the majority leader, that we can work out an agreement on a resolution which, like Senator BYRD's resolution, was discussed at substantial length in the Foreign Relations Committee and has been approved by the administration.

The resolution related to Japanese involvement in assisting the development of chemical warfare capabilities in Libya, in metallurgical facilities specifically, and having the resolution as a freestanding resolution right after the disposition of the Dixon resolution, recognizing the leader has changed the order. I had been assured that a majority of my colleagues on the Foreign Relations Committee at least would support this freestanding resolution.

It is my understanding the Parliamentarian has had some objection because it deals with a third country. I find the interpretation rather ironic. While we are dealing with a message to send to our allies, our friends in Japan, I feel that it is inappropriate that this resolution not receive the consideration of this body.

There have been efforts throughout the day to try to work out some accommodation. I implore the leader for consideration of this. I should also add that my senior colleague, Senator STEVENS, and I have a concern over driftnet legislation that is presently pending in the form of a resolution.

While we have few opportunities to pursue appropriate legislation, I say to the majority leader, I would wonder—and I certainly want to work toward the timeframe, but if I am precluded I must object.

Mr. MITCHELL. If I may respond to the Senator from Alaska, two points have been raised. First, with respect to the Senator's provision, I had been advised the Senator had been satisfied and did not intend to offer that as an amendment. Is that what he is now saying? Is the Senator from Alaska now saying that he does wish to offer his amendment?

Mr. MURKOWSKI. It is the intention of the Senator from Alaska to offer a freestanding resolution. That was what I intended to do in the Foreign Relations Committee and was generally agreed to as far as appropriate procedure. It was not going to be in the form of an amendment.

Mr. MITCHELL. If that is the Senator's intention, then, obviously, if it is relevant to the pending resolution, he has that right and will be able to do so, and therefore is perfectly within his rights to object to this agreement. With respect to the amendment of the senior Senator from Alaska, under the existing unanimous-consent agreement, he has no right to offer that to the pending resolution. Therefore, he is unaffected by that part of this unanimous-consent request which deals with the pending resolution, and indeed this unanimous-consent request creates a vehicle, the Byrd resolution, in the event the pending resolution is defeated, to which he could offer it.

Mr. MURKOWSKI. I appreciate the majority leader pointing out that parliamentary track. I would be willing to commit my colleague and myself for that opportunity, I say to the majority leader. I would simply, in addition, ask for the assurance to have the opportunity to bring up the resolution at an appropriate time after the disposition of the Dixon resolution of disapproval, which I understand would be the initial pending business before the Senate in the order that the Senator has outlined.

Mr. MITCHELL. I am unable to do that now because I do not, personally, know who may have objection to the Senator's resolution and in what form, and therefore this is an open-ended circumstance in which each new issue raises two new issues. I had announced yesterday that we would seek this unanimous-consent agreement today. Unfortunately, despite our best efforts of about 5 hours, we have been unable to do so, I must say in all candor, in large part because Senators, many Senators have simply not made their wishes known or taken the time and interest to be here during the period in which we are attempting to obtain this agreement. Accordingly, Mr. President, in view of the objection of the Senator from Alaska, I can see no alternative but to simply——

Mr. DANFORTH. Mr. President, will the leader withhold? I just wanted to clarify the situation before the majority leader withdrew his unanimous-consent request.

I heard most of what the Senator from Alaska said but did not hear the end. It was not my understanding that he was going to object to the unanimous-consent request. Am I wrong?

Mr. MURKOWSKI. The Senator from Alaska has indicated his willingness to try to ensure that I was given an opportunity to bring up my resolution which would be nonamendable. While, obviously, the sequence of events is within the authority of the leadership, I was under the impression it would be after the disposition of the Dixon amendment. I am not quite sure whether I understand the reason why the leader is unable to make that particular assurance.

Mr. MITCHELL. Because I do not know whether or not there is any Senator who might object to my agreeing to bring up the Senator's resolution. This is a similar situation to when, if someone here were asking me to commit to bringing up a resolution to which the Senator might have objection but the Senator was not here, the Senator would, of course, want someone to interpose that objection.

I do not know. I am advised by the staff now that the Senator's resolution is not germane to the pending resolution of disapproval, and, therefore, as with the resolution of the senior Senator from Alaska, the distingished junior Senator from Alaska could not bring his resolution up with respect to the pending resolution in any event.

So he does not lose anything by this unanimous-consent request, and he gains a possibility. It is difficult for me to understand the reason for objecting under those circumstances.

Mr. MURKOWSKI. With all due respect, I think what we are asking for is the same consideration given Senator BYRD in the manner in which his resolution is being given an opportunity to have the assurance of a vote.

Mr. MITCHELL. The difference is this: Senator BYRD's resolution is relevant to the underlying Dixon resolution. He could offer it as an amendment to the pending Dixon resolution any time he chooses. He has agreed to forbear from doing so to permit a vote on the Dixon resolution so long as he gains the ability to have his resolution voted on should the Dixon resolution fail. The distinguished Senator from Alaska is not in a comparable position. The Parliamentarian has indicated that the resolution of the distinguished Senator from Alaska is not relevant. The Senator from Alaska is not in the position to offer it as an amendment.

Mr. MURKOWSKI. In the spirit of cooperation, I would be willing, in spite of the fact that I disagree with the Parliamentarian's interpretation that a third country being named eliminates it from the appropriate procedure, to eliminate the name of the Third World country so it would conform if that would expedite the leader's efforts to proceed with this because, as the leader is well aware, I was a party to the discussion earlier in previous days, and we have proceeded through the Foreign Relations Committee in the manner in which is generally prescribed. And in the spirit of cooperation we almost had a vote on Senator BYRD's amendment as well as my own. Unfortunately, the quorum seemed to have vanished at the last minute.

So, if the leader would consider that, I would amend my resolution to conform with the Parliamentarian.

Mr. MITCHELL. I will repeat what I said before. I personally have no objection to that. But since I am unaware, I am not at this moment informed as to what Senators may or may not have objection to. I feel constrained to protect the rights of any such Senator. I think what we have gotten into here is sort of like a game of pickup sticks. Every time we pull one, two others move. So I think, as Senator BYRD often reminded me during past years or reminded all of us, there comes a time when we recognize that we just cannot get an agreement.

The rules of the Senate are that in order to get an agreement every single Senator must agree. We have reached a point where despite good faith efforts by all concerned, including the distinguished Senator from Alaska, we cannot get an agreement on it. So, therefore, there is no point in prolonging the agony today.

Mr. MURKOWSKI. If I might interrupt the leader, I am wondering if he would not agree that we had notified well in advance the significance of what we felt this meant. I feel that we are being put in a light of being responsible for objecting to what the leader wants. That concerns the Senator from Alaska a great deal because I always want to cooperate with the leadership.

I guess the nuance that I fail to understand is now that I have been willing to take my resolution and eliminate the reference to a third country, that basically should make my resolution germane, and the fact the leadership has seen fit to accommodate Senator BYRD's resolution it seems that my resolution is in the same category as his.

With all due respect, it appears the majority leader is accommodating his because it is germane.

All I am asking for is accommodate mine in the same vein.

Mr. MITCHELL. I want to make it clear, Mr. President, that I intended no criticism whatever of the distinguished Senator from Alaska. He is correct. He has raised this all along. We had a colloquy on the floor earlier this week. It is just one of those things we cannot resolve.

I am now advised that there may be objection on his side to the aspect of this request which deals with the Byrd resolution proving that if you keep a target up long enough, there will be new marksmen to shoot at it.

So, therefore, Mr. President, it now appears that we have regressed since I got up and started discussing this potential agreement. Therefore, I withdraw my request, and state to Senators that we definitely will renew the effort early next week in the hopes that by Tuesday we can reach some agreement to dispose of these matters in a manner that each Senator finds acceptable.

I simply repeat what I said yesterday. We are going to complete action on the supplemental appropriations bill, the budget conference report, and the minimum wage conference report next week. We hope also to complete action on this.

Absent agreement, why, then, it may take many, many hours, but the Senate will be in session for as many hours as it takes. I repeat: I ask all staff to notify their Senators that the previously announced schedule in which I indicated there would be no votes after 7 p.m. on Tuesday and Wednesday, and no votes after 3 p.m. on Friday, will be very difficult if not impossible to adhere to next week, particularly in light of these developments.

Senators should be prepared for the possibility of lengthy sessions and vote well into the evening every night next week as well as remaining in session for as long as it takes to pass the supplemental appropriations bill.

The Senate will not go into recess until we pass the supplemental appropriations bill. We are going to do that, whatever it takes, and I look forward to dealing with that matter when we get to it.

Now, Mr. President, I thank the distinguished Senator from Alaska very much, as well as the managers of the bill. I repeat what I said. We were not able to accomplish this agreement today. We will renew our efforts promptly on Monday morning, and perhaps by Tuesday we can do so in a manner that accommodates all Senators.

It is my expectation now that we will be recessing very shortly.

The PRESIDING OFFICER. Without objection, the majority leader's unanimous-consent request is withdrawn.

Mr. MURKOWSKI. I thank the majority leader.

Let me assure him that the Senator from Alaska is not responsible, nor did he have knowledge of any further efforts on this side to object to his motion. I want to make it clear that both myself and my colleague, Senator STEVENS, wish to pursue a clear, freestanding sense-of-the-Senate resolution before the FSX disapproval resolution under unanimous consent is finalized. But I think we have discussed that to the extent it is appropriate.

(Mr. DASCHLE assumed the chair.)

THE GLOBAL ENVIRONMENT

Mr. GORE. Mr. President, it has been quite a week where global climate change has been concerned. The week started with President Bush's administration overruling the head of the EPA, and calling for no action to respond to the greenhouse effect during the negotiations in Geneva.

On the same day that we heard the news, we found that the administration had censored the scientific testimony of a NASA scientist who was testifying before a Senate subcommittee hearing on global climate change. Then we had a period of several days during which there was enormous political controversy and a good deal of criticism coming from Senators, both on the Democratic side of the aisle and the Republican side of the aisle, urging the President to change his mind and to change his policy.

Then last night, we found that the President had made a partial change, cabling his negotiators in Geneva to put on the table a proposal for a United States-sponsored workshop on global warming. And now today, this afternoon, a statement has been released from the White House to the effect that President Bush is reconsidering his position on whether or not there should be an international convention to deal with solutions to global climate change. And he now appears to be inching toward the international convention that many other Western nations have already endorsed.

I commend the President for the small, timid step he has now taken. But in the process, I want to note the stark contrast between the response of this administration and the kind of leadership being provided by some leaders of other nations, like Prime Minister Margaret Thatcher of Great Britain, such as some of our other allies, such as the Federal Republic and France.

Once again President Bush has been dragged slowly, kicking and screaming, toward the correct position when he should have been there all along and should have been providing some leadership. And, after all, we still have nothing more than words—no concrete proposals, no suggestions on how we might solve this problem, no urging of other nations to move forward quickly. It is progress, but it is not nearly good enough.

It reminds me of the way the Bush White House responded to the Alaskan oil spill. Their initial instinct was to do absolutely nothing at all. And then, as the magnitude of the problem became more apparent and as they began to suffer enormous political damage for their failure to act, finally they managed to announce the bare minimum action necessary to be able to say that they were doing something.

That is essentially what has happened here with the announcement today on an international convention on the greenhouse effect. He is not announcing a convention. He is announcing a workshop designed to promote a better understanding of the problem

and he has said that eventually he hopes it will move toward a convention. I applaud that step, again, as far as it goes. But, Mr. President, it was only days ago that we saw the actions I referred to a moment ago.

The cable last night to the U.S. team participating in the negotiations of the response strategies working group of the International Panel on Climate Change is welcome, if late.

Let me quote from the Presidential statement that was just released. He talked about the workshop and then says, "I expect that these efforts will lead to formal negotiations on the establishment of a framework convention on global climate."

Well, I welcome this decision to finally begin recognizing the importance of global climate change as an international issue demanding attention. But it is far too early for any rave reviews of a policy developed in the atmosphere of political damage control in response to congressional pressure from Republicans and Democrats alike. It remains to be seen whether or not this administration will really find a way to become serious about this issue.

This issue is the most important environmental issue humankind has ever confronted, by far. Even with enlightened, bold leadership, it will be difficult, at best, to solve this problem. With the kind of timid, foot-dragging, belated, minimalist response that we have seen this week from the Bush White House, it is going to be much more difficult than it should be.

Mr. President, we had a hearing in the Commerce Committee just yesterday, again, on the Valdez oilspill. I must say that I felt in that regard as well that administration's response was very timid to an environmental catastrophe and only after much pulling and prodding did they finally put the Coast Guard in charge. And they accepted at face value some of the statements from Exxon when they should not have been accepted at face value.

I think one of the reasons the administration is having a difficult time dealing with some of these environmental questions is the list of appointees to top positions dealing with environmental policy.

First of all, I want to note and underscore the appointment of William Reilly as head of the Environmental Protection Agency. This was an outstanding selection. He is doing an outstanding job. He was expected to. His credentials are impeccable. He is performing up to and even exceeding the high expectations people had for him in that position.

But there are many other appointees to key positions in parts of the Federal Government dealing with the Federal Government's resources and environmental policies where their points of view are diametrically opposed to the kind of concern that William Reilly has always expressed with regard to the environment.

I will ask unanimous consent to have printed in the RECORD at the conclusion of my remarks a column that appeared recently by John Oakes, detailing some of these concerns.

I will also, with permission, put in a copy of a more lengthy speech which I made recently on the subject of global climate change.

Mr. CHAFEE. I wonder if the Senator would reply to one question?

I did hear, yesterday, the Senator make that same comment about a number of individuals. I am curious about whom he is talking. I am not trying to embarrass anybody. But, first, under this administration there have been precious few people appointed. In the Interior Department, we have others here who are more familiar with that than I am, but outside of the Secretary of the Interior, for example, there are none of the others in major positions appointed that I know of.

It would be helpful to me, anyway, to know whether the Senator is referring to holdover individuals from the prior administration or this administration's appointees, who fall in the category that he was discussing of 10—I think yesterday the Senator said "clones of James Watt."

Mr. GORE. I will be glad to share with the Senator the analysis of this subject to which I referred earlier. I will provide it for the RECORD and provide a copy to the Senator personally.

The individuals fall in both categories and the reference to the former Secretary of the Interior, James Watt, is not a loose rhetorical device because, as the Senator will see from the analysis, many of the individuals who are mentioned in the analysis have had a very close working relationship on the subject of environmental policy with James Watt.

As the article will make clear, there are quite a few of them. I will be glad to share it with the Senator.

Let me just conclude, if I can, by saying that I do welcome the step which has been taken today. It is the very least that could have been done in response to the enormous political criticism that the administration faced for appearing to completely reverse its commitment during the campaign of last year to be active on environmental issues and on the issue of global climate change in particular. But it falls far short of what we really need in the way of activists, bold leadership in taking this Nation to the forefront of the issue and helping to organize an international response to the most serious environmental problem we have ever faced.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 29, 1989]

BUSH "ENVIRONMENTALISTS"—WHO'S WATT, AND WHY

(By John B. Oakes)

If President Bush believes that all he had to do to prove himself an "environmentalist" was to name William K. Reilly head of the Environmental Protection Administration, he is dead wrong.

The President's muted reaction to the Alaska oil spill is strong evidence that he fails to understand what environmental leadership is all about. Even stronger evidence comes from the caliber of his top-level environmental appointees—E.P.A. alone accepted.

The appointment of Manuel Lujan, Jr., an amiable New Mexico politician, to head the Interior Department was bad enough. But what is one to make of the decision to give James F. Cason, a clone of Ronald Reagan's first Interior Secretary, the savagely anti-environmental James G. Watt, controlling power over the Forest Service?

Or of the equally disturbing appointment of James Ridenour, described by informed Indiana environmentalists as Mr. Watt's "ideological soul mate," to be director of the National Park Service?

Or of the nomination of Delos Cy Jamison, at one time an aide to Mr. Watt and more recently to a virulently anti-conservationist Montana Congressman, to head the Bureau of Land Management? That is the agency responsible for the use (and misuse) of some 300 million acres of public lands.

Or of the proposed nomination of Constance Harriman, a lawyer in the Interior Department with minimal environmental but strong political qualifications, to the crucial post of assistant secretary in charge of fish, wildlife and parks?

Or of the failure to revive the moribund Council on Environmental Quality, the Congressionally mandated long-range advisor to the White House on environmental affairs?

As a high official of the Reagan Interior Department, Mr. Cason has promoted Federal giveaways of shale-oil claims (some have been sold to claimants for $2.50 an acre and immediately resold to speculators for $2,000). He has undercut regulations against strip mining. He has pushed for oil and gas leasing in the very national forests that, as Assistant Secretary of Agriculture, he is supposed to protect.

The Forest Service is under tremendous political pressure to continue the subsidized devastation of the nation's most valuable timberlands—for benefit of a few American lumber companies and many Japanese consumers. Mr. Cason's appointment can only add to that pressure.

His record is so bad that leaders of 10 national environmental organizations have written President Bush that "given Mr. Cason's proven record of antagonism toward the environment and his extreme bias in favor of those who financially benefit from the exploitation of the nation's public land resources, he is unsuited for the position to which he has been nominated."

Of similar stripe is Mr. Ridenour, new director of the National Park Service, who was finance chairman for one of Vice President Quayle's earlier campaigns and later director of Indiana's Department of Natural Resources.

As such, Mr. Ridenour consistently favored commercial development over environmental protection. In one suit involving destruction of a historic site, an Indiana court held he had acted "not solely for

public purposes and in good faith but instead in bad faith and for the benefit of private persons and entities." He was sworn in last week.

Mr. Jamison has been the cattlemen's, oil men's, lumber men's and miners' best friend as a staff aide on the House Interior Committee. If he is confirmed as director of the Bureau of Land Management, the erosion, pollution and deforestation of America's already gravely mutilated and overgrazed public lands will certainly continue with enthusiastic support from the top.

What these various appointments say is that while President Bush may talk a good line—on the destruction of Brazilian rain forests, for example, or control of global warming—when it comes to the crucial domestic environmental issues with political overtones, he folds up and silently steals away.

That isn't good environmental leadership. It isn't good economics. It isn't even good politics.

REMARKS OF SENATOR AL GORE, FORUM ON GLOBAL CHANGE AND OUR COMMON FUTURE, NATIONAL ACADEMY OF SCIENCES, MAY 1, 1989

Many of us have come to this gathering because of a shared belief that humankind has suddenly entered into a brand new relationship with the planet Earth, and that human civilization is, in its current pattern, causing grave and perhaps soon irreparable damage to the ecological system which supports life as we know it.

My purpose is to sound an alarm loudly and clearly—of imminent and grave danger—and to describe a strategy for confronting this crisis, with changes in our collective behavior and thinking which, if made, can forestall and prevent the horrendous prospect of an ecological collapse.

First, why is such an alarm necessary? Do we need a crisis before we can act?

Sometimes in human affairs a pattern is well set before its implications are felt in our daily lives. This is true both in politics and in science. When shattered glass filled the streets of Berlin on Kristallnacht, few could conceive of the holocaust to follow. But from a distance, the pattern is now clear. When the first atom was split, few could conceive of nuclear bombs. But when Einstein wrote Roosevelt, the pattern was clear.

How much information is needed by the human mind to recognize a pattern? How much more is needed by the body politic to justify action in response?

It took a long time for the world to respond to Hitler. Because of Hitler, it took only a short time for Roosevelt to respond to Einstein.

In a classic experiment often cited, a frog dropped into a pot of boiling water quickly jumps out. But the same frog, put in the water before it is slowly heated, will remain in place until it is boiled.

The meaning of a pattern is conveyed by contrast as opposed to sameness. Sameness lulls the senses and conveys an absence of danger. Gradual change sometimes resembles sameness, obscuring danger from minds which reserve their alertness for sharp contrasts. Exponential change it first resembles sameness, then gradual change, then explosive contrast.

It is often hard to recognize the shape of an exponential curve before it reaches the explosive stage. It is difficult because the contrast essential to understanding very large patterns is sometimes visible only from a distance.

If an individual or a nation is accustomed to looking at the future one year at a time, and the past in terms of a single lifetime, then many large patterns are concealed. If a political body looks at policies in the context of a single nation, then the global impacts will remain invisible.

When you consider the relationship of the human species to the planet Earth, not much change is visible in a single year, in a single nation. Yet, if you look at the entire pattern of that relationship from the emergence of the species until today, May Day 1989, a distinctive contrast in very recent times clearly conveys the danger to which we must respond. It took ten thousand human lifetimes for the population to reach two billion. Now, in the course of a single human lifetime—mine and yours—it is rocketing from two billion toward ten billion, and is already halfway there.

Startling graphs showing the loss of forest land, topsoil, stratospheric ozone, and species all follow the same pattern of sudden, unprecedented acceleration in the latter half of the 20th century. And yet, so far, the pattern of our politics remains remarkably unchanged.

The earth's forests are being destroyed at the rate of one football field's worth every second, one Tennessee's worth every year. An enormous hole is opening in the ozone layer, reducing the earth's ability to protect life from deadly ultraviolet radiation. Living species die at such an unprecedented rate that more than half may disappear within our lifetimes. Chemical wastes, in growing volumes, seep downward to poison groundwater and upward to destroy the atmosphere's delicate balance. Huge quantities of carbon dioxide, methane, and chlorofluorocarbons dumped in the atmosphere are trapping heat and raising global temperatures.

In 1987, carbon dioxide levels in the atmosphere began to surge with record annual increases. Global temperatures are also climbing: 1987 was the second hottest year on record; 1988 was the hottest. Scientists now predict our current course may raise world temperatures almost five degrees Celsius in the lifetimes of people in this room. The last time there was such a shift, it was five degrees colder: New York City was under one kilometer of ice. If five degrees colder over thousands of years produces an ice age, what could five degrees warmer produce in one lifetime?

Why are these dramatic changes taking place? Because the human population is surging, because the industrial, scientific, and technological revolutions magnify the environmental impact of these increases, and because we tolerate self-destructive behavior and environmental vandalism on a global scale.

The problem in organizing our response is that the worst effects seem far off in the future, and they are so unprecedented they seem to defy common sense. While right now, in the present, millions of people are suffering in poverty and dying of starvation, warfare, and preventable diseases. How do we deal with these immediate problems and at the same time confront the problems of the future? One of the philosophers of the environmental movement, Ivan Illich, in a recent interview, explained the sudden environmental activism of Margaret Thatcher, Mikhail Gorbachev, and other world leaders previously uninterested in the global environment by saying "what has changed is that our common sense has begun searching for a language to speak about the shadow our future throws."

Science already has such a language. Have you ever seen the picture showing how time and space are shaped by mass, with a black hole pictured as a deep well in a grid, with the space and time around the well sloping toward it? Human political awareness is shaped by history in precisely that way. Our political awareness of the world is shaped and bent by events. Large events like World War II exert a powerful gravitational pull on every idea we have about the world around us. The Holocaust shapes every idea we have about human nature.

And just as in Einstein's theory, future events can exert the same gravitational pull on our thinking as events in the past—even though the events in the future have not yet occurred.

Time is relative in politics as in science. The political will which made possible the mass political protests against escalating the nuclear arms race came from awareness of a downslope toward a future we did not want to see. Many felt us being pulled toward a nuclear war that would crush human history forever into a black hole. We are now changing our course away from that downslope, we hope, and taking a new direction—even though 99.9 percent of all human beings on earth have never seen, heard, or personally felt nuclear destruction. The awareness of that potential future event came from political communication, with abstract symbols, like words.

Now, throughout the world, we are witnessing the emergence of a new political will to take a different course in order to avoid the slope toward global environmental destruction. We see the catastrophe coming, we hear Rachel Carson's Silent Spring. The slope seemed gradual at first but now it is steep. We feel strongly pulled toward ecological collapse by the policies we are now pursuing.

I personally became deeply involved in the effort to avoid a nuclear holocaust nine years ago because I felt the slope toward that horrendous possibility. And I tried to bring to the task the skills of my profession. I believe all this talk about the global environment as a national security issue makes a great deal of sense in political terms.

For the past 13 years, as a citizen and as a member of the United States Congress, I have had long-standing interests in both the environmental threat and in national security. As a practical matter, I have dealt with these subjects as separate intellectual accounts: involving distinct areas of public policy, each with its own completely different set of concerns and participants.

Yet, they grow more and more alike. National security comprises matters that directly and imminently menace the interests of the state, or the welfare of the people. As such, these issues command the attention of political leaders at the highest level, with a proportionate claim on the resources of government and the wealth of the nation. If society were an organism, national security would involve the instinct for survival.

To this point, the national security agenda has been dominated by issues of military security, embedded in the context of global struggle between the United States and the Soviet Union: a struggle which the protagonists have often waged through distant surrogates, but which has always harborded the risk of direct confrontation and nuclear war.

Given the changes in Soviet behavior which have begun under Gorbachev, there

is growing optimism that this long, dark period may be passing. There is also hope this will open the international agenda for other urgent matters and for the release of enormous resources, now committed to war, toward other objectives.

Many hope that the global environment will be the new Dominant Issue. They assert that a collective, international struggle for stability in the ecosystem will succeed the old pattern of national struggle for temporal power, and will justify the preemption of enormous resources, and reshape the public consciousness in support of another long, global struggle.

I am deeply in sympathy with this view, and yet as someone who has worked hard on both issues, I believe the analogy must be used very cautiously. The US-Soviet struggle has lasted almost half a century, consumed several trillions of dollars, cost us close to one hundred thousand American lives in Korea and Vietnam, and has profoundly shaped the psychological and social consciousness of our people. Much the same could be said of the Soviets, who, if anything, have endured far more than have we for the sake of their ideology.

Nothing is automatic or foreordained about the course of US-Soviet relations, no matter how many editorial writers now claim the "Cold War is Over." Nothing relieves us of our present responsibilities for defense or of the need to conduct painstaking negotiations to limit arms and reduce the risk of war. The old agenda is with us still, exacting its price in wealth, creativity and the attention of statesmen.

And yet, the environmentalists are right.

Certainly, there is strong evidence the new enemy is at least as real as the old. For the general public, the shocking images of last year's drought, or of beaches covered with medical garbage, inspired a sense of peril once sparked only by Soviet behavior. But for environmental specialists, the steady flow of data from scientific investigation of the environment—often ambiguous, but always menacing—is eerily equivalent to intelligence collection against the more familiar Soviet threat. The U2 spy plane, for example, now is used to monitor not missile silos but ozone depletion.

Already, we are seeing governments struggling to resolve issues whose domains go far beyond anything in our experience. Debate over the disposition of radioactive wastes, for example, involves choices that must remain valid across geological time. The species now disappearing at an unprecedented rate will never return. The global climate pattern could shift to a new equilibrium and never regain its former pattern.

In the not distant future, there will be a new "sacred agenda" in international affairs: policies that enable the rescue of the global environment. This task will one day join, and then perhaps even supplant, preventing the world's incineration through nuclear war, as the principle test of statecraft.

However, in thinking about environmentalism as a national security concern, it is important to differentiate between what would—in military jargon—be called the level of threat. Certain environmental problems may be important but are essentially local; others cross borders, and in effect represent theaters of operations; and still others are global and strategic in nature.

On this scale, even phenomena as important as the slow suffocation of Mexico City, the deaths of northern forests in America and Europe, or even the desertification of large areas of Africa, will likely not be regarded as full scale national security issues.

However, the greenhouse effect and stratospheric ozone depletion fit the profile of national security issues of global significance. The phenomena certainly will in time produce effects big enough to threaten international order, even at the level of war and peace. In the case of global warming, the fact that some of the worst effects will not fully manifest themselves until the middle of the next century is offset by the fact that actions we take now will determine the extent of the damage later.

When nations perceive that they are threatened at the strategic level, they may be induced to think of drastic response, involving sharp discontinuities from everyday approaches to policy. In military terms, this is the point when the United States begins to think of invoking nuclear weapons. The global environment may well involve responses that are, in comparative terms, just as radical. Not just business as usual, not just incremental variations but massive departures from the norm.

Nuclear war is an apocalyptic subject, and so is global environmental destruction. We are dealing here with increasingly credible forecasts of climatic dislocations, vast changes in growing cycles, innundations of coastal areas and the loss to the sea of vast territories—some of them very heavily developed and populated. We also are dealing not only with a threat to human health, but unpredictable and potentially vast changes to all life at the surface of the earth and the seas, as the result of prolonged exposure to increased ultra-violet radiation.

What's more, despite some progress made toward limiting some sources of the problem, such as CFCs, we have to face the stark fact that we have barely scratched the surface. Even if all other elements of the problem are solved, a major threat is still posed by emissions of carbon dioxide, the exhaling breath of the industrial culture upon which our civilization rests. The implications of the latest and best studies on this matter are staggering. We must be honest about them. Essentially, they tell us that with our current pattern of technology and production, we face a Hobsian Choice between economic growth in the near term, and massive environmental disorder as the subsequent penalty.

This central fact cuts across the face of all environmental strategies as we generally think of them. It suggests that the notion of environmentally sustainable development at present may be an oxymoron, rather than a realistic objective. It declares war, in effect, on routine life in the advanced industrial societies. And—central to the outcome of the entire struggle to restore global environmental balance—it declares war on the Third World.

The Third World does not have a choice about whether or not it will develop economically. If it does not develop economically, poverty, hunger and disease will consume entire populations. And long before that, whole societies will experience revolutionary political disorder. Rapid economic growth is a life-or-death imperative throughout the Third World. The peoples and governments of the Third World will not be denied that hope, no matter the longer-term costs for the global environment.

And why should they accept what we, manifestly, will not accept for ourselves? Who is so bold as to say that any nation in the developed world is prepared to abandon industrial and economic growth? Who will proclaim that any nation in the developed world will accept even serious compromises in levels of comfort, for the sake of global environmental balance? And who will apportion these sacrifices; who will then bear them?

Development, of course, is part of the problem as well as the solution. We know that, just as we know that nuclear deterrence depends on the weapons we are trying to render obsolete.

The effort to solve the nuclear arms race has been complicated not only by simplistic stereotypes of the enemy and the threat he poses. It also has been complicated by simplistic demands for immediate unilateral disarmament, without any basis for a widely shared confidence that the original threat is no longer real.

My own belief is that perceptions must evolve simultaneously in both superpowers as technology evolves simultaneously in both countries, as conscious efforts are made to improve information about the other, about the nature of the threat, and the confidence we can summon that the threat is in fact changing and receding.

In similar fashion, the effort to solve the global environmental crisis will be complicated not only by blind assertions that more and more environmental manipulation and more and more resource extraction are essential for economic growth. It will also be complicated by the emergence of simplistic demands that development, or technology itself, must be stopped for the problem to be solved. This is a crisis of confidence which must be addressed.

This speech, if you'll permit me a personal moment, is the first time I've spoken in public on any subject in six weeks. My wife and I have been in John Hopkins Hospital, at the bedside of our son, who was hit by an automobile. I've been living in the world of medical science, pursuing the goal of restoring our son to health. Ten years ago, a child with his injuries would have had several surgical interventions which doctors now realize are unwise, given the greater likelihood of the body healing itself where some injuries are concerned.

Yet, two days after the accident, when doctors were unable to stabilize internal bleeding, my wife and I naively hoped that same natural healing process would take care of that problem and make any surgery unnecessary. If the doctor had relied not on science but on us, we would have unwisely urged against an operation. But doctors have acquired sufficient knowledge to realize that the body should be allowed to heal itself when it can do so. At the same time, they know there are some instances where intervention is essential to save life.

Similarly, we must acquire sufficient knowledge of the earth's system to judge when it can heal itself, and when it is necessary for us to intervene. For example, when 40,000 children die of disease and starvation every 24 hours, we obviously must intervene. But it is past time to recognize that many of society's interventions in the environment have been and are unwise. Much ecological destruction is subsidized by governments. We need more knowledge, more experience, and the kind of sensitive judgments that modern doctors have learned to make.

The cross-cut between imperatives of growth and the imperatives of environmental management, represents a supreme test for modern industrial civilization. The test is whether we can devise very dynamic new

strategies which will accommodate economic growth within a stabilized environmental framework.

That is an extreme demand to place upon technology. There is no real assurance that such a balance can in fact be struck. Nevertheless the effort must be made. And because of the urgency, scope and even the improbability of complete success in such an endeavor, I am strongly tempted to use a military term for a metaphor. To deal with the global environment, we will need the environmental equivalent of the Strategic Defense Initiative, a Strategic Environment Initiative.

I have been an opponent of the military SDI. But even opponents of SDI recognize this effort has been remarkably successful in drawing together previously disconnected government programs, in stimulating the development of new technologies, and in forcing upon us a wave of intense new analysis of subjects previously thought to have been exhausted.

We need the same kind of focus and intensity, and similar levels of funding, to deal comprehensively with global warming, stratospheric ozone depletion, species loss, deforestation, ocean pollution, acid rain, air and water and groundwater pollution, and all of the problems degrading the world's environment. In every major sector of economic activity—energy, agriculture, manufacturing, and transportation, for example—a Strategic Environment. Initiative must identify and then spread sets of increasingly effective new technologies: some that are already well in hand; some that need further work, though well understood in principle; and some that are revolutionary ideas whose very existence is now a matter of speculation.

Let me briefly illustrate:

Energy is the lifeblood of development. Unfortunately, today's most economical technologies for converting energy resources into usable forms of power (as in burning coal to make electricity) release a plethora of pollutants. An Energy SEI should focus on producing the energy of development without compromising the environment. Chief on the near-term list of alternatives are energy efficiency and conservation; on the mid-term list, solar power, possibly new generation nuclear power, biomass (with no extraneous pollutants and a closed carbon cycle), as well as enhanced efficiency; and long-term, nuclear fusion, as well as enhanced versions of solar, biomass, and nuclear energy, and energy efficiency.

In agriculture, we have witnessed vast growth in Third World food production through the Green Revolution, but often that growth relied on heavily subsidized fertilizers, pesticides, irrigation, and overall mechanization, sometimes giving the advantage to rich farmers over poor ones. We need a second green revolution, to address the needs of the Third World's poor: a focus on increasing productivity from small farms on marginal land, with low-input agricultural methods. These technologies, whose components are not only technological, but financial and political, may be the key to satisfying the land hunger of the disadvantaged and the desperate who are slashing daily into the rainforest of Amazonia—leaving behind the depleted soil of their first homesteads. It may also be the key in the battle to arrest the desertification of sub-Saharan Africa, where human need and climate stress are now operating in a deadly partnership.

Fortunately, the next wave of agricultural improvements is almost upon us—from biotechnology. In my view, we should carefully push forward work on new crop strains with genetic encoding that allows "natural" resistance to pests, disease, and droughts; not to mention improved yield. Of course, biotechnology will not completely solve the problems that arise from inadequate distribution of food supplies—they are most often due to a failure of politics, not crops.

In addition, new industrial processes, new materials, and increased use of recycled materials, will all become important to "sustainable" development.

Needed in the U.S. probably more than anywhere, is a Transportation SEI focusing in the near term on improving the mileage standards of our vehicles, and encouraging and enabling Americans to drive less. In the mid-term, come questions of alternative fuels, such as biomass-based liquid fuels or electricity. And in the mid- and long-terms come the inescapable need for re-examining the entire structure of our transportation sector, and its inherent demand on the personal vechicle for efficient transport.

Funds to promote these research objectives could be drawn from very modest U.S. energy taxes, eventually perhaps even a CO_2 tax, although that is not yet politically viable. The U.S. government should organize itself to finance the export of energy-efficient systems, and of renewable energy sources. That means preferential lending arrangements through the Export-Import Bank, and Overseas Private Investment Corporation.

Encouragement for the Third World should also come in the form of attractive international credit arrangements for energy efficient and environmentally sustainable processes. Funds for this lending stream would be generated by institutions such as the World Bank, which, in the course of debt swapping, might dedicate new funds to the purchase of envrionmentally sounder technologies.

Finally, the United States, other developers of new technology, and international lending institutions, should establish centers of training at locations around the world, to create a core of environmentally educated planners and technicians, in order to "make the ground fertile" for sowing environmentally attractive technologies and practices; an effort not unlike that which produced agricultural research centers throughout the world during the Green Revolution.

With this SEI, we must transform science and technology to make it more efficient, consume less of the earth's natural resources, and emphasize waste minimization, recycling, and the use of renewable resources in harmony with the natural world. We must start by quickly obtaining massive quantities of information about the global processes now underway—through, for example, the Mission to Planet Earth program of NASA.

And we also must target first the most readily identifiable and correctable sources of environmental damage. Today, for example, I have introduced a new comprehensive legislative package to effectively halt chlorofluorocarbon, carbon tetrachloride, methyl chloroform, and halon emissions, and to promote development of technologies to replace those that now rely on CFC's. Earlier this year, I introduced the World Environment Policy Act of 1989, a far-ranging bill to address virtually every aspect of the global environmental crisis, including CFC's and CO_2.

In order to accomplish our goal we also must transform global politics, shifting from short-term concerns to long-term concerns, from conflict to cooperation.

The evidence of the last six months leads me to believe we have the capacity for this change. Just as the equilibrium of an environmental system can suddenly change from one state to another, the equilibrium of one political system can suddenly change from one state to another. We politicians are frequently adept at symbolic action, a pretense of change without the substance of change. And for that reason, my optimism is tempered by awareness of the power in the forces of greed and fear. But I do believe we have the capacity for what is needed—because the challenge can now be accurately described in terms of national security.

Some may believe that the idea of the environment as a national security issue is just rhetoric. Most of us in this room, however, accept it as a statement of fact. But, we also know that just as the world has been living with the possibility of man-made disaster in the form of nuclear war, so it now lives with the growing threat of man-made disaster in the form of catastrophic environmental failure.

In many ways, it is the same basic dilemma. In each case, our survival was threatened at a basic, primal level—the fear of death from attack by an enemy, the fear of death from running out of food. To each threat, we responded with more and more efficiency. The increasing sophistication of our technology has enabled us to confront each threat to our survival with a more powerful response. And in each case, the effort to secure our survival has instead threatened our survival.

Moreover, even if we are successful this time in meeting the needs of our survival and preserving the world environment, it probably won't be the last time we'll face this basic problem. Genetic engineering may pose the same dilemma all over again. In the effort to protect ourselves against disease, we're creating a new and more powerful technology that ultimately will confront us with the same historic challenge to human nature and the same hubristic relationship of our species to the limits nature has designed for us as part of the world ecological system.

As a result, it is hard to escape the conclusion that we must also transform ourselves—or at least the way we think about ourselves, our children, and our future. This last transformation is the most essential, and yet the most difficult. If there is one cause for the prevailing pessimism about our ability to meet this unprecedented challenge, it is the belief by many that we are incapable of the change in thinking required.

And yet, there are precedents which give cause for realistic hope. Human sacrifice and slavery were both once commonplace in human societies, yet both are now obsolete. Our thinking was transformed. These changes, like most changes in global climate patterns, took place over a long period of time. But now, just as climate changes are telescoped into short periods of time, we must create in a single generation changes in human thinking of a magnitude comparable to the change that brought about the abolition of slavery. Yet once again, we must remind ourselves that the pattern of change required is visible only from a distance.

In this case, we cannot rely on science to give us a new point of view for it is partly responsible for the problem. In ways not yet fully understood, the scientific revolution

itself changed the way we saw ourselves in relation to the world. We detached ourselves from nature to examine the physical world. In a kind of Heisenberg Principle writ large, we altered—without realizing it—the nature of what we began to examine. The new pattern of thinking we must now create is one in which we once again see ourselves as a part of the ecological system in which we live. What we now lack is a sense of the proper location of our species in the ecosystem. We have lost our ecolibrium.

How then can we gain sufficient distance from ourselves to see a pattern which contains ourselves in a larger context? My own religious faith teaches me that we are given dominion over the earth, but that we also are required to be good stewards of the earth. If we witness the destruction of half the living species God put on this earth during our lifetimes as a result of our actions, we will have failed in the responsibility of stewardship. Are those actions, because of their result, "evil"? The answer depends not upon the everyday nature of the actions, but upon our knowledge of their consequences. In an examination of Hitler's lieutenants, Hannah Arendt coined the memorable phrase "the banality of evil." The individual actions which collectively produce the world's environmental crisis are indeed banal when they are looked at one by one: the cutting of a tree, the air conditioning of a car.

"Evil," and "good" are terms not used frequently by politicians. But in my own view, this problem cannot be solved without reference to spiritual values found in every faith. For many scientists on the edge of new discoveries in cosmology and quantum physics, the reconciliation of science and religion sometimes now seems near at hand. It is a reconciliation not unlike the one we seek between man and nature.

But even without defining the problem in religious terms, it is possible to conclude that the solutions we seek will be found in a new faith in the future of life on earth after our own, a faith in the future which justifies sacrifices in the present, a new moral courage to choose higher values in the conduct of human affairs, and a new reverence for absolute principles that can serve as guiding stars by which to map the future course of our species and our place within creation.

Mr. MURKOWSKI. Will my colleague from Tennessee first yield for a question?

Mr. GORE. I am happy to yield for a question.

Mr. MURKOWSKI. I thank my friend. I noted there was a reference to the action associated with the administration in regard to the Valdez spill. I wonder if my friend from Tennessee would agree to allowing me to enter in the RECORD after the fact the specific action taken by the administration and the presence of administration officials as well as Government personnel in the U.S. Coast Guard and approximately 1,000 that were involved within 2 days of the spill.

It might help enlighten my friend as to the extent of Federal participation that occurred in spite of the perception that indeed there was very little Federal presence.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

There are 1,236 Department of Defense personnel assigned to the oil spill joint task force (1,062 military, 80 civilian, 94 contract personnel). Support by service is as follows: 151 Army (71 military, 80 civilian); 3 Army National Guard; 936 Navy (842 military, 94 contract personnel); 93 USMC; and 53 Air Force.

U.S. NAVY SUPPORT

1. Deputy JTF/CTG 36.7; RADM E.B. Baker, Jr., USN. Embarked in USS *Juneau* (LPD-10).

2. Amphibious Assault Ships (Task Group 36.7).

USS *Juneau* (LPD-10) Capt. T.A. Willandt, USN:

LCM-6 with crews (42 personnel	9
Zodiac boats with USMC crews (31 personnel)	16
LARC V	2
HMMV	3
CH-46 with USMC crews (34 personnel) (HMM-166 det)	2
5-ton truck	1
Tactical Air Control Det (3 personnel)	1
Beach Master Unit Det (16 personnel) (BMU ONE Det)	1

Civilians currently berthed: 343 males and 123 females.

USS *Fort McHenry* (LSD-43) CDR G.S. Rhodes, USN:

LCM-6 with crews	6
LCM-8 with crews	4
CH-46 with USMC crew to transfer to JUNEAU on arrival	1
2,000' containment boom	1
3. Naval Sea Systems Command:	
Contractor personnel	94
Skimmers	20
VOSS skimmers	2
Tow boats	10
Boom vans (2,000')	11
Mooring systems	20
Shop vans	2
Rigging vans	2
Command vans	2
Cleaning vans	2
Inflatable boats	4
POL pump system	1

National Guard Assets Committed

1. Equipment:	
Van	1
Lightweight decontamination apparatus (LDA)	186
2. Personnel: Army Guard	3

3. Support mission: Provide public affairs support to the Alaska Department of Emergency Services, and aviation AVIM maintenance support to U.S. Army.

U.S. Army Support

1. Equipment:	
Helicopters	9
CH-47	2
UH-1	2
UH-60	3
OH-58	2
Army Corps of Engineers dredges	2
2. Personnel:	
Military	71

U.S. Army Support—Continued

Civilians	80
Total	151

U.S. Air Force Support

	Sorties	Tons
1. Flight information:		
C5	17	992.3
C141	5	112.0
C130	6	17.0
C12	42	(1)
Total	68	1,121.3

[1] PAX only.

2. Dedicated assets:	
C-130	8
C-12	3
3. Personnel: Military	53

Mr. GORE. I do not know if the Senator from Alaska wishes to endorse the responses of the Bush administration to the Alaskan oil spill. It has been my understanding that it was not really the kind of all-out response that many of us hoped would take place, but the Senator's statement will speak for itself.

The PRESIDING OFFICER. The Senator from New York.

PANAMA

M. D'AMATO. Mr. President, if I might, with the indulgence of my colleagues and the Chair, be permitted to digress just for several minutes from the question of the FSX. I do not have a prepared statement that I intend to read and it is many, many pages but it is this big print because I have difficulty as we get older reading the small print.

I would like to refer, if I might, to the question of Panama. This is an issue that we are all concerned with. It is an issue that I think most of us have commended our President for acting in the manner in which he has, in a measured manner.

I just received a very disturbing phone call. When I say "just," I mean about 25 minutes ago. A Rebecca Cook called my office. She is a resident in Panama. She is a U.S. citizen who works for the Canal Commission.

She called in reaction to the President's declaration that U.S. citizens not in secure military or Canal Commission housing would be relocated to such housing or evacuated.

Mrs. Cook told a member of my staff—and she is a member of the Canal Commission housing neighborhood association—that there was no such relocation going on and, in her estimation, there are some very real problems.

Eight hundred families reside in five different neighborhoods. These are neighborhoods that abut the old Panama Canal Co. land that is now in the hands of the Noriega supporters. They are located in close proximity to the police barracks. The positions are

totally indefensible, and the residents are very concerned.

Literally, this phone call has come, as I indicated, within the past hour. I asked my staff to continue to monitor this.

She went to the administrator of the Canal. She approached him about a possible evacuaton and she says that the request was not even really acknowledged.

The last sentiment that my staffer gave me, she said that the tension is very high.

I rise today to make this point that there is a very real concern among the American dependents who are there—and there are in the area of about 40,000 in addition to our troops—there is concern for their safety and that of their families.

We are going to continue to monitor this and turn this information over to the State Department. I think it is important that these people, particularly those who have anxieties, and children and family, have that opportunity to be moved to secure places. It is absolutely important.

In addition, Mr. President, we are sending today a letter to the President commending him for his efforts to help the Panamanian people free themselves from the grip of the Noriega dictatorship.

I say "we," Senator HELMS and myself.

The letter goes on to say:

The United States is in a position to send a powerful message on behalf of democracy by recognizing Guillermo Endara as the President-elect of Panama.

Mr. President, I think that is absolutely essential. We have to recognize that the Panamanian people showed incredible courage in coming out and voting and fighting for democracy. And to simply say that because Mr. Noriega does not recognize him and suspends him, we should go forward and we should urge all Latin American countries recognizing Mr. Endara as the duly-elected President of Panama.

President-elect Endara and his supporters should receive immediate access to the U.S. armed force television and radio stations in Panama. This will enable them to communicate their message of freedom and democracy to the Panamanian people.

We believe these additional steps will give continued momentum to the democratic aspirations of the Panamanian people.

Now, we have sent this letter today. It is in the process of being sent to the President. We commend him and I think it is important.

MICHELLE HAAHR

Mr. PRESSLER. Mr. President, today is a sad day in the Pressler office. We are losing one of the most dedicated, hard working and professional legislative assistants on Capitol Hill. As is all too often the case in the high turnover world of the Hill, Shelly Haahr's tenure has been too brief. She leaves us for Phoenix, AZ, where her husband has joined the law firm of Lewis & Roca.

Shelly has been with us 2 short years. But in that time she has demonstrated all the best qualities of a congressional staffer. It has been a real joy for me to watch her develop from a raw recruit with only gumption and a positive attitude into one of the best professionals I've ever had.

Shelly is an incredibly bright individual. But when she arrived she had no previous experience with the Senate or with the myriad issues assigned to her. With sheer determination and an unconquerable spirit she dug in with a tenacity that I have rarely seen. She drove herself to constant 12 and 18 hour days. She studied, was never afraid to ask questions or admit to ignorance, and always worked to improve her skills. She was never comfortable with "good enough." Of herself she always demanded better.

Shelly listened to advice carefully, and always analyzed any mistakes or perceived shortcomings—however minor. While mistakes from Shelly were rare, I have never seen one repeated. That is one of her truly outstanding qualities. She had the understated self confidence to know that "not knowing" wasn't a sin, but rather an opportunity to learn. Unafflicted by the Washington "waffle-and-fake-it-if-you-don't-know-the-answer" syndrome, Shelly was able to develop into a true expert on issues as diverse as education, labor, and congressional pay. I could always trust her facts completely, and relied heavily on her sound advice.

Shelly Haahr knows how to get things done. It is one thing to know facts and give advice to others. It is quite another to be able to take direction and get the job done yourself. Her pleasant disposition and confidence in dealing with people have gained her considerable respect on the Hill, with the various agencies and the private sector contacts with whom she dealt. For any employer, followthrough on the details is a much sought after trait. With Shelly, I never had to ask for anything twice. You always had the peace of mind in knowing that the assigned project would be done.

Not only was Shelly extremely efficient, but she has a creative mind full of ideas and initiatives she was eager to try out. She had many accomplishments here in the Senate. The one for which I am particularly proud was her work on defeating the proposed 50-percent congressional pay raise. As the author of the successful Senate resolution rejecting the raise, I can safely say that it may well have never happened but for Shelly's tireless effort. At the very least, she played an instrumental role in seeing that particular piece of legislation through. With her usual tenacity she bit into this issue already in the last Congress, established herself as a leader and as an expert on the issue, and carried out her task brilliantly. Her efforts on that issue are too overwhelming to detail here, but were vintage Shelly Haahr—and I am very proud of them.

And finally, and perhaps most noteworthy, is Shelly's incredible disposition. Her positive attitude toward work and toward her colleagues made her a joy to be around and, I believe, is the basis for all that she has been able to become and accomplish in the Senate.

She has been one of the true standouts of this business. Her presence will be sorely missed, but not forgotten. It is with bittersweet feelings that we say goodbye to Shelly. Of course I hate to see her go, but take great pride in seeing her develop so meteorically and completely in the professional world. We are hoping that some day we might coax her back. Shelly Haahr will always have a job in the Pressler office, and my eternal gratitude for a job well done.

FORT SCOTT MEDAL OF HONOR CEREMONY

Mr. DOLE. Mr. President, tomorrow morning at 10 o'clock a military honor guard will snap to attention, and a special ceremony will begin at Fort Scott National Historic Site in Fort Scott, KS.

Fort Scott and the people who lived and served there are a proud part of our Kansas heritage. During the Civil War Fort Scott was an active Union Army installation, a supply depot and a staging area for campaigns in western Missouri, Arkansas and the Indian territories—later to become Oklahoma.

This occasion, taking place in the poignant setting of Evergreen Cemetery, will honor three soldiers from Fort Scott who received our Nation's highest military award for bravery and valor—the Congressional Medal of Honor.

Two of these soldiers, who fought in the Civil War, are buried in Evergreen Cemetery.

The third, a native son of Fort Scott and veteran of World War II, rests in Punchbowl National Memorial Cemetery in Hawaii.

In May 1864, Pvt. George F. Pond was one of three Union cavalrymen to mount a nighttime attack against a Confederate guerrilla force of 40 men in Drywood, KS—routing the Confederates and freeing 25 Union prisoners. After the war, Private Pond lived in Fort Scott for 46 years.

Pvt. William H. Longshore spent 44 years in Fort Scott after the Civil War. He was 1 of 150 Union infantry-

men who, in May 1863, volunteered for a suicide assault on fortified Confederate positions at Vicksburg, MS. of the 150 men who went into action, 125 were killed or seriously wounded. Fifty-three—including Private Longshore—were awarded the Medal of Honor.

The heroic deeds of Privates Pond and Longshore will be remembered at this ceremony and for all time with the dedication of special Medal of Honor headstones to mark their graves.

1st Lt. William Dean Hawkins, a native of Fort Scott, died in action November 21, 1943, on the Pacific Island of Tarawa.

The commander of a Marine Scout/Sniper Platoon, he was personally responsible for neutralizing many fortified enemy positions. He continued leading the charge after being struck three times in the chest by enemy machinegun fire.

The Medal of Honor Historical Society along with Fort Scott Superintendent Stephen M. Miller and Fort Scott Site Historian Arnold W. Schofield are to be congratulated for their efforts to commemorate these three men.

The State of Kansas and our Nation owe these men a debt of gratitude. And while we pray this Nation will never again face the circumstances that produce such heros, we must nevertheless recognize the singularity of this event: Three Medal of Honor winners from the same town in Kansas.

Mr. President, it is said that a hero is simply "a man who does what he can."

Now it is entirely appropriate that we do what we can to properly honor these three heroes with such strong ties to Kansas and Fort Scott.

The PRESIDING OFFICER. the Senator from Colorado.

FOREIGN POLICY

Mr. WIRTH. Thank you very much, Mr. President. I note on the floor this afternoon there are two Democrats and two Republicans here to talk about, among other things, the issue of global warming, global climate change, in response to the White House.

I note that, Mr. President, because I think it is very important that we try to approach this in every way possible as we have in a completely bipartisan or nonpartisan fashion. This is probably the most important challenge that we are going to face for the remainder of our lives, certainly a long time to come. If we are not capable of developing the kind of partnerships and cooperation that have so far characterized our relationships on this, we will not succeed. So I think this is just a very good commentary right here.

These are troubling times, Mr. President. Yesterday, we saw the President make what I thought was the correct initiative related to Panama, and I hope that we have bipartisan support on that front. We have seen a lot of efforts being made on Central America. I was one who just voted for that and supported the President's initiative on the budget, although we all might disagree on that, and plan to be supportive of the administration in its initiative with the Japanese on the FSX.

So this spirit of cooperation is the one that we want to pursue wherever we can.

Two further examples today, Mr. President: One, the President's announcement later this afternoon related to confidence and security building measures and, second, his announcement of the working program on global warming and climate change.

I would like to comment briefly on both of those, if I might, Mr. President. First of all, on confidence and security building measures. We all remember that coming out of the Helsinki Final Act in 1975, and then Stockholm in 1985, were a series of agreements between the United States and the Soviet Union to, together, monitor various military programs so that each of us would come to a better understanding of what the other side was doing.

This is monitoring of exercises, prenotification of exercises, the invitation of observers from the other side to come look at your exercises, unannounced inspections on short notice, a variety of steps that were being taken. That was added to last year by officer exchanges for the first time and those are going on: Admiral Crowe and his counterpart; Secretary Carlucci and his counterpart.

The purpose of these is for each side to understand what the other is doing, to understand how the other's troops are configured, to reduce ambiguity wherever possible, and most importantly, to therefore reduce the likelihood and the threat of surprise attack.

Why is that? Well, if we reduce the likelihood or threat of surprise attack, each of us is less likely to be at the edge of the trigger finger, each of us is going to be less likely to configure our forces as far forward. Not only is that more safe for the world but it is also going to save each side a lot of money.

A number of us have been pushing for more. Recently, along with Senator NUNN and Senator LEVIN, we wrote to the President, urging him to take on greater steps in the area of confidence and security building measures and that is a letter of May 3d, which I would like to have printed in the RECORD at the end of my remarks.

We suggested the monitoring of depots, taking confidential building measures further, transportation nodes, military activities, officer exchanges, discussions of doctrine, and so on. These are important building blocks in monitoring the promised unilateral cuts. We have said that we are going to cut, they are going to cut, on the basis of conventional armaments on both sides. We are getting slowly but surely to understand what the other side is doing.

The more of this we do, the more understandings there are, the better we are going to be able to define if each side is complying with what the other side is doing.

This evening, President Bush is going to propose the further steps in this direction at Texas A&M University. He is going to follow up on a proposal made many years ago by President Eisenhower on the "open skies" approach.

I ask unanimous consent that that section of his statement be printed in the RECORD as well at this point, Mr. President. There being no objection, the material was ordered to be printed in the RECORD, as follows:

TEXT OF REMARKS BY THE PRESIDENT AT TEXAS A&M UNIVERSITY, G. ROLLIE WHITE COLISEUM, COLLEGE STATION, TX, MAY 12, 1989

My sincerest congratulations go to every graduate, and to your parents. In this ceremony, we celebrate nothing less than the commencement of the rest, and the best, of your life.

When you look back to your days at Texas A&M, you will have a lot to be proud of—a university that is first in baseball and first in service to our Nation. Many are the heroes whose names are called at Muster. Many are those you remember in Silver Taps.

We are reminded that no generation can escape history. Parents—we share a fervent desire for our children, and their children to know a better world, a safer world. Students—your parents and grandparents have lived through a world war, and helped America to rebuild the world. They witnessed the drama of postwar nations divided by Soviet subversion and force, but sustained by an Allied response most vividly seen in the Berlin Airlift.

Wise men—Truman and Eisenhower, Vandenberg and Rayburn—Marshall, Acheson and Kennan—crafted the strategy of containment. They believed that the Soviet Union, denied the easy course of expansion, would turn inward and address the contradictions of its inefficient, repressive and inhumane system. And they were right. The Soviet Union is now publicly facing this hard reality.

Containment worked. Containment worked because our democratic principles, institutions and values are sound, and always have been. It worked because our alliances were and are strong; and because the superiority of free societies and free markets over stagnant socialism is undeniable.

We are approaching the conclusion of an historic postwar struggle between two visions—one of tyranny and conflict, and one of democracy and freedom. The review of U.S.-Soviet relations that my Administration has just completed outlines a new path toward resolving this struggle.

Our goal is bold—more ambitious than any of my predecessors might have thought possible. Our review indicates that forty years of perseverance have brought us a

precious opportunity. Now it is time to move beyond containment, to a new policy for the 1990s—one that recognizes the full scope of change taking place around the world, and in the Soviet Union itself.

In sum, the United States now has as its goal much more than simply containing Soviet expansionism—we seek the integration of the Soviet Union into the community of nations. As the Soviet Union moves toward greater openness and democratization—as they meet the challenge of responsible international behavior—we will match their steps with steps of our own. Ultimately, our objective is to welcome the Soviet Union back into the world order.

The Soviet Union says it seeks to make peace with the world, and criticizes its own postwar policies. These are words we can only applaud. But a new relationship cannot be simply declared by Moscow, or bestowed by others. It must be earned. It must be earned because promises are never enough. The Soviet Union has promised a more cooperative relationship before, only to reverse course and return to militarism. Soviet foreign policy has been almost seasonal—warmth before cold, thaw before freeze. We seek a friendship that knows no season of suspicion, no chill of distrust.

We hope perestroika is pointing the Soviet Union to a break with the cycles of the past—a definitive break. Who would have thought we would see the deliberations of the Central Committee on the front page of *Pravda*, or dissident Andrei Sakharov seated near the councils of power? Who would have imagined a Soviet leader who canvasses the sidewalks of Moscow and Washington, D.C.? These are hopeful—indeed, remarkable—signs. Let no one doubt our sincere desire to see perestroika continue and succeed. But the national security of America and our allies is not predicated on hope. It must be based on deeds. We look for enduring, ingrained economic and political change.

While we hope to move beyond containment, we are only at the beginning of our new path. Many dangers and uncertainties are ahead. We must not forget that the Soviet Union has acquired awesome military capabilities. That was a fact of life for my predecessors. That has always been a fact of life for our allies. And that is a fact of life for me.

As we seek peace, we must also remain strong. The purpose of our military might is not to pressure a weak Soviet economy, or to seek military superiority. It is to deter war. It is to defend ourselves and our allies, and to do something more—to convince the Soviet Union that there can be no reward in pursuing expansionism—to convince the Soviet Union that reward lies in the pursuit of peace.

Western policies must encourage the evolution of the Soviet Union toward an open society. This task will test our strength. It will tax our patience. And it will require a sweeping vision—let me share with you my vision. I see a Western Hemisphere of democratic, prosperous nations, no longer threatened by a Cuba or a Nicaragua armed by Moscow. I see a Soviet Union that pulls away from ties to terrorist nations—like Libya—that threaten the legitimate security of their neighbors. I see a Soviet Union which respects China's integrity, and returns the Northern Territories of Japan; a prelude to the day when all the great nations of Asia will live in harmony.

But the fulfillment of this vision requires the Soviet Union to take positive steps, including:

First: Reduce Soviet forces. Although some small steps have already been taken, the Warsaw Pact still possesses more than 30,000 tanks, more than twice as much artillery and hundreds of thousands more troops in Europe, than NATO. They should cut their forces to less threatening levels, in proportion to their legitimate security needs.

Second: Adhere to the Soviet obligation—promised in the final days of World War II—to support self-determination for all the nations of Eastern and Central Europe. This requires specific abandonment of the Brezhnev Doctrine. One day it should be possible to drive from Moscow to Munich without seeing a single guard tower or a strand of barbed wire. In short, tear down the Iron Curtain.

Third: Work with the West in positive, practical—not merely rhetorical—steps toward diplomatic solutions to regional disputes around the world. I welcome the Soviet withdrawal from Afghanistan and the Angola agreement. But there is much more to be done around the world. We're ready. Let's roll up our sleeves and get to work.

Fourth: Achieve a lasting political pluralism and respect for human rights. Dramatic events have already occurred in Moscow. We are impressed by limited, but freely contested, elections. We are impressed by a greater toleration of dissent. We are impressed by a new frankness about the Stalin era. Mr. Gorbachev, don't stop now.

Fifth: Join with us in addressing pressing global problems, including the international drug menace, and dangers to the environment. We can build a better world for our children.

As the Soviet Union moves toward arms reduction and reform, it will find willing partners in the West. We seek verifiable, stabilizing arms control and arms reduction agreements with the Soviet Union and its allies. However, arms control is not an end in itself, but a means of contributing to the security of America, and the peace of the world. I directed Secretary Baker to propose to the Soviets that we resume negotiations on strategic forces in June. And, as you know, the Soviets have agreed.

Our basic approach is clear. In the Strategic Arms Reduction Talks, we wish to reduce the risk of nuclear war. In the companion Defense and Space Talks, our objective will be to preserve our options to deploy advanced defenses when they are ready. In nuclear testing we will continue to seek the necessary verification improvements in existing treaties to permit them to be brought into force. We will continue to seek a verifiable global ban on chemical weapons. We support NATO efforts to reduce the Soviet offensive threat in the negotiations on Conventional Forces in Europe. And, as I've said, fundamental to all of these objectives is simple openness.

Make no mistake, a new breeze is blowing across the steppes and cities of the Soviet Union. Why not, then, let this spirit of openness grow, let more barriers come down. Open emigration, open debate, open airwaves—let openness come to mean the publication and sale of banned books and newspapers in the Soviet Union. Let the 19,000 Soviet Jews who emigrated last year be followed by any number who wish to emigrate this year. Let openness come to mean nothing less than the free exchange of people, books and ideas between East and West. And let it come to mean one thing more.

Thirty-four years ago, President Eisenhower met in Geneva with Soviet leaders who, after the death of Stalin, promised a new approach toward the West. He proposed a plan called "Open Skies," which would allow unarmed aircraft from the United States and the Soviet Union to fly over the territory of the other country. This would open up military activities to regular scrutiny and, as President Eisenhower put it, "convince the world that we are . . . lessening danger and relaxing tension."

President Eisenhower's suggestion tested Soviet readiness to open their society. The Kremlin failed that test. Let us again explore that proposal, but on a broader, more intrusive and radical basis—one which I hope would include allies on both sides. We suggest that those countries that wish to examine this proposal meet soon to work out the necessary operational details, separately from other arms control negotiations.

Such surveillance flights, complementing satellites, would provide regular scrutiny for both sides. Such unprecedented territorial access would show the world the meaning of the concept of openness. The very Soviet willingness to embrace such a concept would reveal their commitment to change.

Where there is cooperation, there can be a broader economic relationship. But economic relations have been stifled by Soviet internal policies. They have been injured by Moscow's practice of using the cloak of commerce to steal technology from the West. Ending discriminatory treatment of U.S. firms would be a helpful step. Trade and financial transactions should take place on a normal commercial basis.

And should the Soviet Union codify its emigration laws in accord with international standards and implement its new laws faithfully, I am prepared to work with Congress for a temporary waiver of the Jackson-Vanik Amendment, opening the way to extending Most Favored Nation trade status to the Soviet Union. The policy I have just described has everything to do with you.

Today you graduate. You will start careers and families. And you will become the leaders of America in the next century. What kind of world will you know? Perhaps the world order of the future will truly be a family of nations.

It is a sad truth that nothing forces us to recognize our common humanity more swiftly than a natural disaster. I am thinking of Soviet Armenia, just a few months ago—a tragedy without blame, warlike devastation without war.

My son took our 12-year-old grandson to Yerevan. At the end of a day of comforting the injured and consoling the bereaved, father and son sat down together amid the ruins and wept. How can our two countries magnify this simple expression of caring? How can we each convey the goodwill of our people?

Forty-three years ago, a young Lieutenant by the name of Albert Kotzebue, class of 1945 at Texas A&M, was the first American soldier to shake hands with the Soviets at the banks of the Elbe River. Once again, we are ready to extend our hand. Once again, we are ready for a hand in return. Once again, it is a time for peace.

Mr. WIRTH. What we are seeing here, slowly but surely, an understanding there is a so-called softer side to arms control. The President is picking up on this. I think this is a very welcome first step. Open skies is but the

beginning of a whole series of steps that a number of us believe ought to be taken but I wanted to take this moment to add my words of encouragement to the White House and my words of praise for them in stepping out in this very important area.

Finally, Mr. President, I wanted to speak very briefly on the global warming issue and the President's initiative; I think a very welcome, again, first step on their part. Not as much as some of us would like to have seen but it gets us moving in the right direction.

We know this is a major crisis. We know that the EPA has done some superb studies on this front and have made some very strong recommendations to the White House and I think the White House is now getting up to speed.

At the Commerce Committee hearing last week I asked if any of the members of the White House staff, to the knowledge of various people in the scientific community or members of senior staff at OMB, had been gotten up to speed on this and other environmental issues. Apparently they had not.

It is my hope that we might get them further up to speed, Mr. President. I will be writing to the President today, joined by some of my colleagues, offering to set up an overall seminar on the issue of, not only global climate change, but important environmental issues altogether, to make sure that senior administrators in the White House, senior officials at OMB, understand the enormous urgency of moving out rapidly not only on global climate change but other very severe environmental issues as well.

Finally I spoke this afternoon with officials of the National Center for Atmospheric Research in Boulder, CO. Together, we are going to be sending an invitation to the President to come to NCAR, probably the most significant research facility in the country in the area of global warming; the facility where Time magazine's famous conference was held last fall on global warming and global environmental issues, to invite President Bush to come out to Boulder, CO, to the National Center for Atmospheric Research and to receive firsthand not only a briefing but a very clear understanding of the extraordinary science that is going on and also the enormous importance of this issue.

So that will be going to the President very soon. We look forward to his response and look forward to working with him, not only on this issue but on so many others.

Mr. President, I have a number of accompanying documents to go with my statement, and I ask unanimous consent they be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC, May 3, 1989.

The PRESIDENT,
1600 Pennsylvania Avenue,
Washington, DC.

DEAR MR. PRESIDENT: Last December, Soviet General Secretary Gorbachev at a speech at the United Nations outlined his government's intent to implement a far-reaching unilateral reduction of military forces by 1991. He specifically indicated that six tank divisions would be withdrawn from East Germany, Czechoslovakia and Hungary as part of a reduction of 5,000 Soviet tanks in those countries, as well as a total of 10,000 tanks, 8,500 artillery pieces and 800 aircraft to be withdrawn from east of the Urals. These promised Soviet unilateral reductions were soon followed by similar pledges from most of the Soviet Union's East European allies, and by further specific details of the planned implementation of the reductions themselves.

Most Western defense analysts agree that successful implementation of General Secretary Gorbachev's reductions package would significantly reduce the Warsaw Pact's potential for short-warning attack in Central Europe. As we begin the negotiations on conventional force limitations at Vienna, the promised Eastern reductions could also serve as an important stimulus to the talks, as well as becoming a kind of "confidence building measure" in their own right.

Yet important questions remain about how the Soviets plan to go about these unilateral cuts and how we in the West will be able to monitor effectively the reductions. To complicate matters, the Soviet Union appears to be contemplating a restructuring of its armed forces at the same time that the proposed reductions are to take place, thereby making a Western assessment of the good faith implementation of these cuts potentially more difficult.

The Eastern unilateral reductions represent a dramatic change from previous Soviet policy and may be an important opportunity to begin restructuring the post-war security order in Europe to provide more stability with less burden. These reductions began last week and Western observers, including media, were invited to witness the first Soviet withdrawals from Hungary.

We believe that the United States, in coordination with its NATO allies, should propose to the Soviet Union and its Warsaw Pack allies appropriate confidence-building measures to reduce ambiguity about the nature and scope of the Eastern unilateral force reductions. Such measures need not await formal agreement on "transparency" measures under discussion at the Vienna negotiations, and may serve as pilot verification projects to be applied to a future CFE agreement.

We know that your Administration will continue to follow closely the implementation of Mr. Gorbachev's unilateral force reductions, and sincerely hope that the United States government will take advantage of every opportunity to clarify for ourselves the true meaning of Mr. Gorbachev's actions.

With best wishes,
Yours sincerely,
SAM NUNN.
TIMOTHY E. WIRTH.
CARL LEVIN.

PRESIDENTIAL STATEMENT

1. The United States delegation to the steering group of the response strategies working group on climate change carried instructions to move the international community forward in establishing a process for considering how to respond to climate change. I am pleased to note that the nations meeting in Geneva have agreed to a workshop this fall looking at the range of financial, economic, technical and legal issues for responding to climate change.

2. The United States looks forward to playing a significant role in efforts to assess and respond to global climate change.

3. I expect that these efforts will lead to formal negotiations on the establishment of a framework convention on global climate. It is important that this process lead to international scientific consensus on the seriousness of the issue for the environment and for the world economy. At the same time, we should ensure that the interests of developing countries are taken into account in this process.

4. The United States will host a meeting under the auspices of the response strategies working group this fall that is intended to advance our understanding and promote consensus. I look forward personally to reviewing its results.

[From the White House, Situation Room, May 12, 1989]

To RUEHGV/U.S. Mission, Geneva:

Please deliver the following message to U.S. mission Geneva for immediate attention of Assistant Secretary of State Bernthal, head of U.S. delegation to the steering group of the response strategies working group from chief of staff, John Sununu.

1. The President appreciates your efforts and is encouraged by the reports of progress thus far. We consider the reported emerging agreement on an advanced preparatory program to address global climate response issues comprehensively to be extremely positive. To further this process, please make every effort to obtain agreement on a global warming workshop this fall, hosted by the United States. This workshop should be designed to identify the scientific, legal, technical and economic issues critical to further progress on beginning negotiations on an international convention on global climate change.

2. We would encourage strongest efforts by U.S. delegation to attain approval of this preparatory program. The scope and importance of this issue are so great that it is essential for the U.S. to exercise leadership role. We should seek to develop full international consensus on necessary steps to prepare for a formal treaty negotiating process. However, because the size of the potential problem is so large, improper or ill-advised actions could have enormous unintended environmental, economic and social consequences. At the same time we should ensure that the interests of developing countries are taken into account in considering responses to climate change.

3. Serious and sustained scientific technical, economic and legal analysis will be critical to successful completion of any global climate convention negotiations. In addition to prompt development of these analysis, the workshop, under the auspices of the RSWG, should be structured to help identify the elements that should be included in a framework convention on global climate, as well as identifying key domestic and eco-

nomic policies of all countries that must be included in any comprehensive process.

[From the Washington Post, May 12, 1989]

BUSH SUGGESTS WORKSHOP ON GLOBAL WARMING

(By Ann Devroy)

Accused by environmentalists of backing off his pledge to lead the international response to global warming, President Bush yesterday offered to host a "global workshop" here in the fall to prepare for later negotiations on an international treaty to limit the problem.

According to administration officials, the White House sent new instruction last night to the U.S. team attending an intenational meeting in Geneva on the issue. The 30-nation gathering, sponsored by the United Nations, is trying to lay the groundwork for a formal identification of global warming as a world environmental threat.

Environmentalists are pressing for an international convention that would lead to treaty negotiations on limiting emissions of gases, mainly carbon dioxide, which are known to trap solar heat like a greenhouse, causing the atmospheric temperature to rise.

Although Bush promised in the campaign last year to have the United States lead the world in solving the problem, his team was told last week to take a cautious approach until more is known of the scientific, economic and other effects of global warming and the costs of addressing it.

But last night, officials said, the U.S. team was given new instructions in language worked out by White House Chief of Staff John H. Sununu and Environmental Protection Agency Administrator William K. Reilly. The instructions, as read to The Washington Post by an administration official, call on the U.S. team to press the other nations to attend a "global workshop," hosted by the United States, aimed at identifying issues "critical to further progress" on beginning treaty talks.

The instructions note that the "scope and importance" of the issue are so important that a U.S. leadership role is "essential." The team in Geneva is charged with helping to develop an international consensus on the steps necessary "to prepare for a formal treaty negotiating process."

The workshop, the instructions note, should be structured to identify the elements that "should be included in a framework" for later negotiations.

The immediate reaction from environmentalists, who had accused Bush of stalling, was to view the move as progress, but not enough. Rafe Pomerance, head of the World Resources Institute, called the move a "waffle," saying many of the issues involved in the problem have been addressed and Bush's move did not amount to a "clear-cut declaration" for a speedy international negotiation. Pomerance said many nations want to move quickly and the Bush move adds several more months to the process.

The president has been buffeted by competing advice, with some aides such as Reilly pushing for more immediate action and a U.S. initiative at this conference, while others urged caution. Administration officials insisted that the new instructions were a sign "the president does intend the U.S. take the lead" and "does support international treaty negotiations" after concerns, particularly economic ones, are examined.

[From the New York Times, May 12, 1989]

U.S. IN A SHIFT, SEEKS TREATY ON GLOBAL WARMING

[By Philip Shabecoff)

WASHINGTON, MAY 11.—In an important switch, the White House authorized American negotiators in Geneva tonight to lead the way toward an international treaty to control global warming.

The new development followed widely published reports that the White House staff, concerned about the costs and the technical feasibility, was resisting calls from the State Department and the Environmental Protection Agency that the United States take such a lead.

In an interview tonight, the White House chief of staff denied any resistance to the idea. But a Bush Administration official acknowledged that the initial instructions to the American delegation at Geneva, where a United Nations conference on global warming is under way, had made no reference to any Washington initiative toward a treaty.

The fresh instructions by the White House were contained in a telegram from the chief of staff, John H. Sununu which called for a "global warming workshop" to be held in the United States this fall.

The workshop would prepare analyses of legal, scientific, economic and social issues that must be resolved in order to reach agreement on a treaty to deal with a growing scientific consensus; that gases resulting from industrial and other human activity are trapping the heat from the sun and will cause the earth's surface to warm by 3 to 9 degrees by the middle of the next century, portending immense environmental consequences.

In his telegram, Mr. Sununu directed the American delegation to take a leadership role in planning the workshop, whose studies would then be used to develop "full international consensus on necessary steps to prepare for a formal treaty negotiating process."

In the telephone interview tonight, Mr. Sununu said President Bush was optimistic that an agreement on the workshop would be reached Friday and was prepared to send a note of congratulation to participants at the Geneva meeting.

"This is the thing we were hoping to get," be said, although adding. "It is important that we make sure we deal with the problem in a reasoned scientific and technical way."

There were two reasons for the turnaround by the White House, an Administration official said, One was that the progress of the Geneva meeting had been so encouraging that members of the delegation thought more could be accomplished with a more positive role by the United States.

The other reason, the official said, was this week's congressional and public criticism that Mr. Bush was failing to exercise the leadership on global warming that he promised in his Presidential campaign last year.

On Monday, the British Prime Minister, Margareret Thatcher, called for a convention on climate changes caused by global warming, but the United States had no specific response. The State Department and environmental officials have been debating with budget and agriculture officials over a treaty. A NASA scientist testified Monday that the White House budget office had softened his testimony prepared for Congress on the problems of the greenhouse effect.

In his telegram to the delegation, which is headed by Assistant Secretary of State Frederick Bernthal, Mr. Sununu urged "strongest efforts" to persuade other nations to attend the workship in the United States this fall. "The scope and importance of this issue are so great that it is essential for the U.S. to exercise a leadership role," the message said.

Mr. Sununu warned, however, that because "the size of the potential problem is so large, improper or ill-advised actions could have enormous unintended environmental, economic and social consequences."

Concern about these consequences had prompted the White House staff, including the Office of Management and Budget, to urge a go-slow approach toward a global warming treaty. Secretary of State James A. Baker 3d and Environmental Protection Agency administrator William K. Reilly have been urging the President to move more quickly to establish a United States leadership role on the global warming issue.

Mr. Sununu told the delegation that in preparing for a global warming treaty, the interests of developing countries be taken into account.

Economists have pointed out that countries just beginning the industrialization process cannot afford, and do not have the technical capability of developing, the kind of pollution control measures that would be required to come to grips with the global warming problem. Accordingly, it is widely accepted that the industrialized nations will have to transfer the necessary technology to the developing nations if those poorer countries are to be enlisted in the struggle with the greenhouse effect.

Mr. WIRTH. I yield the floor.

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

CONVENTION ON GLOBAL WARMING

Mr. HEINZ. Mr. President, today I join with a number of my Senate colleagues to take note of the announcement by the White House in the directive issued by the Chief of Staff, John Sununu, involving this administration in the work ultimately leading to a convention that will pose and adopt solutions to the problem of global warming.

As I reviewed the documents, as well as the news reports, I think it is quite evident today the United States has reestablished its diplomatic, its scientific, and its environmental leadership in one of the most pressing environmental issues that we are facing or are ever likely to face, that of global warming. Specifically by calling for an international conference, a workshop to come up with solutions, President Bush has assured that our scientific leadership is matched by our diplomatic leadership.

Mr. President, those of us who have had the opportunity to study the reports and review the science, have come to the conclusion that the issue of global warming is a problem that no nation of the world, developed or developing, can ignore. Solving the pending climate change crisis is going to

take action on every conceivable front. That means technical and scientific; it means economic; it means political. The workshop that President Bush has proposed is going to guarantee the highest level attention to those issues. Global problems can only be solved with global resolve, and that is what the President has demonstrated in this case.

We have achieved and we are now achieving world progress on the ozone problem, the progress that in the recent past would have been thought impossible. The treaty process initiated with the signing of the Montreal protocol can be duplicated again to tackle global warming, and I suggest and submit that, indeed, it must be duplicated.

I think it is important for people to understand what the President and his administration have done. I say this for the point of emphasis. As perhaps some will recall, the United States chairs one of these global warming working groups; the so-called response strategies working group. They are the problem solvers, the designated hitters, Mr. President, on this issue.

In calling for a workshop on response strategies, what the President is saying is that it is time to get down and analyze the nuts and bolts of solutions. We need to look at the economics of those solutions; we need to look at the scientific aspects of those solutions to make sure there are no unintended consequences; we need to look at the diplomatic consequences of those solutions to make sure they are workable and practical, and do not run into unanticipated political objections. This is a problem-solving commitment by the administration, which I want to commend them for.

It is the first and, in my judgment, necessary step in a process that will lead ultimately to a convention and treaty on global warming. It is the job of this working group between now and the time of the convention, to make sure the homework is done so that when this meeting takes place, the issues are as close to resolution as possible.

In that regard, to those who will be a part of this working group, be they Americans or others, I urge them to take into most specific account the need to look for and find innovative, so-called least cost solutions to these problems. As the Senator from Colorado and I have proposed previously last year, there is a compendium of potential market-based solutions which, if applied intelligently and carefully, can bring about much lower cost solutions than some of the traditional command and control strategies that we have used in the past and might be tempted to use more of in the future.

It is vital to this Senator that we minimize the political opposition to making progress on controlling greenhouse gasses and mitigating global warming. We should not underestimate how much political resistance where economic costs or economic hardship may be involved. The best way, and the judgment is shared by many scientists and economists, to minimize that political resistance is to have strategies that allow the marketplace to make the most efficient decisions on obtaining environmental goals. By minimizing the excess cost that a so-called command and control and control strategy can impose market incentives can achieve greater environmental protection. If the working group bears this in mind and applies rigorously its considerable expertise, not only to the solutions, but to the methodology, I think it will produce results that will be acceptable diplomatically, economically, scientifically and, most important, move us in a major way toward a convention, an agreement of international scope to mitigate and hopefully head off the potential planetary catastrophe that global warming obviously implies.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

GLOBAL CLIMATE CHANGE CONVENTION

Mr. CHAFEE. Mr. President, I would hope that all Senators would join me in congratulating the administration and, of course, by the administration we mean President Bush, on pressing forward with efforts that I am sure would lead to the establishment of a convention on global climate change. This is a very wise and constructive step that the President has taken. What I am, of course, referring to is the cable that the President sent to our representatives in Geneva at the conferences taking place there and especially constructive, in my judgment, is the administration's recognition of the need to ensure that the interests of developing countries are taken into account when there is to be held a convention on global climate change.

It is also significant that the United States will next fall host a workshop under the auspices of the Intergovernmental Panel on Global Climate Change.

That workshop, which is a necessary preliminary to a global climate convention—and a convention, of course, is a word of art that means there will follow on a treaty dealing with the global climate activities—is very good news, and in the ensuing weeks I think it is very important that all of us work with the administration in their efforts to do something about the warming that is taking place throughout our globe.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the PRESIDING OFFICER laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HOLLINGS from the Committee on Commerce Science, and Transportation, without amendment:

S. 104: A bill to authorize a certificate of documentation for the vessel *Liberty* (Rept. No. 101-22).

S. 255: A bill to authorize appropriations for the Local Rail Service Assistance Program (Rept. No. 101-23).

S. 475: A bill to authorize a certificate of documentation for a vessel (Rept. No. 101-24).

S. 572: A bill to authorize a certificate of documentation for the vessel *Navatek I* (Rept. No. 101-25).

S. 638: A bill to authorize a certificate of documentation for the vessel *Nor'wester* (Rept. No. 101-26).

By Mr. BIDEN from the Committee on the Judiciary with amendments:

S. 593: A bill to exempt certain activities from provisions of the antitrust laws.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents which were referred as indicated:

EC-1105: A communication from the Director of the Office of Management and Budget, transmitting, pursuant to law, a report on six proposed rescissions of budget

authority; pursuant to the order of January 30, 1975, as modified on April 11, 1986, referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Banking, Housing, and Urban Affairs, the Committee on Environment and Public Works, the Committee on Energy and Natural Resources, the Committee on the Judiciary, the Committee on Labor and Human Resources, the Committee on Armed Services, the Committe on Agriculture, Nutrition, and Forestry, the Committee on Foreign Relations, the Committee on Finance, and the Committee on Commerce, Science, and Transportation.

EC-1106. A communication from the Director of the Office of Management and Budget, transmitting a draft of proposed legislation entitled the "Farm Credit Improvement Act of 1989;" to the Committee on Agriculture, Nutrition, and Forestry.

EC-1107. A communication from the Secretary of the Interior, transmitting a draft of proposed legislation to provide for funding of the wildfire protection, wildfire suppression, and emergency burn rehabilitation activities of the Department of Agriculture, and for other purposes; to the Committee on Appropriations.

EC-1108. A communication from the Chief of Legislative Affairs of the Department of the Navy transmitting, pursuant to law, notification of the intent of the Navy to offer for lease a naval vessel to the Government of Mexico; to the Committee on Armed Services.

EC-1109. A communication from the Director of Administration and Management, Office of the Secretary of Defense, transmitting, pursuant to law, a report on real and personal property of the Department of Defense; to the Committee on Armed Services.

EC-1110. A communication from the Chairman of the Federal Deposit Insurance Corporation, transmitting, pursuant to law, the fourteenth annual report of the Corporation's Office of Consumer Affairs; to the Committee on Banking, Housing, and Urban Affairs.

EC-1111. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to amend section 18 of the Export Administration Act of 1979, as amended, to authorize appropriations for fiscal year 1990; to the Committee on Banking, Housing, and Urban Affairs.

EC-1112. A communication from the Chairman of the National Research Council, transmitting, pursuant to law, a report entitled "Improving School Bus Safety;" to the Committee on Commerce, Science, and Transportation.

EC-1113. A communication from the Secretary of the Interior, transmitting, pursuant to law, an annual report entitled "Research and Demonstration Projects in Alternative Coal Mining Techniques;" to the Committee on Energy and Natural Resources.

EC-1114. A communication from the Acting Administrator of the General Services Administration, transmitting, pursuant to law, copies of three lease prospectuses; to the Committee on Environment and Public Works.

EC-1115. A communication from the deputy general counsel of the Department of Defense, transmitting a draft of proposed legislation to modify the tax treatment of gain on sales of residences by certain members of the Armed Forces; to the Committee on Finance.

EC-1116. A communication from the Acting Secretary of Health and Human Services transmitting, pursuant to law, a report on expenses incurred by Medicare beneficiaries for outpatient prescription drugs using data from the 1987 National Medical Expenditure Survey; to the Committee on Finance.

EC-1117. A communication from the special counsel of the U.S. Merit Systems Protection Board, transmitting, pursuant to law, the report of the Secretary of the Interior; to the Committee on Governmental Affairs.

EC-1118. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on their systems and plans to correct identified weaknesses; to the Committee on Governmental Affairs.

EC-1119. A communication from the Chairman of the Board of Governors of the Federal Reserve Board, transmitting, pursuant to law, the annual report of the Board under the Freedom of Information Act for the calendar year 1988; to the Committee on the Judiciary.

EC-1120. A communication from the Attorney General, transmitting, pursuant to law, the reports on the Department of Justice Assets Forfeiture Fund and on forfeited property with respect to which funds were not deposited in the Fund; to the Committee on the Judiciary.

EC-1121. A communication from the Secretary of Education, transmitting, pursuant to law, Final Regulations for the Magnet Schools Assistance Program; to the Committee on Labor and Human Resources.

EC-1122. A communication from the President of the Legal Services Corporation, transmitting, pursuant to law, the Legal Services Corporation's Fact Book for 1987–1988; to the Committee on Labor and Human Resources.

EC-1123. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the act creating the Saint Lawrence Seaway Development Corporation to eliminate the transfer of the Corporation's toll revenues to the harbor maintenance trust fund, and for other purposes; to the Committee on Environment and Public Works.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. REID (for himself, Mr. BRYAN, Mr. WARNER, Mr. SIMON, Mr. CRANSTON, Mr. DECONCINI, Mr. MITCHELL, Mr. METZENBAUM, Mr. THURMOND, Mr. HATCH, Mr. DASCHLE, Mr. BRADLEY, Mr. HOLLINGS, Mr. MCCAIN, Mr. ROCKEFELLER, Mr. WIRTH, Mr. SHELBY, Mr. PELL, Mr. GRAHAM, Mr. CHAFEE, Mr. SANFORD, Mr. MATSUNAGA, Mr. MOYNIHAN, Mr. RIEGLE, Mr. SASSER, Mr. HARKIN, Mr. BURDICK, Mr. KOHL, Mr. KERRY, Ms. MIKULSKI, Mr. GARN, Mr. ADAMS, Mr. GORE, Mr. ROBB, Mr. LEVIN, and Mr. KENNEDY):

S. 982. A bill to repeal a provision of Federal tort claim law relating to the civil liability of Government contractors for certain injuries, losses of property and deaths and for other purposes; to the Committee on the Judiciary.

By Mr. REID:

S. 983. A bill to provide Public Housing Authorities with waivers of the procedures, required in section 6(k) of the United States Housing Act of 1937; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. METZENBAUM (for himself, Mr. HEINZ, Mr. WIRTH, Mr. BUMPERS, Mr. CONRAD, and Mr. JEFFORDS):

S. 984. A bill to amend the Motor Vehicle Information and Cost Savings Act; to the Committee on Commerce, Science, and Transportation.

By Mr. LEVIN:

S. 985. A bill to amend the Internal Revenue Code of 1986 to allow the Secretary of the Treasury to release information to participants of a qualified pension plan; to the Committee on Finance.

By Mr. LAUTENBERG:

S. 986. A bill to require Federal review and approval of oil discharge contingency plans, and for other purposes; to the Committee on Commerce, Science, and Transportation.

S. 987. A bill to require the Secretary of Transportation to conduct a study of discharges of oil and hazardous substances into the waters of New York Harbor, the Delaware River, and adjoining waters; to the Committee on Commerce, Science, and Transportation.

By Mr. DASCHLE (for himself, Mr. CONRAD, Mr. BURDICK, Mr. BOSCHWITZ, and Mr. HEFLIN):

S. 988. A bill to amend the Internal Revenue Code of 1986 to treat rural electric or telephone cooperatives in the same manner as other cooperatives for purposes of the book income preference under the minimum tax; to the Committee on Finance.

By Mr. SARBANES:

S.J. Res. 130. A joint resolution designating February 11 through February 17, 1990, as "Vocational-Technical Education Week"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. REID (for himself, Mr. BRYAN, Mr. WARNER, Mr. SIMON, Mr. CRANSTON, Mr. DECONCINI, Mr. MITCHELL, Mr. METZENBAUM, Mr. THURMOND, Mr. HATCH, Mr. DASCHLE, Mr. BRADLEY, Mr. HOLLINGS, Mr. MCCAIN, Mr. ROCKEFELLER, Mr. WIRTH, Mr. SHELBY, Mr. PELL, Mr. GRAHAM, Mr. CHAFEE, Mr. SANFORD, Mr. MATSUNAGA, Mr. MOYNIHAN, Mr. RIEGLE, Mr. SASSER, Mr. HARKIN, Mr. BURDICK, Mr. KOHL, Mr. KERRY, Ms. MIKULSKI, Mr. GARN, Mr. ADAMS, Mr. GORE, Mr. ROBB, Mr. LEVIN, and Mr. KENNEDY):

S. 982. A bill to repeal a provision of Federal tort claim law relating to the civil liability of Government contractors for certain injuries, losses of property, and deaths, and for other purposes; to the Committee on the Judiciary.

RADIATION VICTIMS FAIR TREATMENT ACT

Mr. REID. Mr. President, "The Day They Bombed Utah" is a book of fact, not fiction. It describes in detail what happened to the people in Utah when

atmospheric tests were conducted on the Nevada testing range.

Mr. President, there is not a book called "The Day They Bombed Nevada," but the facts are certainly there. The book to which I previously referred details what happened when those above-ground tests were conducted. It talks about sheep dying very slow deaths, having sores in their eyes and their mouths for unending periods. It talks about people in Saint George, UT, a quiet peaceful little community downwind from where the tests were set off. It talks about people dying of cancer, not one or two or three or four, but scores of people dying in Saint George, UT, as a result of atomic radiation. Atomic radiation, Mr. President, plays no favorites.

The sad part about all this is that the Federal Government was lying to the people in Nevada and in Utah. The Government knew there were problems with radiation. They failed to tell the people who were downwind from those tests. To this day, there are people who are suffering as a result of those tests.

That is why, Mr. President, I rise to reintroduce my Radiation Victims Fair Treatment Act. I am joined by a long list of original cosponsors—BRYAN, WARNER, SIMON, CRANSTON, DECONCINI, MITCHELL, METZENBAUM, THURMOND, HATCH, DASCHLE, BRADLEY, HOLLINGS, MCCAIN, ROCKEFELLER, WIRTH, SHELBY, PELL, GRAHAM, CHAFEE, SANFORD, MATSUNAGA, MOYNIHAN, RIEGLE, SASSER, HARKIN, BURDICK, KOHL, KERRY of Massachusetts, MIKULSKI, GARN, ADAMS, GORE, ROBB, LEVIN, and KENNEDY. There will be others, Mr. President.

We all recognize that a grave injustice was done to the many victims of radiation exposure, and they have been effectively denied their day in court.

Thousands of Americans were exposed to radiation from nuclear weapons tests at the Nevada test site. Those exposed included veterans, test site workers, and civilians who worked and lived near the test sites. These victims of radiation exposure are unable to have a fair hearing in court because the Federal Government is still being unfair to them. In this particular instance, the Federal Government has claimed immunity from being sued. Another provision of the law prevents the contractors from being sued. The legislation that I introduce creates no automatic damages but a right to go forward in court.

The legislation we are proposing would repeal the section of law which protects the nuclear weapons testing contractors from being sued. It will allow the radiation victims to seek redress in court for those contractors' acts or omissions which in many cases have resulted in premature death or painful disability.

The testing of nuclear weapons was and is done to provide for the defense of our Nation. The Government, therefore, must provide some remedy for those who have been injured as a result of these tests. It is time for Congress to act. It is time for the victims of radiation exposure to be given fair treatment—to be given their day in court, their opportunity for justice. That time, Mr. President, is running out. The tests were in the fifties, some 30 years ago. These people need help before they literally pass from this Earth.

So, Mr. President, I ask that we reflect on what tragedy was brought about as a result of these tests that took place and the suffering that the people have gone through over these many years, and that they at least be able to bring their cases before the court, before an impartial trier of fact to determine if in fact they have been damaged.

Mr. SIMON. Mr. President, I rise today in support of this legislation which would restore the legal rights of individuals, both veterans and civilians alike, who were exposed to radiation in connection with the U.S. Atomic Weapons Testing Program.

By way of background, during the years 1946 to 1962 approximately 235 atomic tests were conducted by the United States. Until 1985 individuals who incurred injuries as a result of this exposure could file suit against contractors who participated in the testing programs. The contractors were indemnified by the Government for the cost of litigators, judgments, and settlement.

The 1985 Defense Authorization Act, Public Law 98-525, included a provision, section 1631, which drastically altered the legal rights of these individuals by establishing the United States as the defendant in such suits and providing that these cases fall under the Federal Tort Claims Act [FTCA]. Limiting radiation-exposed civilians and veterans to suits under the FTCA deprives potential plaintiffs of a variety of previously held rights, including the fundamental right to a jury trial.

Furthermore, because the United States is provided with certain defenses unavailable to the contractors, judgments on behalf of veteran and civilian claimants against the U.S. Government are effectively barred. The practical result of section 1631 is to leave the vast majority of those exposed to radiation in the atomic weapons testing program with no legal remedy.

The bill being introduced today would repeal section 1631 and restore to individuals the right to seek redress in court for contractors' acts and omissions. The bill does not guarantee compensation, but rather simply restates a basic American right, the right to a day in court. An identical bill, which I sponsored, was reported by the Judiciary Committee in the last Congress.

It is my hope that Congress will act promptly to ensure that those who were injured as a result of the testing program will receive the treatment they deserve. It is time to do the right thing for these victims and then put this episode honorably behind us.

By Mr. METZENBAUM (for himself, Mr. HEINZ, Mr. WIRTH, Mr. BUMPERS, Mr. CONRAD, and Mr. JEFFORDS):

S. 984. A bill to amend the Motor Vehicle Information and Cost Savings Act; to the Committee on Commerce, Science, and Transportation.

AUTOMOBILE FUEL ECONOMY ACT

● Mr. METZENBAUM. Mr. President, I rise today to introduce legislation that will increase the corporate average fuel economy [CAFE] standards for automobiles.

Nowhere in our economy other than passenger vehicles do we find the potential for such great savings of oil so readily, nor the need so great. By increasing the CAFE standards from their current level of 27.5 miles per gallon to 34 miles per gallon by 1996, we will save from 400,000 to 600,000 barrels of oil a day. This is two times the amount of oil spilled by Exxon in Alaska's Prince William Sound. And CAFE will save this tremendous amount of oil every day of every week of every year, indefinitely. Two oil-spills worth of savings daily. Two oil-spills worth of lowered supertanker shipments every day.

Since they were first enacted in 1975, the CAFE standards have been a smashing success. New cars now average over 27 miles per gallon, a doubling since the standards were put in place. And these improvements have come without loss of desired traits: over the same period that fuel efficiency was doubling, the average roominess of cars remained constant, many luxury features have been added, highway safety has never been better, and the average horsepower went up by 20 percent.

Despite the clear benefits of the standards, progress has eroded in recent years as the Reagan administration rolled back the CAFE standard for 4 straight years. Such a relaxation not only removed the legal and financial pressure to improve fuel economy, but it sent a very clear message to the car companies: that efficiency doesn't matter anymore, that the automakers can do whatever they want, regardless of its impact on the rest of society. And the companies certainly did not miss that message, as the New York Times recently wrote:

At a time when oil imports are rising, domestic oil production is decreasing and environmentalists are warning of the need to curb atmospheric pollution, car makers are

lobbying for relaxed fuel efficiency standards.

New cars now meet the existing standard but there is no longer any incentive for automakers to improve the performance of their fleets. Rather than worrying about global warming or skyrocketing oil imports, auto companies are worried about horsepower wars and zero-to-60 times.

This bill will change all that. This bill will reinstate the policy that was first put into place in 1975 with the passage of the Energy Policy and Conservation Act: that auto fuel economy should continue to increase steadily into the future to the "maximum feasible" level, until all practical technologies have been exhausted. And considering the technological prowess of domestic and foreign automakers, I am confident that there will continue to be breakthroughs and improvements for many years to come.

The simple truth is that we have the technology today to make our cars more fuel-efficient without sacrificing size, safety, or horsepower. We must not ignore this perfect opportunity to help consumers and our environment.

The big three automakers have always had dire predictions about the impact of Federal regulations on cars, whether it was for safety, air pollution, or fuel economy. In 1975 they were saying that if we passed CAFE then everyone would have to be driving Pintos in 1985.

Well, the automakers were dead wrong; 1985 came and went, and the auto-driving public wasn't stuck in Pintos, thank Heavens. Despite the companies' protests, technical ingenuity carried the day, bringing us widespread use of fuel injection, lighter materials, better aerodynamics, front-wheel drive, and a host of other improvements. Rather than driving smaller cars, the American public is driving better performing and more fuel-efficient cars of all sizes.

The doubling of new car gas mileage brings with it some excellent success stories, such as the Pontiac Grand Am—no one's idea of an economy car—that with GM's Quad-4 engine gets 32 miles per gallon; the comfortable and sporty Chrysler LeBaron, also at 32 miles per gallon; the upscale Toyota Camry at 33 miles per gallon; the large Buick Century wagon at 31 miles per gallon.

And this is not to mention the better gas mileage of currently popular smaller cars, such as the Ford Escort, Chevy Geo, or Dodge Colt, never mind the ultra-high-efficiency prototypes under development.

I recently chaired hearings on CAFE before the Energy Regulation and Conservation Subcommittee; and other committees have held hearings on fuel efficiency. During those hearings we heard the same protests from the auto companies that we've been hearing all along: tighter CAFE standards cannot be accomplished without severely limiting their output of certain large cars. Just as they did in the 1970's, they neglect the role of technology in meeting a reasonable CAFE standard.

There have been several independent analyses performed of how far the automakers can boost fuel efficiency without losing interior space or horsepower. Studies by the Department of Energy and the Office of Technology Assessment determined that a CAFE of 33 to 35 miles per gallon by 1995 would be practical and cost-effective, and doesn't require a shift in size mix or performance.

Most Senators left those hearings with the same conclusion that I came to, realizing the practicality and necessity of what I call the "No-Sacrifice CAFE:" A schedule for improvements in auto fuel efficiency that can be met strictly by deploying familiar, off-the-shelf technologies throughout the fleet. Technologies as commonplace as 4-valve engines, overhead cams, and 4-speed automatic transmissions. These technologies are as practical for large cars as small ones, so that we can register the savings for all car classes, and not prevent those customers who desire a large car from buying one.

By pursuing a strong CAFE that relies on technological improvements we are also asking American workers to make no sacrifice. The automakers have in the past complained that fuel economy standards would throw U.S. workers out of their jobs. In fact the evidence runs quite contrary to this assertion: First, if we hadn't passed CAFE and thereby pushed automakers into pursuing fuel economy they would have lost even more market share to Japanese imports following 1979's tripling of prices; second, when CAFE standards were rolled back by the Reagan administration we saw a rapid increase in the importation of small cars by the domestic manufacturers—and with it the exportation of small-car jobs.

The Automobile Fuel Economy Act of 1989 that I am introducing today with Senators HEINZ, WIRTH, BUMPERS, JEFFORDS, and CONRAD will make the "No-Sacrifice CAFE" the law of the land.

This legislation has four parts.

First, it would set up a schedule for slowly increasing CAFE standards to 34 miles per gallon over the next few years. According to the Energy Information Administration this will save 400,000 to 600,000 barrels of oil per day. This dramatic step is the single biggest step we can take toward conserving petroleum: and with it the benefits of lower imports and less air pollution.

Second, the legislation would establish a "no-backsliding" provision. The CAFE's of several automakers, primarily the Japanese as they strive to corral our high-end auto market, have been steadily declining over the last several years, and this provision would put a quick stop to that practice. Additionally, the no-backsliding requirement would prevent domestic automakers from moving the production of larger cars overseas—and the many thousand associated jobs—that is possible under the current rules. Since it would prevent backsliding with respect to their imported sub-fleets, which now average about 40 miles per gallon, they would be very hard pressed to move large car production out of the United States.

Third, the legislation would increase the penalties for noncompliance with CAFE, from the current $5 per tenth mile to $10 per tenth; and the bill would give the Secretary of Transportation the authority to increase the penalty up to $20 per tenth for auto companies that display a continuing pattern of noncompliance—companies such as Mercedes and Jaguar who disregard the standards year after year after year.

Finally, the bill would authorize formal studies by the Departments of Energy and Transportation and the Environmental Protection Agency regarding automotive technologies and fuel economy testing procedures. Following these studies we may want to revisit the CAFE issue to ensure that the standards established by this bill are adequately aggressive.

The necessity of passing CAFE legislation as soon as possible—and reestablishing the importance of the efficient use of oil—is starkly brought home by the recent catastrophic Alaska oil spill. Additionally, the scientific community is currently determining the magnitude and timing of global warming, but the fact that there will be warming is well beyond debate, as is the fact that carbon dioxide is a leading culprit. One-fifth of greenhouse gases are generated in the United States, one-third of which comes from the transportation sector. Similarly, our ground level air pollution problems, such as ozone, are also worsened by our extensive production and use of gasoline.

The Alaska spill also reminds us of our skyrocketing dependence on petroleum imports, now shooting up toward all-time highs. Imports are up 16 percent over last year, 50 percent over the last 3 years—now representing over 40 percent of total oil use—and are still climbing. Soon they will certainly cross the 50 percent threshhold—a level of import use that this country has never seen, even in the 1970's. In January of this year, President Reagan officially declared that "petroleum imports threaten to impair the national security." Such dependency on foreign sources puts an untenable

pressure not only on this country's military and foreign policy but on our domestic economy—placing at risk our homeowners, factories, and, of course, everyone who depends on their automobile.

Alternative fuels hold great promise here. The Alternative Motor Fuels Act of 1988 gives CAFE credits to vehicles powered by alternative fuels, such as compressed natural gas and methanol. But this incentive is meaningful only if there are strong CAFE standards in place—without CAFE automakers can remain indifferent to alternative fuels.

But nothing can work as quickly, as effectively, as economically, as the efficient use of energy. With the price of gasoline at historically low levels consumers are discouraged from purchasing fuel-efficient models; however autos and trucks remain on the road typically for 10 to 15 years, during which time gasoline prices will certainly increase.

The disruption in supplies following the *Exxon Valdez* spill prompted speculation and panic buying that gave rise to tremendous price increases in gasoline prices nationwide. This has been bad enough, but is small potatoes compared to the kind of price rise we would see if our increasing import dependency leads to even a temporary cutoff of supplies into this country.

I urge Members of the Senate to join us in cosponsoring this important legislation. The Automobile Fuel Economy Act of 1989 will encourage the use of American technological ingenuity in our automobiles. It will save energy and protect jobs.●

By Mr. LEVIN:

S. 985. A bill to amend the Internal Revenue Code of 1986 to allow the Secretary of the Treasury to release information to participants of a qualified pension plan; to the Committee on Finance.

RELEASE OF INFORMATION TO PENSION PLAN PARTICIPANTS

● Mr. LEVIN. Mr. President, current law prohibits the IRS from disclosing individual taxpayer information. Although this concern with privacy is understandable and necessary, I have recently come across a case, involving an employer-sponsored pension plan, were the application of these disclosure restrictions has resulted in a serious hardship to the pension plan's beneficiaries.

Under current law, an IRS review of a case involving a company's pension plan may take many months, or even years, before it is finally resolved. During that time, those who depend on their pension benefits are even denied information regarding the status of the inquiry into the plan, as the company is considered to be the taxpayer by the IRS. Instead, the plan participants are expected to wait patiently for the eventual conclusion of the review, despite the fact that their own retirement income is at stake.

The wheels of bureaucracy too often turn slowly. To our constituents who have already retired or are facing retirement, several years of slowly turning wheels, without even knowing the issues under review, represents Government at its worst. Pension benefits, which are, in essence, deferred wages, make a critical difference in the way an individual lives in retirement. As such, they deserve to be informed about decisions which have such a profound impact on their lives.

In order to help correct this situation, I am introducing legislation today to allow participants and beneficiaries of certain pension plans to be provided with information about the particular plan under review. This information includes a description of the issues under review, the progress of the action, and the anticipated completion date.

It is important to note that this legislation would not make the affected employees participants in an IRS review, but simply informed observers. As such, it will let plan participants and beneficiaries observe the progress of a review of their own pension benefits.

I ask unanimous consent that the text of this legislation be included in the RECORD immediately following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 985

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DISCLOSURE OF INFORMATION TO PENSION PLAN PARTICIPANTS.

(a) IN GENERAL.—Subsection (e) of section 6103 of the Internal Revenue Code of 1986 (relating to disclosure to persons having material interest) is amended by redesignating paragraph (7) as paragraph (8) and by inserting after paragraph (6) the following new paragraph:

"(7) PARTICIPANTS AND BENEFICIARIES OF PENSION PLANS.—

"(A) IN GENERAL.—If—

"(i) an employer—

"(I) terminates a pension plan which is part of a qualified trust (within the meaning of section 402(a)(5)(E)(iii)), or

"(II) transfers employees and participants in such a plan to another plan maintained by a subsidiary of the employer, and

"(ii) there is any action under this title in connection with such termination or transfer which may directly or indirectly affect the rights of any participant or beneficiary,

then, notwithstanding the provisions of this section or any other provision of law, the Secretary shall provide to any participant or beneficiary the information described in subparagraph (B).

"(B) INFORMATION TO BE PROVIDED.—The information provided under subparagraph (A) shall consist of:

"(i) A description of the issues under review, the progress of the action and the anticipated completion date.

"(ii) Any interim or final decisions in the action which directly or indirectly affect the participant's or beneficiary's rights under the plan.

"(iii) Any right of intervention which the participant or beneficiary may have."

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to any action pending on or after the date of the enactment of this Act.●

By Mr. LAUTENBERG:

S. 986. A bill to require Federal review and approval of oil discharge contingency plans, and for other purposes; to the Committee on Commerce, Science, and Transportation.

S. 987. A bill to require the Secretary of Transportation to conduct a study of discharges of oil and hazardous substances into the waters of New York Harbor, the Delaware River, and adjoining waters; to the Committee on Commerce, Science, and Transportation.

OILSPILL LEGISLATION

● Mr. LAUTENBERG. Mr. President, today I am introducing a bill that addresses a major gap in oilspill prevention and responses: the adequacy of contingency planning.

This gap was all too clearly exposed by the tragic Valdez spill. There, the unthinkable happened. What they said could never take place, did.

In the span of a few short hours on March 24, 10 million gallons of crude oil poured out of the *Exxon Valdez*. In the time it takes to watch a football game, one of the most pristine, valuable natural areas we have was devastated. In those early morning hours an environmental mess was made that may not be cleaned up for decades. If ever.

I went to Valdez a few days after the spill. To those who haven't been to that area, it's hard to describe the scene. It's an environment that's unlike virtually any other in this country.

As we looked around, we saw towering, snow-peaked mountains, falling sharply into the sea. But there things changed. In the water, and on the beaches, there was the thick crude, what's referred to as "mousse."

That area is changed forever. And even if, years from now—and it will be years from now—the oil is wiped from the beaches, and the fish and wildlife recover, the memory of this spill can't be wiped from the memories of those who depend on the waters of the Prince William Sound. And it shouldn't be wiped from the memories of those of us responsible for writing the laws to help prevent future oilspills.

The blame for the Valdez spill can be spread almost as widely as the spill itself. There's the role alcohol may have played. I've introduced legislation to help the Coast Guard identify alcohol abusers, so they can keep

them out of positions of trust and safety.

But that was only a part of the problem. The bigger question is, How did the system let Captain Hazelwood get control of the tanker in the first place? And how could a so-called contingency plan assume that a spill like this would never happen?

The legislation I'm introducing today gets at those issues. I want the Federal Government to have the authority and the responsibility to review and approve spill contingency plans. The Coast Guard should be able to look at a plan like the Valdez one, and say "you haven't done enough. You're underestimating the risk, and you've got to do more."

When it comes to spills, an ounce of prevention may be worth 10 million gallons of oil.

My legislation would also make sure the Federal Government, and not the spiller, decides when the cleanup is over.

Consistent with the credo that the "polluter pays," my bill would allow the Federal Government to recoup the costs of reviewing and approving contingency plans.

And if the Government determines that an adequate plan is not in place, it could deny access to our ports by unprotected ships.

My bill would also address another weakness that's become so evident in Alaska—cleanup technology. It's absurd, that in a time when we can send a probe to explore Venus, we have men and women wiping oil off rocks with paper towels. As Secretary Skinner said recently, if the oil industry had put the time and effort into preparing for a spill like this that they put into exploration, we might not be in the mess we are today.

It may be inevitable that spills will happen. If so, we've got to be able to respond to them. I want to know where our R&D efforts are going, and find out how to bring oilspill cleanups into the 20th century.

Mr. President, there are other issues that must be addressed. We've got to get an oilspill liability fund in place. The direct costs of cleaning up this spill will likely top $300 million. In a way, we've been lucky. So far, at least, Exxon has been paying the bills. But that may not always be the case. When that day comes, we've got to know that the resources will be there.

I've joined the distinguished majority leader and Senator BAUCUS in introducing a bill to establish a $500 million liability fund. I understand the administration will also be submitting liability legislation. I am hopeful that, in the wake of the Valdez spill, we'll finally be able to get a liability fund in place.

The Valdez spill raised another point—could it happen somewhere else? I think the answer is yes. It could happen in the Puget Sound off the Coast of California, in Louisiana, and it could happen here.

I don't think most people know this, but the Delaware River is the single largest point of entry for foreign oil into the United States. And oil is the largest commodity moving through New York Harbor. Into these two areas flows as much oil as comes out of Valdez.

How well prepared are we to handle a spill there? Not well enough. According to the Coast Guard, both on the Delaware and in New York, a spill of over 1 million gallons or so would overwhelm our response system. That's about one-tenth of what spilled in Alaska.

Some may say the chances of a spill of that size are slim and none. Well, that's what they said in Alaska.

Mr. President, like other tragedies, the Valdez accident forces us to reevaluate our policies and laws. It's essential that we come away from this experience better prepared to prevent spills, and respond to them when they happen. My bill would help us do that, in Valdez, and throughout the country.

Today I am also introducing a second bill, one that requires the Secretary of Transportation to conduct a study of oilspills in New York Harbor, the Delaware River, and adjoining coastal waters off New Jersey.

This second bill will further our understanding of the nature and cause of spills in my region. This understanding is essential to preventing such spills and lessening their impact when they do happen.

I would note that my colleague in the House, the distinguished FRANK PALLONE, will soon be introducing legislation in that body that would also call for such a study. I look forward to working with Congressman PALLONE, who shares my interest and concern for the important issues of protecting our waters and our shoreline from the dangers of oilspills.

Mr. President, I ask unanimous consent that the text of these two bills be included in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 986

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

APPROVAL OF OIL SPILL CONTINGENCY PLANS

SECTION 1. Section 311(c) of the Federal Water Pollution Control Act (33 U.S.C. 1321(c)) is amended by adding at the end thereof the following:

"(3)(A) Within 12 months following the date of the enactment into law of this paragraph, the President shall issue such regulations as may be necessary to enable him to determine each area for which a local oil and hazardous substance discharge contingency plan is necessary, and to require the preparation thereof by terminal operators, vessel operators, and other parties directly involved in the transport of oil or hazardous substances within the area covered by such plan. Pursuant to such regulations, plans thereunder shall be prepared by each terminal operator, vessel operator, or other party directly involved in the transport of oil or hazardous substances within the area covered by such plan, but may, at the discretion of the concerned parties, be prepared jointly. The President, by regulation, is authorized to impose on any such operator or party submitting a plan under this subsection a fee in an amount determined by the President to be sufficient to defray the costs involved in the review and approval of such plan.

"(B) Each plan under subparagraph (A) shall include—

"(i) proof of financial capability to implement the provisions of such plan;

"(ii) requirements for the periodic testing of such plan;

"(iii) procedures and techniques which will be employed in identifying, containing, dispersing, and removing oil or hazardous substances under the plan;

"(iv) identification, procurement, maintenance, and storage of equipment and supplies necessary to such plan;

"(v) means of obtaining additional equipment and supplies, as may be necessary; and

"(vi) any other factors the President considers appropriate.

"(C) Pursuant to regulation, each vessel operator, terminal operator, or other party directly involved in the transport of oil or hazardous substance shall be required to submit each local discharge contingency plan to the President for his approval on a periodic, regular basis, or as otherwise required by the President. In reviewing such plan, the President, for each area covered by the plan, shall consider—

"(i) the nature and volume of vessel traffic within the area covered by the plan;

"(ii) the volume and type of oil or hazardous substances being transported within the area covered by the plan;

"(iii) the availability of rescue, containment, and cleanup equipment, and manpower;

"(iv) navigational hazards, such as marine geography and weather;

"(v) any history of prior discharges of oil or hazardous substances;

"(vi) the value and sensitivity of natural resources and wildlife within the area covered by the plan;

"(vii) the comments of potentially affected third parties; and

"(viii) any other factors the President considers appropriate.

"(D) Such regulation shall require each terminal operator, vessel operator, or other party directly involved in the transport of oil or hazardous substance to immediately notify the President, in writing, of any significant change in any factor set forth under subparagraph (B), in order for the President to require changes, if needed, in the plan submitted by such operator or party.

"(E) Such regulations shall further provide that in the event of a discharge of oil or hazardous substance into an area within the purview of paragraph (1) of this subsection, the President shall be responsible for seeing that the removal plan covering such discharge is properly implemented and for immediately requiring any changes or other modifications to such plan as he may determine necessary. In overseeing the implementing of such plan, the President shall

take into consideration comments made, in accordance with such regulations, by affected third parties, and shall insure, to the maximum extent possible, that the removal of the discharge under the plan will protect existing natural resources, and restore, to the extent possible, natural resources adversely affected by the discharge, and will protect human life and health.

"(F) Regulations issued pursuant to this paragraph (3) shall be published in the Federal Register.

"(G) Within 6 months following the date of the enactment of this paragraph into law, the President shall report to the Congress on the state of the technology, procedures, and research which are available on means of preventing, containing, and removing discharges of oil and hazardous substances into an area within the purview of paragraph (1) of this subsection. In making such report, the President shall include his recommendations as to actions which could be taken to expedite the development and implementation of such technologies, procedures, and research, together with ways and means of encouraging cooperative efforts between public and private sector parties.

"(H)(i) The President is authorized to deny entry into any port of the United States of any vessel involved in the transport of oil or hazardous substances, or deny movement of oil or hazardous substance through any terminal facility, if the vessel operator or terminal operator, as the case may be, does not have in effect a current local contingency plan approved pursuant to this subsection.

"(ii) The provisions of clause (i) of this subparagraph shall take effect upon the expiration of the 90-day period following the date on which the President issues his regulation pursuant to subparagraph (A) of this paragraph (3).".

S. 987

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress Assembled,

(a) The Secretary of Transportation shall conduct a study of discharge of oil and hazardous substances, as defined in section 311(c) of the Federal Water Pollution Control Act (33 U.S.C.A. 1321(c) into the waters of New York Harbor, the Delaware River, and adjoining waters.

(b) The study required in (A) shall include, but not be limited to:

(1) quantities and types of substances discharged;

(2) causes of such discharges;

(3) environmental impact of such discharges;

(4) economic costs of such discharges;

(5) discussion of the role double-bottom construction or other modifications might have played in preventing or mitigating such discharges;

(6) procedural or other modifications required, imposed, or adopted as a result of any such discharges;.

(7) recommendations for procedural or other modifications to assist in the prevention of and response to such discharges.

(c) not later than 270 days after the date of enactment of this Act into law, the Secretary of Transportation shall submit a final report, including findings and recommendations, to the Congress.●

By Mr. SARBANES:

S.J. Res. 130. Joint resolution designating February 11 through February 17, 1990, as "Vocational-Technical Education Week"; to the Committee on the Judiciary.

VOCATIONAL-TECHNICAL EDUCATION WEEK

● Mr. SARBANES. Mr. President, I am introducing today a joint resolution designating February 11 through February 17, 1990, as "Vocational-Technical Education Week." As you know, this is the week recognized traditionally each year throughout the Nation by the vocational-technical education community. As the sponsor of a resolution passed in the 100th Congress to designate a week recognizing vocational-technical education, I am pleased to have the opportunity to reintroduce this legislation in the current Congress.

Federal aid for vocational-technical education programs began with the Smith-Hughes Act of 1917 and is authorized through the current fiscal year by the Carl D. Perkins Vocational Education Act. It is especially important to recognize the importance of vocational-technical education as the Congress continues its consideration of legislation to reauthorize the Perkins Act.

Vocational-technical education plays an integral role in ensuring the availability of a skilled work force. In my own State of Maryland, Federal assistance dispensed through the Perkins Act helped provide quality vocational-technical education to over 229,000 citizens last year. It is clear that vocational-technical education in Maryland is thriving, as are other vocational-technical education programs throughout the Nation.

It is my hope that passage of this resolution will serve to emphasize the need for renewed Federal support for vocational-technical education programs and their importance to the well-being of our citizenry and the economic development of our Nation. I look forward to the celebration of next year's Vocational-Technical Education Week," as well as a continued Federal commitment to vocational-technical education through the reauthorization of the Perkins Act.

Mr. President, I urge swift consideration and passage of this important resolution.●

ADDITIONAL COSPONSORS

S. 6

At the request of Mr. MCCAIN, the names of the Senator from Washington [Mr. GORTON] and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of S. 6, a bill to grant the power to the President to reduce appropriated funds within 10 days after the date of enactment of a bill appropriating such funds.

S. 9

At the request of Mr. DOLE, the name of the Senator from Mississippi [Mr. LOTT] was added as a cosponsor of S. 9, a bill to amend title II of the Social Security Act to phase out the earnings test over a 5-year period for individuals who have attained retirement age, and for other purposes.

S. 100

At the request of Mr. ROCKEFELLER the names of the Senator from Minnesota [Mr. DURENBERGER] and the Senator from Tennessee [Mr. GORE] were added as cosponsors of S. 100, a bill to amend title XVIII of the Social Security Act with respect to coverage of, and payment for, services of psychologists under part B of Medicare.

S. 171

At the request of Mr. KASTEN, the name of the Senator from Mississippi [Mr. LOTT] was added as a cosponsor of S. 171, a bill to amend the Internal Revenue Code of 1986 to provide a variable capital gains tax differential for certain capital assets to index the basis of capital assets, and for other purposes.

S. 185

At the request of Mr. DIXON, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of S. 185, a bill to amend title 18 of the United States Code to punish as a Federal criminal offense the crimes of international parental child abduction.

S. 223

At the request of Mr. MOYNIHAN, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 223, a bill to establish a grant program for research, treatment, and public education with respect to Lyme disease.

S. 231

At the request of Mr. MOYNIHAN, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of S. 231, a bill to amend part A of title IV of the Social Security Act to improve quality control standards and procedures under the Aid to Families With Dependent Children Progam, and for other purposes.

S. 342

At the request of Mr. DANFORTH, the name of the Senator from Mississippi [Mr. LOTT] was added as a cosponsor of S. 342, a bill to amend the Internal Revenue Code of 1986 to provide that certain credits will not be subject to the passive activity rules and for other purposes.

S. 570

At the request of Mr. DANFORTH, the names of the Senator from Indiana [Mr. LUGAR] and the Senator from Louisiana [Mr. JOHNSTON] were added as cosponsors of S. 570, a bill to amend the Internal Revenue Code of 1986 to enhance the incentive for increasing research activities.

S. 618

At the request of Mr. SARBANES, the name of the Senator from Texas [Mr.

BENTSEN] was added as a cosponsor of S. 618, a bill to authorize the Indian American Forum for Political Education to establish a memorial to Mahatma Gandhi in the District of Columbia.

S. 623

At the request of Mr. HARKIN, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 623, a bill to amend the Federal Food, Drug, and Cosmetic Act to prescribe labeling requirements for foods which contain vegetable oils and for other purposes.

S. 730

At the request of Mr. COATS, the names of the Senator from Hawaii [Mr. MATSUNAGA] and the Senator from Kansas [Mr. DOLE] were added as cosponsors of S. 730, a bill to request the President to award gold medals on behalf of Congress to Frank Capra, James M. Stewart, and Fred Zinnemann, and to provide for the production of bronze duplicates of such medals for sale to the public.

S. 731

At the request of Mr. COATS, the names of the Senator from Hawaii [Mr. MATSUNAGA], and the Senator from Kansas [Mr. DOLE] were added as cosponsors of S. 731, a bill to request the President to award a gold medal on behalf of Congress to Robert Wise and to provide for the production of bronze duplicates of such medals for sale to the public.

S. 893

At the request of Mr. LAUTENBERG, the names of the Senator from Connecticut [Mr. DODD] and the Senator from Wisconsin [Mr. KOHL] were added as cosponsors of S. 893, a bill to establish certain categories of Soviet and Vietnamese nationals presumed to be subject to persecution and to provide for adjustment to refugee status of certain Soviet and Vietnamese parolees.

S. 944

At the request of Mr. KASTEN, the name of the Senator from Idaho [Mr. SYMMS] was added as a cosponsor of S. 944, a bill to authorize the establishment of a United States-Taiwan Free Trade Area.

S. 978

At the request of Mr. INOUYE, the name of the Senator from Kansas [Mr. DOLE] was added as a cosponsor of S. 978, a bill to authorize the establishment within the Smithsonian Institution of the National Museum of the American Indian, to establish a memorial to the American Indian and for other purposes.

SENATE JOINT RESOLUTION 74

At the request of Mr. GORE, the names of the Senator from Washington [Mr. ADAMS], the Senator from Colorado [Mr. ARMSTRONG], the Senator from Texas [Mr. BENTSEN], the Senator from Missouri [Mr. BOND], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from New Jersey [Mr. BRADLEY], the Senator from Arkansas [Mr. BUMPERS], the Senator from North Dakota [Mr. BURDICK], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Indiana [Mr. COATS], the Senator from Mississippi [Mr. COCHRAN], the Senator from North Dakota [Mr. CONRAD], the Senator from California [Mr. CRANSTON], the Senator from Missouri [Mr. DANFORTH], the Senator from Arizona [Mr. DECONCINI], the Senator from Illinois [Mr. DIXON], the Senator from Connecticut [Mr. DODD], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Georgia [Mr. FOWLER], the Senator from Ohio [Mr. GLENN], the Senator from Alabama [Mr. HEFLIN], the Senator from North Carolina [Mr. HELMS], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Vermont [Mr. JEFFORDS], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Michigan [Mr. LEVIN], the Senator from Nebraska [Mr. KERREY], the Senator from Massachusetts [Mr. KERRY], the Senator from Connecticut [Mr. LIEBERMAN], the Senator from Indiana [Mr. LUGAR], the Senator from Florida [Mr. MACK], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Idaho [Mr. MCCLURE], the Senator from Ohio [Mr. METZENBAUM], the Senator from Maine [Mr. MITCHELL], the Senator from New York [Mr. MOYNIHAN], the Senator from Georgia [Mr. NUNN], the Senator from Rhode Island [Mr. PELL], the Senator from Nevada [Mr. REID], the Senator from Delaware [Mr. ROTH], the Senator from North Carolina [Mr. SANFORD], the Senator from Maryland [Mr. SARBANES], the Senator from Tennessee [Mr. SASSER], the Senator from Alabama [Mr. SHELBY], the Senator from Illinois [Mr. SIMON], the Senator from Wyoming [Mr. SIMPSON], the Senator from Alaska [Mr. STEVENS], the Senator from South Carolina [Mr. THURMOND], the Senator from Virginia [Mr. WARNER], the Senator from California [Mr. WILSON], and the Senator from Colorado [Mr. WIRTH] were added as cosponsors of Senate Joint Resolution 74, a joint resolution to designate the month of May 1989 as "National Digestive Disease Awareness Month."

SENATE JOINT RESOLUTION 109

At the request of Mr. THURMOND, the names of the Senator from Oklahoma [Mr. BOREN], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from New Jersey [Mr. BRADLEY], the Senator from Arkansas [Mr. BUMPERS], the Senator from North Dakota [Mr. BURDICK], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Mississippi [Mr. COCHRAN], the Senator from New York [Mr. D'AMATO], the Senator from Connecticut [Mr. DODD], the Senator from Kansas [Mr. DOLE], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Alabama [Mr. HEFLIN], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Hawaii [Mr. INOUYE], the Senator from Vermont [Mr. JEFFORDS], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Wisconsin [Mr. KASTEN], the Senator from Michigan [Mr. LEVIN], the Senator from Indiana [Mr. LUGAR], the Senator from Idaho [Mr. MCCLURE], the Senator from Ohio [Mr. METZENBAUM], the Senator from Maryland [Ms. MIKULSKI], the Senator from Georgia [Mr. NUNN], the Senator from Rhode Island [Mr. PELL], the Senator from Arkansas [Mr. PRYOR], the Senator from Nevada [Mr. REID], the Senator from Michigan [Mr. RIEGLE], the Senator from Virginia [Mr. ROBB], the Senator from North Carolina [Mr. SANFORD], the Senator from Maryland [Mr. SARBANES], the Senator from Tennessee [Mr. SASSER], the Senator from Illinois [Mr. SIMON], and the Senator from California [Mr. WILSON] were added as cosponsors of Senate Joint Resolution 109, a joint resolution to designate the period commencing September 11, 1989, and ending on September 15, 1989, as "National Historically Black Colleges Week."

SENATE JOINT RESOLUTION 118

At the request of Mr. RIEGLE, the names of the Senator from Indiana [Mr. COATS], the Senator from Arizona [Mr. DECONCINI], the Senator from Illinois [Mr. DIXON], the Senator from Hawaii [Mr. INOUYE], the Senator from Wisconsin [Mr. KASTEN], the Senator from Rhode Island [Mr. PELL], the Senator from Pennsylvania [Mr. SPECTER], and the Senator from Virginia [Mr. WARNER] were added as cosponsors of Senate Joint Resolution 118, a joint resolution designating October 6, 1989, as "German American Day."

SENATE CONCURRENT RESOLUTION 10

At the request of Mr. SIMON, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of Senate Concurrent Resolution 10, a concurrent resolution to express the sense of the Congress with respect to continuing reductions in the Medicare program.

SENATE CONCURRENT RESOLUTION 25

At the request of Mr. GRASSLEY, the name of the Senator from New Jersey [Mr. LAUTENBERG] was added as a cosponsor of Senate Concurrent Resolution 25, a concurrent resolution expressing the sense of the Congress that the number of refugees admitted to the United States and the appropriation for programs for refugee migration and resettlement should be increased and that the Department of Justice should reestablish the presumption that Jews and members of other religious minorities emigrating from the Soviet Union qualify for ref-

ugee status for admission to the United States.

SENATE RESOLUTION 80

At the request of Mr. KASTEN, the names of the Senator from Mississippi [Mr. LOTT], and the Senator from New Hampshire [Mr. HUMPHREY] were added as cosponsors of Senate Resolution 80, a resolution relating to legislation which would require interstate mail-order companies to impose State taxes on items mailed across State borders.

SENATE RESOLUTION 99

At the request of Mr. BOSCHWITZ, the names of the Senator from Arkansas [Mr. PRYOR], the Senator from Tennessee [Mr. SASSER], the Senator from Illinois [Mr. SIMON], and the Senator from Alaska [Mr. MURKOWSKI] were added as cosponsors of Senate Resolution 99, a resolution requiring the Architect of the Capitol to establish and implement a voluntary program for recycling paper disposed of in the operation of the Senate.

SENATE RESOLUTION 126

At the request of Mr. BAUCUS, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of Senate Resolution 126, a resolution expressing the sense of the Senate that the Prospective Payment Assessment Commission does not equitably represent the proportion of Medicare beneficiaries living in rural America, and that four additional Commissioners with experience in rural health care delivery should be appointed to the Commission to help correct the inequity.

AMENDMENT NO. 100

At the request of Mr. JOHNSTON, the name of the Senator from Kentucky [Mr. FORD] was added as a cosponsor of Amendment No. 100 intended to be proposed to S. 406, a bill to authorize competitive oil and gas leasing and development on the Coastal Plain of the Arctic National Wildlife Refuge in a manner consistent with protection of the environment, and for other purposes.

NOTICES OF HEARINGS

SUBCOMMITTEE ON PUBLIC LANDS, THE NATIONAL PARKS AND FORESTS

Mr. BUMPERS. Mr. President, I would like to announce that there has been a change in the hearing scheduled before the Subcommittee on Public Lands, National Parks and Forests of the Committee on Energy and Natural Resources on Thursday, May 18, 1989. Two of the measures originally scheduled to be heard, S. 319, a bill to effect an exchange of lands between the U.S. Forest Service and the Salt Lake City Corp. within the State of Utah, and for other purposes, and S. 393, the Camp W.G. Williams Land Exchange Act of 1989, will not be heard at that time, but will be considered at a later date.

For further information regarding the hearing, please contact David Brooks of the subcommittee staff at (202) 224-9863.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. GLENN. Mr. President, I would like to announce that the Governmental Affairs Committee will hold a hearing on Wednesday, May 17, at 9:30 a.m., in SD-342 Dirksen on the subject of: biological weapons proliferation. For further information, please call Len Weiss, staff director, at 224-4751.

Mr. President, I would like to announce that the Governmental Affairs Committee will hold a hearing on Thursday, May 18, at 9:30 a.m., on the subject: nuclear and missile proliferation. For further information, please call Len Weiss, staff director, at 224-4751.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. FORD. Mr. President, I wish to announce that the Committee on Rules and Administration will meet in SR-301, Russell Senate Office Building, on Wednesday, May 17, 1989, at 9:30 a.m., to mark up pending legislative business.

The agenda will include the following items: Senate Joint Resolution 98, to establish separate appropriation accounts for the Senate and the House of Representatives for the payment of official mail costs; S. 136, to establish a single poll closing time in the continental United States for Presidential general elections; S. 377, to establish a series of five Presidential primaries at which the public may express its preference for the nomination of an individual for election to the Office of the President of the United States; S. 326, to amend the Federal Election Campaign Act of 1971 to repeal a provision allowing use of excess contributions; an original bill authorizing appropriations for the Federal Election Commission for fiscal year 1990; an original bill authorizing appropriations for the American Folklife Center for fiscal year 1990 through 1994; legislation to authorize the establishment of the National Museum of the American Indian within the Smithsonian Institution; Senate Concurrent Resolution 19, to authorize printing of a collection of the inaugural addresses of the Presidents of the United States; an original resolution authorizing printing of a compilation of the rules of procedure of Senate committees; Senate Joint Resolution 77, recognizing the National Fallen Firefighters' Memorial at the National Fire Academy in Emmitsburg, MD, as the official national memorial to volunteer and career firefighters who die in the line of duty; and an original resolution to clarify the intent of Senate Resolution 369, 98th Congress, 2d session, relating to the Senate flag, that committees and officers of the Senate are permitted to display the flag.

For further information concerning this markup, please contact Carole Blessington of the Rules Committee staff on extension 40278.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON INTERNATIONAL TRADE

Mr. DIXON. Mr. President, I ask unanimous consent that the Subcommittee on International Trade of the Committee on Finance be authorized to meet during the session of the Senate on May 12, 1989, at 10 a.m. to hold a hearing on currency manipulation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. DIXON. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on May 12, 1989, at 10:30 a.m. to hold a hearing on the following nominations at the Department of Commerce: Dr. Michael Darby to be Under Secretary of Commerce for Economic Affairs, and Thomas J. Collamore to be Assistant Secretary for Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. DIXON. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on May 12, 1989, at 9 a.m. to hold a hearing on the following nominations at the Department of Transportation: Phillip D. Brady to be General Counsel, Galen J. Reser to be Assistant Secretary for Governmental Affairs, and David P. Prosperi to be Assistant Secretary for Public Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. DIXON. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate Friday, May 12, 1989, at 9 a.m. to conduct hearings on the nominations of David C. Mulford and Robert R. Glauber to be Under Secretaries of the Department of the Treasury.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON READINESS, SUSTAINABILITY, AND SUPPORT

Mr. DIXON. Mr. President, I ask unanimous consent that the Subcommittee on Readiness, Sustainability,

and Support of the Committee on Armed Services be authorized to meet on Friday, May 12, 1989, at 9 a.m. in open and closed session to receive testimony on the amended defense authorization request for fiscal years 1990 and 1991.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. MITCHELL. Mr. President, I ask that the Select Committee on Indian Affairs be authorized to meet on May 12, 1989, beginning at 9:30 a.m., in 301 Russell Senate Office Building, on a bill to establish a national Indian museum within the Smithsonian Institution.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL COMMITTEE ON INVESTIGATIONS

Mr. DIXON. Mr. President, I ask unanimous consent that the Special Committee on Investigations of the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on May 12, 1989, at 10 a.m. to hold hearings pursuant to Senate Resolution 66, section 21, agreed February 28, 1989.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. DIXON. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on June 1 and 2, 1989, to hold hearings on the status of Puerto Rico.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. DIXON. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Friday, May 12, at 3 p.m. to hold a nomination hearing on John Cameron Monjo to be Ambassador to Indonesia.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. DIXON. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Friday, May 12, at 10 a.m. to hold a nomination hearing on Donald Gregg to be Ambassador to Korea.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. DIXON. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Friday, May 12, 1989, at 10 a.m. in SR-332 to hold a nominations hearing on Eugene Bailey to be Assistant Secretary of Agriculture for Governmental and Public Affairs, Charles Hess to be Assistant Secretary of Agriculture for Science and Education, Alan Raul to be General Counsel of the Department of Agriculture, and Jo Ann Smith to be Assistant Secretary of Agriculture for Marketing and Research Services.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

GEORGE MARCOTTE

● Mr. LEAHY. Mr. President, it has been my pleasure to have appointed George Marcotte as a Senate page for the spring semester. George has been a valued addition not only to the Senate page staff but has become a welcome addition to the extended Leahy family here in Washington.

The Senate Page Program is an extremely worthwhile program, in my estimation. It gives young Americans the opportunity to see government in action and to be a participant. I commend George and his colleagues, and I ask that the attached article from the Burlington Free Press be entered into the RECORD.

The article follows:

[From the Burlington (Vt.) Free Press, May 1, 1989]

RINGSIDE SEATS TO CONGRESS OFFER LEARNING

(By David Bauman)

WASHINGTON.—Most folks probably still are on their second cup of coffee when George Marcotte, 16, of South Burlington, is well into his day as a Senate page.

As one of about 100 congressional pages, Marcotte's workday begins at 6 a.m. with 4½ hours of school, followed by running up to 15 miles through the marble corridors and underground passageways of the U.S. Capitol on errands for lawmakers—a task that often extends well past 5 p.m.

"I love it," said Marcotte of his ringside seat to Congress. "It's a hands-on experience. You really get to see what goes on."

While the demands on a page's time are strict, the opportunity to observe Congress at work is unsurpassed. Pages earn $9,090 annually, or $757 a month.

Out of that, they pay $300 a month for the dormitory room and five week-night dinners they are required to share. Pages must also buy their uniforms, dark blue suits, black ties, black shoes and socks, and long-sleeved white shirts.

Although disclosures of sexual misconduct prompted Congress to tighten control over the page system in 1982, page duties have changed little since Sen. Daniel Webster of Massachusetts hired the first Senate page nearly 160 years ago.

Today the program is restricted to high school juniors—70 in the House and 30 in the Senate—who prepare the congressional chambers for business. All pages are housed in a supervised co-ed dormitory two blocks from the Capitol, with strict curfews that curtail the after-hours freedom they formerly enjoyed.

"There's a lot of cafeteria food," said Marcotte, who is away from home for the first time. "Dorm life is like a pre-college experience. I'm learning a lot about living with roommates and budgeting my time."

When on the floor, pages sit on the rostrum at the front of the chamber and are expected to be inconspicuous, but ready to run errands, distribute bills, fetch glasses of water, pillows, or whatever at the snap of a senator's fingers.

"Senators are really down to earth, approachable people,"' said Marcotte. "They may seem remote, but most have a great sense of humor."

Page appointments are reserved for senior members of Congress. Marcotte's sponsor is Sen. Patrick Leahy, D-Vt., the Agriculture Committee chairman who has served 15 years in the Senate.

"Because of my seniority, I'm allowed to appoint one page," said Leahy. Recalling his failure to land a Capitol Hill job when he was a law student, Leahy makes half-year page appointments so that "more Vermonters get the chance to see how government really works."

Each weekday, Senate pages attend a special school offering a course of study equivalent to the junior year of high school. Classes start at 6:10 a.m. and conclude at 9:45 a.m. to allow the pages time to get to their jobs at the Capitol, which start at 10 a.m.

Because of the short hours, classes are restricted entirely to academic subjects; Marcotte's course load includes calculus, political science, chemistry and English literature. Yet despite his close-up view of Congress, Marcotte wants to be a doctor.

"I've seen a lot of government," he said, noting he also was a page for the Vermont Legislature. "But I'm real interested in biology. I had to drop that course to come here."

But Marcotte agreed daily rounds as a Senate page are exciting.

Since January, he has witnessed debates on a number of issues, but the highlight, so far, was President Bush's first address to Congress in February.

When the Congress holds joint sessions, the Senate gathers to walk as a body, escorted by the pages, across the Capitol to the House chamber, Marcotte explained.

"Cameras were clicking and all these people were watching," he recalled. "Then we entered the House. Even though the pages had to stay in the back row, I had a perfect view of the President, his Cabinet and members of the Supreme Court."●

S. 978, THE NATIONAL AMERICAN INDIAN MUSEUM AND MEMORIAL ACT

● Mr. D'AMATO. Mr. President, I rise today as an original cosponsor of the National American Indian Museum and Memorial Act.

Today's legislation is the icing on the cake of nearly a decade of controversy surrounding the Indian Museum. I am pleased that this compromise has been reached and I would like to commend my good friend from Hawaii for introducing this legislation and for his commitment and perseverence in working toward a resolution of this issue.

The National Museum of the American Indian's proposed location on the Mall will provide convenient access to the millions of tourists that visit the

Capitol each year. Opening up the U.S. Custom House in New York City will allow a portion of the priceless collection to remain in New York.

On Monday, the Smithsonian Board of Regents gave their approval to the proposal. Passage of this legislation will finalize the process. I urge my colleagues to pay tribute to the long and often sad history of the American Indian by passing this legislation.●

THE RECENT COURT DECISION CONCERNING AGENT ORANGE

● Mr. KERRY. Mr. President, it is a new day for the Vietnam veteran in this country.

The Federal court decision last week striking down the Government's agent orange regulations has dramatically altered the debate on this important issue. It is, in my opinion, a vindication for the thousands upon thousands of Vietnam veterans across this Nation.

The dioxin contaminant contained in agent orange is one of the most toxic substances known to man. During the Vietnam war we sprayed nearly 11 million gallons of agent orange in Vietnam. Many of the veterans who were exposed have since suffered adverse health effects such as cancer and birth defects.

Last week U.S. District Court Judge Henderson ruled that the veteran should be given the benefit of the doubt about whether an ailment is related to his or her military service. Mr. President, this is exactly what I and others in the Congress have been arguing for several years.

Finally, I want to commend the Secretary of the newly created Department of Veterans' Affairs for his decision not to appeal the decision of Judge Henderson. With this decision, Secretary Derwinski has shown himself to be a genuine advocate for the Vietnam veteran.

I ask that two articles be included as part of the RECORD:

The articles follow:

[From the Washington Post, May 11, 1989]

(By Mary R. Stout and H.R. Gierke)

NO MORE DELAYS ON AGENT ORANGE: SET COMPENSATION RULES FOR VIETNAM VETS—NOW!

The recent ruling by U.S. District Judge Thelton Henderson striking down the government's Agent Orange compensation regulations should remind the nation that the Agent Orange issue is far from dead.

Members of the Vietnam Veterans of America and the American Legion have been fighting an uphill battle for the past decade to obtain justice for the veterans exposed to this defoliant during the Vietnam War. Judge Henderson's decision, a result of a class-action suit brought by VVA, along with the legion's recently completed study of Vietnam veterans, confirms that the government has not done its part to put an end to the suffering from the Vietnam War.

A decade ago the media were ablaze with reports that the dioxin contaminant in Agent Orange may have produced adverse health effects such as cancer and birth defects. News reports regularly featured the plight of Vietnam veterans with rare diseases and their pleas to the federal government for assistance. But with time, press interest in the story dwindled.

The vacuum in the media was a credit to the game plan devised by the executive branch. The first part of the strategy was to delay resolution of the issue as long as possible in the hope that the public pressure to compensate Agent Orange victims would subside with time. "We need scientific evidence," said the Veterans Administration (responsible by law to provide compensation for service-related injuries), "and sufficient scientific studies have not yet been conducted."

When Congress called this bluff in 1979 by requiring the VA to conduct an epidemiology study of the veterans who were exposed, the executive agencies were up to the task of delay. First, the VA dallied for years with the chore of writing a protocol for the study. Then, in 1983, it threw up its hands and tossed the study to the Centers for Disease Control.

The CDC was even more creative. After spending four years and tens of millions of taxpayer dollars, it concluded in 1987 that the congressionally mandated study simply could not be done because not enough veterans could be found who had been exposed to Agent Orange. By then, the issue had so subsided in the media that few noticed that this conclusion defies common sense. The military admits it sprayed more than 10 million gallons of the herbicide over the battlefield—so much that even the VA's rules say it must assume that all those sent to Vietnam were in that exposed.

The second part of the government's strategy was to adopt the principle that compensation can be provided only if scientists agree there is a cause-and-effect relationship between Agent Orange and the veterans' illness. This ensured that no one would be compensated during his or her lifetime because, as the decades it took for scientists to nail down the causal link between smoking and cancer make clear, it's exceedingly difficult for scientists to reach agreement over the cause-and-effect status of any toxic agent.

But in the end the government's strategy has unraveled. Private veterans' organizations spent years and thousands of their own dollars to prevent the book on Agent Orange from being prematurely closed. In a study commissioned by the American Legion five years ago and published last December, the legion proved that, contrary to CDC's conclusion, a valid epidemiology study of exposed Vietnam veterans can in fact be conducted. The legion's researchers also documented that many of these veterans suffer from serious and often rare disorders.

Then Judge Henderson agreed with the Vietnam Veterans of America's analysis that the VA's requirement of a cause-and-effect relationship unlawfully stacks the deck against Vietnam veterans. The judge concluded that the VA has never in its history premised receipt of disability benefits on such a strict standard of proof. Moreover, the VA ignored the mandate by Congress to adjudicate Agent Orange claims under the less onerous ground rules applied to all other veterans, including the precept that doubt on any issue must be resolved in the veteran's favor.

As a result of the Vietnam Veterans of America's lawsuit, the VA will now have to reformulate its compensation rules for Agent Orange and readjudicate every one of the thousands of claims for benefits it previously rejected. As a result of the legion's study, Congress may hold hearings on why the epidemiology study it long ago ordered has never been done. And the Agent Orange issue is back in the media.

It is unfortunate, to say the least, that prolonged public pressure is necessary to force the executive branch to live up to its moral and legal obligations to those who risked their lives in service to this country. Congress must share part of the blame for the shabby treatment Vietnam veterans have received. True, Congress stepped in to force the VA to provide medical care to Agent Orange victims. But the legislature has continued to defer to the executive branch on the issue of compensation long after it became apparent that it was shirking its responsibilities.

The appropriate response now is to call a halt to the tactic of delay and media control. We do not need to wait for more studies on Agent Orange. We do not need to wait for the VA to rethink how much evidence is enough to support compensation. We need Congress to bite the bullet and set the compensation rules based on the ample scientific studies that already exist on industrial workers, farmers, veterans and laboratory animals documenting that it is reasonable to conclude that many diseases are associated with Agent Orange.

[From the Boston Globe, May 9, 1989]

JUDGE CALLS UNITED STATES TOO STRICT ON AGENT ORANGE PROOF STANDARDS

WASHINGTON.—In a ruling that could have profound implications for thousands of Vietnam veterans, a federal judge has declared that the government has defined too strictly the standard of proof required of veterans claiming injury from the defoliant Agent Orange and has directed the government to reexamine the issue.

A spokesman for the Vietnam Veterans of America, which had challenged the agency's rules, yesterday hailed the ruling as "a major victory with far-reaching implications." One official predicted the decision would allow "tens of thousands" of veterans to reopen rejected claims for Agent Orange injuries.

Until now, the government has granted direct benefits for Agent Orange exposure to only five of the 33,272 veterans who have claimed the herbicide harmed them when it was used to defoliate jungles in Vietnam. All five were said to have suffered a skin condition linked to the herbicide.

Veterans' groups have alleged that Agent Orange, which contains the chemical dioxin, caused ailments including cancers, heart conditions, skin problems, and infertility. But Government officials maintained that a scientific panel appointed by Congress in 1984 was unable to find a direct link between the sprayings and the diseases.

A spokeswoman for the Department of Veterans Affairs, which has maintained that the Vietnam spraying was so massive that any person who served "in country" was exposed to the chemical, had no comment on the ruling.

In the 48-page ruling, U.S. District Judge Thelton E. Henderson of San Francisco held last Wednesday that former Veterans Administration head Thomas K. Turnage had

imposed "an impermissibly demanding test" for determining whether an ailment could be linked to dioxin. The judge said Congress required only a "significant statistical association" between exposure and illness, but the VA insisted on "proof of a causal relationship."

Moreover, the judge said Turnage "compounded" that finding by failing to give any ailing veteran "the benefit of the doubt in meeting that demanding standard."

Mary R. Stout, president of the Vietnam Veterans of America, said yesterday that the ruling "validates what Vietnam veterans have been saying for years, that the VA has failed to give Agent Orange victims a fair hearing."●

MEDICAID PREGNANT WOMEN, INFANTS AND CHILDREN AMENDMENTS

● Mr. HEINZ. Mr. President, this administration has made the improved health and education of America's children a top priority. In introducing the Medicaid Pregnant Women, Infants and Children Amendments of 1989, President Bush sent a strong message to Congress that America's dismal record on prenatal care is inexcusable. I rise today in support of this legislation.

The tragic truth is that America ranks as one of the most dangerous places to be born in the industrialized world. Each day 100 of our babies die from preventable complications associated with low birth weight. Many of these babies would be saved if their mothers had received simple prenatal health care screening or nutrition counseling. The guarantee of a healthy baby may require nothing more dramatic than monthly vitamin supplements for the mother during pregnancy.

Part of the problem is that over one-fourth of the 56 million women of childbearing age have no health insurance coverage for maternity care. Those women most likely to lack coverage are young and poor.

But another part of the problem lies with well-intentioned Federal programs that fall short on implementation by the States. Few States, for example, including my home State of Pennsylvania, have taken full advantage of the 1987 extension of Medicaid to permit optional coverage of pregnant women and children living in poverty.

In 1980, the Surgeon General set a goal to reduce the number of underweight newborns from 6.8 percent of live births to not more than 5 percent in 1990. Our most recent statistics show that we are near the end of the decade and far from achieving this goal.

In Pennsylvania the rates continue at almost double the targeted percentage. From 1980 to 1986, the rate in Pittsburgh has remained at approximately 1 in every 10 babies born. In Philadelphia, the percent of low weight births actually increased slightly to 10.8 percent in the same time period. A black baby born in my State is less likely to live to the age of 1 than a baby born in Cuba or Bulgaria.

Good prenatal care should be every baby's birthright; good preventive care is every infant's due. The President's bill honors both of these obligations through expanded Medicaid coverage for pregnant women and children and an expanded vaccination program for low-income preschool children. I urge my colleagues to join in passing the legislation. There are 100 reasons every day to do so.●

OILSPILL EMERGENCY RESPONSE ACT OF 1989

● Mr. BINGAMAN. Mr. President, I rise today to join my distinguished chairman, Senator JOHNSTON, in sponsoring the Prince William Sound Oilspill Emergency Response Act of 1989, Senate amendment No. 100.

This legislation is an appropriate and timely response to the events of March 24 in Alaska's Prince William Sound.

The tragic spill of more than 10 million gallons of crude oil into one of the most pristine waters in the world requires an urgent and effective response by the Congress. This is an interim and emergency response, focusing on the *Exxon Valdez* oilspill, the movement of Alaska crude, and the potential consequences of other development in the Alaskan Arctic. The legislation should be followed by broader, long-term reforms, including the passage of a comprehensive oilspill liability law.

This bill would force the oil industry to recognize that protecting the environment is just as much a part of doing business as hiring talented engineers, exploring for oil, managing debt, maintaining machinery, and turning a profit. Once the law makes that clear, those running the energy corporations will pay the necessary attention to cutting the risk of environmental degradation, just as they aim to protect workers in the oilfields.

The legislation will place the costs of protecting the environment from spills of Alaska crude and the costs of enforcement on the oil industry, not the public. And it will place a top priority on the enforcement of safety regulations.

Senator JOHNSTON'S bill would extend the standard of joint, several, and strict liability for damage now applicable to the trans-Alaska pipeline to all areas of the North Slope, onshore and offshore. It would increase the strict liability damage levels for these areas tenfold, from $50 million to $500 million. Strict liability for each spill or discharge of North Slope crude would increase from $100 million to $500 million. Reimposition of a nickel per barrel fee on all oil flowing through the pipeline would boost revenues available for cleanup and damages in the trans-Alaska pipeline liability fund from $100 million to $500 million.

Also, a new $200 million oilspill avoidance and readiness trust fund would be established to update and improve the vessel traffic control system for Valdez and the sound, to research the effects of spills and oil and gas development on fish, wildlife, and the marine environment, and to supplement Federal agency budgets for necessary manpower and equipment. The fund would be financed by a new 5-cent-per-barrel fee on oil moved through the trans-Alaska pipeline.

The legislation would give the Secretary of Transportation the emergency authority to issue regulations within 30 days to heighten safety precautions in hazard areas; require full-time Coast Guard radar monitoring of tankers in hazard areas; require qualified local harbor pilots to assist the captain on the bridge while in Prince William Sound; require two officers on board qualified to navigate through hazard to navigation areas; and prompt installation of radar responders at Bligh Reef and other hazard areas.

The bill also would require, within 30 days, new regulations on alcohol and drug use that might have averted the *Exxon Valdez* tragedy. These include mandating drug and alcohol testing procedures, including random testing, patterned after those in the aviation industry.

The Secretary would be authorized to require, within 90 days, new icebreaking vessels in the sound for tanker assistance, double bottoms and segregated hull compartments on Alaska tankers, and other vessel design or operational changes.

This is important legislation that responds effectively to the horrible disaster in Alaska. I encourage my colleagues to join me in supporting the legislation.●

FINANCIAL DISCLOSURE

● Mr. LEAHY. Mr. President, my Senate public financial disclosure report is on file with the Secretary of the Senate's Office of Public Records. I am adding additional material relating to my net worth, beyond what is required by the U.S. Senate.

Senate salary	$89,500
Additional income (honoraria, interest, et cetera, as reported on Senate public financial disclosure report)	43,692
Total income	129,672
Taxes (Federal, State of Vermont, and local)	38,139
Charitable contributions (including honorarium designated to charity)	6,010

Equity in Vermont residence: area residence	93,310
Equity in Washington, DC, area residence	373,779
Value of personal property (savings accounts, cars, furniture, books, et cetera)	50,000●

TERRY ANDERSON

● Mr. MOYNIHAN. Mr. President, today marks the 1,518th day of captivity for Terry Anderson in Beirut.

I ask the profiles of the hostages in Beirut prepared by the Associated Press be printed in the RECORD.

The profiles follow:

PROFILES OF WESTERN HOSTAGES OF LEBANESE KIDNAPPERS

(By the Associated Press)

Here are brief sketches of nine Americans and other non-Lebanese kidnap victims still missing in Lebanon:

Terry A. Anderson, 41 (birthdate Oct. 27, 1947), chief Middle East correspondent for the Associated Press, kidnapped March 16, 1985. He was born in Lorain, Ohio, reared in Batavia, N.Y., and graduated from Iowa State University. He worked at AP bureaus in Tokyo and Johnannesburg before being assigned to Beirut.

Thomas Sutherland, 58, acting dean of agriculture at the American University of Beirut, abducted June 9, 1985. A Scottish-born American who studied agriculture at Iowa State University, he was on leave from the faculty of Colorado State University and had worked in Beirut for two years. His wife, Jean also taught at American University.

Frank Herbert Reed, 56, the American director of the Lebanese International School, kidnapped Sept. 9, 1986. From Malden, Mass., he had spent nine years in Lebanon and was a convert to Islam. His wife is Syrian.

Joseph James Cicippio, 58, acting comptroller at the American University in Beirut, kidnapped Sept. 12, 1986. He spent most of his life in Norristown, Pa. He moved to Beirut in 1984, and in 1985 converted to Islam and married a Lebanese woman, a U.S. Embassy secretary.

Edward Austin Tracy, 58, west Beirut resident and self-described writer. Revolutionary Justice Organization claimed on Oct. 21, 1986, to have abducted him. A native of Rutland, Vt., he had traveled and lived around the world most of his adult life and was divorced from a West German woman.

Robert Polhill, 54, originally of New York City, a Certified Public Accountant and a lecturer in accounting at Beirut University College since February 1986, kidnapped Jan. 24, 1987. A Cornell University graduate, he formerly worked as an accountant in New York City. He is married to a Lebanese woman.

Alann Steen, 50, a communications instructor at Beirut University College, kidnapped Jan. 24, 1987. A Boston native, Steen was graduated and completed master's degree programs at Humboldt State University in Arcata, Calif. His wife, Virginia A. Rose, is a fine arts professor at Beirut University College.

Jesse Jonathan Turner, 41, a visiting professor of mathematics and computer science at Beirut University College, kidnapped Jan. 24, 1987. A native of Boise, Idaho, he holds degrees from Boise State University and the University of Idaho. His wife is Lebanese.

U.S. Marine Lt. Col. William R. Higgins, 44, head of observer group attached to U.N. peacekeeping force in Lebanon, kidnapped Feb. 17, 1988. Born in Danville, Ky. A decorated Vietnam veteran, he is married to Marine Maj. Robin Higgins and has a 17-year-old daughter. Higgins graduated from high school in Louisville, Ky., and from Miami University of Ohio on ROTC scholarship in 1967. He earned master's degrees in human resources management at Pepperdine University in California and in political science at Auburn in Alabama.

Terry Waite, 49 British envoy of the Anglican Church who has been seeking the release of foreign hostages, disappeared Jan. 20, 1987. He reportedly is being held by pro-Iranian kidnappers though no group has claimed responsibility for his abduction.

Alec Collett, 66, British. A New York-based journalist on assignment for the U.N. Relief and Works Agency, kidnapped March 25, 1985, while traveling south of Beirut. On April 23, 1986, the Revolutionary Organization of Socialist Moslems said it killed Collett in retaliation for British complicity in the April 15 U.S. air attack on Libya. A videotape purporting to show Collett hanged was made public.

John McCarthy, 32, British television journalist, kidnapped April 17, 1986, en route to the Beirut airport.

Italian businessman Alberto Molinari, a long-term Beirut resident, kidnapped Sept. 11, 1985, on the city's dividing Green Line.

Brian Keenan, 38, an Irish teacher of English at the American University of Beirut, kidnapped April 11, 1986, in Beirut.

Jan Cools, a 32-year-old Belgian physician, disappeared May 21, 1988, after leaving his residence in Rashidiyeh, a Palestinian refugee camp in south Lebanon. On Dec. 16, a previously unknown group, the Soldiers of Justice, claimed it kidnapped him and accused him of being a spy.

Islamic Jihad has claimed responsibility for many of the kidnappings, but other groups claiming involvement include the Revolutionary Organization of Socialist Moslems, believed linked to the Abu Nidal Palestinian terrorist organization.

In exchange for their hostages, Islamic Jihad demanded the release of 17 people convicted in Kuwait of the December 1983 terrorist bombings of the U.S. and French embassies. Three of the 17 have been sentenced to death by hanging, and the rest to prison terms ranging from five years to life.

Eight foreigners, including two Americans, have been killed by kidnappers:

William Buckley, 57, a U.S. Embassy political officer in Beirut, kidnapped March 16, 1984, Islamic Jihad claimed Oct. 4, 1985, it killed Buckley, but no body was found. On Jan. 20, 1987, Vice President George Bush confirmed that Buckley had been killed. A bachelor from Medford, Mass., Buckley joined the State Department and went to Beirut in 1983, after 18 years as a U.S. Army civilian employee. Published reports said he was CIA station chief in Beirut.

Peter Kilburn, 62, of San Francisco, an American University librarian, disappeared Dec. 3, 1984, and was found shot to death with two British hostages April 17, 1986. A nearby note said Arab Revolutionary Cells killed them in retaliation for the April 15 U.S. air attack on Libya.

Leigh Douglas, 34, a British professor at the American University, disappeared March 28, 1986, in west Beirut. He was found shot dead with Kilburn.

Philip Padfield, 40, a British language teacher, disappeared at the same time as Douglas. He also was found dead with Kilburn.

Nicolas Kluiters, a Dutch Roman Catholic priest, disappeared in eastern Lebanon March 14, 1985. His body was found strangled in the area April 1, 1985.

Denis Hill, a Briton who taught English at the American University, failed to show up for work May 27, 1985, and was found shot to death May 29, 1985.

Soviet cultural attache Arkady Katkov, 32, abducted Sept. 30, 1985, with three other Soviet diplomats, was found murdered Oct. 2, in a west Beirut suburb. The three other Soviets were freed.

Michel Seurat, a French academic researcher, kidnapped May 22, 1985. On March 5, 1986, an Islamic Jihad statement claimed the 37-year-old Seurat had been "executed." His wife wrote in a book in 1988 that French officials told her he was dead.●

SMALL BUSINESS IS AMERICA'S FUTURE

● Mr. LIEBERMAN. Mr. President, I join my colleagues today in recognizing the significant impact small business owners contribute to our Nation's economy. Tomorrow concludes the 25th anniversary of observing Small Business Week. Appropriately enough, the theme for this year's observance was, "Small Business is America's Future."

Mr. President, I believe in small business. The thriving spirit of the entrepreneur serves as the backbone of our economic development. Small business is one of our greatest resources, an underutilized resource.

Across the country 19 million small businesses are in existence, ranging from mom and pop storefronts with just a few employees to much larger operations. Oftentimes, the entire economic structure of a city is built on the success of small business—from a restaurant to an electrical contractor, a realtor to car wash owner. The range of small businesses and the products and services they offer is limited only by the imagination.

Small businesses serve as an incredible outlet to mobilize resources and generate new jobs. Nationally, 6 out of every 10 people are employed in small business. When you realize that over 50 percent of our work force relies on small businesses you can begin to imagine the important role they play in the overall economic picture.

They represent a force which can't be ignored, and, quite honestly, Mr. President, I believe small businesses hold the key to revitalizing our economy.

I am intrigued by new information on small business contributions to the U.S. export picture. A recent study by the SBA suggests that small businesses may account for a larger share of U.S. manufactured products sold overseas than previously believed, which was well below 25 percent.

The study indicates that businesses with fewer than 500 employees ac-

count for over 12 percent of the value of American goods exported directly by manufacturers via oceangoing transport to other countries.

The future for small business exports looks promising; it is a challenging prospect, but one which I believe the small businesses of America will meet head-on.

I salute the small businesses of America for your hard work and tenacity as we draw a close to the 25th anniversary celebration of Small Business Week.●

YVONNE G. ALLEN

● Mr. SASSER. Mr. President, I would like to call the attention of my colleagues to the outstanding achievements of one of my constituents, Ms. Yvonne G. Allen of Bolivar, TN. Ms. Allen is the principal of Whiteville Elementary School and has recently been honored as the recipient of the American Hero in Education Award, 1 of 10 such awards in the Nation.

I would like to take this opportunity to congratulate Ms. Allen on her accomplishments. While I am pleased that she is being nationally recognized for the outstanding job she has done in west Tennessee, her accolades come as no surprise to those of us who have known her and have witnessed her selfless service to her community and to the education of its youth.

Yvonne Allen is one of the most skillful educators in the Midsouth. Indeed, in the entire Nation. When she first started at Whiteville Elementary 10 years ago, the school had some of the lowest standardized test scores in the State, faculty morale was low, and the school building itself was a shambles. One of her first acts at Whiteville was to roll up her sleeves and scrub the peeling paint off of the walls and the dirt off of the floors.

Her willingness to do anything that needed to be done quickly won the respect of the faculty at Whiteville and inspired them to greater diligence. Soon, the students were energized by the new atmosphere, test scores began to improve, and the community began to support the school with greater enthusiasm.

Mr. President, educators like Yvonne Allen are exactly what our country needs to prepare today's youth for the challenges that await us in the 21st century. I congratulate her on her designation as a hero in education and I wish her the best of continued success in what promises to be a long and distinguished career.●

TRANSPORTATION TAKEOVERS

● Mr. PRESSLER. Mr. President, earlier this week I had the opportunity to appear before the Interstate Commerce Commission [ICC] to testify on an issue of crucial importance. The focus of the ICC hearing was on the possible hostile takeover of the CNW Corporation by a group of investors known as Japonica Partners. But the hearing addressed a bigger question: "Should the takeover of a public carrier be treated in the same fashion as any other stock transaction?"

South Dakotans and other Midwesterners are sorting through information dealing with the future of the CNW Railroad and Northwest Airlines, the target of another takeover bid. My testimony at the ICC compared my constituents to a nest of baby chicks watching as two hungry foxes continue to circle the nest. While the wheeler-dealers of Wall Street are at play with these transactions, South Dakotans and others must watch helplessly as their future is being decided.

South Dakota is in a delicate position when it comes to rail transportation. The situation at one time had deteriorated to the point that the State had to invest tens of millions of dollars to purchase and rehabilitate 900 miles of Milwaukee Road track.

Another important chapter in South Dakota railroad history occurred in 1986 when the Chicago and North Western attempted to abandon over 500 miles of track in my State. Working with South Dakota shippers, we successfully stopped the proposed abandonment. We then hammered out an agreement with the CNW which resulted in the creation of the Dakota, Minnesota, and Eastern [DM&E], a regional railroad that provides a badly needed service in the middle of my State.

These illustrations accentuate the commitment of my State to preserving accessible and affordable rail transportation. Although only 158 miles of CNW track runs in South Dakota, the railroad employs 80 South Dakotans with a payroll of $2.5 million. The future of the rail system that has risen from the ashes of the Milwaukee Road bankruptcy and the CNW proposed abandonment depends on what happens between CNW management and the Japonica Partners. That is the reason for our concern.

The Japonica Partners plan to borrow $600 to $800 million to finance the transaction, which would double the CNW's current debt load and could lead to negative pressures. The takeover of Northwest Airlines would be financed in similar fashion.

What happens when this heavy debt becomes too burdensome for the new owners? We can only speculate, but many experts tell us that sparsely populated areas or light traffic routes will suffer first and suffer most. If a rail line or airline route isn't abandoned, service could be lessened considerably. Because it takes so much money to service the debt, there could be little or no reinvestment in equipment and capital improvements.

The Government needs to watch the actions of these takeover foxes to protect the public interest chicken coop. Although there is substantial concern about the impact of these dealings on national transportation policy, it remains to be seen who will exercise the authority to take a closer look at what's happening. I am advocating a more forceful Government role in these matters when our national transportation policy is at risk.

The ICC has taken the first step toward trying to understand this dilemma. Many other steps must be taken before we can be assured that the public interest nest is being protected from the takeover foxes.●

THE ARIZONA WOMEN OFF WELFARE PROJECT

● Mr. DECONCINI. Mr. President, the east valley of Phoenix, AZ, has experienced and continues to experience a tremendous increase in population density in the last decade. In response to this increase, and the need to eliminate welfare, I have worked closely with Mesa United Way, Maricopa County's Private Industry Council, Arizona Works, Arizona Department of Economic Security, and the Mesa Chamber of Commerce to develop and implement Women Off Welfare, a demonstration project sponsored by a public/private partnership program with the Conference on Welfare Reform. Women Off Welfare addresses the special needs of single parent mothers who receive welfare assistance. In light of the celebration of Mother's Day this Sunday, I would like to draw special attention to the mothers who are participants in this project. In salute to the many people and organizations that made this project possible, I would also like to draw the attention of my fellow colleagues and the Nation to what I consider an alternate proposal of significant merit.

All across America, we are witnessing a unique series of public/private partnerships forming to solve human service problems as congressional and State allocations continue to diminish. Creative joint ventures are succeeding where unilateral efforts, usually Federal and State only, have consistently fallen short. The current trend in welfare reform legislation is to encourage demonstrations of such joint ventures.

Certain legislative versions under consideration by Congress tend to permit some sort of flexible block grant approach in the use of funds which encourage community-based public/private partnerships to evolve. The goal of these partnerships is to help single women heads of households achieve financial independence.

This independence can be achieved only if the programs coordinate all pertinent resources and successfully attack the barriers to stabilization and self-sufficiency.

Women Off Welfare offers the single women heads of households who are participating in the demonstration project the opportunity to achieve this financial independence. This public/private partnership program recognizes the absolute need to coordinate the many players who together comprise a team. The Mesa United Way, in cooperation with the Arizona Department of Economic Security [DES] through its Arizona works program and the Maricopa County Private Industry Council/Job Training Partnership Act [PIC/JTPA], will coordinate a massive assault on welfare in Mesa—Phase 1—and the east valley of the Greater Phoenix Metropolitan Area—Phase 2. This public/private partnership will also incorporate the support of the city of Mesa, Mesa Chamber of Commerce, Mesa Ecumenical Council, Mesa Community Council, and all relevant human care agencies, public and private.

PROBLEM

As of the 1985 special census, Mesa, AZ, contained a population of approximately 265,000. According to Arizona Department of Economic Security [DES] statistics of October 9, 1987, 1,039 single-parent families received support from aid to families with dependent children [AFDC].

To put these figures in perspective, testimony before the "Arizona Women in Poverty Statewide Hearings" by the Maricopa County Human Resources Department in October, 1986 stated:

All other things being equal, if the portion of the poor who are in female-headed families were to increase at the same rate as it did from 1967 to 1977, they would comprise 100% of the poverty population by about the year 2000. The Arizona poverty population includes over 17,000 female head of household families with no husband present and with children under 18 years of age * * *.

Thus, Mesa and the remainder of the east valley of the Greater Phoenix Metropolitan Area include, by projection, a sizable number of women in poverty who are heads of single-parent families. These women must move away from dependence on welfare into stable long-term employment and self-sufficiency. That transition will require a new kind of public/private partnership which can maximize all available resources and community support.

MISSION

A 3-year demonstration effort will determine if the approach utilized can dramatically and specifically reduce the current 1,039 AFDC case load in Mesa, AZ—Phase 1—in a cost-efficient manner.

Phase 2 will extend this approach to the east valley. The east valley includes five incorporated communities: Mesa, Chandler, Gilbert, Tempe, and Guadalupe—a Yaqui Indian/Hispanic town—as well as the unincorporated areas of Maricopa County surrounding these communities. According to the U.S. Special Census of 1985, the approximate population of the east valley is 450,000.

PLAN

In phase 1, Mesa United Way, in cooperation with JTPA—State and county—and the Mesa Chamber of Commerce, will mobilize the community to participate in the program by:

Finding and offering employment to AFDC recipients completing DES job training or retraining in the Arizona works program and at the Maricopa County Private Industry Council Eastern Training Center [PIC/JTPA].

Enhancing self-esteem by offering professional, supplemental self-worth, self-improvement, appearance, and self-confidence training for Arizona works and PIC/JTPA trainees.

Providing professional case management assistance to DES and county PIC/JTPA staff from intake through job training and job placement, and continued after job placement, in order to establish employment and family stability.

Organizing the Mesa social work community into a network that provides additionally needed support services for participants and families.

Providing a complementary support network composed of a cadre of paraprofessionals and volunteers.

Providing—at no extra cost to the mothers—offices, support staff, limited transportation—in part using a United Way van—continued publicity, overall coordination on behalf of the private sector, and services of a fiscal agent for the demonstration.

IMPACT OF THE PUBLIC/PRIVATE PARTNERSHIP ON THE EMPLOYMENT OF AFDC WELFARE RECIPIENTS

This demonstration will be under the direction and coordination of the Mesa United Way in cooperation with the department of economic security [DES] Arizona works and the Maricopa County Private Industry Council [PIC/JTPA] eastern training center management. A team of local and State agency staff will coordinate all the relevant programs which address the employability of welfare women who are the mainstay of their family support system.

For the first 18 months, phase 1 will focus on Mesa's population of AFDC mothers including the balance of Maricopa County to its eastern boundary. If determined appropriate, phase 2 will broaden this effort to the east valley communities of Chandler, Tempe, Guadalupe, Gilbert, and the balance of the county areas.

The project aims to motivate the chamber of commerce in Mesa—Phase 1—and those of the other east valley communities—phase 2—to take an integral role in the placement and follow-up of this welfare population. The project plans to involve Mesa chamber members in orientation of clients to the world of work and in-service training. Chamber members will have the opportunity to meet these mothers when the chamber first gets involved in the demonstration. We plan to ask business representatives to work with a number of these mothers on a 1-to-1 basis throughout the program. We are hopeful that the mothers will identify with business representatives as their advisers on an individualized basis and that this identification will lead to a more intensified and successful search for pertinent and stable employment on the client's behalf.

ORGANIZATION OF THE COORDINATED PARTNERSHIP EFFORT

A director will lead the United Way, DES, county PIC/JTPA management team in this demonstration. The director will be a community leader who can create the basis for cooperation at the community level. This individual will also be expected to work smoothly and effectively with the business and corporate leadership to develop new resources for training and meaningful work assignments.

The primary operational director—that is, deputy director—will be an upper management staff person with extensive job training and placement experience. DES will loan the operational director to the demonstration. This individual will be skilled in the techniques of case management and resource coordination and will understand agency operating procedures.

A third kind of specialist will concentrate on job placement and will create employment contacts particularly suited to this project. The specialist's employment contacts will be in both corporate and small business settings. The specialist will establish the kinds of supportive environments which will encourage each participating welfare mother to experience the greatest opportunities for growth and upward mobility.

PROGRAM COMPONENTS AND PROCEDURES

In 1967, Mesa United Way's leadership discovered that the city was sorely lacking State, county, and private social services. For assistance, residents were often forced to travel to the Phoenix office, a distance of 50 miles roundtrip.

In 1974, Samaritan Health Services and the first director of DES helped create Arizona's first true multiservice center at the Tri-City Community Service Center in downtown Mesa. It serves the communities of Tempe, Chandler, Gilbert, Guadalupe, Mesa,

Scottsdale, and the balance of the county in the east valley.

Tri-City also offers all DES programs from job service to food stamps, department of corrections services, county health services, legal aid, and Mesa Human Resources—an advocacy/case management agency. At this time, both a common intake, information, and referral service, and a maxistaffing case management and problem-solving demonstration are operating. Both of these programs are under the auspices of the Mesa Community Council, in cooperation with the center's management.

SELECTION OF CLIENTS

As previously indicated, the initial focus of phase 1 of this demonstration will be the approximately 1,039 Mesa AFDC mothers identified in conjunction with Maricopa County PIC/JTPA and DES Arizona works. Appropriate numbers of these mothers will be served each year of the 3-year demonstration. Phase 2 will extend this demonstration to AFDC mothers in the east valley incorporated communities and the balance of the county areas.

EVALUATION OF NEEDS

A team of DES, county PIC/JTPA staff, and private case management agencies and programs will access each AFDC single parent mother as to her employability. The team will also develop an employability plan. If short-term training, self-esteem orientation, vocational rehabilitation, day care, transportation, and housing are required, then each client will be provided with a casework plan for tracking, advocacy, and assistance. Immediate placement, where appropriate, will be the priority. The Arizona health care cost containment system [AHCCCS] will provide health screening. AHCCCS is a unique Medicaid, Social Security Act, title XIX demonstration.

SPECIAL TRAINING IN SELF-ESTEEM AND EMPLOYER EXPECTATIONS

Certain clients, other than those ready for immediate placement, or those for whom the standard county PIC/JTPA motivational training is not sufficient, will undergo a brief, but comprehensive program in ego enhancement or self-esteem enhancement and orientation to on-the-job employer expectations. The demonstration project staff will directly conduct this training.

JOB PLACEMENT

The demonstration project will create a network of special focus subcommittees of the Mesa Chamber of Commerce—phase 1—and of the east valley chambers of commerce—phase 2—to work hand in glove with the demonstration team to develop jobs which are individually focused on client strengths. The project will encourage placements that: Offer opportunities for sustained employment and vertical job mobility—that is, a future with more than the minimum wage; provide inservice training when appropriate; make available an affordable health benefit system; and maintain a supportive employee environment—for example, through a buddy system.

From the beginning, chamber of commerce employer subcommittees, commencing with Mesa, will acquaint themselves with a representative sample of clients on a 1-to-1 basis. The purpose of this procedure is to help the chamber representatives better understand the importance of working with the demonstration team.

Throughout the processs of providing appropriate and creative employment, the project will attempt to persuade employers in small businesses and corporations to reexamine their work settings and find new ways to provide access and entry-level jobs which meet the above-described four characteristics. These efforts will afford the special population AFDC mothers a chance to become employed and accepted in long-term, stable, and challenging work.

VOLUNTEER PARTICIPATION

Volunteers will be recruited, trained, and placed throughout this demonstration. For example, the project will utilize volunteers in unison with professional staff as client advocates. Volunteers will learn to work in tandem with the mothers and their children and assist them in gaining independence.

The project will help find appropriate resources for clients with transportation, food stamp eligibility, health services, and other ancillary problems. Volunteers may staff a cooperative venture day-care center to lessen the burden of these kinds of costs.

The project will recruit health care personnel to accomplish health screening and wellness training at no cost for welfare mothers and their families. A cadre of volunteer physicians will be asked to provide at least two to three visits per family. The project will ask hospitals to volunteer acute emergency health care. However, the county health system may cover this care.

Fortunately, AFDC mothers are automatically eligible for county health care through AHCCCS. The problem, however, arises when the mother finally gains employment. At that point, many different kinds of subsidized benefits evaporate and must be replaced for a limited period of time in order to effect long-term success. This is the point where Federal waivers must keep the services flowing for a reasonable period of time.

SUPPORTIVE SERVICES

We believe that advocacy, health care, day care, and transportation are essential services which will assist AFDC mothers to achieve long-term, challenging employment which pays an amount sufficient enough to permanently remove them from the welfare roles. All the contemporary national welfare reform demonstrations which have proven successful—from Massachusetts to New Jersey to San Diego—included some portion of day care, health care, and transportation services after employment. Consequently, these kinds of ancillary services must be part of the replication of these national approaches in Mesa, AZ.

PARTNERSHIP AGREEMENT

We will establish a partnership with Maricopa County's Private Industry Council [PIC/JTPA], through collaboration with their eastern training center and Arizona works of the department of economic security [DES].

Either Arizona works or the county PIC/JTPA will initiate the process and establish the plan for case management. Case tracking will begin with eligibility determination and orientation, plus testing and evaluation. Then, all eastside AFDC clients will be assigned to the eastern training center to continue to work with the clients in motivational orientation or self-esteem enhancement. For those AFDC clients in need of specialized motiviation/self-esteem training, the United Way demonstration will provide a specialized training experience.

If the clients are lacking in education, the eastern training center will educate them to the point of employability. This education will address such problems as a lack of high school diploma or dificulty in utilizing English as a second language. The clients, according to their employability plan, will also be responsible to participate in necessary training in their own unique programs—for example, clerical—or through individualized contracts with programs—that is, those offered by the community college system. This program will utilize the training resources of the county PIC/JTPA.

A coordinated attack on the myths of welfare will augment job placement. Attention will be given to the value of this partnership approach for creating a qualified pool of stable labor which will be readily available to the small businesses and corporations. This effort will focus on the United Way, in coordination with the chamber of commerce and the county PIC/JTPA.

The integrated approaches of all three entities will perfect case management in an advocacy mode. This will begin the data base established initially by Arizona works or county PIC/JTPA. The eastern training center will carry the case management through, while the Mesa Community Council's maxistaffing project coordinator will reassess and direct case management. The information available within the Tri-City Community Service Center and its information and referral program—the latter being

funded jointly by the city of Mesa and DES community services administration—will also contribute to successful case management.

The unique aspect of this entire demonstration, in addition to the relationships established through the partnership, will be an attempt to supply essential support services, when needed, to keep the AFDC mothers employed once other benefits begin to evaporate.

As previously discussed, these will include: Transportation, day care and quasi-health maintenance service program. The project will encourage the volunteer sector to contribute their talents to diminish the costs of most of these kinds of support services.

MARKETING FOR SUCCESS

Effective community relations are an integral part of the success of all projects of this kind. United Way organizations throughout the United States have learned to be effective publicists in order to capture the public's imagination on behalf of the human service agencies they represent. Their expertise lies in their ability to communicate well with print and broadcast media to utilize up-to-date telecommunication technology to their advantage. The Mesa United Way has mastered all of these approaches in order to enhance the public's understanding and commitment to its many pilot projects and its annual campaign.

In addition to the standard kinds of community relations and publicity, the project will attempt to utilize videotaping—with appropriate client releases regarding confidentiality—to capture the highlights of many features of this comprehensive demonstration. The project will use the tapes for public service announcemnts, documentaries, and in-service training.

The objective of the partnership approach in this project is to do everything possible to increase the employability and employment of AFDC mothers. We propose that the United Way demonstration be used to increase, not duplicate, the number of AFDC mothers served, and to improve their image as stable and capable workers in the eyes of the business and corporate community in Mesa, east Mesa, and eastern Maricopa County. As a result, the demonstration project will serve more AFDC mothers and move them into the rapidly expanding pool of quality and challenging jobs.

We suggest a team approach among county PIC/JTPA, DES Arizona works staff and the United Way demonstration to dramatically magnify and expand the impact of the JTPA dollars available to eastern Maricopa County. Interagency agreements will specify how these county PIC/JTPA sponsored services will mesh together and what kinds of measurable outcomes will be included and reflected in the performance standards as part of these agreements. All three parties will actively negotiate the cooperative details. For example, the United Way demonstration will negotiate with the county PIC/JTPA executive director on a line of credit to expand the training dollar available to serve additional clients.

Since the eastern training center, as the PIC/JTPA eastern Maricopa County representative, is committed to serve so many AFDC clients the first fiscal year, the United Way demonstration will attempt to serve an equal and additional number for the same period of time.

SUMMARY

In summary, our project will address and answer the following questions:

Can a unified city or metropolitan area stamp out and prevent welfare dependency with an enlightened plan and leadership?

Can employers' attitudes be changed concerning welfare recipients' employability and their willingess to work?

Can gradually diminishing day care subsidies and health-care services applied immediately after employment keep single parent AFDC women with families from recycling back onto welfare?

Can the United Way, the chamber of commerce, county priviate industry council and Arizona works officials and volunteers pool their efforts on a problem as a big and complex as welfare dependency and at the same time improve the way business is done?

Can the department of economic security [DES] work effectively with the Federal Government to obtain the programmatic waivers essential to make this demonstration successful by extending services beyond employment?

We believe that these questions will be answered in the affirmative. We will mold the cooperative partnership out of currently available resources and will test the strength of the partnership on all the typical welfare problems. People have explained by AFDC women have historically faced unemployability with a variety of reasons. These reasons include barriers such as: Lack of capabilities; poor attitude; teenage pregnancy; adult illiteracy; alcohol or substance abuse; absence of placement services; inadequate support services such as day care, health care and transportation; lack of coordination of resources by existing social service agencies; no commitment from the business community; poor self-esteem; and limitations in congressional Law.

This demonstration project is committed to tackle and overcome any barrier that an individual welfare family might face. Our objective is to break the cycle of welfare dependency. By giving these AFDC mothers the opportunity for gainful and challenging employment, along with a postemployment support system, we are confident that we can successfully achieve this objective.●

"DOING GOOD" WITH THE MINIMUM WAGE

● Mr. BOSCHWITZ. Mr. President, I would like to bring to the Senate's attention a recent editorial in the Washington Times titled "'Doing Good' With the Minimum Wage" by Paul Craig Roberts. I find the story most intriguing in light of the ongoing debate over raising the minimum wage.

In the editorial, Mr. Roberts relates an experience he had as an aspiring young economist working in the Labor Department. His first assignment was to study the impact of minimum wage laws on the lesser-developed economy of Puerto Rico. The results of his efforts contradicted the claims of minimum wage advocates and certainly came as a surprise to those who had commissioned the study.

It seems that by the time of Mr. Roberts' investigation, entire industries in Puerto Rico had already been wiped out as a result of mandatory wage increases. A thriving needlework industry which provided some of the poorest people with money income had become virtually extinct. In effect, Puerto Ricans suffered a dramatic increase in unemployment in exchange for higher wage scales.

Repeated efforts were made by minimum wage proponents to rationalize and ultimately suppress Mr. Roberts' findings, diluting his clear conclusion that increased mandatory wage rates had had a very destructive influence on the Puerto Rican economy.

Mr. President, I cannot help but think of how the Puerto Rican situation is analogous to the situation in rural America. One of the few advantages rural areas have in this economy is the cost of labor. In many rural areas, existing wage rates are considerably lower than those in more urban settings.

My fear is that a fate similar to the 1962 incident described by Mr. Roberts in Puerto Rico awaits rural communities if wage rates are excessively hiked. Small businesses provide the bulk of jobs in rural areas and it is small businesses that will be most harmed by the minimum wage increase. The bottom line is fewer jobs for the rural work force.

Mr. President, as the Senate knows, I have led the fight for some time now for an approach to this problem which is much more efficient than increasing the minimum wage. That approach calls for expanding the earned income tax credit [EITC], and varying it by family size. Many Members of this

body have recognized the merit of this approach and supported me in the past. It is my hope that Congress will finally recognize the negative effect of a minimum wage increase and look instead to my proposal as a more effective solution.

Mr. President, I ask that the editorial be printed in the RECORD. I thank the Chair.

The editorial follows:

[From the Washington Times, May 5, 1989]

"DOING GOOD" WITH THE MINIMUM WAGE

(By Paul Craig Roberts)

With Congress pressing for a higher minimum wage than President George Bush is willing to accept, it is worth recalling an encounter in the Kennedy administration with this tool for doing good.

As an economics graduate student at the University of Virginia, I had two professors from Harvard who responded to my liberal idealism by helping me land a spot in a new White House program started by the Kennedy administration. I drew a job in the Labor Department and reported for work in the summer of 1962.

By that time minimum wage laws had been on the books long enough for economists to study their effects. Most had concluded that they hurt the people they were supposed to help.

At the Labor Department I was assigned to look into this, specifically with regard to the impact of the minimum wage law on the lesser-developed economy of Puerto Rico. The law required that the minimum wage in Puerto Rico be raised as rapidly as possible to the U.S. mainland level, with the provision that the minimum wage increases avoid a substantial increase in unemployment.

Industry boards were set up which routinely raised the minimum wage and reported no adverse effects on employment. By the time of my investigation, entire industries had been wiped out.

It soon became apparent that the people who served on these boards were pleased with the opportunity to "do good" by raising wages. Whenever unemployment resulted, some other explanation was found to account for it.

For example, there had once been a thriving art needlework industry on the island which embroidered handkerchiefs and linens. Though there were some production shops, it was basically a household industry that provided some of the poorest people with a money income.

It was also an industry whose capital equipment was easy to remove, and as wages were forced up, the entrepreneurs began moving their machines to other locations. Puerto Ricans were saved from working for "substandard wages" by unemployment.

When I pointed this out, I was confronted with the argument that the handkerchief industry had been wiped out by technological change—the advent of Kleenex.

Curious, I checked the import statistics and found that the product was now streaming in from foreign locations not subject to the U.S. minimum wage. When I pointed this out, I was told these foreign imports were a different product.

More determined to get to the bottom of the issue than the Labor Department wanted, I found samples of the Puerto Rican product in an old report and sent them to the customs inspectors in New York, who had been classifying the product for years. A written affidavit came back that it was the same product.

By now the people who were proud of how much good they had done by raising wages were angry at me. The administrator of the Wages, Hours and Public Contracts division slammed his fist on the table and accused me of being against "bread and shoes for the workers." Dumbfounded, I replied that I was merely reporting on the process that had deprived poor people of money wages.

There was an uproar, and I was told that my report would not be published. My idealism flashing, I replied that in that case I would publish an article about the episode. With that, things calmed down, and I received some half-hearted pats on the back for having done such a thorough job. After all, I had two sponsors who were in with the Kennedys.

I went on to the University of California at Berkeley to study more economics. At Christmas a Labor Department economist with whom I had worked came to visit his parents. I asked if my study had been published, and he replied in the affirmative. Had it stopped the process of pricing Puerto Rican labor out or markets? I eagerly asked.

No. He explained I had made one mistake. By so thoroughly proving the case, my report was too long and opponents were able to seize on its length and demand editing. As paragraphs and tables disappeared, the message became confused.

Outraged, I threatened to protest, but my friend assured me that in his experience no one ever looked at the reports anyway, as the prospect that a person could be hurt by higher wages was not easily perceived by most people.

Years later I told this story to a governor of Puerto Rico. He thought it was a good thing that the low wage jobs had been lost. Puerto Rico had replaced them, he said, with high wage pharmaceutical jobs.

Had the needleworkers become chemists? I asked. No, he replied, they were on welfare or had moved to New York.●

THE CONTRIBUTIONS OF LORRAINE W. FRANK

● Mr. DECONCINI. Mr. President, this Sunday, on Mother's Day, we across the Nation will give special recognition to the women in our lives who have provided each of us with emotional, moral, intellectual, and increasingly, economic support. Too often, a mother's contributions to our individual lives and to the well-being of the entire community, go unnoticed. So, every spring, we reserve one day to remember her value and to say thank you for all the times over the past year that she reached out a helping hand without the expectation of a personal reward.

Mr. President, I would like the opportunity to express my most sincere gratitude to a very distinguished woman who has most diligently and graciously served Arizona and the Nation, Lorraine W. Frank. Today, she and Walter Cronkite will receive the honorary degree of doctor of humane letters from Arizona State University. This honorarium is only one reflection of a lifetime of selfless service to the entire Arizonan community.

Over 30 years ago, Lorraine left Washington, DC, where she had worked as a journalist, and subsequently, as an economist with the Department of Labor. As was the common practice for women of her generation, Lorraine left both a professional career and a start in law school to rear her five children. During her early years in Maricopa County, AZ, she involved herself heavily in the life of the community. When the youngest of her children turned nine, Lorraine returned as a professional careerwoman in nonprofit sector organizations and activities to serve the public.

In 1965, Lorraine served as a staff member for the Choate Foundation, an organization devoted to improving the life of poor and disadvantaged families, particularly children, by encouraging them to reach for higher ambitions and aspirations. In 1968, Lorraine left the Choate Foundation to serve as the director of Arizona Job Colleges. She was responsible for planning and creating a project to educate, train, and rehabilitate families of poor rural migrant workers. She also planned and secured funding of a $5.5-million 3-year operational budget, built a community to house and provide support services—including health care, child care, and recreation—for 100 families, and hired and managed professional staff through startup of the project.

From 1970 to 1971, Lorraine worked as a consultant for the Ford Foundation, where she assisted Southwestern Native-Americans and Hispanics in creating and securing funding for programs in housing, social services, and economic development. During this time, she held the position of director of relocation and social services for the city of Scottsdale Redevelopment Agency. She was responsible for relocating families for the development of Scottsdale mall. She created new housing and relocation plans for Yaqui Indians and other residents who lived in a frequently flooded bed of the Indian Bend Wash. Furthermore, she created and developed the multiservice Vista Del Camino Community Center. For her outstanding service, Lorraine received the 1971 city of Scottsdale award for civic service.

In 1973, Lorraine became the founding executive director for the Arizona Humanities Council, a position which she will continue to hold until her retirement in September of this year. As the director for the council, she is responsible for planning, initiating, and coordinating public programs in the humanities for the people of Arizona. This requires a commitment to literature, history, philosophy, and other bodies of knowledge that deal with values and ideas essential to the education of citizens in a democracy and

to the continuing health of the world of ideas. Since its foundation, the council has distributed between $2 and $3 million in over 500 grants to make possible discussions throughout Arizona on such diverse topics as the cultural heritage of Arizona's people, the lives of Arizona women, capital punishment, contemporary American literature, the future of knowledge, Beowulf, and the ethical issues in health care.

For 16 years, Lorraine has represented the council and its program to academic and nonacademic groups in the State, helping to build its role in the cultural life of Arizona. The program—and Lorraine's work as director—has so broadly affected the awareness and understanding of the humanities that Lorraine has received formal personal recognition by two of the State's universities. In 1985, Lorraine received the honorary degree of doctor of humanities as well as the Arizona State University distinguished achievement award. Today, she receives her third such award of recognition; the honorary degree of doctor of humane letters from Arizona State University.

Lorraine's commitment to excellence reaches far beyond the professional arena. Lorraine is a devoted volunteer for a variety of noteworthy organizations. She is a member of the Arizona committee of selection of Rhodes scholars. She is on the advisory council for Valley leadership and the board of directors for Arizona Academy. Currently, she affiliates herself with Phoenix Together, the Charter 100, Maricopa County Mental Health Association, Opera Dames, Phoenix Art Museum League, associate Alumnae of Vassar College, and Seven College Conference. She has previously served on the board of directors for the Jane Wayland Child Guidance Center and for the Friendly House. She served on the founding board of directors for Valley Leadership. She was a board member for various PTA's and Scottsdale PTA council. She sat on the National Committee for Support of the Public Schools, National Mental Health Law Project, and was vice-chair of the advisory committee of the Arizona State University School of Social Work.

Lorraine has demonstrated a commitment to the public with her support for the democratic process and with public service. She is a member of the executive committee of the Democratic National Committee and is active at all levels of party organization. She is presently the chairman of the reelection committee of Arizona's incumbent governor, Rose Mofford. She has served as the co-chair of the Mayor's Reelection Campaign Committee and as co-chair of the advisory committee of the Mayor's Reelection Campaign Committee. She is a member of the National and of the Arizona women's political caucus. Lorraine has served on such city boards and commissions as the municipal aeronautics advisory board, the judicial selection advisory board, the citizen bond advisory committee, the transit advisory committee, and chair of the transit subcommittee of the citizens bond committee.

Lorraine is also active in the health field. She presently serves as a member of the council on trusteeship for the Arizona Hospital Association. She sits on the board of directors for Camelback Mental Health Systems, and is vice-chair of the Camelback Hospitals Management Corporation. She sat on the board of directors of the Camelback Thunderbird Samaritan Hospitals Association, the board of directors of the Camelback Mental Health Foundation, and the Arizona Health Planning Advisory Council. For Camelback Hospitals, she has, over a 16-year period, held such positions as member of the executive committee, vice-chair, chair, and board member on the board of directors. Her service as chair included her participation during a period of dramatic growth with the opening of three new facilities, the development of several significant treatment programs, and the planning of two new hospitals. As a tribute to Lorraine upon her retirement from the board, Lorraine was recognized as a "caring and articulate ambassador for Camelback Hospitals; Lorraine Frank helped the organization step into the 1980's as a leader in the provision of mental health services."

Not only has Lorraine pursued an astonishingly rich and productive career, but she is also the wife of a distinguished constitutional lawyer and legal scholar and historian, and mother of five children. Lorraine is a shining example of the type of dynamic family and career woman that stands in the forefront of America's reach for excellence. As Stephen Leacock once said, ". . . those who do most, dream most." Thank you, Lorraine Frank, for your vision, and for the desire and courage to reach for the realization of your vision; Arizona and all America has profited immeasurably from your quest. For that, I salute you, I congratulate you on the receipt of the honorarium today, and I wish you a "Happy Mother's Day."●

COMMENDING COMMUNITY TRASHBUSTERS WEEK

● Mr. McCAIN. Mr. President, I am pleased to take this opportunity to recognize and applaud a program taking place this week called "Community Trashbusters Week." The program is a communitywide cleanup effort by hundreds of volunteers in Tuba City and Moencopi, AZ, to help restore the beauty of their communities. The project is a grassroots effort whose success will hopefully spread to other communities around the Nation.

Volunteers from all parts of the Tuba City and Moencopi communities, including local businesses, schools, city officials, the fire station, the local National Guard unit, tribal departments, the Bureau of Indian Affairs and the Indian Health Service, are all contributing their time to this effort. Together, they are utilizing a variety of innovative ideas to get all the members of the community involved in the cleanup effort.

Mr. President, this cleanup project is a perfect example of the spirit of volunteerism and community-mindedness which you have encouraged all Americans to take part in. Community Trashbusters Week has developed a unique type of partnership between public and private sectors to help meet the real needs of our cities. This project not only provides for cleanup and restoration, but also gives neighbors a chance to become better acquainted, while donating their time to the project.

Some of the creative efforts being used include trash cleanup days, wherein businesses release their employees for a half day to pick up trash, and a "trash-a-thon" where nonprofit organizations solicit pledges from community members for each bag of trash picked up. Another activity, the removal of abandoned junk vehicles, has been facilitated by the generous efforts of the National Guard and a local trucking company. And recycling stations have been set up to both educate the community on recycling and encourage participation in the cleanup by selling recyclable materials for proceeds.

Local schools have also played a major role in stimulating interest in the program. They have initiated the "Adopt-A-Trash Can" project, since the Tuba City and Moencopi areas do not have city dumpsters. Local businesses take responsibility for emptying their adopted 55-gallon drums. Poster and essay contests are also taking place at local schools to help drum up interest in the project. Working with the schools, local businesses have contributed food and money for a cookout to raise funds for the cleanup effort.

These creative efforts, by those in Tuba City and Moencopi, to volunteer their time and resources are an example to other communities that the spirit of volunteerism is still alive and well. Our Nation was founded on these principles of generosity, selflessness, and helping others. Without the contributions of volunteers, a countless number of community projects and essential services would have never been available.

In conclusion Mr. President, I wish to salute each individual who has volunteered his or her time and energy to support this project to beautify this Arizona community. I can only hope that the "Community Trashbusters Week" in Tuba City will serve as a catalyst to encourage other communities to participate in similar cleanup projects in both Arizona and across the Nation.●

NATIONAL ASIAN PACIFIC AMERICAN HERITAGE WEEK

● Mr. GORTON. Mr. President, this week has been proclaimed by President Bush to be "National Asian Pacific American Heritage Week." I would like to join in recognizing and saluting the contributions and achievements made by Americans of Asian and Pacific Island descent.

Contrary to what many believe, Asian Pacific Americans are among our earliest settlers. Although the majority of Asians and Pacific Islanders came here after the turn of the century, Filipinos have been here even before the United States was founded. This year marks the 226th anniversary of Filipinos in America.

As Asians and Pacific Islanders emigrated to the United States, they brought to this country a variety of rich and distinctive traditions and cultures. The heritage of each group is similar but by no means alike. Asian Pacific Americans are intensely proud both of being American, and also of their heritage.

Overcoming great hardships, Asian Pacific Americans have made historic contributions to this Nation. Workers of Chinese ancestry were instrumental in building the first east-west transcontinental railroad. The 442d Regimental Combat Team, composed entirely of Japanese Americans who fought in World War II, became the most decorated fighting unit in U.S. military history.

Today, Asian Pacific Americans are among the leaders of industry, especially in the high-technology field. As we enter into what some have called the Era of the Pacific Rim, Asian Pacific Americans will act as a nature bridge to link the United States with our trading partners in the Far East and Southeast Asia.

Asian Pacific Americans will be among our business and community leaders of tomorrow. Asian Pacific American students have achieved high scholastic marks in our finest schools and universities. In addition, they are entering in record numbers professions in which they were typically underrepresented, such as politics and law.

The United States is a nation of immigrants and their descendants, who together bring richness and diversity to all of our lives. As Asian Pacific Americans have become part of the American fabric, they have contributed notably to the histories of this great Nation and of my home state of Washington. It is with great pleasure that I salute all Asian Pacific Americans, not only during this special week of recognition, but throughout the year as well.●

AUTHORITY FOR RECORD TO REMAIN OPEN

Mr. WIRTH. Mr. President, I ask unanimous consent that the RECORD remain open until 5 p.m. today for the introduction of bills and statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

TO DELAY THE EFFECTIVE DATE OF SECTION 27 OF THE OFFICE OF FEDERAL PROCUREMENT POLICY ACT

Mr. WIRTH. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. 968, now at the desk.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 968) to delay the effective date of section 27 of the Office of Federal Procurement Policy Act.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the bill (S. 968) was considered, ordered to a third reading, read the third time, and passed, as follows:

S. 968

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DELAY OF EFFECTIVE DATE.

Section 6(b) of the Office of Federal Procurement Policy Act Amendments of 1988 (Public Law 100-679; 102 Stat. 4068) is amended by striking out "180 days after the date of the enactment of this Act" and inserting in lieu thereof "July 16, 1989".

Mr. WIRTH. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JOINT REFERRAL OF BILL—S. 978

Mr. WIRTH. Mr. President, I ask unanimous consent that S. 978, a bill to authorize the establishment of the National Museum of the American Indian within the Smithsonian Institute, be jointly referred to the Committees on Rules and Administration and Indian Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR STAR PRINT—S. 711, S. 712

Mr. WIRTH. Mr. President, I ask unanimous consent that S. 711 and S. 712, two bills dealing with the status of Puerto Rico, be star printed to reflect the changes I now send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WIRTH. Mr. President, I further ask unanimous consent that a statement by Senator JOHNSTON appear at this point in the RECORD and that the two bills be printed in the RECORD following his remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, on April 5, 1989, Senator MCCLURE and I introduced three bills: S. 710, S. 711, and S. 712, to provide for referendums on the future political status of Puerto Rico. The purpose of these bills is to give the people of Puerto Rico an opportunity to express their preference between the three status options: statehood, commonwealth, and independence. The reason that three bills were introduced was to reflect the uncertainty which exists regarding the level of specificity which the Congress will achieve in defining these three status options. S. 710 defines the options with just a few words. S. 711 would define them in general terms and in a few pages, while S. 712 would define the options in complete detail including legislative language on transition and implementation procedures.

As I stated upon introduction of these bills on April 5, the initial definitions of the status options for S. 711 and S. 712 were to be provided by the three political parties on May 9. Accordingly, the appropriate places in the bills were left blank.

Mr. President, I am very pleased that the three parties have dedicated themselves to this difficult task, and to our ambitious schedule. They have submitted their respective definitions as anticipated, and they are to be commended for their efforts.

The issue of Puerto Rican status is wide-ranging and necessarily involves matters of concern of many Members, and committees, of the Senate. If Puerto Rico is to hold a plebiscite in 1992, then we must enact legislation in the 101st Congress. This means completing action in the Senate this year. Otherwise, the House will not have sufficient time to consider this legislation next year, and the referendum will not be able to be held in Puerto Rico before the 1992 election campaign gets underway. Such a delay would push the referendum into 1992, and cause it to become confused by other issues. Accordingly, because of this time constraint, and the wide range of issues covered by this legislation, I encourage my colleagues to

study these definitions carefully so that we can work together to resolve any concerns promptly.

In order to facilitate this process of review the committee has scheduled a staff briefing for Monday, May 22, at 1:30 in the Energy Committee hearing room, SD-366. Invitations to this briefing have been sent to all Senate Offices, and I encourage the attendance of staff, from Member offices and committees. The briefing will include short presentations by a representative of each of the parties on their respective definitions of statehood, commonwealth, and independence, and they will be available to answer questions.

On June 1 and 2, the committee will begin its formal consideration of these three bills. These hearings will continue to Puerto Rico in mid-June and then will return to DC to receive testimony from the administration in July.

Mr. President, I am very pleased that this process remains on schedule. With these initial proposed definitions, the real work now begins. These definitions represent the desires of the three principal political parties, but now the Congress must consider them, and modify them, to reflect the concerns of the Federal Government. Only after congressional consideration, and definition of the status options, can a meaningful referendum be held in Puerto Rico. This is because only Congress has the authority to change the island's political status.

This issue is of great importance to the Nation and to the people of Puerto Rico. The leadership of the island has asked for our assistance and consideration in consulting on future political status. We have a responsibility to respond, and I look forward to working with my colleagues in meeting this responsibility.

S. 711

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(1) the United States of America recognizes the principles of international law with respect to its relationship with Puerto Rico; and

(2) the United States is committed to a process of consultation and negotiation with the people of Puerto Rico leading to a referendum on the issue of political status to be conducted in a fair and equitable manner.

SEC. 2. REFERENDUM.

(a) IN GENERAL.—An islandwide referendum shall be held in Puerto Rico in which qualified voters of the Commonwealth of Puerto Rico shall be represented a choice of negotiating one of three status options for Puerto Rico as follows:

(1) Statehood;

(2) Independence: or

(3) Commonwealth.

For the purpose of these negotiations it is understood that the initial position of the people of the Commonwealth of Puerto Rico and of the Congress of the United States is that the terms shall be as follows;

(b) INITIAL DEFINITIONS.—

(1) STATEHOOD.—Upon admission as a state, Puerto Rico would cease being a territory of the United States. The Commonwealth of Puerto Rico would be admitted as a sovereign state of the Union, with its current Constitution, on an equal footing and in true permanent union with the other fifty states.

The new State of Puerto Rico shall be known as The Commonwealth of Puerto Rico. In Spanish it shall be known as "Estado Soberano de Puerto Rico".

Admission to the Union has historically been a flexible and varied process which has been adapted to the individual circumstances of each new state. Congress, which has the constitutional power to facilitate the admission of new states, would provide for a smooth process of adjustment from the tax structure of the territorial status to the federal fiscal system.

The Commonwealth of Puerto Rico would be assured of its reserved state right under the Constitution to continue to maintain both Spanish and English as its official languages, as well as of its right to preserve and enhance its particular cultural characteristics.

Statehood creates the only permanent union with the United States that is consistent with the "more perfect union" of equal states established by the United States Constitution.

Statehood would entail fundamental political and economic betterment for the Commonwealth of Puerto Rico.

Statehood means economic self-reliance and social justice, including parity for its residents in those aspects of federal legislation that cover the residents of the several states at the time of admission and in the future.

Statehood means political equality, and, specifically, the right to participate in the process of election of the President and Vice-President of the United States as well as the right to elect two (2) U.S. Senators and the corresponding number of members of the U.S. House of Representatives.

Statehood means that all benefits and protections of the United States Constitution would be fully bestowed on the People of the Commonwealth of Puerto Rico together with the guarantee of full protection by the Federal judicial system.

Statehood entails the immediate full extension of federal entitlements and legislation providing parity for the residents of Puerto Rico in all Federal programs. The Commonwealth will assume all responsibilities of a State of the Union.

Statehood is a political formula recongized by the international community through Resolution 1541 (XV) of the General Assembly of the United Nations and through Resolution 1469 (XIV) of that body, which was adopted upon the admission of the new states of Alaska and Hawaii.

Statehood embodies the highest degree of autonomy and sovereignty in true permanent union with the several states.

(2) INDEPENDENCE.—

(A) In order to ensure the legitimate interests of Puerto Rico and the United States, to strengthen bonds of friendship and cooperation, and to provide for equitable economic relations between both nations, the United States shall recognize the independence of Puerto Rico in accordance with the principles set forth below, thus guaranteeing the necessary conditions for a rational and mutually advantageous transition before and after the proclamation of Puerto Rico's independence.

(B) The following shall constitute the Principles under which the Congress shall recognize Puerto Rico's independence in accordance with the provisions of Section 3:

(I) HUMAN RIGHTS.—The people of Puerto Rico shall, through a Constitutional Convention, establish a republican form of government which shall guarantee the full protection of fundamental human rights.

(II) CITIZENSHIP.—The Republic of Puerto Rico shall establish its own citizenship, and there shall be agreements between the United States and the Republic of Puerto Rico to ensure the compatibility between the citizenships of both nations.

(III) DEFENSE.—The United States and the Republic of Puerto Rico shall enter into agreements that will make possible the ultimate demilitarization of the Republic of Puerto Rico.

(IV) TRADE.—The United States shall allow free access into its market to all imports of goods and services originating in the Republic of Puerto Rico for a period of twenty years after the proclamation of independence.

(V) TAXATION.—The United States shall guarantee that the tax credit currently allowed under Section 936 of the Internal Revenue Code shall remain in full effect upon the proclamation of Puerto Rico's independence and during the fifteen years immediately thereafter.

(VI) PUBLIC DEBT.—The Republic of Puerto Rico shall assume the outstanding debts and obligations of the Commonwealth of Puerto Rico, its instrumentalities and municipalities, and the United States shall for a period of twenty-five years maintain the income tax exemption currently provided by law on interest payments derived from debts and obligations incurred into before or after the proclamation of independence.

(VII) VESTED RIGHTS.—The United States shall guarantee all vested rights and benefits accruing to residents of Puerto Rico under the laws of the United States from past services or contributions, such as benefits for Veterans of the Armed Forces of the United States and their relatives, benefits for retired government employees, and old age and/or disability payments under the Social Security Act, until their extinction under the applicable laws of the United States; and contributions made to the Social Security System by those not yet eligible for benefits at the time of the proclamation of independence shall be transferred for administration by the Republic of Puerto Rico.

(VIII) ECONOMIC ASSISTANCE.—The United States shall guarantee the continuation of transfer payments to individuals, and to the Government of Puerto Rico, its instrumentalities and municipalities, at current-level funding in the form of block grants for the discretionary use of the government of the Republic of Puerto Rico for ten years after the proclamation of independence, and thereafter for ten additional years on a decreasing basis.

(IX) CURRENCY.—The Republic of Puerto Rico may establish its own monetary system, provided that during the ten years following the proclamation of independence both the U.S. dollar and Puerto Rican currency shall be accepted as legal tender in all transactions in Puerto Rico.

(X) FRIENDSHIP AND COOPERATION.—To ensure the effectiveness of the purposes of this Act after the proclamation of the independence of Puerto Rico, the United States and the Republic of Puerto Rico shall set

29-059 O-90-21 (Pt. 7)

forth the details of their bilateral relations in a Treaty of Friendship and Cooperation.

(3) ENHANCED COMMONWEALTH.—

Subpart 1.—Statement of Purposes

In 1952 the Congress of the United States, fully recognizing the principle of government by consent, and the People of Puerto Rico, in the exercise of their right to self-determination, entered upon a compact which established a Commonwealth relationship between Puerto Rico and the United States.

Under the compact the People of Puerto Rico adopted in their own sovereign right their own Constitution and formed an autonomous political community in permanent union with the United States of America based on the irreversible bond of American citizenship.

In 1953 the General Assembly of the United Nations recognized the creation of the Commonwealth and removed Puerto Rico from the list of nonself-governing territories.

This association has enabled the People of Puerto Rico to advance their economic and social development and to preserve their distinct historical heritage and cultural personality.

As inherent in all political relationships freely entered upon, it was based on the understanding that it would evolve and develop within its particular political nature upon mutually agreeable terms.

It is the purpose of Section 2(b)(3) to provide for the enhancement of the Commonwealth relationship by enlarging the scope of self-government of the Puerto Rican people upon the approval of a proposition to that effect by a majority of the eligible voters of the Commonwealth of Puerto Rico.

Subpart 2.—Referendum Proposition: Commonwealth

The referendum proposition regarding Commonwealth, to be presented to, and voted upon, by the People of Puerto Rico shall be as follows: "The Commonwealth association with the United States shall be enhanced to enable the People of Puerto Rico to accelerate their economic and social development and attain maximum cultural and political autonomy within permanent union with the United States based on the irreversible bond of American citizenship, a common defense, a common market, and a common currency."

The proposition will appear in the ballot, in Spanish, as follows: "El Estado Libre Asociado se fortalecerá para acelerar el desarrollo económico y social y alcanzar la máxima autonomía cultural y politica del pueblo de Puerto Rico en su unión permanente con los Estados Unidos sobre los pilares de común defensa, común mercado, común moneda, y el vinculo indisoluble de la ciudadania americana."

Subpart 3.—Principles of Commonwealth

When the Governor certifies to the President and to the Congress of the United States in accordance with Section 2(d) that the decision of the People of Puerto Rico which received the majority of the votes cast favors the proposition of enhanced Commonwealth in permanent union with the United States, as set forth in subpart 2, above, Section 1 of the Puerto Rico Federal Relations Act, 39 Stat. 954, as amended, 48 U.S.C. Section 731, shall be repealed, and replaced by the following:

"(1) The provisions of this Act shall apply to the Commonwealth of Puerto Rico, an autonomous body politic joined in permanent union with the United States on the basis of common citizenship, common defense, common market and common currency.

"(2) The policy of the United States shall be to enhance the Commonwealth relationship enjoyed by the Commonwealth of Puerto Rico and the United States to enable the People of Puerto Rico to accelerate their economic and social development and attain maximum cultural and political autonomy within permanent union with the United States, to secure more equitable participation for the People of the Commonwealth of Puerto Rico in all federal programs that provide grants or services to citizens of the United States as individuals, to secure increased participation by the People of Puerto Rico in U.S. governmental decisions affecting them, to safeguard the distinct cultural identity of the People of Puerto Rico, and to protect the bilateral nature of the relationship between the Commonwealth of Puerto Rico and the United States."

Subpart 4.—Implementation of Federal Policy

When the new federal policy is established in accordance with subpart 3, then Section 9 of the Federal Relations Act, 39 Stat. 954, as amended, 48 U.S.C. Section 734, is amended by inserting at the beginning thereof the term "(a)" and by adding at the end thereof the following:

"(b) A federal statutory law, or provision of such law, is locally inapplicable unless it is consistent with the policy established under subpart 3 and unless such federal statutory law has proper regard for the economic, cultural, ecological, geographic, demographic and other local conditions of the Commonwealth of Puerto Rico. This subsection shall not apply to:

"(i) any federal statutory law in which the Congress makes a specific finding that there is an overriding national interest that such law should apply to the Commonwealth of Puerto Rico, or

"(ii) any federal statutory law, or provision thereof, establishing directly or indirectly grants and/or services to citizens of the United States as individuals, or

"(iii) any federal statutory law or provision thereof relating to citizenship, or

"(iv) any federal statutory law or provision thereof pertaining to the foreign relations, defense or national security of the United States that requires uniform applicability throughout the United States, including the Commonwealth of Puerto Rico, to achieve its intended purposes.

"(c) In addition to judicial determinations of the inapplicability of federal laws under subsection (b), the Governor of the Commonwealth of Puerto Rico may certify from time to time to the Speaker of the House of Representatives, the President of the Senate, and the President of the United States, that a federal statutory law or provision thereof, other than one excluded from the operation of subsection (b), is inconsistent with a Puerto Rican statute and the policy established under subsection (b). Unless, within 60 days of the receipt of such certification, a statute is enacted embodying the finding required under subsection (b)(i), the President shall issue a proclamation that such federal statutory law or provision thereof identified in the Governor's certification is not applicable in Puerto Rico.

"(d)(i) The Commonwealth of Puerto Rico may continue to enter in its own right into international cultural, commercial, educational and sports agreements, and other agreements of like nature.

"(ii) In addition, the Governor of the Commonwealth of Puerto Rico may take any official action to promote the international interests of Puerto Rico that requires the consent of the United States Government and is not expressly prohibited by law. The Governor of the Commonwealth of Puerto Rico shall provide written notice to the President of the United States of any official action he contemplates taking pursuant to the authorization of this part of this subsection and not pursuant to any other authorization or consent. The President may, within 30 days of his receipt of such notice, sign and transmit to the Governor of the Commonwealth of Puerto Rico a document expressing his determination that the contemplated official action would imperil the foreign relations or national defense of the United States, in which case the authorization hereby granted shall be withdrawn as regards such contemplated official action.

"(e) All departments and agencies of the Government of the United States shall be guided by the policy stated in subpart 3 when carrying out their duties under federal statutory laws and federal regulations applicable in or affecting the Commonwealth of Puerto Rico. Every such department or agency shall, before taking any major federal action applicable in or affecting the Commonwealth of Puerto Rico, separately evaluate the consistency of such action with such policy and shall state, on a document accompanying the major federal action, the extent, nature, and result of its consideration.

"(f) Any rule, as defined in U.S.C. sec. 551(4), issued by an agency, as defined in 5 U.S.C. sec. 551(1), shall apply in the Commonwealth of Puerto Rico only to the extent that it is consistent with the policy set forth in Subsection (b). After the effective date of this amendment, when any such rule, other than a rule issued after notice and hearing required by statute, that does not in terms provide that it is inapplicable in the Commonwealth of Puerto Rico is published in the Federal Register, the Governor of the Commonwealth of Puerto Rico may submit to the agency within 30 days in writing (or such longer period as the agency may have prescribed as the period between publication of the rule and its effectiveness) the Governor's determination that such rule is inconsistent with the policy stated in subsection (b). Thereupon, the agency shall reconsider the question of consistency of the rule with the policy stated in Subsection (b) and shall, within 45 days of its receipt of the Governor's determination, publish in the Federal Register its finding either that there is an overriding national interest that the rule be applicable in the Commonwealth of Puerto Rico, in which case the rule, whether or not previously applicable in the Commonwealth of Puerto Rico, shall thereafter be so applicable, or that the rule is not compatible with such policy, in which event such rule, whether or not previously applicable in the Commonwealth of Puerto Rico shall not be so applicable. Unless the agency for good cause finds that a rule that is the subject of such determination by the Governor of Puerto Rico as is described in this subsection shall be applicable to the Commonwealth of Puerto Rico pending its consideration of such determination, and publishes such finding in the Federal Register, such rule, whether or not previously applicable to the Commonwealth of Puerto Rico, shall not be so applicable pending such consideration. An agency's decision to

make a rule applicable or inapplicable in Puerto Rico shall be subject to judicial review.

"(g) The laws, rules and regulations of the United States applicable in the Commonwealth of Puerto Rico when the new federal policy is established in accordance with subpart 3 shall continue in effect except to the extent repealed or modified by this Act, or inconsistent with it, and except as hereafter modified, suspended or repealed in accordance with law."

Subpart 5.—Substantive Areas of Enhancement

In the event the status option of enhanced Commonwealth in permanent union with the United States receives a majority of the votes cast in the referendum, the negotiations contemplated in Section 3 hereof shall develop implementing legislation to enhance the Commonwealth relationship in the following areas, as hereafter established:

1. AVIATION.—Amend the Federal Aviation Act to authorize the Commonwealth of Puerto Rico to seek on its own behalf bilateral air transportation agreements governing the operation of air services by United States and foreign air carriers between the Commonwealth and foreign points, and between the Commonwealth and the United States for foreign air carriers.

2. DEVELOPMENT OF TOURISM.—Amend the Coastal Barrier Resource Act to clarify congressional intent to exclude the Commonwealth of Puerto Rico from the application of this federal statute that never was intended to apply to a Caribbean island, thus enhancing the autonomy of the Commonwealth to decide for itself how best to develop its coastal zone, including the promotion of tourism that is so important to the economic well-being of Puerto Rico.

3. INTERNATIONAL TRADE.—

(a) TARIFF AUTHORITY.—Enable the Commonwealth of Puerto Rico to impose tariff duties on foreign origin products imported into Puerto Rico to the extent it can do so consistent with the international obligations of the United States.

(b) GENERALIZED SYSTEM OF TRADE PREFERENCES.—Secure enactment of a policy statement by the United States encouraging other countries to consider Puerto Rico as a developing territory for purposes of their respective general or regional systems of trade preferences.

(c) CONSULTATION ROLE IN THE NEGOTIATION OF TRADE AGREEMENTS.—Establish arrangements to assure that the President consults with the Governor of the Commonwealth of Puerto Rico concerning the potential impact of any proposed tariff rate reductions on the economy of Puerto Rico before the President concludes any such trade agreements under Section 1102 of the Omnibus Trade and Competitiveness Act of 1988. Arrangements shall also be sought to provide for appropriate participation by the Commonwealth of Puerto Rico, at its request, in the negotiations of trade agreements affecting them.

4. MARITIME.—Enable the Commonwealth of Puerto Rico to establish its own maritime authority, which will exercise exclusive jurisdiction to establish and enforce uniform and non-discriminatory rates for trade between ports in the United States and ports in Puerto Rico to assure Puerto Rico the lowest possible rates.

5. MARITIME RESOURCES.—Amend federal law to enable the Commonwealth of Puerto Rico to acquire jurisdiction over the territorial waters, seabed and submerged lands surrounding Puerto Rico and presently under the jurisdiction of the United States. Amend federal law to exclude the Commonwealth from the coverage of the Magnuson Act and permit the Commonwealth to receive financial benefits from countries other than the United States for maritime resources to which the Commonwealth may lay claim.

6. INTELLECTUAL PROPERTY.—Looking to the future and the critical importance of information in the economic development that will occur in the next century, secure new means of encouraging such information-related economic development in Puerto Rico, including new forms of intellectual property protection for computer chip manufacturers and industrial designers.

7. FEDERAL FUNDS AND PROGRAMS.—

(a) CONSOLIDATION OF GRANT-IN-AID PROGRAMS.—Amend federal law to authorize the Commonwealth of Puerto Rico to consolidate any or all federal grant-in-aid programs, except those that directly or indirectly provide payments or services to persons as individuals for any fiscal year or years.

(b) EQUITABLE TREATMENT IN SOCIAL PROGRAMS.—Achieve equitable allocations to Puerto Rico with the goal of achieving full parity with the states over a period no longer than four years in the following programs: Nutrition Assistance Program (NAP), Aid to Families with Dependent Children (AFDC), and Medicaid, and over a period no longer than eight years in the Supplemental Security Income Program (SSI), as is currently enjoyed with regard to other federal programs.

8. PROTECTION OF WORKERS.—Delegate to the Labor Relations Board of Puerto Rico all the functions presently exercised by the National Labor Relations Board, regarding labor relations in the Commonwealth of Puerto Rico.

Puerto Rico shall continue to have exclusive jurisdiction to legislate employee benefits, including but not limited to Christmas bonuses, sick and vacation pay, and workman's compensation, excluding the federal minimum wage and overtime pay legislation which shall continue to apply.

9. PUERTO RICO PARTICIPATION IN FEDERAL APPOINTMENTS.—Assure the participation of Puerto Rico in designating candidates for the highest ranking federal appointments serving in Puerto Rico, including Presidential appointments subject to Senate confirmation.

10. REPRESENTATION IN THE SENATE.—Secure representation of Puerto Rico's interests in the United States Senate by a second Resident Commissioner.

11. FEDERAL JUDICIARY.—

(a) PRIMARY JURISDICTION OF PUERTO RICO COURTS.—Assure that federal courts abstain from construing an unconstrued Puerto Rico statute or regulation or deciding an undecided point of substantive Puerto Rico non-statutory law without first giving the courts of Puerto Rico an opportunity to construe such statute or regulation or to rule upon such point of Puerto Rico law, which constructions shall be binding on the federal courts.

(b) USE OF SPANISH LANGUAGE.—Enact legislation requiring the United States District Court for Puerto Rico to conduct its proceedings in the Spanish language, upon the request of any party to the proceeding.

(c) Enact a statutory provision for the certification to the District of Columbia Court of Appeals of the actions or controversies arising under, and involving the Puerto Rico Federal Relations Act, as amended by this Act, and for the transfer by the Commonwealth of Puerto Rico, its departments, agencies and instrumentalities, as well as officials and agents, in both their official and personal capacity, of any action brought against them from the District Court for Puerto Rico to the District Court for the District of Columbia.

12. PASSPORTS.—

(a) RESTORING PUERTO RICO'S ISSUANCE OF U.S. PASSPORTS.—Restore Puerto Rico's authority to issue U.S. passports.

(b) SPECIAL TEMPORARY VISIT VISAS.—Consistent with prohibitions imposed by the President on the entry of aliens from specified countries, authorize the Government of Puerto Rico to secure Puerto Rico-only temporary visas, for a period not to exceed thirty days, for nonresident aliens invited by the Government of the Commonwealth of Puerto Rico. The District Office for Puerto Rico of the Immigration and Naturalization Service shall issue these special temporary visit visas, as well as other entry visas.

(c) The District Office for Puerto Rico of the Immigration and Nationality Service shall issue the special temporary visit visas, as well as other entry visas.

13. LAW ENFORCEMENT.—Amend federal law to authorize the Commonwealth to supplement United States efforts to patrol Puerto Rico's borders and make them secure against illegal traffic in drugs and aliens, including joint enforcement of relevant federal laws.

14. HISTORIC SITES AND CONSERVATION LANDS.—Title to lands and properties acquired by the United States under the cession of Spain in the Treaty of Paris entered into on December 10, 1898, as well as of ownership of the Caribbean National Forest, shall be transferred to the Commonwealth of Puerto Rico. Continued use and administration by the federal government of these lands and properties may be negotiated with the Commonwealth of Puerto Rico.

15. COMMUNITY VALUES.—Authorize the Governor of the Commonwealth of Puerto Rico to grant antitrust exemptions for voluntary joint efforts by broadcasters to foster local programming and to foster community and cultural values, including the possible adoption of codes limiting the violence, pornography, and substance-abuse depicted in broadcast programming.

16. ASSUMPTION OF BUDGETARY RESPONSIBILITIES AND TRANSFER OF FEDERAL FUNCTIONS.—The Commonwealth of Puerto Rico shall assume the expenses inherent in all governmental authority transferred pursuant to this Act. The Government of the United States, or any agency thereof, may from time to time delegate to the Commonwealth of Puerto Rico the total or partial performance of functions vested in the United States, including the administration of such federal laws and programs on the island, as may be mutually agreed.

Subpart 6.—Future Enhancements

The enhancements to the Commonwealth relationship resulting from this Act shall form part of the Compact entered upon by the Congress and the People of Puerto Rico in 1952. It may be amended in the same manner as entered upon in order to provide for the continuing enhancement of the Commonwealth relationship.

(c) DATE OF REFERENDUM.—The first referendum shall occur upon the call of the Governor, and during calendar year 1991.

(d) RETURNS OF REFERENDUM.—The returns of the referendum held under this Act shall be made to the Governor of Puerto Rico, who shall cause them to be canvassed in the manner provided by law for the canvass of votes cast in general elections in the Commonwealth of Puerto Rico. If there is not a majority in favor of one of the three options, then there shall be, upon the call of the Governor, and during calendar year 1991, a runoff referendum between the two status options which had received the largest number of votes. The Governor shall certify to the President and to the Congress of the United States that decision of the people of Puerto Rico which received a majority of the votes cast.

(e) APPLICABLE ELECTION LAWS.—The election laws of the Commonwealth of Puerto Rico shall apply to the referendum held under this Act.

SEC. 3. NEGOTIATIONS TO DEVELOP LEGISLATION BASED ON REFERENDUM.

(a) NEGOTIATIONS.—Following certification by the Governor as provided in section 2(d), then the process, involving representatives of the principal political party representing the status option selected, and in full consultation with the other two principal political parties, shall begin to develop implementing legislation encompassed within the principles as set forth in section 2(b), and in consultation with the Committee on Energy and Natural Resources of the United States Senate and the appropriate committees of jurisdiction in the United States House of Representatives. Such legislation shall, upon enactment, authorize a further referendum of the people of Puerto Rico to approve or disapprove the selected status as defined in the legislation. A change of status shall not be effective unless or until approved in such a referendum.

(b) TIME LIMIT.—The second referendum to approve or disapprove the selected status as defined in the legislation developed under this section shall occur no later than the end of the Congress which is in session on the fourth anniversary of the date of the Governor's certification provided for under section 2(d), or as may be otherwise provided in such legislation.

S. 712

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(1) the United States of America recognizes the principle of self-determination and other applicable principles of international law with respect to Puerto Rico; and

(2) the United States is committed to a process of consultation and negotiation with the people of Puerto Rico leading to a referendum on the issue of political status to be conducted in a fair and equitable manner.

TITLE I

SEC. 2. REFERENDUM.

(a) IN GENERAL.—An island-wide referendum shall be held in Puerto Rico in which qualified voters of the Commonwealth of Puerto Rico shall be presented a choice of three status options for Puerto Rico as follows:

(1) statehood;

(2) independence; or

(3) commonwealth

as set forth in titles II, III, and IV of this Act.

(b) DATE OF REFERENDUM.—The first referendum shall occur on ———, 1991, or on a date as may be mutually agreed by the three principal political parties, and during the summer of calendar year 1991.

(c) RETURNS OF REFERENDUM.—The returns of the referendum held under this Act shall be made to the Governor of Puerto Rico, who shall cause them to be canvassed in the manner provided by law for the canvass of votes cast in general elections in the Commonwealth of Puerto Rico. If there is not a majority in favor of one of the three options, then there shall be, on ———, 1991, or on a date as may be mutually agreed by the three principal political parties, and during the summer of calendar year 1991, a runoff referendum between the two status options which had received the largest number of votes. Such referendum shall also include an option of "None of the Above". The Governor shall certify to the President and to the Congress of the United States that decision of the people of Puerto Rico which received a majority of the votes cast, if a majority is obtained.

(d) APPLICABLE ELECTION LAWS.—The election laws of the Commonwealth of Puerto Rico shall apply to the referendum held under this Act.

(e) Upon the effective date of this Act, the status option which has been certified by the Governor pursuant to subsection (c), shall go into effect in accordance with the appropriate title of this Act.

TITLE II—STATEHOOD

Whereas upon admission as a state, Puerto Rico would cease being a territory of the United States.

Whereas the Commonwealth of Puerto Rico would be admitted as a sovereign state of the Union, with its current Constitution, on an equal footing and in true permanent union with the other fifty states.

Whereas the new State of Puerto Rico shall be known as the Commonwealth of Puerto Rico; in Spanish it shall be known as "Estado Soberano de Puerto Rico".

Whereas admission to the Union has historically been a flexible and varied process which has been adapted to the individual circumstances of each new state.

Whereas Congress has the constitutional power to facilitate the admission of new states.

Whereas Congress is willing to provide for a smooth process of adjustment from the tax structure of the territorial status to the federal fiscal system.

Whereas the Commonwealth of Puerto Rico assured of its reserved state right under the Constitution to continue to maintain both Spanish and English as its official languages, as well as of its right to preserve and enhance its particular cultural characteristics.

Whereas statehood creates the only permanent union with the United States that is consistent with the "more perfect union" of equal states established by the United States Constitution.

Whereas statehood entails fundamental political and economic betterment for the Commonwealth of Puerto Rico.

Whereas statehood entails economic self-reliance and social justice, including parity for its residents in those aspects of federal legislation that cover the residents of the several states.

Whereas statehood means political equality, and, specifically, the right to participate in the process of election of the President and Vice-President of the United States as well as the right to elect two (2) U.S. Senators and the corresponding number of members of the U.S. House of Representatives.

Whereas statehood means that all benefits and protections of the United States Constitution would be fully bestowed on the People of the Commonwealth of Puerto Rico together with the guarantee of full protection by the Federal judicial system.

Whereas statehood entails the immediate full extension of federal entitlements and legislation providing parity for the residents of Puerto Rico in all Federal programs.

Whereas the Commonwealth will assume all responsibilities of a State of the Union.

Whereas statehood is a political formula recognized by the international community through Resolution 1541 (XV) of the General Assembly of the United Nations and through Resolution 1469 (XIV) of that body, which has adopted upon the admission of the new states of Alaska and Hawaii.

Whereas statehood embodies the highest degree of autonomy and sovereignty in a true permanent union with the several states: Therefore: be it

Resolved:

SEC. 2. Subject to the provisions of this Act, and upon issuance of the proclamation required by section 7 of this Act, the Commonwealth of Puerto Rico (hereinafter referred to also as "the state") is declared to be a State of the United States of America, is declared admitted into the Union on an equal footing with the other States in all respects whatever, in compliance with the democratic mandate of the plebiscite held on — for the resolution of Puerto Rico's final political status. The Constitution adopted by a vote of the People of Puerto Rico in the election held on June 4, 1951, has been found by Congress to be republican in form and in conformity with the Constitution of the United States and the principles of the Declaration of Independence, and was accepted, ratified, and confirmed, through Public Law 447 of the 82nd Congress, March 3, 1952.

CONSTITUTION

SEC. 3. The constitution of the Commonwealth of Puerto Rico shall always be republican in form and shall not be repugnant to the Constitution of the United States and the principles of the Declaration of Independence. The current Constitution of the Commonwealth of Puerto Rico is hereby accepted as the constitution of the state.

TERRITORY AND BOUNDARIES

SEC. 4. Subject to the provisions of this section, the State shall consist of all of the territory, together with the territorial waters, of the Commonwealth of Puerto Rico.

STATE TITLE TO LANDS AND PROPERTY

SEC. 5. (a) The State and its political subdivisions shall have and retain title to all property, real and personal, which it currently holds.

(b) Any lands and other properties that, as of the date of admission of Puerto Rico into the Union, are set aside pursuant to law for the use of the United States under an (A) Act of Congress, (B) Executive order, (C) proclamation of the President, or (D) proclamation of the Governor of the Commonwealth of Puerto Rico, shall remain the property of the United States; except that the Commonwealth of Puerto Rico (the state) shall have the exclusive right to explore, exploit, lease, possess and use all seabed, natural and mineral resources lying within the 200 mile economic zone continental shelf boundary around the waters of the

Archipelago of Puerto Rico; however, all other rights of sovereignty in regards to the continental shelf and waters, shall belong to the United States except those already vested in Puerto Rico.

(c) Not later than five years after the date of admission of the Commonwealth of Puerto Rico as a state of the Union, each Federal agency having control over any land or property that is retained by the United States pursuant to this section shall submit a report to the President and the Congress concerning the need for such land or property. If the President determines that any such land or property is no longer needed by the Federal Government, it shall be forthwith conveyed to the Commonwealth of Puerto Rico.

(d) All laws of the United States reserving to the United States the free use or enjoyment of property which vests in or is conveyed to the Commonwealth of Puerto Rico or its political subdivisions pursuant to this section or reserving the right to alter, amend, or repeal laws relating thereto, shall cease to be effective upon the admission of the state into the Union.

COMPACT WITH THE UNITED STATES; CLAIMS TO FEDERAL LANDS AND PROPERTY

SEC. 6. (a) As a compact with the United States, the Commonwealth and its people recognize all rights and titles to any lands or other property not granted or conferred to the Commonwealth or its political subdivisions by or under the authority of this Act, the right or title to which is now held by the United States or subject to disposition by the United States.

(b)(1) Nothing contained in this Act shall recognize, deny, enlarge, impair, or otherwise affect any claim against the United States, and any such claim shall be governed by applicable laws of the United States.

(2) Nothing in this Act is intended or shall be construed as a finding, interpretation, or construction by the Congress that any applicable law authorizes, establishes, recognizes, or confirms the validity or invalidity of any such claim, and the determination of the applicability of any law to any such claim shall be unaffected by anything in this Act.

(c) No taxes shall be imposed by the State upon any lands or other property now owned or hereafter acquired by the United States.

(d) Notwithstanding any other provision of this Act or any other provision of law, in compensation for the lands now held by the United States, the Congress shall appropriate federal payments to be assigned to the Commonwealth of Puerto Rico, in the amount of —— annually, during the next —— years, for the sole purpose of assisting the state in the payment of its present public debt and liabilities.

ELECTIONS AND ADMISSION REFERENDUM

SEC. 7. (a)(1) Not more than sixty days after the date of certification by the Governor of the Commonwealth of Puerto Rico as provided by this act, the President of the United States shall certify the admission of Puerto Rico into the Union to the Governor of the Commonwealth of Puerto Rico. Not more than thirty days after such certification, the Governor of the Commonwealth of Puerto Rico shall issue a proclamation for the election of two United States Senators and the corresponding number of the United States Representatives in Congress as provided in this act. The Governor of the State shall certify the election of the Senators and Representatives in the manner required by law. The Senators and Representatives elected shall be entitled to be admitted to seats in Congress and to all the rights and privileges of Senators and Representatives of the other States in the Congress of the United States. The office of Resident Commissioner shall cease to exist upon the swearing in of the first member of the House so elected.

(2) In the first election of Senators from the State (pursuant to Section 7(a)(1)) the two senatorial offices shall be separately identified and designated, and no person may be a candidate for both offices. No such identification or designation of either of the two senatorial officers shall refer to or be taken to refer to the terms of such offices, or in any way impair the privilege of the Senate to determine the class to which each of the Senators elected shall be assigned.

(b) Election returns shall be made and certified in such manner as provided by the electoral laws of Puerto Rico and in such a manner as the Commonwealth of Puerto Rico may prescribe. The Governor of the Commonwealth of Puerto Rico shall certify the results of such elections to the President of the United States.

(2) The constitution of the Commonwealth of Puerto Rico, ratified by the people at the referendum held on June 4, 1951, shall become the Constitution of the State of Puerto Rico. The new State of Puerto Rico shall be known as The Commonwealth of Puerto Rico.

(3) Any legal dispute or controversy arising out of the electoral processes conducted under this act shall be adjudicated by the United States District Court for the District of Puerto Rico, and the Appellate Federal Court System. The Courts of the Commonwealth of Puerto Rico shall not have jurisdiction to entertain any suit, appeal, writ of revision or legal action, arising out of these elections, plebiscites and referendums.

(4) The individuals holding legislative, executive, and judicial offices of the Commonwealth of Puerto Rico, shall continue to discharge the duties of their respective offices. Upon the issuance of the proclamation by the President of the United States and the admission of the Commonwealth of Puerto Rico as a state of the Union, the officers elected or appointed under the provisions of the constitution and laws of the Commonwealth shall proceed to exercise all the functions pertaining to their offices in, under, or by authority of the government of the State, as provided by the constitution and laws of the State.

SEC. 8. The Commonwealth of Puerto Rico upon its admission into the Union shall be entitled to — Representatives, until the taking effect of the next reapportionment, and such Representatives shall be in addition to the membership of the House of Representatives as now prescribed by law.

LAWS IN EFFECT

SEC. 9. Upon admission of the Commonwealth of Puerto Rico into the Union, all of the territorial laws then in force in the Commonwealth of Puerto Rico shall be and continue in force and effect throughout the state, until amended, modified or repealed by the Commonwealth. All of the laws of the United States shall have the same force and effect within the State as elsewhere in the United States.

CONTINUATION OF SUITS

SEC. 10. (a) No writ, action, indictment, cause, or proceeding pending in any court of the Commonwealth of Puerto Rico, shall abate by reason of the admission of the Commonwealth of Puerto Rico into the union, but shall proceed within such appropriate state courts as are now established under the Constitution of the Commonwealth, or shall continue in the United States District Court for the District of Puerto Rico, as the nature of the case may require.

(b) All civil causes of action and all criminal offenses which shall have arisen or been committed prior to the admission of the Commonwealth, but as to which no writ, action, indictment, or proceeding shall be pending at the date of such admission, shall be subject to prosecution in the appropriate state courts or in the United States District Court for the District of Puerto Rico in like manner, to the same extent, and with like right of appellate review, as if such State had been created and such State courts had been established prior to the accrual of such causes of action or the commission of such offenses. The admission of the State shall effect no change in the procedural or substantive laws governing causes of action and criminal offenses which shall have arisen or been committed, and any such criminal offenses as shall have been committed against the laws of the Commonwealth of Puerto Rico, shall be tried and punished by the appropriate courts of the State, and any such criminal offenses as shall been committed against the laws of the United States shall be tried and punished in the United States District Court for the District of Puerto Rico.

APPEALS

SEC. 11. Parties shall have the same rights of judicial review of final decisions of the United States District Court for the District of Puerto Rico or the Supreme Court of the Commonwealth of Puerto Rico, in any case finally decided prior to the admission of the State of Puerto Rico into the Union, whether or not an appeal therefrom shall have been perfected prior to such admission. The United States Court of Appeals for the First Circuit and the Supreme Court of the United States, shall have the same jurisdiction in such cases as by law provided prior to the admission of the State into the Union. Any mandate issued subsequent to the admission of the State, shall be to the United States District Court for the District of Puerto Rico or a court of the State, as appropriate. Parties shall have the same rights of appeal from and appellate reviews of all orders, judgments, and decrees of the United States District Court for the District of Puerto Rico and of the Supreme Court of Puerto Rico, in any case pending at the time of admission of the State into the Union, and the Supreme Court of the Commonwealth of Puerto Rico and the Supreme Court of the United States shall have the same jurisdiction therein, as by law provided in any case arising subsequent to the admission of the State into the Union.

MILITARY LANDS

SEC. 12. (a) Subject to the subsection (b) and notwithstanding the admission of the Commonwealth of Puerto Rico into the Union, authority is reserved in the United States for the exercise by the Congress of the United States of the power of exclusive legislation, as provided by article I, section 8, clause 17, of the Constitution of the United States, in all cases whatsoever over such tracts or parcels of lands as, immediately prior to the admission of the State, are controlled or owned by the United

States and held for defense or Coast Guard purposes.

(b)(1) The Commonwealth of Puerto Rico shall always have the right to serve civil or criminal process within such tracts or parcels of land in suits or prosecutions for or on account of rights acquired, obligations incurred, or crimes committed within the State but outside of such tracts or parcels of land.

(2) The reservation of authority in the United States for the exercise by the Congress of the United States of the power of exclusive legislation over such lands shall not operate to prevent such lands from being a part of the Commonwealth of Puerto Rico, or to prevent the State from exercising over or upon such lands, concurrently with the Federal government, any jurisdiction which it would have in the absence of such reservation of authority and which is consistent with the laws hereafter enacted by the Congress pursuant to such reservation or authority.

(3) The power of exclusive legislation shall vest and remain in the United States only so long as the particular tract or parcel of land involved is controlled or owned by the United States and used for defense or Coast Guard purposes, except that the United States shall continue to have sole and exclusive jurisdiction over such military installations as have been or may be determined to be critical areas as designated by the President of the United States or the Secretary of Defense.

UNITED STATES NATIONALITY

SEC. 13. No provision of this Act shall operate to confer United States nationality, to terminate nationality lawfully acquired, or to restore nationality terminated or lost under any law of the United States or under any treaty to which the United States is or was a party.

REPEAL AND AMENDMENT OF INCONSISTENT LAWS

SEC. 14. All Acts or parts of Acts in conflict with the provisions of this Act, whether passed by the Legislature of the Commonwealth of Puerto Rico or by Congress, are hereby repealed or amended to conform with the provisions of this act.

NATIONAL FEDERAL LANDS AREA

SEC. 15. (a) The Federal Lands reserved for the United States government referred to in section 4 are those now held by the Federal government.

ECONOMIC ADJUSTMENT FROM TERRITORY TO STATE

SEC. 16. Congress adopts the following economic provisions to expedite the adjustment of the Commonwealth of Puerto Rico from the tax structure of the territory to the fiscal and economic system of the state.

(a) Provisions of the Internal Revenue Code concerning Federal Income Taxes shall immediately apply to Puerto Rico, provided that the proceeds of said taxes shall be transferred to the Treasury of Puerto Rico in an amount to be diminished by — % of the monies collected each year for a — year period. Existing income tax laws of the Commonwealth shall stand repealed upon admission of the state.

(b) Provision shall be made by Congress so that economic and fiscal exceptions of the Internal Revenue Code, already granted, such as those allowed under Section 936 of said code, shall remain in full effect for — years and will be smoothly and gradually phased out thereafter, in such a way as to eliminate the prevalent uncertainty which impairs an orderly planning and which impedes the fulfillment of the job creation requirements for such credit, thus promoting investments and higher rate of employment, which will in turn reduce governmental and individual dependence while enhancing the economy of the state and the fiscal soundness of its government.

(c) Pursuant to Congress' powers under the Constitution, an omnibus act with multiple provisions shall be enacted to ensure that the people of Puerto Rico attain equal social and economic opportunities with the residents of the several states. Said omnibus act shall also provide for measures necessary to assure appropriate continuity in the treatment given to Puerto Rico as a principal coffee producer and in the treatment of alcohol excise taxes; and shall also continue to provide for the transfer to the Treasury of Puerto Rico, for a period of — years, of the proceeds of Federal customs and duties levied on imports coming from foreign sources to Puerto Rico.

[Detailed economic provisions, addressing the above proposals among others, will be furnished to the Committee as soon as final technical work is completed.]

TERMS AND CONDITIONS

SEC. 17. The Commonwealth of Puerto Rico is assured of its reserved state right under the Constitution to continue to maintain both Spanish and English as its official languages, as well as of its right to preserve and enhance its rich Hispanic cultural heritage. However, all records and proceedings of all agencies, departments, offices and courts of the United States Federal government operating in Puerto Rico, shall continue to be conducted and kept in the English language as heretofore. The Commonwealth of Puerto Rico's present Official Languages Act, 1 L.P.R.A. 51-55 (Laws of Puerto Rico, 1902), making Spanish and English official state languages is a state prerogative protected by the Constitution of the United States.

SEC. 18. The State shall never enact any law restricting or abridging the right of suffrage on account of race, color, previous condition of servitude, or ability to read, write, speak, and understand any language sufficiently; and the rights, privileges and immunities of citizens of the United States shall be respected in Puerto Rico according to the provisions of paragraph 1 section 2 of article IV of the Constitution of the United States.

TITLE III—INDEPENDENCE

Subtitle 1.—Statement of Purposes

First: The United States hereby recognizes that Puerto Rico is historically, socially and culturally a Latin American nation which has been under the sovereignty of the United States since 1898.

Second: The United States recognizes Puerto Rico's inalienable right to independence.

Third: In order to best promote Puerto Rico's development according to its needs and resources and within the framework of present day interdependence, the United States recognizes Puerto Rico's sovereignty as a means to provide Puerto Rico with the political powers and the flexibility necessary to achieve this objective.

Fourth: In order to insure lasting friendship, equitable economic relations, and the gradual elimination of the burden which Puerto Rico's extreme economic dependence represents for both nations, the United States declares its intention to guarantee all necessary conditions for a rational and mutually advantageous transition before and after independence.

Fifth: It is the purpose of this Title to recognize the independence of Puerto Rico as a sovereign and democratic nation, to provide the conditions necessary for an orderly transition from the present status to independence, and to guarantee the legitimate interests of both Puerto Rico and the United States.

Subtitle 2.—Transition Process Prior to Proclamation of Independence

SEC. 2.1. CONSTITUTIONAL CONVENTION.

(a) Should the results of the referendum provided for in Title I of this Act favor independence as a status alternative for Puerto Rico, the Legislative Assembly of the Commonwealth of Puerto Rico shall provide for the election of delegates to a Constitutional Convention to formulate and draft a Constitution for the Republic of Puerto Rico. The election of delegates must be held within six months after the celebration of the aforementioned referendum.

(b) Those qualified to vote in the election of delegates of the Constitutional Convention shall be: (1) all persons born and residing in Puerto Rico; (2) all persons residing in Puerto Rico and one of whose parents was born in Puerto Rico; (3) all persons who at the time of the adoption of this Act shall have resided in Puerto Rico for a period of twenty years or more; and (4) all persons who established their residence in Puerto Rico prior to attaining voting age and still reside in Puerto Rico; and (5) spouses of all persons included in (1), (2), (3) and (4) above.

(c) The laws of the Commonwealth of Puerto Rico relating to additional voter qualifications and the electoral process shall apply to this election.

(d) The Constitutional Convention shall meet within three (3) months of the election of delegates at such time and place as the Legislative Assembly of the Commonwealth of Puerto Rico shall determine.

(e) The Constitutional Convention shall exercise jurisdiction over all of the territory of Puerto Rico ceded to the United States by Spain by virtue of the Treaty of Paris the 10th day of December 1898.

SEC. 2.2. CHARACTER OF THE CONSTITUTION.

(a) The Constitutional Convention mandated under the previous Section shall formulate and draft a Constitution establishing a republican form of government which shall guarantee the protection of fundamental human rights.

(b) The fundamental human rights guaranteed by the aforementioned Constitution shall include such rights as due process and equal protection under the law, freedom of speech, press, assembly, association, and religion, as well as the rights of the accused, and economic, social and cultural rights such as the right to education, adequate nutrition, health services, adequate housing, and work or employment.

SEC. 2.3. RATIFICATION OF THE CONSTITUTION.

(a) The Constitution elaborated by the Constitutional Convention shall be submitted to the people of Puerto Rico for its ratification or rejection.

(b) The Legislative Assembly of the Commonwealth of Puerto Rico shall call for a special election for such ratification or rejection, to be held within three (3) months of the adoption of the Constitution elaborated by the Constitutional Convention.

(c) The special election providing all qualified voters the opportunity to cast a vote for

or against the proposed Constitution shall be held in the manner prescribed by the Legislative Assembly of the Commonwealth of Puerto Rico.

(d) Those qualified to vote in this election shall be those possessing the qualifications established in Section 2.1 of this Title.

SEC. 2.4. ELECTION OF OFFICERS OF THE REPUBLIC.

(a) Within thirty (30) days of the ratification of the Constitution as provided for by Section 1.3 of this Title, the Governor of the Commonwealth of Puerto Rico shall issue a proclamation calling for the election of such officers of the Republic of Puerto Rico as may be required by the ratified Constitution.

(b) The election of officers of the Republic shall be held not later than six (6) months after the date of ratification of the Constitution.

(c) The aforesaid election shall be held in accordance with the procedures and requirements established in the Constitution of the Republic of Puerto Rico.

(d) The Governor of the Commonwealth of Puerto Rico shall certify the results of the election to the President of the United States.

SEC. 2.5. JOINT TRANSITION COMMISSION.

(a) A Joint Transition Commission shall be appointed in equal numbers by the President of the United States and the Constitutional Convention of Puerto Rico as soon as the favorable results for the independence option in the referendum provided for in Title I of this Act are announced.

(b) The Joint Transition Commission shall be responsible for expediting the orderly transfer of all functions currently exercised by the Government of the United States in Puerto Rico, or in relation to Puerto Rico; including the recommendation of appropriate legislation.

(c) Any necessary task forces under the aegis of the Joint Transition Commission shall be constituted in the same manner as the Commission.

(d) The Government of the Commonwealth of Puerto Rico and the agencies of the Government of the United States shall collaborate with the Joint Transition Commission and subsequently with the new officers of the Republic of Puerto Rico, to provide for the orderly transfer of the functions of government.

(e) All members representing the Puerto Rican side on the Joint Transition Commission or on any task force shall be bona-fide supporters of Puerto Rican independence.

SEC. 2.6. RESOLUTION OF CONTROVERSIES PRIOR TO INDEPENDENCE.

(a) From the date of the referendum provided for in Title I of this Act, and until the date of proclamation of independence, the Supreme Court and all inferior courts of the United States shall have no jurisdiction over any case or controversy arising from the operation of this Act.

(b) Any question arising from the operation of this Act shall be referred to the Joint Transition Commission established in Section 2.5 for disposition through negotiation. Should the Commission be unable to reach a negotiated solution to a question, it shall submit all points in question to international arbitration.

Subtitle 3.—Proclamation of Independence

SEC. 3.1. PROCLAMATION BY THE PRESIDENT OF THE UNITED STATES AND THE HEAD OF STATE OF THE REPUBLIC OF PUERTO RICO.

(a) Not later than one month after the official certification of the elected officers of the Republic of Puerto Rico under Section 2.4, the President of the United States shall by proclamation withdraw and surrender all rights of possession, supervision, jurisdiction, control or sovereignty then existing and exercised by the United States over the territory and people of Puerto Rico, and shall furthermore recognize on behalf of the United States of America the independence of the Republic of Puerto Rico and the authority of the government instituted by the People of Puerto Rico under the Constitution of their own adoption. The proclamation shall state that the effective date of withdrawal of the sovereignty of the United States and recognition of independence shall be the same as the date of the proclamation of independence, as provided in subsection (c).

(b) The President of the United States shall forward a copy of the proclamation issued by him to the presiding officer of the Constitutional Convention of Puerto Rico within a week after signature.

(c) Within one (1) week after receiving the Presidential proclamation and with the advice of the officer elected as head of state of the Republic, the presiding officer of the Constitutional Convention shall determine the date in which the Government of the Republic shall take office, and shall so notify the Governor of the Commonwealth of Puerto Rico and the President of the United States.

(d) Upon taking office, the head of state of the Republic of Puerto Rico shall immediately issue a proclamation declaring: (1) that Puerto Rico has become a sovereign, independent nation; (2) that the Constitution of the Republic is thenceforth in effect; (3) that the Commonwealth of Puerto Rico and its Government have ceased to exist; and (4) that the Government of the Republic will henceforth exercise its powers and duties under its Constitution.

Subtitle 4.—Effects of the Proclamation of Independence

SEC. 4.1. ON LEGAL AND CONSTITUTIONAL PROVISION.

(a) Upon the proclamation of independence as provided in this subtitle, and except as otherwise provided in this title or in any separate agreements hereinafterward concluded between the United States and the Republic of Puerto Rico,

(1) all property, rights and interests which the United States may have acquired over Puerto Rico by virtue of the Treaty of Paris of 1898, and thereafter by cession, purchase, or eminent domain, with the exception of such land and other property, rights, or interests as may have been sold or otherwise legally disposed of prior to the enactment of this Act, shall vest ipso facto on the Republic of Puerto Rico;

(2) all laws of the United States applicable to the Commonwealth of Puerto Rico immediately prior to the proclamation of independence shall no longer apply in the Republic of Puerto Rico; and

(3) all laws and regulations of the Commonwealth of Puerto Rico in force immediately before the proclamation of independence shall continue in force and shall be read with such modifications, adaptions, qualifications and exceptions as may be necessary to bring them into conformity with the Constitution of the Republic of Puerto Rico until such time as they shall be replaced with the new legislation, provided that any provisions that may be incompatible with the sovereignty of the Republic of Puerto Rico shall be deemed invalid.

SEC. 4.2. ON JUDICIAL PRONOUNCEMENTS.

(a) The Republic of Puerto Rico shall recognize and give effect to all orders and judgments rendered by United States or Commonwealth courts prior to the proclamation of independence pursuant to the laws of the United States then applicable to the Commonwealth of Puerto Rico.

(b) All judicial proceedings pending in the courts of the Commonwealth of Puerto Rico prior to the proclamation of independence shall be continued in the corresponding courts under the Constitution of the Republic of Puerto Rico.

(c) Upon the proclamation of independence, the judicial power of the United States shall no longer extend to Puerto Rico. All proceedings pending in the United States District Court for the District of Puerto Rico shall be transferred to the corresponding Puerto Rican court of competence under the Constitution of the Republic of Puerto Rico for disposition in conformity with laws applicable at the time when the controversy in process arose. All proceedings pending in the United States Court of Appeals for the First Circuit, or in the Supreme Court of the United States, which may have initiated in the courts of the Commonwealth or in the United States District Court for the District of Puerto Rico shall continue until their final disposition and shall be submitted to the competent authority of the Republic of Puerto Rico for proper execution; provided that neither the United States nor any of its officers is a party, in which case any final judgment shall be properly executed by the competent authority of the United States.

Subtitle 5.—Transition Aspects Subsequent to Proclamation of Independence

SEC. 5.1. CITIZENSHIP AND MIGRATION.

(a) Every person who, having been born in Puerto Rico, is on proclamation of independence a citizen of the United States and a resident of Puerto Rico, shall become a citizen of the Republic of Puerto Rico on that date.

(b) Every person born in Puerto Rico after proclamation of independence, and subject to the jurisdiction thereof, shall be a citizen of the Republic of Puerto Rico.

(c) Every person born in Puerto Rico but not a resident thereof on proclamation of independence shall become a citizen of the Republic of Puerto Rico upon residing for six months and taking the oath of allegiance.

(d) Every person not born in Puerto Rico before or after proclamation of independence, and residing therein, shall become a citizen of the Republic of Puerto Rico if either of his parents becomes a citizen of the Republic of Puerto Rico pursuant to subsections (a), (b), and (c).

(e) Every person not born in Puerto Rico but married to a citizen of the Republic of Puerto Rico before or after proclamation of independence shall become a citizen of the Republic upon residing in Puerto Rico for six months and taking the oath of allegiance.

(f) All other persons not specified in subsections (a), (b), (c), (d), and (e) but residing in Puerto Rico shall be granted citizenship in accordance with the Constitution and laws of the Republic.

(g) (1) Every person who is a citizen of the United States and a citizen of the Republic of Puerto Rico in accordance with subsections (a), (b), (c), (d), (e), and (f) shall retain his United States citizenship and all rights, privileges, benefits and obligations pertain-

ing thereto in an equal footing with all other United States citizens, provided that while residing in Puerto Rico that person shall not be subject under United States laws to compulsory military registration and service or to any other condition or obligation contrary to the sovereignty of the Republic of Puerto Rico.

(2) Every person specified in subsection (g) (1) shall retain his Puerto Rican citizenship and all rights, privileges and benefits pertaining thereto in an equal footing with all other Puerto Rican citizens, and shall retain all of his obligations as a Puerto Rican citizen, except that while residing in the United States that person shall not be subject under Puerto Rican laws to compulsory military registration and service or to any other condition or obligation contrary to the sovereignty of the United States.

(h) Every citizen of the United States who becomes a citizen of the Republic of Puerto Rico in accordance with subsections (a), (b), (c), (d), (e), and (f), can elect: (1) to relinquish his United States citizenship in accordance with United States laws; or (2) to relinquish his Puerto Rican citizenship in accordance with the laws of the Republic.

(i) United States citizens residing in Puerto Rico, but not citizens thereof shall be entitled to the fundamental rights and freedoms accorded to all persons in Puerto Rico but shall not be eligible for political office and shall not be entitled to vote. They shall also be entitled to be naturalized as citizens of the Republic in accordance with nondiscriminatory laws of the Republic.

(j) Citizens of the Republic of Puerto Rico residing in the United States but not citizens thereof shall be entitled to the fundamental rights and freedoms accorded to all persons in the United States but shall not be eligible for political office and shall not be entitled to vote in the United States. They shall also be entitled to be naturalized as citizens of the United States in accordance with nondiscriminatory laws of the United States.

(k) Citizens of the Republic of Puerto Rico who are not United States citizens may, for a period of twenty-five years after proclamation of independence, enter into, lawfully engage in occupations, and establish residence as immigrants in the United States. These immigrants may be subject to nondiscriminatory limitations as provided for by laws and regulations of the United States.

(l) Every resident of the United States born in Puerto Rico but not a citizen thereof, and his sons and daughters, may enter into, lawfully engage in occupations, and establish residence as immigrants in Puerto Rico subject to nondiscriminatory laws and regulations of the Republic.

(m) Every person lawfully admitted for permanent residence within the United States and who is a resident of Puerto Rico on proclamation of independence shall continue as resident and shall be entitled to be naturalized as citizens of the Republic of Puerto Rico in accordance with nondiscrimatory laws of the Republic.

SEC. 5.2. DEFENCE.

(a) The United States shall collaborate with the Republic of Puerto Rico towards the ultimate goal of disarmament, peace and international relations based on the principles of equality, mutual respect and interdependence. Furthermore, the United States recognizes the right of the People of Puerto Rico to strive towards the total demilitarization of its territory, with the purpose of gearing all its efforts and resources to the goals of economic and social development.

(b) The Republic of Puerto Rico shall be closed to any and all military forces of foreign nations. In furtherance of this policy, and to expedite the orderly and gradual transfer of properties presently under the control of the United States for military purposes in Puerto Rico, the governments of the United States and the Republic of Puerto Rico shall prescribe a separate agreement for a reasonable and mutually convenient period of transition.

(c) Negotiations leading to the eventual agreement provided in paragraph (b) shall begin in a special task force designated for such purposes by the President of the United States and the Constitutional Convention of Puerto Rico pursuant to Section 2.5 of this Title. Should this special task force be unable to reach an agreement prior to the proclamation of independence, the negotiations shall continue between representatives appointed by the United States and the Republic of Puerto Rico, until such time as an agreement may be reached.

(d) The Republic of Puerto Rico shall be a nuclear free zone. The United States and the Republic of Puerto Rico shall adhere and fully comply with the provisions of the Treaty for the Proscription of Nuclear Weapons in Latin America of 1967 (Treaty of Tlatelolco).

(e) The government of the Republic of Puerto Rico shall, as soon as may be practicable, seek integration into the Inter-American defense system by subscribing to the provisions of the Treaty of Mutual Defense of 1948 (Treaty of Rio de Janeiro).

SEC. 5.3. TRADE RELATIONS.

(a) Until proclamation of independence: (1) no trade barriers or quotas of any kind shall be imposed on merchandise and articles going into Puerto Rico from the United States or coming into the United States from Puerto Rico; and (2) trade relations shall be as currently provided by law.

(b) During the twenty years following the proclamation of independence, the United States shall not impose trade barriers or quotas of any kind on merchandise and articles coming into the United States from the Republic of Puerto Rico.

SEC. 5.4. TAXATION

(a) The tax credit currently allowed under Section 936 of the U.S. Internal Revenue Code shall remain in full effect upon proclamation of independence and during the fifteen years thereafter with respect to income derived by corporations that begin to fulfill or continue to fulfill the current requirements for such credit.

(b) On the tenth year after proclamation of independence, a Joint Commission on Taxation shall be appointed in equal numbers by the President of the United States and the head of state of the Republic of Puerto Rico to study and report on changes to be made, if any, to the tax credit allowed under subsection (a) at the expiration of the fifteen-year period. If no agreement is reached with respect to such changes, then all earning repatriations received by residents of the United States shall be subject to taxation by the United States, beginning on the sixteenth year after the proclamation of independence, at a rate that shall increase on a straight-line basis by ten percent of the regular United States corporate tax rate each year until it reaches one hundred percent of said regular rate in the twenty-fifth year after the proclamation of independence, provided that a tax credit will be allowed on such earning repatriations pursuant to subsection (e). If the regular corporate tax rate of the United States is changed before said twenty-fifth year, the difference between the rate to which the earning repatriations are subject during the year of said change and the new regular rate shall be divided, if the latter is higher, by the number of years remaining from the year which follows the year of said change until said twenty-fifth year, and the result of such division shall constitute the extent to which the rate applicable to the dividends shall increase every year from the year which follows the years of said change until said twenty-fifth year. If the new regular United States corporate tax rate is lower than the rate to which the earning repatriations are subject during the year of said change, then the new lower rate shall immediately apply to such repatriations. No other change shall occur before the expiration of said twenty-fifth year with respect to income derived by companies subject to this subsection.

(c) With respect to income not subject to subsections (a) or (b), the profits of an enterprise of either nation shall be taxable only in the nation of residence of said enterprise, unless the enterprise carries on business in the other nation through a permanent establishment situated therein. If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other nation but only so much of them as is attributable to that permanent establishment.

(d) Each nation shall have taxing jurisdiction over income earned by individuals who are residents of either nation from sources within its territorial jurisdiction, property situated therein, including transfers of such property by gift or at death, and products consumed therein.

(e) Where a resident of either nation derives income from the other nation, the amount of tax payable in that other nation in respect to that income pursuant to subsections (c) and (d), and the amount of tax payable in the Republic of Puerto Rico that does not exceed for any specific year the amount of tax payable in the United States for that same year pursuant to subsection (b), shall be allowed as a credit against the tax payable in respect to that income in the nation of residence of the taxpayer. A withholding tax on dividends shall be considered a tax on income for these purposes. If the United States amends its laws concerning the provision of tax sparing credits or if the United States reaches an agreement on the provision of a tax sparing credit with any other nation, Puerto Rico shall *ipso facto* be granted the most favorable degree of tax sparing credit allowed under such amended laws or such agreement or agreements.

(f) The determination under this section of the residence of any taxpayer, the source of any income, the situs of any property or any other necessary definitions shall be made according to the terms of a joint treaty for the avoidance of double taxation to be entered into by both nations promptly upon the proclamation of the Republic of Puerto Rico. Negotiations leading to such treaty shall be initiated by a special task force designated pursuant to Section 2.5 of this Title. Until such treaty is executed, such determination shall be made according to the current tax laws of the United States and the Commonwealth of Puerto Rico.

SEC. 5.5. CURRENCY AND FINANCE.

(a) After proclamation of independence, the Republic of Puerto Rico shall have all powers concerning the issuance and control of currency and all powers concerning monetary and financial matters, provided that during the ten years following the proclamation of independence both United States currency and Puerto Rican currency shall be accepted as legal tender in all transactions in Puerto Rico.

(b) The current value of all stock bought by Puerto Rican banks in the Federal Reserve System, Federal Deposit Insurance Corporation and the Federal Home Loan Bank System will be transferred to the Republic of Puerto Rico, including the proportion held by U.S. national, Spanish and Canadian banks that correspond to the level of activities of their/its branches operating in Puerto Rico during the year immediately prior to the proclamation of independence.

(c) The monetary authority of the Republic of Puerto Rico shall establish an integrated system of insurance for deposits in Puerto Rico's financial institutions similar to the Federal Deposit Insurance Corporation. Negotiations will be undertaken with United States monetary authorities to obtain their assistance in the design and establishment of the insurance system, and to determine the extent of financial support to be provided for the system by United States insurance organizations in which Puerto Rico's financial institutions currently participate.

(d)(1) The guarantees provided by the government of the United States to investors in the secondary market for loans, particularly mortgage loans guaranteed by the Government National Mortgage Association (G.N.M.A.), the Federal National Mortgage Association (F.N.M.A.), the Federal Home Loan Mortgage Corporation (F.H.L.M.) and other United States government instrumentalities, shall be maintained for Puerto Rico-originated loans until maturity.

(2) Negotiations shall be carried out to ensure that after proclamation of independence Puerto Rico-originated loans, particularly housing mortgage loans, can continue to be guaranteed by G.N.M.A., F.N.M.A., F.H.L.M. and other United States government instrumentalities and can continue to be sold to investors in the United States secondary markets.

SEC. 5.6. PUBLIC DEBT.

(a) The debts, liabilities and obligations of the Commonwealth of Puerto Rico, its municipalities and instrumentalities, valid and outstanding upon proclamation of independence, shall be assumed by the Republic of Puerto Rico.

(b) After proclamation of independence the United States shall maintain full income tax exemption, as currently provided by law, on interest payments derived from debts of the Commonwealth of Puerto Rico assumed by the Republic, as specified in subsection (a).

(c) During the twenty-five years following the proclamation of independence, the United States shall extend full income tax exemption, as currently provided by law, to interest payments derived from debts of the Republic of Puerto Rico.

SEC. 5.7. INDIVIDUAL RIGHTS TO ECONOMIC BENEFITS AND GRANTS TO THE REPUBLIC OF PUERTO RICO.

(a) All vested rights and benefits which accrue to residents of the Commonwealth of Puerto Rico under the laws of the United States from past services or contributions, such as rights and benefits for veterans or relatives of veterans of the armed forces of the United States, retired government employees, or beneficiaries of old age, disability of survivors' insurance benefits under the Social Security Act, shall not be interrupted after the proclamation of independence but will continue until such time as said rights and benefits are completely extinguished according to the applicable laws of the United States. All services which must be rendered as part of these rights and benefits shall be made available through the Government of the Republic of Puerto Rico in accordance with agreements reached by the two nations.

(b) Notwithstanding the provisions in subsection (a), all contributions made by employees and employers in Puerto Rico to the Social Security System with respect to persons who, upon the proclamation of independence, are residents of the Republic of Puerto Rico and are not yet eligible for old age, disability, or survivors' insurance benefits under the system, shall be transferred to the government of the Republic of Puerto Rico once said government establishes its own social security system. The government of the Republic of Puerto Rico may not use these funds for any purpose other than the establishment and operation of a social security system. Upon the transfer described herein, the obligations of the United States Government under the Social Security Act with respect to such residents of the Republic of Puerto Rico shall cease.

(c) All other Federal transfer payments to individuals and to the Government of the Commonwealth of Puerto Rico shall be maintained in the form of annual block grant to be used discretionally by the government of the Republic of Puerto Rico.

(1) During the ten fiscal years following the proclamation of independence, the annual block grants shall amount to the annual aggregate funding of all programs which currently extend as the Commonwealth of Puerto Roco, or of all programs which shall have been extended to the Commonwealth of Puerto Rico during the fiscal year immediately prior to the proclamation of independence, whichever shall be greater.

(2) The annual block grants shall decrease thereafter on a straight-line basis, at the rate of ten percent each year, beginning on the eleventh fiscal year after the proclamation of independence. At any time during the aforementioned transition period the terms of this subsection may be modified by agreement between the United States and the Republic of Puerto Rico.

Subtitle 6.—Relations Between the United States and the Republic of Puerto Rico

SEC. 6.1. TREATY OF FRIENDSHIP AND COOPERATION.

To insure that all provisions of this Title which shall have effect after the proclamation of independence will in effect be binding, the United States and the Republic of Puerto Rico shall embody said provisions in a treaty of friendship and cooperation.

TITLE IV—COMMONWEALTH

Subpart 1.—Statement of Purposes

In 1952 the Congress of the United States, fully recognizing the principle of government by consent, and the People of Puerto Rico, in the exercise of their right to self-determination, entered upon a compact which established a Commonwealth relationship between Puerto Rico and the United States.

Under the compact the People of Puerto Rico adopted in their own sovereign right their own Constitution and formed an autonomous political community in permanent union with the United States of America based on the irreversible bond of American citizenship.

In 1953 the General Assembly of the United Nations recognized the creation of the Commonwealth and removed Puerto Rico from the list of nonself-governing territories. This association has enabled the People of Puerto Rico to advance their enonomic and social development and to preserve their distinct historical heritage and cultural personality.

As inherent in all political relationships freely entered upon, it was based on the understanding that it would evolve and develop within its particular political nature upon mutually agreeable terms.

It is the purpose of this Act to provide for the enhancement of the Commonwealth relationship by enlarging the scope of self-government of the Puerto Rican people upon the approval of a proposition to that effect by a majority of the eligible voters of the Commonwealth of Puerto Rico.

Subpart 2.—Referendum Proposition: Commonwealth

The referendum proposition regarding Commonwealth, to be presented to, and voted upon, by the People of Puerto Rico shall be as follows: "The Commonwealth association with the United States shall be enhanced to enable the People of Puerto Rico to accelerate their economic and social development and attain maximum cultural and political autonomy within permanent union with the United States based on the irreversible bond of American citizenship, a common defense, a common market, and a common currency."

The proposition will appear in the ballot, in Spanish, as follows: "El Estado Libre Asociado se fortalecerá para acelerar el desarrollo económico y social y alcanzar la máxima autonomía cultural y política del pueblo de Puerto Rico en su unión permanente con los Estados Unidos sobre los pilares de comú defensa, común mercado, común moneda, y el vinculo indisoluble de la ciudadanía americana."

Subpart 3.—Principles of Commonwealth

Section 1 of the Puerto Rico Federal Relations Act, 39 Stat. 954, as amended, 48 U.S.C. Section 731, shall be repealed, and replaced by the following:

"(1) The provisions of this Act shall apply to the Commonwealth of Puerto Rico, an autonomous body politic joined in permanent union with the United States on the basis of common citizenship, common defense, common market and common currency.

(2) The policy of the United States shall be to enhance the Commonwealth relationship enjoyed by the Commonwealth of Puerto Rico and the United States to enable the People of Puerto Rico to accelerate their economic and social development and attain maximum cultural and political autonomy within permanent union with the United States, to secure more equitable participation for the People of the Commonwealth of Puerto Rico in all federal programs that provide grants or services to citizens of the United States as individuals, to secure increased participation by the People of Puerto Rico in U.S. governmental decisions affecting them, to safeguard the distinct cultural identity of the People of Puerto Rico, and to protect the bilateral nature of the relationship between the Commonwealth of Puerto Rico and the United States.

Subpart 4.—Implementation of Federal Policy

Section 9 of the Federal Relations Act, 39 Stat. 954, as amended, 48 U.S.C. Section 734, is amended by inserting at the beginning thereof the term "(a)" and by adding at the end thereof the following:

"(b) A federal statutory law, or provision of such law, is locally inapplicable unless it is consistent with the policy established under subpart 3 and unless such federal statutory law has proper regard for the economic, cultural, ecological, geographic, demographic and other local conditions of the Commonwealth of Puerto Rico. The subsection shall not apply to:

(i) any federal statutory law in the Congress makes a specific finding that there is an overriding national interest that such law should apply to the Commonwealth of Puerto Rico, or

(ii) any federal statutory law, or provision thereof, establishing directly or indirectly grants and/or services to citizens of the United States as individuals, or

(iii) any federal statutory law or provision thereof relating to citizenship, or

(iv) any federal statutory law or provision thereof pertaining to the foreign relations, defense or national security of the United States that requires uniform applicability throughout the United States, including the Commonwealth of Puerto Rico, to achieve its intended purposes,

(c) In addition to judicial determinations of the inapplicability of federal laws under subsection (b), the Governor of the Commonwealth of Puerto Rico may certify from time to time to the Speaker of the House of Representatives, the President of the Senate, and the President of the United States, that a federal statutory law or provision thereof, other than one excluded from the operation of subsection (b), is inconsistent with a Puerto Rican statute and the policy established under subsection (b). Unless, within 60 days of the receipt of such certification, a statute is enacted embodying the finding required under subsection (b)(i), the President shall issue a proclamation that such federal statutory law or provision thereof identified in the Governor's certification is not applicable in Puerto Rico.

(d)(i) The Commonwealth of Puerto Rico may continue to enter in its own name into international cultural, commercial, educational and sports agreements, and other agreements of like nature.

(ii) In addition, the Governor of the Commonwealth of Puerto Rico may take any official action to promote the international interests of Puerto Rico that requires the consent of the United States Government and is not expressly prohibited by law. The Governor of the Commonwealth of Puerto Rico shall provide written notice to the President of the United States of any official action he contemplates taking pursuant to the authorization of this part of this subsection and not pursuant to any other authorization or consent. The President may, within 30 days of his receipt of such notice, sign and transmit to the Governor of the Commonwealth of Puerto Rico a document expressing his determination that the contemplated official action would imperil the foreign relations or national defense of the United States, in which case the authorization hereby granted shall be withdrawn as regards such contemplated official action.

(e) All departments and agencies of the Government of the United States shall be guided by the policy stated in subpart 3 when carrying out their duties under federal statutory laws and federal regulations applicable in or affecting the Commonwealth of Puerto Rico. Every such department or agency shall, before taking any major federal action applicable in or affecting the Commonwealth of Puerto Rico, separately evaluate the consistency of such action with such policy and shall state, in a document accompanying the major federal action, the extent, nature and result of its consideration.

(f) Any rule, as defined in 5 U.S.C. sec. 551(4), issued by an agency, as defined in 5 U.S.C. sec. 551(1), shall apply in the Commonwealth of Puerto Rico only to the extent that is consistent with the policy set forth in Subsection (b). After the effective date of this amendment, when any such rule, other than a rule issued after notice and hearing required by statute, that does not in terms provide that it is inapplicable in the Commonwealth of Puerto Rico is published in the Federal Register, the Governor of the Commonwealth of Puerto Rico may submit to the agency within 30 days in writing (or such longer period as the agency may have prescribed as the period between publication of the rule and its effectiveness) the Governor's determination that such rule is inconsistent with the policy stated in subsection (b). Thereupon, the agency shall reconsider the question of consistency of the rule with the policy stated in Subsection (b) and shall, within 45 days of its receipt of the Governor's determination, publish in the Federal Register its finding either that there is an overriding national interest that the rule be applicable in the Commonwealth of Puerto Rico, in which case the rule, whether or not previously applicable in the Commonwealth of Puerto Rico, shall thereafter be so applicable, or that the rule is not compatible with such policy, in which event such rule, whether or not previously applicable in the Commonwealth of Puerto Rico, shall not be so applicable. Unless the agency for good casue finds that a rule that is the subject of such determination by the Governor of Puerto Rico as is described in this subsection shall be applicable to the Commonwealth of Puerto Rico pending its consideration of such determination, and publishes such finding in the Federal Register, such rule, whether or not previously applicable in the Commonwealth of Puerto Rico, shall not be so applicable pending such consideration. An agency's decision to make a rule applicable or inapplicable in Puerto Rico shall be subject to judicial review.

(g) The laws, rules and regulations of the United States applicable in the Commonwealth of Puerto Rico when the new federal policy is established in accordance with subpart 3 shall continue in effect except to the extent repealed or modified by this Act, or inconsistent with it, and except as hereafter modified, suspended or repealed in accordance with law.

Subpart 5.—Aviation

Section 1102 of the Federal Aviation Act is amended by adding a new Section (e) to read as follow:

"(e)(i). The Government of the Commonwealth of Puerto Rico shall have authority to negotiate on its own behalf air transportation agreements governing the operation of air services by United States and foreign air carriers between the Commonwealth and foreign points. Such agreements may also include authorization of service by United States and foreign air carriers to use any point in the Commonwealth as an intermediate or beyond point on routes between points in the United States and foreign nations for which the carrier holds certificate or foreign air carrier operating authority from the Department of Transportation. Such agreements may authorize such carriers to engage in common carriage of persons and property between such authorized points in the United States and the Commonwealth, notwithstanding the provisions of sections 416(6)(7) and 1108 of this Act.

(ii) Operating rights contained in Commonwealth bilateral air transportation agreements shall be subject to the grant of necessary operating authority by the Department of Transportation and the Administrator. The responsibilities of the Department and the Administrator under subsection (a) of this section shall extend to such bilateral agreements.

(iii) Operating authority issued by the Department of Transportation in implementation of bilateral agreements negotiated by the Government of the Commonwealth of Puerto Rico shall be subject to the President's right of disappoval as contained in section 801(a) of this Act.

(iv) The officials of the Federal Aviation Administration of the United States are directed to assist and cooperate with the appropriate officials of the Commonwealth of Puerto Rico in the implementation of any air transportation agreement entered into pursuant to the authority herein established."

Subpart 6.—Development of Tourism

Section 4a(1) of the Coastal Barrier Resources Act of 1982, 16 U.S.C. Section 3503(a)(1), is amended by adding to the end of the subsection: "Notwithstanding the foregoing, no area within the Commonwealth of Puerto Rico shall be included within the Coastal Barrier Resources System."

Subpart 7.—International Trade

(a) Section 2 of the Act of April 12, 1900, 48 U.S.C. 739, is amended by inserting the following subsection:

"1. To the extent consistent with the international obligations of the United States, the Commonwealth of Puerto Rico is authorized to impose tariff duties on foreign origin products imported into Puerto Rico. Such tariff duties shall be in addition to the general tariff duties applicable to products imported into the customs territory of the United States."

(b) Section 1102 of the Omnibus Trade and Competitiveness Act of 1988, 19 U.S.C. § 2902, is amended by adding a new subsection (e) as follows:

"(e) During the negotiation of any trade agreement affecting Puerto Rico under subsections (a), (b), and (c), the President shall seek the participation of the Commonwealth of Puerto Rico in the negotiation process, and shall consult with the Governor of the Commonwealth of Puerto Rico concerning the potential impact of any proposed tariff rate change on the economy of Puerto Rico.

The Government of the United States shall seek to obtain favorable treatment from foreign countries for exports from the Commonwealth of Puerto Rico and shall encourage other countries to consider Puerto Rico as a developing area for purposes of their respective General Systems of Trade Preferences, and any such regional systems of trade preferences."

Subpart 8.—Maritime

(a) Section 9 of the Puerto Rican Federal Relations Act, 48 U.S.C. Section 744, is

amended to add at the end of the provision: "except that those provisions of the Shipping Act, 1916, administered by the Federal Maritime Commission shall not be applicable to the trade between Puerto Rico and the States of the United States. The Commonwealth of Puerto Rico is authorized to establish its own maritime commission which, when established in accordance with Puerto Rico law shall exercise exclusive jurisdiction over service, rates, fares, and practices governing the trade between Puerto Rico and the states of the United States."

(b) Section 1 of the Shipping Act, 1916, as amended, 46 U.S.C. App. Section 801, is amended by inserting after the second "possession of the United States" and at the end of the provision, the following phrase: "not including the Commonwealth of Puerto Rico."

Subpart 9.—Jurisdiction Over Maritime Resources

(a) Amend Section 3(21) of the Magnuson Fishery Conservation and Management Act, as amended, 16 U.S.C. 1802(21) to read as follows:

"(21) The term 'State' means each of the several States, the District of Columbia, American Samoa, the Virgin Islands, Guam, and any other territory or possession of the United States, but does not include the Commonwealth of Puerto Rico."

(b) Amend the first sentence of Section 2(6) of the Magnuson Fishery Conservation and Management Act, as amended, 16 U.S.C. 1802(6) to read as follows: "The term 'exclusive economic zone' means the zone established by Proclamation Numbered 5030, dated March 10, 1983, except that such zone shall not include zones contiguous to the territorial sea of the Commonwealth of Puerto Rico, provided that the Commonwealth of Puerto Rico shall take no action that would purport to restrict or charge fees to vessels of the United States for the right to fish for highly migratory species of fish within any fishing jurisdiction the Commonwealth of Puerto Rico may establish beyond its territorial waters."

Subpart 10.—Intellectual Property

(a) Section 101 of Title 17 of the United States Code is amended as follows:

(1) By inserting the following new definitions in alphabetical order:

"The 'design of a useful article,' hereinafter referred to in this Title as a 'design,' consists of those aspects or elements of the article, including its two dimensional or three dimensional features of shape and surface, which make up the appearance of the article, and shall include a 'typeface' as herein defined.

A design is 'of Puerto Rican origin' (a) if more than 50 percent of its development costs have been incurred within the Commonwealth of Puerto Rico, irrespective of whether such design is fixed in a useful article in the Commonwealth of Puerto Rico; or (B) if it is first fixed in the Commonwealth of Puerto Rico in a useful ariticle intended to be distributed to the public for commercial purposes.

A 'typeface' consists of a set of letters, numbers, or other symbolic characters, whose forms are related by repeating design elements consistently applied in a notational system, to the extent that the repeating design elements in the combination employed in a notational system are (A) original, (B) distinct, and (C) incorporated in a useful article whose normal use is in composing text or other cognizable combination of characters."

(2) By adding, after the semicolon in the second sentence of the definition of "Pictorial, graphic, and sculptural works," the following: "except where a design of Puerto Rican origin is involved,".

(b) Section 102 of Title 17 of the United States Code is amended by adding a new subsection 102(a)(8) as follows:

"(8) designs of useful articles, where such designs are of Puerto Rican origin."

(c) Section 113 of Title 17 of the United States Code is amended by adding a new subsection (d) as follows:

"(d) in the case of a design of Puerto Rican origin, the scope of exclusive rights in a copyrighted work does not extend to a design that is (i) staple or commonplace, such as a standard geometric figure, familiar symbol, emblem, or motif, or other shape, pattern, or configuration which has become common, prevalent, or ordinary; (ii) different from a design excluded by (i) hereof only in insignificant details or in elements which are variants commonly used in the relevant trades; (iii) dictated primarily by a utilitarian function of the article in which it is fixed; (iv) composed of three-dimensional features of shape and surface with respect to men's, women's, and children's apparel; or (v) fixed in a semi-conductor chip product that is protected under Chapter 9 of this title. Notwithstanding the foregoing, the scope of exclusive rights shall not be limited by the employment in the design of subject matter excluded under (i) through (iii) hereof, if the design is a substantial revision, adaptation, or rearrangement of said subject matter: *provided*, however, that such exclusive rights shall be available for a design employing subject matter protected under Chapters 1 through 8 of this title, or Title 35 of the United States Code, only if such protected subject matter is employed with the consent of the proprietor thereof. Such protection shall be independent of any subsisting protection in subject matter employed in the design, and shall not be construed as securing any rights to subject matter excluded from protection or as extending any subsisting protection."

(d) Chapter 3 of Title 17 of the United States Code is amended by the addition of new Section 306 as follows:

"§ 306. DESIGNS OF PUERTO RICAN ORIGIN

(a) The provisions of Section 302 through 305 of this Chapter shall not apply to copyrights in design of Puerto Rican origin.

(b) Copyright in a design of Puerto Rican origin subsists from its creation and endures for a period of ten years.

(c) A term of copyright provided by this section shall run to the end of the calendar year in which it would otherwise expire."

(e) Section 407 of Title 17 of the United States Code is amended by adding the following language before the semicolon in Section 401(b)(1): ", or, in the case of a design of Puerto Rican origin, the symbol Ⓓ (the letter D in a circle), or the words 'Design Copyright,' or the abbreviation 'Des. Copr.'."

(f) Section 407 of Title 17 of the United States Code is amended by striking the period at the end of Section 407(c) and adding the following language: ",or the work is a design of Puerto Rican origin."

(g) Section 901(a) of Title 17 of the United States Code is amended by adding a new subsection (10) as follows:

"(10) a mask work is 'of Puerto Rican origin' (a) if more than 50% of its development costs have been incurred within the Commonwealth of Puerto Rico, irrespective of whether such mask work is fixed in a computer chip in the Commonwealth of Puerto Rico; or (B) if it is first fixed in the Commonwealth of Puerto Rico in a computer chip intended to be distributed to the public for commercial purposes."

(h) Section 906 of Title 17 of the United States Code is amended by adding at the end thereof the following:

"(c) The limitations on exclusive rights provided under subsections (a) and (b) of this section shall not apply to mask works of Puerto Rican origin."

(i) The foregoing Sections (a) through (h) shall apply after the date of enactment to all acts of manufacture or distribution that occur in the United States after such date, to all acts of importation into the United States that occur after such date, and to all violations of the exclusive rights of the copyright's owner under of Title 17, United States Code that occur after such date.

Subpart 11.—Federal Programs

(a) CONSOLIDATION OF GRANT-IN-AID PROGRAMS.—The Puerto Rico Federal Relations Act is amended by inserting a new Section 59, as follows:

"SEC. 59.—In order to minimize the burden caused by existing application and reporting procedures for grant-in-aid programs available to the Commonwealth of Puerto Rico it is hereby declared to be the policy of the Congress, notwithstanding any provision of law to the contrary, that:

(a) At the request of the Governor of the Commonwealth, any department or agency of the government of the United States which administers any Act of Congress which specifically provides for making grants to the Commonwealth under which payments received may be used by the Commonwealth only for certain specified purposes (other than direct payments to classes of individuals, but not limited to, Aid to Families with Dependent Children, Title IV-A of the Social Security Act, 42 U.S.C. 601; Medicaid, Title XIX of the Social Security Act, 42 U.S.C. 2396; Supplemental Security Income, Title XVI of the Social Security Act, 42 U.S.C. 1381; Foster Care, Title IV-E of the Social Security Act, 42 U.S.C. 670; and Nutrition Assistance Program, 7 U.S.C. 2028) shall, acting through appropriate administrative authorities of such department or agency, consolidate any or all grants made to the Commonwealth for any fiscal year or years;

(b) Any consolidated grant for the Commonwealth shall not be less than the sum of all grants which the Commonwealth would otherwise be entitled to receive for such year;

(c) The funds received under a consolidated grant shall be expended in furtherance of the programs and purposes authorized for any of the grants which are being consolidated, which are authorized under any of the Acts administered by the department or agency making the grant, and which would be applicable to grants for such programs and purposes in the absence of the consolidation, but the Commonwealth shall determine the proportion of the funds granted which shall be allocated to such programs and purposes; and

(d) Each department or agency making grants-in-aid shall, by regulations published in the Federal Register, provide the method by which the Commonwealth may submit: (i) a single application for a consolidated grant for any fiscal year period, but not more than one such application for a consolidated grant shall be required by any de-

partment or agency unless notice of such requirement is transmitted to the appropriate committees of the United States Congress together with a complete explanation of the necessity for requiring such additional applications, and (ii) a single report to such department or agency with respect to each such consolidated grant: *Provided,* That nothing in this paragraph shall preclude such department or agency from providing adequate procedures for accounting, auditing, evaluating, and reviewing any programs or activities receiving benefits from any consolidated grant. The administering authority of any department or agency, in its discretion, may (i) waive any requirement for matching funds otherwise required by law to be provided by the Commonwealth and (ii) waive the requirements that the Commonwealth submit an application or report in writing with respect to any consolidated grant.

(b) EQUITABLE TREATMENT IN SOCIAL PROGRAMS.—The Puerto Rican Federal Relations Act is amended by inserting a new Section 60 as follows:

"SEC. 60.—(a) It is the policy of the United States that the allocations to the Commonwealth of Puerto Rico of the following programs shall achieve full parity with the States of the Union as soon as possible but in no event later than the fifth anniversary of the date of enactment hereof with allocations to States of the Union in the following programs or their successor thereof: Nutrition Assistance Program (NAP); Aid to Families with Dependent Children (AFDC); and Medicaid; and in no event later than the ninth anniversary of the date of enactment hereof with allocations to States of the Union for the Supplemental Security Income (SSI) program, or its successor.

Subpart 12.—Protection of Workers

(a) Amend Section 3 of the Labor Management Act, as amended, 29 U.S.C. § 153(b), by adding after the first sentence:

"; with the exception of cases arising under the jurisdiction of the Commonwealth of Puerto Rico which are hereby exclusively delegated to the Labor Relations Board of Puerto Rico. Decisions of the Labor Relations Board of Puerto Rico may be appealed to the Federal Court of Appeals for the First Circuit.

(b) The Puerto Rican Federal Relations Act is amended by adding a new section 61, as follows:

"Puerto Rico shall maintain exclusive jurisdiction over employee benefits, other than the benefits currently covered under the Fair Labor Standards Act, the Employee Retirement Income Security Act, and the Occupational Safety and Health Act. Puerto Rico's exclusive jurisdiction shall include, but not be limited to Christmas bonuses, sick and vacation pay, workman's compensation, and any other benefits not covered under the current aforementioned federal legislation."

Subpart 13.—Puerto Rico Participation in Federal Appointments

Section 301 of Title 3, is amended by inserting at the beginning thereof the term "(a)" and by adding at the end thereof the following:

"(b) The highest ranking federal officer serving in the Commonwealth of Puerto Rico for any federal department and agency, or division thereof, and any other appointment in the Commonwealth of Puerto Rico subject to Senate confirmation, shall be appointed by the President from a list of eligible candidates recommended by the Governor of the Commowealth of Puerto Rico."

Subpart 14.—Representation in United States Senate.

Section 36 of the Puerto Rican Federal Relations Act, 48 U.S.C. Section 891-895, is amended as follows:

"SUBCHAPTER V. RESIDENT COMMISSIONERS.

SEC. 891. RESIDENT COMMISSIONERS; ELECTION.

The qualified electors of Puerto Rico shall choose a Resident Commissioner to the United States Senate and a Resident Commissioner to the United States House of Representatives at each general election, whose terms of the office shall be four years from the 3d of January following such general election, and who shall be entitled to receive official recognition as such commissioner by all of the departments of the Government of the United States, upon presentation, through the Department of State, of a certificate of election of the Governor of Puerto Rico.

SEC. 892. QUALIFICATIONS OF COMMISSIONERS; APPOINTMENT TO FILL VACANCY.

No person shall be eligible to election as a Resident Commissioner who is not a bona fide citizen of the United States and who is not more than twenty-five years of age, and who does not read and write the English language. In case of a vacancy in either office of Resident Commissioner by death, resignation, or otherwise, the Governor by and with the advice and consent of the Senate of the Commonwealth of Puerto Rico shall appoint a Resident Commissioner to fill the vacancy, who shall serve until the next general election and until his successor is elected and qualified.

SEC. 893. SALARY OF COMMISSIONERS; ALLOWANCES, FRANKING PRIVILEGE.

The Resident Commissioners shall receive a salary payable monthly by the United States. The Resident Commissioners shall be allowed the same sum for stationary and for the pay of necessary clerk hire as is allowed Members of the Senate of the United States and Members of the House of Representatives of the United States. The Resident Commissioners shall be allowed the franking privilege granted Members of Congress.

SEC. 894. SALARY AND TRAVELING EXPENSES; PAYMENT.

The salary and traveling expenses of the Resident Commissioners from Puerto Rico to the United States shall be paid in the same manner as the salaries of the Members of the Senate and the House of Representatives are paid.

SEC. 895. OTHER PRIVILEGES.

The appropriate sections of Title 2 of the United States Codes and any other statutory law that relates to the privileges afforded United States Senators shall be amended to include the Resident Commissioner from the Commonwealth of Puerto Rico to the United States Senate."

Subpart 15.—Judiciary

Section 42 of the Puerto Rico Federal Relations Act, 48 U.S.C. Section 864, is amended by deleting the last sentence and inserting the following paragraph:

"Notwithstanding any other provision of law:

(1) The District Court shall not undertake to construe a theretofore unconstrued Puerto Rico statute or regulation or decide a theretofore undecided point of substantive Puerto Rico nonstatutory law without having given the Supreme Court of Puerto Rico the opportunity to construe such statute or regulation or to rule upon such point of Puerto Rico law.

(2) The proceedings of the U.S. District Court for the District of Puerto Rico shall be conducted in the Spanish language upon the request of any party to the proceedings.

(3) Any issue of law arising under the Puerto Rico Federal Relations Act in any action or controversy brought in federal court shall be certified to the District of Columbia Court of Appeals. In addition, the Commonwealth of Puerto Rico, its departments, agencies and instrumentalities, as well as officials and agents, in both their official and personal capacity, may transfer any action brought against them in the District Court for Puerto Rico to the District Court for the District of Columbia.

Subpart 16.—Passports

(a) Section 211a of Title 22, is amended by adding after the provision "by the chief or other executive officer of the insular possessions of the United States,": "and the Governor of the Commonwealth of Puerto Rico,".

(b) The following new section shall be added to Title 22 as Section 211b;

"SEC. 211b. U.S. PASSPORT OFFICE IN PUERTO RICO

The Secretary of State shall establish a Passport Office for the Caribbean located in San Juan, Puerto Rico and shall authorize the Governor of the Commonwealth to administer such office as required by law."

(c) Section 212 of the Immigration and Nationality Act, 8 U.S.C. Section 1182 is amended by adding a new subsection (m) as follows:

"(M) COMMONWEALTH OF PUERTO RICO; WAIVER OF REQUIREMENTS; NONIMMIGRANT VISITORS

(1) The requirement of paragraph 26(B) of subsection (a) of this section shall be waived by the Attorney General upon the request of the Government of the Commonwealth of Puerto Rico, in the case of an alien applying for admission as a nonimmigrant visitor at the invitation of the Government of the Commonwealth and solely for entry into and stay in the Commonwealth of Puerto Rico for a period not to exceed thirty days. The District Office for Puerto Rico of the Immigration and Nationality Service shall issue the special temporary entry visit visas, as well as other entry visas.

(2) If adequate appropriated funds to carry out this subsection are not otherwise available, the Director of the Immigration and Nationality Service is authorized to accept from the Government of the Commonwealth of Puerto Rico such funds as may be tendered to cover all or any part of the cost of administration and enforcement of this subsection."

Subpart 17.—Law Enforcement

Section 287 of the Immigration and Nationality Act, 8 U.S.C. Section 1357, is amended as follows: "(a) Any officer or employee of the Service authorized under regulations proscribed by the Attorney General, and any officer of employee of and within the Commonwealth of Puerto Rico authorized by the Governor of the Commonwealth of Puerto Rico shall have the power without warrant . . ."

Subpart 18.—Historic Sites and Conservation Lands

Section 8 of the Puerto Rico Federal Relations Act, 48 U.S.C. Section 749 is amended

by redesignating it Section 8A and enacting a new Section 8B:

"SEC. 8B.—(a)(i) Lands. Title to all lands, buildings, and interests in lands, and other property now owned by the United States and within the territorial limits of the Commonwealth of Puerto Rico, and the harbor areas and navigable streams and bodies of water and submerged lands underlying the same in and around the island of Puerto Rico and the adjacent islands and waters, owned by the United States, which may have been acquired in Puerto Rico by the United States under the cession of Spain in the treaty of peace entered into on December 10, 1898, and the lands owned by the United States, and administered under the Caribbean National Forest, is hereby conveyed to the people of Puerto Rico and placed under the control of the Government of the Commonwealth of Puerto Rico; *provided*, That the United States and the Commonwealth of Puerto Rico may negotiate to establish mutually agreed terms and conditions for the continued use and administration of such lands and properties.

(ii) The conveyance described in subsection (i) of this section shall be effective thirty days after the enactment of this section and the Legislature of the Commonwealth of Puerto Rico shall have the authority to legislate as it shall deem advisable with respect to all such Crown Lands conveyed under this section.

Subpart 19.—Community Values

The Puerto Rican Federal Relations Act is amended by inserting a new Section 61 as follows:

"SEC. 61. (a) Definitions

(1) The term 'antitrust laws' has the same meaning given such term in the first section of the Clayton Act, 15 U.S.C. Section 12, and shall also include section 5 of the Federal Trade Commission Act, 15 U.S.C. Section 45.

(2) The term 'person in the entertainment industry' means any organization, or an individual connected with any organization, that produces, distributes, transmits, or exhibits any form of audio or visual entertainment; and

(3) The term "audio or visual entertainment" includes:

(i) video, audio, or mixed programs transmitted via electromagnetic waves of any frequency, whether transmitted to all receivers of a given type within transmission range, or to only selected receivers on the basis of a subscription fee or any other criteria.

(ii) programs transmitted by cable systems as defined in section 602(5)-(6) of the Cable Communications Policy Act of 1984, 47 U.S.C. Section 522 (5)-(6), except that reference in 47 U.S.C. Section 522(6) to "video" shall be read as "video or audio" and references in 47 U.S.C. Section 522(6) to 'television' shall be read as 'television or radio', and

(iii) motion pictures, which include entertainment, using film, videotapes, videocassettes, compact discs, or any other functionally substantially equivalent medium, if admission is generally charged for such entertainment, or if such entertainment is generally made available to the public on a rental or purchase basis for private viewing.

The term 'audio or visual entertainment' does not include printed or otherwise written material unless such printed or otherwise written material is used in any form of audio or visual entertainment described above.

"(b) Upon declaration by the Governor of Puerto Rico (the Governor) and publication of such declaration in the official register of the Commonwealth of Puerto Rico, the antitrust laws shall not apply to any joint discussion, consideration, review, action, or agreement by or among persons in the entertainment industry for the purpose of, and limited to, developing and disseminating voluntary guidelines designed to alleviate the negative impact of violence, pornography, alcohol and drugs in all audio or visual entertainment in Puerto Rico, or in any subset of audio or visual entertainment in Puerto Rico as the Governor may designate in any declaration under this section, provided that

(1) no declaration by the Governor under this section shall operate to exempt from the antitrust laws any joint discussion, consideration, review, action, or agreement that results in a boycott of any person, and

(2) no declaration by the Governor under this section shall operate to exempt from the antitrust laws any activities conducted more than 36 months after such declaration by the Governor. The Governor may limit the effect of any such declaration to a shorter period if he or she does so in the declaration itself.

(c) A declaration by the Governor under section 2 concerning any forms of audio or visual entertainment shall not limit his or her authority to make future declarations concerning those forms of audio or visual entertainment.

Subpart 20.—Assumption of Budgetary Responsibilities and Transfer of Federal Functions.

The Puerto Rican Federal Relations Act is amended by inserting a new Section 63, as follows:

The Commonwealth of Puerto Rico shall assume the expenses inherent in all governmental authority transferred pursuant to this Act. The Government of the United States, or any agency thereof, may from time to time delegate to the Commonwealth of Puerto Rico the total or partial performance of functions vested in the United States, including the administration of such federal laws and programs on the island, as may be mutually agreed.".

Subpart 21

The enhancements to the Commonwealth relationship adopted pursuant to this Act shall form part of the Compact entered upon by the Congress and the People of Puerto Rico in 1952. It may be amended in the same manner as entered upon in order to provide for the continuing enhancement of the Commonwealth relationship.

TIME LIMITATION AGREEMENT, BUDGET CONFERENCE REPORT

Mr. WIRTH. Mr. President, I ask unanimous consent that when the Senate considers the budget conference report, House Concurrent Resolution 106, the time be limited to 1 hour, to be equally divided in the usual form, with an additional 15 minutes under Senator ARMSTRONG's control.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. WIRTH. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations:

HOUSE OF REPRESENTATIVES—*Monday, May 15, 1989*

The House met at 12 noon.

The Reverend Barbara St. Andrews, Espiscopal Diocese of California, San Francisco, CA, offered the following prayer:

Holy One, whose purpose is love, we pause at the beginning of this new day, mindful of the responsibilities You entrust to all those who lead and asking for Your enabling strength and discernment. Cleanse the windows of perception, O Lord, that beyond issues and divisions we may seek the whole and not the partial and find with compassion the common purpose of Thy will. Grant to those who govern quiet centered certainty, pure heart, clear conscience, and genuine faith. Through the power of Thy Spirit, lift us from rushing restlessness to mountaintop visions. Disturb us with Your challenge to human power and privilege; remind us of selflessness and service; guide and heal us in all our individual needs; and unite us in comprehending possibilities we refuse to see. Unleash the unlikely in and through us, and make us always grateful for the benefits of Your prevailing grace. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from New York [Mr. HOUGHTON], please come foward and lead us in the Pledge of Allegiance?

Mr. HOUGHTON led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had agreed to the following resolutions:

S. RES. 123

Resolved, That section 6 of Senate Resolution 38, One Hundred First Congress, is amended to read as follows:

"SEC. 6. The actual and necessary expenses of the committee, including the employment of staff at an annual rate of pay, and the employment of consultants with prior approval of the Committee on Rules and Administration at a rate not to exceed the maximum daily rate for a standing committee of the Senate, shall be paid from the contingent fund of the Senate from the appropriation account "Miscellaneous Items" upon vouchers approved by the chairman of the committee, except that no voucher shall be required to pay the salary of any employee who is compensated at an annual rate of pay.".

S. RES. 127

Resolved, That a summons shall be issued which commands Walter L. Nixon, Jr., to file with the Secretary of the Senate an answer to the articles of impeachment no later than May 31, 1989, and thereafter to abide by, obey, and perform such orders, directions, and judgments as the Senate shall make in the premises, according to the Constitution and laws of the United States.

SEC. 2. The Sergeant at Arms is authorized to utilize the services of the Deputy Sergeant at Arms or another employee of the Senate in serving the summons.

SEC. 3. The Secretary shall notify the House of Representatives of the filing of the answer and shall provide a copy of the answer to the House.

SEC. 4. The Managers on the part of the House may file with the Secretary of the Senate a replication no later than June 12, 1989.

SEC. 5. The Secretary shall notify counsel for Walter L. Nixon, Jr., of the filing of a replication, and shall provide counsel with a copy.

SEC. 6. The Secretary shall provide the answer and the replication, if any, to the Presiding Officer of the Senate on the first day the Senate is in session after the Secretary receives them, and the Presiding Officer shall cause the answer and replication, if any, to be printed in the Senate Journal and in the Congressional Record. If a timely answer has not been filed the Presiding Officer shall cause a plea of not guilty to be entered.

SEC. 7. The articles of impeachment, the answer, and the replication, if any, together with the provisions of the Constitution on impeachment, and the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials, shall be printed under the direction of the Secretary as a Senate document.

SEC. 8. The provisions of this resolution shall govern notwithstanding any provisions to the contrary in the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials.

SEC. 9. The Secretary shall notify the House of Representatives of this resolution.

S. RES. 128

Resolved, That pursuant to rule XI of the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials, the Presiding Officer shall appoint a committee of twelve Senators to perform the duties and to exercise the powers provided for in the rule.

SEC. 2. The majority and minority leader shall each recommend six members to the Presiding Officer for appointment to the committee. The committee shall designate one of its members to be chairman and one of its members to be vice chairman.

SEC. 3. The committee shall be deemed to be a standing committee of the Senate for the purpose of reporting to the Senate resolutions for the criminal or civil enforcement of the committee's subpoenas or orders, and for the purpose of printing reports, hearings, and other documents for submission to the Senate under rule XI.

SEC. 4. During proceedings conducted under rule XI the chairman of the committee is authorized to waive the requirement under the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials that questions by a Senator to a witness, a manager, or counsel shall be reduced to writing and put by the presiding officer.

SEC. 5. In addition to a certified copy of the transcript of the proceedings and testimony had and given before it, the committee is authorized to report to the Senate a statement of facts that are uncontested and a summary, with appropriate references to the record, of evidence that the parties have introduced on contested issues of fact.

SEC. 6. The actual and necessary expenses of the committee, including the employment of staff at an annual rate of pay, and the employment of consultants with prior approval of the Committee on Rules and Administration at a rate not to exceed the maximum daily rate for a standing committee of the Senate, shall be paid from the contingent fund of the Senate from the appropriation account "Miscellaneous Items" upon vouchers approved by the chairman of the committee, except that no voucher shall be required to pay the salary of any employee who is compensated at an annual rate of pay.

SEC. 7. The Secretary shall notify the House of Representatives and counsel for Judge Walter L. Nixon, Jr., of this resolution.

The message also announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 247. Joint resolution designating May 29, 1989, as the "National Day of Remembrance for the Victims of the U.S.S. *Iowa.*"

The message also announced that pursuant to Senate Resolution 128, 101st Congress, the President pro tempore, upon the recommendation of the majority leader and the minority leader, appoints Mr. FOWLER, Mr. HEFLIN, Mr. WIRTH, Mr. REID, Mr. ROBB, Mr. KOHL, Mr. HATCH, Mr. DANFORTH, Mr. CHAFEE, Mr. MURKOWSKI, Mr. JEFFORDS, and Mr. MACK, as members of the committee to receive and report evidence in the impeachment of Judge Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

The message also announced that the Senate had passed a bill and concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 968. An act to delay the effective date of section 27 of the Office of Federal Procurement Policy Act; and

S. Con. Res. 26. Concurrent resolution urging first asylum countries of the Association of Southeast Asian Nations [ASEAN] to reinstate the practice of providing refuge to all asylum-seekers from Vietnam, and for other purposes.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

Washington, DC., May 11, 1989.

Hon. JIM WRIGHT,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in clause 5 of rule III of the Rules of the U.S. House of Representatives, I have the honor to transmit a sealed envelope from the White House at 5:14 p.m. on Thursday, May 11, 1989, and said to contain a message from the President whereby he transmits the 1988 annual report of the Corporation for Public Broadcasting.

With great respect, I am,

Sincerely yours,

DONNALD K. ANDERSON,
Clerk, House of Representatives.

ANNUAL REPORT OF THE CORPORATION FOR PUBLIC BROADCASTING FOR FISCAL YEAR 1988—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Energy and Commerce:

To the Congress of the United States:

In accordance with the Communications Act of 1934, as amended (47 U.S.C. 396(i)), I transmit herewith the Annual Report of the Corporation for Public Broadcasting for fiscal year 1988.

GEORGE BUSH.

THE WHITE HOUSE, *May 11, 1989.*

PERMISSION TO FILE CONFERENCE REPORT ON HOUSE CONCURRENT RESOLUTION 106, CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1990

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the managers may have until 5 p.m. today, May 15, 1989, to file a conference report to accompany the concurrent resolution (H. Con. Res. 106) setting forth the congressional budget for the U.S. Government for the fiscal years 1990, 1991, and 1992.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

NATCHER HAS NEVER ACCEPTED A CAMPAIGN CONTRIBUTION

(Mr. NATCHER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. NATCHER. Mr. Speaker, in a story that appeared in the Washington Post on May 11, 1989, entitled "PAC Support Scoreboard: The House," I am listed as having accepted $8,507 of PAC support. The story starts out with the statement that "during last year's campaign season, every Member of the House received contributions from political action committees, either in direct cash contributions or indirectly through independent expenditures made by a PAC in support of a candidate, according to a Washington Post computer analysis of data collected by the Federal Election Commission through the end of 1988."

I have never accepted a campaign contribution since I have been a Member of Congress and none have been accepted for me. On a great many occasions I have returned contributions that were sent to me and this is disclosed in the records of the Clerk's Office here in the House of Representatives and in the office of the Federal Election Commission.

The article referred to pertains to the 1988 election of Members of Congress. During the year of 1988, I spent out of my own funds $8,404.97. In the primary election that year I spent out of my own funds $5,728.94 and in the 1988 general election I spent out of my own funds the sum of $2,767.03. Mr. Speaker, I have completed 35 years and 10 months as a Member of Congress and have never accepted campaign contributions.

After reading the article in the Post, I contacted Donnald Anderson, the Clerk of the House of Representatives, calling his attention to the article in the Post and then I contacted the Federal Election Commission. The record in the Clerk's Office shows that I have never accepted a campaign contribution since I have been a Member of Congress. This is a public record as you and I know, Mr. Speaker, and any reporter from any newspaper can check this record. In contacting the Federal Election Commission about the story that appeared in the Post, one of the Commissioners, Scott E. Thomas, had the records checked at the Commission and on the same date, May 11, 1989, directed a letter to me as follows:

FEDERAL ELECTION COMMISSION,
Washington, DC, May 11, 1989.

Hon. WILLIAM H. NATCHER,
House of Representatives, Washington, DC.

DEAR CONGRESSMAN NATCHER: As a follow-up to our conversation today, I have enclosed a 1988 and 1990 Federal Election Commission (FEC) computer summary of reported activity affecting your 1988 campaign. The 1988 summary probably was utilized by the Washington Post. This summary can be broken down into three categories: PAC contributions reportedly sent to your 1988 campaign; communication costs made by labor organizations on your behalf; and independent expenditures made by a PAC on your behalf.

The 1988 computer summary indicates that the American Federation of State, County and Municipal Employees—PEOPLE; Marion Laboratories Inc., Political Action Committee; Pepsi-Cola General, Bottlers PAC; and Travelers Corporation PAC sent contributions of $1,000, $300, $250, and $1,500, respectively, to your committee. The computer summary indicates that your 1988 committee returned these four contributions to the sending PAC. The computer summary further indicates that the Build Political Action Committee of the National Association of Home Builders reported making a $1,000 contribution to your 1988 committee. That committee's reports that appear on the 1988 summary apparently don't reflect any return, refund, or voiding of that contribution. The 1990 computer summary, however, does reflect the voiding of Build Political Action Committee's contribution in that committee's 1990 cycle reports.

The computer summary indicates that the American Federation of State, County and Municipal Employees, AFL-CIO (D.C.); the Committee on Letter Carriers Political Education; the Kentucky State AFL-CIO; and the United Mine Workers of America Coal Miners Political Action Committee made communication costs of $2,671, $45, $2,829 and $18 on your behalf for a total of $5,563.

Finally, the computer summary indicates that the National Committee to Preserve Social Security PAC made two independent expenditures of $1,057 and $887 on your behalf for a total of $1,944.

It appears that the Washington Post figure of $8,507 was reached by adding the $1,000 contribution reportedly made by the Home Builders PAC together with the communication costs ($5,563) and independent expenditures ($1,944). To the extent that the Post article categorized as contributions from political action committees the communication costs and independent expenditures, it is simply inaccurate.

I have also enclosed FEC brochures that describe the FEC computerized information, independent expenditures and labor organization communications. If you have any further questions, please do not hesitate to contact me at (202) 376-5118.

Sincerely,

SCOTT E. THOMAS,
Commissioner.

In the last paragraph in the Washington Post story we find this statement:

In some cases where the total contribution is small, the amount represents independent expenditures on behalf of a candidate by a

PAC and not direct contributions, which a number of House Members refuse to accept.

I have never accepted contributions from any PAC and no PAC has ever received authority from me to spend any money or anything of value in support of my candidacy at any time since I have been a Member of Congress.

I am proud of the record I have established and I do not intend to permit my record to be altered or changed by virtue of allegations that money was expended by some individual or organization in support of my candidacy which was unknown by me and without my knowledge or consent.

Mr. Speaker, I have never accepted a campaign contribution and no one has accepted any for me since I have been a Member of the Congress.

NORIEGA'S ESCAPE ROUTE

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, from what I have read in recent days, no one knows the whereabouts of Gen. Manuel Noriega. Clearly he is hiding from the verdict of the Panamanian people.

Wherever he is, I hope he has access to the same news we are getting here. President Bush over the weekend has given him some good advice.

As I read it, the President is telling Noriega that he can run and he can hide: that he can escape to one of the two or three countries that don't have an extradition treaty with the United States, and that the long arm of American law will not be able to serve its indictment on him there.

President Bush is making Noriega an offer he should not refuse. If General Noriega has the best interests of the Panamanian people at heart, or if he simply wants to save his own skin, I suggest he carefully consider President Bush's suggestion.

DELAYING EFFECTIVE DATE OF SECTION 27 OF THE OFFICE OF FEDERAL PROCUREMENT POLICY ACT

Mr. FRANK. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 968) to delay the effective date of section 27 of the Office of Federal Procurement Policy Act, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. NIELSON of Utah. Mr. Speaker, reserving the right to object, I do so in order that the gentleman from Massachusetts [Mr. FRANK] may have an opportunity to explain this request.

Mr. FRANK. Mr. Speaker, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Speaker, I would be prepared at this point to defer to the majority leader or the minority leader.

Mr. NIELSON of Utah. Mr. Speaker, I yield to the majority leader.

Mr. FOLEY. Mr. Speaker, I thank the gentleman from Utah for yielding.

Mr. Speaker, I think some words of explanation might be in order, considering the unusual undertaking of both sides of the aisle to consider some very limited legislative business today.

This is an unusual circumstance that came to our attention at the last moment. It does involve a 60-day postponement of regulations which otherwise would take effect tomorrow. I think it is in the interest of proper administration. It is supported by both the majority and the minority, by the committees, and by the other body, and it is important that we go forward with this delay.

If there should be a rollcall vote ordered on this legislation, I believe it will be our intention to move that it be postponed until tomorrow. In any event, it is important that we make as much progress as we can today, and I hope the legislation may be enacted today.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. NIELSON of Utah. Under my reservation, I yield to the minority leader.

Mr. MICHEL. Mr. Speaker, I appreciate the gentleman's yielding.

Mr. Speaker, I simply want to embrace wholeheartedly the statement of the majority leader and indicate that it is an extraordinary circumstance under which the gentleman has taken or we jointly have taken this action today. As the majority leader indicates, if there should be a rollcall vote, that would be taken tomorrow, although I suspect that we may very well get by without it.

□ 1210

Mr. FRANK. Mr. Speaker, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Speaker, if the gentleman from Utah [Mr. NIELSON] will allow me to proceed, I am appearing here on behalf of the gentleman from Michigan [Mr. CONYERS].

Let me note, Mr. Speaker, that the bill we are now considering, if we get the unanimous consent, is the one that came from the other body just 4 or 5 minutes ago, and I hope that the other body will in the future show similar expeditious consideration in legislation which leaves us. If we get this kind of comity, we will be in good shape for the rest of the year.

Mr. Speaker, last year legislation was passed by the Committee on Government Operations, and then through both branches, which puts strict regulations on potential abuses involving government procurement. The great majority of people, obviously, who work for us in the procurement area are quite honest, as are the great majority of most who do business with the Government, but it is our responsibility to protect ourselves and the taxpayers against the minority who would abuse. Legislation was passed last year that would do that. It called for regulations to be promulgated. The law was signed into effect in November 1988, and it had an effective date 188 days after the enactment, but the regulations did not come until March 24, 1989. There was a 4-month delay.

As a result, Mr. Speaker, we have regulations which are now supposed to go into effect tomorrow which have concerned some people, some small business people in particular, who point out quite correctly that they do not have the resources to monitor the Federal regulations in the detail that others do. The gentleman from Michigan [Mr. CONYERS], the chairman of the Committee on Government Operations, in the statement which I have inserted, has said that he does not regard this as a first step in amending or repealing the legislation. He is doing this and agreeing to do it at the request of the Department of Defense and the Office of Management and Budget for the sole purpose here of giving an additional 60 days so that people can become familiar with the regulations. He, as I say, does not see this as an invitation to change them. Obviously other Members are free to do as they wish, but I did want to make it clear that in the view of the chairman of the committee this is being done, accommodating the request by the administration. The other body acted late last week. That is why we are imposing on the Members, as the two leaders explained, having promised them that there would be no legislative business. We are doing legislative business, but of a minimal sort.

Mr. Speaker, we make today no substantive change in any piece of legislation. We simply postpone for 60 days the effective date of regulations carrying out legislation which in itself remains unchanged.

Mr. NIELSON of Utah. Mr. Speaker, I thank the gentleman from Massachusetts [Mr. FRANK] for that explanation.

The administration is in favor of this bill. It gives them 60 more days to get the provisions of the rules incorpo-

rated into the organization. It is their request. Congress has agreed to do it.

Mr. CONYERS. Mr. Speaker, I rise in support of S. 968. This bill would extend for 60 days the effective date of the procurement integrity provisions contained in section 6 of Public Law 100-679, the Office of Federal Procurement Policy Act Amendments of 1988.

These provisions, which will become effective on May 16, contain both criminal and civil sanctions for certain proscribed activities dealing with: First, gifts or other gratuities offered to or solicited by Federal procurement officials; second, the receipt of contract source selection information by Federal contractors; and third, so-called revolving door practices of Federal employees.

Although the statute, which was signed into law on November 17, 1988, contained an effective date of 180 days after the date of enactment, proposed regulations were not promulgated until March 24, 1989—over 4 months after enactment. These regulations meet with much industry criticism and some provisions were substantially revised in response to these comments. However, the revised rules were not published as interim regulations until May 11—just 5 days before the scheduled implementation date of the law.

Both DOD and OMB have contacted the Committee on Government Operations requesting that Congress extend the effective date for another 60 days so that both government and industry could have an opportunity to train their personnel regarding the new regulations. Given the fact that the law carries with it both civil and criminal penalties, we are urged to give Government and industry some breathing room before these regulations become effective.

I strongly support this law and believe that the regulations, for the most part, adequately and fairly carry out its provisions. The committee has been assured both by the administration and by industry representatives that the requested extension is not masking an intent to seek legislative repeal or modification of the act or otherwise work substantial changes to the regulations.

It is important to note that we are at this point because of bureaucratic delay by the writers of the regulations, and that the law was and remains necessary because of the unethical and illegal practices of some of the larger contractors to the Government. While I have little sympathy for these unethical business practices and for a request by the administration to extend the effective date because of its own delay in writing regulations, I am very much concerned that small business concerns be afforded an equitable opportunity to study and become acquainted with the new regulations and the law.

These small firms, generally, do not subscribe to the Federal Register and can ill afford to maintain a presence in Washington, DC, to monitor regulatory change. They deserve a fair chance to know the rules of the game especially when a violation of these rules carries with it severe civil penalties and prison terms. Small business should not be made to pay for the mistakes and inattention of the regulation writers or for unethical practices of some big businesses.

I, therefore, urge my colleagues to support S. 968. If the bill is enacted, I would also call upon the Federal Acquisition Regulatory Council to direct an educational program primarily designed to advise smaller businesses of the terms of the new regulations. Finally, I would expect that each agency head will use the extension to train its personnel, and I can assure the House that the Committee on Government Operations will monitor this activity very closely.

Mr. NIELSON of Utah. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 968

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DELAY OF EFFECTIVE DATE.

Section 6(b) of the Office of Federal Procurement Policy Act Amendments of 1988 (Public Law 100-679; 102 Stat. 4068) is amended by striking out "180 days after the date of the enactment of this Act") and inserting in lieu thereof "July 16, 1989".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FRANK. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks on S. 968, the Senate bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PATTERN OF PERVASIVE POLITICS OVER PROFESSIONALISM IN THE PARK SERVICE

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Mr. Speaker, I have long been concerned that the proud tradition of the National Park Service has been damaged by the increasing politicization of this agency. Political considerations are overwhelming professional judgment. The pervasive pattern of politics over professionalism in the National Park Service is very disappointing. A revised vacancy announcement for the Assistant Director of Visitor Services of the National Park Service is the most recent point of concern. When this position was first advertised last November, this job announcement called for applicants from the Department of the Interior. As of today, it has been changed so that applicants from all sources—anywhere—can apply specifically to this unique accommodation of political friends. The job announcement also says that those who applied before—and there were many applicants—need not apply again—there included but unfortunately not likely to pass the new political test that is reflected in this revised announcement.

This change—subtle in its wording but not its potential effects—is more than a slap at the professionalism of the National Park Service—it is a outright assault. By specifying all sources the administration is telling all of us that they do not believe that well qualified people exist in the National Park Service—for this position of Assistant Director of Park Service.

This position oversees many of the key functions of the National Park Service—for park ranger activities including park fees, law enforcement, fire management; for land acquisition including mining and mineral issues; for maintenance and engineering, and for concessions. In other words the person in this position oversees everything from the fires, such as those at Yellowstone Park last year, to the antidrug efforts, to food and lodging for park visitors. The Assistant Director is also responsible for such controversial issues as grazing uses and wilderness management. This position covers many of the key purposes of the National Park Service. This position must not become a political plum reward instead of a professional position. This sends a chilling message of politics first and professionalism second with National Park Service.

I am writing to the Office of Personnel Management to request an investigation of this situation which I fear is simply a preselection of an outside person for the position of Assistant Director for visitor services. I find it both surprising and preposterous that the person who should be a park ranger's ranger can now be an outsider to the National Park Service.

Mr. Speaker, this coming Thursday the Subcommittee on Parks and Public Lands will be reviewing new legislation, H.R. 1484, that would prevent the continued political erosion of the National Park Service. It is apparently needed today in this new administration as much as has been evident the past decade.

REV. BARBARA ST. ANDREWS

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, I would like to express the appreciation of the House to the Reverend Barbara St. Andrews who has honored the House today by being our guest chaplain.

Mr. Speaker, Rev. Barbara St. Andrews is a member of the Episcopal Di-

ocese of San Francisco, and she has been the guest chaplain in the other body, in the U.S. Senate, as well as the guest chaplain here.

She is the first woman chaplain to do so. Members present today have observed an historic appearance by a guest chaplain. We are honored by her presence and her ministration to the House, and we wish to express our sincere appreciation and thanks to her.

INTRODUCTION OF LEGISLATION AUTHORIZING ICC TO REVIEW MAJOR RAILROAD TRANSACTIONS

(Mr. TAUKE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TAUKE. Mr. Speaker, many of us from the Midwest have been watching with concern the efforts of a New York investment firm to effectuate a hostile takeover of a major midwestern railroad, the Chicago & Northwestern [CNW]. The CNW is by far the dominant railroad in my home State of Iowa with 40 percent of the current operating rail lines, but it has also become a major shipper of coal from Wyoming—adding a new element of competition to shipments from the Powder River Basin—and is a critical east-west rail bridge.

A number of midwestern Congressmen and Senators have expressed concerns about the public interest aspects of the proposed CNW takeover and have asked the Interstate Commerce Commission to examine this hostile leveraged takeover. However, it appears that the ICC may soon conclude that it does not have sufficent statutory authority to scrutinize this transaction to ensure that this sale serves the public interest. The reason for this is a technicality—that the company attempting this hostile takeover is not currently a rail carrier. Therefore, it does not fall under the statutory guidelines requiring ICC approval. The proposal to take over the CNW will add hundreds of millions of dollars in new debt to the railroad and will likely bring about a drastic restructuring of its current system. Obviously, if our policies designed to protect the public interest mean anything, this transaction should be subject to ICC review.

To accomplish that goal, I am today introducing legislation to rectify this shortfall in the authority of the ICC to review major railroad transactions and to ensure that the public interest is protected.

RAISING THE EXEMPTION FOR CHILDREN FROM $1,950 TO $3,000

(Mr. DUNCAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUNCAN. Mr. Speaker, today is the day after Mother's Day, and I cannot think of any more appropriate time to introduce legislation to substantially raise the allowance for children on income tax returns for American families.

Mr. Speaker, my bill would raise this exemption from $1,950, as on the returns we just filed, to $3,000.

Edwin Feulner, chairman of the Heritage Foundation, wrote recently in the Washington Times that, if this credit had been indexed for inflation, it would be $6,300 today. My bill is a modest and fair increase to less than half that amount.

Mr. Speaker, contrary to media impressions, the vast majority of American children are well fed, well clothed, and well cared for. The mothers and fathers of America are doing a good job, but they could do more and better things for their children if the Government did not take so much of their money.

We do not have a daycare crisis in this country today, and we certainly do not need some massive and expensive day-care bureaucracy in this Nation. All this would really do is end up helping a bunch of bureaucrats who would get higher paying jobs.

Mr. Speaker, what we really need is to encourage people to have more children and to allow American families to keep a little more of their own money so that they can do more for their own children.

□ 1220

GEN. VARTAN RETIRING AFTER 35 YEARS' SERVICE

The SPEAKER pro tempore (Mr. SKELTON). Under a previous order of the House the gentleman from Mississippi [Mr. MONTGOMERY] is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, I rise to commend one of our country's truly outstanding and dedicated military officers, Brig. Gen. Walter G. Vartan, Air Force Reserve after 35 years of service.

General Vartan was born July 17, 1932, in Chicago. He graduated from Amundsen High School, Chicago, and went on to Grinnell (Iowa) College, where he earned his bachelor of arts degree in business and was commissioned as a second lieutenant through the Reserve Officer Training Corps Program in 1954. He continued his formal education at Carnegie Institute of Technology, Pittsburgh, pursuing an advanced degree in management. He completed Nuclear Weapons School in 1956; Air Command and Staff College in 1972 and Senior Officer Professional Military Education at the Air War College in 1983.

In 1955, General Vartan entered pilot training at Malden Air Force Base, MO., earning his wings in August 1956. His first operational assignment after graduation was to the Strategic Air Command's 307th Bombardment Wing, Lincoln Air Base, NE, flying in B–47's.

The general joined the Air Force Reserve in 1963 and was assigned to the 928 Troop Carrier Group at Chicago-O'Hare International Airport. In November 1974 he became commander of the 64th Tactical Airlift Squadron at Chicago-O'Hare, and in November 1977 he was assigned as deputy commander for operations, 928th Tactical Airlift Group. From October 1979 to May 1980, he was assigned as mobilization augmentee to the deputy chief of staff, operations, Headquarters U.S. Air Force Reserve, Robins Air Force Base, GA. General Vartan then returned to Chicago-O'Hare International Airport as commander of the 928th Tactical Airlift Group. He assumed his present duties in July 1981.

General Vartan is a command pilot with more than 4,000 flying hours in T–34's, T–28's, C–119's and C–130's. He also has additional time in A–37's, F–4's, HH–3's and KC–135's. He was qualified as a flight instructor in C–119's and C–130's.

After 35 years of service, Brigadier General Vartan, currently mobilization assistant to the deputy to the chief of Air Force Reserve will retire from active service.

The general's civic affiliations include numerous positions in the Reserve Officers Association culminating in election to national president in 1983. He is active in the Air Force Association having received a National Air Force Association Outstanding Chapter Award as president of Chicagoland O'Hare chapter. He received an Air Force Association Presidential Citation for his role in the creation of defense symposiums in the Great Lakes region. General Vartan received the Chicagoland and Armed Forces Council Award for achievement as a civilian and military leader in promoting awareness of military and community relations. He was selected by; the chief of Air Force Reserve as Air Reserve Citizen of the Year for 1983. He also serves on the Air Force Reserve Objective Plan Committee. The general is active in technical and managerial organizations associated with his civilian professional field.

General Vartan is married to the former Karen Hofmann of Haddonfield, NJ. He has four daughters: Jeanene Marie, Victoria Lee, Valerie Jean, and Marianne Irene.

Mr. Speaker, I want to commend General Vartan for his years of outstanding and dedicated service to the Air Force, the Congress and his country. He is one of the best of this country's citizen airmen.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

[Mr. ANNUNZIO addressed the House. His remarks will appear hereafter in the Extensions of Remarks.]

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. OWENS] is recognized for 60 minutes.

[Mr. OWENS of New York addressed the House. His remarks will

appear hereafter in the Extensions of Remarks.]

IMPORTANT WORK BY ARMED SERVICES COMMITTEE ON MILITARY EDUCATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri [Mr. SKELTON] is recognized for 30 minutes.

Mr. SKELTON. Mr. Speaker, today I begin a series of discussions on the House floor concerning work by the Armed Services Committee, and particularly the Panel on Military Education, which I had the honor to chair over the past year.

I might give some background and history of it and do some initial discussion because this has been a very important piece of work by the Armed Services Committee and will have far-reaching and long-lasting positive effects on our military.

Mr. Speaker, on November 13, 1987 the House Armed Services Committee chairman, the gentleman from Wisconsin [Mr. ASPIN] established this Panel on Military Education and he appointed this speaker as chairman and seven other members of the Armed Services Committee on this bipartisan panel. The creation of this panel signified recognition by Congress that rigorous high quality professional military education is vital to the national security. It is an invesment in the future military leadership for both war and peace.

The committee interest in professional military education is a direct consequence of its earlier work from 1982 until 1986 on the defense reorganization issue. This culminated with the passage of what is now known as the Goldwater-Nichols Department of Defense Reorganization Act of 1986. Congress reached back on the lessons concerning the importance of joint military operations and implemented those in the Goldwater-Nichols Act.

The primary objective of that 1986 Act is to strengthen the joint elements of the military, especially the Chairman of the Joint Chiefs of Staff and the Commanders in Chief, also known as CINC's, of the Combat Commands. The primary method of that act is to change organizations and their responsibilities. The organizational changes are found in title II, Military Advice and Command Function, which designated the Chairman of the Joint Chiefs of Staff as the principal military adviser to the President and the National Security Council and the Secretary of Defense. It gave the Commanders in Chief, or the CINC's, as we call them, clear command authority over subordinate commands and forces assigned.

Now, Mr. Speaker, in order to benefit fully from these organizational changes, Congress believes it had to improve the performance of officers assigned to joint elements. The required personnel changes are contained in title IV of that 1986 act, entitled "Joint Officer Personnel Policy." Those personnel changes are designed to insure quality in two related factors, both experience and education.

This study conducted by our panel focuses on education. Education is important, both for learning facts and for affecting attitudes, as well as values.

Specifically, joint education can broaden an officer's knowledge beyond his own military service in joint multiservice matters and can help the officer develop a joint perspective.

Using educational change to supplement and reinforce organizational change is not unique to the Goldwater-Nichols Act.

Back in 1898, the Spanish-American War made it clear that the Army's organization suffered from divided authority, that it could not meet the 20th-century needs.

Secretary of War Roots established the Army War College in 1901, and by 1903 had legislation creating a Chief of Staff and the Army General Staff. All three changes increased integration of the Army.

After World War II, the Joint Schools were established; namely, the National War College and the Industrial College of the Armed Forces in 1946 and the Armed Forces Staff College in 1947, which is located in Norfolk, VA.

Further, the National Security Act of 1947, later amended in 1949, created the Secretary and Department of Defense and formally established the Joint Chiefs of Staff.

Again, both organizational and educational steps were unifying ones.

Military leaders are not the only ones who have emphasized the importance of military education. Winston Churchill, among others, made it clear about the importance of military education and how the military officer was educated to successfully prosecute World War II.

This panel, appointed by Chairman ASPIN, was asked to review the overall professional military personnel of our Nation, and that we did. The panel's charter, setup by the chairman, asked that we study two areas of professional military education. The first was to assess the ability of the current Department of Defense military education system to develop professional military strategists, joint war fighters and tacticians.

Along this line, I became quite concerned a little over a year ago and made a series of five speeches on strategy and the need to educate future American strategists, and out of those speeches came this panel and our charter.

The second was to review the Department of Defense plans for implementing the joint professional military educational requirements set forth in title IV of the Goldwater-Nichols Act with a view toward assuring that this education provides the proper linkage between the service competent officers and competent joint officers.

The third area of inquiry, though not specifically stated, but was quite implicit in the terms of the panel's charter and also explicit upon examination, was the area of quality. Accordingly, the report addresses all three of these areas, Mr. Speaker: strategy, jointness and quality.

The scope of the study was to determine where to concentrate our efforts. The panel had to relate the areas of its examination to levels of existing professional military education schools. The first level of military education, precommissioning education, is accomplished in service academies and the ROTC Corps, which are units of civilian colleges and the officer candidate schools.

□ 1230

There are levels of military education after the commissioning. The first is the primary level where courses are normally attended within the first 8 years after commissioning, and they are focused on the officers' branch for specialties such as armor, infantry, artillery, submarines, and the like. The second level is that of intermediate level, and the courses there are normally attended between the 10th and the 15th year of service when the officer is a major in the Army or Air Force or lieutenant commander in the Navy or major in the Marines, and at the Army Intermediate School at Fort Leavenworth, the primary focus is not on how a single branch operates but on how various branches such as infantry and armor and artillery fight together in what they call combined arms as a team. The third level, the senior level, are courses normally attended between the 16th and 23d year of service when the officer is a lieutenant colonel or colonel or a Navy commander or captain. While the curricula vary, the war colleges generally study about operational art and strategy.

The three service war colleges, the two joint colleges, the National War College and the Industrial College of the Armed Forces make up the senior category of schools. The Marine Corps, I might point out at this point, has no senior school, but it does a good job of sending its officers to the other senior schools.

There is a fourth level known as the general officer or flag officer level, and the services created short courses for flag officers, and by the 1980's, it

had established a joint staff course known as Capstone for newly selected general and flag officers.

Our panel, the military education panels, settled on the highest three levels, the intermediate, senior and general flag officer, and we did not look at the primary or precommissioning education. The panel's focus on formal military education excluded detailed inquiry into a number of closely related areas. It did not talk about on-the-job experience, which is so very important. It did not talk about self-development, although I might point out that Gen. Carl Vuono of the Army Chief of Staff put a great deal of importance on development of an Army officer's career in his testimony before our panel a few months ago. This also did not touch on the specialized joint military schools such as the management college at Fort Belvoir or the Intelligence College at Bolling Air Force Base and the like, and did not talk about the foreign professional military schools or the service graduate education institutions.

Mr. Speaker, after the panel was chartered, the Committee on Armed Services established this program under this panel, and we did ask that we be allowed to proceed for hearings and to visit the various schools, which we did. We conducted some 28 hearings, had 48 witnesses at those hearings, and interviewed over 100 civilian and military, both active duty and retired, people in connection with our study. The panel also visited all 10 of the senior and intermediate-level military schools and held hearings at most of them, with the exception of those here in the Washington area, where we held the hearings here on Capitol Hill.

We also attended classes. We talked separately with the school faculties, senior staff, and students, and the panel supplemented the visits with data, interviews and briefings, and previous reports, as well as other literature that we were able to obtain. We heard the testimony from the Deputy Secretary of Defense, the Chairman of the Joint Chiefs of Staff, all four service chiefs, four commanders in chief, four CINC's of combat commends, civilian educators, former service chiefs, civilian defense officials and military educators. Mr. Speaker, we also visited and were briefed at various British, French, and West German military schools, and had the opportunity to compare their professional military education with the American intermediate and senior-level military schools.

Mr. Speaker, I will conclude my remarks today with the undertanding that I will continue speaking on this subject from time to time and hopefully we will have a full discussion for our Members to understand and have within the RECORD so we will know the full extent of the work of the Panel on Military Education done by the Committee on Armed Services, which I chair.

TRIBUTE TO JUDGE GERALD W. HEANEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota [Mr. OBERSTAR] is recognized for 10 minutes.

Mr. OBERSTAR. Mr. Speaker, I take this opportunity to pay tribute to a distinguished American jurist, Judge Gerald W. Heaney, of the U.S. Circuit Court of Appeals for the Eighth Circuit. On December 31, 1988, Judge Heaney assumed senior status after serving for 22 years as a circuit court judge.

Gerald Heaney was born January 29, 1918, in Goodhue, a rural community in southeastern Minnesota. In that productive farming area of the State of Minnesota, Jerry Heaney learned the value of a close family, honesty, and hard work, qualities which have characterized his private life and which have been the hallmark of his public service.

Judge Heaney received his undergraduate education at the College of St. Thomas in St. Paul, MN, and later his law degree from the University of Minnesota, in 1941.

Mr. Speaker, at the outbreak of World War II, Jerry Heaney entered the U.S. Army, rising to the rank of captain. As a member of a distinguished ranger battalion, Jerry Heaney participated in the historic D-Day landing at Normandy. For his war service, he was decorated with the Silver Star for extraordinary bravery in the Battle of La Pointe du Hoc at Normandy, and he also won the Bronze Star and five Battle Stars.

At the end of the war Judge Heaney returned home to marry Eleanor Schmitt, now his wife of some 43 years. He entered into private law practice in Duluth, spending 20 years with the firm of Lewis, Hammer, Heaney, Weyl & Halverson, and during that time he was instrumental in improving the educational system in Minnesota, working with the Governor and the State legislature to pass a State school aid formula which remains in use today and is a model for the whole country, and serving on the distinguished board of regents of the University of Minnesota.

As a lawyer in private practice, Judge Heaney concentrated in the area of labor law, dedicating himself to service of the disadvantaged. He also represented the teachers in Duluth and helped the Duluth school district become the first in Minnesota to adopt the same pay scale for both men and women.

In 1966, with the support of Senators Eugene McCarthy and Walter Mondale, as well as then Vice President Hubert H. Humphrey, and my predecessor, Congressman John A. Blatnik, President Lyndon B. Johnson appointed Judge Heaney to a newly created vacancy on the Eighth Circuit Court of Appeals.

On the bench Judge Heaney has been a leader in protecting the rights of the disadvantaged. The essence of his career was summed up by his own words in a recent interview that:

> My view is that if we are going to preserve our democracy, the single most important thing we can do is make sure that every person has equal opportunity for an education, a job, and a home. I felt an obligation for those in our society who are poor, who are less educated, who do not have the advantages that some of the rest of us have had, but who, nevertheless, deserve the protection of the Constitution.

Throughout his tenure on the court, Judge Heaney has gained a reputation as a hard-working, well-prepared, and fair-minded jurist. He has been a leader in handling school desegregation cases in St. Louis, Little Rock, Kansas City, and Omaha. He takes pride in pointing out that in St. Louis today 12,000 black students are enrolled in suburban schools, and class sizes in the inner-city schools have dropped from 35 to 22 students.

Judge Heaney has been a leader in assuring fair treatment for Social Security claimants and in assuring decent and humane conditions of confinement for prisoners. He also authored the opinion in a decision in In re Ahlers, which served as a model for protections that this body afforded family farmers in the recently enacted chapter 12 of the Bankruptcy Code.

Judge Heaney has left his mark on the landscape of the law. His colleague, Donald P. Lay, chief judge for the Eighth Circuit Court of Appeals, said it beautifully:

> In my judgment he is the most outstanding judge ever to serve, not only on the Eighth Circuit but throughout the United States, in the last 25 years. He is the most well-prepared judge in the circuit. His industry and dedication to law are unparalleled. His compassion and understanding of human problems is unique. He is a scholar and true gentleman in all respects.

□ 1240

Former Vice President Walter Mondale said of Judge Heaney:

> I have served many years in public life and one of the best things I did was to support the nomination of Gerald W. Heaney to be a Circuit Judge for the Eighth Circuit. His career has been brilliant, it has been energetic, but above all it has been just. He has shown that special depth, that seasoning, and that caring that is rare. We want all of our Judges to show that wisdom and depth, but few have demonstrated those qualities as fully as Judge Heaney.

As Judge Heaney assumes senior status and has time to spend more of his time with his warm, and gracious, and beautiful Eleanor, and gives a bit

more of his seemingly limitless energy and attention to his two children, Carole and Bill, and four grandchildren, Megan, Erin, Kelly, and Matthew, I wanted to take this opportunity to call the attention of the House, and through the House this entire country to the appreciation that I have and that I think all fellow citizens should have for Gerald W. Heaney's years of dedication and service to the citizens of his State and his country. We look forward to many more years of good health and good service as he assumes senior judge status.

CONFERENCE REPORT ON HOUSE CONCURRENT RESOLUTION 106

Mr. PANETTA submitted the following conference report and statement on the concurrent resolution (H. Con. Res. 106), setting forth the congressional budget for the U.S. Government for the fiscal years 1990, 1991, and 1992:

CONFERENCE REPORT (H. REPT. 101-50)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the concurrent resolution (H. Con. Res. 106), setting forth the Congressional Budget for the United States Government for the fiscal years 1990, 1991, and 1992, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

That the Congress determines and declares that the concurrent resolution on the budget for fiscal year 1990 is established and the appropriate budgetary levels for fiscal years 1991 and 1992 are set forth.

MAXIMUM DEFICIT AMOUNTS

SEC. 2. The following levels and amounts in this section are set forth for purposes of determining, in accordance with section 301(i) of the Congressional Budget and Impoundment Control Act of 1974, as amended by the Balanced Budget and Emergency Deficit Control Act of 1985 and the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987, whether the maximum deficit amount for a fiscal year has been exceeded, and as set forth in this concurrent resolution, shall be considered to be mathematically consistent with the other amounts and levels set forth in this concurrent resolution:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1990: $1,065,500,000,000.
Fiscal year 1991: $1,144,700,000,000.
Fiscal year 1992: $1,216,500,000,000.

(2) The appropriate levels of total budget authority are as follows:

Fiscal year 1990: $1,329,400,000,000.
Fiscal year 1991: $1,426,200,000,000.
Fiscal year 1992: $1,479,400,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1990: $1,165,200,000,000.
Fiscal year 1991: $1,233,100,000,000.
Fiscal year 1992: $1,282,300,000,000.

(4) The amounts of the deficits are as follows:

Fiscal year 1990: $99,700,000,000.
Fiscal year 1991: $88,400,000,000.
Fiscal year 1992: $65,800,000,000.

RECOMMENDED LEVELS AND AMOUNTS

SEC. 3. (a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1989, October 1, 1990, and October 1, 1991:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1990: $776,300,000,000.
Fiscal year 1991: $831,800,000,000.
Fiscal year 1992: $884,400,000,000.

and the amounts by which the aggregate levels of Federal revenues should be increased are as follows:

Fiscal year 1990: $5,800,000,000.
Fiscal year 1991: $6,200,000,000.
Fiscal year 1992: $6,300,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1990: $69,900,000,000.
Fiscal year 1991: $75,200,000,000.
Fiscal year 1992: $79,900,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1990: $1,041,400,000,000.
Fiscal year 1991: $1,116,000,000,000.
Fiscal year 1992: $1,148,400,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1990: $945,000,000,000.
Fiscal year 1991: $1,001,500,000,000.
Fiscal year 1992: $1,041,600,000,000.

(4) The amounts of the deficits are as follows:

Fiscal year 1990: $168,700,000,000.
Fiscal year 1991: $169,700,000,000.
Fiscal year 1992: $157,200,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1990: $3,122,700,000,000.
Fiscal year 1991: $3,374,300,000,000.
Fiscal year 1992: $3,600,700,000,000.

(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1989, October 1, 1990, and October 1, 1991, are as follows:

Fiscal year 1990:
(A) New direct loan obligations, $19,300,000,000.
(B) New primary loan guarantee commitments, $107,300,000,000.
(C) New secondary loan guarantee commitments, $93,200,000,000.
Fiscal year 1991:
(A) New direct loan obligations, $19,600,000,000.
(B) New primary loan guarantee commitments, $115,000,000,000.
(C) New secondary loan guarantee commitments, $97,100,000,000.
Fiscal year 1992:
(A) New direct loan obligations, $19,500,000,000.
(B) New primary loan guarantee commitments, $119,600,000,000.
(C) New secondary loan guarantee commitments, $100,900,000,000.

(b) The Congress hereby determines and declares that the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations, new primary loan guarantee commitments, and new secondary loan guarantee commitments for fiscal years 1990 through 1992 for each major functional category are:

(1) National Defense (050):
Fiscal year 1990:
(A) New budget authority, $305,500,000,000.
(B) Outlays, $299,200,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1991:
(A) New budget authority, $319,200,000,000.
(B) Outlays, $310,200,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $332,500,000,000.
(B) Outlays, $322,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(2) International Affairs (150):
Fiscal year 1990:
(A) New budget authority, $18,300,000,000.
(B) Outlays, $16,700,000,000.
(C) New direct loan obligations, $1,900,000,000.
(D) New primary loan guarantee commitments, $6,400,000,000.
(E) New secondary loan guarantee commitments, $200,000,000.
Fiscal year 1991:
(A) New budget authority, $18,600,000,000.
(B) Outlays, $16,700,000,000.
(C) New direct loan obligations, $2,000,000,000.
(D) New primary loan guarantee commitments, $6,700,000,000.
(E) New secondary loan guarantee commitments, $200,000,000.
Fiscal year 1992:
(A) New budget authority, $19,700,000,000.
(B) Outlays, $17,100,000,000.
(C) New direct loan obligations, $2,000,000,000.
(D) New primary loan guarantee commitments, $6,900,000,000.
(E) New secondary loan guarantee commitments, $200,000,000.
(3) General Science, Space, and Technology (250):
Fiscal year 1990:
(A) New budget authority, $14,400,000,000.
(B) Outlays, $14,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1991:
(A) New budget authority, $15,000,000,000.
(B) Outlays, $14,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $15,600,000,000.
(B) Outlays, $15,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(4) Energy (270):
Fiscal year 1990:
(A) New budget authority, $6,100,000,000.

(B) Outlays, $4,200,000,000.
(C) New direct loan obligations, $2,000,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1991:
(A) New budget authority, $6,300,000,000.
(B) Outlays, $4,300,000,000.
(C) New direct loan obligations, $2,100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $6,900,000,000.
(B) Outlays, $4,700,000,000.
(C) New direct loan obligations, $2,300,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(5) Natural Resources and Environment (300):
Fiscal year 1990:
(A) New budget authority, $17,200,000,000.
(B) Outlays, $17,400,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1991:
(A) New budget authority, $18,000,000,000.
(B) Outlays, $18,300,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $18,700,000,000.
(B) Outlays, $18,700,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(6) Agriculture (350):
Fiscal year 1990:
(A) New budget authority, $18,300,000,000.
(B) Outlays, $15,000,000,000.
(C) New direct loan obligations, $10,100,000,000.
(D) New primary loan guarantee commitments, $5,400,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1991:
(A) New budget authority, $20,600,000,000.
(B) Outlays, $16,600,000,000.
(C) New direct loan obligations, $10,200,000,000.
(D) New primary loan guarantee commitments, $5,500,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $21,300,000,000.
(B) Outlays, $16,000,000,000.
(C) New direct loan obligations, $9,700,000,000.
(D) New primary loan guarantee commitments, $5,400,000,000.
(E) New secondary loan guarantee commitments, $0.
(7) Commerce and Housing Credit (370):
Fiscal year 1990:
(A) New budget authority, $13,300,000,000.
(B) Outlays, $8,500,000,000.
(C) New direct loan obligations, $3,300,000,000.
(D) New primary loan guarantee commitments, $60,500,000,000.
(E) New secondary loan guarantee commitments, $93,000,000,000.
Fiscal year 1991:
(A) New budget authority, $25,500,000,000.
(B) Outlays, $20,200,000,000.
(C) New direct loan obligations, $3,300,000,000.
(D) New primary loan guarantee commitments, $66,400,000,000.
(E) New secondary loan guarantee commitments, $96,900,000,000.
Fiscal year 1992:
(A) New budget authority, $25,100,000,000.
(B) Outlays, $20,500,000,000.
(C) New direct loan obligations, $3,400,000,000.
(D) New primary loan guarantee commitments, $69,600,000,000.
(E) New secondary loan guarantee commitments, $100,700,000,000.
(8) Transportation (400):
Fiscal year 1990:
(A) New budget authority, $29,900,000,000.
(B) Outlays, $29,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1991:
(A) New budget authority, $30,600,000,000.
(B) Outlays, $29,800,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $31,700,000,000.
(B) Outlays, $30,900,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(9) Community and Regional Development (450):
Fiscal year 1990:
(A) New budget authority, $7,200,000,000.
(B) Outlays, $6,700,000,000.
(C) New direct loan obligations, $1,000,000,000.
(D) New primary loan guarantee commitments, $500,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1991:
(A) New budget authority, $7,100,000,000.
(B) Outlays, $6,800,000,000.
(C) New direct loan obligations, $1,100,000,000.
(D) New primary loan guarantee commitments, $500,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $7,300,000,000.
(B) Outlays, $6,900,000,000.
(C) New direct loan obligations, $1,100,000,000.
(D) New primary loan guarantee commitments, $500,000,000.
(E) New secondary loan guarantee commitments, $0.
(10) Education, Training, Employment, and Social Services (500):
Fiscal year 1990:
(A) New budget authority, $41,500,000,000.
(B) Outlays, $38,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $13,100,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1991:
(A) New budget authority, $42,900,000,000.
(B) Outlays, $42,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $13,600,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1992:
(A) New budget authority, $43,800,000,000.
(B) Outlays, $43,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $13,900,000,000.
(E) New secondary loan guarantee commitments, $0.

Fiscal year 1992:
(A) New budget authority, −$35,800,000,000.
(B) Outlays, −$36,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.

SENSE OF THE CONGRESS

SEC. 4. It is the sense of the Congress that—
(1) Congress shall present the revenue portion of the reconciliation bill to the President at the same time as the spending reduction provisions of the reconciliation bill; and
(2) the specific measures composing the governmental receipts figure will be determined through the regular legislative and constitutional process, and agreements reached between the administration and the Committee on Ways and Means and the Committee on Finance on revenue legislation reconciled pursuant to this resolution will be advanced legislatively when supported by the President of the United States.

RECONCILIATION

SEC. 5. (a) Not later than July 15, 1989, the committees named in subsections (b) and (c) of this section shall submit their recommendations to the Committees on the Budget of their respective Houses. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

SENATE COMMITTEES

(b)(1) The Senate Committee on Agriculture, Nutrition, and Forestry shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof,

sufficient to reduce budget authority and outlays as follows: $1,100,000,000 in budget authority and $1,020,000,000 in outlays in fiscal year 1990.

(2) The Senate Committee on Banking, Housing, and Urban affairs shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $0 in budget authority and $187,000,000 in outlays in fiscal year 1990.

(3) The Senate Committee on Commerce, Science, and Transportation shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $450,000,000 in budget authority and $450,000,000 in outlays in fiscal year 1990.

(4) The Senate Committee on Environment and Public Works shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $450,000,000 in budget authority and $450,000,000 in outlays in fiscal year 1990.

(5)(A) The Senate Committee on Finance shall report (i) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (ii) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (iii) any combination thereof, sufficient to reduce budget authority and outlays as follows: $0 in budget authority and $2,300,000,000 in outlays in fiscal year 1990.

(B) The Senate Committee on Finance shall report changes in laws within its jurisdiction sufficient to increase revenues: $5,300,000,000 in fiscal year 1990.

(C) In addition to the instructions in subparagraphs (A) and (B), the Senate Committee on Finance shall report changes in laws within its jurisdiction sufficient to reduce outlays $468,000,000 in fiscal year 1990.

(6) The Senate Committee on Governmental Affairs shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $3,400,000,000 in budget authority and $2,870,000,000 in outlays in fiscal year 1990.

(7) The Senate Committee on Labor and Human Resources shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $70,000,000 in budget authority and $70,000,000 in outlays in fiscal year 1990.

(8) The Senate Committee on Veterans' Affairs shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $496,000,000 in budget authority and $666,000,000 in outlays in fiscal year 1990.

HOUSE COMMITTEES

(c)(1) The House Committee on Agriculture shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $1,168,000,000 in budget authority and $1,088,000,000 in outlays in fiscal year 1990 and $1,168,000,000 in budget authority, and $1,151,000,000 in outlays in fiscal year 1991.

(2) The House Committee on Banking, Finance and Urban Affairs shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $0 in budget authority and $187,000,000 in outlays in fiscal year 1990 and $0 in budget authority, and $17,000,000 in outlays in fiscal year 1991.

(3) The House Committee on Education and Labor shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $40,000,000 in budget authority and $40,000,000 in outlays in fiscal year 1990 and $40,000,000 in budget authority and $40,000,000 in outlays in fiscal year 1991.

(4) The House Committee on Energy and Commerce shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $399,000,000 in budget authority and $2,699,000,000 in outlays in fiscal year 1990 and $399,000,000 in budget authority and $2,699,000,000 in outlays in fiscal year 1991.

(5) The House Committee on Government Operations shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $3,400,000,000 in budget authority and $1,770,000,000 in outlays in fiscal year 1990 and $550,000,000 in budget authority in fiscal year 1991; and to increase outlays by $570,000,000 in fiscal year 1991.

(6) The House Committee on Interior and Insular Affairs shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $299,000,000 in budget authority and $299,000,000 in outlays in fiscal year 1990 and $299,000,000 in budget authority and $299,000,000 in outlays in fiscal year 1991.

(7) The House Committee on Merchant Marine and Fisheries shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $200,000,000 in budget authority and $200,000,000 in outlays in fiscal year 1990 and $200,000,000 in budget authority and $200,000,000 in outlays in fiscal year 1991.

(8) The House Committee on Post Office and Civil Service shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $3,400,000,000 in budget authority and $2,870,000,000 in outlays in fiscal year 1990 and $550,000,000 in budget authority in fiscal year 1991; and to increase outlays by $70,000,000 in fiscal year 1991.

(10) The House Committee on Veterans' Affairs shall report (A) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (B) changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (C) any combination thereof, sufficient to reduce budget authority and outlays as follows: $496,000,000 in budget authority and $666,000,000 in outlays in fiscal year 1990 and $553,000,000 in budget authority and $723,000,000 in outlays in fiscal year 1991.

(11)(A) The House Committee on Ways and Means shall report (i) changes in laws within its jurisdiction that provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget and Impoundment Control Act of 1974, (ii)

changes in laws within its jurisdiction that provide spending authority other than as defined in section 401(c)(2)(C) of the Act, or (iii) any combination thereof, sufficient to reduce budget authority and outlays as follows: $0 in budget authority and $2,300,000,000 in outlays in fiscal year 1990 and $0 in budget authority and $2,300,000,000 in outlays in fiscal year 1991.

(B) The House Committee on Ways and Means shall report changes in laws within its jurisdiction sufficient to increase revenues as follows: $5,300,000,000 in fiscal year 1990 and $5,300,000,000 in fiscal year 1991.

(C) In addition to the instructions in subparagraphs (A) and (B), the House Committee on Ways and Means shall report changes in laws within its jurisdiction sufficient (i) to reduce outlays, (ii) to increase revenues, or (iii) any combination thereof, as follows: $400,000,000 in fiscal year 1990 and $400,000,000 in fiscal year 1991.

SALE OF GOVERNMENT ASSETS

SEC. 6. (a) It is the sense of the Congress that—

(1) from time to time the United States Government should sell assets to nongovernment buyers; and

(2) the amounts realized from such asset sales will not recur on an annual basis and do not reduce the demand for credit.

(b) For purposes of allocations and points of order under section 302 of the Congressional Budget and Impoundment Control Act of 1974, the amounts realized from asset sales or prepayments of loans shall not be allocated to a committee and shall not be scored with respect to the level of budget authority or outlays under a committee's allocation under section 302 of such Act.

(c) For purposes of this section—

(1) the terms "asset sale" and "prepayment of a loan" shall have the same meaning as under section 257(12) of the Balanced Budget and Emergency Deficit Control Act of 1985 (as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987); and

(2) the terms "asset sale" and "prepayment of a loan" do not include asset sales mandated by law before September 18, 1987, and routine, ongoing asset sales and loan prepayments at levels consistent with agency operations in fiscal year 1986.

RESERVE FUND FOR CHILDREN

SEC. 7. (a)(1) In the Senate, it is assumed that budget authority and outlays may be allocated to the Senate Committee on Finance for increased funding for children, including funding through tax credits, if the Committee on Finance or the committee of conference reports funding legislation that—

(A) will, if enacted, make funds available for that purpose; and

(B) to the extent that the costs of such legislation are not included in this resolution, will not increase the deficit in this resolution for fiscal year 1990, and will not increase the total deficit for the period of fiscal years 1990 through 1992.

(2) Upon the reporting of legislation pursuant to paragraph (1), and again upon the submission of a conference report on such legislation (if such a conference report is submitted), the Chairman of the Committee on the Budget of the Senate may file with the Senate appropriately revised allocations under section 302(a) of the Congressional Budget Act of 1974 and revised functional levels and aggregates to carry out this section. Such revised allocations, functional levels, and aggregates shall be considered for the purposes of such Act as allocations, functional levels, and aggregates contained in this resolution. The Committee on Finance shall report revised allocations pursuant to section 302(b) of such Act for the appropriate fiscal year (or years) to carry out this section.

(b)(1) In the House, budget authority, outlays, and new entitlement authority shall be allocated to the House Committee on Ways and Means for increased funding for children's programs, including funding through tax credits, if the Committee on Ways and Means reports legislation that—

(A) will, if enacted, make funds available for that purpose; and

(B) to the extent that the costs of such legislation are not included in this resolution, will not increase the deficit in this resolution for fiscal year 1990, and will not increase the total deficit for the period of fiscal years 1990 through 1992.

(2) Upon the reporting of legislation pursuant to paragraph (1), the Chairman of the Committee on the Budget of the House shall file with the House appropriately revised allocations under section 302(a) of the Congressional Budget Act of 1974 and revised functional levels and aggregates to carry out this section. Such revised allocations, functional levels, and aggregates shall be considered for the purposes of such Act as allocations, functional levels, and aggregates contained in this resolution. The Committee on Ways and Means shall report revised allocations pursuant to section 302(b) of such Act for the appropriate fiscal year to carry out this section.

RESERVE FUND FOR MEDICAID

SEC. 8. (a) In the Senate, budget authority and outlays may be allocated to the Senate Committee on Finance for increased Medicaid funding if the Committee on Finance or the committee of conference reports Medicaid funding legislation that—

(1) will, if enacted, make funds available for that purpose; and

(2) to the extent that the costs of such legislation are not included in this resolution, will not increase the deficit in this resolution for fiscal year 1990, and will not increase the total deficit for the period of fiscal years 1990 through 1992.

(b) Upon the reporting of legislation pursuant to subsection (a), and again upon the submission of a conference report on such legislation (if such a conference report is submitted), the Chairman of the Committee on the Budget of the Senate may file with the Senate appropriately revised allocations under section 302(a) of the Congressional Budget Act of 1974 and revised functional levels and aggregates to carry out this section. Such revised allocations, functional levels, and aggregates shall be considered for the purposes of such Act as allocations, functional levels, and aggregates contained in this resolution. The Committee on Finance shall report revised allocations pursuant to section 302(b) of such Act for the appropriate fiscal year (or years) to carry out this section.

SEC. 9. RECONCILIATION IN THE SENATE.

It is the sense of the Senate that in the event that a committee of the House of Representatives acts in response to section 5 of this resolution to report to the House Committee on the Budget recommendations for legislation that would provide for increased Medicaid funding, the Senate shall adopt a revision of the instructions in section 5 of this resolution changing the instructions for the Senate Committee on Finance to incorporate the assumption for Medicaid increases reflected in this resolution and reflected in the allocations to the Committee on Finance under section 302(a) of the Congressional Budget Act of 1974.

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the Senate and the House at the conference on the disagreeing votes of the House on the amendment of the Senate to the concurrent resolution (H. Con. Res. 106) setting forth the congressional budget for the United States Government for the fiscal years 1990, 1991, and 1992, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

EXPLANATION OF CONFERENCE AGREEMENT

The following tables show the functional allocations and budget aggregates included in the conference agreement. The fiscal year 1990 columns show the budget aggregate and functional allocations for the budget resolution for fiscal year 1990. The columns for fiscal year 1991 and fiscal year 1992 show budget aggregates and functional allocations which the conferees consider appropriate for those years.

Conference agreement

	Billions
Fiscal year 1990:	
Budget authority	1,329.4
Outlays	1,165.2
Revenues	1,065.5
Deficit	−99.7
Debt subject to limit	3,122.7
Fiscal year 1991:	
Budget authority	1,426.2
Outlays	1,233.1
Revenues	1,144.7
Deficit	−88.4
Debt subject to limit	3,374.3
Fiscal year 1992:	
Budget authority	1,479.4
Outlays	1,282.3
Revenues	1,216.5
Deficit	−65.8
Debt subject to limit	3,600.7

Reconciliation Instructions

The House resolution included reconciliation instructions to eight House committees to report legislation to achieve savings in fiscal years 1990-92. The Senate amendment included instructions to eight Senate Committees for fiscal year 1990. The conference agreement includes reconciliation instructions directing ten House Committees for a period of two years and eight Senate Committees for fiscal year 1990.

The House resolution required that instruced committees respond by June 30, 1989. The Senate amendment required instructed committees to report by June 15, 1989. The conference agreement provides that committees must report by July 15, 1989.

[1] Less than $500,000.

FUNCTION 050

The House-passed resolution included $305.5 billion in budget authority and $299.2 billion in outlays. The Senate amendment and conference agreement each included $305.5 billion in budget authority and $299.2 billion in outlays. These levels correspond to those set forth in the Bipartisan Budget Agreement between the President and the Joint Leadership of Congress.

FUNCTION 150

The House-passed resolution included $18.3 billion in budget authority and $16.7 billion in outlays. The Senate amendment and conference agreement each included $18.3 billion in budget authority and $16.7 billion in outlays. These levels correspond to those set forth in the Bipartisan Budget Agreement between the President and the Joint Leadership of Congress.

FUNCTION 250

The House-passed resolution included $14.4 billion in budget authority and $14.125 billion in outlays. The Senate amendment included $14.2 billion in budget authority and $14.0 billion in outlays. The conference agreement includes $14.4 billion in budget authority and $14.1 billion in outlays.

FUNCTION 270

The House-passed resolution included $5.775 billion in budget authority and $3.8 billion in outlays. The Senate amendment included $6.1 billion in budget authority and $4.2 billion in outlays. The conference agreement includes $6.1 billion in budget authority and $4.2 billion in outlays.

FUNCTION 300

The House-passed resolution included $17.05 billion in budget authority and $17.525 billion in outlays. The Senate amendment included $17.4 billion in budget authority and $17.4 billion in outlays. The conference agreement includes $17.2 billion in budget authority and $17.4 billion in outlays.

FUNCTION 350

The House-passed resolution included $18.05 billion in budget authority and $14.95 billion in outlays. The Senate amendment included $18.3 billion in budget authority and $15 billion in outlays. The conference agreement includes $18.3 billion in budget authority and $15 billion in outlays.

FUNCTION 370

The House-passed resolution included $13.25 billion in budget authority and $8.125 billion in outlays. The Senate amendment included $21 billion in budget authority and $18.1 billion in outlays. The conference agreement includes $13.3 billion in budget authority and $8.5 billion in outlays.

FUNCTION 400

The House-passed resolution included $29.85 billion in budget authority and $29 billion in outlays. The Senate amendment included $30.4 billion in budget authority and $29.1 billion in outlays. The conference agreement includes $29.9 billion in budget authority and $29 billion in outlays.

FUNCTION 450

The House-passed resolution included $7.15 billion in budget authority and $6.775 billion in outlays. The Senate amendment included $7.3 billion in budget authority and $6.6 billion in outlays. The conference agreement includes $7.2 billion in budget authority and $6.7 billion in outlays.

FUNCTION 500

The House-passed resolution included $41.975 billion in budget authority and $39.075 billion in outlays. The Senate amendment included $40.7 billion in budget authority and $38.7 billion in outlays. The conference agreement includes $41.5 billion in budget authority and $38.9 billion in outlays.

FUNCTION 550

The House-passed resolution included $57.825 billion in budget authority and $56.2 billion in outlays. The Senate amendment included $57.5 billion in budget authority and $55.8 billion in outlays. The conference agreement includes $57.7 billion in budget authority and $56 billion in outlays.

FUNCTION 570

The House-passed resolution included $123.85 billion in budget authority and $98.35 billion in outlays. The Senate amendment included $122.4 billion in budget authority and $98.2 billion in outlays. The conference agreement includes $123.9 billion in budget authority and $98.5 billion in outlays.

FUNCTION 600

The House-passed resolution included $185.675 billion in budget authority and $145.625 billion in outlays. The Senate amendment included $185.4 billion in budget authority and $145.6 billion in outlays. The conference agreement includes $185.6 billion in budget authority and $145.6 billion in outlays.

FUNCTION 650

The House-passed resolution included $316.975 billion in budget authority and $249.075 billion in outlays. The Senate amendment included $317 billion in budget authority and $249.4 billion in outlays. The conference agreement includes $317 billion in budget authority and $249.1 billion in outlays.

FUNCTION 700

The House-passed resolution included $31.225 billion in budget authority and $29.975 billion in outlays. The Senate amendment included $30.8 billion in budget authority and $30 billion in outlays. The conference agreement includes $31.1 billion in budget authority and $30 billion in outlays.

FUNCTION 750

The House-passed resolution included $10.375 billion in budget authority and $9.925 billion in outlays. The Senate amendment included $11.1 billion in budget authority and $10.4 billion in outlays. The conference agreement includes $10.7 billion in budget authority and $10.1 billion in outlays.

FUNCTION 800

The House-passed resolution included $10.05 billion in budget authority and $9.65 billion in outlays. The Senate amendment included $10.2 billion in budget authority and $9.9 billion in outlays. The conference agreement includes $10.1 billion in budget authority and $9.8 billion in outlays.

FUNCTION 900

The House-passed resolution included $181.025 billion in budget authority and $181.025 billion in outlays. The Senate amendment and conference agreement each included $181 billion in budget authority and $181 billion in outlays.

FUNCTION 920

The House-passed resolution included $0.000 in budget authority and $−19.275 billion in outlays. The Senate amendment included $−0.3 billion in budget authority and $−1.4 billion in outlays. The conference agreement included $−21.2 billion in budget authority and $−19.3 billion in outlays.

FUNCTION 950

The House-passed resolution included $−37.375 billion in budget authority and $−44.575 billion in outlays. The Senate amendment included $−66.8 billion in budget authority and $−72 billion in outlays. The conference agreement includes $−38.2 billion in budget authority and $−45.3 billion in outlays.

REVENUES

The House-passed resolution, Senate amendment, and conference agreement each provided for a fiscal year 1990 revenue level of $1,065.5 billion. Consistent with the Bipartisan Budget Agreement between the President and the Joint Leadership of Congress, this level assumes a $5.3 billion increase from changes in tax law and a $0.5 billion increase from an IRS tax compliance initiative. Revenue resulting from an appropriation for this initiative, which is not within the jurisdiction of the tax-writing committees, is not subject to, nor credited towards, reconciliation.

ECONOMIC ASSUMPTIONS

The Conferees accepted the economic assumptions used in the House- and Senate-passed resolutions as the basis for the aggregate budget estimates. These economic assumptions were the basis for the Bipartisan Budget Agreement, and were prepared by the administration for the budget revisions submitted to the Congress in February. The economic assumptions are displayed in the table below.

ECONOMIC ASSUMPTIONS

[Calendar years]

	Actual 1988	Projected 1989	1990	1991	1992
Annual averages:					
Gross national product (billion dollars)	4,860	5,219	5,577	5,947	6,304
Percent change	7.4	7.4	6.9	6.6	6.0
Real GNP (billion 1982 dollars)	3,994	4,126	4,257	4,399	4,541
Percent change	3.8	3.3	3.2	3.3	3.2
GNP deflator (percent change)	3.4	4.0	3.6	3.2	2.7
Consumer Price Index (percent change)	4.0	3.8	3.7	3.2	2.7

ECONOMIC ASSUMPTIONS—Continued

[Calendar years]

	Actual 1988	Projected 1989	1990	1991	1992
Civilian Unemployment Rate (percent)	5.5	5.3	5.2	5.0	5.0
3-month Treasury bill rate (percent)	6.7	7.4	5.5	4.5	4.0
10-year Treasury note rate (percent)	8.9	8.6	7.2	6.0	5.0
Taxable incomes (billion dollars):					
Wages and salaries	2,436	2,609	2,783	2,973	3,163
Corporate profits before tax	302	352	399	442	475
Fourth quarter to fourth quarter (percent change):					
Gross national product	6.8	7.3	7.0	6.4	5.8
Real GNP	2.6	3.5	3.4	3.3	3.2
GNP deflator	4.1	3.7	3.5	3.0	2.5
Consumer Price Index	4.3	3.6	3.5	3.0	2.5
Civilian unemployment rate (percent, fourth quarter level)	5.4	5.2	5.1	5.0	5.0

Report Language

The Conferees intend that language in the reports of the Senate and House Committees on the Budget on the concurrent resolution on the budget that has not been modified by this conference report remains as a source of legislative history on the drafters' intent on the concurrent resolution.

Miscellaneous Provisions

The House resolution contained one provision stating the sense of the Committee on the Budget regarding items provided in the Bipartisan Budget Agreement Between the President and the Joint Leadsership of Congress.

The Senate amendment contained 22 miscellaneous provisions regarding: the debt increase as one measure of deficit, the deficit levels excluding trust fund surpluses, the corresponding levels of gross interest on the public debt, the sale of government assets, a reserve fund for subsidized housing contract renewals, a reserve fund for Medicaid, a reserve fund for IRS compliance, fuel excise taxes, further deficit reduction, Social Security trust fund surpluses, Anti-Drug Abuse Act of 1988 funding, more truthful presentation of deficit, a reserve fund for children, funds for prison expenses, a biennial budget process, the current services baseline, World Health Organization and PLO membership, reducing the generation of carbon dioxide, the national aerospace plane, Bipartisan Budget Agreement language on revenue legislation, implementation of deficit reduction, disaster assistance, and the public debt limit.

The conference agreement contains the following four miscellaneous provisions on the sense of the Congress regarding Bipartisan Budget Agreement language on revenue legislation, the sale of government assets, a reserve fund for children, and a reserve fund for Medicaid.

Bipartisan Budget Agreement Language

Section 23 of the Senate amendment stated the assumption that (as stated in paragraph 10 of the Bipartisan Budget Agreement) agreements reached between the administration and the Congressional tax-writing committees on revenue legislation reconciled pursuant to this resolution will be advanced legislatively when supported by the President.

Section 4 of the House resolution stated the intent of the House Committee on the Budget that (as stated in paragraph 5 of the Bipartisan Budget Agreement) Congress shall present the revenue portion of the reconciliation bill to the President at the same time as the spending reduction provisions of the reconciliation bill, and that (as stated in paragraph 10 of the Bipartisan Budget Agreement) the specific measures composing the governmental receipts figure will be determined through the regular legislative and constitutional process, and agreements reached between the administration and the Ways and Means Committee on revenue legislation reconciled pursuant to this agreement will be advanced legislatively when supported by the President.

The conference report contains a sense of the Congress provision similar to the House provision that also notes the participation of the Committee on Finance.

Sale of Government Assets

Section 7 of the Senate amendment was a provision on asset sales identical to that in the concurrent resolution on the budget for fiscal year 1989. That provision, in turn, was a combination of two provisions in the concurrent resolution on the budget for fiscal year 1988. The section would prevent the use for spending in fiscal year 1990 of the proceeds from asset sales and loan prepayments. It would do this by prohibiting the counting of asset sales for purposes of the allocations to committees under section 302 of the Congressional Budget Act of 1974. This provision is consistent with section 251(a)(6)(I) of the Balanced Budget and Emergency Deficit Control Act of 1985, which prohibits counting asset sales and loan prepayments for the purposes of determining whether that Act calls for across-the-board cuts.

The House resolution had no such provision, but report language addressed this rule.

The conference report includes the provision.

Reserve Fund for Children

Section 16 of the Senate amendment provided a reserve fund for children similar in form to the language for the Medicare catastrophic insurance initiative in the Senate in the concurrent resolutions on the budget for fiscal years 1988 and 1989 and the anti-drug initiative in both Houses in the concurrent resolution on the budget for fiscal year 1989. Specifically, section 16 of the Senate amendment provided that budget authority and outlays may be allocated to the Senate Committee on Finance for increased funding for children (including funding through tax credits) if the Committee on Finance or the conference committee reports funding legislation that will make funds available for that purpose and will not increase the deficit in the resolution. When that legislation is reported and again upon the submission of a conference report, the Chairman of the Committee on the Budget may file with the Senate appropriately revised allocations under section 302(a) of the Congressional Budget Act of 1974 and revised functional levels and aggregates to carry out this section.

The House resolution had no such provision.

The conference report includes the provision plus a similar, parallel section covering the House. The House provision does not include reference to conference committees because the House conferees believe that the language regarding the Committee on Ways and Means will also cover a report submitted by the committee of conference on legislation that originated in the Committee on Ways and Means.

Reserve Fund for Medicaid

Section 9 of the Senate amendment set forth a reserve fund provision for Medicaid funding that is very similar to that for children in the Senate amendment and those for the Medicare catastrophic insurance initiative in the Senate in the concurrent resolutions on the budget for fiscal years 1988 and 1989 and the anti-drug initiative in both Houses in the concurrent resolution on the budget for fiscal year 1989. Specifically, section 9 of the Senate amendment provided that budget authority and outlays may be allocated to the Senate Committee on Finance for increased Medicaid funding if the Committee on Finance or the conference committee reports funding legislation that will make funds available for that purpose and will not increase the deficit in the resolution. When that legislation is reported and again upon the submission of a conference report, the Chairman of the Committee on the Budget may file with the Senate appropriately revised allocations under section 302(a) of the Congressional Budget Act of 1974 and revised functional levels and aggregates to carry out this section.

The House resolution had no such provision.

The conference report contains the provision, applicable only in the Senate.

Reconciliation in the Senate

The conference report also contains a section stating the sense of the Senate that in the event that a House Committee intended in its response to the reconciliation instructions of this resolution to the House Committee on the Budget recommendations for legislation that would provide for increased Medicaid funding, the Senate shall adopt a revision of the reconciliation instructions in this resolution changing the instructions for the Senate Committee on Finance to incorporate the assumption for Medicaid increases reflected in this resolution and reflected in the allocations to the Committee on Finance under section 302(a) of the Congressional Budget Act of 1974.

Implicit Marginal Tax Rates on the Income of the Elderly

The Conferees request that the Senate Committee on Finance and the House Committee on Ways and Means examine the combined impact on the implicit marginal tax rates on the income of the elderly caused by:

(1) Federal income tax rates,

(2) taxation of Social Security benefits,

(3) the Social Security earnings test, and

(4) the income-related premium for Catastrophic Health Insurance.

Funding for Subsidized Housing Contract Renewals

It is the intent of the Senate Conferees and the Republican House Conferees that the amounts assumed in the CBO alternative baseline for subsidized housing contract renewals shall be provided for such contract renewals, consistent with the Bipartisan Budget Agreement. Further, it is the intent of the Senate Conferees that the concurrent resolutions on the budget for 1991 and the out-years will also reflect the commitment to renewing all expiring contracts when the resources necessary for renewing this assistance to low-income families will be so much greater. The Senate Leadership, the Chairman of the Senate Committee on Appropriations, and the Chairman of the Subcommittee on Veterans, HUD, and Independent Agencies of the Senate Committee on Appropriations have indicated their intention

that such funding will be provided in the appropriate legislation.

It is the intent of the Democratic House Conferees that the amounts assumed in the resolution for subsidized housing contract renewals shall be provided for such renewals without prejudice to the form or length of such renewals. Further, the House Leadership and the Chairman of the Subcommittee on Veterans, HUD and Independent Agencies of the House Committee on Appropriations have indicated their intention that such funding will be provided in the appropriate legislation.

FUNDING FOR IRS COMPLIANCE

It is the intent of the conferees that the amounts assumed in the resolution for IRS compliance shall be provided in order to raise the assumed amounts of additional revenues from increased IRS compliance funding consistent with the Bipartisan Budget Agreement. The House Leadership has indicated its intention that such funding will be provided in the appropriate legislation.

OTHER MISCELLANEOUS PROVISIONS IN THE SENATE AMENDMENT

The Conferees for the Senate adhere to the following positions on anti-drug and law enforcement funding, more truthful presentation of deficit, reducing the generation of greenhouse gases, implementation of deficit reduction, and disaster assistance.

ANTI-DRUG AND LAW ENFORCEMENT FUNDING

The Senate Conferees assume that sufficient funding is available to support the increases provided in the Anti-Drug Abuse Act of 1988 and that such funding is consistent with the need to maintain the even balance in that Act between new spending to reduce drug supply and new spending to reduce drug demand.

The Senate Conferees also assume that within function 750, there are sufficient funds available to support a Federal expenditure level of $1 billion in drug-related correctional activities at the Federal, state and local levels.

MORE TRUTHFUL PRESENTATION OF DEFICIT

The Conferees for the Senate find that:

(1) this concurrent resolution on the budget for fiscal year 1990 is within the parameters established by the President, and even if inadequate, is essential to keep the Government in operation;

(2) this resolution sets forth the deficit at only $99,700,000,000;

(3) one measure of the deficit, the increase in the public debt subject to limitation, is fully $264,300,000,000;

(4) the Federal debt will rise to fully $3,122,700,000,000 in 1990; and

(5) the level of gross interest on the public debt will be $262,500,000,000 in fiscal year 1990;

The Conferees for the Senate believe that:

(1) as set forth in the Senate amendment, the budget submitted by the President under section 1105 of title 31 of the United States Code and the concurrent budget resolution for fiscal year 1991, in order to more truthfully set forth the deficit, should reflect at least the following changes:

(A) all Social Security and other Federal retirement funds must be accounted for separately;

(B) all gross interest on the public debt subject to limitation must be fully reported and reflected; and

(C) the increase in the gross Federal debt that is subject to the legal debt limit should be shown as a measure of the deficit.

(2) Because a multi-year plan of debt and deficit reduction, based on sound economic assumptions, appears imperative, the President is requested to advise the Congress of any proposals relative to the reduction of the national debt, and to inform the Congress whether additional revenues are required for debt and deficit reduction, and if so, the President is invited to make specific revenue recommendations.

REDUCING THE GENERATION OF GREENHOUSE GASES

The Senate Conferees find that:

(1) the concentration of the so-called "greenhouse" gases—including carbon dioxide, methane, nitrous oxide, chlorofluorocarbons, and tropospheric ozone—is rising;

(2) since the advent of the industrial revolution 150 years ago, a number of scientific experts estimate that the atmospheric concentration of

(A) carbon dioxide, the most prevalent of these gases, has increased by 25 percent;

(B) methane has increased by 100 percent;

(C) nitrous oxide has increased by 10 percent;

(D) chlorofluorocarbon compounds (CFC's) have increased from zero 60 years ago at an average rate of 5 percent per year; and

(E) tropospheric ozone continues to increase by 1 percent per year;

(3) a large number of the world's leading scientists, including members of National Science Foundation, have warned policy makers that

(A) increased concentrations of these gases will alter climate; and

(B) such climatic alterations could have devastating effects on weather patterns, agricultural productivity, coastal population centers due to rising sea levels, and biological health;

(4) the majority of these gases are generated in the production of energy;

(5) in 1988, the Department found, based on data collected for the 1985 National Energy Policy Plan, that the United States' generation of carbon dioxide would increase from 1985 levels by 38 percent in the year 2010;

(6) leading scientific experts of the world, including members of the National Academy of Sciences, the National Academy of Engineering, and the Institute of Medicine have urged the President to take action to reduce the generation of these gases by the United States;

(7) international negotiations are underway to develop strategies to reduce the generation of these gases;

(8) the United States is chair of the Response Strategies Working Group of the Intergovernmental Panel on Climate Change (IPCC), which was established by the United Nations Environment Programme and the World Meteorological Organization;

(9) at the first meetings of the IPCC's Response Strategies Working Group, the Secretary of State urged that global solutions to global climate change be as specific and cost-effective as they can possibly be;

(10) it is imperative that the United States and all nations take immediate steps to protect the global environment; and

(11) without action by the United States to protect the global environment, our ability to convince other nations to act on concerns such as global climate change will be constrained.

The Senate conferees believe that United States policy on global warming should be:

(1) to reduce the generation of greenhouse gases;

(2) to hold, in 1989, a global conference on the environment, hosted by the President;

(3) to encourage other nations to undertake measures to reduce the generation of greenhouse gases;

(4) to develop binding multilateral agreements with other nations by the end of calendar year 1992, or as early as practicable, to reduce the global generation of greenhouse gases;

(5) to encourage the worldwide protection of tropical rain forests;

(6) to require each Federal agency to examine its programs to determine the impact of global warming on its missions and activities and to evaluate and propose policies under its authority that could reduce the generation of greenhouse gases;

(7) to develop new technologies and better utilize existing technologies that will provide reliable supplies of energy and service for the citizens of the United States while reducing the generation of greenhouse gases.

The Senate conferees also believe that the United States Government should adopt a position with respect to a "Framework Global Climate Convention," and through its representative to the Intergovernmental Panel on Climate Change, should begin discussions on such a convention when it chairs the next meeting of the "Response Strategies Working Group."

To the maximum extent practical, the priorities set forth in this section should be reflected in the Federal budget.

IMPLEMENTATION OF DEFICIT REDUCTION

The conferees for the Senate find:

(1) The Bipartisan Budget Agreement represents the action most probable to avoid a budget impasse and sequester.

(2) The achievement of a reduction in the Federal budget deficit through agreement rather than confrontation between the President and Congress is in the national interest.

(3) National security and international leadership rest on the foundation of a strong economy, capable of financing internally its investment needs.

The conferees for the Senate believe that:

(1) The Bipartisan Budget Agreement should be fully and quickly implemented;

(2) The Leadership of Congress and the Administration should immediately authorize resumption of negotiations aimed at a multi-year deficit reduction package, leading to a balanced Federal budget;

(3) The economic and budgetary assumptions underlying the multi-year agreement should be based on sound and realistic forecasts; and

(4) The bipartisan, cooperative effort that made the Bipartisan Budget Agreement possible should be sustained in addressing the nation's remaining budgetary problems.

DISASTER ASSISTANCE

The Senate conferees believe that legislation should be adopted to mitigate financial hardship caused by the current drought. The Senate conferees find the following:

(1) agricultural producers in several Midwestern and Southwestern States have experienced adverse weather conditions since planting the 1989 crop of winter wheat, including a lack of rainfall, freeze damage, high-velocity windstorms, and record-breaking high temperatures;

(2) such extreme conditions have combined to severely damage winter wheat production in several States, including Kansas,

Oklahoma, Texas, Nebraska, Colorado, and New Mexico;

(3) the Kansas Wheat Quality Council, after a recent 3-day tour of these States, estimated that production in the Texas and Oklahoma Panhandles would be only one-third of normal;

(4) the mean average of 68 estimates of the 1989 crop of winter wheat in Kansas projected only 209,000,000 bushels of wheat; and

(5) current budget estimates reveal there will be substantial savings resulting from higher prices and lower deficiency payments that could be applied toward disaster payments for drought-stricken winter wheat producers through an extension of the Disaster Assistance Act of 1988 (7 U.S.C. 1421 note).

In light of these conditions, the Senate conferees believe that:

(1) legislation should be enacted to extend the Disaster Assistance Act of 1988 (7 U.S.C. 1421 note) to apply to losses due to adverse weather conditions in 1988 or 1989 for agricultural commodities planted in 1988 for harvest in 1989;

(2) such legislation should not add to the deficit and such legislation should not discriminate against other program crops;

(3) such legislation should not discriminate against producers who are currently covered by Federal crop insurance; and

(4) drought assistance should be enacted in a timely fashion so as to ensure that savings from higher prices and lower deficiency payments offset the cost of such assistance.

PUBLIC DEBT LIMIT IN THE HOUSE

Rule XLIX of the House of Representatives sets forth a procedure for increasing the level of the public debt. The rule blends the public debt limit increase into the congressional budget process which, by setting the budget totals, determines what amount of debt must be outstanding.

Upon final passage by both bodies of the concurrent resolution on the budget, the public debt level for fiscal year 1990 set forth in the resolution becomes the substance of a joint resolution, is deemed passed by the House, and is sent to the Senate for its approval. If the Senate approves the joint resolution without amendment, the joint resolution is sent to the President for signature. The public debt level in the joint resolution becomes effective upon signature by the President. (If the Senate amends the joint resolution, then it would return to the House for further action.)

Pursuant to the rule, the text of the joint resolution would be as follows:

That subsection (b) of section 3101 of title 31, United States Code, is amended by striking out the dollar limitation contained in such subsection and inserting in lieu thereof $3,122,700,000,000.

Legislative jurisdiction over the public debt remains in the Committee on Ways and Means. The rule does not preclude that committee from originating public debt bills whenever necessary.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. FRANK) and to include extraneous matter:)

Mr. MONTGOMERY, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. SKELTON, for 30 minutes, today.

Mr. MORRISON of Connecticut, for 5 minutes, on May 16.

Mr. BILBRAY, for 5 minutes, on May 16.

Mr. SCHUMER, for 60 minutes, on May 16.

Mr. SKELTON, for 30 minutes, on May 16.

Mr. GONZALEZ, for 60 minutes, on May 16.

Mr. GONZALEZ, for 60 minutes, on May 17.

Mr. GONZALEZ, for 60 minutes, on May 18.

Mr. HOCHBRUECKNER, for 60 minutes, on May 24.

(The following Member (at his own request) to revise and extend his remarks and include extraneous material:)

Mr. OBERSTAR, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Member (at the request of Mr. DUNCAN) and to include extraneous matter:)

Mr. CONTE in three instances.

(The following Members (at the request of Mr. FRANK) to revise and extend their remarks and include extraneous material:)

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. SKELTON.

Mr. ROE in two instances.

Mr. LAFALCE.

Mr. COELHO.

Mr. BORSKI.

Mr. ECKART.

Mr. DELLUMS.

Mr. HAMILTON.

Mr. RICHARDSON in two instances.

SENATE CONCURRENT RESOLUTION REFERRED

A concurrent resolution of the Senate of the following titles was taken from the Speaker's table and, under the rule, referred as follows:

S. Con. Res. 26. Concurrent resolution urging first asylum countries of the Association of Southeast Asia, Nations (ASEAN) to reinstate the practice of providing refuge to all asylum-seekers from Vietnam, and for other purposes; to the Committee on Foreign Affairs.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resoluition of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 247. Joint resolution designating May 29, 1989 as the "National Day of Remembrance for the Victims of the U.S.S. *Iowa*."

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and a joint resolution of the Senate of the following titles:

S. 968. An act to delay the effective date of section 27 of the Office of Federal Procurement Policy Act; and

S.J. Res. 37. Joint resolution designating the week beginning May 14, 1989, and the week beginning May 13, 1990, as "National Osteoporosis Prevention Week."

ADJOURNMENT

Mr. OBERSTAR. Mr. Speaker, I move that the House do now adjourn.

The motion was ageed to; accordingly (at 12 o'clock and 42 minutes p.m.) the House adjourned unti tomorrow, Tuesday, May 16, 1989, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1179. A letter from the Deputy Secretary of Defense, transmitting a baseline deviation notice received from the Navy concerning the T45TS program, a defense enterprise program, pursuant to 10 U.S.C. 2437; to the Committee on Armed Services.

1180. A letter from the Director for Administration and Management, Office of the Secretary of Defense, transmitting a report on real and personal property of the Department as of September 30, 1988, pursuant to 10 U.S.C. 2701(b); to the Committee on Armed Services.

1181. A letter from the Deputy General Counsel, Department of Defense, transmitting a draft of proposed legislation to authorize appropriations for fiscal years 1990

and 1991 for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal years 1990 and 1991, and for other purposes, pursuant to 31 U.S.C. 1110; to the Committee on Armed Services.

1182. A letter from the Deputy General Counsel, Department of Defense, transmitting a draft of proposed legislation to amend title 10 and 37, United States Code, and other authorities to extend and to make permanent certain expiring laws; to the Committee on Armed Services.

1183. A letter from the General Counsel, Department of the Treasury, transmitting a draft of proposed legislation to provide for participation by the United States in a capital increase of the Inter-American Development Bank, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

1184. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

1185. A letter from the Assistant Secretary of the Army (Civil Works), transmitting an informational copy of a report of the Chief of Engineers, dated December 17, 1987, which recommends modification of the previously authorized flood protection plan on the Rio Grande Floodway. Truth or Consequences Unit, NM, with other pertinent reports; to the Committee on Public Works and Transportation.

1186. A letter from the Acting Administrator, General Services Administration, transmitting informational copies of various lease prospectuses, pursuant to 40 U.S.C. 606(a); to the Committee on Public Works and Transportation.

1187. A letter from the Acting Administrator, General Services Administration, transmitting an informational copy of a repair and alteration prospectus for the B.F. Sisk Federal Building-U.S. Courthouse in Fresno, CA; to the Committee on Public Works and Transportation.

1188. A letter from the Deputy General Counsel, Department of Defense, transmitting a draft of proposed legislation to establish certain positions in the Department of Defense at level IV of the Executive Schedule; jointly, to the Committees on Armed Services and Post Office and Civil Service.

1189. A letter from the Comptroller General, General Accounting Office, transmitting a copy of the report "Homelessness—HUD's and FEMA's Progress in Implementing the McKinney Act" (GAO/RCED-89-50, May 1989), pursuant to 42 U.S.C. 11304; jointly, to the Committees on Banking, Finance and Urban Affairs and Government Operations.

1190. A letter from the Comptroller General, General Accounting Office, transmitting results of the audit of the Federal Housing Administration Fund's statement of financial position as of September 30, 1988 (GAO/AFMD-89-3, May 1989), pursuant to 31 U.S.C. 8016(a); jointly, to the Committees on Government Operations and Banking, Finance and Urban Affairs.

1191. A letter from the Secretary of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 10 and title 38, United States Code, to make certain improvements in the educational assistance programs for veterans and eligible persons, and for other purposes; jointly, to the Committees on Veterans' Affairs and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 643. A bill to amend section 37 of the Mineral Leasing Act relating to oil shale claims, and for other purposes; with an amendment (Rept. 101-49). Referred to the Committee of the Whole House on the State of the Union.

Mr. PANETTA: Committee of conference. Conference report on House Concurrent Resolution 106 (Rept. 101-50). Order to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MONTGOMERY (by request):

H.R. 2342. A bill to amend title 38, United States Code, to revise the provisions relating to refinancing loans and manufactured housing loans to veterans, to modify the procedures for the sale of loans by the Secretary of Veterans' Affairs, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. TAUKE:

H.R. 2343. A bill to extend the jurisdiction of the Interstate Commerce Commission to include approval of the acquisition of control of certain rail carriers by persons that are not carriers; to the Committee on Energy and Commerce.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

87. By the SPEAKER: Memorial of the General Assembly of the State of Indiana, relative to Federal funds for interstitial cystitis public education and research; to the Committee on Energy and Commerce.

88. Also, memorial of the Legislature of the State of Idaho, relative to compensation for U.S. Senators and U.S. Representatives; to the Committee on the Judiciary.

89. Also, memorial of the General Assembly of the State of Indiana, relative to the 10 amendment to the Constitution of the United States; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 40: Mr. COX.

H.R. 49: Mr. HANCOCK, and Mr. PAXON.

H.R. 132: Mr. BOSCO, Mrs. UNSOELD, Mr. FORD of Michigan, and Mr. FRANK.

H.R. 182: Mr. WEISS, Mr. ATKINS, Mr. DYMALLY, and Mr. GILMAN.

H.R. 250: Ms. SNOWE.

H.R. 534: Mr. SMITH of New Jersey.

H.R. 646: Mr. BILIRAKIS.

H.R. 720: Mr. STUDDS.

H.R. 799: Mr. SMITH of Texas.

H.R. 854: Mr. RINALDO and Mrs. SAIKI.

H.R. 901: Mr. JOHNSON of South Dakota.

H.R. 1101: Mr. OLIN, Mr. PICKETT, Mr. PEPPER, and Mr. HOPKINS.

H.R. 1102: Mr. BUECHNER.

H.R. 1292: Mr. ATKINS.

H.R. 1467: Mr. SCHUETTE.

H.R. 1593: Mr. REGULA, Mr. HILER, Mr. LELAND, Mr. GARCIA, Mrs. UNSOELD, Mr. FROST, Mr. SAVAGE, Mr. BEREUTER, Mr. BUECHNER, Mr. GEJDENSON, Mr. RAVENEL, Mr. RIDGE, Mr. JACOBS, Mr. TAUKE, Mr. MCEWEN, Mr. HAYES of Illinois, Mr. RAY, Mr. BROWN of California, Mr. SCHAEFER, Mr. FUSTER, Mr. BROOMFIELD, Mr. CLAY, Mr. FAZIO, Mr. FAWELL, Mr. BARNARD, Mrs. COLLINS, Mr. ATKINS, Mr. STUDDS, Mr. HORTON, and Mr. DANNEMEYER.

H.R. 1605: Mr. SAXTON, Mr. NEAL of Massachusetts, Mr. BATEMAN, and Mr. ENGEL.

H.R. 1645: Mr. SHUMWAY and Mrs. VUCANOVICH.

H.R. 1706: Mr. APPLEGATE, Mr. HENRY, and Mr. DYMALLY.

H.R. 1730: Mr. PALLONE and Mrs. JOHNSON of Connecticut.

H.R. 1850: Mr. WHEAT.

H.R. 1851: Mr. WHEAT.

H.R. 2049: Mr. HUGHES, Mr. KENNEDY, Mr. GUNDERSON, Mr. UPTON, Mr. RAY, Mr. KLECZKA, and Mr. KOLTER.

H.R. 2102: Mr. PARRIS and Mrs. BENTLEY.

H.R. 2124: Mr. GUARINI.

H.R. 2126: Mr. GUNDERSON, Mr. LEWIS of Georgia, Mr. LANCASTER, Ms. PELOSI, Mr. TOWNS, Mr. WAXMAN, and Mr. LIPINSKI.

H.R. 2131: Mr. TORRICELLI, Mr. PAYNE of New Jersey, and Mr. COYNE.

H.R. 2145: Mr. CARR, Mr. COURTER, Mr. JAMES, and Mr. MARTINEZ.

H.R. 2238: Mr. HENRY, Mr. TRAFICANT, Mr. FUSTER, Mr. TOWNS, Mr. HERTEL, Mrs. SAIKI, and Mr. KOLTER.

H.R. 2290: Mr. MRAZEK, Mr. WOLF, and Mr. FUSTER.

H.J. Res. 123: Mr. DAVIS, Mr. GEKAS, Mr. HOPKINS, Mr. IRELAND, Mr. KASICH, Mr. WISE, Mr. TRAFICANT, Mr. OWENS of Utah, Mr. SCHUETTE, Mr. BENNETT, and Mr. COYNE.

H.J. Res. 174: Mr. THOMAS A. LUKEN, Mr. NAGLE, Mr. MOLLOHAN, Mr. WOLPE, Mr. MADIGAN, Mr. SMITH of Vermont, Mr. WHITTEN, Mr. GEKAS, Mr. PACKARD, Mr. HOPKINS, Mrs. KENNELLY, Mr. ERDREICH, Mr. APPLEGATE, Mr. MCCLOSKEY, Mr. UPTON, Mr. NOWAK, Mr. RAY, Mr. SHAYS, Mrs. LOWEY of New York, Mr. WAXMAN, Mr. OWENS of Utah, Mr. SMITH of Iowa, Mr. OBERSTAR, Mr. RICHARDSON, Mr. HOYER, Mr. GARCIA, and Mr. ROTH.

H.J. Res. 241: Mr. CONYERS, Mr. SAVAGE, Mr. PACKARD, Mr. KILDEE, Mr. HAYES of Illinois, Mr. DINGELL.

H.J. Res. 243: Mr. WILSON, Mr. SMITH of New Jersey, Mr. RANGEL, Mr. ATKINS, Mr. GREEN, Mr. LAGOMARSINO, Mrs. BOXER, Mr. WEISS, Mr. LANCASTER, Mr. FROST, Mr. BONIOR, Mrs. ROUKEMA, and Mr. AUCOIN.

H. Con. Res. 66: Mr. DURBIN and Mr. BATES.

H. Con. Res. 77: Mrs. UNSOELD.

H. Con. Res. 105: Mr. LEWIS of Georgia, Mr. REGULA, Mr. PAXON, Mr. LEVINE of California, and Mrs. BENTLEY.

H. Res. 120: Mr. DICKS, Mr. GEJDENSON, Mrs. MORELLA, Mr. FAUNTROY, Mr. WOLPE, Mr. HORTON, Mr. ATKINS, Mr. OWENS of New York, Mr. LAGOMARSINO, Mr. FALEOMAVAEGA, Mr. PAYNE of New Jersey, Mr. LEVIN of Michigan, Mr. FOGLIETTA, and Mr. OBERSTAR.

H. Res. 122: Mrs. BYRON.

PETITIONS, ETC.

Under clause 1 of rule XXII,

40. The SPEAKER presented a petition of Hunt County Commissioners Court, Greenville, TX, relative to employee benefit plans; which was referred to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

SECRETARY MOSBACHER ON GOVERNMENT-INDUSTRY PARTNERSHIP

HON. JOHN J. LaFALCE
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. LaFALCE. Mr. Speaker, I would like to insert in the RECORD Commerce Secretary Mosbacher's speech on "America's Economic Security," delivered this past Monday before the Economic Club of Detroit. I believe the speech constitutes a breakthrough because it represents the first time that a senior member of either the Reagan or Bush administrations has publicly acknowledged the need for an active and explicit government-industry partnership to enhance American competitiveness.

I am struck sometimes when people talk about "industrial policy," or "government-industry partnership," as though it is a completely new and untested idea. The truth is that we have had such partnerships in a number of areas for many decades now. I think it is fair to say that in some cases those partnerships were a complete flop, like the effort to build the supersonic transport in the early 1970's. But other government-industry partnerships have been phenomenally productive.

For instance, the Federal and State governments have funded between one-half and three quarters of all agricultural R&D, both basic and applied, over the past 50 years, during which time productivity has grown faster in agriculture than in any other broadly defined sector of the economy. And how many people know that before the early 1950's the Federal Government funded all significant aspects of R&D on computers, was the sole purchaser of computers, and, by sponsoring research and conferences, created the community of scientists that would become the foundation of the modern-day computer industry? A similar story can be told for semiconductors—both the silicon transistor and the integrated circuit were developed with the military envisioned as the first large customer.

However, if Secretary Mosbacher is serious about government-industry partnership, why does the Bush administration oppose funding the Competitiveness Policy Council called for in last year's omnibus trade bill? Their position makes no sense to me. We are not talking about a lot of money. But we are talking about an advisory council that can provide what so many people both in and out of government have called for—a systematic, government-wide approach to identifying profitable areas for government-industry-labor-academic partnerships to enhance American competitiveness. What are we waiting for? Secretary Mosbacher, we need to get beyond the rhetoric of a speech, and establish a mechanism to make industry-government-labor cooperation a reality.

Mr. Speaker, I insert the full text of Secretary Mosbacher's speech in the RECORD:

AMERICA'S ECONOMIC SECURITY—
RECAPTURING THE LEAD IN THE 1990'S

Thank you. I am pleased to speak in your great industrial center about America's challenge to ensure this Nation's economic security in the 1990s.

By way of introduction, let me say that I come here as one of you. I am a businessman, the only difference being I'm on furlough to do government work.

I've been in business 40 years of my life. I'm a wildcatter. I'm a competitor. I've met a payroll. Above all, I believe that economic liberty, free markets and industrious and inventive people are the keys to a prosperous and strong America.

It was in behalf of that cause that I answered the call from President Bush, my friend of over 30 years. I want to bring more business awareness to Washington—and more people with business experience who understand how to solve real world problems.

I believe Government should be your partner, not your patorn. But as partners, we must kindle a greater sense of urgency to solve this Nation's problems.

America is not in decline. However, America does stand at a crossroads. We have restored this country's ability to grow. Now we must act quickly and decisively to strengthen America's ability to compete in a dramatically changing world.

Looking across the oceans toward the horizon of the 1990s, one is struck by two profound changes in the relationships between nations of the world.

Change number one is the rising importance of economic power in the equation of national security and world leadership.

Change number two is the leading role of high technology in the sweekstakes of world competition, and the lightening speed with which technology transforms industries, enabling strong economies to create, capture or control markets of the future.

Certainly, I don't have to tell the leaders of the auto industry why total quality management and applying state of the art technology from advanced materials to electronics, is a must for production of top performance, world class cars.

Foreign competition forced you to face a stark choice: adapt or die. And, the way you adapted your production to build new model cars can serve as a role model for other industries.

Today, Detroit is an automotive center and a high tech center. Your work in robotics and composite materials keeps you at the forefront of U.S. technology.

Fortunately, others are adapting, too. We see proof not just in industries like aerospace, telecommunications, biotechnology and medical products, where we lead, but also in selected company situations in industries such as apparels.

We ARE doing good thinks. My concern is that we are still not doing as MUCH and as WELL as our competitors. Unless we do better, others will ride the waves of knowledge and technologies, and they, not we, could determine what America's future will be.

Consider a moment how the reality of economic power, driven by high techology, is changing the course of history.

Thirty years ago, Nikita Kruschev came to America and boasted that socialism would bury the West. Many believed him.

Well, the Soviets have discovered the heavy burdens of trying to impose their will with a first-rate military and a third-rate economy. Thus, the wrenching decisions called "Perestroika."

I do not suggest that we can let down our guard. On the contrary, as we remain militarily strong, America must gird itself to meet new challenges to our security from political allies who are now also powerful economic rivals.

This Nation's economic security rests on a strong industrial base oriented toward global demand for products and services of the future. Yet, our new rivals are moving to control industries we pioneered and capture critical markets for our future.

Our steel industry has struggled to survive and adapt. Yet, as we know, cars today use less steel. And weapons, such as bazookas, are no longer fired with steel-made triggers, but with keyboards directed by computer guidance systems.

What will happen if we cannot make the right system?

The stakes are awesome. If this Nation surrenders to complacency, if we lose control of industries and the production of products vital to our defense and way of life, at stake is not just American jobs and prosperity, but America's freedom.

So, when the U.S. recorded its first high-tech trade deficit in 1986, that was a red flag of warning.

When nearly half of all U.S. patents awarded went to foreign investors in 1987, that was one more red flag of warning.

Unquestionably, we command formidable strengths:

We are blessed with gifted scientists, superb universities and strong traditions of entrepreneurship and innovation.

We lead the world in new knowledge and new technologies.

But we could lose the most important race for the future—the race to apply and commercialize new ideas and technology; the race to move ideas from designers labs and design boards to the marketplace.

Technology can revolutionize industries in a few years, sometimes in a matter of months—as microelectronics did computers.

But, if American business sacrifices research for short-term profits, the United States will end up trying to light the road to the future with lanterns, while our competitors are lighting it with lasers.

The United States will permit profit sanctuaries and technology sanctuaries to flourish in industries of Japan, Korea, Taiwan and Germany.

My intention here is not to rebuke our competitors. In fact, I admire their accomplishments.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

We must continue to defend the Pacific and work for democracy together. And we'll have no cause for complaint in commercial relations, if we can compete on a level playing field.

I am not here to condemn our competitors but to challenge America. If our allies in the struggle for democracy are now competitors in the struggle for economic security, then let us say to them:

We stand shoulder to shoulder with you in the first struggle, but we will strive to be head and shoulders above you in the second.

Ladies and gentlemen, the United States needs a strategy to compete in the world marketplace of the 1990s—and to win.

We need a strategy to innovate, produce, market and sell world class products in each and every industry.

Here is what I believe our strategy for victory must be:

We can recapture the lead with an industry-led, business-government partnership to produce, in this country, consumer products of the future that drive American research and manufacturing.

Products such as HDTV, high-tech automobiles and smart homes and products from biotechnology and superconductors.

How can that strategy succeed? By summoning the American people to meet four great challenges for the 1990s:

Strengthening our research base and workforce skills.

Accelerating commercialization.

Manufacturing superior, quality products, and

Competing and winning new global markets.

Now, when I say an industry-led, business-government relationship, I mean that we in government will work to improve the conditions for risk-taking and research. We will contest restrictive trade barriers and help you locate and gain access to global markets.

But you in the American business community must lead the way and make the critical choices. We need your R&D. We need your commitment to compete. We need your leadership to win.

Here is how I believe our partnership must work.

Our first challenge—strengthening our research and workforce skills—calls for a great national drive to mobilize to the fullest America's human and financial capital.

In Washington, the President will fight to lower the capital gains tax rate. Some resist, upset that he may help the wealthy.

They miss the central point: The real question is how much longer the U.S. grants Germany and Japan a unilateral advantage to lend more money, more cheaply, to finance their ideas and technologies, because they're competing to win, and we're not.

Lowering the capital gains tax creates jobs, reduces the cost of capital and makes business think long-term. We must lower the capital gains tax for all industries. And there is no better example of where this will be helpful than in HDTV and other high-tech industries.

We must do many things to to stimulate more research.

We must make the R&D tax credit permanent.

We must create new partnerships to carry out basic public-private research in universities and in our national labs.

And, we must consider reforming anti-trust laws so that consortia such as sematech and other innovative entities can pool research teams from small and large firms to take on the European and Japanese giants.

We also believe Government procurement should be used as a tool to supply capital to help America compete. IBM just won a $3.6 billion award to redesign all our traffic controller computer systems. Now a part of that contract includes bids for work on the control station screens. Yet only SONY made a bid.

Why? Why shouldn't an American company, or consortium of companies, bid on that contract?

New vigilance is needed to safeguard technology and protect intellectual property rights. We're being robbed of $40-60 billion a year or more by foreign companies who infringe on our patents, copyrights, trademarks and semiconductor designs. We're working for an international agreement to protect intellectual property rights.

Also, foreign competitors often face lower product liability insurance premiums, because ours vary state to state. We support passage of a uniform Federal law to solve this problem.

Finally, I believe society should begin to bestow greater honor and compensation on people who can apply knowledge to make things work.

Education's mission as described by Thomas Edison, "The seeing of things in the making," is of paramount importance. We need a graduation line that's on-line with the future. We need a bigger pool of electrical engineers and software engineers.

Above all, we need a workforce of literate skilled men and women who understand basic math and english, who can perform in a sophisticated, hightech environment and also change and adapt.

More research is one side of the coin. Better directed, more purposeful research—research that leads to products made and sold is the other.

Commercializing our ideas is America's Achilles Heel, and accelerating commercialization is our second great challenge.

We can start by borrowing a page from our competitor's playbook. Their corporations, universities and governments rarely conduct research in a vacuum. They've developed a strong strategy and spirit of teamwork to push all their research toward developing and fulfilling their commercial objectives.

What's more, their company divisions do not work in separate specialized stages, but concurrently. In Japan and Germany, researchers, design engineers and manufacturing engineers all work together in cohesive teams beginning with the initial product concept phase.

Concurrent engineering hastens product development, and increases productivity and companies' ability to compete by permitting modifications and improvements at every stage of production.

It also permits "Spin-Ons"—the transferring of research knowledge from one division to any other divisions that can apply it to improve a product or to create a new one.

We are now seeing more examples of concurrent engineering in America. Ford Motors has a large effort underway to promote spin-ons in everything from autos to aerospace.

We must make it our goal to instill a similar sense of mission and teamwork throughout the United States:

To improve government-university-private sector research cooperation;

To bring better direction to the $65 billion a year in government-supported research where more thought can be given to serving America's commercial and competitive needs; and

To streamline the regulatory process, so pharmaceutical companies do not have to wait 7 or 10 years and spend up to $150 million to move a new drug from a chemist's lab to the pharmacy.

The end product of strong research, inspired management and smart and dedicated workers is total quality manufacturing.

Superior quality is America's third great challenge and our economic security can demand no less. The United States will not have it made, until made in the USA stands for the best quality.

I will use my position as business's point man to honor examples of excellence with the Mac Baldrige National Quality Award. Quality must be the cornerstone of American enterprise.

Nothing else we do to increase competitiveness will matter if our products are not first rate. Quality begins with personal effort.

Just as top quality must stand for what we sell, so free and fair trade must stand for the policies we pursue. Winning the battle to compete and sell in foreign markets is our fourth great challenge.

I am a free trader, but free trade must be a two-way street. If it's not two-way street, it's a dead-end street for America.

We have enough trade laws. What we need it vigorous enforcement of the laws on the books. And with that resolve by government, let us see the fierce determination by American companies to compete and win, and to start preparing now for exciting new opportunities—such as Europe 1992.

We have the ability. We have the people. We have the ideas. We have the dreams to make great things grow.

I refuse to believe the only country on earth to send men to the moon, cannot succeed in sending far more of our products to foreign markets—and cannot meet the other challenges to our economic security in the 1990's. We surely can.

Thank you very much.

INSIGHT INTO GUN OWNERSHIP

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. RICHARDSON. Mr. Speaker, in the past months the issue of semi-automatic weapon ownership and gun ownership have come under very close, if not prejudiced, scrutiny. The Congress, having been inundated with information of varying degrees of accuracy, should take note of testimony delivered before the Senate judiciary committee's subcommittee on the Constitution. The testimony of David B. Kopel offers unique insight into the issues of gun owernship and the proposed banning of semi-automatic weapons. I commend this very informative testimony to my colleagues for their review.

STATEMENT OF DAVID B. KOPEL OF GUARDIAN GROUP INTERNATIONAL

ABSTRACT OF TESTIMONY

Despite a string of arrests for offenses including robbery, illegal weapons sales, and assault on a police officer, Stockton murderer Patrick Purdy was never imprisoned for

more than a few weeks—even after a mental health report warned that Purdy was "a danger to himself and others." Covering the tracks of failure, California's authorities have sealed Purdy's criminal and mental health records. We urge that the coverup be ended and the records be opened, as the first step in a critical reexamination of the serious flaws of the California and national justice systems.

Purdy's criminal record demonstrated that he already knew how to buy illegal guns. Despite California's strict 15-day waiting period, he bought 5 handguns there. The only control that could have stopped Purdy from finding and using an illegal gun was prison. The tragedy in Stockton must spur the Nation into a hard look at our social control systems which are not controlling criminals. In particular, our underfunded police, prosecutorial, prison, and mental health systems need more resources.

The second amendment does not protect a right to own guns for hunting. It does guarantee an individual's right to own guns for personal defense. With the increasing prevalence of gang violence, citizens need reliable guns with quick-firing capacity.

"A well-regulated militia being necessary to the security of a free state," the second amendment guarantees all members of the militia—all adults—the right to own militia, military-type weapons for national defense. The civilian militia was most recently called to duty in World War II by the Governors of Hawaii, Virginia, and Maryland.

Criminals will easily evade any restrictions on semi-automatic firearms, just as they currently evade restrictions on handguns.

Restrictions or bans on semi-automatics will lead to disrespect for the law, because so many otherwise law-abiding citizens will refuse to obey laws against semi-automatics.

Careful analysis of laws against "assault weapons" shows that they can be used to ban most pistols and long guns, including hunting rifles and shotguns.

EXCERPT FROM TESTIMONY

[The following is a short excerpt from the written testimony presented to the Senate. Space limitations prevent printing the full analysis of all topics mentioned above in the abstract.]

This testimony is offered collectively by four law enforcement professionals, to urge that Congress take a careful, rational look at the highly charged issue of self-loading firearms. We are: Chief Gerald Arenberg, executive director of the National Association of Chiefs of Police; Deputy Sheriff Dennis Ray Martin, national president of the American Federation of Police; retired officer Stephen P. D'Andrilli, a 15-year decorated veteran of the New York City Police Department, currently president of Guardian Group International Corp., a security consulting firm; and David B. Kopel, formerly an Assistant District Attorney in New York City, currently a policy analyst for Guardian Group. [Organizations listed for identification only; we believe it improper for law enforcement executives to claim to speak on behalf of their rank and file without even consulting the rank and file.]

Too much of the debate on self-loading firearms concerns the irrelevant issue of sporting use. The Constitution does not guarantee a right to hunt, or to bowl or to hang glide. Self-loading firearms are often used for hunting or target shooting, but that is not why they deserve Constitutional protection. They deserve protection because they are militia guns—because they are made for personal and national defense.

As law enforcement officers, we have sworn to uphold the Constitution, including the provision which guarantees, in the words of Massachusetts Revolutionary War patriot Josiah Quincy, "a well-regulated militia composed of the freeholder, citizen and husbandman, who take up their arms to preserve their property as individuals, and their rights as freemen."

As Josiah Quincy's words highlight, the Second Amendment guarantees an individual right to armed self-defense. That guarantee remains valid today; a vote of the National Association of Chiefs of Police showed that 84% believe the inability of the police to protect all persons at all times justifies the civilian ownership of firearms.

Self-loading firearms are often essential for self-defense. For example, pleasure boat owners in the Gulf Coast have been stocking up on Uzis. Why? Because drug smugglers commonly pull alongside pleasure boats, murder all the passengers, use the boat to transport a load of drugs to the mainland, and then abandon the boat. The drug runners do their killing with high-powered guns stolen from the military, or bought on the same international black market that supplies cocaine by the pound.

Boat owners who hope to survive an encounter with the smugglers must arm themselves with highly reliable weapons capable of firing at several attackers in quick succession.

Anyone who reasonably fears attack by a gang—such as a store-owner in the middle of a Miami riot—could reasonably conclude that the reliability and rapid-fire capability of an Uzi or an AR–15 is the only effective way to protect his or her family from murder.

As the Supreme Court declared in *U.S.* v. *Miller* (1939), guns that are useful for the militia or for militia training are the only ones that are protected by the Constitution. Thus, it is precisely the Kalashnikovs, Uzis, AR–15s, M–14s and other civilian versions of military guns that are most clearly secured by the right to bear arms.

The *Miller* Court echoed the founders' clear understanding of the militia: "all males physically capable of acting in concert for the common defense . . . expected to appear bearing arms supplied by themselves and of the kind in common use at the time." The modern United States Code follows the Constitutionally-mandated definition, making subject to militia duty all able bodied males between the ages of 17 and 45.

Arguments that the militia is obsolete fail to consider contemporary history.

Not long ago the last Soviet troops left Afghanistan, driven out by a popular guerrilla army. The mujahedeen made effective use of, among other weapons, AK–47s which they captured from the Soviets, received from the Chinese, or constructed themselves with simple tools. While American Stinger missiles helped devastate the Soviet airforce, the missiles did not arrive until 1986, by which time the guerrillas had fought the mightiest army in world history to a draw for seven years.

During World War II, the Japanese seized several Alaskan islands, and strategists feared more Axis landings. Hawaii's governor summoned armed citizens to man checkpoints and patrol remote beach areas. The Governor of Maryland called on "the Maryland Minute Men," including "members of Rod and Gun Clubs, of Trap Shooting Clubs and similar organizations," for "repelling invasion forays, parachute raids, and sabotage uprisings," as well as for patrolling beaches, water supplies, and railroads. Over 15,000 volunteers brought their own weapons to duty. Gun owners in Virginia were also mustered into home service. Americans everywhere armed themselves in case of invasion.

After the National Guard was federalized for overseas duty, the "militia proved a successful substitute for the National Guard," according to a Defense Department study. Militiamen, providing their own guns, were trained in patrolling, roadblock techniques, and guerrilla warfare.

It has been more than 40 years since the last invading troops left American soil. No invasion is plausible in the foreseeable future. But Constitutional rights are for all time. Only the most naive believer in American omnipotence or the nuclear umbrella can feel certain that America will never again need the militia.

Further, as the late Vice President Hubert Humphrey explained, domestic dictatorship will aways be a threat: "The right of citizens to bear arms is just one more guarantee against arbitrary government, one more safeguard against the tyranny which now appears remote in America, but which historically has proved to be always possible."

A few weeks ago in the Soviet state of Georgia, the Gorbachev regime confirmed how useful firearms are to freedom-loving people. After ethnic unrest and demands for autonomy, the Communist government used registration lists to confiscate all hunting rifles.

As law enforcement professionals, we have seen that restrictions on lawful gun ownership have no impact on criminal access to guns. The supply of self-loading weapons in the United States is already more than sufficient to supply the criminal market for stolen guns.

Moreover, a competent backyard mechanic can build even a fully automatic rifle. Indeed, Afghan peasants, using tools considerably inferior to those in the Sears catalogue, have built fully automatic rifles capable of firing the Soviet AK–47 cartridge. Illegal home production of handguns is already common; a Bureau of Alcohol, Tobacco and Firearms study found that one-fifth of the guns seized by the police in Washington, D.C. were homemade.

The day that semi-automatics become illegal, organized crime will swiftly supply the criminal market with mass-produced illegal guns. Tulane Professor James Wright, author of the National Institute of Justice study of criminal gun use, argues that gun controls are less likely to reduce the pool of criminal guns than to provide organized crime with lucrative new business.

In 1986, the National Association of Chiefs of Police surveyed every major police official in the country: 97 percent believed that a firearms ownership ban would not reduce crime or keep criminals from using guns; 89 percent believed that gun control laws such as those in Chicago, Washington, D.C., and New York City had no effect on criminals; and 90 percent believed that if firearms ownership was banned, ordinary citizens would be more likely to be targets of armed violence.

Even the most severe controls on honest citizens do not stop criminals. Since 1934, anyone who wishes to buy a fully automatic weapon, such as the Thompson Submachine gun, must pass a rigorous licensing process that requires a federal fingerprint check, an F.B.I. background investigation, a letter of permission from the local police chief, a

wait of up to six months, and hundreds of dollars in fees and taxes. The system works marvelously; no licensed automatic has ever been used in a crime.

And the system does not work at all. Automatic weapons, including the hundreds of thousands of guns missing from U.S. military arsenals, are readily obtainable, even by teenage gang members. A system that cannot control full autos will not work any better on semi-autos.

In Chicago, Washington, and New York City, gun bans have disarmed the citizenry and thereby increased crime. Please do not cause more crime by depriving American citizens of the firearms they need for self-defense in these dangerous times.

Some people contend that because self-loading rifles are more dangerous than the guns in existence in 1789, they are not protected by the Constitution.

James Madison never watched television, or talked on the telephone. Yet the first amendment protects the speech of TV reporters, and the fourth amendment protects the privacy of telephone conversations. The Bill of Rights did not speak of particular technologies, but of categories of rights: the freedom of speech, the right to keep and bear arms, the right to freedom from searches without probable cause. As technology creates new ways to exercise these rights, the Constitution provides a continuing structure for their protection.

Besides, most other Constitutional freedoms are more dangerous now than they were 200 years ago: *60 Minutes* or the *Miami Herald* can instantly destroy a person's national reputation. The publication of leaked national security information during a war could lead to the death of American soldiers minutes later. A national security leak during a superpower confrontation could damage negotiating positions, and lead in the worst case to nuclear war.

Destructive religious cults did not exist 200 years ago. But today, freedom of religion can kill people—as we learned at Jonestown—and can cripple minds—as we see in victims of Sun Myung Moon's 20th century brainwashing techniques.

New technologies such as telephones and automobiles make possible the existence of criminal organizations of vastly greater scale—and harm—than before.

Para-military guns have killed fewer people in the last decade than Jim Jones did in one day. Despite some misinformed claims, we do not face an assault rifle crisis requiring the abrogation of Constitutional rights. Studies by the National Institute of Justice, by the B.A.T.F., and by weapons experts from the New York, Chicago, and Los Angeles police forces confirm that criminals, including drug dealers, only rarely use assault rifles. Criminals prefer the portability and concealability of handguns and sawed-off shotguns.

In these dangerous times when criminal gangs are on the rampage, the government must not infringe the American people's right to keep and bear arms that are essential for self-defense. We do not believe that any of our Constitutional rights should be put aside because it is alleged that those rights are more dangerous now. If the Constitution is obsolete—and we do not believe it is—the proper approach is to amend it, not to flout it.

Constitutional rights are for all time.

TRIBUTE TO ST. ANDREW THE APOSTLE CHURCH OF CLIFTON, NJ, ON THE CELEBRATION OF ITS GOLDEN JUBLIEE

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. ROE. Mr. Speaker, it is with the deepest reverence and the greatest pride that I rise today to salute an outstanding house of worship in my Eighth Congressional District of New Jersey which, for the last half century, has been a spiritual focal point and a beacon of faith for countless numbers of worshipers in the greater northern New Jersey area.

I am speaking of St. Andrew the Apostle Roman Catholic Church of Clifton, NJ, which will culminate the celebration of its golden jubilee with a banquet on Saturday, May 20, 1989, at the Robin Hood Inn in Clifton, NJ. Mr. Speaker, I know this celebration is a great source of pride to St. Andrew's most distinguished pastor, Msgr. Peter A. McBride, who has been his church's guiding force for the past 14 years, and who was elevated to Monsignor just 2 months ago.

Indeed, Mr. Speaker, the golden jubilee celebration itself is a fitting tribute to Monsignor McBride's unparalleled vision, leadership, and love for his congregation and has special meaning to all of those people whose lives have been fortified by this fine parish.

Mr. Speaker, in order to acquaint you and our colleagues more fully with this outstanding house of worship, I would like to insert, for the RECORD, the official history of St. Andrew the Apostle Roman Catholic Church:

When The Most Reverend Thomas H. McLaughlin, the first bishop of Paterson, commissioned new churches in his fledgling diocese, it was his wish that they bear the names of the first men called to be apostles. Thus, in December, 1938, the second church was named St. Andrew the Apostle, after the second man called by Christ to follow Him. The first pastor of the Church was Father (later Msgr.) Carmel J. Scanlan, appointed on January 1, 1939.

Mass and other religious services were held at the Poor Farm Building, across Mt. Prospect Ave. from the church's present location, until May 26, 1940, when Bishop McLaughlin dedicated the present church building. There were fewer than 300 families in the parish at the time of its inaugural.

Fr. Scanlan was responsible for setting up many of the various organizations that are still the backbone of parish life today, including the choir, Rosary Society and youth organizations. He also saw to the acquisition of the parish organ, which formerly belonged to Alfred Ringling of the Ringling Brothers, and part of which is still used in the current church organ.

Joe Weisbrod, one of the original members of St. Andrew's parish, remembers Fr. Scanlan as a "warm and loving person, well-spoken yet humble; a real priest with whom one always felt at home."

Following World War II, the United States experienced a tremendous expansion in housing and families, and St. Andrew's was not immune to this growth. On December 31, 1946, Fr Scanlan was transferred to another church and was succeeded as pastor by Fr. Francis J. Doogan. During Fr. Doogan's seven year tenure, St. Andrew's built and began a parish school and convent, staffed by the Sisters of the Presentation of the Blessed Virgin Mary. However, it was not an easy task.

Fr. Doogan wrote at the time, "There was great difficulty in procuring Sisters for the school. We began communicating with various orders in Sept., 1951, and were unsuccessful with so many that we had almost given up all hope . . . on March 23 [1952], the Mother [of the Presentation Sisters] called and accepted my invitation to staff the school. . . . they were the first Sisters I ever knew, when they tought me as a boy in Ireland . . . I am so very proud to have them in my school . . ."

The cornerstone for St. Andrew's School was laid on Nov. 2, 1952, and the school opened on Monday, Feb. 2, 1953, with Sister Mary Dorothea serving as the school principal and a total of 150 pupils in grades K-4.

Fr. Gabriel S. Stone replaced Fr. Doogan as pastor on Jan. 21, 1954, and served for 17 years, the longest tenure of any pastor thus far. Under his direction, St. Andrew's church and school expanded to accommodate Clifton's thriving Allwood and Richfield sections.

These changes were part of a long-term Building Fund project. In June of 1956, Fr. Stone wrote, "All the volunteers who met to canvass the parish for funds for an addition of six classrooms and the enlargement of the cafeteria were praised and thanked at the Masses. The parishioners were requested . . . to fulfill pledges to advance the Catholic education of our youth and young children."

The church building added two "wings" in 1962, doubling its seating capacity to 1,000, and during this time the church and rectory were first connected. In the meantime, the school added the downstairs section along St. Andrew's Boulevard and enlarged the cafeteria. These renovations were much needed; the parish registration had increased to more than 1500 families, and school enrollment during the period from 1959 to 1963 averaged more than 730, peaking at 753 pupils in 1960-61.

In the meantime, the Roman Catholic Church was undergoing changes of its own in the form of Vatican Council II, and St. Andrew's was renovated to comply with the Council's Norms during the time Fr. Eugene L. Romano served as pastor. He succeeded Fr. Stone, who died on May 26, 1971.

The removal of the altar rail, the movement of the organ from the loft, and the modernization of the altar's appearance were some of the changes instituted by Fr. Romano.

As the Catholic Church faced a worldwide storage of priests at this time, steps were taken to combat this problem on a local level as well. In 1974, Deacon Albert Schwind, a candidate in the first Permanent Diaconate Class in the Paterson Diocese, was assigned to St. Andrew's. Lay people were given an increasing role in the liturgy; in 1975, Fr. Peter A. McBride, who had succeeded Fr. Romano as pastor on January 29, introduced Eucharistic Ministers to assist in the distribution of Communion both at Mass and to the sick at home. In addition, programs were implemented to assist the homebound and to provide spiritual guidance for individuals and groups.

Under Fr. McBride's stewardship, St. Andrew's Church installed air conditioning in 1984, and, in 1985, began the Rite of Christian Initiation of Adults (RCIA), whereby

converts are received into the Catholic Church. So far, 24 such people have joined St. Andrew's Church through this program.

Fr. McBride, reflecting on the growth of St. Andrew's Parish over the last 50 years, remarked, "We have every reason to be truly proud of all Pastors and Associates as well as Sisters and lay people who have worked together in building a strong, vibrant Christian Community. Today, we look forward with renewed enthusiasm to continue the work already begun, and with Divine assistance, to bring the message to the yet unborn.

Mr. Speaker, I appreciate this opportunity to present a brief portrait of the long and storied history of St. Andrew the Apostle Roman Catholic Church as it celebrates a half century as a true beacon of faith to so many people in the northern New Jersey area. And I invite you and our colleagues to join me in saluting this outstanding house of workshop which has made its community, State and our Nation a better place to live, St. Andrew the Apostle Roman Catholic Church of Clifton, NJ.

JOHN BOYLAN EARNS EAGLE SCOUT AWARD

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. YATRON. Mr. Speaker, today I want to give special recognition to a young man from the Sixth Congressional District of Pennsylvania who has demonstrated qualities of leadership and responsibility. The young man I am speaking of is John Boylan, a member of the Boy Scouts of America, Troop 45 in Ashland, PA. On June 4, 1989, John will receive the Eagle Scout Award for his outstanding achievements as a Boy Scout. The Eagle Scout Award is the highest honor a scout can earn and it is illustrative of John Boylan's ability to excel in a given situation.

Mr. Speaker, I commend John Boylan for his many accomplishments as a Boy Scout and congratulate him for earning this high honor. John's commitment to excellence is manifest in the Eagle Scout Award and he can be proud of the distinction to be bestowed upon him on June 4.

HONORING CHIEF JOSEPH J. ZOITO ON HIS RETIREMENT

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. CONTE. Mr. Speaker, I rise today to pay tribute to Joseph J. Zoito, Jr. who has recently completed 34 years of service on the police force in Williamstown, MA, including 26 years as chief. Chief Zoito began his career as a full-time officer on September 27, 1956. He has touched literally thousands of lives and gained respect and gratitude for his innumerable achievements.

Chief Zoito's career has been marked by dedicated service to his country, to his community of Williamstown, and to his fellow man. During World War II, he was awarded the Bronze Star and five battle stars while serving with the Army Combat Engineers in Europe. In 1960, while serving his community as a police officer, he was awarded the American Legion medal for outstanding heroism for rescuing a 4-year old boy from his burning home while off-duty. While serving as chief of police, he helped direct the growth of his department from a few officers to a total of ten regular and five reserve officers. Chief Zoito also found the time to serve as president of the Massachusetts Police Chiefs' Association in 1971 and pursue a degree in criminal justice, which he earned in 1972.

There is more than one child whose life has been saved by the quick action of Chief Zoito and there are numerous other incidents that will attest to the bravery of this fine officer. However, in his modest manner he will toss these acts off as being done in the line of duty or because simply he was there at the right time. He may be leaving the force, but Chief Zoito is a man who will never retire.

During the 1960's and early 1970's wherever large groups of young people gathered in small towns and large communities across America, violent outbreaks and demonstrations sometimes took place. It is to Chief Zoito's credit and to the credit of all of his officers, that his tenure in office lacked any significant confrontations in the town of Williamstown. In his own special way he has managed to quietly handle potentially serious situations from getting out of hand.

Joseph Zoito has played an important role as chief of police in Williamstown. His dedication to his work, his love for his family, and his devotion to his church has earned him the admiration of the community. On June 14, a dinner is being held in Chief Zoito's honor. It will give all of us who have admired the chief an opportunity to express our gratitude for his selfless endeavors. It is my hope, Mr. Speaker, that Chief Joseph Zoito will be retired in name only and will continue to pursue the goal of maintaining a peaceful and safe community.

TRIBUTE TO RON OLSON

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. LEVINE of California. Mr. Speaker, I rise today to recognize my friend and a highly respected community leader, Ron Olson who will be honored with the American Jewish Committee's Learned Hand Award this evening. This award is given each year to an outstanding member of the legal profession who, through dedication to the principles of our Constitution, has been a voice of understanding and good will.

Ron Olson has shown himself to be more than worthy of this great honor, and an outstanding choice for the Learned Hand Award. He is a natural-born leader who has used his talents to further good of his community to a degree that few have. Throughout his life he has maintained a commitment to charitable concerns, and to improving the welfare of those around him. His work should serve as an example to us all.

Ron's leadership in both the Los Angeles community and the legal profession has been truly extraordinary. In addition to his responsibility to his own law practice, Ron has found time to become actively involved in a wide variety of humanitarian projects and organizations. The common thread in these activities is his commitment to justice for those who are less able to pay for proper representation in our legal system. His pursuit of justice for the less fortunate members of our community has intensified over the years and he has taken on a great number of leadership positions through which he could influence his colleagues to join him in that pursuit. As a young lawyer, and president of the Los Angeles County Barristers, part of the county bar association, he pushed for an association rule change calling for a mandatory pro bono work commitment from all young lawyers. Later, as president and then director of the Legal Aid Foundation of Los Angeles, and as a member of the board of governors to the State Bar of California, he continued to encourage his colleagues to contribute their time and their expertise to represent needy individuals, all the while leading the way by his own example.

Ron has also been a leader in the growing movement toward alternative dispute resolution. He has written dozens of articles for professional journals, participated in numerous seminars, and held many leadership positions designed to investigate alternatives to litigation within the court system. And yet, he has continued to take a hands-on approach to leadership. Recently he has become the informal negotiator for the homeless residents of Los Angeles in their conflicts with city authorities.

The entire Olson family has joined Ron in the pursuit of excellence in their respective lives and in the furtherance of humanitarian concerns. His wonderful wife Janie was a founding member of the Interfaith Center to Reverse the Arms Race, and has been active in a number of other community organizations. Their three great kids have also stood out among their peers. Kristen, a Harvard graduate is, I understand, currently teaching in France, and is preparing to enter the Johns Hopkins School of Advanced International Studies here in Washington. Steve, is a junior at Stanford, and is spending the year studying in Italy. Amy, the youngest, is a senior in high school, and will be entering Carleton College in the fall.

Mr. Speaker, I would like to ask my colleagues to join me in congratulating Ron Olson for being selected for this great honor, and in recognizing his exemplary humanitarian works.

NEXT WATER WAR ENCOURAGES DIVISIVENESS

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. COELHO. Mr. Speaker, at the invitation of the editors of Issues in Science and Tech-

nology, a magazine published by the National Academy of Sciences, I prepared the following response to an article that appeared in the winter 1988–89 issue of the magazine. Portions of my response were published in the magazine's spring 1989 issue. The article, "The Next Water War: Cities Versus Agriculture," was written by Marc Reisner, author and former staffer for the Natural Resources Defense Council [NRDC] in San Francisco. While the article professes to be a cold, detached examination of irrigated agriculture in the West, it offers a distorted picture of Western agriculture to justify NRDC's goal of eliminating farming in many areas of California and the other western states. Mr. Reisner apparently hopes to advance this agenda by driving a wedge between urban and agricultural water users.

My response to Mr. Reisner's article follows:

Marc Reisner, in his "cold, detached" look at Western agriculture and its use of water (Winter issue), ignores or gives scant attention to a number of facts that do not support his assertion that society and the environment would be better served if water were moved from agriculture to the cities.

To begin with, he completely disregards the numerous social and environmental problems we already face as a result of growing urbanization and the ever-increasing concentration of people and their wastes in metropolitan areas. Reisner also disregards or distorts facts about California's water and agriculture. For example, he asserts that "agriculture accounts for 85 percent of all water use" in California. The perception is that farmers consume a huge amount of all the water in the state and leave very little for anyone else. The facts tell a different story.

According to the California Department of Water Resources, the state's total potential surface water supply is about 78 million acre-feet, of which agriculture uses about 27 million acre feet, or about 35 percent. Urban and other uses, including environmental purposes, account for slightly more than 7 million acre-feet. That does not include an additional 2 million acre-feet dedicated solely to environmental preservation by the Wild and Scenic Rivers Act. In all, nearly 60 percent of California's total surface water supply remains untapped in rivers, streams and lakes. The state's developed supply is approximately 34 million acre-feet, of which 80 percent is used by agriculture and 16 percent by cities. However, those figures do not reflect the fact that much of what is produced by irrigated agriculture is consumed by urban dwellers. Clearly, farmers are not gobbling up vast amounts of water for their personal use.

Reisner also minimizes agriculture's place in the social and economic fabric of California. According to state figures, the gross value of agricultural production in 1987 was $15.6 billion. The state's 78,000 farms employed about one-half million people directly. Indirectly, these farms provided 2.3 million jobs, or one out of every five jobs in the state.

His criticism of irrigated pasture, alfalfa, cotton and rice is a superficial view of a complex situation. Pasture, alfalfa and cotton seed, for example, are important elements in the production of meat and milk. These two commodities account for a large portion of California's agricultural output and are major ingredients in the diets of consumers across the country. Exports of the San Joaquin Valley's high-quality cotton and other California agricultural products totaled $3.3 billion in 1987, and helped offset imports of foreign manufactured goods.

The California agricultural community is not flatly opposed to the idea that the marketing of water should be part of the solution to the state's water problems. But water marketing is an extremely complex issue that raises a variety of difficult legal, social and economic questions. I wholeheartedly agree with Reisner that the first priority must be to protect the local economies that could be hurt by massive water transfers.

I also agree that there is enough water in California to meet the legitimate needs of agriculture, cities and the environment. Meeting those needs will, of course, require making some tough choices. We can make wise choices only if we work together without engaging in the divisive tactic of pitting city dwellers against farmers.

DAME AT SEA

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. SKELTON. Mr. Speaker, having been aboard the U.S.S. *Iowa* last December, and seeing the fine young men aboard that wounded ship, I think it fitting that this article by Joan M. Stapleton from the New Republic be shared with my colleagues:

[From the New Republic, May 22, 1989]

DAME AT SEA

(By Joan M. Stapleton)

I'm in the gun room of number Two turret aboard the USS *Wisconsin*, sister ship to the wounded USS *Iowa*. The ledge and railing where I stand are covered with a thin film of oil, not slippery but viscous enough to remind me I'm inside a well-lubricated machine. As if gazing into a well, I can see beyond the railing to the lowermost floor five decks below. I feel dizzy from the humidity, the height, and the pungent smell—noticeable almost everywhere on board, but particularly redolent here. "The silk bags of propellant and the projectiles are elevatored to this room from the powder magazines and the shell decks below and then loaded into the gun right here," a young gunner's mate says, pointing to the gaping barrel of the largest gun on earth. The technology of this fearsome weapon is scarcely different from that of the cannons on Nelson's wooden flagship. To fire it, our gunner and his numerous mates must do a carefully choreographed dance of destruction, first sliding the projectile into the breech, then gingerly placing the cylindrical silk bags of black powder, then ratcheting the contraption shut. An ominous red stripe on the wall of the turret just inches from the railing marks the boundary of the gun's recoil. It's a dangerous place. The young gunner's enthusiasm as he mimes the firing seems eerie. Amid this massive steel and brass, I am acutely aware of the flimsiness of flesh and blood.

I had been invited along with other publishers and media types on a four-day Navy tour. Not only would we be visiting some of the Navy's finest vessels during maneuvers in the Atlantic, but we would have the opportunity to meet the brass and hobnob with our fighting men at sea. When I called the public affairs officer to RSVP, he intimated that I was the first "lady" they'd ever asked on such a tour. In my imagination, a deckful of glistening gobs in bellbottoms and rakishly angled sailor caps instantly burst into "There Is Nothing Like a Dame," saluting me with their mops. Heavens, how could I possibly decline?

But then, the very day we are to depart for Norfolk, that disastrous explosion occurs on board the *Iowa*, killing 47 men. Immediately, my mischievous anticipation gives way to sadness and anxiety. I also must admit a grim interest in how a public relations junket will be handled in the wake of such a cataclysm. Will it be canceled or substantially changes? No—except for a few minor details, the show goes on. The same officers who had been serving as offical Navy spokespersons with the press and the *Iowa* crew families rush to keep their appointments with us. Our host, the charismatic Adm. Powell F. Carter Jr., Commander in Chief, U.S. Atlantic Fleet (CINCLANT, pronounced "sink-lant," in Navy shorthand), forgoes his planned remarks at our first morning briefing to recount to us the dreadful details of the accident: the efforts at recovery; the lack of wounded survivors; the painstaking process of seeking out next of kin and notifying them, as the Navy has always done, in person.

Three days pass and we have trooped on and off a nuclear submarine and its tender, an amphibious Landing Craft Air Cushion, the battleship, and Marine Corps tanks, jeeps, rafts, and helos. Saturday brings the showiest leg of the tour: a visit to an aircraft carrier, the USS *Dwight D. Eisenhower*. The only way to land on an aircraft carrier short of being lowered in a net is to travel in a plane equipped to be wire-caught by a tailhook. We are fitted out in life vests and torturously tight helmets aptly called cranials, and strapped four different ways into our seats in a windowless, prop-driven COD, or Carrier Onboard Delivery cargo plane. My back to the pilot, I whiteknuckle my way through a swooping descent, my gasps keeping time with a flashing red sign that warns. Prepare for arrested landing. Suddenly a great metallic screech cuts through the roar of the engines, and we are thrown violently forward against our straps, held there for an instant, then flung backward and jammed against our seat backs. Finally, we are shudderingly, rattlingly brought to a stop. Light-headed, we trot triumphantly from the rear of the craft, like a football team at the start of the game.

Did you know that an aircraft carrier's full complement is 5,500 men—no women sailors allowed aboard combat vessels, you know—and that the average age is about 20? As I stroll, climb, and hoist myself through the narrow passageways of the ship, I encounter reactions among the men that range from blushing abashment to out-and-out horror. You can cut the testosterone with a knife. By the time our small band visits the ship's store to purchase mementos, I'm so intoxicated by my vast outnumbering that I can't resist asking the clerk loudly in my best Marilyn Monroe voice, "Excuse me, sir, but do you carry nail polish remover?" A burst of laughter rings through the metal commissary—amazing, explosive laughter, from heads popping and flipping like the bells and levers in a pinball machine. For a blissful moment, I feel a hint of what it must be like to do a USO tour with Bob Hope.

Nothing beats the shows an aircraft carrier provides. Unable to sleep (jets slamming onto the deck a few floors above my head may have something to do with it), I tiptoe into the officer's lounge and commandeer the XO—the Executive Officer—who is happy to escort me to the flag deck to watch flight ops in the moonlight. We pad into a darkened room of windows high above the catapults and landing tracks. The crew below are directing activity with glowing colored torches that seem to dance and weave on their own power. Above the din, I stare in wonder at mammoth F/A-18 Hornets and F-14A Tomcats gliding past my nose as they coast in to land, trailing rainbows. An occasional approaching plane is waved off into the blackness, but mostly they touch down effortlessly, then fold and tuck their wings to slip snugly into their diagonal parking spaces on the deck. Others stretch their wings open and blast vertically into the night. "I never get tired of this," my XO murmurs, echoing a refrain I've heard from officers and enlisted men alike on every ship we've visited. "It's just too much fund."

Properly dazzled by the colorful ballet on the deck of the carrier, decorated with the insignia, pins, and collar buttons of bashful boys, and indoctrinated to the credo of peace through preparedness, my colleagues and I are finally COD-loaded and "catlaunched" (thrown by catapult, an exhilarating process that slingshots you from 0 to 150 mph in 2.5 seconds) from the deck of the *Ike* at 1300 hours on Sunday. As we head for shore, I reflect on the intelligence of the personnel we met on all levels, the ingeniousness of the systems with which our ships are fitted, the efficiency of Navy operations big and small—and on a world that demands such a heavy price, in dollars and in the lives of our young men, to assure our readiness for war while our domestic problems loom ever larger. Early for my flight home, I watch sadly as arriving fathers, mothers, and wives, their faces drawn, wander past me in the air terminal, drifting listlessly toward a table marked "U.S.S. *Iowa* Information."

NATIONAL DRUG POLICY

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. RICHARDSON. Mr. Speaker, William J. Bennett, Director of the Office of National Drug Control Policy, recently solicited suggestions from all 50 States for the formulation of a national drug policy. In my home State of New Mexico, the department of public safety, under the direction of C. Robert Kemble, has formulated a plan which could easily serve as a model for other States and our Nation. I applaud the important work of Mr. Kemble and the department of public safety in New Mexico. Their efforts can and will have a significant impact on how our Nation faces the challenge posed by drugs. I commend to my colleagues' attention an outline of this strategy as forwarded to Mr. Bennett:

STATE OF NEW MEXICO
DEPARTMENT OF PUBLIC SAFETY,
Santa Fe, NM, May 4, 1989.

Attention Bruce Carnes.

Dr. WILLIAM J. BENNETT,
Director, Office of National Drug Control Policy, Washington, DC.

DEAR DR. BENNETT: This is in response to your recent letter to Governor Carruthers. He has asked me to respond for him. New Mexico wishes you every success in your critically important development of a national drug control strategy. To that end and without elaboration, we submit the following thoughts.

GENERAL PRINCIPLES

Whatever plans you develop from a "strategic" sense, they obviously must be designed for long-term continuity and on a non-partisan basis. We believe that above all, the reduction of drug demand must succeed or all other efforts will fail. Accordingly, as a nation we should concentrate, though not exclusively, on prevention efforts particularly in our 5 to 15 year age group and, in doing so, involve and strengthen families. Furthermore, we need to get much tougher with the so-called "casual" and "social" users who keep the pushers in business.

As in any "unlimited war", every potential resource should be considered. More specifically:

DEMAND REDUCTION

(1) We need a major national public awareness campaign using the pro bono assistance of the best professional minds in advertisement, public relations, and media. In the final analysis, the drug war must be won at the grass roots level. A World War II level of public information and consequent commitment can do far more than all of the—albeit necessary—drug treatment and law enforcement efforts combined. (In that regard, the media should be asked to consider stricter policies on alcohol advertisements and corporate sponsors should be asked to refuse sponsorship of television programs which glamorize alcohol/drug use.)

(2) Related to that campaign, there are several sets of highly potential resources that are helping but are not yet fully tapped. National civic club organizations are an excellent example. If Rotary, Kiwanis, Optimists, Elks, Lions, Jaycees, and others would jointly commit to public awareness, as well as other drug prevention activities, they could effectively touch virtually every community of any size in the nation.

(3) Likewise, the business community and leadership have not been fully marshalled, either in their own substantial capabilities for influencing public attitude nor in their efforts to insure their own drug-free workplace. The business arena is still too often in the "denial" posture.

(4) National and state associations of Chambers of Commerce could make substantial contributions by taking a positive position on the importance of communities to have control of the drug situation for their own economic welfare.

(5) The broad resources of universities and colleges also need to be activated and coordinated, not only in aggressively handling their own on-campus problems (they too are still "denying the problem"), but in bringing to bear the capabilities of their colleges of education, schools of journalism, departments of social studies, medical schools, graduate research capacities, et al, in support of local and state endeavors. An active successful substance abuse prevention program ought to be a requirement for schools to receive federal funds.

(6) Our churches and synagogues certainly can do more in several ways, including bolstering, both publicly and within their congregations, the all-important family unit.

(7) A greater effort toward an international *prevention* network, not just law enforcement interaction, could be valuable. Perhaps the World Health Organization should be more intensely involved.

DRUG ENFORCEMENT

In the drug enforcement and supply reduction area, we have a number of suggestions.

(1) We believe you should seriously consider establishing several control centers for combined drug enforcement operations. The designated director and operations staff would include representatives of each of the major sectors (federal, state, and local enforcement agencies, et al) as well as appropriate support activities. They would coordinate regional drug activities on a daily basis working in a facility which has all of the necessary command and control communications and intelligence sharing capabilities of any military operational center. Indeed, we would be pleased to see such a regional control center located in Albuquerque, perhaps at Kirtland Air Force Base for security.

(2) We believe the federal agencies can considerably enhance their operations and thereby ours in several ways.

(a) Federal agencies need to be provided greater local autonomy and operate under the clear policy expectations that they would jointly develop drug enforcement strategies with one another and the states on a regional basis.

(b) It is absolutely essential that there be a free flow, with appropriate security controls, of criminal intelligence between agencies of all levels. That situation does not now exist.

(c) The existing inter-agency communications problems are apparently encouraged by a funding and recognition system that for too long has been based on quantitative measurements, such as how many drug busts or pounds of substances seized. Where recognition and funding follow those kinds of measurements, there is a decided disincentive toward truly joint activities.

(d) Federal agencies should review their self-imposed restrictive regulations with an eye to providing greater flexibility and responsiveness. Even though we are all working from the same constitutional base, state agencies can often respond quicker and with considerably less red tape. (See attached.)

(e) Closer coordination with the FAA in identification of low flying aircraft coming into the U.S. should be effected.

CRIMINAL JUSTICE SYSTEM ENHANCEMENT

Whatever we do in strengthening drug enforcement capabilities is meaningless unless the criminal justice system is enhanced.

(1) Some kind of augmentation of district attorneys, public defenders, and judges to elminate backlogs is essential.

(2) In turn, those enhancements become meaningless unless there is more prison space and more intensive probation and parole resources. Inactive federal and state facilities should be considered. A comprehensive examination of effective alternative punishments should be undertaken.

(3) Some model criminal justice augmentation programs should be tried to measure

their effect. We would again suggest Albuquerque as a model for a two to three-year program. We are confident that the number of arrests and convictions, and subsequent deterrence, will rise dramatically.

(4) There needs to be a national review of states' sentencing guidelines related to drug offenses to provide greater uniformity between states and within states.

(5) We would recommend your encouragement of nationally organized court-watch activities, as well as regular media reports on the number of convictions and levels of sentences throughout the court system. This would seem an excellent role for the American Association of Retired People.

DEPLOYMENT OF FEDERAL FINANCIAL RESOURCES

The effectiveness of federal resources can be improved:

(1) In general, federal funding should be made as simple and flexible as possible. Ideally all federal funds should come through a single agency and be provided in block form to each state for further distribution, upon evidence that the state has a truly comprehensive drug control plan which is broadly representative of all levels. For example, New Mexico's drug problems are in some significant ways measurably different from other states, e.g. our border with Mexico. It's our belief that we can more effectively deploy funds for this state based on New Mexico's critical needs. That principle applies to others.

(2) Along those lines, less cumbersome processes for requests and less restrictive language should allow grant applicants and state authorities to make better use of federal funds. When funds are "fenced" for limited type activities, applicants tend to become "grant chasers". Additionally, complicated application requirements discourage efforts to seek legitimately needed funding, especially from small communities and agencies.

(3) Overall, on the demand reduction side, it is our perception that the return on federal investments will be enhanced if applied in greater proportion to prevention than to treatment.

(4) Forfeiture funds can be better deployed. Consider a formula approach which gives a strong incentive portion to the agency which made the case with a bonus for joint operations. The remaining funds could then be pooled for redistribution to all states, on some proportionate basis, for furtherance of their drug control endeavors.

RESEARCH

We need more and better directed research. Some specific suggestions:

(1) We need assistance in establishing ways and means of evaluating our drug control progress or failures.

(2) Help us identify prevention, intervention, and treatment programs which work best.

(3) Research of student users would be more helpful if directed at grade school and 9th grade levels than at 12th grade, because by that time a number of users have dropped out of school, thus skewing the results.

(4) We suggest that the non-user community should be studied to learn what characteristics are most prominent in that group in order to direct our positive reinforcement. In that regard, university level research on other countries which have limited drug problems could prove helpful.

(5) We believe that the posse comitatus laws should be re-examined with an eye to updating them to meet modern standards and requirements.

(6) Similarly, we recommend review of the RICO statutes in order to make them more applicable.

(7) Clearly, as in any unlimited war, industry and the military have a research role to play in developing more sophisticated high-tech tools, e.g., drug sensors, improved intelligence networks, et al.

SOME MISCELLANEOUS THOUGHTS

(1) As a centrally located border state on the primary land entry of drugs into the U.S., we observe firsthand and commend INS for their endeavors. To assist them, the U.S. Attorney and ourselves, we suggest that the definition of "the border" be expanded to a much broader zone than just the land immediately adjacent to the border.

(2) We recommend a coordinated series of joint training programs outlined by your office bringing together federal, state, and local participants in both the demand and supply reduction endeavors. Joint training not only enhances knowledge but develops personal relationships which will be important to the overall effectiveness of our various programs.

(3) We need to strengthen the interface between prevention and treatment services, particularly among youth. The recidivism rate is too high. Special post-treatment schools which permit the youthful addict to continue counseling and be separated from the environment which helped encourage his addiction, while permitting his advancement in school, would do much to improve treatment success.

(4) We support a general "toughening" of drug policies and fixing of state responsibilities. Parallel to withholding federal highway funds from states and institutions which do not comply with national speed limits, we endorse withholding federal funds from states who do not comply with appropriate tougher regulations.

(5) We encourage the expanded use of our national and state military capabilities—particularly in the detection and direct support areas. In the next few months, we will be running a series of tests on a range of ways and means to use the New Mexico National Guard and will be pleased to provide you followup reports. Likewise, we are seeking ways to work wiht the substantial federal military forces here in New Mexico, particularly in developing a comprehensive drug intelligence network. In that area, we will seek the opportunity to provide you and your staff a fuller briefing of our plans and, as may be appropriate, your support.

(6) Continued progress in establishing federal laws as tools in the drug war will be important. Clearly we have major problems regarding the control of prescription drugs and use of inhalants that need attention. Development of a federally accepted and approved program to control illicit prescriptions would be a major contribution. We would also commend for your consideration stiff civil fines for possession of illegal substances, continued strengthening of drug-free school zone laws, and *adjustable* precursor chemical laws relating to the ever-changing world of designer drugs.

In closing, obviously, there is a good deal more that could be said. Again, we wish you great success in your difficult and formidable undertaking. We believe that we may be a bit ahead of many other states, at least in our endeavors to coordinate and focus the minimal resources which we have. We would welcome a visit by you and your staff for discussion of our plans and an opportunity to share thoughts from our perspective with you. New Mexico, in addition to the drug problems of sister states, has a major international drug gateway with which to deal, 12,000 miles of state and federal highway drug pipelines to police and vast remote areas which encourage drug manufacture and cultivation. Our population is relatively small but our experience base is broad.

Best wishes,

C. ROBERT KEMBLE,
Cabinet Secretary.

Attachment.

DEPARTMENT OF PUBLIC SAFETY,
STATE POLICE DIVISION,
April 28, 1989.

To: Secretary C. Robert Kemble,
From: Sgt. Gilbert C. Baca,
Subject: Comparison of State and Federal Requirements.

Following is a list of state and federal requirements pertaining to the recording of telephonic and non-telephonic conversations for use as evidence in court proceedings:

STATE

1. One agent must be part of recorded conversation.

FEDERAL

1. Justify in writing to immediate supervisor why the recording is needed.
2. Supervisory authority must be obtained.
3. Follow-up information teletype must be sent to Washington, D.C.
4. Concurrence of U.S. Attorney must be received.
5. Party whose conversation is being recorded sign consent forms.

State and federal requirements for conversations recorded during reversals for use as evidence in court proceedings are as follows:

STATE

1. District Court Order.

FEDERAL

1. Party to be recorded must be listed in NADDIS.
2. Must be identified as Class I/Class II drug violator.
3. Approval of Special Agent in Charge.
4. Teletype to D.C.

CONGRESSIONAL SALUTE TO DR. STEPHEN J. KLEINSCHUSTER III, DISTINGUISHED DEAN OF COOK COLLEGE, RUTGERS UNIVERSITY OF NEW JERSEY

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. ROE. Mr. Speaker, it is with the greatest pride that I rise today to salute a truly distinguished and outstanding scholar, administrator and innovator from my home State of New Jersey whose vision and strong guiding hand have brought Cook College of Rutgers University and the New Jersey Agricultural Experiment Station to the forefront of agricultural and academic progress.

I am speaking of Dr. Stephen J. Kleinschuster III, who for the past 4 years has served as both dean of Cook College and executive director of the New Jersey Agriculture Experiment Station, and under whose leadership

these institutions have thrived and earned respect the world over. Those of us from New Jersey are indeed proud of all of the remarkable accomplishments that have been achieved under the leadership of Dean Kleinschuster.

Mr. Speaker, Dean Kleinschuster, who lives in West Windsor, NJ, with his lovely wife, Karen, and his two sons, Stephan and Luke, received his B.S. and M.S. degrees at Colorado State University. He earned his doctorate in cellular and molecular biology at Oregon State University and was a postdoctoral fellow in Developmental Biology at the University of Chicago.

Dean Kleinschuster's résumé is an outstanding and voluminous compendium of professional, academic and administrative accomplishments that would do credit to any scholar or administrator anywhere in the world. Perhaps the greatest of all of his accomplishments has been the way his leadership has created world class programs at Cook College and the New Jersey Agricultural Experiment Station.

Mr. Speaker, in order to gauge the importance of Dean Kleinschuster's work to the State of New Jersey, I would briefly like to describe the vital work being done at this facility. According to the most recent report on the Station, its "contributions over the years have included the discovery of the antibiotic that cured tuberculosis, pioneering work in mosquito control and other efforts to improve human health, and the development of such successful plant varieties as the world famous Rutgers tomato. Today the station is important to our State's $15 billion food, agricultural and marine industries and other elements of our economy, ranging from pharmaceuticals to tourism. The station also makes key research contributions to the quality—as well as the quantity—of life for us all.

For example, the station works to combat pollution of our air, water and soil, reduce erosion along our shoreline and improve the nutritional value of foods while increasing the availability of natural additives in processed foods. The station also works to enhance agricultural production through such diverse strategies as increased use of greenhouses and the latest techniques in genetic engineering.

As a means of paying tribute to Dean Kleinschuster's unceasing efforts which have such broad implications for all of us, Mr. Speaker, I would like to insert, for the RECORD, the following resolution which delineates and extols some of his major accomplishments at Rutgers University:

Whereas the New Jersey Agricultural Experiment Station annually . . . and perennially . . . struggled during the past two decades with insufficient operating funds and for nearly 40 years with woefully inadequate physical facilities, and

Whereas Dr. Stephen J. Kleinschuster assumed the dual positions of dean of Cook College and executive director of the New Jersey Agricultural Experiment Station on July 1, 1985 bringing a new spirit of leadership to the state, college and station, and

Whereas Dr. Kleinschuster and his senior associates developed Vision 21, the strategic master plan to move the college and station into the ranks of premier land-grant institutions in the country, later complemented by the establishment of the Committee for the Advancement of Agricultural Research and Technology, a broad cross-section of New Jersey citizenry from the fields of agriculture, the environment, business, education, the media and consumer interests, which promulgated sweeping financial strategies for Cook/CAES, and

Whereas Dr. Kleinschuster has brought a new day to Cook/NJAES characterized by four buildings under construction; three high technology institutes in process; numerous world-class scholars/teachers added to the faculty; national prominence for Cook/NJAES; renewed enthusiasm and success among students, faculty, staff, parents and alumni; and a rededication and redefinition of today's land-grant institution as responsive to the needs of the state: therefore, be it

Resolved, That Dr. Stephen J. Kleinschuster, III, now Executive Dean for Agriculture and Natural Resources of Rutgers, the State University of New Jersey, be commended in the highest terms for his foresight, ability, and stamina in creating a new look at Cook College and the New Jersey Agricultural Experiment Station and thus in providing outstanding leadership to the state's $15 billion food, agriculture and marine industry and its renewable natural resources."

While we in New Jersey take great pride in what the achievements of Dean Kleinschuster have meant to Rutgers, our State University, and to our State of New Jersey as well, it is clear that his work transcends state and even international boundaries, and has broad implications for people the world over.

And so it is with the deepest admiration, Mr. Speaker, that I invite you and our colleagues to join me in saluting a truly outstanding scholar, administrator, innovator and leader, Dr. Stephen J. Kleinschuster, Dean of Cook College of Rutgers University and Executive Director of the New Jersey Agricultural Experiment Station, whose work has made New Jersey, the Nation and the world a better place to live.

WERNERSVILLE BOROUGH CELEBRATES 75TH ANNIVERSARY

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. YATRON. Mr. Speaker, on May 26, 1989, the Borough of Wernersville in Berks County, PA, will celebrate its 75th year of incorporation. The long existence of the Borough of Wernersville is a tribute to the sense of community that has been established by Wernersville's residents and a testament to the ties that bring all of us together as friends and as neighbors.

Borough officials have planned a wide array of activities over a 4-day period to commemorate this worthy occasion. I congratulate the residents, officials, and friends of the Borough of Wernersville for their long history of community spirit and wish them continued success and good fortune for the future.

CHARLES AND PETER DEROSE BEING NAMED CITIZENS OF THE YEAR

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. CONTE. Mr. Speaker, I rise today to pay a very special tribute to two brothers who have achieved the American dream by devoting their lives to keeping the people of Northampton, MA, informed.

Charles and Peter DeRose are newspapermen. They are the publishers of one of the best papers in Massachusetts, the Daily Hampshire Gazette. Charlie and Pete were recently named "Citizens of the Year" by the Greater Northampton Chamber of Commerce. They will officially receive this award May 17. Mr. Speaker, I cannot think of two men more deserving of this honor. They've contributed enormously to the people of western Massachusetts by consistent, honest, unbiased news coverage.

Although their integrity and professionalism are well known, these virtues are not the only reason Charlie and Pete received this award. They were chosen because of the extensive time and considerable financial support they have given the community. I'd like to just name a few of the local causes that have received their enduring support: the March of Dimes "Walkathon," the Teen Center, the Hampshire recreational YMCA, the Cooley Dickenson Hospital and many other civic and municipal boards.

Charlie and Pete, both in their late forties, were born and raised in Northampton. Both are graduates of the University of Vermont. Peter attended Northampton High School and Charles the Williston Academy. However, following college graduation, their careers in newspapers followed different paths. Pete studied in graduate school at Vermont, then worked as an engineer for Systems Engineering Corp. of New Orleans. This proved to be important training when he returned to Northampton in 1966 to oversee the newspaper's conversion to offset printing.

After graduating from college, Charlie took a job at the Burlington Free Press in Burlington, VT. He worked there 2 years before becoming the Gazette's advertising manager.

Mr. Speaker, the DeRose brothers have carried on a family tradition that began in 1929 when their late grandmother, Harriet DeRose, bought the Gazette. Harriet DeRose was a remarkable businesswoman. In fact, she was one of the first women in the country to publish a daily newspaper. Even today that is an outstanding accomplishment.

Charlie and Pete's father also was a formidable newspaper man. Charles N. DeRose, publisher of the Gazette and President of WHMP radio, received the same "Citizen of the Year" award, posthumously after his death in 1970. The two sons accepted the award in their father's absence. I'm sure the memory of that day in 1970 will be heavy on their minds on May 17 when they become the 25th and 26th recipients of this prestigious honor.

I knew Charles DeRose. A great news man, he really cared about the Gazette, meticulously supervising every word of print that went to the page. Yes, he cared about the paper with all his heart. And his sons have followed in his footsteps to continue a mighty tradition.

Mr. Speaker, It is important to note that these days, most of the newspapers in the country are owned by big chains and multinational conglomerates. One by one the smaller, personal, family owned papers have been sold to these corporations. They are sold to businesses that know little about the people in the communities and are incapable of the personal feelings the family owners once put into every single issue. The residents of western Massachusetts are lucky to have Charlie and Pete at the Gazette because they put so much of themselves into the paper. They have been an integral part of the Northampton community, and they care very deeply about the people there.

In my 31 years as a Member of Congress, I have had many opportunities to work with Charlie and Pete; many times—both on the campaign trail and during daily congressional business—our paths have crossed. It has been a great personal pleasure to work with these admirable men. We've worked together on many issues and we've spent countless hours helping the community of Northamption prosper. Anyone who knows how much my good old faithful dog Primo meant to me will know how highly I think of Charlie to have given him one of Lady's pups sired by Primo. Charlie and Pete's selection as Citizens of the Year is no surprise. They certainly deserve this honor. Charlie and Pete exemplify the undying optimism and dedication that made this country great. I would like to thank them for their devotion to accurate, honest, news coverage and congratulate them on this award. May their children and grandchildren love the Northampton community as much as Charlie and Pete do, and may the generations to come continue this splendid family tradition.

ENVIRONMENTAL PROTECTION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. HAMILTON. Mr. Speaker, I recently cosponsored several environmental protection bills which I believe should be enacted in the 101st Congress. We need to take immediate steps to address pressing national and global environmental threats. We need to become more familiar with the environmental problems we face, and take action to maintain and restore the quality of our environment. The United States should recognize the benefits of protecting our natural resources, and regain its world leadership in environmental protection.

I urge my colleagues to act promptly and favorably on the following bills:

H.R. 37, National Ground Water Contamination Research Act of 1989. This bill authorizes a comprehensive federal ground water research effort by the U.S. Geological Survey, the Environmental Protection Agency, and the Department of Agriculture. It would coordinate these efforts under a Ground Water Research Committee.

H.R. 104, Volunteer House Recycling Program. This bill would instruct the Architect of the Capitol to design a volunteer program for House of Representatives offices to separate trash by source.

H.R. 683, the Agricultural Commodity-based Plastics Development Act of 1989. This bill would promote the development of degradable plastic by requiring the Government to identify products that can be made of degradable plastic and encouraging federal procurement of these products.

H.R. 876. American Heritage Trust Fund. This bill would create a self-supporting trust fund federal, state, and local land acquisition for parks, forests, refuges, and other public lands.

H.R. 980, Global Environment Research and Policy Act of 1989. This bill would coordinate existing federal research to give us a better understanding of the possible effects of global warming. It would require federal agencies to consider the global consequences of their actions, and would establish a Council on Global Environmental Policy to analyze and recommend national policies for handling the impacts of global warming.

H.R. 1087, the Scenic Byways Study Act of 1989. This bill would instruct the Transportation Secretary to conduct an inventory of all roadways in the United States that could be classified as scenic or historic. This would provide the basis for a cooperative program between federal, state and local governments designed to identify, protect, and enhance our Nation's scenic and historic roads, placing a special emphasis on preservation.

H.R. 1216, the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989. This bill would improve the competitiveness of American renewable energy technologies by requiring the Department of Energy to enter into joint ventures with industry involving such technologies. The bill would also establish performance goals for renewable energy research programs and provide stable authorization levels for those programs.

H.R. 1268, the National Biological Diversity Conservation and Environmental Research Act. This bill would establish a national policy for conserving biological diversity and create a National Center for Biological Diversity Research. It would also make biological diversity an explicit part of the environmental impact statement process.

H.R. 1457, Waste Reduction Act. This bill would provide technical assistance to the states to promote waste reduction in private industry. It would improve collection of data by the Environmental Protection Agency and assist states in reducing sources of pollution.

H.R. 1746, Wetlands No Net Loss Act of 1989. This bill would authorize the creation of a nonprofit Wetlands Preservation Trust to acquire wetlands and former wetlands to ensure their preservation and restoration. It would also establish a wetlands office within the U.S. Fish and Wildlife Service. Other federal agencies would be required to conduct an inventory of the wetlands areas they own or manage and to prepare a management plan for the preservation and enhancement of those areas.

PERSONAL EXPLANATION

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. COURTER. Mr. Speaker, due to absence, I was not present for several recent rollcall votes. Had I been present I would have voted "yes" on Journal vote Nos. 45, 46, 48, and 50, and I would have voted "no" on Journal vote No. 35.

FLORIO HAILS FATHER WALSH FOR OUTSTANDING SERVICE TO CHURCH AND COMMUNITY

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. FLORIO. Mr. Speaker, it is a rare occasion when we, as Members of Congress, have an opportunity to bring to the attention of our colleagues and their respective constituencies a person who has truly devoted himself to the betterment of the individual, the family, and the community. Such an individual is Father Edward Walsh of the First Congressional District in New Jersey.

Ordained a priest in the Roman Catholic Church in 1964, Father Walsh has consistently responded to the needs of his parishioners and neighbors with thoughtfulness and compassion. On May 21, the people he has served so well will have an opportunity to pay tribute to him upon the occasion of his silver jubilee.

Father Walsh's efforts are centered in numerous civic and religious organizations that serve virtually every age group and region in southern New Jersey. From the Community Planning and Advocacy Council to the United Way, Father Walsh has proven to be an advocate of those individuals truly in need. He is the embodiment of those Judeo-Christian principles we all respect and admire.

As public servants, we can certainly appreciate the importance of the role he plays in his church and community. We in government are keenly aware of the need for quality individual's participation in the administration of public programs. Father Walsh is that individual and I commend him for his selfless efforts.

Mr. Speaker, I respectfully ask that my colleagues join with me in praising Father Walsh and wishing him much success and happiness in the many years to come.

SALUTE TO SARAH COVINGTON FULCHER

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. LOWERY of California. Mr. Speaker, it is with great admiration and pride that I rise to commend Sarah Covington Fulcher for one of

this Nation's most remarkable athletic accomplishments.

Last year, Sarah completed a "Run Around America." She ran for 438 continuous days around the perimeter of our Nation, covering a total of 11,134 miles. In so doing, she set the world record for distance running and is now listed in the Guinness Book of World Records.

Averaging 32 miles every day through rain, snow, heat, and holidays she broke the women's record for a solo continuous run when she passed the 3,824-mile mark in Battle Creek, MI.

Running through 35 States, in temperatures ranging from 50 degrees below zero in Utica, NY, to 124 degrees in Concord, CA, Sarah Fulcher was out to promote youth fitness.

In her efforts to promote and raise funds for the U.S. National Fitness Academy she jogged through 26 pairs of running shoes, 15 pairs of shorts, 6 sweatshirts, and 20 "Run Around America" T-shirts.

Before completing this fete, the sponsoring organization ran out of money threatening to leave Sarah and her crew stranded. One of the two support vehicles was stolen in New York and their money disappeared in Vermont. But, she continued the run and completed the journey in October, raising over a million dollars for the foundation.

This was not the first lengthy adventure for this 5'7" 120 pound dynamo. In 1986, she became the first woman to run 2,727 miles across the Continent of Australia. She accomplished the trek for the Australian Hunger Campaign. She plans to continue several more transcontinental runs in the future.

Sarah Covington Fulcher has demonstrated the enthusiasm and energy that sets an incomparable example of pride and spirit for this Nation to honor.

THE 75TH ANNIVERSARY CELEBRATION OF SOUTH HEIDELBERG TOWNSHIP

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. YATRON. Mr. Speaker, on May 26, 1989, South Heidelberg Township in Berks County, PA, will celebrate its 75th year of incorporation. The long existence of South Heidelberg Township is a tribute to the sense of community that has been established by South Heidelberg's residents and a testament to the ties that bring all of us together as friends and as neighbors.

Township officials have planned a wide array of activities over a 4-day period to commemorate this worthy occasion. I congratulate the residents, officials, and friends of South Hidelberg Township for their long history of community spirit and wish them continued success and good fortune for the future.

HONORING WILLIAM STEINECKE ON HIS RETIREMENT

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. CONTE. Mr. Speaker, I rise today to pay tribute to Mr. William Steinecke who, after 27 years of service is retiring from teaching. For almost three decades, Bill Steinecke has been a guiding force for the students in the Sunderland, Whatley, Conway, and South Deerfield district public schools. Bill exemplified for us the ideals of commitment and dedication to a profession crucial to the literacy and competence—the very existence—of our society. His extensive service to more than a generation of students officially began in 1962 at Turners Falls High School where he remained for 6 years before transferring to Frontier Regional High School in 1968. He then taught at Frontier for the next 21 years. But Steinecke's love for learing began even before his undergraduate studies at Brown University, from which he graduated in 1949. At Brown, Steinecke majored in literature and writing, with a minor in history, and a combination of these fields served Steinecke well as he taught English, and creative writing and journalism at Frontier High School. This love of learning, coupled with William Steinecke's dedication to the education of younger generations, led him to become involved in the community far beyond his call of duty as an educator.

Prior to his illustrious teaching career, Mr. Steinecke spent 3 years in the service of his country and 13 years with his hometown newspaper, the Greenfield Recorder, as a reporter. He flew missions with the 8th Air Force Division in World War II and served his country with the dignity and vigor he always brought to the classroom. As a veteran of World War II myself, Mr. Chairman, I can fully appreciate Mr. Steinecke's bravery and devotion.

Mr. Speaker, it is an honor to pay tribute to William Steinecke on the occasion of his retirement from teaching high school English and journalism. William Steinecke brought quality education to thousands of young men and women, and made remarkable achievements. Mr. Steinecke was praised many times for this teaching and was honored by receiving two very prestigious awards: The Weyguard Award for Outstanding Teaching and the National High School Journalism Teacher of the Year Award.

America is a Nation made strong and honorable by the education of its young people. William Steinecke has truly added to the strength, honor, and quality of his country through his long career of dedicated teaching. The citizens of my district and, indeed, from all over New England, should be extremely proud of William Steinecke, who has dedicated his life to the furthering of knowledge for us all. I wish him the best in his retirement and hope he will continue to be an inspiration for aspiring students as well as teachers.

LEGISLATION CLARIFYING ALASKA NATIVE CLAIMS SETTLEMENT ACT

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. YOUNG of Alaska. Mr. Speaker, I recently introduced legislation to clarify section 21 of the Alaska Native Claims Settlement Act with respect to the tax basis of property conveyed under the Act.

In 1971, Congress enacted the Alaska Native Claims Settlement Act [ANCSA]. The purpose of ANCSA was to provide just compensation to the Alaska Natives for the extinguishment of their aboriginal claims. The Alaska Natives were given cash, land, and—in some cases—rights to natural resources in exchange for their claims. The greater value of what the natives received was in land and rights to resources.

As a means of effecting the settlement, it was required that regional and village corporations be formed to select the property to be transferred.

Because the transfer of cash and property was compensatory in nature, Congress provided that the settlement was to be free of tax. In drafting the statute, however, Congress created an unfortunate and probably unintended ambiguity. Congress specifically provided in 43 U.S.C. 1620(a), which governs the tax treatment of cash under ANCSA, that the cash transfers from the Alaska Native fund are nontaxable to the Native Corporation, and also when distributed by the Corporation to shareholders. However, 43 U.S.C. 1620(c), which governs the tax treatment of land and natural resources, contains language which is broader, but also is less clear. That section provides that the "receipt of land or any interest therein pursuant to this chapter * * * should not be subject to *any form* of Federal, State, or local taxation," (italic added). Under ANCSA, the Alaska Natives received a basis in their stock in the Native corporations equal to their pro rata share of the value of cash, land, and other assets received by the Corporation.

Due to circumstances largely beyond anyone's control, selection by the Native corporations of the land and natural resources to which they were entitled was delayed for almost a decade. As luck would have it, shortly after the selections were made in 1980, the value of the natural resources which were transferred to the Natives declined significantly. Since timber rights were, by far, the most important asset which most Native corporations received, this resulted in losses to many Native corporations. In plain fact, therefore, the Native corporations did not receive in value nearly what it was intended that they receive.

To attempt to recoup, and also to create at least the possibility of providing their shareholders with income levels which will provide survival with dignity, some Native corporations have invested the proceeds from the sale—albeit at a loss—of their ANCSA assets in

businesses which, it is hoped, will generate earnings with the next several years.

The potential that some Native corporations will generate current earnings and profits has created the possibility that amounts distributed to Native shareholders will be taxed as dividends. Under this result the effect would be to compel current taxation even if the distribution were funded by amounts received from the sale of property transferred to a Native corporation in a nontaxable compensatory context. This result is at odds with the congressional intent to transfer nontaxable compensatory amounts in extinguishment of Native claims. It would be ironic if the shareholders of an Alaska Native Corporation, having received far less in real economic value than was intended under ANCSA, should find themselves taxed if and when these lesser amounts are distributed by the corporations.

This legislation would clarify that land received pursuant to ANCSA should not be subject to Federal income tax—either to the Corporation or to the shareholder in the form of payment from the Corporation. The legislation would simply preclude taxation of Corporation distributions as dividends until the value of land received under ANCSA is paid out. This is the result intended by section 21 of ANCSA.

OUTRAGE AT GENERAL NORIEGA

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. ECKART. Mr. Speaker, last Sunday elections were held in Panama to choose a new leader. I rise today to express my outrage at the way drug-running dictator, Gen. Manuel Noriega, has conducted those elections. The Panamanian people apparently chose Guillermo Endara, Noriega's opposition, as their new leader. According to press reports, Endara won the election by a margin of 3 to 1, even though Noriega and his government attempted to falsify ballots giving them a 2-to-1 majority in the final tally.

Noriega nullified the election on Thursday. Not only did he annul the election, it has been reported that Noriega has expressed his anger at losing the election by beating, wounding, and arresting his political opponents. He has also, apparently, sent his troops through Panama City complete with riot gear, using tear gas, water cannons, and shotguns to disperse crowds which had gathered to cheer on the opposition.

The Panamanian people unequivocally expressed their desire for a new leader in this election, yet Noriega refuses to comply with the standards of democracy. The circumstances which have resulted from this fraudulent election are outrageous and the democratic nations of the world must not sit idly by while General Noriega continues violating the basic tenets of democracy and denying the citizens of Panama their right to express themselves and freely choose their future leaders.

TRIBUTE TO JAMES I. MARVIN, U.S. SMALL BUSINESS ADMINISTRATION'S SPRING PERSON OF THE YEAR

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. TORRES. Mr. Speaker, today I rise to bring to the attention of my colleagues the tremendous accomplishments of Mr. James I. Marvin, who has been named by the U.S. Small Business Administration as their spring small business person of the year. Mr. Marvin is the president and chairman of Santa Fe's Plastics Research Corp. and is a prime representative of the cutting edge of the true entrepreneur spirit of this country.

As president and founder of Plastics Research—a once small business that developed from a $15,000 initial investment and is now a company with $11.5 million in sales—is to be recognized for his outstanding achievements in the business industry and is a leading example of a small business success story.

Mr. Marvin received the small business person of the year honor for turning around Plastics Research Corp. from the throes of bankruptcy through his outstanding marketing and business skills. He moved the Excelsior Dr. design and manufacturing plant from the red and into the black. This effort which saw his company at a once low $1.3 million loss 4 years ago to a current $1 million pre-tax profit last year and an expected $1 million plus figure this year is only one story that summarizes the abilities of this true businessman.

Mr. Marvin, who received his business degree from University of Southern California, was the original draftsman of Plastic Research Corp. Plastics Research was founded in 1973 in a Cerritos facility not much larger than a garage by Mr. Marvin and two associates—one a relative. The idea for a manufacturing business came to the trio when they worked at Trend Western Technical Corp. When Mr. Marvin joined the business fulltime in 1977, after spending much of his time getting the firm off the ground, he soon bought out his partners.

Plastics Research Corp. is a manufacturing firm that produces fiberglass composite containers for the defense industry. The firm is 95 percent involved in serving the needs of the defense industry and specific defense contractors who must transport military cargo from the assembly line to the military. The containers that Plastics Research Corp. developed and now manufactures allow the defense industry to transport high priority cargo, such as the Tomahawk missile, safely and efficiently. The containers, which can be used over and over, allow the military to save thousands and thousands of dollars. This is especially important during today's economic and budget difficulties. The efforts of Mr. Marvin have insured that 144 jobs and an annual $1 million remain in our economy.

Mr. Speaker, it is with great honor and admiration that I speak of this hardworking and dedicated man. Mr. Marvin is truly an asset as well as a gifted representative of the spirit of the American ideal of a businessman. In closing, I hope that this body would join me in recognizing the achievement and honor that Mr. Marvin has received from the U.S. Small Business Administration. It is men such as Mr. Marvin that allow our Nation's small businesses to represent the foundations of our community and business philosophies.

HONORING FATHER JUDGE HIGH SCHOOL ON ITS 35TH ANNIVERSARY

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 15, 1989

Mr. BORSKI. Mr. Speaker, I rise today to honor Father Judge High School on its 35th anniversary.

Father Judge High School was founded in Philadelphia in 1954. The school was named after Father Thomas Judge, a prominent religious leader, humanitarian, and social worker who lived by the saying, "Be the best that you can be in whatever you do." His example is a guiding force for the student body of Father Judge High School.

During the past 35 years, the school has undergone a transitional period in which lay faculty have been incorporated into the religious staff. This cooperation has established a well-balanced curriculum of academics and values.

There have been a few disheartening times for the faculty and students at Father Judge, the worst of which occurred during the Vietnam conflict. The Father Judge community suffered a tremendous loss when 27 of its young alumni were killed in active duty.

It was in these times, however, that the Father Judge motto, "Non Excidet," meaning "He will not fail," embodied the spirit of the school. The time was ripe for Father Judge to embark on a journey of community service that would give new meaning to the words "Judge Pride." Through tremendous effort, the faculty and students pulled together and started many new programs that would have a direct impact on their community.

During the 1960's, Father Judge became one of the first high schools to participate in Operation Santa Claus which provides toys for deprived children at Christmastime. Father Judge also became involved in the Presidential Classroom, an activity in which the top students from across the Nation attend various seminars in Washington, DC. Father Judge is one of only four high schools in the Nation to be involved in this program every year since it began 20 years ago.

In the 1970's, the school started other service activities such as the unique Father Judge Marathon for Leukemia. This event, which raises funds for the fight against leukemia, involves students and teachers in a relentless marathon of basketball games over a period of a few days. In the 15 years of the marathon's existence, Father Judge has raised over $3,000 and is one of the few high schools on the east coast that contributes to the leukemia fund.

Father Judge is also involved in fundraisers to fight hunger in the immediate community, such as the Bread Basketball, an archdiocesan canned good drive in which the school donates large amounts of food to the poor and hungry. In 1983 the school became involved in the American Red Cross Bloodmobile Program, contributing over 1,200 pints of blood from faculty and students.

Another Father Judge organization, the Community Service Corps, reflects the school's dedication to helping others. The CSC involves approximately 30 students per year who volunteer to perform numerous acts of community service such as tutoring, helping disabled children, and feeding the poor. This involvement gives students a chance to learn more about themselves and their fellow human beings. The CSC, as well as other programs that serve the school community, fosters a spirit of honor and pride that is deeply rooted in the foundation of Father Judge.

When Father Judge students become alumni, they continue to serve the community in various ways. After graduation, a high percentage of students continue to develop an awareness of the world around them in institutions of higher learning. Many others go on to directly serve the city of Philadelphia in the police and fire departments.

I commend Father Judge High School for its 35 years of dedication to education and community service in the city of Philadelphia, and I wish that fine institution great success in the coming years.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, May 16, 1989, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 17

9:30 a.m.
Armed Services
Defense Industry and Technology Subcommittee
To hold hearings on the defense industrial base.
SR-222

Commerce, Science, and Transportation
To hold oversight hearings in conjunction with the National Ocean Policy Study on marine fisheries management.
SR-253

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on space commercialization.
SH-216

Energy and Natural Resources
Business meeting, to consider S. 85, to authorize the acceptance of certain lands for addition to Harpers Ferry National Historical Park, West Virginia, H.R. 964, to correct an error in Private Law 100-29 (relating to certain lands in Lamar County, Alabama), H.R. 999, to authorize funds for the Advisory Council on Historic Preservation, S. 750, to authorize the Federal Energy Regulatory Commission to extend time limitations on certain hydroelectric projects, S. 783, to eliminate wellhead price and nonprice controls on the first sale of natural gas and to make technical and conforming amendments to the Natural Gas Policy Act of 1978, and other pending calendar business.
SD-366

Governmental Affairs
To hold hearings on biological weapons proliferation.
SD-342

Rules and Administration
Business meeting, to mark up S. 136, to establish a single poll closing time in the continental United States for Presidential general elections, S. 377, to establish a series of five Presidential primaries, S. 326, to repeal a provision of the Federal Election Campaign Act allowing use of excess contributions, and S.J. Res. 98, to establish separate appropriation accounts for the Senate and the House of Representatives for the payment of official mail costs, S. 874, to establish national voter registration procedures for Presidential and Congressional elections, and other pending calendar business.
SR-301

10:00 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on trading practices in the commodity futures markets.
SR-332

Appropriations
District of Columbia Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1990 for the government of the District of Columbia, focusing on the Department of Corrections.
SD-138

Banking, Housing, and Urban Affairs
To hold hearings to review a report of the Inspector General of HUD on mismanagement in the moderate rehabilitation program.
SD-538

Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings on proposed legislation authorizing funds for the Federal Communications Commission.
SR-232A

Environment and Public Works
Business meeting, to consider the nomination of Frank Henry Habicht II, of Virginia, to be Deputy Administrator, Environmental Protection Agency.
SD-406

Finance
To hold hearings on miscellaneous tax bills, S. 353, S. 442, S. 659, S. 800, S. 838, and S. 849.
SD-215

Foreign Relations
Business meeting, to continue mark up of S. 928, authorizing funds for fiscal years 1990 and 1991 for the Department of State, U.S. Information Agency, and the Board for International Broadcasting.
SD-419

Judiciary
Patents, Copyrights and Trademarks Subcommittee
To hold hearings on S. 497, to provide that States be subject to suit in Federal court for infringement of copyright material.
SD-226

1:00 p.m.
Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1990 for the Department of Defense, focusing on Army posture.
SD-192

2:00 p.m.
Armed Services
To hold hearings on proposed legislation authorizing funds for fiscal years 1990 and 1991 for defense programs of the Department of Energy.
SR-222

Foreign Relations
Business meeting, to continue mark up of S. 928, authorizing funds for fiscal years 1990 and 1991 for the Department of State, U.S. Information Agency, and the Board for International Broadcasting.
SD-419

MAY 18

8:35 a.m.
Veterans' Affairs
To hold hearings on certain provisions of S. 13, S. 165, S. 573, S. 574, S. 748, S. 900, S. 947, and S. 899, bills to strengthen and improve Veterans' health care programs.
SR-418

9:00 a.m.
Commerce, Science, and Transportation
To continue oversight hearings in conjunction with the National Ocean Policy Study on marine fisheries management.
SR-253

9:30 a.m.
Energy and Natural Resources
Public Lands, National Parks and Forests Subcommittee
To hold hearings on S. 737, to authorize the Secretary of the Interior to acquire certain lands adjacent to the boundary of the Rocky Mountain National Park in the State of Colorado, S. 267, to authorize the Secretary of the Interior to convey certain lands in

Idaho to Mr. and Mrs. Kenneth Blevins of Kuna, Idaho, and H.R. 310, to remove a restriction on land in Roanoke, Virginia, in order for that land to be conveyed to the State of Virginia for use as a veterans' nursing home.
SD-366

Governmental Affairs
To hold hearings on nuclear and missile proliferation.
SD-342

Special on Aging
To hold hearings to examine the role of the Health Care Financing Administration in implementing the nursing home reform provisions that were included in the Omnibus Budget Reconciliation Act of 1987.
SD-628

10:00 a.m.
Appropriations
Defense Subcommittee
To continue open and closed hearings on proposed budget estimates for fiscal year 1990 for the Department of Defense, focusing on space programs.
SD-192

Appropriations
District of Columbia Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1990 for the government of the District of Columbia, focusing on the court system and school board.
SD-124

Appropriations
VA, HUD, and Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1990 for the Department of Housing and Urban Development and certain independent agencies.
SD-116

Appropriations
Commerce, Justice, State, and Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1990 for the Federal Communications Commission.
S-146, Capitol

Banking, Housing, and Urban Affairs
Securities Subcommittee
To resume hearings on S. 648, the Market Reform Act of 1989.
SD-538

Foreign Relations
Business meeting, to continue mark up of S. 928, authorizing funds for fiscal years 1990 and 1991 for the Department of State, U.S. Information Agency, and the Board for International Broadcasting.
SD-419

Judiciary
Business meeting, to consider pending calendar business.
SD-226

Select on Indian Affairs
Investigations Subcommittee
To resume hearings to examine various matters relating to Indian affairs.
SR-485

11:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on proposed legislation to coordinate and strengthen efforts at the Federal, State, local, and private and non-profit sector levels to combat illiteracy in the United States.
SD-430

1:30 p.m.
Agriculture, Nutrition, and Forestry
Conservation and Forestry Subcommittee
To hold hearings on the U.S. Forest Service appeals process.
SR-332

2:00 p.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1990 for foreign assistance programs, focusing on the Peace Corps, African Development Foundation, Inter-American Foundation, Overseas Private Investment Corporation, and Export-Import Bank.
SD-138

Armed Services
Conventional Forces and Alliance Defense Subcommittee
Projection Forces and Regional Defense Subcommittee
Strategic Forces and Nuclear Deterrence Subcommittee
To hold joint closed hearings on Department of Defense classified programs.
S-407, Capitol

Armed Services
Readiness, Sustainability and Support Subcommittee
To hold open and closed hearings on proposed legislation authorizing funds for fiscal years 1990 and 1991 for the Department of Defense, focusing on ammunition programs.
SR-222

Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 635, to prevent the unintended licensing of federally nonjurisdictional pre-1935 unlicensed hydroelectric projects.
SD-366

Foreign Relations
To resume hearings on the future of U.S.-Soviet relations, focusing on defense and arms control policy.
SD-419

Select on Indian Affairs
Investigations Subcommittee
To continue hearings to examine various matters relating to Indian affairs.
SR-485

Select on Intelligence
To resume closed hearings on proposed legislation authorizing funds for fiscal years 1990 and 1991 for the intelligence community.
SH-219

Joint Economic
To hold hearings on the effects of the Third World debt on U.S. agriculture.
2359 Rayburn Building

2:30 p.m.
Labor and Human Resources
Aging Subcommittee
To hold oversight hearings on activities of the Administration on Aging, Office of Human Development Services, Department of Health and Human Services.
SD-430

MAY 19

9:30 a.m.
Armed Services
Strategic Forces and Nuclear Deterrence Subcommittee
To hold closed hearings on operational requirements of the U.S. Space Command, and proposed budget request for fiscal years 1990 and 1991 for the U.S. Space Command.

Veterans' Affairs
Business meeting, to mark up proposed legislation to revise certain provisions of VA health care programs, including S. 13, S. 86, S. 165, S. 192, S. 263, S. 405, S. 564, S. 574, S. 748, and S. 846.
SR-418

POSTPONEMENTS

MAY 18

9:00 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on airline concentration.
SR-301

SENATE—*Tuesday, May 16, 1989*

(Legislative day of Tuesday, January 3, 1989)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the Honorable RICHARD H. BRYAN, a Senator from the State of Nevada.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

For my people have committed two evils; they have forsaken Me the fountain of living waters, and hewed them out cisterns, broken cisterns, that can hold no water.—Jeremiah 2:13.

God of Abraham, Isaac, and Israel, in our contemporary culture we commit the same evils. We give preeminent attention to the body—aerobics, jogging, diets—and bodily appetites prevail. Shallow minds, dried up souls, empty hearts result. We indulge ourselves physically and starve ourselves spiritually.

Patient, gracious Father in Heaven, forgive us and turn our hearts to Thee for the refreshing renewal and spiritual health we need. In the name of Him who is the Way, the Truth, and the Life, we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, May 16, 1989.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable RICHARD H. BRYAN, a Senator from the State of Nevada, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. BRYAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The Chair recognizes the acting majority leader.

THE CHAPLAIN'S PRAYER

Mr. FOWLER. Mr. President, I thank the Chaplain for his morning prayer and his continued service to our Creator and to this body. It was a wonderful prayer reflecting the words of Paul in his letters to the Romans:

I beseech you therefore, brethren, by the mercies of God, that ye present your bodies a living sacrifice, holy, acceptable unto God, which is your reasonable service.

I thank him for his continued stewardship on behalf of the people of this country and on behalf of all of us who serve.

THE JOURNAL

Mr. FOWLER. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. FOWLER. Mr. President, following the time for the two leaders, there will be a period for morning business not to extend beyond the hour of 10 a.m., with Senators permitted to speak therein for up to 5 minutes each.

At 10 o'clock this morning the Senate, Mr. President, will resume debate on the Senate Joint Resolution 113, the FSX disapproval resolution.

The Senate will also recess today from 12:30 p.m. to 2:15 p.m. to accommodate the party conferences.

The minority leader, I believe, is also at the White House this morning with the majority leader.

RESERVATION OF LEADER TIME

Mr. FOWLER. Mr. President, I will reserve at this time, without objection, both leaders' time.

QUORUM CALL

Mr. FOWLER. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. REID. Mr. President, are we in morning business now?

The ACTING PRESIDENT pro tempore. We are not yet in morning business.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of morning business not to extend beyond the hour of 10 a.m., with Senators permitted to speak therein for not to exceed 5 minutes each.

LONG-RANGE ENERGY POLICY

Mr. REID. Mr. President, in 1974 I came to Washington, DC, and I was impressed, as everyone was at that time, by the tremendously long gas lines, people lined up for blocks and blocks waiting to fill their cars with gasoline. I had never seen anything like it.

It was not until a few months later that these same long gas lines were in Nevada. They were all over the United States. The gas crisis came and it went.

But in spite of this, the fact that we should recognize is the fact that a gas crisis could come again, and we have done nothing about establishing a long-range energy policy in this country.

In fact, Mr. President, we are importing more oil than ever, both in real terms and in percentage terms. There is presently no Government emphasis, no Government stimulus, no Government stress, no Government tax policy that would cause us to spend additional money on oil shale development, solar energy, wind energy, geothermal. No, we have no long-range energy policy and we are not developing one.

You would think, with the disaster that just occurred in Alaska, that it may help us see the light that we should have a long-range energy policy, but probably it will not. The sad part is this is not the only area of failure of this country to develop a long-range policy.

Mr. President, what do manganese, cobalt, platinum group metal, and chromium have in common? Mr. President, these are all materials critical to either the economic or the political security of the United States, but are available predominantly from countries of questionable reliability.

The United States is about 75-percent reliant on imports of chromium from South Africa, Zimbabwe, Yugo-

slavia, and Turkey. Chromium, essential for the construction of automobiles, aircraft, insulation of high-temperature furnaces, and many other industrial applications, is being imported.

Mr. President, 95 percent of the United States cobalt supply is provided through imports from Zaire, Zambia, Canada, and Norway. This is crucial in the forging of alloys, the building of tool bits, and the refining of oil.

Manganese is crucial in the alloy process of certain high-strength steels used in various weapons systems crucial to this Nation's defense. One hundred percent of our manganese supply is imported from South Africa, Brazil, and Gabon.

Platinum group metals are essential in petroleum refining, chemical processing, and automobile exhaust treatment. They are also used in telecommunications equipment, medical and dental equipment. Ninety-two percent of our supply is imported from South Africa and the Soviet Union, with a little from Great Britain.

Without these materials many basic products we have all come to rely on would simply not be available. As my colleagues can see, we are very vulnerable to a complete or partial embargo of these materials. There are several policy options to consider to guard against such an eventuality. Two that spring immediately to mind are stockpiling and developing substitutes for these materials. But to do this, it will take a coordinated effort at the national level to devise a policy to address this problem. Within the White House is a council charged with exactly this mission. This was established in 1985. Unfortunately, in its 4 years of existence the National Critical Materials Council has done nothing to study, recommend, or in any other way further the development of a national critical materials policy.

Each year the administration has recommended no funding. For the fiscal year 1990 budget again they have recommended that it be defunded. And even though Congress has funded it in each of those years, the agency has simply not worked because the administration for reasons unknown has not wanted it to work.

I think this is a perfect example, Mr. President, of the words of Harold Laski that we must plan our civilization or perish. And certainly in the area of energy policy and a minerals policy we must plan or perish.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WILSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from California is recognized.

(The remarks of Mr. WILSON pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. WILSON. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CONGRESSIONAL CALL TO CONSCIENCE VIGIL

Mr. COCHRAN. Mr. President, despite recent signs of change in the U.S.S.R., many Soviet citizens are still denied their basic human rights. This is particularly true of many Jews, who suffer discrimination in housing, education, and employment, and are often denied permission to leave the Soviet Union to live in another country. We in the United States must continue to call attention to the plight of these persons and to press for greater religious tolerance, freedom of travel, and fundamental human rights.

The Congressional Call to Conscience Vigil is an annual opportunity for Members of Congress to speak out on the denial of basic freedoms to Soviet Jews. Since 1978, Members participating in the vigil have made statements for the RECORD to heighten public awareness of cases of special need. I rise in this year's call to conscience to bring the attention of the Senate to the plight of the Uspensky family.

Igor and Inessa Uspensky are Soviet entomologists who previously worked at the Institute of Medical Parasitology and Tropical Medicine in Moscow. Igor is the son of Irina Voronkevich, a distinguished biologist, and Inessa is the sister of Alexander Yofee, an eminent Moscow mathematician and a leading refusenik. The Uspenskys have two children, Ilya, born in 1962, and Slava, born in 1968.

In 1979, the Uspenskys asked permission to leave the U.S.S.R. Soviet authorities not only refused them visas to emigrate to Israel; they also isolated Inessa and Igor from their scientific contacts and even threatened colleagues who remained in touch with them. After a lengthy campaign for their dismissal, the institute declared the Uspenskys "redundant," and by the end of 1983 they were without professional employment.

Visitors reported in January 1984 that Inessa had no job outside the home, and Igor was working part-time as an elevator operator. He continually worried that he might lose even that employment, since KGB agents were telephoning at intervals checking on his position. His fears were well-founded; he did lose his job on December 31, 1986.

In July 1987, the Uspenskys again asked permission to emigrate and were again refused, this time on grounds of "state security," under Soviet emigration regulations issued in January 1987 permitting officials to deny emigration to applicants having knowledge of "state secrets." Use of this regulation in the case of the Uspenskys was highly questionable, since Igor's work at the institute had never given him contact with classified material.

Beginning January 1, 1988, all Soviet Jews were required to provide evidence of first-degree relatives abroad in order to become eligible to apply for emigration. Under this requirement, the Uspensky's son, Slava, was informed on January 19, 1988, that his application to leave the Soviet Union could not be authorized. Later that same year, the entire Uspensky family was told they could not apply for emigration again until 1997, on the grounds, this time, that Igor's mother, Irina Voronkevich, held "state secrets." Since Irina, born in 1912, left her work at the Ministry of Agriculture in 1976, the Soviets in effect are claiming that she will possess classified secrets for 9 more years, until she is 85 years of age and has been out of government employment for 21 years.

Mr. President, Igor Uspensky and his family are still waiting for the opportunity to pursue their lives outside the Soviet Union. We want them to know—and we want the Soviet Government to know—that we are concerned about the Uspenskys and others who suffer denial of basic human rights. We call their case to the conscience of free men and women everywhere, and we urge our Government to continue to seek effective means to persuade Soviet authorities to relent in this situation and in similar cases.

AIDS UPDATE

Mr. CRANSTON. Mr. President, according to the Centers for Disease Control, as of April 30, 94,280 Americans have been diagnosed with AIDS; 53,544 Americans have died from AIDS; and 40,736 Americans are currently living with AIDS.

Mr. President, 3,290 more Americans have developed AIDS and 1,933 Ameri-

cans have died from this horrible disease during the month of April.

Nearly 1 year ago, on May 25, 1988, I first began placing in the RECORD the most recent statistics concerning AIDS. At that time, 62,200 Americans had been diagnosed with AIDS and 35,051 Americans had died. Over the last 12 months, the number of individuals diagnosed with AIDS and the number of individuals who have died from AIDS have increased by more than 50 percent. After more than 8 years, this epidemic continues to claim American lives at an alarming rate. AIDS is still very much a crisis and, more likely than not the experts say, will remain one well into the next decade.

We cannot afford to become complacent. We must continue to be vigilant in fighting this virus. Although we succeeded in enacting sweeping legislation last year regarding many aspects of the AIDS epidemic, much, much more still needs to be done.

The spring 1989 edition of Issues in Science and Technology includes an article that puts forth a blueprint for action on AIDS. The article, entitled "A National Strategy on AIDS," is a reprint of a white paper that was written by Robin Weiss, director for AIDS activities at the Institute of Medicine [IOM]. It is based on the IOM report "Confronting AIDS: Update 1988."

The white paper calls on the Bush administration to take several actions to slow the spread of the epidemic, including developing a comprehensive plan for financing the care of individuals infected with the HIV, initiating a forceful program for the treatment of substance abuse, and instituting an aggressive and unambiguous educational campaign. The recommended nine point plan, if implemented, would bring us closer to the day when AIDS is eradicated. But we must begin now. We must not allow foot dragging to delay actions until hundreds of thousands more lives are lost and millions more are threatened. I will ask unanimous consent that the article be printed in the RECORD at the conclusion of my remarks and urge all my colleagues to read it.

Finally, Mr. President, I want to express my gratitude to Dr. C. Everett Koop for his years of service to the country as the Surgeon General of the Public Health Service. I was saddened to learn about Dr. Koop's decision to resign his post. He will be greatly missed by all who care deeply about stopping the AIDS epidemic and other vital public health issues. Dr. Koop is a man of dedication and conscience. He has been an outspoken voice for sound AIDS policy when others in the Reagan administration were silent. He has been a compassionate voice when others in the Reagan administration advocated counterproductive and ideologically based policies.

Mr. President, I will miss Dr. Koop's eloquence and candor, but I know he will continue to contribute to the development of AIDS policy and look forward to working with him. I join with many other Members of Congress in wishing Dr. Koop well.

I ask unanimous consent that the article to which I referred be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A NATIONAL STRATEGY ON AIDS

Early in January 1989, the presidents of the National Academy of Sciences and the Institute of Medicine observed the following in a letter to then President-Elect George Bush: "Americans have generated an enormous fund of knowledge about AIDS. We know its cause, we can test for the presence of HIV in the body, and we know what measures would, if successfully applied, slow its spread. Furthermore, the scientific understanding that lays the groundwork for the development of effective vaccine and drug treatment grows daily. Yet despite these triumphs, we have not successfully confronted the epidemic. Your Administration inherits the opportunity to harness our knowledge and turn the tide against AIDS."

The letter accompanied a "white paper"—a wide-ranging nine-point national program—designed to help turn that tide. Such a comprehensive strategy requires presidential commitment and leadership. But it also depends on the consent, participation, and skills of great numbers of people, in both the public and the private sectors, who contribute to progress in science, technology, and health and who facilitate its enlightened application. Thus the editors of this magazine thought that its readers would appreciate seeing the NAS/IOM white paper on AIDS:

During the next four years in this nation, the epidemic of human immunodeficiency virus (HIV) infection and its most severe manifestation, acquired immune deficiency syndrome (AIDS), will claim over 200,000 lives. The U.S. Public Health Service estimates that 1 million to 1.5 million people are currently infected with the virus. In the absence of effective therapy, the vast majority of those infected will develop AIDS and die. Although AIDS now kills fewer people than heart disease or cancer, its rank as a cause of mortality is quickly rising, and the primary sufferers of AIDS come from what is ordinarily a healthy and productive population group: young adults.

Stemming this agonizing epidemic requires presidential leadership. The epidemic poses dilemmas both for the public and the private sectors which will best be solved by forceful, coherent national policy. The obligation to formulate AIDS policy spans a variety of federal government departments and reaches beyond the Department of Health and Human Services (HHS) to the departments of Justice, Education, State, Defense, Energy, the Veterans' Administration, and other components of the Executive Branch. In addition, private organizations, foundations, volunteer groups, professional organizations, and state and local governments already have taken the initiative to create educational programs, formulate laws and regulations, and address other aspects of the epidemic. These efforts are an enormous contribution to the progress that has been made thus far against HIV infection and AIDS. Nevertheless, the absence of coherent national direction condemns many localities to begin anew when it comes to setting local policy and increases the likelihood that failed experiments will be repeated from place to place. The Bush administration can furnish overarching direction for all segments of the government and the private sector. Equally important, the president can set a tone that encourages aggressive action yet resists hysteria and insensitivity to the civil rights of infected persons.

Furthermore, foreign leaders will turn to the president of the United States for assistance and wisdom in addressing their own countries' HIV problems. The World Health Organization estimates that between 5 million and 10 million persons are infected with HIV worldwide. By 1991, AIDS may double the mortality rate for young and middle-age adults in some developing countries, and perinatal transmission in those countries may reverse hard-won advances in child and infant survival.

This paper proposes that the Bush administration take several actions, which we believe will help slow the spread of HIV and limit its damaging effects on this nation and on other countries: (1) Use the National Commission on AIDS effectively; (2) protect HIV-infected persons from discrimination; (3) develop a comprehensive plan for financing the care of those with HIV infection and AIDS; (4) initiate a forceful program for the treatment of substance abuse and the prevention of the associated spread of HIV; (5) institute aggressive and unambiguous educational programs and evaluate their effects; (6) ensure that HIV testing and other public health measures are used only when their purposes are clear and their results productive; (7) bolster efforts in surveillance, case reporting, and the gathering of information about risk behavior; (8) ensure that biomedical research (including drug and vaccine development and regulation) continues to follow fruitful paths; and (9) recognize our special responsibility in international health efforts to control AIDS.

USE THE NATIONAL COMMISSION ON AIDS EFFECTIVELY

President Reagan recently signed into law the AIDS Amendments of 1988, which establish a National Commission on Acquired Immune Deficiency Syndrome. Although the creation of a national commission is an important step, the commission's existence alone does not guarantee its effectiveness. The Bush administration can maximize the commission's impact in the following ways:

The president will appoint five members of the 15-member body, two of whom will be selected from the general public (the other three are the Secretary of Health and Human Services, the Administrator of Veterans' Affairs, and the Secretary of Defense). The two other appointees should be senior experts of national stature in areas of particular relevance to AIDS. They should not be chosen because they hold any particular political ideology.

The commission will submit its reports to the president and to the appropriate committees of Congress. In addition, however, the chairman should have direct access to the Oval Office. The work of the commission will have the greatest possible effect on policy if it is widely perceived that its chairman has the ear of the president. The president can endow the commission with sufficient national stature and credibility for its advice to influence all participants in the struggle against AIDS.

The commission is required to report its recommendations one and two years after its constitution. Although the reports will identify needed action, the commission will be most valuable if it is also consulted on a continuing basis as policy questions arise within the executive branch.

PROTECT HIV-INFECTED PERSONS FROM DISCRIMINATION

HIV transmission occurs through sexual contact, the use of contaminated needles or syringes, exposure to infected blood or blood products, transplantation of infected tissue or organs, and from mother to child either across the placenta or during delivery (and probably during breastfeeding). There is no evidence that HIV is transmitted by casual contact or by insects. Therefore, there are no grounds for discriminating against persons with HIV infection or AIDS because of fears that they pose a health risk through casual contact in schools, in the workplace, in housing, or in customary social interchanges.

However, such discrimination does exist, and fear of discrimination discourages some individuals at risk for infection from participating in testing programs, contact notification, and other potentially effective public health measures. Public health measures crucial in controlling the HIV epidemic depend on voluntary cooperation; for that cooperation to occur, people must believe that they will be protected from discrimination.

The president should ask Congress to enact legislation designed to prevent discrimination on the basis of HIV infection or AIDS in both the public and the private sectors.

DEVELOP A COMPREHENSIVE PLAN FOR FINANCING THE CARE OF THOSE WITH HIV INFECTION AND AIDS

The average lifetime medical expenses per AIDS patient in the United States, from diagnosis to death, are from $65,000 to $80,000. In 1986, estimated total direct costs for AIDS were approximately $1.64 billion—$1.1 billion for personal medical care and $542 million for nonpersonal expenses—representing 0.4 percent of total U.S. health expenditures. By 1991, direct costs associated with AIDS are projected to be $10.8 billion and to account for approximately 1.5 percent of national health care expenditures. Although the proportion of total health care expenditures devoted to AIDS will continue to be small through 1991, in certain metropolitan areas the economic burden to the health care sector will be great. For instance, in San Francisco, AIDS patients are expected to occupy 12.4 percent of all medical/surgical hospital beds.

According to the Health Care Financing Administration, Medicaid provides health care coverage for approximately 40 percent of all patients with AIDS. Public hospitals in states with stringent Medicaid eligibility requirements are faced with growing numbers of uninsured AIDS patients; the result is that many public hospitals are incompletely reimbursed for the care they provide. Medicare currently covers only 1 percent of AIDS patients, in part because they often do not survive the required 24-month waiting period to qualify for benefits. Private health insurance may pay for a dwindling share of AIDS patients as more poor and nonworking persons become sick and because insurers are making plans to limit their exposure to financial risk.

Solutions to financing AIDS health care can reflect the pluralism of the current health care financing system. Elements of a comprehensive financing strategy could include: enabling HIV-infected persons to secure or maintain private insurance through insurer tax incentives and government subsidy of premiums; modifying existing state Medicaid programs to make them more uniform and more efficient; shortening or eliminating the 24-month waiting period for Medicare benefits; establishing state risk pools; and establishing an AIDS federal grant program to direct funds to the states on the basis of a formula that reflects individual states' AIDS caseloads and resources.

The Secretary of HHS should develop an AIDS federal grant program to the states to ensure that AIDS patients and those with HIV-related conditions have access to appropriate and cost-effective care. This approach would offer some immediate financial relief to those hard-hit states and medical institutions that currently bear a disproportionate burden of AIDS care.

Another immediate need is to remove financial barriers to drug therapies. The Secretary of HHS should require all state Medicaid programs to reimburse for costly AIDS drugs that have been approved for marketing or that are under the Food and Drug Administration's (FDA) new mechanism allowing certain drugs still under investigation to be distributed.

Piecemeal solutions to the problems of health care financing must not sidetrack the need for a more comprehensive scheme. The Secretary of HHS should take the lead in developing a comprehensive national plan for delivering and financing care for needy HIV-infected and AIDS patients. The following principles should guide the development of such a financing strategy: (1) coverage from the time HIV infection is discovered, (2) consideration of relief for hard-hit communities, (3) shared responsibility between public and private sectors, and (4) payment mechanisms that encourage the most cost-effective types of care.

Initiate a forceful program for the treatment of substance abuse and the prevention of the associated spread of HIV. The gross inadequacy of efforts to reduce HIV transmission among intravenous (IV) drug abusers, when considered in relation to the scope and implications of such transmission, is the most serious deficiency in current programs to control HIV infection in the United States. IV drug abusers are the second largest group of AIDS sufferers, and the most likely to transmit HIV beyond the current high-risk groups. Several actions are necessary:

First, the Secretary of HHS should order a rapid, large-scale expansion of residential drug-free treatment, outpatient treatment, and methadone maintenance in order to provide immediate access for all addicts who request treatment. Methadone maintenance, an effective therapy for some heroin addicts, does not treat cocaine addiction. Yet IV cocaine abuse is increasingly related to transmission of HIV infection. Research to find effective treatment for cocaine addiction is urgently needed.

Second, innovative intervention programs must be begun to reach those IV drug abusers who are not in treatment. Former IV drug abusers, functioning as community health workers, can provide individual risk-reduction counseling; in addition, trials of sterile needle exchange programs, in which sterile needles and syringes are provided to drug abusers, should be implemented and evaluated.

Finally, long-term drug abuse prevention strategies are needed that begin with teens and preteens. Research and evaluation are necessary to determine which prevention methods work best.

Institute aggressive and unambiguous educational programs and evaluate their effects. Educational efforts to foster and sustain behavioral change are the only practical means now available to stem the spread of HIV infection. Information about the modes of HIV transmission must be conveyed in an understandable, yet scientifically accurate form. The message of AIDS education programs must also address sexual behavior and drug abuse, matters that are regarded by some as morally unsuitable for description in public health campaigns. Unsubstantiated concern that frank, straightforward educational programs can encourage IV drug abuse or sexual relations has stymied educational efforts. Explicit information on the risks associated with unsafe sex and drug abuse, and the way those risks can be minimized, does not promote or encourage such activities. Its sole function is to help people avoid an illness that endangers their lives and those of their sexual partners and children, and costs the nation billions of dollars.

Government at all levels should continue to fund factual educational programs designed to foster behavioral change. This may mean supporting AIDS education effors that contain explicit, practical, and perhaps graphic advice, targeted at specific audiences, about safer sexual practices and how to avoid the dangers of shared needles and syringes. This is the approach followed in the United Kingdom and in other western European countries.

In addition, the Secretary of HHS should see that more studies are conducted to determine the effects of various types of educational campaigns on specific populations. For example, there have been few systematic assessments of the effect of AIDS education programs or media presentation on the behavior of heterosexuals (as opposed to the impact on their beliefs or understanding about the disease). It is also essential to develop effective methods for reaching school-age children, youth who are just becoming sexually active, and persons at risk for HIV infection within minority communities.

The urgency of the HIV epidemic warrants a multiplicity of educational efforts, including the use of paid advertising to convey all types of AIDS-prevention messages on television and in other media. Although a number of federal government entities, including the military, the postal service, Amtrak, and the U.S. Mint, currently spend more than $300 million yearly for advertising, administrative restrictions from HHS have precluded the Centers for Disease Control (CDC) from paying for advertising in the past. But the recently enacted AIDS Amendments of 1988 now allow the CDC to purchase advertising time.

The Secretary of HHS should direct the CDC to purchase advertising for educational messages and should make certain that funds are supplied to do so.

Ensure that HIV testing and other public health measures are employed only when their purposes are clear and their results productive. The ability to detect antibodies to HIV has prompted various proposals for testing individuals and screening populations for evidence of HIV infection. However, these proposals must be assessed carefully to evaluate what they might add to interventions that are possible in the absence of

testing. The president can encourage a level-headed approach to testing strategies by conveying the belief that HIV testing alone is not a panacea. Several considerations follow.

First, it is essential that the purpose of any proposed testing plan be clearly spelled out; test results should be linked to actions that achieve individual or public health objectives. For example, donated blood, tissue, organs, and semen can be tested, and infected material discarded, thereby preventing transmission. This purpose is sound and has been achieved: The screening of blood for antibodies to HIV, combined with self-disqualification by potential donors at high risk for infection, has almost eliminated the transmission of HIV through blood and blood products. A common rationale for medical testing—to identify infected, asymptomatic persons so that they can be treated early—cannot be applied to HIV infection, since no therapy yet exists that prevents the progression of HIV infection to overt illness.

Another frequently cited purpose of testing, that knowledge of one's antibody status may encourage behavioral change, is a hoped-for but still unproven effect. In addition, it has been argued that uninfected persons can use the knowledge of others' test results to protect themselves from infection; or, in some situations (e.g., the military, jails, and other closed populations), authorities can intervene to protect uninfected persons by testing and then segregating infected persons. Extension of these strategies to the general population, however, is inappropriate and infeasible because 1 million or more people may be infected, the mean incubation period is eight to nine years, and the virus is not transmitted by casual contact. The testing of applicants for marriage licenses has also been tried, but such testing is costly, identifies very few infected individuals, and is not clear in its intent (if one of the applicants were infected, would marriage or pregnancy be prohibited?).

At this time, the only mandatory screening appropriate for public health purposes is that of donated blood, tissue, and organs. Voluntary testing, however, will play an increasingly useful role against the spread of HIV infection. The Secretary of HHS should ensure that voluntary testing, combined with pretest and posttest counseling, is available to all those who may be at risk for exposure to HIV. For example, serologic testing and counseling should be extended immediately to all settings in which IV drug abusers are seen or treated.

The technical aspects of HIV testing must also be considered. Although the current tests for HIV antibody are highly accurate, there will inevitably be false-positive and false-negative results (and the proportion of positive test results that are false is largest when the test is applied to populations with a low prevalence of infection).

The federal government should give more attention to establishing standards for laboratory proficiency in HIV antibody testing, setting criteria for interpreting assays, and instituting quality assurance procedures.

Other public health measures should also be carefully considered for their potential effectiveness in controlling the spread of HIV and for their conformity with social values.

Voluntary contact notification, for instance, may be useful in preventing the spread of HIV infection. Contact notification programs allow local public health officials or physicians to inform the sexual or needle-sharing partners of HIV-infected individuals who are afraid, embarrassed, or unwilling to notify partners themselves. These programs are of greatest value when directed at those who otherwise could be unaware that they had risked infection.

Mandatory reporting of persons who test positive for HIV antibodies, on the other hand, should not be required at this time. In fact, the effect of mandatory reporting may be to discourage individuals from seeking voluntary testing, a cost that does not justify its potential benefit. For determining how many people in a population are infected, well-designed studies are more useful than random reporting of cases.

Bolster efforts at surveillance, case reporting, and the gathering of information about risk behavior. By November 1988, over 76,000 AIDS cases had been reported to the CDC. Of these, over 40,000 have died. An additional 10 to 20 percent of cases are believed to have been missed by the case surveillance system. The Public Health Service predicts that by the end of 1992, 365,000 cases of AIDS will have been diagnosed.

Estimates of the total number of persons infected with HIV are less certain. Methods used to estimate the number of currently infected persons rely on information that is itself uncertain—for example, the prevalence of infection in certain subgroups (such as homosexual men and IV drug abusers), the sizes of these subgroups, and the latency period between infection and the onset of AIDS.

It is essential to maintain reliable data on current AIDS cases, to refine estimates of the extent of current HIV infection, and to predict accurately future trends in the epidemic. Several actions will serve these ends:

The Secretary of HHS should ensure that the CDC's personnel, space, and technical resources are adequate to the task of continuing epidemiological research and surveillance, including the development of mathematical models of the HIV epidemic.

The Secretary should also see that adequate research support is provided to the social and behavioral sciences so that more can be learned about sexual behavior, IV drug abuse patterns, and how to influence behavioral change.

Ensure that biomedical research continues to follow fruitful paths. Substantial progress has been made in defining the genetic structure of HIV and understanding how the virus replicates; less well understood, however, is how HIV compromises the human immune system and causes disease. Understanding the processes and consequences of HIV infection is crucial to the development of therapies and vaccines against HIV and AIDS. This understanding, in turn, is rooted in all basic research in the areas of cellular biology, virology, immunology, and genetics. For this reason, increasing the amount of funds devoted to AIDS at the expense of all other basic biomedical research is shortsighted.

Funding for basic research in all areas of biology should remain strong rather than be reduced in favor of AIDS-targeted research.

Current knowledge of the HIV proteins and their functions offers several potential targets for rational drug design. The search for therapeutic agents must also encompass the screening of existing compounds for potential antiviral activity. Both of these approaches to drug development require organizational cooperation among the government, the pharmaceutical industry, and academic health centers.

Once a drug appears to be a candidate substance for the treatment of HIV infection or AIDS, it begins the long journey toward licensure. The U.S. drug approval process, which is regulated by the FDA, is the most rigorous in the world: it generally involves tests in animals and then a three- or sometimes four-phase series of clinical (human) trails for safety and efficacy. Although the process has been criticized as slow and cumbersome, it has also been credited with protecting the American public from the harmful effects of inadequately tested drugs. In response to the AIDS crisis, the FDA has moved to speed up some portions of its review and has established a category of investigational new drugs (IND) called the "treatment IND," which allows manufacturers to distribute a drug for use (if the drug meets certain criteria) while it is still under investigation. Zidovudine (AZT), which was approved in September 1986 under a prototype treatment IND mechanism, received the fastest evaluation that has ever occurred within the FDA. In addition, new FDA regulations will allow the approval and marketing of certain drugs after Phase II testing.

However, the diversion of FDA personnel necessary to approve zidovudine resulted in a backlog of applications in the FDA's Division of Anti-Infective Drug Products. As the number of applications for treatment IND status grows, these personnel problems may become more severe. At present, the FDA is not a bottleneck in the availability of new drugs to treat HIV infection and AIDS. The paucity of new drugs is related more to shortcomings in the science of antiviral agents than to the drug approval process. However, as more promising new drugs are discovered or designed, the FDA, without additional resources, could become an impediment to speedy availability.

FDA's resources for new drug approval should be commensurate with the task. The need to borrow personnel from other parts of the agency should be relieved; the need for work space, which appears to be particularly acute, should also be addressed.

Although the FDA has responded with ingenuity to hasten the availability of new drugs against HIV, a note of caution is warranted. The treatment INDs (and certainly the widespread use of unapproved drugs obtained here or abroad) could interfere with the ability to execute conclusive clincial trials because new experimental drugs will be available to patients earlier than in the past.

In light of these concerns, the Secretary of HHS should direct the FDA to seek an outside evaluation of the treatment IND process and other new regulations designed to hasten drug approval or availability. This evaluation should take place after enough time has elapsed to determine whether new regulations have unanticipated consequences for any new drugs.

The urgency of the AIDS situation has brought the traditional scientific method for evaluating the effectiveness of treatment—randomized controlled clinical trials—under scrutiny. Criticism of this method grows in part from the frustration, fear, and anger of people with HIV infection, who may feel a lack of urgency in the drug development process. Yet, carefully controlled trials remain the fastest, most efficient way to determine what treatments work. Conducting well-designed trials from the beginning will benefit more patients, sooner, than any other approach. Poorly designed trials, or administering drugs without controls and "observing" the course of disease, can be inconclusive or lead to incorrect

conclusions. The widespread distribution of untested drugs makes it difficult to determine whether they are effective, especially if the benefits are real but small. The result of these approaches could include the continued prescribing of useless or harmful therapies.

Although the best-designed clinical trial would enroll the fewest people needed to demonstrate drug effectiveness, many persons with HIV infection want to participate in clinical trials.

The National Institutes of Health (NIH) should provide wider access to clinical trials by broadening their geographic base; by extending trials to previously untapped populations including women, IV drug abusers, and pediatric patients; and by testing all compounds that appear to have a possibility of effectiveness.

The prevention of HIV infection by vaccination continues to pose fundamental difficulties. Experiments with candidate vaccines in animals induce antibodies that fail to block subsequent HIV infection. These experimental results tend to mirror clinical observations of natural infection in patients, in which disease progresses despite the presence of antibodies and other immune responses. The advent of a licensed vaccine against HIV remains a distant prospect. Nonetheless, innovative research continues and may produce more promising results in the future.

In the meantime, the FDA has approved human trials for two vaccine candidates. These tests, designed to assess the safety and immunogenicity of the vaccine candidates, were approved in the absence of proof of protective efficacy in animals, a generally accepted prerequisite to human vaccine trials.

In the future, the FDA should approve human trials for HIV vaccine candidates only when protection against infection has been demonstrated in a suitable animal model or when the candidate rests on new knowledge of the relevant human response that cannot be adequately modeled in animals.

In addition, NIH, CDC, and other relevant government agencies should begin now to plan for large-scale human efficacy trials of as yet undeveloped vaccines. Such trials are complex to design, and their results will be difficult to evaluate. Because the trials must enroll sufficiently large numbers of subjects at sufficiently high risk of infection, the sites for vaccine efficacy tests will most likely include African and other developing countries. A process should be agreed on for joint decisionmaking among the countries involved; the World Health Organization is currently developing guidelines for the conduct of these trials.

The development of model systems, in which an animal infected with HIV or a similar animal virus shows the same symptoms and exhibits the same course of disease progression found in human AIDS patients, is essential to the campaign against the disease. Yet there is currently no such model. Chimpanzees and other primates are imperfect but nevertheless useful animal models, but they are in short supply for research purposes.

Plans for breeding, conserving, and otherwise expanding the present stock of chimpanzees should be examined. This expansion may require increased funding. In addition, the development of a mouse (or other small animal) model for AIDS is of utmost importance. A promising development in this area is the transplantation of human fetal immune system elements into immunodeficient mice. As long as efforts to develop small animal models are carried out under safe laboratory conditions, further work in this area should be strongly supported.

Existing facilities are inadequate for further advances in research against HIV: Very few laboratories are equipped to handle the virus safely.

The director of NIH, in consultation with research scientists from within and without the institutes, should assess the need for and costs of new intramural and extramural facilities for AIDS research. This information should be forwarded to the Secretary of HHS and to Congress for evaluation and subsequent action.

Federal appropriations for AIDS research have been growing steadily. At the present rate of increase, funding will reach the goal (previously recommended by the Institute of Medicine and the National Academy of Sciences) of $1 billion annually by 1990.

When federal research expenditures for AIDS reach this figure, an assessment of the need for further increases should be made. It is important to ensure that other research programs are not penalized by a long-term disproportionate growth of the AIDS budget.

Recognize our special responsibility in international health efforts to control AIDS. The rationale for U.S. involvement in international AIDS activities is more broadly based than the protection of American troops and tourists. AIDS can destabilize the work forces and the economies of developing countries whose advancement has been aided by U.S. dollars. AIDS can also reverse the child survival figures in countries where our help only recently has improved infant and child survival. Finally, some countries of the world offer important opportunities for collaborative AIDS research because they present varieties and prevalences of disease that do not exist in the United States.

The United States has an additional responsibility to international health efforts to control AIDS because of our exceptional resources in public health specialists and biomedical scientists, the large number of infected persons in the United States, and our relative affluence. American activities in international work against AIDS are conducted by many federal agencies. In addition, U.S. contributions to the World Health Organization Global Programme on AIDS (which provides support to national AIDS control and prevention programs and conducts global AIDS surveillance and research) were $1 million in 1986, $5 million in 1987, and about $15 million in 1988.

The Bush administration should plan now to provide a substantial increase in resources over the next few decades to be devoted to international AIDS prevention and control, reaching $50 million annually by 1990. Funds will also be needed to ensure that today's predominantly educational methods for preventing HIV transmission can be supplemented with appropriate vaccines and drugs if and when they become available.

Important as the above responses are, a further resource in the nation's efforts against AIDS is solely the provenance of the president—a resolve that the devastation caused by HIV infection will be prevented and its sufferers provided compassionate care, and an attitude that bespeaks the resolve.

THE STATUS OF THE IMPROVED PROCESSING INSPECTION [IPI] REGULATIONS

Mr. DASCHLE. Mr. President, when Congress passed the Processed Products Improvement Act in 1986, it intended that public health safety would be raised. Instead, the regulations that the Department of Agriculture has promulgated for processing inspection pursuant to the act could at the least create the impression of decreased public safety. Despite the recent rash of food scares, such as cyanide in Chilean grapes, the United States food supply is probably the safest food supply in the world. However, as the recent scares illustrate, the public's confidence is easily shaken. The last thing the meat industry needs is a loss of consumer confidence.

Maintaining consumer confidence in the food supply should be a primary task of both the administration and the Congress. The best way to maintain confidence is to ensure that the inspection programs we operate, have the input and blessing of all parties involved in the industry, as well as that of consumers.

A recent tour of a packing plant emphasized for me the difficulties inherent in trying to base a discretionary inspection system on computer-analyzed statistics. Which tasks do you include in the data that is collected? What discretion do inspectors have to make decisions based on other factors not included in the official criteria? All of these are questions that the industry can help to answer. The industry should have been given more of an opportunity to help design the new regulations.

Every interested party, from the industry to the consumer groups, has called for the withdrawal of these regulations, because of USDA's failure to involve them in the formulation process. I fully endorse the withdrawal of these regulations. Once withdrawn, all of us can work together to develop regulations that will work and will fulfill the intent of the 1986 act.

Secretary Yeutter has delayed a decision on this issue until he has staff in place. I am hopeful that, with new people finally coming on board at USDA, we will be able to see the withdrawal of these regulations. Senator PATRICK LEAHY asked the nominee for Assistant Secretary for Marketing and Inspection Services, Jo Ann Smith, her views on withdrawing the regulations at her confirmation hearing last Friday. She said she was not allowed to comment at that time because the comment period was still open.

If Mrs. Smith is confirmed, by the time she assumes her post she will be free to make a decision on the regulations. I shall urge her to withdraw the regulations. With her extensive background in the beef industry I am hope-

ful that she will share the views of all interested parties.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. The period for morning business has expired. Morning business is closed.

DISAPPROVING THE EXPORT OF TECHNOLOGY TO CODEVELOP OR COPRODUCE THE FSX AIRCRAFT WITH JAPAN

The Senate resumed consideration of the joint resolution.

The ACTING PRESIDENT pro tempore. The clerk will report the pending business.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 113) prohibiting the export of technology, defense articles, and defense services to codevelop or coproduce the FSX aircraft with Japan.

Mr. FORD. Mr. President, we are back to the discussion of the resolution of disapproval of the so-called FSX deal with Japan.

There was a great deal of intriguing debate last week as it related to the reasons for this particular arrangement with Japan. There was a lot of concern I think expressed by Members of this body why we should spend $7 billion of the taxpayers' money to develop the finest military aircraft in the world, and then we make arrangements with a country that has a deficit in balance of trade with us of roughly $50 billion a year, and that we have prospects of getting somewhere in the neighborhood of $400 million for a $7 billion investment.

I have never heard in the 14 years I have been in the Senate an attempt to substantiate a deal by some of my colleagues whose hearts are not in the position they are being required to take. As most of us know, this arrangement was made under the previous administration. This administration does not like it. This administration made an attempt to change it. Some high officials in this administration testifying before the committees indicated that the deal was already made, that we were already boxed into the corner and so let us go on with it.

Well, that left Congress out of the loop. At least we have an opportunity to debate it. We have an opportunity to look at the facts. We have an opportunity to look at the long-term effect on this country, our industry, and our working men and women.

Japan spends about $35 billion a year on defense, whereas the United States spends nine times that amount. One would, therefore, hope that the country of Japan would carefully spend their apparent small defense resources. This arrangement does not appear to be so.

Instead of buying 130 F-16's for about $3 billion, they are going to spend $1.2 billion on development, $8 billion on production, a total of approximately $9 billion. That is three times what the same number of F-16's would cost. There has to be a reason for this type of arrangement and this kind of expenditure from a country that the world has recognized as an economic power because of its ability to produce.

It is also possible that the cost of development will triple the stated Japanese estimate, or it would go to $3.6 billion instead of $1.2 billion in the development phase. How can any proponent of the FSX justify the extra $5 to $8 billion cost of the FSX in light of scarce defense resources on both sides of the Pacific? Do not forget that this money will be spent while the Department of Defense will be trying to get the Japanese to spend more money annually to meet our common defense goals. Proponents of the FSX also tried to justify the program on the grounds that a 40-percent work share of development will earn General Dynamics $480 million, and the roughly 40 percent work share of production will be around $2 billion for a total of $2.5 billion. They say that this amount is close to the $3 billion that GD would have gotten if the Japanese had bought the plane off the shelf.

That is strange. We are saying that General Dynamics is the only one invovled in this and so by lettting the Japanese develop the FSX General Dynamics will still get almost as much as they would have gotten had they sold this plane off the shelf.

Let us go back and think a minute what are the reasons for wanting to participate in an arrangement that is so bad, apparently, that it would cost the country of Japan so much more money than if they were just buying the airplane for defense. I think everyone agrees that the F-16 is the best and most sophisticated military aircraft in the world. There has to be a reason.

Let us think a minute about General Dynamics and their profit and what labor people have decided. They say the short-term gain is a long-term loss. The President of the union that represents 40,000-some workers at General Electric, William H. Bywater, stated:

The net effect of this deal will be to give Japan a leg up in another vital industry resulting in the loss of jobs for U.S. workers who have built the U.S. aerospace industry to the strongest industry of its kind in the world.

He goes on to say:

Likewise, it misses the boat in its failure to hold out for full production of the FSX in the United States of America as a down payment by Japan on longstanding commitments to bring down the $55 billion annual trade bonanza it enjoys over this country.

It is my opinion that the union is not fooled one bit by the fleeting promise of 40 percent of a temporary—and I underscore "temporary"—workload. They understand the tradeoff, and they understand it well. The tradeoff is short-term gain and long-term loss. Why do we on Capitol Hill not understand what the working men and women of this country understand very well?

Let me make another point or two. The argument of not buying the F-16's off the shelf ignores the fact that the Japanese are going to waste—really, are they going to waste it—billions of additional dollars reinventing the F-16.

It also ignores the fact that, if Japan bought off the shelf, it would also have to buy all spare parts for the life of the Aircraft Program. They would have to buy them from the United States and parts made by American workers.

Spare parts cost two to three times the original purchase price. Think about that. So if the purchase price is X, we are going to receive Y in spare parts. I think we are giving up double here, maybe triple. It is another whammy on the working men and women of this country, and it is an increase in our deficit as it relates to balance of trade.

So the total F-16 buy from the United States would be about $12 billion over the life of this program. The guarantee of $2.5 billion falls far short of the $12 billion that a buy would generate.

We hear the argument, "Oh, they will buy it from somebody else. They will enter into a consortium with somebody else."

Well, if they are going to buy something inferior, I doubt seriously that they would want to enter into those contracts. They cannot make the deal with anyone else apparently, or they do not want to make the arrangement with someone else. They want to make it with good old Uncle Sugar so we can spend more taxpayers' money and lose more American jobs.

Over the last few years we have given away $1 trillion in deficit and balance of trade, and millions of American jobs. And we are standing here today proposing to do more of the same. What is in the deal for the United States? Let us look at it for a minute. What is in this deal for us? The proponents claim that there is access to advanced Japanese technology. Well, Japan is good at promoting, and they are always promoting and proclaiming their so-called advanced technology.

But let us be honest. The Japanese have not been major players in the aerospace industry. In order to find out if there was in fact advanced Japanese technology to be gained, several

other Senators and myself commissioned a GAO study of the question. The GAO has just concluded their study, and has found that the claim of advanced technology by Japan is false. Their claim of advanced technology to offer this country is false. There is no advanced Japanese technology in two areas of our Department of Defense interest: The phase array radar and the composite wing. U.S. companies are far, far ahead in those two areas.

The report in the Washington Post this morning, "GAO Criticizes FSX Jet Fighter Deal With Japan." The General Accounting Office of this Government criticizes that arrangement. Now, just because a few of us are out here saying it was a bad deal, we have substantially weighted our position with the General Accounting Office's report that it is a bad deal.

The report says in the second headline, "U.S. Has Little To Gain From Joint Project, Senate Vote Scheduled Today."

Let me read the first paragraph of this report.

The General Accounting Office yesterday directly challenged assertions by the Bush administration that the United States will gain access to superior Japanese technology by joint development of a new generation fighter plane, the FSX.

The GAO in a declassified report released on the eve of our vote, said: "The United States is superior to Japan."

The Government's General Accounting Office says the United States "is superior to Japan" in the composites technology needed to produce a light but strong wing made of plastics, and is ahead in radar technology. These are the two areas in which the administration officials said the United States could gain technology from Japan. Here our own Government offices say they are wrong, and that we are ahead. Then why should we give them this technology? What do we benefit in return? We not only lose in the short term in my opinion, but we lose badly in the long term. There has to be only one reason why Japan is willing to pay billions and billions of dollars more than it is worth to secure this arrangement with this country; and, that is, to get into the aerospace business, and to be in competition with us after we give them our highest technology, technology that is much better than theirs. They will have that.

Why, the building of the FSX and the knowledge they gain from us will be like sending their engineers to college. They will earn a degree in construction of aircraft for the next decade, and into the future to be in competition with us. If they are so great at all of this technology, if they are supposed to be superior to this country in their ability to put communications and all the technology together, let them do it.

Let us not give away taxpayers' dollars. Let us not give away American jobs. I hear a lot about free trade. "This administration is for free trade." I did not know we were for giveaway trade. There ought to be something fair, fair trade, and in my opinion, there is nothing about this that is fair to the taxpayers of this country, the men and women who have worked so hard to make us the dominant power in aerospace. We say to them that we are going to take all this technology and give it to someone else at bargain basement prices, so they can come back and take your jobs away from you.

Now, down in Kentucky, Mr. President, we have a saying for that: "Something about that ain't right." Let me just make a few more points, and the distinguished Senator from Illinois is here, and I want him to take the floor. Let us look behind the reasons maybe; let us kind of get them out on the table and see if we can find the reason for the Japanese being so anxious to have this arrangement. Why not buy the world's best—and to them the least expensive—fighter aircraft, the F-16 Fighting Falcon? Why are they going to reinvent the wheel, as they have done so many times, and build their own airplane? I think there is just one word, Mr. President, and that is "protectionism," on their part, pure and simple.

It will take at least 10 years to build the FSX fighter, 10 years during which the Soviet threat will be handled by American taxpayers, with our F-16's sitting at Misawa Air Base in Northern Japan. F-16's are good enough now to defend them, but it is not good enough to buy off the shelf. The Soviet defense buildup of their Far East forces began in the early 1980's. This is the threat, the reason for the FSX. How did Japan initially respond? They just kept on producing their old fighter, the F-1, an inferior aircraft that cannot stand up to the Soviets either now or during the next 10 years. "Uncle Sugar" is there with their F-16's at Misawa defending their country. The F-1 cannot operate at night and has a blind spot so big that it is easy for an opposing pilot to kill in a dog fight.

So how are they responding now? Again, they are letting us defend them while they build their own unique, and I underscore "unique," airplane. You see, they need a unique airplane, a Japanese airplane, to handle the Soviet threat. And the first unique airplane will be ready to defend against that threat maybe by 1997, about 15 years after the Soviet buildup began.

The word they use is "unique." Let us talk about uniqueness for a moment. This is the same argument the Japanese used to exclude our commercial products, uniqueness. The mud in Kansai Bay is unique, so American construction firms cannot help at Kansai airport. They are over here building ours. They will not let us get over there because the mud must be unique. Japanese rice is unique, so they cannot import United States rice. Japanese stomachs are unique, so they cannot eat United States beef. The truth is that any one of several American fighter planes, with minor modifications, can fly the so-called special Japanese mission.

So, Mr. President, there must be some motive here, a motive somewhere that would cause them to spend so much more money to get something, and there is something wrong when we make a deal, when our own General Accounting Office says they have nothing to offer to us; they have nothing to offer to us in return. The Chair knows, and I know, and I think all of us know, it is about the Japanese meeting their stated national goal of having a full-fledged aircraft industry with which to challenge the United States by the beginning of the next century.

The last decade of this century will be their decade of the airplane. Lee Iacocca said, I believe, that the Japanese have had decades of this and decades of that, and the next decade will be the decade of the airplane. And we are helping them get ahead of us, if nothing else, in the giveaway of jobs. I just think the FSX is part of a sophisticated national effort to develop a viable aircraft industry, to be in competition with American workers.

As I said earlier, the work on this airplane could be the university where the Japanese engineers will go to school. It will be the laboratory and the training ground from which will spring the design, production, avionics, and other engineering teams necessary for the Japanese civilian aircraft industry. That is why the Japanese are so adamant with proceeding with the FSX. They see their military aircraft industry as a necessary and critical component to the high-tech industrial future, and we are giving it away. If the Japanese want an aircraft industry to try to compete with us, that is fine, but we should not be participants in a giveaway, so that they might proceed in that direction.

It is very naive to argue, I think, as does the administration, that they have scrubbed the F-16 technology list to remove commerically applicable technologies. The very existence of the FSX program provides a kind of university, as I said earlier, in which all these skills will be completed.

It is time that we realize that the stakes in the FSX program are a lot higher than whether Japan can build one military aircraft.

This debate, I sincerely believe, is about our national future. It just does not make sense to this country boy that they want to spend billions and billions and billions of dollars more than it would cost them to get the most sophisticated military aircraft in the world, to develop this new one for their own unique ability, and we will defend them for the 15 years it takes to put this in the marketplace.

If the Japanese continue to ignore free trade principles, then what kind of alliance can there be down the road? If they are going to go their own way, then so be it.

But let us not be deceived into thinking that they are acting as steadfast allies and trading parties, when in this particular case, it is this Senator's opinion, and I think you will find many other Senators' opinions, that it is not.

Mr. President, I hope my colleagues will think long and hard about the future, that they will look at what is in store for the future employment, future of the aviation industry in this country and the defense of this country.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. LIEBERMAN). The Chair recognizes the Senator from Indiana [Mr. LUGAR].

Mr. LUGAR. Mr. President, let me introduce for the RECORD some important arguments on this issue that have been presented to the Senate, first all in the form of a letter to the majority leader, Senator MITCHELL, from the Aerospace Industries Association. This letter is written by Mr. Don Fuqua, president of Aerospace Industries Association and it says:

DEAR SENATOR MITCHELL: You will soon be voting on S. 113, the resolution to disapprove the FSX agreement. I strongly urge you to vote against that resolution.

This association, which represents every major aerospace company in this country, supports the FSX agreement. We do so because Japan is our most important overseas market for both military and commercial aircraft. Our $3 billion in aerospace exports to Japan each year represents roughly 65,000 American jobs in the aerospace industry. Killing the FSX program will open up the Japanese market to our European counterparts and undercut our preeminent position in the Japanese and world market over the long run. Furthermore, it will likely result in a higher level of technology transfer to the Japanese.

The aerospace industry is neither naive nor suicidal. We have worked with Japanese companies for three decades. We have codevelopment and coproduction programs with companies all over the world. We believe we are fully capable of protecting the transfer of American technology, both in terms of the security restraints set by our government, and with respect to technology which is of commercial use to potential competitors.

Every time efforts have been made unilaterally to deny wealthy countries a product, whether soybeans to Japan, grain or pipelayers to the Soviet Union, or F-15's to Saudi Arabia, the net result has been a loss of American jobs and exports, and a boon to our competitors. This case is no different. Our competitors have been making overtures to the Japanese in recent weeks (see Defense News article with respect to the French). We would much rather our companies maintain their market in Japan, and have the U.S. control what technology is transferred, than turn the market and control over to our competitors.

I urge you to vote against the resolution. Our industry has every intention of maintaining its dominant world position and our market in Japan. Removing us from a role in Japan's fighter aircraft program for the next two decades will not help American aerospace, it will help our competition. I appreciate your attention and assistance to this matter.

Sincerely,

DON FUQUA.

I make that a part of the RECORD in full, and recite it, Mr. President, because I think it is important. We are talking about competition, what is best for American workers and what is best for American industry. U.S. industry ought to be allowed an argument, and it is interesing that all six major aircraft companies are in favor of the FSX, largely because 65,000 jobs are involved, as are billions of dollars of exports each year. That is not hypothetical; that is actual fact, and no wonder that the aerospace industry speaks out on this.

To be more specific, Mr. President, testimony was offered by Herbert F. Rogers, president and chief operating officer of General Dynamics Corp., a company that will be heavily involved in the FSX situation, before the Subcommittee on Arms Control, International Security, and Science of the House of Representatives on May 10, 1989. I quote in part from testimony offered by the president of General Dynamics. He says:

The FSX is intended to fulfill Japanese Air Self Defense Force mission requirements in the late 1990's. The threat which friendly fighters will face then will be at the very limits of the capabilities of fighters like the F-16 flying today.

I pause and offer this comment about that, Mr. President: We keep discussing the perceived mission of this aircraft as if it were identical with the capabilities and technologies of the 1970's. The Japanese and the United States concur that in order to have by the end of this century a fighter aircraft which meets the mission that we want Japan to undertake, there must be capabilties that are not contained in the F-16. This is the reason for the development of another aircraft with another mission, for another time, another decade and technology which is not presently there.

Mr. Rogers continues:

In the case of the United States, we will meet these future threats with very high technology platforms like the Advanced Tactical Fighter (ATF) and the Advanced Tactical Aircraft (ATA), systems now being developed which will incorporate technologies beyond today's F-16.

Japan recognized the magnitude of this future threat, weighed the options and chose to develop and build an aircraft of her own design. Based upon some thirty years experience in the licensed production of all their fighters and that acquired in the design and manufacture of FS-X's predecessor, the F-1, it was clear that Japan was fully capable of achieving this goal.

Namely the goal of building its own aircraft.

All of this was painfully apparent to General Dynamics; we have been trying unsuccessfully to sell F-16s in Japan since the late 1970s.

I think that is an important point, Mr. President. This is not a first offer. General Dynamics tried to sell the F-16 to Japan for about a decade. The problem that is painfully apparent to Japan and the United States is that the F-16 will not fulfill the agreed-upon defense mission. Also painfully apparent is that Japan was prepared to build an aircraft whatever time or money it took on its own.

Fortunately, Secretary Weinberger held to a course which sought U.S. involvement. He reached agreement in mid-1987 with his Japanese counterpart to jointly develop an aircraft which would meet the Japanese requirement based upon an existing U.S. system. This solution not only addressed the politically sensitive trade deficit, but ensured interoperability with U.S. forces in a critical theater of operations. The F-16 was subsequently chosen out of an all-U.S. field as the base-line aircraft to meet these requirements.

But the base line aircraft, not the specific aircraft to meet the requirements.

Indeed, I believe that the two major U.S. commercial aircraft manufacturers, Boeing and McDonnell Douglas, both support the concept of the FS-X program.

In the letter I have just read, Mr. President, earlier in this speech, all of the companies support FSX.

This is not surprising. The U.S. commercial aircraft industry was wise and confident enough to provide Japan with a key role in the production of the jetliners which she purchased in large numbers.

From the United States.

This approach, while entailing the transfer of some technology, has ensured continued U.S. dominance in the single largest overseas commercial aircraft market.

F-16 technologies have little application to commercial aircraft design or manufacturing. In those very few cases where a connection might be inferred, such as the digital flight control, the Administration has already made it clear that Japan will not be provided the critical know-how behind this technology. It is important to bear in mind that what is being provided is the "what", not the "how", of the basic F16 design. Be assured that the art of design is something that General Dynamics in its own competitive self-interest will not give up to anyone.

THE TRANSFER OF CRITICAL TECHNOLOGIES WILL BE CLOSELY MONITORED

The F-16 advanced technology—like digital flight control—will be protected in three ways. All data will be reviewed by the U.S. Government under thorough and long-

standing technology review and release procedures in which all U.S. agencies having relevant interest participate. A technical steering committee headed on the U.S. side by a general officer will have hands-on supervisor responsibilities over the program. Finally, General Dynamics calling on the experience garnered in many off-shore F-16 co-production programs, will most carefully control the flow of proprietary know-how.

VALUABLE TECHNOLOGIES WILL FLOW BACK TO THE U.S. AS A RESULT OF FS-X

It is important to note that all of the FS-X modifications which enhance F-16 performance come from and are fully funded by the Japanese. In other words, the U.S. will have the unique opportunity to participate in the advancement of the state-of-the-art on a cost and technological risk-free basis.

Two technologies which are of special interest to the U.S. are the composite co-cured wing—a large, integrated composite aerodynamic structure—and the gallium arsenide phased-array radar—a radar which brings a unique degree of efficiency, resolution and reliability together in a small package. The essential but often overlooked point about these two technologies is not that they are unknown in the U.S.—indeed, much attention has been paid to them—but that the Japanese have applied their unique manufacturing skills to them. Preliminary evidence suggests that they have succeeded in developing mass producible, cost-effective systems—something yet to be done in the U.S. If that is the case, then FS-X advances will be directly applicable to improving the F-16 to meet U.S. needs in the severely constrained budget environment already upon us.

JAPAN IS AMERICA'S LARGEST AEROSPACE MARKET: KILLING FS-X WILL HARM THE UNITED STATES MORE THAN JAPAN

The potential loss of revenues, of export opportunities, for U.S. firms will far exceed the nominal 2.5-3.0 billion dollar FS-X program. Here's why.

Disapproval of FS-X may force Japan into an indigenous development program, their originally intended course of action. This approach will be considerably more expensive than FS-X co-development. When considering Japan's defense budget, this will produce two principal effects. In the short term, monies that could have been spent on off-the-shelf purchases of other U.S. aerospace defense systems like AWACS and AEGIS will no longer be available. This could represent a very near term loss of 3-5 billion dollars in U.S. exports, while reducing Japan's ability to effectively contribute to the defense burden in the Western Pacific.

Some will say that Japan will not "go it alone" but, failing in the United States, will seek help elsewhere. This I submit is an even worse prospect. Only one other region can and will offer the assistance which Japan will seek—Europe. Forcing Japan into the willing embrace of the Europeans will result in all of the bad effects of which I have already spoken while enhancing the competitive strength and market penetration of America's principal fighter competitor. The spector of a Japan-Europe aerospace connection is a sobering thought.

INTERNATIONAL COOPERATION IN AEROSPACE IS GOOD BUSINESS

Aerospace leadership is preserved and enhanced by competing and working in the marketplace—not by dropping out of it. We must guard against excessive nationalism at a time when international interdependence is a fact of life. Cooperating with Japan on the FS-X will enhance the U.S. position by progressing the state of the engineering art, providing jobs which would otherwise not exist, generating the flow of dollars back to America. Participation in FS-X ensures that the U.S. approach to design continues as a Japanese standard, with the important side-effect that Japan's weapons are usually ours, compatible and interoperable with our own. The use of a U.S. baseline system by Japan brings with it U.S. control over the markets to which that system when fully modified might be introduced—a kind of control with important political and economic consequences. Cooperation ensures that new technologies can be acquired on a more cost-effective basis at a time when even the simplest technology is expensive to obtain. But, most importantly, cooperating with Japan ensures that the two aerospace industries will complement each other and helps to maintain a vital relationship which is important to the military and economic defense of the free world.

In conclusion, there has been an important debate going on about our national economic objectives, policies and supporting strategies. It has been about America's competitiveness, our standard of living and how to protect it, about the global exercise of free and fair trade. Fundamentally, however, it has been about how to balance national security and foreign policy objectives with national economic objectives. I believe that such a debate is healthy and timely, and perhaps it has been fortunate that the FS-X program has been the catalyst for this debate. On the other hand, I believe that the FS-X is an excellent example of a program that realistically promises to achieve that desired balance and should be supported by Congress accordingly.

Mr. President, that statement, coming from the President of General Dynamics, speaks to the heart of the competitiveness issue. The heart of the technical problem, the heart of the transfer of dollars from Japan to the United States. This is testimony by a U.S. company that is expecting to get the business. It is a company that abhors the thought, as I do, that that business is going to Europe, that there could be a Japanese-European axis of cooperation and development of an aircraft that would leave us out in the cold.

I heard earlier this morning, Mr. President, the distinguished Senator from Kentucky say somehow we spend $7 billion and we are going to get $400 million back for that. I respectfully suggest to my distinguished colleague that we have not given away $7 billion. Most of that amount is sunk costs which we have already paid to develop the F-16, costs which have been incurred whether or not the Japanese or anyone else buys the aircraft. In point of fact, the Japanese will pay back to the U.S. some of the cost of developing the F-16 and these funds go directly to the U.S. Treasury. We are, in fact, setting in motion new technology research that others are going to pay for.

We still have the F-16. We are going to continue to make sales of the F-16. We probably will improve the F-16, given this cooperative research, but Japan is going to pick up the entire tab for this research. We are going to receive 40 percent of the work share in terms of both the development and the production of the aircraft and, most importantly, Mr. President, we are going to stick with the Japanese effort.

In Friday's debate, I pointed out that critical in my own understanding of this entire situation is the fact that the Japanese were fully prepared to go it alone. We did not come into the situation blindly. We came in because of our self-interest. Secretary Weinberger, Secretary Shultz, and President Reagan said to Japan, "We don't want you proceeding out there alone developing an aircraft industry, developing a war potential, developing an independence of activity that does not bode well for the history of Asia, for the history of the world."

The Japanese agreed, or at least a majority did. There are many in Japan fully prepared to go it alone. They say, "We have the money. We have the skills. We have the ties around the world to build this aircraft, to proceed now independently in our defense effort, in our foreign policy."

Mr. President, this debate is about whether the United States is going to stay with Japan, to be often intrusive into Japan's affairs, by developing an aircraft that we jointly see and share the fruits of that technology and the product of that alliance. It is very important in our own history; very important, I believe, in terms of peace for our children. As we take a look at the geopolitics in this world, this, I think, will be perceived as a debate that was a turning point, one way or the other.

We asked Japan to stay with the FSX. In fact, we have demanded of Japan attention to our position because, as the distinguished Senator from Kentucky pointed out, we protect Japan. And we have said, "Because of that, we are a very special friend. We have a very special position in your affairs." And they have agreed.

They have ceded to all of the requests that we have made with regard to paying for this, while we look in, to giving us 40 percent of the production and development with jobs in this country, 2½ billion dollars' worth of business in this country, for which we have no risk, and which helps our balance of payments. And, in return for all of that, for the rest of the century, we stick together and we keep an eye on developments in Japan and Asia and likewise make certain we do not have the adverse combination of Japan and European countries ganging up against us in this competition in the aerospace business.

For these reasons, Mr. President, it is very important to defeat this resolution of disapproval, to proceed with support of the President, support of our country's position which has been negotiated by two administrations.

I yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Kansas [Mrs. KASSEBAUM].

Mrs. KASSEBAUM. Mr. President, I doubt that there are very many Kansas constituents who would look on this sale as one of their top priorities. I think that would be true for the majority of constituents in most of our States. There is a great deal of concern abroad in the land today about the United States role with Japan. But I think it is very important for us at this time to keep this particular relationship and sale in perspective.

I heard the distinguished Senator from Kentucky [Mr. FORD] who chairs the Aviation Subcommittee, speak to this being potentially the decade of the airplane for Japan. I just do not believe that is so and I have shared his concerns about aviation.

I would like, Mr. President, to say why I support the FSX agreement that we have concluded with the Japanese and will vote against the resolution of disapproval.

In my view, this agreement does not raise the specter of America in decline. In fact, I believe this agreement is an important symbol of how we can successfully pursue a defense policy for the 1990's and beyond, that is consistent with a viable economic policy.

I would like to commend the Bush administration for its responsiveness to many of the concerns that were expressed in Congress in January and for its successful efforts in obtaining clarifications from the Japanese to the original memorandum of understanding.

In assessing the FSX deal, I believe we must start by recognizing that the United States strongly supported Japan's efforts to acquire a new fighter which would be capable of meeting the security needs in the Pacific in the late 1990's. One of the main criticisms of the deal is that Japan should have bought the F-16 fighters off the shelf. If is argued that this purchase would have expedited the Japanese acquisition of the fighter planes and also would have been a significant contribution to our trade balance.

Mr. President, I believe this option has been blown out of proportion. The F-16 has not been sold off the shelf for over the past 15 years and is a plane which we produce jointly with a number of our allies. Furthermore, Japan has never bought off-the-shelf technology where large numbers of planes were involved. The Japanese have either attempted their own development, as with the F-1, or entered into a licensed joint production agreement, as in the case of the F-14, the F-15, and the P-3.

I believe it is important to underscore, Mr. President, that the option that the Japanese preferred was to develop their own fighter to meet their own specific needs. It was the United States that argued for a joint development/production deal.

The American public's concern about our trade imbalance is strongly shared by everyone in this body, but the fact of the matter is that our fiscal policies, our large deficits, are much more closely related to our trade imbalance than any aspect of this agreement. I think, as a matter of fact, Mr. President, we should be far more concerned that we have to rely on the Japanese to contribute about $62 billion to our budget. That weakens our hand far more in any negotiation than this type of agreement.

In testimony before the Foreign Relations Committee, Commerce Secretary Mosbacher estimated that the financial return to the United States from the FSX joint development deal equaled the benefits from any direct purchase of the F-16.

Under the agreement, the United States would receive 40 percent of the work share of the development and production phases of the FSX. The administration has estimated that U.S. industry will receive about $2.5 billion of work during the life of the program and about 22,000 man-years of labor over the life of the deal. All will be financed by the Japanese.

It would be the same money and jobs if the F-16 were sold directly. This is the first military joint development—in contrast to production—program that the United States has entered into with an ally and it should be closely scrutinized. I believe this agreement meets the test.

One of the major benefits of this deal is that it provides us the ability to be directly involved in the Japanese military aircraft industry and to gain access to the technological improvements. This, obviously, would not be the case if the Japanese pursued development alone.

Perhaps an even more disadvantageous outcome for the United States would have been if the Japanese had decided to develop their new fighter with one of our major European competitors in the aviation industry, as was so, I think, succinctly stated by the Sentor from Indiana, Mr. LUGAR.

The agreement clearly provides for a significant technology flow back from Japan to the United States. This is an important reversal of the usual pattern of technology flow. Under the agreement, there is an automatic flow back to the United States of technology that the Japanese derive from United States technology, and the United States is guaranteed the option to purchase solely Japanese-developed FSX technology.

The Bush administration also ensured that the technology transfer to Japan is appropriately limited and carefully controlled. U.S. technical data and data that is derived from U.S. technology cannot be transferred to a third country. And the FSX itself cannot be sold or transferred without the consent of the United States.

I believe these are important facets of the agreement.

Furthermore, I do believe that the terms of this agreement protect our aviation industry in the four major areas of concern: airframe, avionics, the engine, and the software.

The airframe technology that we are providing is 15 to 20 years old. The avionics will be developed by Japan and the technology will be available to the United States. Strict supervision of the software is provided under the agreement. And the engines for the development phase will be provided off the shelf from the United States.

The arrangements for the engines in the production phase remain to be worked out, but the Japanese have already been put on notice, and many of us have expressed concerns about this in the production phase, that under no circumstances will sensitive United States engine technology be transferred.

Mr. President, I believe it is very important that, when we look at our relationship with the Japanese that we neither exaggerate their diplomatic or technical prowess, or underestimate our own. We simply cannot just sit on the sidelines and let others become the dominant players in the next decade. There is nothing to be feared in this agreement. In fact, I think it is something that should be viewed as an opportunity and a challenge.

I urge my colleagues to defeat the resolution of disapproval.

I yield the floor, Mr. President.

The PRESIDING OFFICER. The Chair recognizes the Senator from Illinois [Mr. DIXON].

Mr. DIXON. Well, Mr. President, may I first say, before I make a few remarks of my own in opposition to the FSX sale, that I am always disappointed to have to disagree with the distinguished lady from Kansas who, I think, brings a wonderful sense of good common sense to this place. I have been delighted to agree with her a number of times on a variety of issues, including budgetary issues on one occasion where I supported her good idea for a freeze several years ago that would have saved us a lot of the budget problems we have now.

If I was not a Democrat I would wear a "Run, Nancy, Run" button like they all do on the other side, Mr. President, because she is a great lady and a wonderful person. I admire her

and have the deepest personal affection for her.

There have been a lot of good discussions here about what this deal is about. I made a few speeches myself. I want to talk just a little bit more this morning on a few points that I think are important to be shared with my colleagues about this deal. I think I have about eight points that I would like to make in sort of a cogent way to share with my colleagues some of my thoughts about this FSX deal as we get down to voting time.

Here is the first one: This is not sharing the burden. We talk about sharing the burden. In the first place, nobody shares the burden with poor old Uncle Sam, and this is not sharing the burden.

Mr. President, based on current estimates, the final cost of the FSX Program for Japanese taxpayers will be roughly $48 million a plane for each of the minimal 130 planes that will be built—$48 million. This will make the FSX considerably more expensive than any fighter we ever produced in this country. It will cost about 2½ times what the F-16 cost. Think of that: 2½ times what the F-16 cost, the finest fighting aircraft in the world; 50 to nothing; 50 kills, no losses in hostile situations, 2½ times as much, over 50-percent more than the cost of a new F-18, about 20-percent more than the cost of an F-15.

Further, the estimates on FSX unit costs may rise markedly before production is complete in the late 1990's. My experts tell me they will rise and many believe that development costs have been significantly underestimated and that production costs are likely to increase as well. Here we have something in the first instance immensely expensive to the Japanese taxpayers, a tremendous cost to them when they are not carrying their share of the burden right now in connection with the defense of Asia.

The second point: I think it is inconceivable that we should be selling our technology to help our greatest competitor build yet another industry that will compete against our own. Given our current deficits, Mr. President, why are we not pressing the Japanese to spend this money more efficiently as we did in the case of the Israeli Lavi Program? Israel is a great ally of ours, but we jawboned them and we jawboned them—I put it in the RECORD, the RECORD is replete with it—until we talked them out of a codevelopment program.

Now, listen to this, I say to my colleagues, with the FSX money Japan is going to buy, Japan instead could buy 130 F-16's off the shelf—bang, they have them right now—130 F-16's off the shelf, plus have enough to equip an F-16 wing to replace the United States 432d F-16 wing at Misawa, Japan, right now. In other words, they can have all these F-16's, build them—130—and then have enough more F-16's to replace our entire United States 432d F-16 wing at Misawa, Japan, and bring home those Americans to America and have burdensharing where the Japanese do the job that they ought to be doing in that part of the world. They would even have money for associated costs as well. This will permit us to save millions of dollars by deactivating the 432d. We would gain the profits from the same in a short period of time and still have the defense that both our countries require.

Mr. President, we annually spend, believe it or not, $35 to $45 billion; up to $45 billion on our Pacific forces. We are borrowing money to do it. We need new ideas, and if they are unwilling to constructively respond, I think we ought to reconsider that relationship. It is just that simple.

Let me talk about mission requirements. Some of the FSX proponents in this deal have said that the F-16 cannot perform the 1,000-nautical-mile mission that is planned by the Japanese. That is not what a Department of Defense factfinding team found, Mr. President. What did they find? A team of military experts from this country, the Sullivan mission, went to Japan in 1987. The Department of Defense sent them there. What did they conclude? They concluded that the FSX design was too narrowly defined and that any of three existing American planes—the F-15, the F-16, or the F-18—would serve Japanese defense needs more adequately—more adequately—than the FSX, and if the Japanese based the new planes along the coast rather than inland, the 1,000-mile requirement would not even be needed in the first place.

Let us talk about defense needs neglected. That is point three. I think one clear insurmountable shortcoming of the FSX is the very long waiting period before it is available for delivery—a long, long wait as compared to buying off the shelf the F-16. Building roughly one FSX per month for 10 years to meet a Soviet threat that exists now I think is ludicrous. Experts say that Japan cannot now defend their northern island of Hokkaido, and they cannot do it now, yet it will take 15 years—15 years—to completely replace the aircraft they now have defending the island, the F-1. I think that is irresponsibility.

Let me make another point. Point four: Japan is serious about building a world-class aerospace industry. I have probably said that 100 times in the last week. In this last day, I want that burned into the minds of my colleagues. I want it burned into the mind of every American because the record will show I am right on this. Years from now they will say, "You were right." The Japanese Government is serious about building a world-class aerospace industry.

Here is a quote from our own U.S. Trade Representative. The U.S. Trade Representative has signed off now. I am not picking on her. I want to make a direct quote, as we say in southern Illinois:

> The Japanese Government plans to make aircraft production one of Japan's major industries within 20 years.

I love their long-term plans. Mr. President, why do we not plan anything in long terms? Why does not our Government think ahead by decades instead of worrying about now, today, what is going to happen tomorrow? Mr. President, what is going to happen in the year 2000 when my 2-year-old grandson is old enough to understand? Let us plan. But the Japanese Government plans to make aircraft production one of Japan's major industries within 20 years.

The U.S. Trade Representative, direct quote:

> This would mean direct competition with the U.S. aerospace industry, which is the largest in the non-Communist world.

I could go on. I will exclude parts that are not particularly important.

> If Japan's target goal is met, future lost sales to the U.S. industry would be significant.

That is the U.S. Trade Representative of this administration.

Here is a consulting firm of Booz-Allen and Hamilton—

> reasonably predicted that the Japanese aerospace industry is poised for extremely rapid growth projecting that the industry sales will rise—

Now, listen to this—

> from $7 billion today to $29 billion by 2000 expressed in constant dollars.

They are thinking, Mr. President, they are thinking ahead.

As far as the world market for commercial airliners is concerned, the extremely high cost involved in developing and producing these planes makes the ability to raise capital absolutely critical to succeed, thus the very deep pockets of Japanese industry, especially when backed by the Japanese Government, make Japan unusually well suited to compete in this market.

Who can argue with that?

Point 5. I call it gaining valuable experience. The most important aspect of the FSX agreement to the Japanese is likely to be the experience they will again gain in developing and—listen to this—integrating—remember that word, integrating—a complex modern aircraft. What Japan's competitiveness in the airplanes parts business has not provided Japanese industry with is an understanding of systems integration—systems integration—the art of fitting together all of the tremendously complex systems that go into a modern jet aircraft. The FSX exercise requires the modification of virtually

every system involved in the aircraft—the whole schmeer as we used to say in southern Illinois, the whole schmeer. Aircraft analysts argue that this is one of the most difficult tasks in the development of any plane and of fighters in particular, and if the FSX can be made to fly, the Japanese will take a quantum leap forward in the area of aircraft manufacturing. There they go, Mr. President, zooming away with our technology.

Point 6. This agreement places that American stamp of approval—bang—on a plan which provides that the Japanese will once again produce a product domestically in their country which they could buy from the United States of America and get a product of at least equal quality and at a dramatically much lower price.

Why do we continue to go along with that? Some people say free trade, free trade, free trade, free trade because it is cheaper, free trade because it develops competition, free trade because it drives down the price. No, this deal does not drive down the price. This deal drives up the price. Why? It drives up the price, lets them make the aircraft at more money and at the expense of American workers.

Point 7. Trade imbalance. The cumulative effect of this deal is to add, Mr. President—not subtract, add—to the already dangerous trade imbalance. I hate to tell you this, Mr. President. I was elected in 1980, and I came here in January 1981. Listen to this. In 1980, the United States had a $9 billion trade deficit with Japan. Is that not unbelievable, $9 billion? That is only 9 years ago. By 1984, the deficit jumped to over $30 billion, and for the last 4 years it has averaged over $50, and in total—listen to this; this is staggering. I am on the Armed Services Committee. Authorized for the year in which we are now operating is $300 billion. Listen to this. This is for the defense of the United States of America, the greatest free nation of the world—authorized for 1 year $300 billion—we have had to borrow $303 billion from the Japanese since the end of 1980 to cover the cost of Japanese products which we were not able to pay for by selling goods or services to Japan. We have cost ourselves more than the cost of an annual defense of this Nation in connection with that one imbalance of trade—$303 billion—and we want to add to it today.

Finally, point 8, competition. My friend, and he is my friend—he is a great Senator—the senior Senator from Indiana in one of his talks last week on this issue—and I respect him very much—stated that this FSX program would net nearly the same amount of money that would be gained from an outright sale of the F-16. I guess that is the administration's position.

With all due respect to him and the administration, that is not the case. The $3 billion received from an outright purchase would be in hand within a few years; we would have it, and would be followed by a spare parts and support package that is often three times the cost of the planes themselves over the course of the plane's lifetime. So listen to this. This means the United States would gain approximately $12 billion by an outright sale during the lifetime of the plane rather than the $2.5 billion that we will receive under the terms of the contract because of the spare parts and support package.

Mr. President, I will have more to say later, but I want to make this final comment. This deal has no features in my view—and I will examine that later before the vote—not one, in the interest of the United States. We are selling it too cheap. We are getting back nothing in return—Washington Post article today and the General Accounting Office cleared it. We are selling it to an ally that in the end will not give us a good deal on the later negotiations, and finally we are selling it to an ally that in the past has transferred secret information to other countries. All of that, I think, is in the worst interests of the United States, not the best interests of the United States.

I will have more to say about that later, Mr. President, but I thank my colleagues for permitting me to make these eight salient points at this point in time. I will develop later my thesis on the fact that there is nothing in this contract, nothing in this memorandum of understanding, nothing in the letters of understanding supporting the MOU that in any way develops a decent deal for the United States in connection with this arrangement.

I yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Washington [Mr. GORTON].

Mr. GORTON. Mr. President, I have listened with great interest to the eloquent statement of my friend and colleague from Illinois. I disagree with him on the bottom line of this proposal and intend to vote against his resolution. I simply wish to point out at this stage the distinguished Senator from Illinois has built an elaborate and a beautiful and a highly desirable structure, perhaps one even could call it a castle, but he has built it upon a foundation of sand. The sand foundation upon which the arguments of the Senator from Illinois are based is the proposition that if his resolution of disapproval should be accepted by the Congress over the objection of the President, the Government of Japan, an economically strong and viable and highly independent nation, will suddenly change direction and purchase, for the purpose for which it has designed the FSX, the F-16 aircraft from the United States.

Mr. President, that will not be the consequence of rejecting this sale and passing this resolution of disapproval. I doubt that there is a Member of this body who would not have preferred a Japanese purchase of F-16 aircraft. I doubt that there is a Member of this body who would not have preferred that many of our allies and friends around the world purchase American systems for their defense rather than building their own.

But the fundamental fact with which we must deal here today in the Senate of the United States is that for good reasons or bad, for valid or invalid, most of our major allies in this world wish to have a capability to provide their own defense equipment. The inevitable consequence of the acceptance of this resolution will be that the Government of Japan will build its own FSX or possibly, I believe the possibility to be remote, that it will build it on an agreement similar to the one which is before us today with the Government of France or with some European consortia.

The Japanese Government is simply not going to buy F-16's. Because that is true, the entire edifice, as lovely and attractive as it is, constructed for us by the Senator from Illinois will come crashing to the ground. As we take this particular opportunity and weigh this particular opportunity against the consequences which will inevitably ensue, if this resolution of disapproval is accepted by the Congress, we have the alternative where the Japanese will go ahead on their own, and will almost certainly sooner or later be able to develop the same techniques and the same technologies that we, partnered with them, will include in this aircraft. And we will simply be out $2 to $2.5 billion or so which will be the share of General Dynamics in connection with this agreement. And we will certainly be without any new technologies which are developed as a result of the FSX agreement.

Also, I have been told, as an ally and a friend of the world, for some reason or another it is totally untrustworthy, and that in fact we really are not good allies of the Government of Japan. It would be a mistake to reject this proposed sale on the ground that there is a better solution which we have any potential opportunity to create. We do not.

Much has been made by proponents of this resolution of disapproval of the loss of American technology, of the creation of a competitor in the field of production of civilian aircraft. I think that argument underestimates far too greatly the genius and effectiveness of Americans in this world. The implication of almost all of the arguments in favor of this motion of disapproval is

that we are somehow or another inferior, that we simply cannot compete in this field or in any other field unless we somehow create an artificial advantage for ourselves.

Mr. President, I am not so pessimistic about the American future in any field of technology, much less aircraft. Nevertheless, I would not offer myself to this body as an independent expert on civilian aircraft technology. As the President well knows, I represent the single State which is most dependent upon the production of civilian aircraft, whose economy has the greatest and the most to lose if the Senator from Illinois is correct.

It would certainly have been negligent of me not to have consulted with the Boeing Co. in connection with this agreement. I did that shortly after I learned of this controversy in February of this year, and was told by the chief executive officer of the Boeing Co. that they not only did not disapprove of the agreement, but that they recommended that I vote in favor of it. The Boeing Co. did not fear the competition which could potentially be created by this agreement—I emphasize not between the Government of Japan and the Boeing Co., but between the Government of Japan and General Dynamics, a competitor of the Boeing Co., and in many areas.

The Boeing Co. itself, as is the case with almost everyone else in this field, has entered into certain joint production arrangements not only with Japan but with the wide range of other companies which wish to purchase its equipment but want to get some technology out of those purchases.

More recently, as recently as last week, the Boeing Co. and other members of the aerospace industry were asked to testify before a House committee on this very subject. I have here, Mr. President, the statement of Philip M. Condit, the executive vice president of the Boeing Commercial Airplane Co. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BOEING TESTIMONY—TECHNOLOGY TRANSFER IMPLICATIONS OF THE UNITED STATES/JAPAN FSX AGREEMENT FOR THE HOUSE COMMITTEE ON SCIENCE, SPACE, AND TECHNOLOGY, MAY 11, 1989

I wish to thank the Committee for extending an invitation to Boeing to participate in today's hearings. I am Phil Condit, Executive Vice President of Boeing Commercial Airplanes.

Boeing has not been directly involved in the FSX arrangement and has, therefore, not been exposed to the details of the Memorandum of Understanding (MOU) agreement other than through public reports, I, therefore, cannot respond to specifics concerning that agreement, but I offer the following observations to provide perspective on Boeing's view of its relationship with Japanese industry in the commercial airplane arena. We hope that this perspective will be helpful in understanding the issues being raised in the FSX debate.

Boeing's relationship with Japanese industry has evolved from subcontracting, to risk sharing participants in a Boeing airplane program, to discussing a planned equity relationship in a new airplane program. Subcontracting began in the early 70s when Mitsubishi Heavy Industries (MHI), Kawasaki Heavy Industries (KHI) and Fuji Heavy Industries (FHI) built trailing edge flaps and rudders for the 747 SP Joint venture discussions were initiated with the Japanese industry in 1972 and ultimately resulted in a risk sharing Program Participant role on the 767 in which Japanese industry shares the market and resulting financial risk. An MOU was signed in March 1986 by Boeing and Japan Aircraft Development Corporation (JADC, a quasi-government owned consortium) and MHI, KHI and FHI to jointly develop, produce and market an all new short-to-medium range, medium size commercial transport, designated the 7J7. The Japanese companies would collectively have a 25% equity role, would share in all investments, risks, sales financing and revenues in proportion to their equity position and would share in jointly developed technology in an agreed upon manner.

Boeing feels that its cooperation with Japanese industry has enhanced our long term objectives of growth, stability and profitability and that this cooperation will continue to enhance these objectives as we engage in commercial aircraft competition for world markets. The trend toward internationalization recognizes that global markets require global cooperation. Accordingly, we think that arrangements of this type are likely to increase in the future. We must recognize this trend in our business planning and government policy to assure that U.S. industry has adequate opportunity to compete in this environment.

The Japanese aerospace manufacturers are typically a small part of a larger, broader based heavy manufacturing company. Even the largest aerospace manufacturer, Mitsubishi Heavy Industries, has only 6,500 employees in its aerospace operations, and its aerospace business accounted for $1.8 billion, or 15% of the total company sales, in the fiscal year 1987. Comparable figures for Boeing were 136,000 employees and sales of $15.5 billion in 1987.

Although Japan's international cooperative relationship in aerospace has substantially increased through licensed production of U.S. military aircraft, a role in Boeing's 767 Program and subcontracts from both U.S. and European aircraft manufacturers during the last 15 to 20 years, the employment in Japan's aircraft industry has not increased. The statistical data published by the Society of Japanese Aerospace Companies in 1989 indicates the total Japanese aircraft industry employment in 1969 was 27,540 and has remained relatively stable for approximately 20 years. It was 27,410 at the end of 1987.

Through our frequent contacts with Japan's Ministry of International Trade and Industry (MITI) and the Japanese aircraft industry, we are familiar with the stated Japanese interest and objectives in commercial aircraft. A major challenge that Japan would face in independent development is the fact that opportunities for launching new commercial airplanes are very limited and that they would have to compete in the same world market against well established U.S. and European manufacturers. Japanese industry and MITI are well aware that any commercial transport airplane program is characterized by high commercial and technical risks and a relatively low rate of return.

Japan's national project, the YS-11, a 60 passenger turboprop civil transport, and such independent private sector undertakings as the development and production of the MI II MU 2/300 and the FHI FA 200/300, were not commercially successful. Moreover, the industries in which Japan has achieved significant commercial success have traditionally been those with large domestic markets such as steel, textiles, shipbuilding, consumer electronics, cameras, watches and automobiles. Unlike these industries, the Japanese domestic aircraft market is small, representing about 5% of the world commercial market. Because of these factors, the government is promoting international cooperative programs to develop commercial airplanes, rather than an independent approach.

With the exception of the YS-11 in the 1960's, Japanese airlines have depended on foreign made commercial aircraft, particularly those made in the U.S. Japan is the largest foreign customer of Boeing Commercial Airplanes in terms of total dollar value of aircraft purchased. Boeing's latest forecast indicates that Japan is expected to remain the largest foreign customer for the foreseeable future.

A valid concern regarding global cooperation is the sharing of technology and know-how, both in military and commercial cooperation. We must recognize that the U.S. does not have a monopoly on technology and that reasonable international cooperation can be structured so that both parties benefit from the arrangement. We believe the government has established institutional safeguards that prevent the irresponsible transfer of technology, which we assume are in place to judge the FSX arrangement.

Boeing has become a leader in the commercial airplane industry by providing a family of superior products. It is our objective to remain a leader in the industry by continuously advancing technology, product quality, safety and productivity to new levels. We feel we can, and must, accommodate increasing industrial cooperation in a changing business environment.

Mr. GORTON. I do not need to read extensively from that testimony. I can perhaps summarize it by reading one paragraph of a statement at the same hearing made by Joel Johnson, the vice president, International Aerospace Industries Association of America, on the 10th of May at that House hearing, less than a week ago.

Mr. Johnson says:

To conclude, we believe that at this time the FSX deal as negotiated is probably about the best agreement that is realistically achievable. We would encourage the Congress to allow for its implementation, with the proviso that the U.S. Government should monitor closely the willingness of Japan to make available technology to the United States. We do not believe it would be in our interest to encourage the Japanese to walk away from this agreement and pursue their original objective of building a new aircraft without U.S. involvement.

There is a great deal in that statement, Mr. President. First, of course,

the idea of this agreement was not a proposal of the Government of Japan. The Government of Japan proposed to build this FSX on its own. It was the previous administration which insisted with the Japanese that we have a co-development or coproduction agreement. This was this current Bush administration which insisted on increased safeguards in connection with the agreement. If Japanese industry had its way, it would be going it alone on this project. So by rejecting the agreement we cut off our noses to spite our faces.

I believe in this case we should follow the advice of the experts, the people in the American aerospace industry, as to what the future implications of the agreement are, and follow their advice by rejecting this resolution of disapproval.

I wish to debate one other set of comments. It has seemed to me increasingly clear as this debate has gone on not only in the last few days in this body but ever since the agreement first became public that the debate in which we are engaged here is a surrogate debate. I do not believe it is so much about the FSX and this agreement within the narrow bounds of the details of the proposal as it is about the overall relationship between Japan and the United States.

The senior Senator from Illinois clearly referred to that in his last set of remarks. He pointed out quite accurately the alarming increase in our bilateral trade deficit with Japan from some $9 billion in 1980 to more than $55 billion last year.

It is the concern which Americans rightly have developed over the imbalance in that relationship, and over what it means to the economy of the United States, which is the true undercurrent surrounding this debate on the FSX.

I not only do not deprecate or minimize that concern; I share it, and I share it overwhelmingly. I simply point out that that issue ought to be debated on its own merits and on a much broader field than this debate over the FSX.

Before the end of the month, under the terms of the 1988 Trade Act, the administration will be required to designate certain countries with unfair trade practices for treatment under the so-called super 301 provisions. It seems to me overwhelmingly clear that Japan should and must be included as just such a nation. I believe we have for far too long a period of time ignored or minimized the artificial restraints upon the sale of United States goods and services in Japan, and that our unwillingness to negotiate decisively or to take precise, firm, and tough positions, has exacerbated the trade deficit, which the Senator from Illinois so rightly criticizes. Nor am I willing simply to accept at the end of any such debate the fact that only 10 or 15 or 20 percent of our bilateral trade deficit from Japan may result directly from unfair restrictions on the sale of American goods and services in Japan.

I believe firmly that this Nation should set a goal for the reduction of that bilateral trade deficit, rather than negotiating toward the reduction of restrictions on particular commodities, items or services. I believe that it is appropriate and necessary for the trade representatives and for the President to set very publicly what those goals are, and to have sanctions readily available, and with a willingness to use those sanctions, if the goals which we set from the point of view of the progress of our own economy are not met.

That, it seems to me, Mr. President, the use of trade legislation, which we have on the books, partly due to the good work of the Senator from Texas, who is here on the floor today, and perhaps a followup to that legislation, if it is necessary to do so, should be used to reduce dramatically the imbalance in trade between the United States and Japan.

This FSX issue, however, should not be used as a surrogate for that debate. Taken on its own terms, the FSX agreement is good for the United States, as well as being good for Japan. It is vastly preferable to its alternative.

We should reject this motion of disapproval and should move on to debate over those overall trade relationships, with a goal which will benefit the United States, not only in the long run, but in the short run, as well.

Mr. BRYAN addressed the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. BRYAN. Thank you, Mr. President. This marks the third occasion that I have taken the opportunity to express my opposition to the proposed transfer of American technology. My initial reaction, when I heard it, was one of skepticism; the more I have learned about it, the less I have liked it. Indeed, I must say that after spending some days in Nevada, from Reno to Las Vegas, from Carson City to Wells, from Eureka to Laughlin, I am always impressed with the great common sense that the American people have.

One of the distinguishing characteristics of the American democratic system is the great faith and wisdom that we place in the average American citizen. Since the election of Andrew Jackson in 1828, that has been one of the hallmarks of our system.

I must say, as I visited with my fellow Nevadans, they asked me, "Senator, why are we proposing to advance and transfer this technology to the Japanese?" I am hard-pressed to come up with a satisfactory answer. Indeed, I say that that innate common sense that served us so well as a nation is reflected by the view, in my judgment, of the overwhelming number of Americans, certainly the overwhelming number of Nevadans in my State, which is that this makes no sense at all.

Last year our Nation experienced a trade deficit in the range of $137 billion, and the largest trade deficit on a country-by-country review is with Japan. That amounted to some $55 billion, or about 40 percent of that deficit.

The approval of the FSX agreement in providing this technology to Japan will enable them to further their own commercial and military aircraft industry. In the long run, Mr. President, it will only enhance our trade deficit. The United States is, without question, the world's most sophisticated and successful producer of military and commercial aircraft, and as Americans, we ought to be very proud of that fact. The Japanese, our friends, our allies, are also our greatest economic competitor.

Mr. President, they do not just plan for this year or this session of Congress; they plan for the future, the end of this decade, and into the next century. As we have painfully learned, the Japanese are willing to invest today at a considerable loss in order to secure a long-term advantage in the world's marketplace. Through the coproduction agreement which this proposed sale involves, we provide in effect a technological base for Japan to become, over the next few years, a major force in the world's aerospace market, our strongest industrial export sector.

Mr. President, that simply makes no sense. It is time for America to review our trade policy and to adopt a long-range view of what that policy ought to be with our trading partners. Free trade, yes, Mr. President, but fair trade as well. The Japanese have been superb negotiators. In my view, we have negotiated this agreement to their advantage, not to our own.

Mr. President, we can be fair, but we must be tough. The fact is that Japan has not displayed a very active approach in reducing this massive $55 billion trade deficit that exists between our countries. By purchasing our existing F-16's, Japan would be displaying a good-faith effort in reducing this trade imbalance, and by so doing, acquire the world's most sophisticated fighter aircraft and enabling them to perform the mission which we have asked them to provide, and that is protecting the sealanes in the Pacific. It has been estimated that the FSX may cost as much as $30 million more per aircraft than if they purchased the existing F-16's directly.

Mr. President, we have heard a lot about our responsibilities to our trading partners and to our allies—particularly, that this negotiation was initially consummated by the previous administration, that some changes have been made, some improvements, and some refinements, and that we somehow have an obligation to go forward, to make sure that this is complete. We are told that the Japanese are working to reduce that trade imbalance, and, yet, as we hear that echoing throughout this Chamber, we are also made painfully aware that our United States Trade Representative, Carla Hills, just released a report in conjunction with the Trade and Competitiveness Act of 1988 which addressed the trade barriers in foreign nations.

Trade barriers were found in Japan to United States exports of many fields: Superconductors, agricultural products, telecommunications, optical fibers, aluminum, and construction, just to name a few.

We are told, Mr. President, that those markets will eventually open up, but I think we need to ask ourselves when, how soon, and why, when there is an opportunity to make meaningful improvement in that trade deficit with the purchase by Japan of F-16 fighter aircraft, are they delaying?

We began this morning's deliberation in this body, as we do each and every day, by invoking the aid of the Diety. Our distinguished colleague, the junior Senator from Georgia, served as the acting majority leader this morning, and he shared with us a biblical Scripture of St. Paul to the Romans.

The Romans had an expression, Mr. President, that I think addresses precisely what we need to hear and what we need to do. In Latin, it is "factum non verbum"—deeds, not words.

So, Mr. President, I respectfully submit that it is time for us to listen less to talk and to call upon our Japanese friends, our allies, for deeds. And those deeds, Mr. President, will do more to address the trade imbalance between our two countries, with all of the talk and all of the discussion which has characterized those trade relations for the last 8 or 9 years.

In my view, Mr. President, this agreement makes no sense for America, for our trade situation, and for America's future, and I would respectfully urge my colleagues to support the resolution that is offered in disapproval.

(Mr. KOHL assumed the chair.)

Mr. BENTSEN. Mr. President, a few months ago, Masaaki Kurokawa, who is the chairman of Nomura Securities, came up with an interesting way he thought Japan could solve the American trade deficit. He said, "Let's strengthen the yen. Let's lower the value of the dollar. Let's bring it down from 135 to the dollar to 100 to the dollar." He said, "That is the way to take care of it."

Very simply, what would the United States have to do in return? Just one thing: we would give Japan California, or at least turn it into a joint economic zone to be shared by both countries.

There are those that think Japan already owns California. Actually, they have a way to go. But proposals like that one make me doubt that Japan is very serious when we ask them for the kind of help that we have given them for decades.

We went through the process of devaluation of the dollar; resulting in a 30-percent increase in our exports to other countries. What effect did it have on Japan? Minimal, if anything at all. We have actually seen our trade imbalance since that time increase with Japan.

They are absolutely determined to have market dominance. How did they react to the reduction of the value of the dollar? They dropped their prices and dumped products in the United States. We had an interesting situation where the Japanese would come to the United States to find products that were made in Japan selling far below the price that they sold for in Japan.

There were some interesting Japanese merchandisers who decided to take advantage of that situation. They set up a marketing deal where they would buy Japanese products in the United States and ship them back to Japan. They made enormous profits, until the Japanese Government caught on and began to put up barriers to stop them.

Japan means to dominate any sector of the economy that is at the high end, calling for top research, top salaries and long-term top profits.

We have extended help to all of our allies. Why? Because we wanted a system of mutual security for the allied democracies that depended not just on tanks and guns and planes—and certainly we have enough of those—but on the freedom to buy and sell to each other, whether we are talking about selling beef to the Japanese or Toyotas to people in the United States.

One of the ways we did that was by deliberately reducing our trade surplus, which was overwhelming at the time Harry Truman—and General George Marshall, Secretary of State Marshall—laid down the Truman doctrine before the Congress in 1947. As James Fallows has pointed out in his recent piece in the Atlantic, the U.S. trade surplus from 1946 to 1950 just about vanished. It was a good thing. Open markets for the exports of our allies improved standards of living far beyond anything that happened in any Communist country. Now, Japan's per capita income has substantially passed ours. It has an enormous budget surplus. The rest of the world owes it more money than to any other country in the world.

Now, today, we are asking the Japanese to reciprocate. I do not know of any better example of their recalcitrance than the FSX. It is not a cultural problem. It is not some ingrained belief that they cannot buy from another country; not, as one of their spokesmen told us, when we were talking about beef, that "their intestine is of a different length than ours," and, therefore, they should not be buying our beef.

Is the FSX the best deal that we can get from the Japanese? Maybe it is. Certainty Secretary Mosbacher has worked hard and long trying to turn that deal around and has markedly improved the terms of the deal over what the last administration had done.

If we had this deal to do over, I would not accept the terms of what has been accomplished; but, under these circumstances and with the assurances now specified in black and white, I am not going to oppose this codevelopment and coproduction plan.

I have listened to my good friend, the senior Senator from Illinois, who has eloquently articulated his position I agree with so much of it. But my concern is that the horse is out of the barn. It has gone too far. We cannot put it back together.

But the story of the FSX points to three important lessons that will cost us dearly to ignore.

First, how did we set about to negotiate the deal? We sent the Pentagon and the State Department—people seeking some foreign policy objective for our country, not really concentrating on the domestic economy and how important that is to the national security of our country.

I have just returned from a trip to Brussels. As I said a few moments ago to the President of the United States, in Brussels, they are forming Europe 1992—where they are trying to set up industrial standards and procurement policies that will affect the rest of the world, where the walls are coming down within Europe. The question is—Will there be a wall built around Europe and how will it affect us? An economy will be created with 80 million more people than we have, with a gross national product comparable to our own. You go to Brussels and find that Gucci Gulch has moved there. We have over 2,000 consultants working around here. Now they have over 2,000 consultants in Brussels. Major companies around the workd are represented there as they work out their agreements. The USTR has one person in our mission to the European Community; the Agriculture Department has five.

Do you know how many people the Department of Commerce has there?

Zilch; none; not one. There is a turf fight between the State Department and the Commerce Department. Commerce people are excluded. Europe is talking about industrial standards, an arcane field in some ways. It requires expertise in commercial production to understand the implications of standards. This could be another FSX deal at its initiation.

Let us be involved in Europe 1992. Let us send the kind of people to Europe who understand where we are coming from and what it means, who can explain and sell our point of view. The Finance Committee was just in Europe. We made our points on financial services. Some of us had backgrounds in that. I think we had an impact. They changed their regulations on financial services, insofar as the recommendation of the European Commission to the various parliaments of the 12 countries.

But we have to keep our commercial interests in mind in negotiation. We did not do that, in my opinion, when it came to the question of the FSX, until very late in the day.

The second part of the lesson is that our problems with competitiveness are inextricably linked with national security. Unless we are strong here at home, we cannot maintain the defense efforts that we have to support.

Is it that we are becoming less competitive because of a lack of American ingenuity? Do not believe that.

When it comes to Nobel prizes, the Japanese have won fewer than 10. Americans? Over 150. That is the sort of thing we have been able to do with research and ingenuity.

If you look around your homes you will see the fruits of American ingenuity today. The problem is the labels on them. Who developed the microwave? American scientists at Raytheon. Who makes them? Japanese and Korean companies make 90 percent of them.

Who invented color TV? American scientists at RCA. Who makes them? European and East Asian companies make 97 percent of them; and 85 percent of those bought by Americans.

Who invented the VCR that stands right beside your television set? Stick out your chest—it was Americans. And then duck your head because—who makes them today? Japanese, Koreans, and European companies produce over 99 percent of them.

It is no better when we walk into our factories. Who invented the world's first memory chip? AT&T and Texas Instruments. Today, Japanese companies produce over 80 percent of the world's memory chips. And how dependent our Defense Department is on those memory chips.

In our country, we say, "Read my lips." The Japanese say "Read my chips." It works. We buy them, even at the Defense Department.

We cannot let America become the research laboratory for the manufacturers in the rest of the world. We have to be as strong on the assembly line as we are at the drafting board. We have to accelerate the transfer of research to applied technology in commercial production.

Now, look at what is happening with the FSX. We are a leader in world aviation. Europe, on the other hand, has spent from $10 to $12 billion subsidizing the Airbus, with no profits for the foreseeable future.

Do you have any illusions about the Japanese wanting to dominate that market? To be premier in that market? To develop that kind of competitive force in that product?

Do you have any doubts about that?

Look at the numbers. It will cost the Japanese two to three times as much per plane to coproduce the FSX as it would have to buy the F-16 off the shelf, the most modern fighter aircraft in the world. If they wanted to add something to it, we could have well done that. Clearly, they want that technology so they can build not just the FSX, but an aircraft industry.

I think they want to be premier in every line of high technology that pays the top salaries, involves top research, and results in long-term top profits.

There are those that argue we ought not to be offended by that or by the Japanese attitude toward trade; that they are merely showing the tough, hard-nosed competition that is the sort of thing we admire in America.

I think in many cases that is true. I also know there remains in America strains of the anti-Japanese virus created during World War II. The fact is that Japan has done much that is admirable. We must be careful not to excuse our own failures by laying them at the doors of competitors.

But I know how the hired guns in Washington react. Any time you criticize Japan around here, there will be some who will immediately charge us with Japan bashing. Are we overlooking some things? The Japanese are not just competitors; they are our allies. Moreover, they profit enormously by the fact that we shoulder the defense burdens of our allies. Right now it costs us from $5 to $7 billion a year for the United States to maintain its forward presence in Japan. Our purpose is to defend the democracies of Asia. Japan pays less than half of that.

Am I for rearming the Japanese? No. However, I think they can do some things for defensive purposes. But if they became once again the dominant military power of Asia, they would strike fear throughout that area.

I was talking to a group of Japanese businessmen last year. They said, "Senator, your trade deficit is the result of your budget deficit."

I said, "Well, that is interesting. I have seen a number of countries that have a budget deficit that have a surplus in trade."

I said, "I think about the disparity between the amount of money we spend for defense and the amount you spend. You spend 1 percent; we spend 5 percent. We keep 55,000 American troops in Japan. It costs us a substantial amount of money. You are the No. 2 economic power in the world; yet, we pay about $1,100 per person per year for defense while our Japanese counterparts pay about $163."

I said, "Why don't you, as the No. 2 economic power in the world, belly up to that responsibility? Why don't you pick up the tab for the American forces that are here to help defend the democracies of Asia? "

I said, "I will tell you something else. If we spent the 1 percent you spend instead of 5 that we spend we would have a substantial budget surplus. If we spent 1 percent, I will tell you you would have chaos in Japan because 53 percent of your oil comes from the Persian Gulf and you would not have the American Navy down there to keep those sealanes open."

There are those who argue that the FSX is a national security issue for the Japanese. In fact, no national security consideration could seriously have prohibited Japan from buying the F-16. Where is the difference between the mutual security interests of Japan and the United States today as allies? There are none in the Northeastern Pacific. Japan has no basis for invoking the GATT exception for national security on the FSX deal.

There are those who point to the persistent cultral forces in Japan blocking truly open free trade. That is one of the points made by James Fallows. But the Japanese decision on the FSX was not the result of some cultural difference. It was purely a Government decision. It was not someone in a supermarket in Japan deciding, "Well, I remember this Japanese product. I am comfortable with this. This I am going to buy." Or someone who says, "Well, it is made in our country, therefore, I am going to buy it." None of that kind of an ancestral reaction.

It was a decision by the top policymakers of a country. It was a decision by the same people who said when Nakasone was the Prime Minister, let us send a buying mission to America to show them we are going to turn it around, that we truly want to buy American products. There was a lot of television, a big fanfare. They bought a few American baseball bats, some California wine, but after the television extravaganza was over, that deficit remained and even grew subsequent thereto.

And then there was the Maekawa Commission, let by the former presi-

dent of the Bank of Japan—and I believe he is sincere when he made this kind of an offer. He called for redirecting Japanese consumption inward—as they did after the 1986 agreement on semiconductors, which promised a much more open market for our producers than actually occurred, as they did after the recent agreement to buy paging devices from Motorola, when they excluded motorola from the profitable areas of the financial districts while giving those to the domestic producers.

In contrast to our attitude after World War II, Japan seems bent on subordinating everything to running $50 to $60 billion a year trade surplus, even to the point of excluding superior imports and endangering the national security of the United States.

It is not just America that gets excluded from the Japanese markets. Japan is an equal opportunity protectionist. It freezes us all out. The policy endangers all allied democracies. While talking to Europeans, they said that is their fear, that is their concern, and that is the kind of resentment that is building up. Japan must understand that. This happened to them before. They felt walled in, they felt excluded, and they meant to break out of it, and finally resorted to the military to try to accomplish that.

But as I talked to people in Europe, they said, "We are not worried about you. You have an open market. You are the biggest consumer in the world. You are our largest customer. We do not want to hit you."

I said, "Well, I think that is true. I do not really think you do, but it is the ricochets that worry me as you try to include us and exclude them.

My friends in Japan should keep that in mind because such a policy carried on and on will endanger Japan. It will create barriers to their products around the world.

In Mending Wall, Robert Frost's narrator describes a man who says good fences make good neighbors. But then the narrator goes on to say, "Before I build a wall, I'd ask to know what I was walling in or walling out."

Deals like the FSX are building blocks in the wall around Japan. They will block not foreign competition, but the friendship and the openess Japan will need from its allies. It is a wall that needs to be dismantled block by protectionist block. Tough competition is well and good, but Japan should not expect us to give away the store in the process, much less California, and the administration should not let them.

Mr. President, I yield the floor.

Mr. D'AMATO addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from New York [Mr. D'AMATO].

Mr. D'AMATO. Mr. President, the whole manner of the FSX deal has been bothering me more and more each day. I think what upsets me the most is the deliberate confusion of the facts by many of the proponents of this deal. I am even bothered by the initials FSX.

People in the Pentagon are famous for coming up with catchy acronyms for their programs, but this one just does not roll off the tongue—FSX. There have been some gems, though. Take, for instance, the passive infrared guidance system, PIGS, or the global atmospheric research program, GARP, or how about the study of advanced technological targets for intelligence research and exploitation, SATTIRE.

To make the name FSX easier to say, I think we would pronounce it fiddlesticks. Webster's unabridged dictionary's definition of fiddlesticks is one word—"nonsense." That is just what this deal is, nonsense. It is nonsense for the Japanese to spend three times as much and take twice as long to get a fighter airplane. It is nonsense for the United States to sell $7 billion worth of F-16 technology for a song, and it is nonsense to believe that Japanese technology will flow back to the United States when we are the leaders in all of the areas involved. As we clear away the fog and the smoke that has been generated and sue the spin doctors for malpractice, what is left? What is the essence of the argument on whether we should allow this agreement to go through or not? A noted scholar long ago pointed out that politics is the business of deciding who gets what. Perhaps an examination of who is getting what in the fiddlesticks deal will lend clarity to the matter.

The first and foremost player in this political game is Japan. What is it they want from this deal? From history and negotiations, their consistent statements, their paramount goal is to have a fighter development program. It is also true that they are concerned about the defense of their homeland.

But if that was their primary concern, Mr. President, the defense of their homeland, then would they not buy the F-16 off the shelf, have them cheaper, have them quicker than fiddlesticks? No, Mr. President, the Japanese want to develop not only fighter airplanes but a whole new industry. This is their goal. We should not forget it or be distracted by secondary arguments.

Mr. President, my colleagues have heard the arguments. Invariably when I talk to them, whether on the record or off the record, I hear statements like this: "Well, if we could get the Japanese to buy the F-16, it would be great. It's the fair thing, it's the right thing." But they will not. Is that what we teach our children? Is that how we deal with friends? We admit that it is the fair thing, it is the right thing, it is the economical thing, it is the best way of burdensharing.

I am sick and tired hearing my colleagues come to this floor and say Japan is sharing the burden. Is this true burdensharing? No. Far less. True burdensharing, true comity, as it relates to friends, means meeting legitimate needs and in this case would be to buy the F-16.

If we do not have the courage and the guts to stand and say to our friends, "Do what is right," how are we going to ask anybody else to do what is right? We have an area that is so clear. This is not shaded. Maybe it is about time we said to our allies and so-called friends, be fair. There is not a legitimate reason for them to turn down the purchase of the F-16. The United States of America now is acting in a cowardly manner. Every area of the executive has sold out. The Defense Department should hang their heads in shame. What nonsense to talk about technological flowback. When one reads the GAO report, it clearly states there is none. We are superior in all these areas, and yet we have make-believe comity. Is it because we are afraid that we may be held hostage as a result of the great economic clout that Japan has? If we continue to conduct ourselves in this manner and give away our industrial base and technological achievements, what will the future hold? How will we deal with the Japanese if in a matter that is so clear they are able to give us the business with fiddlesticks, with nonsense? What happens when there are areas of true disagreement, shades, where the question is not so crystal clear? What happens then? I fear that matters will grow worse. Talk about the economic colonization of America. No one could have believed it a few years ago. We have people writing about the purchase of California, making it a free area, the Japanese yen being used as our currency.

Two weeks ago, Mr. President, I visited my dad in the hospital. He is recovering from minor surgery. He asked me what we were doing in the Senate. I told him about the FSX. My dad is a veteran of World War II. He listened and asked some questions and I tried to answer as best I could. He said to me, "Son, it sounds to me like this is Pearl Harbor without bombs." He said, "Worst of all, it sounds to me that here we have a clear warning and your and your fellows down there don't have the courage to do what you should be doing."

Mr. President, we are not talking about the purchase of sushi, and Sonys, and Toyotas. We are talking about the sale of our industrial base in an area that is important. My staff has developed a very comprehensive paper on the strategic areas where the Japanese have targeted our technolog-

ical areas of expertise. Nine of them concern areas as they relate to fighter airplanes, 8 of them related to submarines, 20 some odd in areas that will determine whether or not the United States is able to be competitive in future centuries and Japan has targeted them. Are we going to continue to sell and give away the technological achievements that in so many cases we, the United States, have discovered and have literally frittered away?

Mr. President, if we cannot stand now, if we succumb to the pressure and the subtleties of those who say, "Oh, this would be terrible if we insisted on doing what was right?" Can you imagine? That is the argument. No one will argue about the merits of whether or not the Japanese should purchase the F-16. They simply respond, "Well, they won't do it."

Mr. President, we have not lost the ability then to take measured response to the request of a reasonable proposition. We still are a valued trading partner and still have economic clout of our own. But if in this instance we are fearful of asking the Japanese to do what is right, what is proper, what will be in our mutual interest as it relates to defense and trade, then when can we be expected to stand up and ask for fairness and assert ourselves for what is right.

I thank the Chair.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Rhode Island.

Mr. CHAFEE. I wonder if the Senator from New York will yield for a couple of questions.

Mr. D'AMATO. I yield for a couple of questions.

Mr. CHAFEE. What does the Senator propose? Here we have a situation where the Japanese said they are not going to buy the F-16 and so working from that decision we work it around until we end up getting 40 percent of the deal. It seems to me that is pretty good bargaining. The Senator talked about getting tough.

Mr. D'AMATO. May I respond?

Mr. CHAFEE. Let me finish, if I might. The Senator said, "Let's get tough." What is the solution of the Senator from New York in getting tough? What do you do?

Mr. D'AMATO. As the Senator has indicated, there have been statements to the effect that the Japanese indicated long ago they would not buy the F-16. Never did we seriously pursue that. Never did we, or did our people in our deliberations say we insist that you buy the best plane at the cheapest cost, that we are not going to codevelop and that if you go it on your own and turn us down as it relates to this, then we will have to take actions that will treat your products in a similar way. You cannot have it two ways and say on one hand that we should have the right to free access to your markets, where our products are superior and cost about the same or less and on the other when you have them saying, "No, America, we have the right to turn you down."

Mr. CHAFEE. Now, let us just pursue this. First of all, bear in mind that the French produced their own fighter, the British produced their own fighter, and the F-16 is licensed to a series of other countries. But you have not yet crossed that threshold. They do not yield to our persuasion. They are not going to buy it. They are going to build their own. What are the further steps one takes?

Mr. D'AMATO. The distinguished Senator from Rhode Island knows there are many. There are many subtleties that can be practiced before one embarks upon a course of action that makes it known that he is serious. I suggest that there is a great array of weapons in the arsenal of trade, and that this is a matter of trade and fairness, and that we have not been treated fairly. I also suggest that the Congress of the United States is a legitimate place to say enough is enough. There are those who say this will embarrass the administration, no one will take our word.

We have a democracy. A deal is not a deal until we the Congress have signed off.

The distinguished Senator from Rhode Island could mention any number of actions that would be appropriate. But we have failed to stand up to the Japanese and insist on fairness. That is my point.

Mr. CHAFEE. We are in a very unusual situation here where if somebody does not buy our product——

Mr. D'AMATO. Which is the best.

Mr. CHAFEE. For their own reasons they choose not to buy our product. Assume it is the best.

Mr. D'AMATO. The cheapest.

Mr. CHAFEE. The cheapest.

Mr. D'AMATO. And can be produced earlier.

Mr. CHAFEE. It can be produced earlier. Every one of those facets can be met, just as the Europeans could have bought our Boeings and our McDonnell Douglas aircraft and they chose not to. They chose to go ahead and build an Airbus. They were illogical. They were unreasonable. They were not fair, but they did it.

Now the Japanese are saying the same thing. And by the way, there is nothing secret——

Mr. D'AMATO. Will the Senator yield?

Mr. CHAFEE. Could I just finish.

There is nothing secret about building an airplane. The Japanese do not have to rely on our technology or these codes. If they concentrate on it, they can build a good airplane just as we are doing.

Mr. D'AMATO. Will the Senator——

Mr. CHAFEE. But the Senator has not yet told me. So there is the situation. They are not going to buy it and he is going to get tough. Tell us, what is the Senator going to do?

Mr. D'AMATO. There is a whole array of things that the Senator from Rhode Island knows are available to us. Let us not forget that there is a great difference between a country that is running a $50 billion a year trade surplus, which is Japan, and our European allies. There is a matter of trade and we are inextricably linked. I should think that the Senator from Rhode Island would concede that the Japanese are not spending $500 million for nothing; that certainly the Japanese have never given away money, and in their purchase of this technology they are receiving a bargain.

Mr. CHAFEE. Well, I have tried to get an answer.

The PRESIDING OFFICER. Under the previous order, the Senate is supposed to stand in recess at this time.

Mr. CHAFEE. I ask unanimous consent we might continue for 10 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I have great respect for the Senator from New York, and I have listened to this debate here, much of it carried on at the top of the lungs of various participants, but we have not yet received an answer about what we can do. I wish the Japanese would buy the F-16 and, as the Senator from New York has pointed out, that makes sense. It makes sense from their point of view, from our point of view, from the defense point of view. But they are not going to do it. So we have worked out this deal.

I think it is a pretty good deal. I think the fact that we went from zero up to 40 percent is pretty good going. What do we have? What is our leverage?

Mr. D'AMATO. If the Senator will yield, I know the next thing that will be said is, "You are going to start a trade war." But I think there comes a point in time when America can and should say if you are not going to buy the best and cheapest, deliver it at the earliest, we will selectively bar certain products from coming into this country where our industries can benefit.

It is an incredible irony while the Congress is being called upon to stop the production of the F-14, the best plane that we have serving the Navy at the present time, we are going to coproduce this plane because we are being blackmailed into it because we do not have the courage to stand up and say to the Japanese "Treat us fairly."

If we want to consider any number of products which come to the United

States from Japan, we can say they will not come in. Now, some may suggest that this will start a trade war but at some point and some time we have to stand, and if we cannot stand now when the issue is so clear, we are talking about fundamental fairness, I suggest it is going to be much more difficult in the future.

Mr. CHAFEE. We have a very interesting proposal here, that because somebody does not buy our product we think they ought to buy, we turn to them and say, "All right; if you won't buy our product which we think you ought to buy and we say it is a very fine product, therefore we are going to prevent you from selling other products here in the United States."

Mr. D'AMATO. That is a question of fairness and fair play. Is that not the principle of which we talk about free trade and fair trade? Is that not the underlying principle? Do we not have reciprocity, or is it just free trade and fair trade when you are allowed to sell your products here, but when we have something that is superior, you say, "Oh, no; we are going to do our own." I do not think that is free trade and fair trade. If you want to call me a protectionist for saying let us see to it that these principles are adhered to, then I take the burden and I will accept that label. But I do not think that is being protectionist.

Mr. CHAFEE. That is an unusual definition of not being protectionist, but I will point out to the Senator in addition, if his proposals were followed, we would be violating treaties that we ourselves have entered into. Maybe he wants to brush right by that and is not concerned. But we are starting down, I think, a very slippery path. If we are saying to somebody if you do not buy what we have, we say to other nations in the world, if you are buying an airbus, you ought to be buying a McDonnell Douglas. It is the best plane going. We say we have objectively analyzed it, and therefore, if you do not, we are going to prevent you from selling your products in the United States. That is a very interesting proposal. We might as well understand the terms that we are talking about here.

Mr. LEVIN. If the Senator from Rhode Island will yield, how is that any different from Super 301 where we say if you will not buy our telecommunications or you will not buy our auto parts or you will not buy this and that, we then have the right to put some restrictions on your VCR's, your cars, and your cameras? They are different products, but we authorize the President in his Super 301—to put pressure on the President—to finally respond to Japanese unfair trading practices, and that is the gut issue here.

They should buy our F-16's and there is a way to make them buy our F-16's. That is to tell the Japanese that if they will not buy our product that we can make cheaper and better than they can—and the F-16 is a cheaper, better product that can be made more quickly than the FSX—if they will not buy the product that we can make more efficiently, more cheaply, and more quickly to meet their military needs, then we are going to have to place some restrictions on our goods because we need a two-way street in trade.

We are not beginning down a slippery slope. We have slid down a slippery slope. We are at the bottom of that slope. We have a $40 billion trade deficit.

I am not mad at the Japanese. This is not Japan-bashing. I am mad at us. I am mad at us because we will not act to protect our own economy and our own jobs.

So, focus the fire right here on Washington. We are not aiming this at Tokyo. This is aimed right here at Washington. We should act to protect our own economic interests. They should buy our F-16's. That is the issue.

Mr. CHAFEE. That is a wonderful way to proceed. I have a house to sell. People are not buying it. They ought to buy it. What is the matter with them? They are not paying the price I am asking. Something is wrong, and I think I have a right to sue them.

Mr. LEVIN. Is the Senator saying there is no unfairness in the area of trade?

Mr. CHAFEE. The Senator's interpretation of 301 was certainly a highly unusual one. I am somewhat familiar with it, having been involved with that for a number of years. But the interpretation that the Senator has given to it is somewhat broader than Super 301 is. But all I am saying is those who are out there objecting to this deal ought to come up with a solution.

I think whoever worked this deal out did a good job. They came from a situation where people were not going to buy it at all, are going to manufacture their own, and worked it up until we are now getting 40 percent of the work. That is a pretty good deal, I would say, and whoever bargained that, I think, should be commended.

I urge that we vote down this resolution of disapproval.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

AMENDMENT NO. 101

(Purpose: Relating to the cooperative arrangement with Japan regarding the FS-X weapon system)

Mr. BYRD. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD], for himself, and Mr. PELL, Mr. DANFORTH, and Mr. MOYNIHAN, proposes an amendment numbered 101.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the first word and insert in lieu thereof the following:

SECTION 1. CODEVELOPMENT OF THE FSX WEAPON SYSTEM.

(a) IN GENERAL.—The President shall ensure that all technology, defense articles, and defense services provided by the United States or any United States corporation or entity to Japan pursuant to the agreement described in subsection (b) to codevelop the Support Fighter Experimental (FSX) weapon system shall be subject to the requirements of subsections (a), (c), and (d) of section 3 of the Arms Export Control Act.

(b) DESCRIPTION OF AGREEMENT.—The agreement referred to in subsection (a) is the agreement for which the President submitted a certification pursuant to section 36(d) of the Arms Export Control Act on May 1, 1989 (transmittal no. MC-9-89).

SEC. 2. COPRODUCTION OF THE FSX WEAPON SYSTEM.

(a) IN GENERAL.—In the event that the United States and Japan seek to coproduce the FSX weapon system—

(1) the United States and Japan shall negotiate and sign a Memorandum of Understanding (MOU) containing the terms and conditions for that coproduction; and

(2) such MOU shall—

(A) prohibit the transfer to Japan of critical engine technologies (including, but not limited to, hot section and digital fuel control technologies); and

(B) prohibit the sale or retransfer by Japan of the FSX weapon system or any of its major subcomponents codeveloped or coproduced with the United States.

(b) APPLICATION OF ARMS EXPORT CONTROL ACT.—Technology, defense articles, and defense services resulting from any coproduction of the FSX weapon system by the United States and Japan shall be subject to the requirements of subsections (a), (c), and (d) of section 3 of the Arms Export Control Act.

(c) POLICY ON UNITED STATES WORKSHARE.—It is the sense of the Congress that any Memorandum of Understanding (MOU) between the United States and Japan on coproduction should specify that the United States share of the total value of the coproduction shall be not less than 40 percent of that value, including the value of manufacturing spare parts and other support items which are part of the lifetime maintenance costs of the FSX weapon system.

SEC. 3. GAO REPORT.

(a) IN GENERAL.—Beginning 6 months after the date of enactment of this joint resolution, and every 12 months thereafter, the Comptroller General of the United States, after consultation with appropriate officials of United States agencies represented on the Technical Steering Committee, shall submit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report describing the progress made in implementing the Memorandum of Understanding (MOU) Between the United States

Department of Defense and the Japan Defense Agency on Cooperation in the Development of the FSX Weapon System, signed on November 29, 1988, and related documents thereto.

(b) DEFINITION.—For purposes of this subsection, the term "Technical Steering Committee" refers to the FSX Technical Steering Committee established jointly by the Japan Defense Agency and the United States Department of Defense.

SEC. 4. IMPACT OF MOU'S RELATING TO THE FSX WEAPON SYSTEM ON THE COMPETITIVE POSITION OF THE UNITED STATES.

(a) SOLICITATION OF RECOMMENDATIONS.—In the implementation of the Memorandum of Understanding (MOU) and related agreements between the United States and Japan regarding the codevelopment of the FSX weapon system, and in the negotiation, renegotiation, and implementation of future memoranda of understanding and related agreements concerning coproduction of the FSX weapon system, the Secretary of Defense shall regularly solicit and consider comments or recommendations from the Secretary of Commerce with respect to the commerical implications and such agreements and the potential impact on the international competitive position of United States industry.

(b) REVIEW BY SECRETARY OF COMMERCE.—Whenever the Secretary of Commerce has reason to believe that any such memorandum of understanding or related agreement has, or threatens to have, a significant adverse impact on the international competitive position of United States industry, the Secretary of Commerce may request a review of the agreement. If, as a result of the review, the Secretary of Commerce determines that the strategic commercial interests of the United States are not being served, the Secretary of Commerce shall recommend to the President any modification to the agreement he deems necessary to ensure an appropriate balance of interests.

(c) CONSIDERATION OF RECOMMENDATIONS.—(1) The President shall consider the recommendations of the Secretary of Commerce concerning—

(A) the commerical implications of any such memorandum of understanding or related agreement, and

(B) the potential impact on the international competitive position of United States industry,

in determining whether such memorandum of understanding or related agreement shall be implemented or agreed upon.

(2) Any such memorandum of understanding or related agreement shall not be implemented or agreed upon if the President determines that such agreement is likely to have a significant adverse impact on United States industry that outweighs the benefits of implementing on entering into such an agreement.

SEC. 5. DEFINITIONS.

As used in this joint resolution, the terms "defense article" and "defense service" shall have the same meanings as are given to those terms in paragraphs (3) and (4), respectively, of section 47 ot the Arms Export Control Act.

AMENDMENT NO. 102 TO AMENDMENT NO. 101

(Purpose: To prohibit the export of technology, defense articles, and defense services to codevelop the FSX aircraft with Japan)

Mr. DIXON. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment numbered 102 to amendment No. 101.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. LEAHY. Mr. President, reserving the right to object, will there be an explanation of what these two amendments are?

Mr. DIXON. In due time, may I say, Mr. President, there will be an explanation. I would be glad to explain very briefly.

Mr. LEAHY. That is all right. I do not object.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after "section" on line 3, page 1, and insert in lieu thereof the following:

(a) the proposed export of technology, defense articles, or defense services pursuant to a license and technical assistance agreement with Japan described in subsection (b) to codevelop the Support Fighter Experimental (FSX) aircraft is prohibited.

(b) An agreement referred to in subsection (a) is an agreement for which the President submitted a certification pursuant to section 36(d) of the Arms Export Control Act on May 1, 1989 (transmittal No. MC-9-89).

Mr. LEVIN addressed the Chair.

The PRESIDENT pro tempore. The Senator from Michigan.

Mr. LEVIN. Mr. President, I would be happy to withhold the request for recognition if the majority leader seeks recognition. I did want an opportunity, if I could, to seek unanimous consent to delay recess for 10 additional minutes so that I can make a statement. If that does not fit with the leader's plans, so be it.

Mr. MITCHELL. I thank the Senator from Michigan.

OATH ADMINISTERED REGARDING IMPEACHMENT TRIAL OF WALTER L. NIXON, JR.

Mr. MITCHELL. Mr. President, I note the presence in the Chair of the President pro tempore and the presence in the Senate Chamber of the distinguished Senator from Rhode Island, and I understood the distinguished Senator from Texas was here as well, and that the swearing in of the Senators from Rhode Island and Texas in connection with the pending impeachment proceeding is required. I ask that the Chair proceed to the swearing in.

Could I have the attention of the Senator from Michigan. It is my understanding that the Senator from Michigan also was not sworn in connection with the impeachment proceedings.

Mr. LEVIN. That is correct.

Mr. MITCHELL. Then I ask that the Chair administer the oath, as soon as the Senator from Texas enters, which I understand will be momentarily. Mr. President, I ask unanimous consent, to accommodate the Senator from Michigan, that following such swearing in, that the recess for the party caucuses under the previous order not commerce until the hour of 12:55 p.m.

The PRESIDENT pro tempore. Without objection, both requests are granted.

Mr. MITCHELL. Mr. President, I note the presence now of the distinguished Senator from Texas, and I ask that the President pro tempore administer the oath to the Senators from Rhode Island, Texas, and Michigan.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Senators will please raise their hands and be sworn. Do you solemnly swear that, in all things appertaining to the trial of the impeachment of Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi now pending, you will do impartial justice according to the Constitution and the law, so help you God.

SENATORS. I do.

DISAPPROVING THE EXPORT OF TECHNOLOGY TO CODEVELOP OR COPRODUCE THE FSX AIRCRAFT WITH JAPAN

The Senate continued with the consideration of the joint resolution.

Mr. CHAFEE. Mr. President, I have been listening with great interest to my colleagues debate the fighter support experimental, or FSX, agreement. Those in opposition are adamant frequently at the top of their lungs, in their belief that the United States would be unwise to proceed with this agreement. Their reasoning, is based on their view of Japan as an unreliable ally and an unfair economic adversary.

I wish to say a few words in support of the FSX agreement. I disagree with its opponents, that Japan is an unreliable ally. Quite the opposite: I think this is a relationship that is important to the United States and which should be cultivated, not severed. And second, I believe that the FSX agreement will not diminish the competitiveness of American industry. Indeed, I think this agreement helps, not hinders, our companies, and it decreases, not increases, our trade deficit with Japan.

Let us look at the facts:

First, many opponents of this FSX deal argue that Japan should buy American-made F-16 aircraft outright, off the shelf. Now, no one in his right mind would dispute that this would be the most desirable outcome for the United States.

In the mid-1980's, it became apparent that Japan needed to modernize its aging F-1 aircraft—which were built in Japan—in order to continue to pull its weight in terms of the common defense in the Pacific. In 1987, the Senate voted unanimously for a resolution expressing its sense that Japan should purchase F-16 aircraft from us, rather than develop its own. This would have been the most lucrative option for the United States, the most comfortable in terms of protecting our technology, and arguably the cheapest option for the Japanese Defense Agency.

But the fact is, the Japanese were determined to develop their own advanced fighter aircraft. They have the money to do so, they have plenty of time and patience, and they are not proscribed by any treaty or agreement from doing so. In short, there is nothing stopping the Japanese from going ahead with their plans to develop this new plane, just as the French and the British do.

So it was in the economic and security interest of the United States to persuade Japan to allow us to codevelop, and eventually coproduce, the FSX. Otherwise, there would be no work for United States companies, no Japanese yen coming into this country, no hope of obtaining technology from the Japanese, no control over the future use or sales of the FSX, nothing.

I will make this point again. The emphasis of the last few days' debate has been misleading. The choice between the FSX agreement and an outright purchase of our F-16 aircraft by the Japanese does not exist. Rather, it is a choice between participation in this cooperative endeavor, or no participation whatsoever. Let us keep this straight.

In fact, we would be doing Japan a favor by rejecting this deal. The Japanese Government has been under a great deal of domestic pressure not to go through with it. They would be quite glad to keep all the business within their borders, and delighted to retain autonomy over the final product. And I am certain that they would be relieved not to live through a debate such as this one. At any rate, we should bear in mind that the FSX agreement is our idea, not theirs. We pursued it because it is in our interest.

Another point that I have heard made and that I have read in various editorials is that this deal is somehow a giveaway to Japan. I fail to see how this is a giveaway. Again, let us look at the facts:

The entire cost of the FSX program will be funded by Japan.

Based on an estimated development budget of $1.2 billion, the U.S. development work share will be about $450 million.

Based upon an estimated production budget of $5 billion for 130 planes, the U.S. production work share will be about $2 billion.

This deal stands to create more than 22,000 man-years of employment in the United States.

There will be automatic flowback to the United States of FSX technology that is derived from F-16 technical data.

Mr. President, this doesn't look like a giveaway to me. On the contrary, it looks like a pretty good deal.

For those of us who are troubled by our large trade deficit with the Japanese—about $50 billion—this deal should come as good news. In the course of development and production of the FSX, this agreement stands to eliminate 5 percent of this trade deficit.

For those who have called upon Japan to assume a greater share of the defense burden, this agreement should be heartening. Japan has committed $6.2 billion for this program. The decision to build a new class of fighter aircraft, in order to fulfill the mission of sea-lane surveillance and antishipping, is an important part of an overall trend in Japan to spend more on its defense and on cooperation with its military allies. This trend should be encouraged.

The technology transfer involved in FSX codevelopment has also been a sticking point. Many critics of this deal fear that: First, sensitive, state-of-the-art F-16 technology will be transferred to the Japanese, allowing them to advance significantly in the civilian aviation industry; second, the Japanese will sell the FSX to third countries for profit, or worse yet, they will sell it illegally to our adversaries; third, the technology the United States gets in return has no real value to us; and fourth, the Commerce Department has not given its input as to whether this deal will hurt U.S. industrial competitiveness.

It is essential to point out that the F-16 technology that would be transferred to the Japanese does not represent the leading edge of United States fighter aircraft technology. According to former Secretary of Defense Frank Carlucci, this technology is over 10 years old. Furthermore, the United States is developing its own advanced tactical fighter [ATF] capability, not a speck of which is part of the FSX deal.

Nor is this transfer of F-16 technology without precedent. Belgium, Denmark, the Netherlands, Norway, Israel, and Turkey have all coproduced portions of the F-16.

There is much disagreement over whether Japan could use this technology to develop a commercial aviation industry. But the fact remains that no one has proven that fighter jet technology is applicable to wide-bodied commercial planes. And what astounds me as I listen to the debate on this point, is that the aerospace industry in this country supports the FSX agreement. Not merely General Dynamics, which will codevelop the plane with Mitsubishi Heavy Industries, but also Boeing and McDonnell Douglas and Rockwell and Raytheon. All of these companies are for the deal.

The very industry that opponents of the FSX agreement want to protect does not want to be protected.

If Japan wants to develop a commercial aviation industry, it will. I have no doubt that Japan can do it. But our companies do not seem daunted by this prospect, and with good reason. The American aeorspace industry leads the world, and has what it takes to stay on the cutting edge.

Critics of this deal argue that the Commerce Department did not have the opportunity to gauge the deal's potential effect on U.S. industrial competitiveness.

Again, I think these critics are overzealous. After all, it was Secretary of Commerce Mosbacher who urged that the Bush administration take a fresh look at this deal, which had been negotiated by the Reagan administration. At his urging, greater restrictions were placed on the flow of commercially applicable American technology to Japan. At his urging, stronger assurances were obtained that the United States would garner a 40-percent share in the production of the FSX.

Now Secretary Mosbacher supports the deal, and urges us to do the same. I for one am prepared to take his word for it that the Commerce Department had significant input in the final FSX agreement.

To conclude, I urge my colleagues to look clearly and realistically at the FSX agreement with Japan.

If the Congress disapproves this venture, the United States stands to lose: Jobs; funds that would decrease our trade deficit; access to useful technology; control over future use of the FSX aircraft; a say in transmission of FSX technology to third countries; the willingness of Japan to contribute to the common defense; and the good will of an important ally.

I hope other Senators will take a good look at this deal, and realize it is in the best interest of the United States.

Mr. LEVIN addressed the Chair.

The PRESIDENT pro tempore. The Chair recognizes the Senator from Michigan.

Mr. LEVIN. Senator BINGAMAN's subcommittee held hearings on the FSX. During those hearings I asked a witness from the Pentagon whether the F-16 would meet the military requirements that Japan had for a new fighter. His answer was that the F-16 could meet Japan's needs. I also asked this witness whether Japan could meet its

commitment to defend the sealanes more quickly if it purchased our F-16's than if it were to develop and produce the FSX. His answer was that there was no doubt that this commitment could be met more quickly if Japan purchased the F-16. I then asked a witness from the Commerce Department if it was cheaper for Japan to buy the F-16 than to produce the FSX. Her answer was "Yes."

Mr. President, the F-16 is adequate to meet the defense mission requirements that Japan has for a new fighter aircraft, and Japan can fulfill their commitment to defend the sealanes more quickly with the F-16, and it is cheaper for Japan to buy the F-16 than it is to develop and produce the FSX.

That being true, there is a question that permeates this debate—it is the underlying question, the fundamental issue—why will Japan not buy our aircraft? We buy their TV's, we buy their cameras, their VCR's, their cars; why will Japan not buy our F-16? It is the best plane for the best value.

Now, one answer to that question is contained in a recent report called the National Trade Estimate, which is produced by the U.S. Trade Representative. Under the category of aerospace, the report states the following:

> Japan has targeted its aerospace industry development. A coherent Japanese plan is in effect, and the Japanese Government plans to make aircraft production one of Japan's major industries within 20 years. This would mean direct competition with the U.S. aerospace industry, which is the largest in the non-Communist world.

If we need further indication, we should listen to the Japanese themselves. Yotara Eda, president of MHI, who testified in the Japan Economic Journal in January of this year, said, "The technology that we will develop and accumulate during the FSX project will be instrumental in the development of next generation planes, such as hypersonic and supersonic transports."

Now, I realize, Mr. President, that there is significant debate on the question of whether the FSX deal will provide Japan with information which will be transferable to their commercial aerospace industry. At a recent hearing, I asked the Commerce Department witness if this agreement would help Japan to further their commercial aerospace industry, and the answer was that it would help, but only minimally, because the United States will control the technologies that will be transferred to Japan.

The assumption is that we will not provide the Japanese with technological information that will allow them to get knowledge about aircraft systems integration that could be transferred to the commercial sector. Well, then you have to ask the question, why is it that Japan is willing to spend an estimated two to three times more to develop and produce the FSX than it would cost them to purchase the same number of F-16's, and why is it that this agreement would mark the first time that the United States would assist Japan in designing and developing a fighter aircraft?

The answer comes again from the Japanese themselves. We should remember very, very clearly what it is that they are saying about the FSX deal. I quote them again, the president of MHI, "The technology that we will develop and accumulate during the FSX project will be instrumental in the development of next generation planes, such as hypersonic and supersonic aircraft."

I think one of the key questions which has been asked here has been pressed by our friend from Rhode Island. That question is: They will not buy our F-16's; how are you going to force them to do it? What do you do if they refuse to buy the plane which makes the most sense for them, at least in the short term, in terms of carrying out their military mission, a plane which we know from testimony, unanimous testimony, can carry out the Japanese military mission, which can be produced more cheaply than the FSX; what do we do about it, if they refuse to buy our products? What do we do if they refuse to buy our—and then you can fill in the list yourself in any State that you happen to represent. It might be rice or might be timber, might be citrus or auto parts, or it might be telecommunications equipment. It is a long list.

But what do we do? Are we helpless, and do we say in that case, heck, we will take 40 percent of the jobs? So what if we are digging a hole for our own aerospace industry and helping the Japanese to put us out of business. We will take what we can get. Is that our response to the challenge here? My answer is, it must not be. We must end that kind of response. We must at long last tell the Japanese and others, because they are not alone in discriminating against American goods, that if you will not buy our planes, that we are not going to be able to buy the items that you produce in the quantity that you are now selling them in the United States.

That is what Super 301 is all about. It is to put some pressure, finally, on our own administration to respond to unfair trading practices, and this is an unfair trading practice. They should buy our F-16's, the way they should buy our rice and auto parts and our citrus, and on and on and on, and our beef. Why do we tolerate restrictions on American beef going to Japan if they are free to sell everything that they produce here? It is costing us jobs, and it is going to cost us part of our future, and we have to put an end to it.

And if you get away from that question, once you leave that question, then you start rationalizing this sale. But come back to the question: Why will they not buy our F-16's and what can we do to force them to open their markets to our products?

What can we do? We have to tell them simply, honestly, straightly, as an ally and as a friend, in a very straightforward fashion, that there is going to have to be a change. "You are going to have to buy our products or we are going to have to put some restrictions on your products."

There is no other way that you can function in this world. If you cannot trade your things to the other countries, then you are going to end up being a second- or third-rate economic power if you continue to buy and buy and buy and buy without being able to sell.

I believe it is that prospect, that there would be some restrictions, some reciprocal restrictions on their sales here of the products that they flood our market with, that prospect and that prospect alone is going to persuade the Japanese to engage in fair trade and to buy the products that we make better and that we make cheaper and that we make faster, and that is the F-16.

Again, if you assume they will not buy our F-16's and that you cannot do anything to force the issue, and if you assume that they can get away with it, then you start justifying the argument that 40 percent of the loaf is better than none.

And that is the assumption that we have ot turn around. We have to blow the whistle on the one-way traffic in trade. We must say firmly to Japan that, "If you will not buy our F-16's, that your government, which closes markets of Japan to so many of our goods, that your government's actions are going to precipitate a response here and we are going to have to treat you no better than you treat us in the area of trade."

So a vote to ratify the FSX deal, Mr. President, is much more than that. It is a ratification of Japan not buying our F-16's. That is what this vote is all about.

It is not just, "Are you for the FSX deal?" The vote is whether or not we are going to accept the situation where they will not buy the plane which can be made faster, better, and cheaper and which will meet their military needs. It is a ratification, I believe, if we do ratify this deal, of the seeds of the destruction of our competitive edge in aerospace.

We have a long history of coproducing aircraft with the Japanese, but we have never before worked with them on the design and development of a military aircraft. This agreement will allow them to work in concert with

one of the masters of the U.S. aerospace industry, General Dynamics, in the design and manufacture of a highly sophisticated aircraft.

This situation is analogous to a circumstance in which a person with little experience decides to become a master woodworker, a profession that demands a high degree of skill and knowledge. This person has two choices—to learn about the subject on their own and work through the trials and failures until they get it right, or to become an apprentice to a master woodworker. To observe the master's technique and tricks of the trade, would allow the apprentice to become more proficient at this profession in significantly less time than it would take to learn it alone.

I believe that even if stringent technology transfer restrictions are observed, by being apprenticed to General Dynamics in this project, the Japanese will learn more that is useful to their commercial aircraft industry in a shorter period of time than they would have on their own.

And what can they learn in spite of controlled technology transfer—systems integration.

This is the process of getting past all the obstacles that arise when manufacturing a very complex machine like a modern fighter aircraft.

Even though we will be withholding the computer codes for the flight computer, we will be assisting the Japanese in making the whole aircraft fit together.

In collaborating with GD on the development and design of the FSX, Japan will get a firsthand understanding of how to design and manufacture a first-rate airframe and then fit all the other complex parts such as the engine and the other hardware and software.

According to a recent MIT study on Japanese aircraft production—

> Systems integration—with its blend of stiff technical and managerial requirements—is the most challenging aspect of aerospace production and, given the infrequency of full scale production programs, also the hardest set of skills to develop.

And, when Japan has acquired enough knowledge to sustain a productive domestic commercial aerospace industry, the United States aerospace industry can kiss away the Japanese market; and more—we will have helped put in place the competitor who will cut into our market. Aircraft trade is one of the few areas where the United States enjoys a huge surplus with Japan, as well as worldwide. United States exports in aircraft and components to Japan have risen significantly over the past few years. For example, in 1988 the United States exported $2.7 billion in aircraft and related items to Japan, while we imported just $425 million in these items from Japan.

But, we must remember that the United States has a huge $55 billion trade deficit with Japan. Our trade deficit with Japan is larger than the next five largest trade deficits we have with other nations. This deficit has arisen in part because the Government of Japan has a policy of putting up massive trade barriers that protect their domestic industries and keep United States products out. This policy was recently highlighted in the USTR report, which alleged that here were currently over 30 trade barriers constructed by the Japanese Government.

If Japan constructs a viable commercial aircraft manufacturing industry you can then add a few more billion to our present trade deficit, further eroding our economic and national security.

Finally, Mr. President, let me reiterate: Nobody should get mad at the Japanese or any other country that takes advantage of our foolish trade policies. The focus of our people's anger for our shortsighted policies should be right here in Washington. We can control our own economic destiny like other countries control their economic destinies and like other countries fight against that one-way street in trade.

This FSX deal is bad for America, simply because Japan should be buying our planes, not our expertise. They should be buying our planes. And it is that simple and it is that vital to our country's future.

So I want to commend our friend from Illinois for the fight he has been leading here. It is a much more important fight than one deal, one vote on one deal. The implications of this vote, I believe, are far reaching and will have a dramatic impact on what the understanding is in other countries about our determination or our lack of will to insist that our economic future is going to be a bright one because the street in trade is going to be a two-way street and not a one-way street.

I thank the Chair and I yield the floor.

Mr. DIXON. Mr. President, I think now it is appropriate for us to go out for the conference luncheons and return about 2:15 or so after the conference luncheons.

But I want to say, in as strong a manner as I possibly can, that every Senator here ought to be indebted to the Senator from Michigan for his very clear articulation of what we can do if they will not buy the F-16. All this talk boils down to all our friends saying "Oh,"—when they wring their hands—"I might as well go along with this. The horse is out of the barn. The deal is done. Nothing we can do about it. What are we going to do if they don't buy the F-16?"

The Senator from Michigan told us what we can do if they do not buy the F-16. The Senator from Michigan has articulated what the policy of the United States of America ought to be. And I congratulate him, because, in his usual, clear, concise, cogent manner, the Senator from Michigan has gone right to the heart of this thing and said, "Yes, sir, yes, ma'am, there is something we can do. When we have the best product at the cheapest price and they will not buy it, there is something we can do."

And the challenge, the challenge, Mr. President, for the Senate, the challenge for the Congress, if this administration does not have the willingness to do it, is to go foward and to do it ourselves. And that is what this great debate is about.

I am indebted, as I usually am, to the intellectual capacity and the precise ability of my friend from Michigan to articulate perfectly the simple issue involved here.

I suggest, Mr. President, that we recess now until after the two conferences on the two sides and return at 2:15.

RECESS UNTIL 2:15 P.M.

The PRESIDING OFFICER. The Senate will stand in recess until 2:15.

Thereupon, the Senate, at 12:55 p.m., recessed until 2:15 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. STANFORD].

DISAPPROVING THE EXPORT OF TECHNOLOGY TO CODEVELOP OR COPRODUCE THE FSX AIRCRAFT WITH JAPAN

The Senate continued with the consideration of the joint resolution.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROCKEFELLER. Mr. President, I oppose the resolution of disapproval of the FSX agreement. I believe that the proposed arrangement on FSX, now that it contains the so-called clarifications that President Bush successfully obtained from Japan, is acceptable. It is not an ideal agreement. I would have preferred that Japan buy a fighter off-the-shelf from the United States, but that was never a realistic possibility. The current agreement will result in $2.5 billion for the United States in the codevelopment and the coproduction stages of this project, which translates into 22,000 man-years of work. Rejection of this agreement would mean that Japan will either develop a fighter indigenously or negotiate an arrangement with a European country for coproduction. In either of these cases, it would result in no sale by the United States.

I am also satisfied with the understandings on technology flow, in both directions, that are in the clarifica-

tions obtained by the President. Most important, and I think this is the most significant aspect of the entire FSX issue, I am pleased that the Department of Commerce, USTR, and other agencies concerned about American trade and competitiveness have finally become part of the process when considering this type of defense arrangement. It will require vigilant monitoring by the Congress to ensure that these agencies continue to be integrally involved in that process, and I, for one, will work hard to make sure that happens.

Finally, this agreement contributes to our security goals in Asia. The FSX will help Japan meet the defense commitments it made in the early 1980's to defend its territory, coastal waters, airspace, and sealanes to 1,000 miles, an important priority of the United States. It also means that the integration of Japanese and American forces will grow and our defense relationship will remain strong.

Throughout the postwar era, America's relations with Japan and many other countries have been defined principally by traditional security and foreign policy concerns. The world has changed, however, and trade, technology, economic, and financial matters have taken on a much greater importance in defining the U.S. national interest. We no longer have the luxury of a defense policy that excludes these vital components of our national strength. We must learn to blend our defense interests with equally important economic interests into a unified, manageable, and coherent foreign policy. The FSX issue has forced us, for the first time, to address this conflict between our traditional defense policy and critically important trade and competitiveness issues. It is unfortunate that it took such an internal battle to force those who would prefer to look at the world only through the narrow focus of defense to open the decisionmaking process to the realities of today. But it was necessary, and it succeeded.

Let me review the history of the FSX to demonstrate just how far we have come. Earlier this decade, Japan recognized the need for a new fighter to deal with the expected threat in the Northwest Pacific in the late 1990's and beyond. Initially, Japan wanted to build an indigenous fighter, independent of United States or other foreign technology. This would have been a mistake. American military aircraft are the best in the world. Japan would have had to spend far more than if they had purchased a fighter from the United States and would probably end up with a less capable aircraft. Scarce Japanese defense funds would probably be diverted from other important projects. Following considerable pressure on Japan, including an amendment to the trade bill that I fully supported, Japan decided, in October 1987, not to follow the route of domestic development and instead to enter into discussions on codevelopment and coproduction with the United States.

In November of last year, the two governments signed a memorandum of understanding on codevelopment, and in January, General Dynamics, the manufacturer of the F-16 on which the FSX will be based, signed an agreement on codevelopment with Mitsubishi Heavy Industries, the prime contractor in Japan.

Until this point, the government-to-government negotiations were carried out in the traditional way with the Department of Defense talking directly to its counterpart, the Japan Defense Agency. The Department of Commerce and other agencies responsible for our trade and technology policies were not involved in these negotiations, despite the direction contained in the Fiscal Year 1989 Defense Authorization Act that the Secretary of Defense must, when considering defense-related agreements, solicit and consider information and recommendations from the Secretary of Commerce about the effects on the U.S. industrial base.

The memorandum of understanding dealt only with the development stage of the FSX and did not include the proportion of production that would be allocated to American industry. Also, questions were raised about technology that would be transferred to Japan—technology that might hasten Japan's development of a competitive aircraft industry. Finally, there were doubts as to whether Japan would actually transfer technology back to the United States as a result of FSX development.

Congress stepped into the picture, with many of us insisting that the President seek clarifications from Japan before formally notifying the Congress of the FSX agreement. We also introduced measures, not yet enacted, to make the Secretary of Commerce a statutory member of the National Security Council and explicitly to strengthen the role of the Secretary of Commerce in the negotiation and implementation of defense memorandums of understanding such as this one to assure that adequate consideration is given to the impact on U.S. industry's international competitiveness.

The result of this activity is the agreement before us. As I said before, it is not an ideal agreement, but it is one that helps enhance our security objectives while not damaging America's competitiveness.

We face a unique situation in our relationship with Japan, and that is what has made this matter so difficult for us. Japan is at the foundation of our strategic and political relations in Asia and the Pacific. Japan is the key to our defense strategy in the Pacific and to the regional elements of our global defense commitments. We have no more important or closer ally in Asia.

At the same time, Japan represents the greatest economic challenge, or threat if you prefer that word, we have ever faced. In sector after sector, Japan is challenging our ability to compete in the world and in our own domestic marketplace. Never before in history has our principal economic competitor also been one of our closest military and political allies. We must determine how to cooperate in defense while also maintaining our economic security. These two elements, each vital to U.S. security, need not be mutually exclusive. We must learn how to blend the two elements, and I believe that we have begun this learning process with the FSX. This change in thinking in the United States is something that many of us have been insisting upon for years. I think the change has come as quite a shock to Japan and our other allies who watch us so closely. It has come as a shock to many Americans as well.

There are three messages that I hope will emerge from the FSX debate. These messages are directed at Japan, at our other military allies and trading partners, and at the administration.

First, the United States remains a strong ally of Japan. We will meet our defense commitments, and we expect Japan to do the same. Second, it is no longer business as usual where we permit a one-way flow of civilian and defense technology from the United States to Japan. If Japan expects to be treated as an equal partner, it had better act like one. The bilateral agreements we signed in 1983 and 1985, for example, under which Japan was to allow the unrestricted export of military technology to the United States, can no longer be ignored. The Science and Technology Agreement with Japan that we revised and renewed last year, and which includes provisions for a more equitable and balanced access to research facilities in Japan, must show results. Third, the United States is redefining the term "national security" to include both the traditional defense component and economic factors. We will give a higher priority to trade, technology, and competitiveness concerns as we make national decisions in the future.

My final point relates to the general problem of implementation of agreements with Japan. Americans believe that once you sign an agreement, you have a contract that will be self-enforcing. This is not the case with Japan where an agreement is only the first half of the process. Equal effort must go into the implementation phase, monitoring and assuring en-

forcement of the agreement. Our Government, unfortunately, has a history of inattention to this critical stage. We stop paying attention after the agreement is signed and are then surprised 6 months, or a year, or 2 years later to find that nothing has happened. This cannot be allowed to occur with the FSX.

In sum, I believe the FSX debate has resulted in positive change in our policymaking process. We must work hard to ensure that these changes are institutionalized in our Government. We must also watch closely to assure that Japan fully complies with the terms of this agreement. I will vote to defeat the resolution of disapproval.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. I thank the Chair.

This controversy over how and when and under what conditions Japan will develop an advanced fighter aircraft is not just on that issue alone because it seems to me like it is only part of the significant questions that ought to be raised about our military and trade policies, and specifically trade policies, with one country, Japan.

While no one can deny that the United States has a strategic interest in defense cooperation with Japan, we must not forget and we ought to remind the Japanese that as with trade, defense cooperation has to be a two-way street.

The real question that we have to ask ourselves is will this proposal be a good deal for both parties. From what I have been able to glean from the various briefings that I have attended, I have concluded the answer to that question may legitimately be "maybe." The major concerns I have with this deal are, it is my understanding that the agreement was intended to provide the United States with future technology and manufacturing processes. Yet, in the briefings that I had, I was informed that the technology we may be talking about in a few years is either available and superior to technology currently available in Japan or potential technology that we may gain from Japan in this codevelopment is just that, potential technology.

Mr. President, I have particular concerns regarding the approximate 40 percent of the work share in the codevelopment of the FSX. First of all, as it has been reported, the work share percentage is not even in the memorandum of understanding. It is in a side letter that was subsequently negotiated. As we all know, side letters have questionable legal status. Some have even argued that side letters are not worth the paper on which they are written. In addition, it is unclear what the term "approximately 40 percent" means. Does it mean more than 30 percent, but not more than 40 percent? We do not know. Furthermore, how will the work share be calculated? It is just not very clear, and that troubles me.

More importantly, this shaky work share agreement only applies to the development stage or the first six aircraft. A whole new memorandum of understanding has to be renegotiated for the production phase. This should be of great concern to our country. After development has been completed, the Japanese will clearly be in the driver's seat. At this point technology transfers will have been completed and the crucial experience in systems integration of which the Japanese have dreamed will have been gained. What will happen during the new negotiations when the United States demands this 40 percent work share on the production phase? Well, it may be at that point the Japanese can say to us, "Thank you very much; it has been nice doing business with you, but we don't need you any more."

At that point the United States will either capitulate or be cut out of the deal completely. Apparently, to the best of my knowledge, no one has been able to verify anything of substance the Japanese currently have that would even give a glimmer of value to the United States for what we are about to give up in technology. In fact, Mr. President, the General Accounting Office—this is from a briefing we had—concluded that its research of the facts could point only to what the United States was giving up to the Japanese, but the GAO was not able to point to anything specific that the United States was gaining from the transaction.

We have heard that the Japanese planned to build an advanced fighter aircraft with or without the assistance of the United States. We have heard that the Defense Department lobbied strongly for the United States to go into the codevelopment arrangements with the Japanese. The reasons that the Department of Defense gave for such an arrangement were that it had—and I want to stress the word "had"—the potential of getting back advanced technology and learning new manufacturing processes to enable us to reduce the cost of building an aircraft.

In all fairness to the Department of Defense, I should say that they did tell us it was not the flowback of technology that was of initial consideration but, rather, protecting U.S. interests and having control over the aircraft from reexport.

Mr. President, we have heard that the Japanese want to build this aircraft for reasons of national pride and security. Quite honestly, I can accept that premise. What I cannot accept, however, is whatever happened to the United States doing similar things for our own security and, more importantly, when will national pride be of as much concern to our Government.

When you talk about the Japanese, you so often hear the reason they cannot buy American products is that they do not meet the quality level expected by the Japanese or they do not meet the specific needs and requirements of the Japanese due to cultural considerations or they might say that national pride does not permit.

Mr. President, with a situation of an advanced fighter plane for the Japanese, in this particular case, it is a situation where American technology, cultural and quality considerations, when you take all those into consideration, we clearly meet or exceed any excuse for not buying American.

Mr. President, in March 1982, the General Accounting Office report on military coproduction of the F-15, several things caught my eye that I believe are relevant to our discussions on codevelopment of the FSX. This report talked about how Japanese producers had made large capital investments in new plant facilities and purchased advanced equipment such as Boron composites, titanium processing, titanium chemical milling, new profiles, siding presses, and modern surface and heat treatment facilities and equipment. In addition to these purchases they also had employee training from U.S. coproduction partners.

Now, you may ask what does all this have to do with the codevelopment of the FSX. What it has to do with our discussion today is directly related to what the report so clearly stated as far back as 1982. For example, we need to understand that the major aircraft manufacturers in Japan are subsidiaries of firms that are engaged in a variety of heavy industry other than aircraft, industry such as shipbuilding, automobiles, electric and nuclear powerplants; and we also need to recognize that in Japan military and civil aircraft are mixed throughout the production process. But, more important, we need to understand that the civil aircraft production reaps benefits from the advanced processes and technology.

Mr. President, let me now get to the heart of that discussion. According to the 1982 GAO report, they talked about MITI's strategy for the Japanese aircraft industry. Apparently MITI has outlined a development approach and strategy for the aircraft industry through joint ventures, consortia of Japanese producers and Government support. Through these efforts MITI hopes that Japan will gain sufficient experience and standing to increase its share of the world aircraft market.

Mr. President, my concern is that while I have talked about the possible offshoots from military to civilian

aviation, I am also concerned about other commercial applications. I am concerned about the economic and national security aspects of the United States, and I am concerned about the trade deficit we currently are experiencing with our trading partners in Japan.

Mr. President, I am concerned that while we have looked at this codevelopment agreement in the view of safeguards and not wanting to either let potential technology be lost, we have done so without a clear understanding of the potential gains and losses.

We need to begin to look at the effects on our own economic and national security and the loss of technological superiority that we now clearly own. We need to reinstill in American workers our confidence in their ability to compete in the world market, based on their management, labor, and intellectual skills. As a government, we need to provide the tools for the American worker, not just to compete with foreign counterparts, but with the foreign governments who are an integral part of many industries of the MITI strategy.

If we learn nothing from this agreement, other than a need for our Government to get all of the various agencies working hand in glove on future agreements, this debate will have offered a major contribution to the country's future.

In other words, I am talking about DOD getting into it early, Commerce Department getting into it late, and the Special Trade Representative, I do not believe, in it at all.

Mr. President, I began my statement a few minutes ago by saying that there is no clear evidence that the agreement is either blatantly good or bad. However, Mr. President, I will conclude by saying that everything I have learned to date has not convinced me that it is fair. And that, in my estimation, is the bottom line, when I look at a transaction, whether it be selling military equipment or agricultural products. The point is, Mr. President, that we are looking at a great big deep black hole.

There are so many ends, unanswered questions, and unknown variables in this whole FSX process, that no one knows where the process will lead us. I am afraid it may lead to disaster, and I believe this uncertainty effectively undermines any argument for proceeding with the agreement as it is currently written.

It is for these reasons that I plan to vote for the resolution of disapproval.

I yield the floor.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I now ask unanimous consent that the vote on a Dixon second-degree amendment to the Byrd amendment occur at 4 p.m. today.

I further ask unanimous consent that the remaining time for debate on the Dixon amendment be equally divided between Senators LUGAR and DIXON on their designees.

I further ask unanimous consent that if the Dixon amendment is defeated, there be a time limitation on Senator BYRD's pending first-degree amendment of 1 hour to be equally divided between Senator BYRD and Senator LUGAR or their designess.

I further ask unanimous consent that there be 10 minutes on a Heinz perfecting amendment to the Byrd amendment relating to a GAO report and that there be 10 minutes on a Dixon perfecting amendment to the Byrd amendment relating to a report to the relevant congressional committees.

I further ask unanimous consent that the vote occur on the Byrd amendment after the time has been used or yielded back.

I further ask unanimous consent that if Senator DIXON's amendment is agreed to, the Senate then vote immediately on the Byrd amendment, as amended.

I further ask unanimous consent that immediately upon the disposition of the Byrd amendment the Senate proceed without any intervening action to third reading and final passage of Senate Joint Resolution 113.

I further ask unanimous consent that no other amendments or motions be in order to the resolution and that the agreement be in the usual form.

I further ask unanimous consent that immediately following the disposition of Senate Joint Resolution 113 and a motion to reconsider and table, the Senate turn to the consideration of a resolution by Senator MURKOWSKI relating to Japanese involvement in Libyan chemical weapons development and it be considered under the following time agreement: 30 minutes on the resolution to be equally divided between Senators PELL and MURKOWSKI or their designees, that no amendment be in order, that no motions to commit be in order, and that the agreement be in the usual form.

Mr. DANFORTH. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. DANFORTH. Mr. President, if I could direct a question to the majority leader, whom I congratulate for his efforts to put together this agreement, suppose that the Dixon amendment is agreed to. Is it my understanding the majority leader has asked that if the Dixon amendment is agreed to, we then vote on the Byrd amendment?

Mr. MITCHELL. That is correct. It would be the Byrd amendment as amended by the Dixon amendment.

Mr. DANFORTH. Mr. President, let us assume that the Dixon amendment is defeated. Then we would proceed to the Byrd amendment. Is that correct?

Mr. MITCHELL. That is correct.

Mr. DANFORTH. Then let us suppose that the Byrd amendment is defeated. Would we then be back on the Dixon resolution and vote on that?

Mr. MITCHELL. According to this, we would go without any intervening action to third reading and final passage of the resolution.

Mr. DANFORTH. Mr. President, I do not want to be a fly in the ointment. I would like to speak for about 15 minutes sometime before the first vote. There is plenty of time to accommodate that, but it dependes on who gets recognized and how many Senators are on the floor. I wonder if the agreement could build in, or if the representation of the Republican floor leader could build in to either a formal or informal agreement that I might be recognized for 15 minutes.

Mr. LUGAR. Mr. President, may I respond to the distinguished Senator that, because the Senator is going to vote against the Dixon amendment—therefore, time will be controlled by this Senator—we would be willing to yield 15 minutes of the time allotted to this side to the Senator from Missouri.

Mr. SHELBY. Mr. President, reserving the right to object, I, too, would have really no objection to the unanimous-consent request except I would like at least 10 mintues to speak on behalf of Senator DIXON's resolution.

Mr. DIXON. Mr. President, I have no problem at all in allocating from my time 10 minutes to the distinguished Senator from Alabama if we have time to do this adequately. I might also say I am told that the senior Senator from South Dakota has also indicated he would like 5 minutes. But I do not know. I am also told the Senator from Ohio [Mr. METZENBAUM] would like 7 minutes. So I have a little difficulty in knowing which side those numbers would be subtracted from. I do not know how much time we are going to have left. That presents a little bit of a dilemma.

Mr. MITCHELL. Mr. President, in order to accommodate the various requests that have been made, and to permit the managers to proceed, may I suggest that my request be amended to seek a vote on the Dixon second-degree amendment to the Byrd amendment at 4:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, was the unanimous-consent agreement just approved?

The PRESIDING OFFICER. Is there objection?

Mr. LUGAR. Mr. President, reserving the right to object, and I shall not

object, but I wanted to raise the question at this point with regard to the vote of the Byrd amendment. Is it my understanding, and I think the majority leader has clarified this, but let me ask again, that in the event that the Dixon amendment expressing disapproval of the FSX deal is adopted, therefore that kills the deal at least so far as that amendment, that the Byrd amendment is to this in essence failed resolution. In other words, the Dixon resolution has the impact of a negative to kill the deal.

Mr. MITCHELL. That is correct.

Mr. LUGAR. My query is the logic of attaching an amendment to a motion which has in essence stopped something as opposed to somebody proceeding forward and therefore there being conditions to that constructive action.

Mr. MITCHELL. The answer is I believe that it presents Senators with a choice. If they are for proceeding with the transaction, they should vote against the Dixon second-degree amendment. If they are in opposition to the transaction, they should vote for the Dixon second-degree amendment. if that prevails, that in effect becomes what the Senate will be approving.

Mr. LUGAR. I understand that answer. I suppose I again wonder aloud in the event that Senators vote to stop the deal, to then offer amendments to that stoppage, sort of gratuitous action I suspect, would not have any effect in policy except maybe as a statement perhaps to be observed without particular import.

Mr. MITCHELL. The answer to the Senator's question is that in the provisions of the unanimous-consent agreement which I have sought, if Senator DIXON's amendment is agreed to, then the Senate will vote immediately on the Byrd amendment as amended by the Dixon amendment. There will be no intervening amendments. In effect, Senator DIXON's position will have prevailed.

Mr. LUGAR. If the leader will indulge me for one further inquiry, at what point should the 10 minutes on the Heinz perfecting amendment and the 10 minutes on the Dixon perfecting amendment happen?

Mr. MITCHELL. Those will ocurr in the event the Dixon amendment is defeated.

Mr. LUGAR. Only in the instance of defeat.

Mr. MITCHELL. That is correct.

Mr. LUGAR. So they would not intervene before the vote on this.

Mr. MITCHELL. That is correct.

Mr. WIRTH. Reserving the right to object, Mr. President, I will not object, but just for a point of information we have the time split evenly divided between a quarter of 3 and 4:30. Is that not the case under the pending unanimous-consent request?

Mr. MITCHELL. That is correct.

Mr. WIRTH. Of the time that is available on the side controlled by the distinguished Senator from Indiana, 15 minutes to date has been allocated to the Senator from Missouri. Is that correct?

Mr. LUGAR. That is correct.

Mr. WIRTH. How much time does that leave under the control of the Senator from Indiana?

Mr. LUGAR. As I read the clock, roughly 40 to 50 minutes.

Mr. WIRTH. Remains to the Senator from Indiana.

Mr. LUGAR. Minus 15; so 30 to 40 minutes.

Mr. WIRTH. I understand the desire to move along. I know the distinguished Senator from New Mexico wants an allocation of time, and I do as well. Is this the time to ask the distinguished Senator from Indiana, and the majority leader, to be included in this unanimous-consent request? I would like to be able to speak for 7 minutes. I do not want to speak for the Senator from New Mexico. It seems to me as long as we are allocating this time we do not want to be left with a minute or 2 at the end of the afternoon.

Mr. LUGAR. Let me respond to help the leader, and I will make time available both to the distinguished Senator from Colorado and New Mexico following the adoption of the request.

Mr. MITCHELL. Mr. President, may I amend the request to ask that the vote on the Dixon second-degree amendment to the Byrd amendment occur not later than 5 p.m.? Let me explain that—so that all of the Senators who have expressed an intention to speak to this important issue be accommodated. I think it is very important that no Senator feel he or she has been cut off or prevented from expressing this views. This is an important issue. I want to emphasize that. Every Senator ought to have the full opportunity to express his or her views but in the event all of the time is not used we do not then just have to wait around. So that under this request, as amended, the vote would occur not later than 5 p.m., if the time is not all used and yielded back. And the vote will occur as soon as that occurs.

Mr. GRASSLEY. Reserving the right to object, does that take into consideration the fact that I had no conditions on my speaking at the time I gave up the floor for this unanimous-consent agreement? I would like to finish my remarks and not be hurt by any agreement. That is why I came over here early in the first place.

Mr. MITCHELL. The Senator has full opportunity to express his views. I think if he spoke for 50 or 60 more minutes, he would present problems for the manager on this side. But I take that not to be the Senator's intention.

Mr. GRASSLEY. That is not the case.

Mr. MITCHELL. So, Mr. President, therefore, I renew the request, as amended, that the vote occur not later than 5 p.m.

The PRESIDING OFFICER. Is there objection? If not, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. MITCHELL. Mr. President, I now ask unanimous consent that the majority leader, after consultation with the minority leader, return to the consideration of the conference report on the minimum wage, H.R. 2.

I further ask unanimous consent that when the Senate considers that conference report, it be under the following time limitations: 2½ hours equally divided between Senators KENNEDY and HATCH, or their designees, with 30 minutes of Senator KENNEDY's time under the control of the majority leader.

I further ask unanimous consent that at the conclusion or yielding back of time the Senate proceed without any intervening action to vote on the conference report.

The PRESIDING OFFICER. Is there objection?

Mr. LUGAR. Mr. President, reserving the right to object, I shall not object, I simply want to state that this request has been cleared with the minority leader, and on his behalf I am prepared to accept the request.

The PRESIDING OFFICER. Is there objection? If not, it is so ordered.

Mr. MITCHELL. Mr. President, I thank my colleagues.

DISAPPROVING THE EXPORT OF TECHNOLOGY TO CODEVELOP OR COPRODUCE THE FSX AIRCRAFT WITH JAPAN

The Senate continued the consideration of the joint resolution.

Mr. BINGAMAN addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. LUGAR. I yield 10 minutes to the distinguished Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I rise today to speak in opposition to the resolution before us, which would disapprove the proposed FSX agreement between the United States and Japan.

I do so with some reluctance because I regret finding myself on the opposite side of this issue from my good friend from Illinois, Senator DIXON, with

whom I have worked closely on the Armed Services Committee on many matters and on this issue in particular.

Our paths on this issue have only recently separated. And I will explain in a few moments why they have.

But first let me make a few general points about the context in which this issue arises.

I have followed this matter closely for 3 years now. I saw from the outset a very high potential for this issue to become a lightning rod for broader frustrations in the United States-Japan relationship. I share those frustrations over an intractable trade deficit which Japanese protectionist policies exacerbate, over Japanese carelessness in exporting technology to the Soviet Union in the Toshiba case and to Libya in the chemical weapons case, and over Japanese reluctance to take on a greater role in our common defense and on third world debt.

I have been particularly concerned about the trade deficit. When I first visited Japan in early 1985, a senior Japanese official predicted to me that the bilateral trade deficit, then about $35 billion, had turned the corner. Any further increase in the Japanese surplus would be as unacceptable there as it is here. Now the deficit stands at $55 billion and it is likely to worsen significantly if the dollar continues its recent gravity-defying climb. And we have an administration locked in debate over whether to cite Japan under the Super 301 provisions of last year's trade bill. That should not even be a close call.

I have fought for honest implementation of the semiconductor agreement with Japan and supported sanctions for Japan's failure to live up to that agreement. I have criticized Japanese performance under the telecommunications agreement, and believe that that needs to be cited by the administration in its 301 actions.

I recognized from the outset of my involvement in the FSX deal back in 1986 that we could not keep these trade tensions separate from our defense relationship with Japan. That was essentially Secretary Weinberger's stand. I did not think then nor do I think now that such delinkage of defense from trade was possibly sustainable.

That is why I worked with Senator BYRD and Senator DANFORTH in 1987 to try to get this issue before the Congress and to try to change the way it was being viewed by the State Department and the Defense Department. In the summer of 1987 I was a cosponsor of the Byrd-Danforth amendment to the trade bill which urged Japan to buy an off-the-shelf American aircraft. That amendment was passed by the Senate 96-0. But frankly the amendment got more attention in Japan than it did here. I think it did play a role in convincing the Japanese not to pursue a totally indigenous aircraft and instead to codevelop and coproduce a variant of the F-16.

The Japanese announced that decision in the late summer of 1987. My view at the time was that that was potentially a step in the right direction, if the codevelopment and coproduction agreement were properly negotiated. I regretted that we had not been able to persuade the Japanese to buy an F-16 off-the-shelf. I regret that we didn't make a stronger attempt to persuade the Japanese that summer. I agree with my colleague from Illinois that that would have been the better alternative from the point of view of both the common defense and reducing the bilateral trade deficit.

This codevelopment decision by the Japanese Government was fundamentally protectionist, at least as mainstream American economists define protectionism. It reflects a Japanese industrial policy aimed at preeminence in the long run in high technology, high value added industries where they believe their natural comparative advantage lies.

But I would point out that the Japanese are in lots of company in taking a protectionist approach to the aerospace industry. Our European allies are currently developing both the European fighter aircraft and the Rafale. And Sweden is beginning production of the Gripen. We as an alliance are suffering from our economic rivalries. The term often used for this state of affairs is "structural disarmament." Unlike the Soviet Union, which truly is the arsenal of the East bloc, we in the West habitually duplicate R&D and production of weapons systems. Only the United States can afford to produce enough aircraft to get unit prices down. Our allies all produce very expensive aircraft in small quantities. I do not condone this state of affairs. I hope someday that the Nunn amendment for cooperative development and production will lead to a more productive Western arsenal.

But if we judge the FSX deal as clarified by President Bush in comparison with the European developments, it looks pretty good. The Japanese are modifying a United States plane, as we requested our European allies to do. The Japanese will pay for this entire development. Not a cent will come from U.S. taxpayers. Indeed, it is vital that we look at this agreement on its own merits compared to realistic alternatives. We cannot use it to solve all the problems in our relations with Japan or all the problems we have internally in this country with fostering an environment that will arm us for competition in the international marketplace.

Last year, the Armed Services Committee took two actions on the FSX deal as it was then evolving.

First, we were concerned that the Japanese had taken the lead in defining what codevelopment and coproduction meant. In the committee's report last year, we made it very clear that simply transferring American technology to Japan in exchange for a license fee would be unacceptable. We laid down conditions that I think are still appropriate to our consideration of the FSX deal today. Our conditions were that the United States get meaningful workshare in both the development and production phases and that that technology derived from U.S. technology in the development of the plane flow back to us expeditiously and without charge. Privately we told the Defense Department that "meaningful" meant 35 to 45 percent.

I ask unanimous consent that the Armed Services Committee's report language be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JAPANESE FIGHTER DEVELOPMENT (FSX/F-16)

The committee has closely followed the discussions between the United States and Japanese Governments on the development and production of the FSX aircraft for Japan.

Last year, the Japanese Government decided to codevelop and coproduce the FSX with General Dynamics on the basis of F-16 technology. While the committee would have preferred outright purchase by Japan as the most efficient use of defense resources, particularly in light of a 1987 trade deficit with Japan of over $60 billion, the committee regarded codevelopment and coproduction as the next best alternative.

The committee is concerned, however, that the United States and Japan have very different views of the way in which a codevelopment and coproduction program should be carried out. The committee's view is that U.S. officials should ensure that before export licenses are issued for detailed F-16 airframe technical data, agreed U.S. participation in the codevelopment and coproduction provides meaningful workshare for U.S. industry on the FSX/F-16 airframe and that Japan flows back expeditiously and without charge any technological improvements substantially derived from technology provided by the United States. The U.S. Government should not enter into a memorandum of understanding with the Japanese Government on FSX/F-16 that simply transfers American technology and jobs to Japan with nothing more than a license fee in return.

Mr. BINGAMAN. Mr. President, the second thing we did last year was that we urged DOD to get the Commerce Department involved in the negotiation of this and similar MOU's with our allies. We were concerned that DOD and State were not adequately factoring in U.S. economic interests. We thought that our allies did a much better job of integrating their national security and economic policies.

The allies do this almost as a matter of personnel policy. In the FSX case, one of the chief Japanese negotiators from the Japanese Defense Agency,

Mr. Yamamoto, is actually on detail from MITI, the Ministry of International Trade and Industry. He naturally thinks of trade and economic development first and defense second.

What we did with last year's Defense bill is include a provision, section 824, which directed the Secretary of Defense to regularly solicit and consider the views of the Secretary of Commerce in the negotiation of MOU's such as the FSX MOU.

I ask unanimous consent that that provision be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PROVISION AS AUTHORED BY SENATOR BINGAMAN IN THE 1989 DEFENSE AUTHORIZATION BILL

SEC. 824. DEFENSE MEMORANDA OF UNDERSTANDING.

Chapter 148 of title 10, United States Code, as amended by section 821, is further amended by inserting after section 2503 the following new section:

"§ 2504. Defense memoranda of understanding

"In the negotiation and renegotiation of each memorandum of understanding between the Secretary of Defense, acting on behalf of the United States, and one or more foreign countries (or any instrumentality of a foreign country) relating to research, development, or production of defense equipment, the Secretary of Defense shall—

"(1) consider the effect of such proposed memorandum of understanding on the defense industrial base of the United States; and

"(2) regularly solicit and consider information or recommendations from the Secretary of Commerce with respect to the effect on the United States industrial base of such memorandum of understanding.".

Mr. BINGAMAN. That is where we stood last summer. Congress had given pretty clear direction to the Reagan administration. While the Defense authorization bill did not ultimately become law until September 29, it was clear by late June that these provisions would be included in any bill that did emerge after the President's initial veto of the bill.

But my strong sense is that the Reagan administration did not take these matters to heart. The Commerce Department was not involved in the FSX negotiation or given a copy of the proposed MOU and side letters until after it was signed last November.

Thus early this year I was not satisfied with the FSX agreement from the point of view of both the substance of the agreement and the process by which it was reached. The production workshare language was, in my view, totally deficient. The technology flowback provisions had significant holes in them. And General Dynamics appeared ready to transfer technologies beyond any that I had previously envisioned.

I expressed my concerns personally to General Scowcroft at the end of January prior to the Prime Minister Takeshita's visit. I joined Senator HELMS in authoring a letter which nine other Senators cosigned expressing our reservations about the agreement and asking President Bush to order a comprehensive and deliberative interagency review of the FSX agreement.

I commend President Bush for ordering the review we requested. I commend Secretary of Commerce Mosbacher and the other civilian agency officials for the responsible approach they followed once brought into the process. I think the interagency debate leading up to the President's mid-March decision to seek clarifications from the Japanese on key points of the MOU was very constructive. It uncovered the problem areas in the Reagan administration agreement and came up with potential solutions to those problems if the Japanese wanted the agreement to work.

I was in Japan at the end of March with the House majority leader, Congressman FOLEY, and other House Members. It was not at all clear, at that time whether the Japanese would accept these clarifications. They regarded them as onerous. I told them that the President could not sell the agreement in the Congress without them.

Ultimately, the President did announce an agreement on April 28, and all of the points of concern I had raised with the Reagan agreement were addressed.

We now have an approximately 40 percent production work share, worth at least $2 billion and probably much more. This is in addition to the $480 million development work share previously negotiated. At a hearing last week in the Armed Services Committee, Mr. William Clark of the State Department said that 35 or 37 percent would not be approximately 40 percent in the U.S. view. He said 40 percent is essentially a floor for the U.S. production work share. This is an enormous improvement over the still classified production work share language negotiated earlier.

Second, many significant technologies included in the licensing and technical assistance agreement between General Dynamics and Mitsubishi Heavy Industries will be scrubbed from that agreement. Others have already cited that list.

I ask unanimous consent that a point paper on this be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FSX TECHNOLOGY TRANSFER

OBJECTIVE

To restrict the release of sensitive military and commercial technology in the FSX program.

RESTRICTIONS

Items not to be released because Japanese are developing their own unique systems:

AN/APG-68V Fire Control Radar;

Electronic Warfare Suite;

LN-39 Inertial Navigation System;

General Avionics Computer Hardware.

Items not released due to military sensitivity:

AMRAAM—Advanced Medium Range Air-to-Air Missile;

LANTIRN—Low Altitude Navigation and Targeting Infrared for Night Systems;

Nuclear Capability;

Software for the above items purged or deleted from released Operational Flight Programs.

Items not released due to commercial sensitivity:

All designer notes and comments purged from released software source code;

Digital Flight Control Software Source code;

Parametric experimental methods;

Airfoil and Wing Design methods;

Advanced CAD/CAM technology;

Carbon/Carbon Technology;

High Temperature materials technology;

VHSIC microcircuit design or manufacturing technology;

Engine Hot Section and Electronic Fuel Control technology (in development phase, engines will be sold as end items only).

CONCLUSIONS

FSX technology release has been thoroughly reviewed and is consistent with USG release policy and prior program precedence.

Restrictions were imposed to protect both national security and national competitive advantages.

Sensitive US technology is adequately protected in the FSX program.

Mr. BINGAMAN. Finally, the technology flowback provisions have been greatly clarified. The Japanese Ambassador has listed only four items as nonderived technology—the radar, electronic countermeasures, inertial reference system, and mission computer hardware. We will have full access to all other technologies free of charge. The four nonderived technologies will also be available if we can reach agreement with Japan on the terms.

I know there has been a great deal of discussion over the past few days about whether we will really get any technology flowbacks from Japan.

I accept the GAO criticism of the cocured composite wing technology and the phased array radar modules. These are very high risks areas on which we should not count for flowback. But it is inconceivable to me that Japan has no technology in which we would be interested.

Japan spends 2.9 percent of its GNP on research and development. Almost all of that research, over 2.8 percent of GNP, goes to civilian and commercial purposes. In contrast we spend only 1.9 percent of GNP on civilian research, and another 0.8 percent on defense research. Their comparative advantage is in dual use technology and in manufacturing excellence as we all

know from our experience as American consumers.

Last week the Defense Department released a report comparing the United States with NATO and Japan in the 22 technologies they deemed most important to our long-term security. In five of those technologies Japan was deemed to be significantly ahead at least in some niches: Microelectronic circuits and fabrication, machine intelligence and robotics, integrated optics, superconductivity, and biotechnology. In gallium arsenide, fiber optics, and composite materials, they are judged to be capable of making major contributions. In phased array radars they were not.

There should be little doubt that Japan is the other technological superpower. We can and must learn from them. This agreement will give us the opportunity to do so.

Mr. President, I believe the agreement is now acceptable. It is not a technological giveaway with nothing in return. It meets America's economic and defense interests as well as it possibly can in a negotiated environment.

The key will be implementation. The Commerce Department must play a major role in implementation of the FSX agreement and my understanding is that they will serve on the technical steering committee that will oversee implementation.

I also support legislation introduced by Senator DANFORTH to further strengthen Commerce's role in the negotiation and implementation of MOU's so that we don't repeat the disarray of the FSX case in the future.
